Congressional Record

SEVENTY-FOURTH CONGRESS, SECOND SESSION

SENATE

MONDAY, MAY 11, 1936

(Legislative day of Friday, Apr. 24, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its reading clerks, announced that the House had passed, without amendment, the joint resolution (S. J. Res. 260) to provide an additional appropriation for folding speeches and pamphlets for the Senate for the fiscal year 1936.

The message also announced that the House had passed the following joint resolutions, in which it requested the concurrence of the Senate:

H. J. Res. 497. Joint resolution to permit articles imported from foreign countries for the purpose of exhibition at the International Petroleum Exposition, Tulsa, Okla., to be admitted without payment of tariff, and for other purposes; and

H. J. Res. 547. Joint resolution for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition, to be held in Cleveland, Ohio, beginning in June 1936, and for other purposes.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 381. An act for the relief of the Confederated Bands of Ute Indians located in Utah, Colorado, and New Mexico;

S. 1075. An act for the relief of Louis H. Cordis;

S. 3645. An act for the relief of Dampskib Aktieselshap Roskva;

S. 3685. An act for the relief of George Rabcinski;

S. 4395. An act for the relief of the State of New Jersey;

S. 4447. An act for the relief of J. L. Summers;

H. R. 3823. An act for the relief of the parents of Albert Thesing, Jr.;

H. R. 11035. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1937, and for other purposes;

H. R. 11098. An act to provide for terms of the United States District Court for the Middle District of Pennsylvania to be held at Wilkes-Barre, Pa.;

H. R. 11994. An act to provide for the establishment of a term of the District Court of the United States for the Western District of Oklahoma at Shawnee, Okla.; and

H. R. 12098. An act making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1937, and for other purposes.

CONSIDERATION OF UNOBJECTED BILLS TOMORROW

Mr. ROBINSON. Mr. President, I ask unanimous consent that on tomorrow, after the conclusion of the routine morning business, the Senate proceed to the call of unobjected bills on the calendar.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the order is entered.

DEATH OF SENATOR PARK TRAMMELL

Mr. FLETCHER. Mr. President, last Friday evening, about 8:30 o'clock p. m., my colleague the late junior Senator from Florida, Hon. PARK TRAMMELL, passed away. Appropriate services in commemoration of his distinguished public services will be held later. For the present, I offer the resolutions, which I send to the desk.

The VICE PRESIDENT. The resolutions will be read.

The resolutions, Senate Resolution 296, were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of Hon. PARK TRAMMELL, late a Senator from the State of Florida.

Resolved, That a committee of six Senators be appointed by the Vice President to take order for superintending the funeral of the deceased Senator.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

The VICE PRESIDENT. Under the second resolution the Chair appoints as the committee on the part of the Senate the Senator from Florida [Mr. FLETCHER], the Senator from South Carolina [Mr. SMITH], the Senator from Maine [Mr. HALE], the Senator from Georgia [Mr. RUSSELL], the Senator from New Mexico [Mr. HATCH], and the Senator from Indiana [Mr. MINTON].

Mr. FLETCHER. Mr. President, as a further mark of respect to the memory of the deceased Senator, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 12 o'clock and 3 minutes p. m.) the Senate adjourned until tomorrow, Tuesday, May 12, 1936, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 11 (legislative day of Apr. 24), 1936

DIPLOMATIC AND FOREIGN SERVICE

Cornelius Van H. Engert, of California, now a Foreign Service officer of class 2, to be a Foreign Service officer of class 1 of the United States of America.

PUBLIC WORKS ADMINISTRATION

Arthur S. Tuttle, of New York, to be State director of the Public Works Administration in New York.

APPOINTMENTS IN THE REGULAR ARMY

MEDICAL CORPS

To be first lieutenants with rank from date of appointment

First Lt. Bertrand Thomas Fitzmaurice, Medical Corps Reserve.

First Lt. Maurice Crawford Davidson, Medical Corps Reserve.

First Lt. Howard Hansen, Medical Corps Reserve.

First Lt. Raymond Edward Duke, Medical Corps Reserve.

First Lt. Robert Stuart Nelson, Medical Corps Reserve.

PROMOTIONS IN THE REGULAR ARMY

TO BE COLONELS

Lt. Col. John Stephen Sullivan, Infantry, from May 1, 1936.

Lt. Col. James Lawton Collins, Field Artillery, from May 1, 1936.

Lt. Col. William Caldwell McChord, Air Corps, from May 1, 1936.

Lt. Col. William Rudicil Henry, Field Artillery, from May 1, 1936.

TO BE LIEUTENANT COLONELS

Maj. Edwin Coit Kelton, Corps of Engineers, from May 1, 1936.

Maj. James Allen Lester, Field Artillery, from May 1, 1936, subject to examination required by law.

Maj. Mason James Young, Corps of Engineers, from May 1, 1936.

Maj. Layson Enslow Atkins, Corps of Engineers, from May 1, 1936.

Maj. Edwin Albert Zundel, Field Artillery, from May 1, 1936.

Maj. Clinton Wilbur Howard, Air Corps, from May 1, 1936.

Maj. Charles Manly Busbee, Field Artillery, from May 1, 1936.

TO BE MAJORS

Capt. David Grove, Quartermaster Corps, from May 1, 1936.

Capt. James Horace Barbin, Quartermaster Corps, from May 1, 1936.

Capt. Wiley Hubbard O'Mohundro, Infantry, from May 1, 1936.

Capt. Herman Henry Pohl, Corps of Engineers, from May 1, 1936.

Capt. Kenneth Mason Moore, Corps of Eugineers, from May 1, 1936.

Capt. Edmond Harrison Levy, Corps of Engineers, from May 1, 1936.

Capt. Thomas Dodson Stamps, Corps of Engineers, from May 1, 1936.

Capt. Bartley Marcus Harloe, Corps of Engineers, from May 1, 1936.

Capt. Girard Blakesley Troland, Corps of Engineers, from May 1, 1936.

MEDICAL CORPS

To be colonels

Lt. Col. William Herschel Allen, Medical Corps, from April 30, 1936.

Lt. Col. Larry Benjamin McAfee, Medical Corps, from May 1, 1936.

Lt. Col. Adam Edward Schlanser, Medical Corps, from May 2, 1936.

Lt. Col. Joseph Edward Bastion, Medical Corps, from May 5, 1936.

Lt. Col. Alexander Taylor Cooper, Medical Corps, from May 7, 1936.

Lt. Col. Taylor Edwin Darby, Medical Corps, from May 9, 1936.

Lt. Col. Harry Reber Beery, Medical Corps, from May 15, 1936.

Lt. Col. Royal Reynolds, Medical Corps, from May 17, 1936.

Lt. Col. Ralph Godwin DeVoe, Medical Corps, from May 20, 1936.

Lt. Col. Wibb Earl Cooper, Medical Corps, from May 23, 1936.

Lt. Col. Thomas Ludlow Ferenbaugh, Medical Corps, from May 24, 1936.

Lt. Col. George William Cook, Medical Corps, from May 24, 1936.

Lt. Col. William Lloyd Sheep, Medical Corps, from May 25, 1936.

Lt. Col. Edgar Clyde Jones, Medical Corps, from May 26, 1936.

Lt. Col. Floyd Kramer, Medical Corps, from May 28, 1936.

To be lieutenant colonels

Maj. William Frederick Rice, Medical Corps, from May 8, 1936.

Maj. Edward Allen Noyes, Medical Corps, from May 9, 1936.

Maj. Charles Woodward Riley, Medical Corps, from May 10, 1936.

Maj. Charles George Sinclair, Medical Corps, from May 11, 1936.

Maj. Charles George Hutter, Medical Corps, from May 12, 1936.

Maj. Frederick Hensel Petters, Medical Corps, from May 13, 1936.

Maj. Robert Parvin Williams, Medical Corps, from May 15, 1936.

Maj. Edwin Brooks Maynard, Medical Corps, from May 16, 1936.

Maj. Harvard Clayton Moore, Medical Corps, from May 17, 1936.

Maj. Arden Freer, Medical Corps, from May 18, 1936.

Maj. Paul Adolph Schule, Medical Corps, from May 19, 1936.

Maj. Frank Wiley Wilson, Medical Corps, from June 7, 1936.

To be major

Capt. Paul Ashland Brickey, Medical Corps, from June 14, 1936.

To be captains

First Lt. James Willis Howard, Medical Corps, from May 4, 1936.

First Lt. James Sherwood Taylor, Medical Corps, from May 6, 1936.

First Lt. Jenner Garnett Jones, Medical Corps, from May 8, 1936.

First Lt. Eaton Wesley Bennett, Medical Corps, from May 10, 1936.

First Lt. Tom French Whayne, Medical Corps, from May 16, 1936.

First Lt. Burt Held, Medical Corps, from May 18, 1936.

First Lt. Joseph Garber Cocke, Medical Corps, from May 23, 1936.

First Lt. Alfonso Michael Libasci, Medical Corps, from May 25, 1936.

First Lt. Ralph Torrey Stevenson, Medical Corps, from May 29, 1936.

First Lt. Frank Owings Alexander, Medical Corps, from June 1, 1936.

First Lt. John Benson Grow, Medical Corps, from June 2, 1936.

First Lt. Daniel John Waligora, Medical Corps, from June 10, 1936.

First Lt. Byron Ludwig Steger, Medical Corps, from June 17, 1936.

First Lt. Louie Render Braswell, Medical Corps, from June 19, 1936.

DENTAL CORPS

To be captain

First Lt. Dean Stirling Beiter, Dental Corps, from May 11, 1936.

CHAPLAIN

To be chaplain with the rank of captain

Chaplain (First Lt.) Elmer Emil Tiedt, United States Army, from June 17, 1936.

REAPPOINTMENT IN THE OFFICERS' RESERVE CORPS

GENERAL OFFICER

To be brigadier general, Inactive Reserve

Brig. Gen. Howard Seymour Borden, Inactive Reserve, from July 13, 1936.

HOUSE OF REPRESENTATIVES

MONDAY, MAY 11, 1936

The House met at 12 o'clock meridian.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We bless Thee, our Father in Heaven, for life. It is a precious boon, with its joys, possibilities, hopes, and promises revealed in the life and character of the lowly Galilean. Help us to follow his wake; what enchantment, visions, and

inspiring realities were his. We pray that His glorious truths and influences may make the desolate spheres of human experience blossom as the rose. We are grateful for the hearts of earth, gifted with great compassion for the multitudes; may we serve them with whole hearts in their unsolved problems, broken hopes, and unfinished tasks. We beseech Thee to let integrity and uprightness preserve us, O Lord; keep our souls and deliver them and let us not be ashamed. Show us the path of life. In Thy presence is fullness of joy; at Thy right hand there are pleasures forevermore. Through Christ our Savior. Amen.

The Journal of the proceedings of Friday, May 8, 1936, was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 10544. An act authorizing the erection of a memorial to those who met their death in the wreck of the dirigible *Shenandoah*.

The message also announced that the Senate had passed, with amendments, in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 11687. An act to amend the Federal Aid Highway Act, approved July 11, 1916, as amended and supplemented, and for other purposes; and

H. R. 12527. An act making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1937, and for other purposes.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 1827) entitled "An act for the relief of Lucille McClure", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LOGAN, Mr. SCHWELLENBACH, and Mr. CAPPER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendments of the House to bills and joint resolution of the Senate of the following titles:

S. 1379. An act to amend section 981 of title IV and section 843 of title VI of the Canal Zone Code;

S. 3839. An act for the relief of Randall Krauss, a minor; and

S. J. Res. 248. Joint resolution to provide for participation by the United States in an inter-American conference to be held at Buenos Aires, Argentina, or at the capital of another American republic, in 1936.

The message also announced that the Senate had adopted the following resolution:

Senate Resolution 296

Resolved, That the Senate has heard with profound sorrow and deep regret the announcement of the death of Hon. PARK TRAMMELL, late a Senator from the State of Florida.

Resolved, That a committee of six Senators be appointed by the Vice President to take order for superintending the funeral of the deceased Senator.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

QUESTION OF PRIVILEGE

Mr. TABER rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. TABER. I rise to a question of the privilege of the House.

The SPEAKER. The gentleman will state it.

Mr. TABER. On Friday last, as it appears on page 6956 of the RECORD, the gentleman from Colorado [Mr. MARTIN] was yielded 4 minutes.

Mr. BLANTON. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Texas makes the point that no quorum is present. The Chair will count.

Mr. BLANTON (before the count was concluded). Mr. Speaker, new Members have come in, and I withdraw the point.

Mr. TABER. Mr. Speaker, I will continue from where I left off. After the gentleman from Colorado had concluded his remarks he was given unanimous consent to extend his remarks in the RECORD. There appears in the RECORD a quotation of some things I said on May 7, 1936, and also some things that the gentleman from Texas [Mr. BLANTON] said. They do not appear in small type as required by the rules of the Joint Committee on Printing in the case of quotations.

But, worse than that, at the conclusion of my remarks which are quoted appears nothing, but it is made to appear that I said a lot of things in favor of the W. P. A., entirely contrary to my position, which is well known to every Member of the House. These things ought not to occur and are absolutely demoralizing. They misrepresent one's position to the public, and it is absolutely in violation of the rules of the House.

I do not care to spend a lot of time on the subject, but I do feel that the language that is inserted there by the gentleman without authority should be taken out of the RECORD.

Mr. WOODRUM. Will the gentleman yield?

Mr. TABER. I yield.

Mr. WOODRUM. If I understand the gentleman's position correctly it is that the RECORD does not show that the remarks of the gentleman were a quotation and one reading the RECORD would attribute the latter part of the remarks of the gentleman from Colorado to the gentleman from New York.

Mr. TABER. It would be so.

Mr. WOODRUM. Would not the whole matter be solved by showing what is a quotation from the gentleman's speech?

Mr. TABER. I think the only way it can be solved is to expunge the matter that was inserted. The leave to extend was not a leave to quote from the RECORD. The quotation was put in in violation of the rules of the House and it was not put in small type, as the rules of the Joint Committee on Printing require. I hope the House will adopt a resolution to expunge the matter, and I hope in future those in charge of the printing of the RECORD will take pains to see that all quotations are put in small type.

I might call attention to the fact that these things cannot be put in large type by the unanimous consent of the House. It is a rule of the Joint Committee on Printing.

The SPEAKER. Has the gentleman any resolution to offer?

Mr. TABER. I have a resolution which I desire to offer at this time, Mr. Speaker.

The Clerk read as follows:

House Resolution 509

Whereas Hon. JOHN MARTIN of Colorado did on May 8, 1936, without permission of the House, insert in the CONGRESSIONAL RECORD certain remarks made on the 7th day of May 1936 and appearing in the CONGRESSIONAL RECORD on page 6857, and thereafter, certain remarks of his own that were made on the floor of the House in such manner as though they were uttered by Representative JOHN TABER, of New York: Now, therefore, be it

Resolved, That the said remarks so inserted in the RECORD without authority be, and they are hereby, expunged from the RECORD.

The SPEAKER. The question is on the resolution.

Mr. MARTIN of Colorado. Mr. Speaker, inasmuch as I am involved, I would like 2 or 3 minutes.

The SPEAKER. Does the gentleman from New York yield to the gentleman from Colorado?

Mr. TABER. Yes. I yield 3 minutes to the gentleman from Colorado.

Mr. MARTIN of Colorado. Mr. Speaker, I may say to the gentleman from New York [Mr. TABER] that I am not any better satisfied than he is with the form in which this matter appears in the RECORD. [Applause.] But so far as the subject matter itself is concerned, there is no question about the gentleman from New York having been misquoted, or that he did not say just what is attributed to him. His remarks are quoted verbatim from the RECORD. In the first place, I

assumed that under leave to extend my remarks I could quote from the RECORD. I may have been in error in that. But introductory to this quoted matter in which I quoted the gentleman from New York, who was present, I said:

I shall insert at this point the colloquy between the two gentlemen who so sweepingly condemn W. P. A. and all its works and who cite in support of their indictment what they think they saw. It is taken from the RECORD of May 7, page 6857.

Then follows the quotation of the gentleman's remarks, which erroneously was set in large type instead of small. I am not running the Government Printing Office. However, that office is exceptionally correct, and the transcript probably omitted quotation marks.

The next complaint of the gentleman is that where I resumed my own remarks at the close of the colloquy my name does not appear. I think that nobody in the world who will read this colloquy first, in which the gentlemen so severely criticized the W. P. A., would make any such mistake as to assume that the gentleman was being quoted as commenting favorably on its policies. I assumed, of course, that my name would appear. It is disappointing to me that my name does not appear. My name does not appear at the head of my comment, and it runs on just as though it was the language of the gentleman from New York praising W. P. A.

It reminds me of what I heard about some fellow making a red hot speech against the eighteenth amendment and it came out in the RECORD under the name of the gentleman from Texas [Mr. BLANTON].

A similar thing happened in the last Congress in a speech by the gentleman from Michigan [Mr. WOODRUFF]. I interjected some remark into the speech of the gentleman from Michigan who was making a strong speech against the reciprocal-tariff bill, and it appeared in the RECORD as though I had delivered all that speech.

I think a mere correction of the permanent RECORD, reducing this colloquy to small type, as I wanted it to appear, and putting it in quotation marks even, and then inserting my name at the head of my remarks, ought to be sufficient.

The SPEAKER. The time of the gentleman from Colorado [Mr. MARTIN] has expired.

Mr. BLANTON. Will the gentleman yield me a minute?

Mr. TABER. Yes. I yield the gentleman from Texas 1 minute.

Mr. BLANTON. Mr. Speaker, I want to say to the gentleman from Colorado that once in a while the Government Printing Office makes a mistake. Not long ago they put in $5,700,000,000 for $5,700,000. But it is very seldom they make a mistake. Whatever the gentleman wants to go into the RECORD, if he sends it to the Printing Office, they will usually print it as he sends it; but he, himself, must see to it that his copy is correct. If the gentleman had put his name, "Mr. MARTIN", there, they would have had it there. So we have to look after such matters ourselves to see that these things are correct when we send out the copy.

Mr. MARTIN of Colorado. There may have been some defect in the manuscript, but it was not intentional.

Mr. BLANTON. Oh, certainly. I appreciate that.

Mr. MARTIN of Colorado. I am not satisfied with the form in which this appears any more than the gentleman from New York [Mr. TABER].

The SPEAKER. The time of the gentleman from Texas [Mr. BLANTON] has expired.

Mr. TABER. Mr. Speaker, I do not like to make a mountain out of a molehill, but the situation is just this: The way the thing is set up, my position is misrepresented by the RECORD. Things are attributed to me that I did not say, and everyone in the House knows I did not say it. At the same time people throughout the country will think, as a result of it, that I did say it. I feel that the only protection I have is the adoption of the resolution.

Mr. MARTIN of Colorado. Mr. Speaker, I ask unanimous consent that the permanent RECORD be corrected in accordance with the facts.

Mr. COX. Will that not be satisfactory to the gentleman?

Mr. TABER. I do not think I can yield for that, Mr. Speaker. I think that those things which were put in without authority ought to be taken out.

The SPEAKER. The question is on the resolution offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. MARTIN of Colorado) there were ayes 80 and noes 86.

Mr. SNELL. Mr. Speaker, I ask for the yeas and nays on the resolution.

The yeas and nays were ordered.

Mr. WOODRUM. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WOODRUM. Would it be in order to submit a unanimous-consent request now that might obviate the necessity of this roll call, if it is being ordered under a misapprehension?

The SPEAKER. The Chair thinks not. The roll call has been ordered.

Mr. WOODRUM. It seems to me, Mr. Speaker, it could be done by unanimous consent.

Mr. SNELL. Mr. Speaker, we have asked for a roll call; we want it.

The question was taken; and there were—yeas 115, nays 239, answered "present" 12, not voting 61, as follows:

Mr. Larrabee with Mr. Brennan.
Mr. Sisson with Mr. Deen.
Mr. Sumners of Texas with Mr. Edmiston.
Mr. Gambrill with Mr. Bulwinkle.
Mr. Peyser with Mr. Smith of West Virginia.
Mr. Dempsey with Mr. Utterback.
Mr. Ferguson with Mr. Polk.
Mr. Burch with Mr. Peterson of Florida.
Mr. Harter with Mr. Caldwell.
Mr. Gasque with Mrs. Jenckes of Indiana.
Mr. Claiborne with Mr. Eagle.
Mr. Sweeney with Mr. Steagall.
Mr. Kennedy of Maryland with Mr. Ramsay.
Mr. Kee with Mr. Farley.
Mr. Harlan with Mr. Kerr.
Mr. Kloeb with Mr. Zioncheck.
Mr. Duffey of Ohio with Mr. Kopplemann.
Mr. McMillan with Mr. DeRouen.
Mr. Oliver with Mr. Sanders of Louisiana.

Mr. LAMBETH. Mr. Speaker, I voted "nay." I was under a misapprehension as to the motion. I desire to change my vote from "nay" to "present."

Mr. BUCHANAN changed his vote from "nay" to "present."

Mr. HARTLEY changed his vote from "present" to "yea."

Mr. PETTENGILL. Mr. Speaker, my colleague the gentleman from Indiana, Mr. LARRABEE, is unavoidably detained on account of serious illness in his family. On this vote, if present, he would have voted "nay."

The result of the vote was announced as above recorded.

Mrs. O'DAY. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD on the death of my colleague the gentleman from New York, Mr. Rudd.

Mr. TABER. Mr. Speaker, reserving the right to object, it is perfectly apparent that the majority of this House desires a dishonest record of our proceedings, and I object. I do not think any extension should be allowed.

Mr. MARTIN of Colorado. Mr. Speaker, I demand that the gentleman's words be taken down.

The SPEAKER. The Clerk will report the words objected to.

Mr. MARTIN of Colorado. Mr. Speaker, I ask unanimous consent to withdraw my request that the words of the gentleman be taken down.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. MARTIN of Colorado. Mr. Speaker, I ask unanimous consent that the permanent RECORD may be corrected by reducing the colloquy referred to by the gentleman to small-sized type and by inserting my name at the head of the resumption of my remarks following the quotation of the gentleman's remarks in the RECORD, as intended.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

Mr. SNELL. Mr. Speaker, reserving the right to object, considering the fact that the majority have gone on record almost unanimously refusing to protect the integrity of its own record, I object.

THE DEFICIENCY BILL OF 1936

The SPEAKER. The question is on the motion to recommit the bill.

Mr. TABER. Mr. Speaker, I ask unanimous consent that the Clerk again report the motion to recommit.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read as follows:

By Mr. TABER: I move to recommit the bill to the Committee on Appropriations with instructions to report the same back forthwith with the following amendment: On page 21, line 10, strike out the paragraph and insert in lieu thereof the following:

"That for the purpose of providing direct relief in the United States, its Territories and possessions, and the District of Columbia, there is hereby appropriated the sum of $1,425,000,000; and there is hereby reappropriated for the same purpose all unobligated and unexpended balances, with the exception of allotments to the Civilian Conservation Corps, of the amounts appropriated by the acts approved June 16, 1933 (48 Stat. 274); February 15, 1934 (48 Stat. 351); June 14, 1934 (48 Stat. 1055); and April 8, 1935 (Public Res. No. 11, 74th Cong.), and to remain available until June 30, 1937, to be allocated and disbursed by the President to the States, Territories, and possessions, and the District of Columbia, for relief according to their respective need: *Provided*, That no part of this appropriation shall be allocated or paid to a State, Territory, or possession, or the District of Columbia, or subdivision thereof, which shall not contribute an amount equal to at least 25 percent of the total proposed expenditures, both local and Federal, and shall not administer such expenditures by and through a nonpartisan board."

Mr. SNELL. Mr. Speaker, I demand the yeas and nays on the motion to recommit.

The yeas and nays were ordered.

The question was taken; and there were—yeas 90, nays 287, answered "present" 1, not voting 49, as follows:

[Roll No. 91]

Deen	Hoeppel	Peterson, Fla.	
Dempsey	Jenckes, Ind.	Plumley	
DeRouen	Jenkins, Ohio	Polk	

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On the vote:

Mr. Lehlbach (for) with Mr. Steagall (against).
Mr. Jenkins of Ohio (for) with Mr. Dempsey (against).
Mr. Andrew of Massachusetts (for) with Mr. Peterson of Florida (against).
Mr. Stewart (for) with Mr. Smith of West Virginia (against).
Mr. Cooper of Ohio (for) with Mr. Harlan (against).
Mr. Allen (for) with Mr. Edmiston (against).
Mr. Bolton (for) with Mr. Maloney (against).
Mr. Doutrich (for) with Mr. Fernandez (against).
Mr. Marshall (for) with Mr. Caldwell (against).
Mr. Thomas (for) with Mr. Cary (against).

General pairs:

Mr. Sears with Mr. Kloeb.
Mr. Deen with Mr. Larrabee.
Mr. Taylor of Colorado with Mr. Fiesinger.
Mr. McMillan with Mr. O'Malley.
Mr. Boykin with Mr. Robinson of Utah.
Mr. Kennedy of Maryland with Mr. Farley.
Mr. DeRouen with Mrs. Jenckes of Indiana.
Mr. Kerr with Mr. Harter.
Mr. Polk with Mr. Kee.
Mr. Ferguson with Mr. Eagle.
Mr. Claiborne with Mr. Berlin.
Mr. Sanders of Louisiana with Mr. Brennan.
Mr. Zioncheck with Mr. Utterback.

Mr. HILL of Alabama. Mr. Speaker, my colleague the gentleman from Alabama, Mr. STEAGALL, is unavoidably absent, due to illness. If present, he would have voted "nay."

Mr. PETTENGILL. Mr. Speaker, my colleague the gentleman from Indiana, Mr. LARRABEE, is unavoidably detained on account of serious illness. If present, he would have voted "nay."

Mr. GREEVER. Mr. Speaker, I have been asked to announce by my colleague the gentleman from New Mexico, Mr. DEMPSEY, that he is unavoidably absent, but if present he would have voted "nay" on the motion to recommit.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the passage of the bill.

Mr. BUCHANAN and Mr. TABER demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 341, nays 38, not voting 48, as follows:

[Roll No. 92]

Cooper, Ohio	Piesinger	McMillan	Taylor, Colo.
Cox	Harlan	Maloney	Thomas
Deen	Harter	Marshall	Utterback
Dempsey	Hoeppel	Peterson, Fla.	Zioncheck

So the bill was passed.

The Clerk announced the following pairs:

On the vote:

Mr. Fernandez (for) with Mr. Thomas (against).
Mr. Lehlbach (for) with Mr. Cox (against).

General pairs:

Mr. McMillan with Mr. Jenkins of Ohio.
Mr. Sears with Mr. Plumley.
Mr. Taylor of Colorado with Mr. Marshall.
Mr. Cary with Mr. Doutrich.
Mr. Harlan with Mr. Andrew of Massachusetts.
Mr. Smith of West Virginia with Mr. Cooper of Ohio.
Mr. Harter with Mr. Bolton.
Mr. Kerr with Mr. Collins.
Mr. Larrabee with Mr. Ramsay.
Mr. Caldwell with Mr. Kennedy of Maryland.
Mr. Farley with Mr. Maloney.
Mr. Kee with Mr. Sisson.
Mr. Eagle with Mr. Piesinger.
Mrs. Jenckes of Indiana with Mr. Claiborne.
Mr. Dempsey with Mr. Ferguson.
Mr. Peterson of Florida with Mr. Polk.
Mr. Brennan with Mr. Kloeb.
Mr. DeRouen with Mr. Edmiston.
Mr. Zioncheck with Mr. Utterback.

Mr. BINDERUP changed his vote from "present" to "yea."

Mr. HILL of Alabama. Mr. Speaker, my colleague from Alabama, Mr. STEAGALL, is unavoidably absent due to illness. If present, he would have voted "yea."

Mr. COX. Mr. Speaker, I was not in the Chamber when my name was called; therefore I cannot qualify. If I were able to qualify, I would have voted "nay."

Mr. BIERMANN. Mr. Speaker, my colleague the gentleman from Iowa, Mr. UTTERBACK, is absent. If present, he would have voted "yea."

Mr. GREEVER. Mr. Speaker, my colleague the gentleman from New Mexico, Mr. DEMPSEY, is absent and asked me to announce that if present he would have voted "yea."

Mr. JOHNSON of West Virginia. Mr. Speaker, my colleague, Mr. KEE, is unavoidably absent. If present, he would have voted "yea."

Mr. PETTENGILL. Mr. Speaker, my colleague from Indiana, Mr. LARRABEE, is unavoidably detained on account of serious illness. If present, he would have voted "yea."

Mr. SISSON. Mr. Speaker, a parliamentary inquiry with reference to my rights to be recorded.

The SPEAKER. The gentleman will state it.

Mr. SISSON. Mr. Speaker, I was in the Chamber on the first call of the roll, but did not answer to my name. I am quite sure I was present when the roll was called the first time. I went out and intended to come back in time for the second roll call. Am I qualified to vote?

The SPEAKER. The Chair does not think so.

Mr. SISSON. Mr. Speaker, if I had been able to qualify I would have voted "yea."

The result of the vote was announced as above recorded.

On motion of Mr. BUCHANAN, a motion to reconsider was laid on the table.

EXTENSION OF REMARKS—THE RELIEF BILL

Mr. LUDLOW. Mr. Speaker, because of my very great desire that appropriations shall be held down and that a start, at least, shall be made toward balancing the Budget, I had intended to vote against this so-called relief bill until careful inquiry as to what the inevitable consequences would be of a summary and complete stoppage of Federal relief at this time caused me to decide otherwise.

To defeat this bill and thus cut Federal relief squarely off without a tapering-off period would create, I fear, a Nation-wide crisis and debacle that must be and can be avoided by a more gradual and rational process of getting the Federal Government out of the relief business.

To cut off Federal relief peremptorily and completely now and throw the load entirely back on the States without any tapering-off process would cause local relief agencies to bog down and would precipitate dire distress, hunger, and suffering among untold thousands of good people who, with industry still in a condition of collapse, would be unable for the time being to secure either employment or relief.

The Federal Government must get out of the relief business. No one is more devoutly sincere in wishing such a separation than I am. I am so earnest in wanting the Federal Government to stick to its own sphere and allow matters of local concern to be handled locally that I am going to cross party lines today to vote for Representative TABER's motion to recommit this bill so that the appropriation carried in it might be administered entirely by local relief agencies and not through a bureaucratic set-up directed from Washington. Local self-government is a good old democratic principle and the plan suggested by Mr. TABER would put an end to "boondoggling."

A decentralization of relief administration as proposed by Mr. TABER would go far to get the Federal Government out of the relief business so that relief may be handled locally, as it should be. If the Taber motion to recommit is voted down, I shall cast my vote for the relief bill, notwithstanding I do not indorse all of its provisions, but because a relief bill must pass to prevent widespread suffering and distress among our people.

WAYNE COY'S REPORT ON INDIANA RELIEF NEEDS

Some idea of what that distress would be in Indiana and in the district I represent may be obtained from an exchange of telegrams which took place Saturday between Wayne Coy, who is at the head of all Government relief activities in Indiana, and myself.

I am opposed to huge expenditures on general principles. I am unalterably opposed to "boondoggling" in every form. I want every visionary and fantastic project junked and every bit of waste stopped. At the same time I believe it is our duty to see that no human being under the American flag suffers for want of food, clothing, and shelter. Before I voted on this bill I wanted to know exactly what the necessity is for the appropriation carried in the bill, or any other

Federal relief appropriation for that matter—that is to say, the actual necessity from the standpoint of human needs and relief.

I wired to one of the best posted men in the United States on this subject, Mr. Coy, the Works Progress Administrator for Indiana, who knows more about the relief situation in my native State and in the district I represent than any other living man. My telegram to him was as follows:

MAY 9, 1936.

Hon. WAYNE COY,
Indiana Works Progress Administrator,
Indianapolis, Ind.:

Kindly wire to me today (Saturday) the following information: How many persons or families approximately are there on relief in Indiana and Marion County. What would happen to these persons if the bill pending before Congress appropriating one billion four hundred twenty-five million for relief should fail to pass? How would these persons be taken care of? Would appreciate full information showing exactly what effect failure of the bill would have on relief situation in Indiana and how much distress, if any, would be caused thereby. Would also like same information applied particularly to Marion County. Thanks.

LOUIS LUDLOW.

Mr. Coy sent the following illuminating reply by wire:

INDIANAPOLIS, IND., *May 9, 1936.*

Hon. LOUIS LUDLOW,
Member of Congress:

Your wire 9th. Figures for March are: Working W. P. A. State total, 85,692, representing individual persons in family of 342,000. On direct relief, State total 48,327 families, representing 155,269 individual persons. Of those working on W. P. A. 4,576 families, representing 18,000 individual persons, are also receiving supplementary direct relief due to size of family or other necessity. Working W. P. A. Marion County 13,412, representing 53,648 individuals. Direct relief Marion County 8,962, representing 25,358 individuals. Of those working on Marion County W. P. A. 485, representing 1,940 individuals, also receiving supplementary direct relief. If pending appropriation act fails those now working W. P. A. will be turned back to township trustees for direct relief by June 30, this increasing the local relief expenditures by three times. Indiana townships are not financially able to carry any greater burden than now carrying. Any increase in expenditures for direct relief will necessarily be reflected in an increased tax on real property. W. P. A. has enabled townships in Indiana to reduce expenditures $250,000 per month as compared to March 1935. Inability of townships to assume any additional relief burden would create great distress and hunger among the thousands of relief people.

(Signed) WAYNE COY.

MY RECORD FOR ECONOMY

The assertion of this expert adviser that the failure of the pending measure would create great distress and hunger among the thousands of relief people in Indiana and my home district is the last straw that decides my vote in favor of this bill. I believe I have a consistent record for economy. I voted against Speaker Garner's bill to spend $2,200,000,000 in the construction of Federal buildings.

I voted against the bill creating the National Recovery Administration with its appropriation of $3,300,000,000 for uneconomic public works. As a member of the Appropriations Committee I have helped to cut millions upon millions of dollars off of the Federal expense bill, and I shall continue to do so, but when the cry of distress is heard; when hungry mouths are to be fed and naked bodies are to be clothed I shall always listen to that cry.

Indiana is only 1 of 48 States in the Union. Multiply by 48 the great distress and hunger which Mr. Coy foresees in Indiana if this bill is defeated and you will have some idea of the suffering and distress that may be expected in the entire Nation if the bill fails.

RATIONAL AND IRRATIONAL WAY

There is a rational way to get the Federal Government out of the relief business and there is an irrational way. The irrational way would be to cut off Federal aid entirely. The rational way is to reduce Federal aid gradually to the vanishing point and at the same time give greater assistance and encouragement to industry so that businessmen and manufacturers may be encouraged to resume normal operations and employment.

According to my way of thinking, the honest businessman and manufacturer is the "forgotten man" of this administration. After seeing that no person in the United States suffers for food, clothing, and shelter, our next concern should be to get our fellow citizens off of temporary Government pay rolls and on permanent regular business and factory pay rolls.

A person who holds one of these synthetic jobs of "made work" cannot have any easiness of mind, for his employment is not fortified and sustained by any economic necessity, and may be terminated at any time. The cry of every honest and self-respecting man on relief work is "Give me a regular job."

The sooner the transition from synthetic jobs to regular jobs can be made, the better it will be for all of America, but until the transition can take place the dictates of humanity require that adequate provision must be made for relief.

LOANS TO INDUSTRY

On March 14, 1935, I introduced a bill which, I verily believe, if it had passed would have gone far to pave the way for a sound recovery and the substitution of regular jobs for synthetic jobs. Permit me to quote from the text of that bill as follows:

SEC. 2. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $2,000,000,000 as a fund from which the Reconstruction Finance Corporation shall make loans for working capital to business concerns and manufacturing industries. The plan of lending said sum of $2,000,000,000 shall be based, as nearly as practicable, on an average loan of $50,000 to 40,000 business and manufacturing firms and the aggregate of loans of any one firm under this act shall not be in excess of $200,000.

SEC. 3. Within 10 days after the approval of this act the chairman of the Reconstruction Finance Corporation shall summon to a conference to be held at Washington, District of Columbia, officials of recognized National and State business, manufacturing, and other industrial organizations, and outstanding leaders in the business and industrial world. The purpose of said conference shall be to assist officials of the Reconstruction Finance Corporation in devising a systematic plan for the lending of said fund of $2,000,000,000 in such a way as to aid in restoring normal employment throughout the country as soon as possible. Loans shall be made on the basis of the applicant's willingness and demonstrated capacity to furnish employment. Loans shall be granted whenever there is reasonable assurance that the applicant will be able to repay the amount borrowed. Loans shall be for a period of 5 years at 5 per centum interest, with the privilege of renewal for 2 years if the conditions of the loan are meanwhile satisfactorily complied with.

SEC. 4. Coincident with the approval of this act all public works financed in whole or in part by the United States Government (except construction for exclusively Federal purposes) shall be suspended and said public works shall not be resumed except insofar as may be necessary to carry out existing commitments or to salvage works partially constructed.

This bill, by making Government credit available to employers of recognized solvency and stability on easy terms, would have opened the doors of the factories and would have furnished the encouragement and assistance which industry so much needs to take men and women off of the public pay rolls and place them in regular jobs on private pay rolls.

I believe that if my bill had passed, the industrial and economic picture in America would be vastly different from what it is today. I believe every thinking person must admit that the sound principles contained in my bill are a shining contrast to the "boondoggling" of recent times.

HOPE EXPRESSED THAT THIS WILL BE THE LAST RELIEF BILL

There are many things in the pending relief bill I do not like, but under the fearful, wonderful, and artful method by which that bill is constructed we have no power of segregation and we must swallow it all or reject it altogether. "Take it or leave it", is the command from higher-ups.

I would have been glad to vote for a smaller relief appropriation, but there is no choice in that regard, as both the pending bill and the Republican motion to recommit specify $1,425,000,000 as the amount to be appropriated for relief.

The bill includes the appropriation for the Old Age Security Act, which I supported, and it also carries the appropriation for the Indianapolis Federal building and, of course, I am very much in favor of that. It carries appropriations to enforce the 44-hour-week law and the railroad retirement law, which should not be allowed to fail for lack of funds. With all of its unacceptable features I regard it as an unavoidable measure at this time.

With indisputable signs on every hand of a return of better times I hope that business will now catch on and that it will never be necessary again to pass a Federal relief bill of this kind.

THE FRAZIER-LEMKE BILL

Mr. LEMKE. Mr. Speaker, I call up Calendar No. 2 on the Calendar of Motions to Discharge Committees, being motion no. 7, signed by 218 Members of the House, to discharge the Committee on Rules from the further consideration of House Resolution 123.

The Clerk read as follows:

House Resolution 123

Resolved, That upon the day succeeding the adoption of this resolution a special order be, and is hereby, created by the House of Representatives for the consideration of H. R. 2066, a public bill which has remained in the Committee on Agriculture for 30 or more days without action. That such special order be, and is hereby created, notwithstanding any further action on said bill by the Committee on Agriculture or any rule of the House. That on said day the Speaker shall recognize the Representative at Large from North Dakota, WILLIAM LEMKE, to call up H. R. 2066, a bill to liquidate and refinance existing agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a board of agriculture to supervise the same, as a special order of business, and to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of said H. R. 2066. After general debate, which shall be confined to the bill and shall continue not to exceed 6 hours, to be equally divided and controlled by the Member of the House requesting the rule for the consideration of said H. R. 2066 and the Member of the House who is opposed to the said H. R. 2066, to be designated by the Speaker, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and the amendments thereto to final passage, without intervening motion, except one motion to recommit. The special order shall be a continuing order until the bill is finally disposed of.

The SPEAKER. The gentleman from North Dakota, under the rules, moves to discharge the Committee on Rules and pass the resolution just reported. Under the rules of the House, debate is limited to 20 minutes, 10 minutes to the side.

Mr. BOILEAU. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BOILEAU. Is it proper to ask at this time who is to be recognized in opposition?

The SPEAKER. The Chair will attend to that when the Chair comes to it.

Mr. LEMKE. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina [Mr. FULMER].

Mr. FULMER. Mr. Speaker, my contention is that any bill that has created the interest of the American farmers to the extent that this bill has, and any bill that has brought about the signing of a petition by 240 Members of the House, either on their own initiative or because of the persuasion of some other Member of the House, certainly should be given consideration by the Congress of the United States. [Applause.]

I have had some Members tell me, "I do not want to have anything to do with this matter, because it will put me on the spot." I want to say to the Members that insofar as I am concerned, when I was reelected to the Congress I was put on the spot. I believe the Members of the House should seriously take into consideration the merits, as well as the demerits, of this bill and vote accordingly.

Farmers everywhere are asking for lower interest rates. Two hundred and forty Members first and last signed the petition requesting that the bill be considered. I want to state, regardless how you vote on the final vote on the bill, that should you vote against giving the House a chance to go into the merits or demerits of the bill, that you are placing yourself on a hot spot, one that will be hard to explain. The second reason given by those opposing the bill is that the bill proposes to have the Government issue $3,000,000,000 in currency and therefore is an inflationary bill. Who makes this statement? The Liberty League and the money changers that brought about a depression in 1921 [applause] when they had control of the Federal Reserve banks that robbed the independent merchants and bankrupted the farmers of this country and put labor into the bread lines. [Applause.]

The kind of inflation that the Liberty League is interested in is the type that we had in 1928–29. These money changers had charge of the Federal Reserve banks, as in the case of 1921, and after flooding the country with worthless stocks and bonds, using the finances of the country that should have gone into agriculture, legitimate business, and industry to an extent unexcelled ever in the history of the country, the crash came. Who got the money? Let us listen to the debate on this bill; get the real purpose of the bill; and that will be time enough to decide whether you want to help restore the purchasing power of farmers or whether or not you want to continue to vote billions of 3- and 4-percent tax-exempt bonds for the special accommodation of those who robbed us in 1921 and in 1929.

I believe we will be able to sell these bonds from time to time as needed; if not, farmers are just as much entitled to the issuing of currency to refinance their mortgages as banks that now have the right to have currency issued on the notes and mortgages of farmers held by these banks.

Let us go into this matter fully tomorrow, and may your conscience be your guide.

Mr. LEMKE. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts [Mr. CONNERY].

Mr. CONNERY. Mr. Speaker, under existing law the Federal Reserve System has the power now to inflate the currency of the United States to the extent of billions of dollars. So we need not worry about any $3,000,000,000 proposition—a small $3,000,000,000—in comparison with the power which they have to inflate the currency.

I have the honor of being the chairman of the Committee on Labor of this House. The members from the group of farm States on this committee have always cooperated with me unanimously in reporting legislation to this House, and I intend to cooperate with them in bringing legislation to this floor which will bring prosperity to the farmers, just as they have cooperated with me in bringing higher wages to the workers.

There can be no prosperity in this country until we have higher wages and better farming conditions. [Applause.]

Mr. LEMKE. Will the opposition yield some time now? Who is to be recognized on the other side, Mr. Speaker?

The SPEAKER. The Chair is not going to recognize anyone until such recognition is sought.

Mr. O'CONNOR. Mr. Speaker, I shall ask recognition, being chairman of the committee against which a demand is being made to discharge, but I prefer to reserve the time until the proponents have finished.

The SPEAKER. The gentleman from North Dakota is recognized.

Mr. BOILEAU. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BOILEAU. Mr. Speaker, as I understand the rule, the proponent of this measure, the gentleman who has been recognized under the rule, the gentleman from North Dakota [Mr. LEMKE], has the opening and closing of debate. I do not have any specific incident before me at the present time, but my recollection is——

The SPEAKER. The Chair thinks the gentleman is correct. The gentleman from North Dakota is recognized.

Mr. BOILEAU. Perhaps the Speaker did not understand my inquiry. My understanding is that the gentleman from North Dakota has the opening and closing and in the meantime those in opposition should use some time.

The SPEAKER. The Chair is not advised of anyone seeking time now; and if no one wants time, the Chair will put the question.

The question is on the motion to discharge.

The question was taken; and Mr. LEMKE demanded a division.

Mr. BOILEAU. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BOILEAU. I would like to have the Chair again state the question before the House.

The SPEAKER. The question before the House is the motion to discharge the Rules Committee.

The question was taken; and there were—ayes 145, noes 134.

Mr. O'CONNOR. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 220, nays 153, answered "present" 6, not voting 49, as follows:

[Roll No. 93]

So the motion to discharge the committee was adopted.

The following pairs were announced:

On the vote:

Mr. Sirovich (for) with Mr. Smith of West Virginia (against).
Mr. Richards (for) with Mr. McMillan (against).
Mr. McFarlane (for) with Mr. Ramsay (against).
Mr. Marshall (for) with Mr. Steagall (against).
Mr. Utterback (for) with Mr. Lehlbach (against).
Mr. Taylor of Colorado (for) with Mr. Andrew of Massachusetts (against).
Mr. Larrabee (for) with Mr. Bolton (against).
Mr. Peterson of Florida (for) with Mr. Thomas (against).
Mr. Jenkins of Ohio (for) with Mr. Plumley (against).

General pairs:

Mr. Sears with Mr. Cooper of Ohio.
Mr. Flesinger with Mr. Stewart.
Mr. Deen with Mr. Bacharach.
Mr. Sutphin with Mr. Collins.
Mr. Kennedy of Maryland with Mr. Doutrich.
Mr. Caldwell with Mr. West.
Mr. Robinson of Utah with Mr. Harter.
Mr. Polk with Mr. Claiborne.
Mrs. Jenckes of Indiana with Mr. Cross of Texas.
Mr. Eagle with Mr. Maloney.
Mr. Dempsey with Mr. Kee.
Mr. Kerr with Mr. DeRouen.
Mr. Farley with Mr. Edmiston.
Mr. Kloeb with Mr. Fernandez.
Mr. Brennan with Mr. Sanders of Louisiana.

Mr. McFARLANE. Mr. Speaker, I voted "aye." I am paired with the gentleman from West Virginia, Mr. RAMSAY. If he were present, he would vote "no." I withdraw my vote and answer "present."

Mr. RICHARDS. Mr. Speaker, I am paired with the gentleman from South Carolina, Mr. MCMILLAN. If present, he would vote "no." I wish to withdraw my vote of "aye" and answer "present."

Mr. TINKHAM changed his vote from "aye" to "no."

Mr. SIROVICH. Mr. Speaker, I am paired with the gentleman from West Virginia, Mr. SMITH. If present, he would vote "no." I wish to withdraw my vote of "aye" and answer "present."

Mr. PETTENGILL. Mr. Speaker, my colleague, Mr. LARRABEE, is absent on account of illness in his family. If present, he would vote "aye."

The result of the vote was announced as above recorded.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House Resolution 123

Resolved, That upon the day succeeding the adoption of this resolution, a special order be, and is hereby, created by the House of Representatives, for the consideration of H. R. 2066, a public bill which has remained in the Committee on Agriculture for 30 or more days, without action. That such special order be, and is hereby, created, notwithstanding any further action on said bill by the Committee on Agriculture, or any rule of the House. That on said day the Speaker shall recognize the Representative at Large from North Dakota, WILLIAM LEMKE, to call up H. R. 2066, a bill to liquidate and refinance existing agricultural indebtedness at a reduced rate of interest, by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve banking system, and creating a Board of Agriculture to supervise the same, as a special order of business, and to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of said H. R. 2066. After general debate, which shall be confined to the bill and shall continue not to exceed 6 hours, to be equally divided and

controlled by the Member of the House requesting the rule for the consideration of said H. R. 2066 and the Member of the House who is opposed to the said H. R. 2066, to be designated by the Speaker, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill, and the amendments thereto, to final passage, without intervening motion, except one motion to recommit. The special order shall be a continuing order until the bill is finally disposed of.

The SPEAKER. The question is on the adoption of the resolution.

The resolution was adopted.

On motion of Mr. BLANTON, a motion to reconsider the vote whereby the resolution was adopted was laid on the table.

THE FIRST DEFICIENCY APPROPRIATION BILL

Mr. DONDERO. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the first deficiency bill.

The SPEAKER. Is there objection?

There was no objection.

Mr. DONDERO. Mr. Speaker, I voted for the Social Security Act of the administration in the last session of Congress, not because I agreed with all of the features of the bill but because it did contain some items in which I concurred.

The bill now before the House for consideration is very much the same kind of legislation. It contains items of which I heartily approve and others in which I cannot join. I am opposed on principle, no matter under what administration, to signing a blank check for nearly a billion and a half dollars to be expended by those who are not directly responsible to the people for its disbursement. I believe it is the duty of Congress to designate for what purposes money appropriated by it shall be expended.

I am, however, going to vote for this bill because it is the only opportunity I have to vote money for relief for those who are destitute, unemployed, and in need. No one wishes to see people in want in this favored land. The experience, however, of the last 3 years indicates that politics has been mixed with relief, and members of both the Republican and Democratic Parties have pointed out the abuse and misuse of funds for relief. It must be, it ought to be, and it should be abhorrent to the conscience of every Member of this body that money voted for relief by Congress should be used to promote the political welfare of any individual or of any political party. The record shows, however, that that is exactly what has happened.

My own State of Michigan has not escaped this evil influence, and in my own county and in the township where I live the abuse of this system has been apparent. I have affidavits in my file from men who have been ignored and refused relief because of political influence. For that reason I am strongly in favor of an amendment to the bill before the House providing for the distribution of the money provided in this legislation to the States, and there to be administered by them, divorced from all influence of the national administration. I am satisfied that if this is done it would remove the political pressure from Washington and promote the better disposition of these funds to the needy and unemployed, who should have the full benefit thereof.

The money provided under the Social Security Act for old-age pensions is paid directly to the States to reimburse them for funds expended for that purpose. For the same reason money provided under the present bill should be paid directly to the States and permit the States to disburse the funds without control from Washington. While it may not remedy entirely political interference, it will, in my opinion, be a forward step in divorcing all pressure and influence of national politics on money intended for the relief of the needy and unemployed.

Undoubtedly, every Member of the House was impressed with the figures and statistics revealed by the gentleman from Iowa [Mr. THURSTON], which showed that more than two-thirds of all the people believe that under the present method of disbursing relief money by this administration politics had entered into it and greatly influenced it.

In the present bill before the House there are a number of subjects involved, among which are the following: $85,000,000 for old-age assistance, $29,000,000 for administration for unemployment, $35,000,000 for dependent children, $8,000,000 for aid to the blind, $308,000,000 to carry into effect emergency conservation work, $39,900,000 for Tennessee Valley Authority, $40,506,000 Post Office Department for deficiency purposes.

The $1,425,000,000 is divided as follows: $413,250,000 for highways, roads, and streets; $156,750,000 for public buildings; $156,750,000 for parks, recreation service, and buildings thereon; $171,000,000 for sewer systems, water supply, and so forth; $128,250,000 for flood control and conservation; $85,500,000 for white-collar projects; $85,500,000 for women's projects; $75,250,000 for miscellaneous work projects; $75,250,000 for national youth administration; $85,500,000 for rural rehabilitation and relief to farmers.

Many of the items included in the above list and others in the bill have my support and approval, but to many others I am opposed and would not support them if a separate vote were permitted, but all are included in one measure, and no alternative presents itself whereby any Member of the House can vote on the separate items but is compelled to vote for all or none.

Because of the relief features of the bill, I shall support the measure, even though it does not meet with my approval in its entirety.

Mr. RICH. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RICH. Mr. Speaker, by the vote of the House of Representatives on the Taber resolution when the House convened today, are we to understand there will be retained in the RECORD of the House:

First, admitted improper use of the privilege of extension under the rules of the Joint Committee on Printing.

Second, statements that were admitted by the gentleman from Colorado to be in error and improperly in the RECORD.

Third, statements that were not made by the gentleman from New York.

Are these statements to be left in the RECORD which are attributed to the gentleman from New York but which are in error and are not facts?

The SPEAKER. The House has already attended to that matter, and the gentleman is as cognizant of the facts as is the Chair.

NET-WEIGHT SELLING OF COTTON—THE RISING TIDE OF THE IMPORTATION OF JUTE, THE ARCH ENEMY OF THE SOUTH

Mr. FULMER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. FULMER. Mr. Speaker, out of my practical experience prior to coming to Congress as a supply merchant, banker, and farmer, I have been deeply interested in a number of constructive pieces of legislation that I am sure would be of untold interest to agriculture.

When we passed the United States Cotton Standards Grading Act in the Sixty-seventh Congress, certain organized groups fought to the last ditch the passage of the bill. Prior to the passage of this act all cotton was sold largely round lots, commonly known as "hog round." Farmers did not get actual grades and premiums for extra staple lengths. All cotton exported was graded by a foreign board, with millions of claims coming back to the exporter, all of which came out of the farmer price. Today we are improving our staple, and farmers are getting the premium thereon. Today all cotton exported is graded by our Government, and these grades are accepted by all foreign countries. This has meant millions to the cotton industry.

I want at this time to refer to the rising tide of the importation of jute, the arch enemy of the South, and my net-weight bill, now pending before the Rules Committee.

For a hundred years we have had a one-sided tariff policy. We of the South have fought for free trade and against this

tariff policy. However, we have never been able to defeat this policy, in that we have the highest tariff rates today under the Smoot-Hawley tariff bill that we have ever had. We of the South have paid millions to these tariff-protected groups, and because of our attitude we have neglected to have our own people placed in the picture. No other section of the country except the South would have permitted this steal without either stopping the steal or seeing to it that we got our part of it.

The three great cottonseed oil refineries of the country are able to fix the price of our cottonseed oil, and we permit cheap foreign oils to come in, helping to cut the price of cottonseed oil and peanut oil.

We tie the mails of the United States with jute twine, yet we are all the time shouting, "America for Americans!"

We plow under 4,000,000 bales of perfectly good American cotton, losing the cottonseed oil, robbing ginners and cotton pickers out of millions of dollars, as well as costing the Government and taxpayers millions; and yet we permit to come into this country annually jute, jute products, and other foreign fibers, taking our own American cotton markets to the tune of 3,000,000 bales of cotton.

These products come largely from India, which is the next largest cotton-growing country to the United States. Japan takes one and one-half million bales of cotton from India. She is increasing her imports into this country to the extent that manufacturers of cotton goods in the United States are asking our Government for a subsidy so as to be able to compete with Japan. India, along with other foreign countries, is increasing her production, taking our foreign markets, and we of the South sit idly by, paying millions to tariff barons of the East, and permit the jute interests to take our own markets, as well as control the Congress, including a great number of southern Congressmen.

What are we going to do about it?

Listen to these figures:

In 1892 the total of imports of jute and jute products were 260,000,000 pounds. By 1900 they had risen to 400,000,000 pounds, and by 1910 to 600,000,000 pounds. In 1927 the importation of these products reached the enormous figure of 1,000,000,000 pounds.

I have a bill pending before the Ways and Means Committee of the Congress proposing to place a tariff on jute. I hope in the next session of Congress that the chairman of this great committee, Congressman DOUGHTON, will give consideration to this type of legislation.

Now, what about the net-weight bill?

Many cotton farmers today believe that they get paid for the bagging and ties that they put on their cotton. Well, I want to tell you and also tell these farmers that they are sadly mistaken. It has been the belief of farmers all these years that they were receiving pay for bagging and ties.

I can sell to cotton mills today on a net-weight basis and you on the old gross-weight method, and your price will be fixed lower than my price so as to take care of the weight of bagging and ties that mills cannot spin.

The only excuse for gross-weight selling of cotton is to permit the use of this old, heavy, disgraceful jute bagging, the material of which is grown by pauper labor in India.

Why have we gone along all these years losing millions annually under this method of baling and selling cotton? It is because farmers are unorganized and, therefore, easy prey for all other well-organized groups.

All other organized and well-financed groups have improved their methods of doing business. Take a look at the first Ford car sold by Henry Ford and look at his latest model. All of these groups have an up-to-date marketing and distributing system from the factory on down to the State, county, and township, and they are able to fix prices, both buying and selling.

Why do not we demand high-density gin-compressed bales of cotton and save additional millions?

I have had a bill for several years to bring this about, but I am just one lone Congressman crying out in the wilderness.

Why should we have net weight? Under the present baling and taring of cotton the farmer is permitted to put on 21 pounds of tare—bagging and ties. If this cotton goes into export, the exporter is permitted to patch on 9 pounds of additional tare—bagging—so as to bring the tare allowance up to 30 pounds, the allowance under our present gross-weight system of selling cotton.

Now, a great many farmers believe that they get paid for the 21 pounds of old jute bagging and ties as previously stated that they sell under the present system. Let us see about this. When you bring in a bale of cotton weighing 500 pounds, which includes 21 pounds of bagging and ties, at 10 cents per pound, you receive $50. Now, you know that you get paid for the tare, because you received the 10 cents not only for the 479 pounds of cotton but the 21 pounds of bagging and ties. That is where farmers have been fooled all these years by the fellow who is making money out of the old heavy jute, both in selling the bagging in the first instance and in a nice profit in patching more on after it leaves their hands. They not only do not get paid for the tare but in a great many instances, especially on exported cotton, they lose the 9 pounds allowed the exporter. Ask your cotton mills if they pay you cotton prices for jute bagging and ties that cannot be spun into cloth.

I want to quote from the hearings before the Agricultural Committee of the House. Mr. Jenkins, a cotton buyer and manufacturer of jute bagging, of Norfolk, Va., testifying:

Mr. FULMER. Do you not think it bad practice to allow 30 pounds tare when we do not need that amount?

Mr. JENKINS. It comes right back to this, the farmer gets the money for the cotton. If he puts 30 pounds tare on, the buyer pays him less for it, and the mill that buys the bale of cotton with the 30 pounds of tare is invariably buying just a little cheaper.

Mr. FULMER. In other words, the mill buys its cotton on a net-weight basis?

Mr. JENKINS. That is what it practically amounts to today.

Mr. Locke, representing the Cotton Shippers' Association, testifying, stated:

Answering the question that you bring, Mr. Fulmer, I quite agree that, in the final analysis, when the mill buys a bale of cotton they know they are not going to consume tare (bagging and ties) and they figure accordingly.

Mr. FULMER. And when the farmer gets a gross price, naturally, he is getting a price less than the amount figured off by the mill for tare?

Mr. LOCKE. Yes, sir.

No other cotton country in the world uses more than 15 pounds of tare, and no other cotton country uses old, heavy jute bagging, not even India, where jute is grown, and every cotton country except the United States sells on net weight. Why is everybody except the well-organized jute interests demanding net-weight sale? For the reason you would be permitted to use around 200,000 bales of cotton, low grade, that would be manufactured into cotton bagging.

We would save annually millions of dollars, freights on useless bagging, insurance, handling of gross-weight cotton in foreign countries, shipped out of this country and to foreign countries, and many other items.

My net-weight bill is endorsed by every organization interested in cotton, the only people opposing the bill, as stated, being the jute interests.

I want to say that the time has come that agriculture must be definitely placed in the economic picture on an equal basis with other organized groups, or our American system of government is in great danger.

We must stop wasting annually a small amount of money divided between various departments of Government and various colleges in connection with research work, new uses for cotton and byproducts on the farm, and centralize our efforts in a large way to do for agriculture that which these organized groups have done.

Interest rates to farmers must be reduced.

An up-to-date marketing and distributing system for farm products must be provided, operated, and owned by farmers, under the supervision of the State and Federal Governments. Unorganized farmers cannot go up against the organized groups, thousands of middlemen, many of them real parasites, sapping the very lifeblood out of producers and consumers.

Regimentation on the part of these monopolistic price-fixing groups must come to an end.

I agree with Senator BORAH in a statement made some time ago:

We will either drive monopoly and price fixing out of our system and restore to the disinherited millions their rightful opportunity in the economic world or we will move on to absolute governmental regimentation.

In 1928–29, while fortunes were piled upon fortunes for a few, it brought bankruptcy to farmers and independent merchants and created bread lines out of the millions of wage earners in this country when the crash came.

Patrick Henry said on one occasion, "Give me liberty or give me death", in defending the rights of American citizens from oppression of King George.

Our forefathers shed their blood that Americans might be free and independent.

The Constitution of the United States was so written as to place all citizens on an equal basis in their respective vocations; and unless we are able to maintain these rights to that great class of people who feed and clothe the world, the independent merchants and the millions of wage earners, there is going to be trouble in this country the like of which has never been recorded in the world's history.

EXTENSION OF REMARKS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the Robinson-Patman bill.

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

Mr. GRISWOLD. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. The gentleman from Indiana asks unanimous consent to extend his own remarks in the RECORD. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

Mr. MAVERICK. Mr. Speaker, I ask unanimous consent to extend my remarks upon the subject of Government movies, such as I went to last night at the Mayflower Hotel.

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

Mr. CONNERY. Mr. Speaker, I ask unanimous consent to extend in the RECORD the remarks I made today on the Frazier-Lemke bill.

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

LEAVE TO ADDRESS THE HOUSE

Mr. HANCOCK of North Carolina. Mr. Speaker, I ask unanimous consent that on Wednesday next, after the reading of the Journal and the disposition of matters on the Speaker's desk, I be permitted to address the House for 10 minutes.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that on Wednesday next, after the reading of the Journal and the disposition of business on the Speaker's table, he may have 10 minutes in which to address the House. Is there objection?

Mr. BOILEAU. Mr. Speaker, I reserve the right to object. I hope the gentleman will put that over to a later date. I do not desire to object, except that the Frazier-Lemke bill will be under consideration, and for that reason I hope the gentleman will withdraw his request.

Mr. HANCOCK of North Carolina. Mr. Speaker, I withdraw that for the present.

Mr. WOODRUM. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. WOODRUM. Mr. Speaker, I have asked for this time, to prefer a unanimous-consent request in the interest of regularity of procedure and the integrity of the CONGRESSIONAL RECORD. This morning it developed in the colloquy that the gentleman from Colorado [Mr. MARTIN] laboring under a misapprehension that under leave to extend his own remarks he had a right to quote parts of the CONGRESSIONAL RECORD, and did so, but the RECORD, when printed, did not show clearly which portion of the remarks were his remarks and which portion was the part that had been put into the RECORD. Also it developed that the gentleman did not have permission to extend his remarks.

Mr. MARTIN of Colorado. Mr. Speaker, will the gentleman yield?

Mr. WOODRUM. Yes.

Mr. MARTIN of Colorado. I had permission to extend my remarks, but I did not ask specially to quote from the RECORD.

Mr. WOODRUM. The gentleman had the right to extend his remarks, but not to include that part referred to. Unfortunately, as we often do in debate, some heat got into the matter and the debate unfortunately took on a partisan feeling. It is all over now, and the RECORD ought to be corrected. In the interest of regularity of procedure and integrity of the CONGRESSIONAL RECORD, I ask unanimous consent that the RECORD be corrected by deleting that portion of the gentleman's remarks which were not supposed to be put in, according to his leave to extend.

The SPEAKER. Is there objection to the request of the gentleman from Virginia?

Mr. SNELL. Mr. Speaker, I reserve the right to object. When the opportunity was presented this morning to protect the integrity of the RECORD the gentleman's side almost unanimously went on record against it. For that reason I object to the gentleman's request.

Mr. WOODRUM. If the gentleman will permit——

Mr. SNELL. If that is not a true statement of fact, very well. [Cries of "Regular order!"] I object.

The SPEAKER. The gentleman from New York objects.

EXTENSION OF REMARKS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD upon the subject of the Republican Party.

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

Mr. MAVERICK. Mr. Speaker, I ask unanimous consent to extend my remarks and to include a eulogy of the Republican leader [Mr. SNELL].

The SPEAKER. Is there objection?

Mr. SNELL. Mr. Speaker, I object.

BOILER INSPECTION IN THE DISTRICT OF COLUMBIA

Mrs. NORTON. Mr. Speaker, I call up the bill (S. 2953) to provide for the inspection, control, and regulation of steam boilers and unfired pressure vessels in the District of Columbia.

The SPEAKER. The gentlewoman from New Jersey calls up a bill, which the Clerk will report.

The Clerk reported the title of the bill.

Mrs. NORTON. Mr. Speaker, I ask unanimous consent that this bill be considered in the House as in Committee of the Whole.

The SPEAKER. Is there objection?

Mr. BLANTON. Mr. Speaker, it is too early to ask that. I insist the bill be read so that we can know what it is about.

The SPEAKER. The Clerk will read the bill.

The Clerk read the bill, as follows:

Be it enacted, etc., That this act may be cited as the "Boiler Inspection Act of the District of Columbia."

SEC. 2. Wherever the word "person" is used in this act it shall include individuals, firms, partnerships, associations, and corporations.

SEC. 3. There is hereby constituted a boiler inspection service in the Engineer Department of the District of Columbia, to be composed of the following: (a) A boiler inspector who shall be qualified by training and experience in the construction and operation of steam boilers and unfired pressure vessels, and who, under an official designated by the Commissioners of the District of Columbia, shall have charge of the enforcement of the provisions of this act and of the regulations promulgated hereunder; (b) such assistant boiler inspectors as may be necessary, qualified by training and experience in the construction and operation of

steam boilers and unfired pressure vessels; (c) and such other employees as may be necessary for the proper performance of the work. All such officials and employees shall be appointed by the Commissioners of the District of Columbia, and their compensation shall be fixed in accordance with the Classification Act of 1923, as amended.

SEC. 4. No person shall use or cause to be used any steam boiler operating at a pressure in excess of 15 pounds per square inch, or operating at a pressure less than 15 pounds per square inch unless provided with an unassisted gravity return, or any unfired pressure vessel operating at a pressure in excess of 60 pounds per square inch and having a capacity in excess of 15 gallons, except such vessels as may be exempted by the Commissioners of the District of Columbia, without having first obtained a certificate of inspection from the boiler inspector.

SEC. 5. No person shall operate or cause to be operated any boiler or unfired pressure vessel, referred to in section 4 hereof, at a pressure greater than that permitted by the certificate of inspection, or while feed pumps, gages, cocks, valves, or automatic safety-control devices are not in proper working condition, or in violation of any of the regulations promulgated hereunder by the Commissioners of the District of Columbia.

SEC. 6. The boiler inspector, or one of his assistants, shall inspect annually all boilers and unfired pressure vessels for which a certificate of inspection is required by section 4 of this act, and shall determine by actual tests the condition thereof from the standpoint of safety and fitness for operation. If such boiler or vessel be safe and fit for operation, the boiler inspector shall issue the certificate of inspection which shall state, among other things, the pressure per square inch such boiler or vessel may be allowed to carry. This certificate of inspection shall be displayed in a conspicuous place in close proximity to the boiler or vessel covered thereby. In the case of a steam boiler or unfired pressure vessel which is regularly inspected at least once a year by an insurance company duly licensed in the District of Columbia and approved by the Commissioners of the said District as to its inspection service, where a report of such inspection filed within 30 days after such inspection with the boiler inspector shows any such boiler or unfired pressure vessel to be in a safe and insurable condition, such inspection and report may take the place of the inspection hereinbefore provided and the certificate of inspection may be issued upon such report.

SEC. 7. The boiler inspector may in his discretion revoke or suspend the certificate of inspection provided in section 4 of this act if at any time he shall find any boiler or unfired pressure vessel covered by such certificate to be unsafe or unfit for operation.

SEC. 8. Steam boilers and unfired pressure vessels located in or upon self-propelled boats or vessels or boats or vessels owned or operated by the United States, or upon locomotives, street cars, busses, or other vehicles, operated under the regulations of any Federal agency or the Public Utilities Commission of the District of Columbia, shall be exempt from the provisions of this act.

SEC. 9. There shall be paid to the Collector of Taxes of the District of Columbia for the issuance of a certificate as required by this act fees to be fixed from time to time by the Commissioners of the District of Columbia for the annual inspection of each steam boiler or unfired pressure vessel, commensurate with the cost of inspection, with power to fix higher fees for the issuance of a certificate where the inspection in connection therewith is made on a Sunday or legal holiday. When an inspection report is filed by an insurance company with the said boiler inspector, showing that a boiler or unfired pressure vessel has been inspected and found to be in a safe and insurable condition as provided in section 6, there shall be paid to the Collector of Taxes of the District of Columbia a fee of $1 prior to the issuance of a certificate of inspection.

SEC. 10. The boiler inspector and his assistants shall have the right to enter, in the performance of his or their duties, at all reasonable hours, all premises on which a steam boiler or unfired pressure vessel is being installed, operated, or maintained, and it shall be unlawful for any person to deny admittance to any such inspector or assistant or to interfere with him or them in the performance of his or their duties.

SEC. 11. The boiler inspector shall keep in the office of the boiler inspection service all applications made, and a complete record thereof, as well as of all certificates issued. He shall also keep a complete record of each boiler and unfired pressure vessel inspected, and such other records and data pertaining to the boiler inspection service as may be directed by the Commissioners of the District of Columbia.

SEC. 12. The use of any steam boiler or unfired pressure vessel in violation of any of the prohibitions or requirements of this act, or of the regulations promulgated under the authority hereof, shall constitute a common nuisance and the Corporation Counsel of the District of Columbia may maintain an action in the Supreme Court of the District of Columbia, in the name of the District of Columbia, to abate and perpetually enjoin such nuisance.

SEC. 13. If any person shall violate any one or more of the provisions of this act, or of regulations duly promulgated hereunder, the Corporation Counsel of the District of Columbia, or any of his assistants, shall file an information in the police court in the name of the District of Columbia, and upon conviction such person shall be subject to a fine not to exceed $100 or to imprisonment for not more than 90 days, or both, for each and every violation thereof and each violation shall constitute a separate offense.

SEC. 14. The Commissioners of the District of Columbia are hereby authorized and empowered to make such regulations as they may deem proper to carry out the provisions of this act and to fix the fees herein provided.

SEC. 15. All laws or parts of laws relating to boiler inspection in conflict with the provisions of this act are hereby repealed: *Provided*, That no provision hereof shall be deemed to amend, alter, or repeal the act approved February 28, 1887, as amended, being an act to regulate steam engineering in the District of Columbia.

SEC. 16. If any provision of this act or the application thereof to any person or circumstance is held invalid, such invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are declared to be severable.

SEC. 17. This act shall become effective 6 months from the date of its approval. The regulations and schedule of fees herein provided for shall be promulgated by the Commissioners of the District of Columbia and printed in one or more of the daily newspapers published in the said District but shall not be enforced until 30 days after such publication or until the effective date of this act. Amendments to the regulations or new or additional schedules of fees, when and as the same may be adopted, shall likewise be printed in one or more of the daily newspapers published in the said District and no penalty for violation thereof or payment of new or additional fees prescribed shall be enforced until 30 days after such publication.

The SPEAKER. Is there objection to the request of the gentlewoman from New Jersey that the bill may be considered in the House as in Committee of the Whole?

Mr. BLANTON. Mr. Speaker, with the assurance we have had about some other matters, there will be no objection.

There was no objection.

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Page 1, line 10, after the letter "(a)", strike out "A boiler inspector" and insert "The present inspector and necessary assistant inspectors";

Page 2, strike out lines 8, 9, and 10 and the letter "(c)" on line 11;

Page 2, line 14, after the word "Columbia", strike out the remainder of the line and all of lines 15 and 16;

Page 3, line 23, insert after the word "regularly" the words "insured and";

Page 4, line 6, strike out "may" and insert the word "shall";

Page 4, line 8, insert "Insurance companies shall report to the inspectors the cancelation of insurance of any certificate holder";

Page 4, line 17, strike out the word "self-propelled", and, in the same line, after the word "vessels", insert "or other floating equipment";

Page 4, line 25, after the word "Columbia", insert "by the owner or user";

Page 5, after line 11, insert "the owner or user of such insured and inspected boiler or unfired vessel shall be exempt from the payment of all fees with the exception that";

Page 5, line 15, after "$1", insert "by the owner or user"; and

Page 5, after the end of line 16, insert "No such certificate shall be valid after the boiler or unfired pressure vessel shall cease to be insured by an insurance company authorized as provided in section 6 of this act."

The committee amendments were agreed to.

The bill as amended was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mrs. NORTON. Mr. Speaker, for the benefit of the Members, I should like to say that I have had a great number of inquiries as to whether or not the Sisson bill will be called up today, the so-called "red rider repeal." I want to state to the Members that I do not intend to call that bill up today. We will not have time to discuss it as we intend to discuss it, and there are just a few important bills on the calendar that I think are noncontroversial, and I shall call those up for the balance of my time.

REGULATION OF MOTOR-VEHICLE TRAFFIC IN THE DISTRICT OF COLUMBIA

Mrs. NORTON. Mr. Speaker, I call up the bill, S. 3161, to amend section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia, and so forth", approved March 3, 1925, as amended, and I ask unanimous consent that the same may be considered in the House as in Committee of the Whole.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia, etc.", approved March 3, 1925, as amended, be, and the same is hereby, amended so as to read as follows:

"The Commissioners of the District of Columbia, or their designated agent, may suspend or revoke the right of any nonresident person as defined in section 8 (title 6, sec. 245 (a), D. C. Code), to operate a motor vehicle in the District of Columbia, for any cause they or their agent may deem sufficient, and the proper authority at the place of issuance of the permit, or other authority to operate a motor vehicle, shall be notified of such suspension and the reason therefor, immediately: *Provided*, That such order of suspension or revocation shall take effect 10 days after its issuance, and the same be subject to review and appeal in the manner and under the same conditions as are provided for such matters in section 13 (a) (title 6, sec. 250 (a), D. C. Code)."

The SPEAKER. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXAMINATION AND REGISTRATION OF BEAUTICIANS

Mrs. NORTON. Mr. Speaker, I call up the bill (H. R. 12424) to provide for examination and registration of those engaging in the occupation of beauty culture, and I ask unanimous consent that this bill may be considered in the House as in Committee of the Whole.

The Clerk read as follows:

Be it enacted, etc.,

DEFINITIONS

SECTION 1. That the following words or phrases, unless the context clearly indicates otherwise, shall have the meanings ascribed to them in this section:

"Beauty culture" includes any or all work done for compensation by any person, which work is generally and usually performed by so-called "hairdressers", "cosmetologists", "cosmeticians", "beauticians", or "beauty culturists", and, however dominated in so-called "hairdressing and beauty shops" ordinarily patronized by women, which work is for the embellishment, cleanliness, and beautification of the women's hair, such as arranging, dressing, curling, waving, permanent waving, cleansing, cutting, singeing, bleaching, coloring, pressing, or similar work thereon and thereabout, and the removal of superfluous hair, and the massaging, cleansing, stimulating, manipulating, exercising, or similar work upon the scalp, face, arms, or hands, or the upper part of the body, by the use of mechanical or electrical apparatus or appliances or cosmetics, preparations, tonics, antiseptics, creams, or lotions, or by any other means, and of manicuring the nails, which enumerated practices shall be inclusive of the term "beauty culture" but not in limitation thereof.

"Board" means the District of Columbia Hairdressing and Cosmetology Board.

HAIRDRESSING AND COSMETOLOGY BOARD

SEC. 2. There is hereby created the District of Columbia Hairdressing and Cosmetology Board, consisting of five members to be appointed by the Commissioners of the District of Columbia. Each member of the board shall be a hairdresser or cosmetologist, and shall be engaged as the proprietor of a beauty shop in the District of Columbia at the time of appointment. The said Commissioners are hereby empowered to remove, after full hearing, any member of the board for neglect of duty or any other just cause. The members of the board shall hold office for a term of 3 years, but every member shall hold office after the expiration of the term for which he has been formally appointed until his successor has been appointed and qualified. The board shall annually organize by the election of a chairman, secretary, and a treasurer, who shall be members of the said board and who shall hold office for 1 year and until their successors have been elected and qualified. Said board shall have a common seal, and the said treasurer shall give such bond for the faithful performance of his duties as the Commissioners of the District of Columbia may deem necessary. Three members of the board shall constitute a quorum.

PRACTICE OF BEAUTY CULTURE WITHOUT REGISTRATION PROHIBITED

SEC. 3. It shall be unlawful for any person to practice or teach beauty culture, or manage a beauty shop, or to use or maintain any place for the practice or teaching of beauty culture, for compensation, unless he or she shall have first obtained from the board a certificate of registration as provided in this act. Nothing contained in this act, however, shall apply to or affect any person who is now actually engaged in any such occupation, except as hereinafter provided.

REQUIREMENTS TO PRACTICE

SEC. 4. Before any person may practice or teach beauty culture or manage a beauty shop, such person shall file with the board a written application for registration, accompanied by a health certificate issued by a registered licensed physician of the District of Columbia, under oath, on a form which shall be prescribed and supplied by the board, and shall deposit with the said board the registration fee, and pass an examination as to fitness to practice or teach beauty culture or manage a beauty shop, as hereinafter provided in this act.

ELIGIBILITY REQUIREMENTS FOR EXAMINATION

SEC. 5. No person shall be permitted by the board to take an examination to receive a certificate as an operator unless such person shall be at least 16 years of age and has been registered as a student and has had training, as hereinafter provided in this act, in a beauty school duly registered by the board, or unless such person shall have been registered and served as an apprentice at least 6 months as hereinafter provided in this act: *Provided, however*, That the board may permit a person to take an examination without the prior studentship or apprenticeship herein required if such person shall establish, to the satisfaction of the board, that he or she has been an operator in the active practice of beauty culture for at least 24 months within the 5 years next preceding the effective date of this act. No person shall be permitted to take an examination for a certificate to teach beauty culture or act as manager of a beauty shop unless such person shall be at least 18 years of age, and has had at least 12 months' experience as an operator in a beauty shop or has had training in a duly registered school of beauty culture of 1,000 hours inclusive of the studies necessary to become an operator.

MANICURING

SEC. 6. A limited certificate or registration to manicure the nails only may be applied for and granted under all of the terms and conditions of this act, except that the examination therefor may be limited to such practice only and the required schooling shall be not less than 75 hours.

REQUIREMENTS OF A SCHOOL OF BEAUTY CULTURE

SEC. 7. No school of beauty culture shall be granted a certificate of registration unless it shall attach to its staff, as a consultant, a person licensed by the District of Columbia to practice medicine, and employ and maintain a sufficient number of competent teachers, registered as such, and shall possess apparatus and equipment sufficient for the proper and full teaching of all subjects of its curriculum, shall keep a daily record of the attendance of each student, shall maintain regular class and instruction hours, shall establish grades and hold examinations before issuance of diplomas, and shall require a day-school term of training of not less than 500 hours within a period of not less than 6 consecutive months or a night-school term of training for a period of not less than 12 consecutive months for a complete course, comprising all or a majority of the practices of cosmetology, as provided by this act, and to include practical demonstrations and theoretical studies, and study in sanitation, sterilization, and the use of antiseptics, cosmetics, and electrical appliances consistent with the practical and theoretical requirements as applicable to beauty culture or any practice thereof. In no case shall there be less than one teacher to each 25 pupils.

STUDENT PRACTICE UPON THE PUBLIC FOR PAY PROHIBITED

SEC. 8. It shall be unlawful for any school of beauty culture to permit its students to practice beauty culture upon the public under any circumstances except by way of clinical work upon persons willing to submit themselves to such practice after having first been properly informed that operator is a student. No school of beauty culture shall, directly or indirectly, charge any money whatsoever for treatment by its students or for materials used in such treatment.

PRACTICE IN BEAUTY SHOPS ONLY

SEC. 9. It shall be unlawful for any person to practice beauty culture for pay in any place other than a registered beauty shop: *Provided*, That a registered operator may furnish beauty-culture treatments to persons in residences of such persons by appointment.

EXCEPTIONS TO EXAMINATION REQUIREMENTS, PRESENT STUDENTS AND APPRENTICES

SEC. 10. Any person who has practiced or taught beauty culture or acted as manager of a beauty shop or school of beauty culture, under a certificate, license, or permit, for not less than 2 years in any State or Territory for at least 6 months next preceding the effective date of this act and is thus engaged in the District of Columbia the time this act goes into effect may secure the certificate of registration required by this act without an examination or compliance with other requirements as to age or education, provided such person shall make application to the board for registration within 90 days after the effective date of this act. Such applications shall be accompanied by an affidavit of a practicing physician that the applicant was examined and is free from all contagious and infectious diseases, and the registration fee required by this act. Any person studying beauty culture in a school of beauty culture or as an apprentice in a beauty shop in the District of Columbia at any time this act goes into effect shall receive credit for such time and studies without complying with the requirements of this act as to age and preliminary education, provided such person shall make application to the board for registration as a student or apprentice within 3 months after this act goes into effect. Students, upon graduating from registered schools of beauty culture, may apply for, and receive from the

board, a temporary permit to practice as an operator until the next regular examination held by the board under the provisions of this act.

APPRENTICES IN BEAUTY SHOPS

SEC. 11. Any cosmetologist, hairdresser, or cosmetician who is a beauty-shop owner and who is a holder of a teacher's certificate may instruct apprentices: *Provided*, That there shall be no less than three licensed operators for each apprentice in any shop and there shall be no more than two apprentices in any shop, and provided such shop is not held out as a school of beauty culture. Such apprentices may apply for examination at the end of their apprenticeship at the next regular examination held by the board, and, if successful therein, shall be registered as operators. Registered apprentices, upon completion of their required term of apprenticeship, may apply for, and receive from the board, a temporary permit to practice as an operator until the next regular examination.

REGULATION BY THE BOARD

SEC. 12. The board is hereby empowered to make and enforce such rules and regulations, subject to the approval of the Commissioners of the District of Columbia, as it deems necessary to carry out the provisions of this act.

EXAMINATIONS

SEC. 13. If the board finds that the applicant has submitted the credentials required by this act for admission to examination, and has paid the registration fee required by this act, the board shall admit such applicant to examination, and shall issue a certificate of registration to practice as operator, manager, or teacher, as the case may be, to those successfully passing the required examinations. The board shall hold public examinations on the third Tuesdays in January, April, July, and October in the District of Columbia, at such hours as the board shall prescribe.

POWERS AND DUTIES OF THE BOARD

SEC. 14. The board shall have the power to refuse, revoke, or suspend licenses or certificates, after full hearing, on proof of violation of any provisions of this act or the rules and regulations established by the board under this act, and shall have the power to require the production of such books, records, and papers as it may desire. Before any certificate shall be suspended or revoked for any of the reasons contained in this section, the holder thereof shall have notice, in writing, of the charge or charges against him or her, and shall, at a day specified in said notice, which shall be at least 5 days after the service thereof, be given a public hearing with a full opportunity to produce testimony in his or her behalf. Any person whose certificate of registration has been so suspended or revoked may, after the expiration of 90 days, on application to the board, have the same reissued to him or her upon satisfactory proof that the disqualification has ceased.

APPEAL FROM ACTION OF THE BOARD

SEC. 15. An appeal may be taken from any action of the board to the Commissioners of the District of Columbia and the decision of the said Commissioners shall be final.

FEES

SEC. 16. The registration fee for the issuance of a license, with or without examination, shall be as follows: $5 for beauty-shop owners, managers, and teachers; $2 for operators and manicurists; $1 for students or apprentices; and $50 for schools of beauty culture. Annual renewal fees shall be $5 for shop owners and managers and school instructors; $2 for operators and manicurists; and $25 for schools of beauty culture. The above fees for registration, examination, and certificate shall be paid in advance to the treasurer of the board. Out of the fees paid the said board there shall be defrayed all expenses incurred in carrying out the provisions of this act, together with a fee of $10 per day for each member of said board for each day he may be actually engaged upon business pertaining to his official duties as such board member: *Provided*, That such expenses shall in no event exceed the total of receipts: *Provided further*, That at the close of each fiscal year any funds unexpended in excess of the sum of $1,000 shall be paid into the Treasury of the United States to the credit of the District of Columbia.

TO WHOM THE PROVISIONS IN THIS ACT SHALL NOT APPLY

SEC. 17. Nothing in this act shall prohibit service in case of emergency or domestic administration without compensation, nor service by persons authorized under the laws of the District of Columbia to practice medicine, surgery, dentistry, chiropody, osteopathy, or chiropractic, nor services by barbers lawfully engaged in the performance of the usual and ordinary duties of their vocation.

DISPLAY OF CERTIFICATES

SEC. 18. Every holder of a certificate granted by the said board, as provided in this act, shall display it in a conspicuous place in his or her principal office, place of business, or employment.

DURATION AND RENEWAL OF CERTIFICATES OF REGISTRATION

SEC. 19. The certificates of registration issued in the year in which this act goes into effect shall expire as of December 31, 1935. Thereafter certificates shall be issued for no longer than 1 year. All certificates shall expire on the 31st day of December next succeeding unless renewed for the next year. Certificates may be renewed by application made prior to the 31st day of December of each year, and the payment of the renewal fees provided in this act.

PENALTIES

SEC. 20. (a) Any person who shall violate or aid or abet in violating any of the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction shall be punished by a fine of not more than $300 or imprisonment in the workhouse of the District of Columbia for not more than 6 months, or by both such fine and imprisonment.

(b) Any operator, manager, teacher, student, or apprentice who shall practice the occupation of beauty culture while knowingly suffering from contagious or infectious disease, or who shall knowingly serve any person afflicted with such disease, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine of not more than $300 or imprisonment in the workhouse of the District of Columbia for not more than 6 months, or by both such fine and imprisonment.

PROSECUTIONS

SEC. 21. It shall be the duty of the corporation counsel, or one of his assistants, to prosecute in the name of the District of Columbia all violations of the provisions of this act.

EFFECT OF PARTIAL INVALIDITY OF ACT

SEC. 22. Each section of this act, and every part of each section, is hereby declared to be independent of every other, and the holding of any section, or part thereof, to be void or ineffective for any cause shall not be deemed to affect any other section, or part thereof.

REPEAL

SEC. 23. All acts or parts of acts inconsistent with this act are hereby repealed.

The SPEAKER. Is there objection to the request of the gentlewoman from New Jersey that the bill may be considered in the House as in Committee of the Whole?

Mr. BLANTON. Reserving the right to object, Mr. Speaker, this bill creates a profession out of beauty culture. How many of the States have such a law in the United States?

Mrs. NORTON. I think about 40 of the 48 have such a law. You have a similar law in Texas.

Mr. BLANTON. There are sanitary laws regarding all barber shops in about all of the States.

Mrs. NORTON. And this comes under the same heading.

Mr. BLANTON. But this creates a profession, and I was wondering whether we should do more than require certain examinations and licenses.

Mrs. NORTON. The gentleman from Pennsylvania [Mr. QUINN] introduced this bill, and I am sure he will be glad to discuss it with the gentleman.

Mr. BLANTON. What expense is this newly created board on the District government? Do the fees pay for the expense?

Mr. QUINN. I may state that there are 42 States in the Union that have this law.

Mr. BLANTON. What salaries do the board members draw?

Mr. QUINN. Five dollars per day.

Mr. BLANTON. For how many days?

Mr. QUINN. When necessary for them to have a meeting.

Mr. BLANTON. Could they have a meeting 365 days in the year?

Mr. QUINN. If it was necessary, yes, sir; but it is hardly necessary.

Mr. BLANTON. Is that to be paid out of the treasury of the District of Columbia?

Mr. QUINN. Out of the fees paid.

Mr. BLANTON. Only out of the fees?

Mr. QUINN. Yes; absolutely.

Mr. BLANTON. It is not to be paid by the District and then the District reimbursed? Is that right?

Mr. QUINN. That is right.

Mr. BLANTON. There is nothing whatever paid out of the treasury of the District of Columbia?

Mr. QUINN. Positively not.

Mr. BLANTON. And there is nothing whatever paid out of the Treasury of the United States?

Mr. QUINN. Positively not.

Mr. BLANTON. The only thing that is paid to anybody is paid out of fees after the fees are collected. Is that right?

Mr. QUINN. That is right. I may say that this bill should give to the District of Columbia from ten to twenty

thousand dollars a year profit. It goes into the general fund.

Mr. BLANTON. What about this $10 provision on page 11?

Mr. QUINN. That is the fee they pay for the license.

Mr. BLANTON. For instance, a young lady who may be a manicurist in a barber shop, a poor girl with nothing on earth except what she makes, will have to stand the expense of paying somebody in order that she may follow her avocation?

Mr. QUINN. She pays a license fee to practice her profession.

Mr. BLANTON. Which is a total of what amount?

Mr. QUINN. I do not happen to have the information at hand.

Mr. BLANTON. Is the gentleman the author of the bill?

Mr. QUINN. Yes.

Mr. BLANTON. Can the gentleman tell me how much it will cost her?

Mr. QUINN. I do not remember, offhand. I think the fee is $5.

Mrs. NORTON. It is $5 a year for beauty-shop owners, managers, and teachers; manicurists and operators, $2.

Mr. BLANTON. It is $10 a year, is it not?

Mrs. NORTON. No; I was mistaken about $10 flat. It is a graduated fee, as I have stated. Also, the fee is $1 to students and apprentices and $50 for schools of beauty culture, with a renewal fee of $25.

Mr. QUINN. I have based all these fees at just half what they are in my own State of Pennsylvania. I have made the fees half what they are in most of the other States.

Mr. BLANTON. I am thinking of the poor girls all over the country trying to make a living. If they would have to put up $10 before they could work, it would mean a lot to a poor girl.

Mr. QUINN. They were uppermost in my mind. That is why I cut the fees in half.

Mr. BLANTON. I am not on this committee. If the committee thinks this kind of legislation ought to go through, the responsibility is on their shoulders.

Mr. SCHULTE. Mr. Speaker, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. SCHULTE. The bill was reported out by the committee, I believe, unanimously. They felt it would protect those that are in business at the present time. They, of course, would have to take the same examination, physical and mental, that the others must.

The SPEAKER. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mrs. NORTON. Mr. Speaker, this finishes the District of Columbia business for today.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. PARSONS, indefinitely, on account of illness.

To Mr. DEEN, for today, on account of important business.

To Mr. DEMPSEY, for 1 week, on account of important business.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 10544. An act authorizing the erection of a memorial to those who met their death in the wreck of the dirigible *Shenandoah*.

The SPEAKER announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

S. 1379. An act to amend section 981 of title IV and section 843 of title VI of the Canal Zone Code;

S. 3839. An act for the relief of Randall Krauss, a minor;

S. J. Res. 248. A joint resolution to provide for participation by the United States in an inter-American conference to be held at Buenos Aires, Argentina, or at the capital of another American Republic in 1936; and

S. J. Res. 260. A joint resolution to provide an additional appropriation for folding speeches and pamphlets for the Senate for the fiscal year 1936.

BILLS PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H. R. 3823. An act for the relief of the parents of Albert Thesing, Jr.;

H. R. 11035. An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1937, and for other purposes;

H. R. 11098. An act to provide for terms of the United States District Court for the Middle District of Pennsylvania to be held at Wilkes-Barre, Pa.;

H. R. 11994. An act to provide for the establishment of a term of the District Court of the United States for the Western District of Oklahoma at Shawnee, Okla.; and

H. R. 12098. An act making appropriations for the Departments of State and Justice, and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1937, and for other purposes.

THE LATE SENATOR TRAMMELL

Mr. GREEN. Mr. Speaker and my colleagues, it is with deep sorrow that I announce the passing of Senator PARK TRAMMELL, Florida's junior United States Senator. I knew Senator TRAMMELL intimately for the past 25 years. No public servant ever served with more sincerity nor honesty than did he. He was a fine Christian gentleman, kind, sympathetic, and thoughtful always of the best interests of his fellow man. Practically all of his life from the time he reached his majority was spent in public service.

He served as mayor of his home city, Lakeland, Fla.; then in the Florida Legislature; then in the Florida State Senate; as attorney general of Florida; as chief executive of the State; and for the past 20 years in the United States Senate. He was never defeated for public office, because he was universally loved in Florida and was a true champion of the rights and interests of the plain people. I feel his loss keenly, not only to our State and Nation but as that of a personal friend.

Horace C. Carlisle, of Alabama, Senator TRAMMELL's native State, has written a few lines most appropriate, which I ask unanimous consent to include in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The poem referred to follows:

SENATOR TRAMMELL

S-enator TRAMMELL, relieved of his labors, has
E-ntered the regions of undisturbed rest;
N-o vexing problems confronting his Government,
A-ny more, ever, can trouble his breast.
T-ime sweeps us all toward the brink of eternity,
O-ver the shimmering shallows of life,
R-ound the swift bends of surprising experience—

P-ast the fierce canyons of peril and strife.

T-RAMMELL, as Governor, and as a Senator,
R-ightly was held in the highest esteem;
A-ll throughout Florida, sad hearts, in unison,
M-ournfully sing, "Death is only a dream."
M-en come and go, and are not like the centuries—
E-very beginning presages an end;
L-ife on the earth leads to Death, the great terminal,
L-ighted with hope by humanity's Friend.

—*Horace C. Carlisle.*

Mr. GREEN. Mr. Speaker, I send the following resolution to the desk and ask for its immediate consideration.

The Clerk read as follows:

House Resolution 510

Resolved, That the House has heard with profound sorrow of the death of Hon. PARK TRAMMELL, a Senator of the United States from the State of Florida.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased Senator.

Resolved, That a committee of five Members be appointed on the part of the House to join the committee appointed on the part of the Senate to attend the funeral.

The resolution was agreed to.

The SPEAKER. The Chair appoints the following Members as the committee to attend the funeral: Messrs. GREEN, SEARS, CALDWELL, PETERSON of Florida, and WILCOX.

ADJOURNMENT

The SPEAKER. The Clerk will report the remainder of the resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect to the memory of the deceased the House do now adjourn.

The resolution was agreed to; accordingly (at 3 o'clock p. m.) the House adjourned until tomorrow, Tuesday, May 12, 1936, at 12 o'clock noon.

COMMITTEE HEARING

COMMITTEE ON THE PUBLIC LANDS

There will be a meeting of the Committee on the Public Lands on Tuesday, May 12, 1936, at 10:30 o'clock a. m., in room 328, House Office Building, to consider various bills.

EXECUTIVE COMMUNICATIONS, ETC.

834. Under clause 2 of rule XXIV, a letter from the Reconstruction Finance Corporation, transmitting its report of its activities and expenditures for March 1936 (H. Doc. No. 493), was taken from the Speaker's table and referred to the Committee on Banking and Currency and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. HOBBS: Committee on the Judiciary. S. 3477. An act relating to the jurisdiction of the judge for the northern and middle districts of Alabama; without amendment (Rept. No. 2606). Referred to the Committee of the Whole House on the state of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BOYKIN: A bill (H. R. 12657) to amend section 2 of the act entitled "An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama", approved May 26, 1928; to the Committee on Interstate and Foreign Commerce.

By Mr. DEMPSEY: A bill (H. R. 12658) to restore certain benefits to members of the Civilian Conservation Corps and their dependents; to the Committee on Labor.

By Mr. FERNANDEZ: A bill (H. R. 12659) to provide for court stenographers in the United States district courts and to fix their duties and compensation; to the Committee on the Judiciary.

By Mr. HOFFMAN: A bill (H. R. 12660) to amend Public Act No. 271 of the Seventy-fourth Congress, first session; to the Committee on Ways and Means.

By Mr. MURDOCK: A bill (H. R. 12661) to provide for the construction, extension, and improvement of public-school buildings in Uintah County, Utah; to the Committee on Indian Affairs.

By Mr. STUBBS: A bill (H. R. 12662) making it illegal to employ any alien while there are American citizens unemployed who are qualified, able, and willing to work, and fixing the penalty for willful and knowing violation thereof; to the Committee on Labor.

By Mr. WHITE: A bill (H. R. 12663) to provide for studies and plans for the development of a hydroelectric power project at Cabinet Gorge on Clark Fork of the Columbia River, and a reclamation project for the Rathdrum prairie area, and for other purposes; to the Committee on Irrigation and Reclamation.

By Mr. TOLAN: A bill (H. R. 12664) to provide compensation for injury or death of employees of contractors on public buildings, public works, or private employees employed at places subject to the exclusive jurisdiction of the United States; to the Committee on the Judiciary.

By Mr. VINSON of Georgia: Resolution (H. Res. 511) for the consideration of H. R. 10129; to the Committee on Rules.

By Mr. BLOOM: Joint resolution (H. J. Res. 586) authorizing the President to invite foreign countries to participate in the New York World's Fair, 1939, Inc., in the city of New York during the year 1939; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Maryland, regarding the amending of the Social Security Act; to the Committee on Ways and Means.

Also, memorial of the Legislature of the State of New York, regarding the cancellation of the license of Radio Station WLTH; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BULWINKLE: A bill (H. R. 12665) for the relief of Maurice D. Pryor; to the Committee on Military Affairs.

Also, a bill (H. R. 12666) for the relief of Mary Caldwell; to the Committee on Claims.

Also, a bill (H. R. 12667) granting an increase of pension to Sherman G. Johnson; to the Committee on Invalid Pensions.

By Mr. DEMPSEY: A bill (H. R. 12668) for the relief of Charles E. Miller; to the Committee on the Post Office and Post Roads.

By Mr. DUFFEY of Ohio: A bill (H. R. 12669) for the relief of Cecelia Folta, wife of Victor Folta, nee Cecelia Szalankiewicz, alias Kazmiera Niemczyk; to the Committee on Immigration and Naturalization.

By Mr. McFARLANE: A bill (H. R. 12670) for the relief of the heirs of Jean Balliste de la Faette; to the Committee on War Claims.

By Mr. PALMISANO: A bill (H. R. 12671) for the relief of the First, Second, and Third National Steamship Cos.; to the Committee on Claims.

By Mrs. ROGERS of Massachusetts: A bill (H. R. 12672) authorizing the President of the United States to present in the name of Congress a Medal of Honor to Sara Cunningham Engert; to the Committee on Foreign Affairs.

By Mr. THURSTON: A bill (H. R. 12673) granting a pension to John Sanford; to the Committee on Invalid Pensions.

By Mr. VINSON of Kentucky: A bill (H. R. 12674) to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of J. W. Akers; to the Committee on Claims.

By Mr. WOLFENDEN: A bill (H. R. 12675) for the relief of Domenick Piano (Pappano); to the Committee on Military Affairs.

By Mr. QUINN: Joint resolution (H. J. Res. 585) conferring upon the Court of Claims jurisdiction of the claim of the Rodman Chemical Co. against the United States; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10863. By Mr. CULLEN: Petition of the Old South Brooklyn Social Workers' League, 66 Boerum Place, Brooklyn, N. Y., urging the passage of the Wagner-Ellenbogen slum clearance and low rent housing bill; to the Committee on Banking and Currency.

10864. By Mr. SISSON: Petition of residents of Oriskany Falls, N. Y., urging passage of the repeal anticanteen law; to the Committee on the Judiciary.

10865. By the SPEAKER: Petition of the City Council of Greenville, S. C.; to the Committee on Banking and Currency.

10866. Also, petition of the civic committee for slum clearance, Atlantic City, N. J.; to the Committee on Banking and Currency.

10867. Also, petition of the Territorial central committee of the Republican Party of Hawaii; to the Committee on the Territories.

10868. Also, petition of the city of Dearborn, Mich.; to the Committee on Banking and Currency.

10869. Also, petition of the City Council of Oakland, Calif.; to the Committee on Naval Affairs.

10870. Also, petition of the North Penn Boosters Association; to the Committee on the Judiciary.

SENATE

TUESDAY, MAY 12, 1936

The Chaplain, Rev. Z@Barney T. Phillips, D. D., offered the following prayer:

O merciful God and Heavenly Father, whose light shines down the path of life, whose tender mercy heals the brokenhearted and turns the sadness of the sorrowful to joy, let Thy love be visible to those who are bereft, and may they find strength in the garment of tenderness woven by our sympathy.

Grant that the soul of our beloved friend and colleague may find peace and refreshment, joy and comfort in the paradise of God; and may he go from strength to strength in the life of perfect service in Thy heavenly kingdom.

Keep our hearts strong against evil and warm toward each other; and though we ponder for the moment the strange tidings of destiny told in an hour of time, may we ever be led to seek the morning of our infinite heritage when joy shall end the night of weeping and life's long shadows break in cloudless love. Through Jesus Christ our Lord. Amen.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar days Friday, May 8, and Monday, May 11, 1936, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, transmitted to the Senate the resolutions of the House adopted as a tribute to the memory of Hon. Park Trammell, late a Senator from the State of Florida.

The message announced that the House had passed without amendment the bill (S. 3161) to amend section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia", etc., approved March 3, 1925, as amended.

The message also announced that the House had passed the bill (S. 2953) to provide for the inspection, control, and regulation of steam boilers and unfired pressure vessels in the District of Columbia, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 12424. An act to provide for examination and registration of those engaging in the occupation of beauty culture; and

H. R. 12624. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1936, and for prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1936, and June 30, 1937, and for other purposes.

The message also announced that the Speaker has affixed his signature to the following enrolled bills and joint resolutions, and they were signed by the Vice President:

S. 1379. An act to amend section 981 of title IV and section 843 of title VI of the Canal Zone Code;

S. 3839. An act for the relief of Randall Krauss, a minor;

H. R. 10544. An act authorizing the erection of a memorial to those who met their death in the wreck of the dirigible *Shenandoah;*

S. J. Res. 248. Joint resolution to provide for participation by the United States in an inter-American conference to be held at Buenos Aires, Argentina, or at the capital of another American republic, in 1936; and

S. J. Res. 260. Joint resolution to provide an additional appropriation for folding speeches and pamphlets for the Senate for the fiscal year 1936.

CALL OF THE ROLL

Mr. LEWIS. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Coolidge	King	Robinson
Ashurst	Copeland	La Follette	Schwellenbach
Bachman	Couzens	Lewis	Sheppard
Bailey	Davis	Logan	Shipstead
Barkley	Dieterich	Lonergan	Smith
Benson	Donahey	Long	Steiwer
Black	Duffy	McGill	Thomas, Okla.
Bone	Fletcher	McKellar	Thomas, Utah
Borah	Frazier	McNary	Townsend
Brown	George	Maloney	Tydings
Bulkley	Gerry	Metcalf	Vandenberg
Bulow	Glass	Moore	Van Nuys
Burke	Guffey	Murphy	Wagner
Byrd	Hale	Murray	Walsh
Byrnes	Harrison	Norris	Wheeler
Capper	Hastings	Pittman	White
Caraway	Hayden	Pope	
Clark	Johnson	Radcliffe	
Connally	Keyes	Reynolds	

Mr. LEWIS. I announce the absence of the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN], caused by illness. The Senator from New Mexico [Mr. CHAVEZ] is detained by a death in his family. The Senator from New Mexico [Mr. HATCH], the Senator from Indiana [Mr. MINTON], and the Senator from Georgia [Mr. RUSSELL] are absent in attendance upon the funeral of the late Senator Trammell.

I further announce that the Senator from Mississippi [Mr. BILBO], the Senator from Oklahoma [Mr. GORE], the junior Senator from West Virginia [Mr. HOLT], the Senator from California [Mr. MCADOO], the senior Senator from West Virginia [Mr. NEELY], the Senator from Louisiana [Mr. OVERTON], the Senator from Missouri [Mr. TRUMAN], and the junior Senator from Wyoming [Mr. O'MAHONEY] are necessarily detained from the Senate.

Mr. MCNARY. I announce that the Senator from Vermont [Mr. AUSTIN], the Senator from New Jersey [Mr. BARBOUR], the senior Senator from Wyoming [Mr. CAREY], the Senator from Iowa [Mr. DICKINSON], and the Senator from Vermont [Mr. GIBSON] are necessarily absent from the Senate.

The VICE PRESIDENT. Seventy-three Senators have answered to their names. A quorum is present.

THE LATE SENATOR BRONSON CUTTING

Mr. NORRIS. Mr. President, I ask unanimous consent to have printed in the RECORD the account published in the Washington News of the meeting of friends of the late

Senator Cutting, who met at Brookings Institution to pay respect to his memory.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington News of May 7, 1936]

LIBERALS PAY TRIBUTE TO MEMORY OF SENATOR CUTTING—TO PUSH MEASURES IN WHICH LEGISLATOR HAD BEEN INTERESTED—SHORTNESS OF HOUSE TERMS AND "ANTIQUITY" OF ITS RULES ARE HIT AT BROOKINGS MEETING

Distinguished friends of the late Senator Bronson M. Cutting (Republican, New Mexico), killed a year ago in an airliner crash near Kirksville, Mo., gathered at Brookings Institution last night to honor his memory by the reading of tributes and the discussion of progressive legislation in which he was vitally interested.

Forces retarding liberal government were outlined by Senators and Congressmen. Among those prominently mentioned were shortness of House terms, "antiquity" of House rules, lack of research facilities, influence of special interests, and lack of time.

"VITAL IMPETUS"

"His personality was so vivid, the impetus he gave to good things was so vital that he seems to be with us now", William Allen White, Emporia, Kans., editor, said of Cutting in a letter.

Mayor LaGuardia, of New York, sent this message: "Senator Cutting left an enviable record for vision, progressiveness, and courage to see a thing through. Considering the Senator's education, background, associations, and personal interests, his progressive views on economics, politics, and government showed a rare personality and an unusual public spirit."

"Bronson Cutting symbolizes the hope of America's future", said Dr. Edwin M. Borchard, of the Yale Law School, who attended the meeting. "Clear-headed, able, courageous, industrious, generous, courteous, his nature marked him as among the noblemen, and his loss to the Nation is irreparable. Had he lived, he would have been ideally equipped for the Presidency of the United States."

NORRIS' MESSAGE

Senator NORRIS (Republican, Nebraska), absent because of illness, sent this message: "Senator Cutting was one of God's noblemen. His ability, unquestioned and recognized, had caused even the ordinary observer to believe there were before him many useful years before the sun went down on his life, and that an untold amount of good would come from his efforts."

DISTINGUISHED LIST

"Throughout the length and breadth of New Mexico", said Senator HATCH (Democrat, New Mexico), "will be found men and women who have been aided by the sympathetic understanding of and the helping hand of Bronson Cutting. A Senator, a brave man, a loyal friend, a courageous statesman, a worthy son of a worthy father and a brave Spartan mother, is dead."

INTERNAL-REVENUE TAXATION—LETTER TO SECRETARY OF TREASURY

Mr. BYRD. Mr. President, May 8 I addressed a letter to the Secretary of the Treasury asking for certain information with respect to taxes. I ask that this letter, together with the reply of the Secretary of the Treasury and a resolution adopted by the Senate Finance Committee, may be printed in the RECORD at this point.

There being no objection, the letters and resolution were ordered to be printed in the RECORD, as follows:

MAY 8, 1936.

Hon. HENRY MORGENTHAU, Jr.,
Secretary of the Treasury, Washington, D. C.

MY DEAR MR. SECRETARY: It has been stated that many of our financially strong corporations, especially those of substantial size, will pay little or no taxes to the Federal Treasury if the pending bill is passed. I am checking the accuracy of these statements, and I am likewise interested in the opportunities that may be afforded such corporations by the bill to avoid the payment of taxes.

We must guard carefully against giving these large corporations a greater advantage and perhaps a strangle hold over their present smaller competitors. Frankly, I am concerned about the application of the proposed tax policies to those corporations which now have large surpluses and a strong cash or credit position.

We must make certain that legislation does not prevent the healthy growth and expansion of our smaller businesses by imposing a penalty upon them if their financial position and their business opportunities do not permit the payment in dividends of substantially all their profits. I want your assistance in appraising the situation.

I have selected from Moody's Manual a few of the largest corporations, with a view to determining the rate of tax which would be imposed upon them if the pending bill should be enacted. The only statistics I have available are for 1934. I should appreciate it very much if you would check the list I give you and let me have a similar list for 1935, if statistics are available to you.

A FEW OF THE CORPORATIONS WHICH WOULD PAY NO TAX, BASED ON 1934 RETURNS

(Now pay 15 percent)

Company	Net income after tax	Dividends paid out
American Telephone & Telegraph	$121,748,729	$167,960,475
American Tobacco Co	24,084,280	26,590,858
American Smelting & Refining	7,583,202	7,875,000
General Electric Co	19,726,044	19,881,453
Goodyear Tire & Rubber Co	4,287,684	4,508,907
International Harvester	3,948,637	8,264,040
National Biscuit Co	11,507,573	19,939,342
National Dairy Products Co	6,551,930	8,197,573
Ohio Oil Co	5,411,924	6,294,728
R. J. Reynolds Tobacco Co	21,536,894	30,000,000
Texas Co	5,545,205	9,348,820

The above list of financially strong companies that can completely avoid taxation can be greatly expanded.

CORPORATIONS WHICH WOULD PAY LESS THAN 5 PERCENT

Company	Net income after tax	Dividends paid out	Tax under new bill
			Percent
Air Reduction	$4,145,416	$3,737,142	2.82
Allied Chemical & Dye Corporation	17,548,355	15,703,374	3.00
Corn Products Refining Co	9,702,696	9,294,750	1.20
Curtis Publishing Co	5,906,328	5,400,000	2.45
E. I. du Pont	46,701,465	40,788,914	3.50
Firestone Tire & Rubber	4,154,656	3,572,193	4.00
General Foods	11,143,876	9,452,514	4.40
Great Western Sugar	5,761,727	5,370,000	1.55
Imperial Oil Co	14,101,561	13,415,169	1.40
Liggett & Myers Tobacco Co	20,086,691	17,200,227	4.16
Parke, Davis & Co	8,719,368	8,232,480	1.50
Pennsylvania Railroad Co	13,377,839	13,214,946	.30
United States Smelting & Refining	6,052,968	6,000,129	.25

CORPORATIONS WHICH WOULD PAY LESS THAN 10 PERCENT

American Can Co	$19,522,945	$15,256,321	6.63
Armour & Co. (Delaware)	8,235,835	5,899,830	8.84
Eastman Kodak Co	14,503,247	10,490,086	8.54
General Motors	94,769,131	73,621,710	6.78
Great Atlantic & Pacific Tea Co	20,478,190	16,480,706	5.72
International Shoe Co	8,967,024	6,671,742	7.78
J. C. Penny Co	16,147,315	11,307,103	9.37
Phillips Petroleum Co	5,757,309	4,153,008	8.30
Procter & Gamble	14,370,067	10,512,866	8.30

F. W. Woolworth Co	32,142,363	23,288,676	8.54

I also ask that you furnish me with the names of all corporations which, for the last year for which the statistics are available, had a net income before Federal taxes of more than $1,000,000, and, based upon the actual distributions of the year, will receive a tax reduction of 50 percent or more under the pending bill.

You will appreciate that the fundamental purpose of my inquiry involves not only competitive advantages to the strong corporations but the restraints of heavy taxes upon small- and medium-sized enterprises upon which we must depend so largely for reemployment of labor and for healthy business growth.

It is unnecessary for me to add that the data must be available promptly if it is to serve a useful purpose. I shall appreciate very much your assistance and cooperation.

Cordially yours,

HARRY F. BYRD.

THE SECRETARY OF THE TREASURY,
Washington, May 11, 1936.

Hon. HARRY FLOOD BYRD,
United States Senate.

MY DEAR SENATOR: This will acknowledge receipt of your letter dated May 8, which was postmarked as of 5 p. m. on May 9, and received in my office at 9:14 a. m. today.

In your letter you furnish a list of corporations with the amount of their net income and the amount of their dividends paid out in 1934, as reported in Moody's Manual, and you ask that I check this list and let you have a similar list for 1935 if such statistics are available. You request also the names of all corporations which, for the last year for which statistics are available, have a net income before Federal taxes of more than a million dollars, and, based upon the actual distribution for the year, will receive a tax reduction of 50 percent or more under the pending bill.

If the information you desire is that to be derived from income-tax returns, I must respectfully call your attention to the provisions of the revenue law limiting the conditions under which the Treasury Department may furnish such information. Section 257 (b) of the Revenue Act of 1926 reads as follows:

"The Secretary and any officer or employee of the Treasury Department, upon request from the Committee on Ways and Means of the House of Representatives, the Committee on Finance of the Senate, or a select committee of the Senate or House specially authorized to investigate returns by a joint resolution of the Senate or House, or a joint committee so authorized by concurrent resolution, shall furnish such committee sitting in executive session with any data of any character contained in or shown by any return."

I shall be quite willing, on request of the Finance Committee and under the authorization of this section, to furnish any and all information that the committee may desire which is available. Anticipating such a request, I have directed that data bearing on your inquiries be assembled without delay.

Sincerely yours,

HENRY MORGENTHAU, Jr.,
Secretary of the Treasury.

RESOLUTION ADOPTED BY SENATE FINANCE COMMITTEE

The Secretary of the Treasury is hereby requested to furnish a list of all corporations for the tax year of 1935 that had a net income before Federal taxes of more than $1,000,000, and based on the actual distributions for that year will receive a tax reduction under the pending bill; and

(A) The amount of such reduction for each corporation; and

(B) The rate of taxation, if any, that would be paid by such corporation in the event the pending bill was then in effect.

ACCEPTANCE OF MEDALS, ETC., BY MEMBERS OF NAVY, MARINE CORPS, AND ARMY

The VICE PRESIDENT laid before the Senate the amendment of the House of Representatives to the bill (S. 1975) to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered, which was, on page 10, after line 26, to insert:

United States Navy: Admiral William B. Caperton, retired; Rear Admiral Charles S. Freeman; Capt. William D. Puleston; Capt. Walter S. Anderson; Capt. Stephen B. McKinney; Capt. William O. Spears; Capt. Augustin T. Beauregard; Commander Leo H. Thebaud; Commander Clarence Gulbranson; Capt. Charles St. J. Butler, Medical Corps; Capt. William S. Bainbridge, Medical Corps, Naval Reserve, retired; Commander Morton D. Willcutts, Medical Corps; Commander William Henry P. Blandy; Commander Edwin C. Ebert, Medical Corps; Lt. Comdr. Roscoe H. Hillenkoetter; Lt. Comdr. Joel J. White, Medical Corps; Lt. Albert L. King, Naval Reserve; Lt. (Jr. Gr.) Walter C. Ford; Capt. Herbert S. Howard, Construction Corps; Lt. Comdr. Leslie C. Stevens; Lt. Comdr. William K. Vanderbilt, United States Naval Reserve.

United States Marine Corps: Col. Robert L. Denig; Col. Henry L. Roosevelt, Marine Corps Reserve, deceased; Col. William C. Harllee, retired; Col. Julius S. Turrill, retired; Lt. Col. Harry L. Smith; Lt. Col. William M. Small, retired; Maj. Andrew E. Creesy; Maj. Donald J. Kendall; Maj. Chester L. Fordney, Marine Corps Reserve; Capt. Louis Cukela; First Sgt. George Nelson.

Mr. WALSH. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

SUPPLEMENTAL ESTIMATE FOR LEGISLATIVE ESTABLISHMENT (S. DOC. NO. 209)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation pertaining to the legislative establishment, United States Senate, fiscal year 1936 (for folding documents), in the sum of $2,000, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE FOR THE NAVY DEPARTMENT (S. DOC. NO. 210)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the Navy Department, fiscal year 1936, to remain available until June 30, 1937 (acceptance of bequest of Henry H. Rogers), in the sum of $5,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

MARCH REPORT OF THE R. F. C.

The VICE PRESIDENT laid before the Senate a letter from the Chairman of the Reconstruction Finance Corporation, submitting, pursuant to law, a report of the activities and expenditures of the Corporation for March 1936, including statements of loans, etc., authorized during that month and showing the names, amounts, and rate of interest or dividend in each case, which, with the accompanying papers, was referred to the Committee on Banking and Currency.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate the following concurrent resolution of the Legislature of the State of New York, which was referred to the Committee on Interstate Commerce:

Whereas the Federal Radio Commission, which supervises the operation of and the granting of license to radio stations; and

Whereas such Federal Radio Commission within recent time has indicated an intention to cancel the license of certain local commercial radio stations in the Borough of Brooklyn, city of New York, and the right of such stations to disseminate national music programs and lectures over the air; and

Whereas one of such radio stations, namely, station WLTH, of Brooklyn, New York City, has been engaged for the past several years in the broadcast of musical programs of much interest to such racial groups as the Irish, the Poles, the Hebrews, the Germans, the Italians, and other racial entities, thus bringing much happiness to a multitude of listeners: Therefore be it

Resolved (*the senate concurring*), That the Assembly of the State of New York hereby entreats the Federal Radio Commission to desist from any intended action that would mean the cancelation of the radio license of station WLTH, and by so doing permit the peoples of the various racial groups named heretofore to enjoy their native melodies and songs, and so to obtain that happiness which constitutes an integral part of their American home life; and be it further

Resolved, That a copy of these resolutions be forwarded to the President of the United States, the Congress of the United States, and to the Federal Radio Commission.

The VICE PRESIDENT also laid before the Senate the following joint resolution of the Legislature of the State of Maryland, which was referred to the Committee on Finance:

Joint resolution relative to unemployment insurance

Whereas the General Assembly of Maryland is heartily in favor of social-security legislation in general and unemployment insurance in particular; and

Whereas this assembly believes that stability in our social structure is attainable only by giving the wage-earning employees greater economic security than they now enjoy; and

Whereas the Federal social-security law levies a 3-percent pay-roll tax when the unemployment-insurance plan is in full operation; and

Whereas it is the sense of this general assembly that a 3-percent pay-roll tax will be an incentive to employers to cut wages and to raise prices; and

Whereas such a taxing provision is unfair to employees and to consumers: Therefore, be it

Resolved by the General Assembly of Maryland, That the Congress of the United States, and it is hereby, requested to amend the Federal social-security law in such manner that the unemployment-insurance plan will be financed by a 1-percent tax on wages, a 1-percent tax on employers' pay rolls, and an appropriation by the Federal Government from its general revenues to equal the contributions made by employers, and that the Federal Government shall also pay all cost for the administration of said plan; and be it further

Resolved, That these amendments be made at the present session of Congress so that the legislators of the several States may be enabled to pass legislation in conformity with the Federal law thus amended; and be it further

Resolved, That the Senators and Representatives from Maryland in the Congress of the United States be, and they are hereby, urgently requested to make every effort possible to have Congress amend the Federal social-security law as hereinabove suggested; and be it further

Resolved, That the secretary of state of Maryland be, and he is hereby, requested to send a copy of these resolutions to the President of the United States, to the President of the United States Senate, to the Speaker of the House of Representatives, and to each of the Senators and Representatives from Maryland in the Congress of the United States.

The VICE PRESIDENT also laid before the Senate a letter from the president of the American Liberty League,

transmitting memorials signed by about 55,000 citizens of the United States, remonstrating against the seizure of telegrams of individuals and organizations by agencies of the Government, which, with the accompanying memorials, was referred to the Special Committee on Investigation of Lobbying Activities.

Mr. LOGAN presented the following concurrent resolution of the Legislature of the State of Kentucky, which was referred to the Committee on Finance:

Whereas Kentucky is facing difficulty in providing sufficient revenue for her schools, her unfortunate wards, and other proper and necessary expenses; and

Whereas the revenue collected by the Federal Government from two of Kentucky's products, whisky and tobacco, alone, would, in any one year provide sufficient revenue for all Kentucky's expenses and pay her entire outstanding indebtedness twice over; and

Whereas no other State has her proper revenue sources so completely exhausted by the Federal Government; and

Whereas Kentucky's contributions in internal revenue to the Federal Government are much greater than any other State in the Union in proportion to her population, and the amount of return Federal contributions; and

Whereas the Federal Government now gives credit on her estate tax to 80 percent of the amount paid to the State by such taxpayers, which greatly favors States of great wealth and large estates; and

Whereas this entire Federal relationship as now provided is unjust, prejudicial, and discriminatory to Kentucky: Now, therefore, be it

Resolved, That Kentucky through this legislature call upon her Senators and Representatives of the Federal Congress to seek through legislation, or administration, or in such way as they think most wise and effective to remove this unfair and prejudicial preemption of Kentucky's revenue from her main products and secure for her either credits as in the Federal State tax or proportionate returns to the State, or in such way as they deem best; be it further

Resolved, That they meet together and discuss ways and means to bring about a more equitable arrangement between the two governments and advise the legislature what steps it should take to open negotiations with the Federal Government to secure this relief.

Resolved, That a copy of this resolution be furnished to each Member of the United States Senate and the United States House of Representatives from Kentucky.

Mr. WALSH presented the petition of Hugh Von Rehberg, of Jamaica Plain, Mass., and sundry other citizens of the State of Massachusetts, praying for the continuance of Works Progress Administration projects, which was referred to the Committee on Appropriations.

He also presented a resolution adopted by the Board of Aldermen of the city of Somerville, Mass., favoring an increase in the allotments and projects under the Works Progress Administration in the city of Somerville, Mass., which was referred to the Committee on Appropriations.

He also presented a petition of sundry citizens, being employees of the Post Office and Treasury Departments at Worcester, Mass., praying for the enactment of the so-called Boylan bill, providing reclassification of Post Office and Treasury Department custodial employees, which was referred to the Committee on Civil Service.

He also presented a resolution adopted by a special town meeting at Hadley, Mass., favoring the construction of flood-control dams and works by the Federal Government, which was referred to the Committee on Commerce.

He also presented the petition of Local Union No. 1255, United Textile Workers of America, of North Adams, Mass., praying for the enactment of the so-called Ellenbogen bill, for the stabilization of conditions in the textile industry, which was referred to the Committee on Education and Labor.

He also presented a resolution adopted by a conference of the New England Region of the National Student Federation of America, favoring the enactment of the so-called American-youth bill, which was referred to the Committee on Education and Labor.

He also presented the petition of the Ladies Auxiliary to the Brotherhood of Railroad Trainmen, of Greenfield, Mass., praying for the enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which was referred to the Committee on Interstate Commerce.

He also presented the petition of David W. Wright Lodge, No. 549, Brotherhood of Locomotive Firemen and Enginemen, of Greenfield, Mass., praying for the enactment of the bill (H. R. 10663) to amend section 12 of the act of Congress of August 29, 1935, entitled "An act to establish a retirement system for employees of carriers subject to the Interstate Commerce Act, and for other purposes", which was referred to the Committee on Interstate Commerce.

He also presented the petition of the Massachusetts Women's Constitutional League, praying for the enactment of the bill (S. 2253) to make better provision for the government of the military and naval forces of the United States by the suppression of attempts to incite the members thereof to disobedience, which was ordered to lie on the table.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were severally read twice by their titles and referred as indicated below:

H. R. 11688. An act providing for a change in the design of the 50-cent pieces authorized to be coined in commemoration of the one hundredth anniversary of the admission of the State of Arkansas into the Union; to the Committee on Banking and Currency.

H. R. 12424. An act to provide for examination and registration of those engaging in the occupation of beauty culture; to the Committee on the District of Columbia.

H. R. 12624. An act making appropriations to supply deficiencies in certain appropriations for the fiscal year ending June 30, 1936, and for prior fiscal years, to provide supplemental appropriations for the fiscal years ending June 30, 1936, and June 30, 1937, and for other purposes; to the Committee on Appropriations.

H. J. Res. 497. Joint resolution to permit articles imported from foreign countries for the purpose of exhibition at the International Petroleum Exposition, Tulsa, Okla., to be admitted without payment of tariff, and for other purposes; and

H. J. Res. 547. Joint resolution providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition, to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes; to the Committee on Finance.

REPORTS OF COMMITTEES

Mr. WHEELER, from the Committee on Indian Affairs, to which was referred the joint resolution (S. J. Res. 243) authorizing distribution to the Indians of the Blackfeet Indian Reservation, Mont., of the judgment rendered by the Court of Claims in their favor, reported it with an amendment and submitted a report (No. 2015) thereon.

Mr. SCHWELLENBACH, from the Committee on Agriculture and Forestry, to which was referred the bill (H. R. 8495) to amend certain plant-quarantine laws, reported it without amendment and submitted a report (No. 2016) thereon.

Mr. SMITH, from the Committee on Agriculture and Forestry, to which was referred the joint resolution (S. J. Res. 235) authorizing the Secretary of Agriculture to expend funds of the Agricultural Adjustment Administration for participation by the United States in the 1936 Sixth World's Poultry Congress, reported it with amendments and submitted a report (No. 2017) thereon.

Mr. ASHURST, from the Committee on the Judiciary, to which was referred the joint resolution (H. J. Res. 525) to enable the United States Constitution Sesquicentennial Commission to carry out and give effect to certain approved plans, and for other purposes, reported it with amendments and submitted a report (No. 2018) thereon.

He also, from the same committee, to which was referred the bill (H. R. 12162) to create an additional division of the United States District Court for the Southern District of Mississippi, to be known as the Hattiesburg division, reported it without amendment and submitted a report (No. 2024) thereon.

Mr. CONNALLY, from the Committee on the Judiciary, to which was referred the bill (S. 4519) to dispense with unnecessary renewals of oaths of office by civilian employees of the executive departments and independent establishments, and for other purposes, reported it without amendment and submitted a report (No. 2019) thereon.

He also, from the same committee, to which was referred the bill (S. 4594) to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others, reported it with an amendment and submitted a report (No. 2020) thereon.

Mr. BURKE, from the Committee on the Judiciary, to which was referred the bill (S. 4341) to give precedence to certain proceedings to which the United States is a party, and for other purposes, reported it without amendment and submitted a report (No. 2021) thereon.

Mr. WALSH, from the Committee on Finance, to which was referred the bill (H. R. 10934) to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior, reported it without amendment and submitted a report (No. 2022) thereon.

Mr. PITTMAN, from the Committee on Foreign Relations, to which was referred the bill (H. R. 12183) for the relief of Gladys Hinckley Werlich, reported it without amendment.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills and joint resolutions:

On May 8, 1936:

S. 158. An act authorizing the President to present a medal in the name of Congress to Johannes F. Jensen;

S. 427. An act authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora grant, New Mexico;

S. 1494. An act to amend an act entitled "An act authorizing the Chippewa Indians of Minnesota to submit claims to the Court of Claims", approved May 14, 1926 (44 Stat. L. 555);

S. 2040. An act to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes", approved September 7, 1916, and acts in amendment thereof;

S. 2517. An act to provide for the advancement on the retired list of the Navy of Walter M. Graesser, a lieutenant (junior grade), United States Navy, retired;

S. 2611. An act to authorize the Utah Pioneer Trails and Landmarks Association to construct and maintain a monument on the Fort Douglas Military Reservation, Salt Lake City, Utah;

S. 2849. An act to provide funds for cooperation with Wellpinit School District No. 49, Stevens County, Wash., for the construction of a public-school building to be available for Indian children of the Spokane Reservation;

S. 3241. An act authorizing adjustment of the claims of F. L. Forbes, John L. Abbot, and the Ralph Sollitt & Sons Construction Co.;

S. 3372. An act to provide funds for cooperation with the public-school district at Hays, Mont., for construction and improvement of public-school buildings to be available for Indian children;

S. 3460. An act to authorize the Secretary of the Interior to ascertain the persons entitled to compensation on account of private claim 111, parcel 1, Nambe Pueblo grant;

S. 3516. An act for the relief of Alice D. Hollis;

S. 3544. An act authorizing adjustment of the claim of the Texas Pacific-Missouri Pacific Terminal Railroad of New Orleans;

S. 3581. An act for the relief of Henry Thornton Meriwether;

S. 3687. An act to validate payments and to relieve the accounts of disbursing officers of the Army on account of payments made to Reserve officers on active duty for rental allowances;

S. 3688. An act to validate payments and to relieve disbursing officers' accounts of payments made to Reserve officers promoted while on active duty;

S. 3737. An act to authorize the Secretary of War to acquire by donation land at or near Newburgh, in Orange County, N. Y., for aviation field, military, or other public purposes;

S. 3747. An act for the relief of Maizee Hamley;

S. 3748. An act to authorize the Bureau of Mines to conduct certain studies, investigations, and experiments with respect to sub-bituminous and lignite coal, and for other purposes;

S. 3769. An act for the relief of Marcellus E. Wright and Lee, Smith & Vandervoort, Inc.;

S. 3797. An act to amend an act entitled "An act authorizing certain tribes of Indians to submit claims to the Court of Claims, and for other purposes", approved May 26, 1920;

S. 3859. An act to authorize the procurement, without advertising, of certain War Department property, and for other purposes;

S. 3932. An act for the relief of Ann Rakestraw;

S. 3950. An act to aid in defraying the expenses of the Sixteenth Triennial Convention of the World's Woman's Christian Temperance Union to be held in this country in June 1937;

S. 3977. An act to authorize the Washington Gas Light Co. to alter its corporate structure, and for other purposes;

S. 4135. An act for the relief of Helen Curtis;

S. 4214. An act to provide for a preliminary examination of the Sabine and Neches Rivers with a view to controlling their floods and regulating, conserving, and utilizing the waters thereof, and for other purposes;

S. 4416. An act for the relief of Josephine Russell; and

S. J. Res. 231. Joint resolution to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the landing of the Swedes in Delaware.

On May 11, 1936:

S. 381. An act for the relief of the Confederated Bands of Ute Indians located in Utah, Colorado, and New Mexico;

S. 1075. An act for the relief of Louis H. Cordis;

S. 3645. An act for the relief of Dampskib Aktieselshap Roskva;

S. 3685. An act for the relief of George Rabcinski;

S. 4395. An act for the relief of the State of New Jersey; and

S. 4447. An act for the relief of J. L. Summers.

On May 12, 1936:

S. 1379. An act to amend section 981 of title IV, and section 843 of title VI of the Canal Zone Code:

S. 3839. An act for the relief of Randall Krauss, a minor;

S. J. Res. 248. Joint resolution to provide for participation by the United States in an inter-American conference to be held at Buenos Aires, Argentina, or at the capital of another American republic, in 1936; and

S. J. Res. 260. Joint resolution to provide an additional appropriation for folding speeches and pamphlets for the Senate for the fiscal year 1936.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BORAH:

A bill (S. 4614) for the relief of Ida A. Gunderson and her three minor daughters; to the Committee on Claims.

By Mr. CAPPER:

A bill (S. 4615) granting a pension to James W. Dobbins (with accompanying papers); to the Committee on Pensions.

By Mr. THOMAS of Oklahoma (by request):

A bill (S. 4616) for the relief of G. A. Trotter; to the Committee on Indian Affairs.

By Mr. JOHNSON:

A bill (S. 4617) to amend section 80 of chapter 9 of an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898; to the Commtitee on the Judiciary.

By Mr. SHEPPARD (for Mr. OVERTON):

A bill (S. 4618) granting the consent of Congress to the Louisiana Highway Commission to construct, maintain, and operate a free or toll highway bridge, or a railway bridge in combination with a free or toll highway bridge, and approaches thereto across the Mississippi River at or near Baton Rouge, La.; to the Committee on Commerce.

(Mr. COPELAND introduced Senate bill 4619, which was referred to the Committee on Commerce, and appears under a separate heading.)

By Mr. WALSH:

A bill (S. 4620) to expedite the dispatch of vessels from certain ports of call; to the Committee on Commerce.

By Mr. FLETCHER:

A bill (S. 4621) for the relief of the estate of Elizabeth R. Jay, deceased; to the Committee on Claims.

By Mr. BLACK:

A bill (S. 4622) to amend section 2 of the act entitled "An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama", approved May 26, 1928; to the Committee on Commerce.

By Mr. TYDINGS:

A bill (S. 4623) to amend an act entitled "An act to provide for vocational rehabilitation of disabled residents of the District of Columbia, and for other purposes" (Public, No. 801, 70th Cong.); to the Committee on the District of Columbia.

By Mr. VAN NUYS:

A bill (S. 4624) authorizing the sale of approximately 5,000 acres of land in the Gogebic purchase unit to the University of Notre Dame; to the Committee on Public Lands and Surveys.

By Mr. JOHNSON:

A joint resolution (S. J. Res. 264) to amend the joint resolution entitled "Joint resolution authorizing the Federal Trade Commission to make an investigation with respect to agricultural income and the financial and economic condition of agricultural producers generally", approved August 27, 1935; to the Committee on Agriculture and Forestry.

USE OF RADIO IN PROMOTING SAFETY AT SEA

Mr. COPELAND. Mr. President, I am introducing a bill to amend the Communications Act about the use of radio at sea. I am calling public attention to it because, as a result of hearings which were conducted by the Senator from Maine [Mr. WHITE] on behalf of the Committee on Commerce, it will be necessary to amend the bill very radically. So I am having the bill reprinted with a new number in order that those who are interested may have it for further study.

The VICE PRESIDENT. The bill will be received and appropriately referred.

The bill (S. 4619) to amend the Communications Act of 1934, approved June 19, 1934, for the purpose of promoting safety of life and property through the use of wire and radio communications, and for other purposes, was read twice by its title and referred to the Committee on Commerce.

AMENDMENTS TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. HAYDEN. Mr. President, I offer an amendment to House bill 12624, being the first deficiency appropriation bill, and I ask to have it read from the desk by the clerk and appropriately referred.

The VICE PRESIDENT. The amendment will be referred to the Committee on Appropriations; and without objection, the clerk will read, as requested.

The legislative clerk read as follows:

Amendment intended to be proposed by Mr. HAYDEN to the bill H. R. 12624, the first deficiency appropriation bill, viz: At the end of the bill to insert the following:

"TITLE III

"That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $700,000,000, which shall be available for expenditure by the Federal Emergency Administration of Public Works upon such terms and subject to such rules and regulations, not inconsistent with the laws of the States in which such projects are to be constructed, as the Federal Emergency Administrator of Public Works may prescribe, for the purpose of making loans or grants, or loans and grants, to States, municipalities, and other public bodies to aid in financing the construction, repair, or improvement of the non-Federal public-works projects listed in Senate Document No. 193, Seventy-fourth Congress, but no such grant shall be in excess of 45 percent of the cost of any such project as determined by said Administrator.

"SEC. 202. All loans and grants made pursuant to this title shall contain such provisions as are necessary to insure (1) that the rate of wages paid on projects financed in whole or in part under this title shall be not less than the prevailing rate of wages for work of similar nature as determined by said Administrator, and (2) that in the employment of labor on such projects financed in whole or part under this title, preference shall be given to unemployed citizens of the United States listed by the United States Employment Service, or any agency designated by it, and residing in the community which is financing such project, regardless of whether such unemployed persons are, or are not, on relief.

"SEC. 203. The Federal Emergency Administration of Public Works is authorized to sell any securities acquired by it under title II of the National Industrial Recovery Act, as amended and supplemented, or under this title, and all moneys realized from such sales shall be available to the Federal Emergency Administrator of Public Works, in addition to the funds appropriated by this title, for the making of loans under this title."

Mr. HAYDEN. Mr. President, explanatory of the amendment, I have prepared a brief statement, which I ask to have read at the clerk's desk.

The VICE PRESIDENT. Without objection, the clerk will read, as requested.

The legislative clerk read the statement, as follows:

JUSTIFICATION FOR AN AMENDMENT TO H. R. 12624, THE FIRST DEFICIENCY APPROPRIATION BILL, TO PROVIDE $700,000,000 FOR NONFEDERAL LOAN AND GRANT PROJECTS

Senate Document 193 lists 6,204 applications from States, municipalities, and other public bodies for grants of $890,044,726 and loans of $1,044,709,289 at a total cost of $2,347,690,363. Of the 6,204 applications 2,976 projects had been examined and approved up to March 31, 1936, by the Engineering, Finance, and Legal Divisions of the Public Works Administration for grants of $313,177,716 and loans of $156,431,751, the total cost of which will be $710,105,475.

Among the remaining 3,228 applications that are pending there are a large number of excellent projects, and from day to day more of them are being approved. It is for this reason that the Public Works Administration should be given authority, as provided in the amendment, to allocate money to any worthy project on the entire list contained in Senate Document 193.

The amendment makes $700,000,000 available for loans or grants, or both, and provides the only money that can be used for such grants. Section 203 of the amendment, which authorizes the sale of municipal and other bonds now or hereafter held by the Public Works Administration, continues in operation a revolving fund which can only be used for loans. This revolving fund plus the $700,000,000 plus funds derived from the direct sale to the public of their bonds by States, municipalities, or other public bodies will make it possible to do new construction within the next 15 months amounting to over $1,500,000,000.

That sum amounts to more than one-half of the total cost of all the loan and grant applications now pending before the Public Works Administration. The appropriation of $700,000,000, as provided in the amendment, will therefore make possible the construction of over one-half of the 6,204 projects listed in Senate Document 193.

Approval of non-Federal loan and grant projects under the now well-established procedure of the Public Works Administration requires:

1. Initiative by local communities in selecting projects.
2. Rigid examination by the Public Works Administration as to engineering feasibility, economic and financial soundness, and legality.
3. Contribution of at least 55 percent of the cost through bond issues authorized either by vote of the people to be benefited or by their elected representatives.
4. Construction to be done under local supervision, and, almost invariably, by contract with the lowest responsible bidder.
5. Payment of the scale of wages prevailing in the locality instead of the "security wage."

The amendment will continue in effect all of these five highly desirable features of Public Works Administration procedure and, in addition, will give preference to unemployed American citizens regardless of whether or not they are on relief. This will remove a discrimination which now exists against many thousands who are registered with the United States Employment Service or its branches but who are barred from obtaining jobs under the Works Progress Administration because they are not on the relief rolls.

The amendment is offered to the first deficiency bill which appropriates $1,425,000,000 so that the Works Progress Administration may provide employment for those who are on relief. That sum is not to be raised by imposing any new taxes but will be

borrowed and become an addition to the national debt. The $700,000,000 to be made available to the Public Works Administration can with equal certainty be obtained in the same way, and, because of local bond issues and other contributions, will also result in an equal total expenditure.

The difference between the two programs is that the Works Progress Administration will do $1,425,000,000 worth of work, all of which must ultimately be paid for by Federal taxation. With $700,000,000 the Public Works Administration can bring about over $1,500,000,000 of new construction, but the final cost to Federal taxpayers will be less than half of $1,500,000,000.

The Emergency Relief Act of 1935 authorized loans or grants, or both, to States and other public bodies to the extent of $900,000,000 out of the appropriation of $4,880,000,000. Based upon the reasonable assumption that some such sum would be made available over 11,000 non-Federal loan and grant applications have been filed with the Public Works Administration during the past 12 months. Instead of $900,000,000, or a comparable sum, only $328,000,000 has been made available, but even with that sum allotments have been made to over 4,000 of such projects. For the remaining 6,204 applications listed in Senate Document 193 no Federal funds are available and none will be unless this amendment is adopted.

States and local communities have in good faith employed engineers, architects, attorneys, and others to prepare these applications for submission and in many cases have voted the required bonds. The Public Works Administration has devoted much time and expense to a critical analysis of the various projects listed in Senate Document 193 and has given final approval to about 3,000 of them with other good projects still in process of investigation. The work can proceed forthwith if Congress makes the appropriation in the manner specified in the amendment. Its enactment is imperative if the Federal Government is to obtain major local contributions in carrying out a sound public-works program.

The amendment supplements and in no respect changes the sum appropriated for the Works Progress Administration by title I of the bill. It merely provides another way of arriving at the same result; another alternative to be used when desirable. The amendment will undoubtedly reduce actual expenditures by the Works Progress Administration, because, to whatever extent Public Works funds relieve unemployment either by providing work on the job or by indirect labor in transportation or the heavy industries, the number to be cared for by the Works Progress Administration is lessened. The taxpayer is not so greatly concerned about how much Congress may appropriate as he is about the sums actually expended.

To increase the $1,425,000,000 by $700,000,000 will make available a total of $2,125,000,000 to provide work for the unemployed but it does not follow that the entire sum will be used. All of the $3,300,000,000 appropriated by title II of the National Industrial Recovery Act of 1933 has not, and probably will not, be spent. The same is true of the $4,880,000,000 appropriated by the Emergency Relief Act of 1935. In the years to come when the money borrowed to pay for work relief must be repaid the taxpayer will be concerned as to whether or not it was used to make a sound capital investment. There should be a choice of implements to meet the needs of the unemployment situation.

Mr. HAYDEN also submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper place in the bill to insert the following:

"Cooperative vocational rehabilitation of disabled residents of the District of Columbia: For personal services, printing and binding, travel and subsistence, and payment of expenses of training, placement, and other phases of rehabilitating disabled residents of the District of Columbia under the provisions of the act entitled 'An act to provide for the vocational rehabilitation of disabled residents of the District of Columbia', approved February 23, 1929 (45 Stat. 1260), $10,000."

Mr. DAVIS submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, and to be printed in the RECORD, as follows:

On page 19, lines 6, 7, and 8, to strike out the following: "And line 24, on page 25, and in lieu thereof to insert the following:

"To aid the several States, Territories, and possessions of the United States, and the District of Columbia, in providing relief and work relief, $1,425,000,000, of which not more than $——, to remain available until June 30, 1938, shall be allocated by the President for completion of projects undertaken by the Works Progress Administration under the Emergency Relief Appropriation Act of 1935 and for administrative expenses of the Works Progress Administration and of any other department, establishment, or agency of the United States for additional work incident to carrying out the purposes of the foregoing appropriation. The balance of the foregoing appropriation shall be allocated by the President to the several States, Territories, possessions, and the District of Columbia in the proportion which the population of each bears to the total population of the States, Territories, possessions, and the District of Columbia, and shall remain available until June 30, 1937.

"Any State, Territory, possession, or the District of Columbia, or any municipality or political subdivision of any of them, may submit relief and work-relief projects to the President for his approval; and the President may approve any such project and shall provide for payment to such State, Territory, possession, or District of Columbia, from funds allocated to it under the preceding paragraph, such sums as may be necessary to carry out the projects so approved. Subject to the approval of an advisory board hereinafter provided for, the funds paid to each State from the foregoing appropriation shall be expended under the supervision of a State agency designated by State law or appointed by the Governor for that purpose, and shall be expended in such manner and under such regulations as the State agency may prescribe and by such local agencies within the State as the State agency may designate, the funds paid to each Territory or possession shall be expended under the direction of the Governor thereof in such manner and under such regulations as he may prescribe, and the funds paid to the District of Columbia shall be expended under the direction of the Commissioners of said District in such manner and under such regulations as they may prescribe. Each State agency, each local agency designated for the expenditure of funds from the foregoing appropriation, the Governor of each Territory and possession, and the Commissioners of the District of Columbia shall appoint an advisory board of not less than five persons who shall serve without compensation and shall represent all political parties as nearly equally as may be.

"The President is authorized—

"(1) To withhold payment of funds allocated from the foregoing appropriation to any State, Territory, possession, or the District of Columbia which he finds is expending such funds for any purpose other than an approved project or is expending such funds in a manner not approved by the proper advisory boards.

"(2) To require of each State, Territory, possession, and the District of Columbia such reports as are reasonably necessary to show that such funds are being expended on projects approved by the President and subject to the approval of the proper advisory boards.

"(3) To prescribe such rules and regulations as may be necessary to carry out his powers and duties with respect to the foregoing appropriation, and to delegate any of such powers and duties to the Works Progress Administrator.

"(4) To submit to Congress a report concerning the expenditure of the foregoing appropriation not later than the 10th day of January in each of the next 2 calendar years, which report shall include a statement of expenditures made, obligations incurred, and payments made to States, Territories, possessions, and the District of Columbia by classes and amounts."

Mr. ROBINSON submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper place in the bill to insert the following:

"ASTROPHYSICAL OBSERVATORY, SMITHSONIAN INSTITUTION

"Astrophysical Observatory: For the establishment and maintenance of solar observing stations, under the direction of the Smithsonian Institution, including assistance, subsistence, purchase of books, periodicals, and apparatus, making necessary observation in high altitudes, construction, rental, repairs, and alteration of buildings, preparation of manuscripts, drawings, and illustrations, traveling expenses, and other necessary expenses, to remain available until June 30, 1937, $200,000."

Mr. McKELLAR submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 19, line 6, after the word "Bend", to insert the following: "a dam at or near Gilbertsville, Ky., and a dam at or near Watts Bar, Tenn."

On page 19, lines 6, 7, and 8, to strike out the following: "And the continuation of preliminary investigations as to the appropriate location and type of a dam on the lower Tennessee River."

On page 19, line 18, to strike out "$39,900,000" and insert in lieu thereof "$41,100,000."

Mr. DIETERICH submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper place in the bill to insert the following:

"Payment to Illinois Central Railroad: For payment to the Illinois Central Railroad of claim no. 1995, awarded December 6, 1926, by the Commission under a convention between the United States and Mexico, concluded September 8, 1923, as extended,

$2,793,905.36: *Provided*, That the 5-percent deduction in reimbursement of the Government of the United States of expenses incurred by it in respect of such claim, provided for in the Department of State Appropriation Act, 1937, shall not be made."

Mr. SCHWELLENBACH submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 22, between the third and fourth paragraphs, under the caption "Works Progress Administration", to insert the following new paragraph:

"No person shall be declared ineligible for employment under this act or the Emergency Relief Appropriation Act of 1935, as amended, by reason of having received the benefits of the World War Adjusted Compensation Act, as amended and supplemented."

Mr. WHEELER submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper place in the bill to insert the following:

"Bureau of Fisheries: For the acquisition by the Bureau of Fisheries of a site for a fish hatchery at Jessups Mill, near Glacier National Park in the State of Montana, $10,000, which shall be immediately available."

AMENDMENTS TO RIVER AND HARBOR FLOOD-CONTROL BILL

Mr. BYRNES and Mr. McKELLAR each submitted an amendment intended to be proposed by them, respectively, to the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, which were ordered to lie on the table and to be printed.

INTERNAL REVENUE TAXATION—AMENDMENTS

Mr. BAILEY submitted an amendment and Mr. SCHWELLENBACH submitted amendments intended to be proposed by them, respectively, to the bill (H. R. 12395) to provide revenue, equalize taxation, and for other purposes, which were referred to the Committee on Finance and ordered to be printed.

TAXATION OF INTOXICATING LIQUOR—AMENDMENTS

Mr. BONE submitted amendments intended to be proposed by him to the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

BIRDIE BRUGH—WITHDRAWAL OF PAPERS

On motion by Mr. NORRIS, it was

Ordered, That the papers filed with the bill (S. 2270) granting a pension to Birdie Brugh, be withdrawn from the files of the Senate, no adverse report having been made thereon.

HOURS, WAGES, AND WORKING CONDITIONS IN AIR TRANSPORTATION (S. DOC. NO. 208)

Mr. COPELAND. Mr. President, I ask unanimous consent to have printed as a Senate document, with illustrations, the report on hours, wages, and working conditions in scheduled air transportation by the Federal Coordinator of Transportation, Mr. Eastman. This report is very valuable to us in connection with our work in considering the subject of air traffic.

The VICE PRESIDENT. Without objection, the report will be printed as a Senate document, with illustrations.

REPORT OF THE COMMISSION OF FINE ARTS

Mr. BARKLEY. Mr. President, I ask to have printed, with illustrations, as a Senate document the Twelfth Report of the Commission of Fine Arts for the period July 1, 1929, to December 31, 1934, with respect to certain planning for the District of Columbia. It is customary to have the reports printed, and I ask that this report be printed as a Senate document.

The VICE PRESIDENT. Without objection, the report will be printed, with illustrations.

COMPENSATION OF CERTAIN RAILWAY-MAIL EMPLOYEES—CONFERENCE REPORT

Mr. McKELLAR submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same.

KENNETH MCKELLAR,
CARL HAYDEN,
LYNN J. FRAZIER,
Managers on the part of the Senate.

T. G. BURCH,
FRED H. HILDEBRANDT,
A. WILLIS ROBERTSON,
I. H. DOUTRICH,
PHILIP A. GOODWIN,
Managers on the part of the House.

The report was agreed to.

NAVAL AIR STATION, MIAMI, FLA.—CONFERENCE REPORT

Mr. WALSH submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 8372) to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station, and to authorize the construction and installation of a naval air station thereon, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

DAVID I. WALSH,
MILLARD E. TYDINGS,
Managers on the part of the Senate.

CARL VINSON,
PATRICK H. DREWRY,
GEORGE P. DARROW,
Managers on the part of the House.

The report was agreed to.

POLITICAL AND ECONOMIC CONDITIONS

Mr. BORAH. Mr. President, in the March bulletin of the National City Bank we find that the net profits of the agricultural implements industry for 1935 were 568.7 percent above those of 1934. We find from the report of one of the farm bureaus that the farm income for 1935 was 4 percent above that of 1934.

In my opinion, this presents a phase of a subject in which I have been interested and am interested, and upon which I had something to say over the radio at Cleveland last Saturday night. I ask permission to have the radio address inserted in the RECORD at this point as a part of my remarks upon this subject.

The PRESIDING OFFICER. Without objection, it is so ordered.

The address is as follows:

RADIO ADDRESS OF HON. WILLIAM E. BORAH, OF IDAHO, AT CLEVELAND, OHIO, ON MAY 9, 1936

Ladies and gentlemen, it is said that when the great political revolution of 1801 took place, and Thomas Jefferson became President, Alexander Hamilton, until the hour of his tragic death, nourished the belief that things would swing back and that the old Federal principles and policies would again prevail. Hamilton was in many ways the genius of his age. But the common people he never understood and with their lot he was not deeply concerned. He failed to realize that with the people revolutions do not go backward. The Federalist Party, with its distrust of the people, with its alien and sedition laws, passed out of American politics.

No man was ever wise enough to foretell the exact course or mark the sweep and extent of a political revolution, and I shall not undertake to do so. But the election of 1932 was just as certainly a political revolution as that of 1801 or 1860. It marked the end of one era and the beginning of another. The extent of it I do not undertake to prophesy. If the Republican Party recognizes this fact and formulates its policies and shapes its course in harmony

with the new conditions and new demands, it can render incalculable service to free institutions, to personal liberty, and to the cause of humanity. If we are wise enough and brave enough to make the cause of economic freedom the dominant and uncompromising creed of the party, we will have an issue worthy of its highest and best traditions, and may render a service to the American people second to no period in its remarkable history. If the party of Lincoln is willing to dedicate itself to the cause of free enterprise, to remove the private toll gates which monopoly has erected on the highways of American commerce, to rip out of our system the practice of price fixing which has separated our people into two classes and contributed greatly to our depression, it will be in a position, in my opinion, to repossess the confidence of the American people and rededicate itself to their service.

Let us not make the awful mistake which the great Hamilton made and proceed upon the theory that things which happened once may be glossed over and made to happen again. We cannot win upon any such theory, and we are not entitled to win upon any such theory. The organization may have the power to commit the party to such a course. But to do so is to fly in the face of millions of voters and to invite defeat.

I think I know the worth of constitutional integrity and what it means to the happiness of the American people. I feel I understand the worth of an independent judiciary in the scheme of constitutional democracy. I do not minimize their importance. I shall always be ready and anxious to contribute what little influence I may have to their preservation. A record of 30 years upon these matters justifies me in at least saying that much. I have some appreciation, I trust, of the growing waste and extravagance of government, of the devastating influence of bureaucracy, and how these things all fall at last with depressing weight upon the taxpayers of the Nation. I minimize the importance of none of these matters. But there is a deep sense of economic injustice which has come to pervade the minds of a vast number of the American people, and justly so, which we dare not disregard. This scheme of government of ours was built upon the principle of equal opportunity to all, and discussions touching the Constitution and the courts should be carried on in the light of that fundamental principle.

We are now in the preconvention contest. But I confess I am thinking more and more about the situation after the national convention shall have closed. We will then have to face the voters out yonder in the open. They have undergone a frightful experience during these last half dozen years. The vast majority of them, in my opinion, care little about party shibboleths. Millions of them feel they have been hedged about by economic and financial conditions, unjust and cruel, like the men we read about a few days ago caught in a mine and wholly dependent for light and life upon generosity of forces which they could not control. They do not understand. And no amount of theory and no amount of partisan discussion will ever enable them to understand why, in a land rich beyond language to portray, in all things which make for human happiness, one in every four should be denied the right to work, to feed and clothe his family, and why millions should be dependent upon charity for their very existence. They know perfectly well that this was a man-made depression and that a strange and vicious principle of economic injustice is at the bottom of the whole miserable cataclysm. If you talk to these men and women about the Constitution, about the rights and privileges and personal liberty of the citizen, they will, of course, agree with you. But they will ask you: What is your remedy for this economic situation. They will say: We want an opportunity to have homes, to rear families, and to live as American citizens are entitled to live. And what will be our answer? The cry of loyalty to the party, drive out the enemy—this plagiarism from the past will not count. These men and women who have been disciplined through all these years of adversity are alert and will expect an answer in terms of their own future welfare. In the face of forces which threaten their very existence this campaign will to millions be no ordinary party contest.

There is no question about the love and loyalty of the vast majority of the American people to the great underlying principles which distinguish our Government from other governments of the world. The people will not lightly imperil these principles. Ours is the only written Constitution made by the people, amendable by the people, and, in plain language which all may understand, guarantees the liberty of the people. All this they know and profoundly appreciate. But they expect—and they have a right to expect—that our Government shall not only guarantee in words the rights of the people, but make good that guaranty. To so execute the powers of government as to disparage the rights and sacrifice the happiness of a large portion of the people is the betrayal of free government, and essays and eulogies will not take the place of the actual use of these powers to the ends for which they were granted by the people.

A long time ago, early in recorded history, a person possessed of a most valuable birthright cried out: "Behold! I am at the point to die, and what profit shall this birthright do to me?" This is the cry which has marked the beginning of all resentment against established government, of established order. The people of the United States have asked and have a right to ask—they would be moral cowards and intellectual slaves if they did not ask—Behold! We are in great distress and have long been in distress. Before the depression we lived meagerly, and since the depression we and our children have lived in actual want. What profit, therefore, are these great principles of free government if they do not protect us in our inalienable right to live, to live decently as a free people? This is not a want of loyalty to free government, but it is notice—notice accompanied by a feeling which it is dangerous to disregard; that this Government must be used and its powers exerted in the interests of the people whose Government it is. The power granted the Government by the people under the terms of their Constitution is, in my opinion, ample to protect their rights and to do for them economic justice. The question is, Shall we use these powers in the interest of the people? That is the problem which confronts the Republican Party. If it is not prepared to give assurance that it will use these powers in the interest of the people and not only to give assurance but to accompany that assurance by unmistakable proof that it will be adhered to, then it is hopeless to expect anything in November except pitiable defeat.

I hope you will be patient now while I give you some figures. One takes a risk in burdening his remarks with an extended array of statistical figures. But you will pardon me in taking this risk to some extent since human language cannot convey to you the message contained in these figures. They speak in a language all their own. Let us, in support of my theme, take the years of 1928–29. These years stand out in history as years in which our national plant yielded wealth beyond anything in recorded history. Fortunes were piled upon fortunes until they became the subject of comment not only at home but in all lands. The other side of the picture was not so generally a subject of comment. We now know that in the midst of this vast wealth the majority of our people had only means enough to sustain a bare existence. Seventy percent of our people struggled through with nothing but the bare necessities of life, and over half the population had less than an adequate diet, even in this land of untold wealth. Literally millions of children were compelled to remain out of school, denied the advantages of our great free school systems, because their parents could not provide food or clothing sufficient to enable them to attend school—that great university where men and women are prepared for the duties of citizenship. It was during this period, as we now know, that 36,000 families at the dizzy top of the economic ladder enjoyed a greater income than 12,000,000 families at the foot of the ladder. The purchasing power of the great majority of the American people was at the lowest point in our history. Under the old system of primogeniture and entail, some reckless son might seize the estate to the exclusion of all other members of the family. Under a monopoly-ridden, price-fixing system that is what takes place with reference to the whole national estate. While some live in luxury the great majority live in penury. This was the condition in the years preceding the depression. This is the condition which will always prevail under a monopoly-controlled, price-fixing regime. It is a condition which will grow worse instead of better. It does not make any difference how much recovery we may have as that term is so sadly misused nowadays. There will always be under such a system a scanty, meager living for the vast majority and almost incalculable wealth for the few. The purchasing power of the masses will always be at the lowest ebb which, of itself, will stand as a constant menace to our whole economic system.

What does the Republican Party propose to do about this? Is it satisfied with such a condition of affairs? What is the remedy? And do we propose to apply a remedy? Constitutional democracy, an independent judiciary, the whole grand scheme of free American life are involved in righting this terrible, this brutal economic injustice.

The Republican organization and the men who are making every effort to seize control of the Cleveland convention, the oil companies, the utility magnates, the du Ponts, the Browns of Ohio, the Edges of New Jersey, the Hilles of New York believe in the system and are its defenders. "The ox knoweth his owner, and the ass his master's crib." They propose to return to this economic condition of 1928–29. They laud it and say that we must get back to it. That is why they are so active. But they will not return to it. They are not equal in genius, many of them, to Alexander Hamilton. But in their limited way they are making the same mistake. They may sink the Republican Party in their effort to return to it, but they will not return to this condition—the people will not let them return to it. We will either drive monopoly and price fixing out of our system and restore to the disinherited millions their rightful opportunity in the economic world, or we will move on to absolute governmental regimentation. And under either the reign of monopoly or the reign of Government regimentation, the free American citizen, who made this country and without whom this Republic cannot exist, will disappear as certainly as the free citizens disappeared in Germany and Italy.

Whoever opposes monopoly and the price-fixing system and all the vicious consequences which follow is immediately assailed as one opposed to business—fighting business—the enemy of business. None know better than those who raise the cry how utterly false it is. It is a fight for business, for legitimate business, for independent business. Breaking the grip of monopoly is the only hope for the independent groceryman, the independent druggist, the independent businessman in any line. The man who builds up his business through industry and ability, through the superior quality of his goods, the honest independent businessman, is the prop and stay of our entire economic system, without which the system cannot exist, and he is entitled to the encouragement and protection of our Government. Monopoly is his enemy, and no one knows it better than he does. Price fixing is his doom, and no one knows it better than he does. Another 40 years of the growth of

monopoly, the spread of price fixing, such as we have had during the last 40 years, and the independent, legitimate businessman will disappear. In other words, this is a fight for the rights of the man who is willing to devote his ability, his energy to the building up of a business and to know that he will not be bludgeoned out of the economic field through an economic dictator. There appeared in the press dispatches the other day a statement to the effect that there were 5,000,000 young college men ready and anxious to enter upon a life of self-reliance, self-respect, individual initiative, and no place to go. We ought at least to give these young men an economic field uncontrolled, unsold, unpreempted. The great question of the day is: What can we do for the young people? The first thing we ought to do is to give them an open field and a fair chance. Ninety percent of them will do the rest.

Ohio is a great agricultural State. We have a farm problem. We have had a farm problem increasing in seriousness for many years. We will have a farm problem so long as we have a diminishing market for farm products. And we will have a diminishing market for farm products so long as there is a constant decrease in purchasing power upon the part of the masses. And there will be a constant decrease in purchasing power upon the part of the masses so long as there is a power in this Government lodged in private interests which enables a few corporations to fix prices for 130,000,000 people. The farmer was not at fault in 1928–29. He had produced and was prepared, assuming the American people could buy, to feed the American people. He was prepared to run his farm upon a successful basis if he could find someone to buy his products. But the people to whom he should have been permitted to sell did not have the money with which to buy. One-half of them, as I have said, were living upon the bare necessities of life. Even if this one-half had been able to purchase what they really needed for a decent standard of living there would have been no farm problem. I make this prediction, that we will have a farm problem and the farmer will be in distress, in spite of any remedial measures which we may undertake, unless purchasing power is restored to the masses of the American people. And that never can be done under a monopolistic controlled, price-fixing system. Every agricultural nation in the world at the present time is increasing its acreage of production. Chester Davis, the able Assistant Secretary of Agriculture, in an article published sometime ago, says: "While we in the United States are driving to shift plow land to grass, the British are encouraging through national programs a shift from grass to plow land." So it is everywhere. We are shifting plow lands to grass. We would be shifting grass to plow lands if people could buy what an adequate diet demands.

It is hoped by all, and by many believed, that we are moving toward recovery. Undoubtedly there is evidence of recovery. In some lines of business there is even evidence of prosperity. But, according to the report of the American Federation of Labor, we have 12,550,000 unemployed, a million more than a year ago. According to a statement found in the New York Times on the 3d of March, we have 24,000,000 on relief, 3,000,000 more than in 1934. How indicative this is of the kind of recovery which we speak of as recovery. That which drove us into the depression now proposes to give us a recovery for only a small portion of our people. A few days ago it was judicially determined that one of our most important food products was under the control of a price-fixing power. That caused a great deal of comment. But what would the comment be if we would really realize, which I am informed is actually true, that close to 80 percent of all the things which enter the daily living of the people is either directly, or indirectly, under the jurisdiction of some price-fixing power. I observed the other day that when the Government sent out for bids upon an important project, 19 responses came in all in the same figures. The proof of this conspiracy was at hand. And who pays these prices which these combinations fix except the overburdened taxpayer of the United States? If we are traveling back on the road of so-called prosperity ultimately to arrive at the destination of 1928–29, there will be no recovery for half the population of the United States. There never will be any recovery for them. They will always be hewers of wood and drawers of water. Need we regard this question of unemployment as an insolvable mystery? These unemployed are the economic heirs of the 50,000,000 who were living on less than the bare necessities of life in the period of great prosperity. There is something basically, drastically, shamelessly wrong about such a system. And the question of 1936, after we have witnessed the proof of the effects of such a system, after our people through 6 years have suffered the tortures of hell because of such a system, is: How are we going to meet the issue?

It is admitted on all hands that regimentation, Government planning, as the phrase is used in popular parlance, must inevitably work a tragic and fundamental change in our form of government. The citizen must surrender his right to conduct his business or pursue his avocation in his own way so long as he does not transgress the rights of others. He must be content to run his business in his own way only so long as he does not transgress the orders of some bureau. The friends of regimentation make no concealment of the fact that the whole structure of government must undergo a complete change. This we shall dread to see. But let us be candid with ourselves. There is no way to avoid regimentation unless we are willing to eliminate the monopolistic system. As between the two, Government regimentation will in time prevail.

Who initiated regimentation in this country—the monopolies and combines. They initiated the doctrine of curtailment of output even when millions of people were in need. Could a more perfect scheme for the impoverishment of the masses be conceived than the curtailment of output with power to fix prices on that which remained? They drove independent business from many fields of activity and reduced employment. They were the first to say: You shall not sell below a certain price and remain in business. They were the authors of price fixing throughout the country. We cannot escape the dilemma. If we do not restore free enterprise in this country, then we are going to have regimentation, either private or public. And either one, as I have said, means the end of the American scheme of life. But if the Republican Party is so wedded to its idols, if it has not the courage to break away from these powerful forces, if the party and its candidates continue to accept the money and contributions of these forces, it is doomed to have no part in the liberation of American enterprise, just as the old Whig Party, by reason of its sheer moral cowardice, was doomed to have no part in liberating a race.

The only recovery which will be recovery to a very large portion of our population, that portion which is being tossed back and forth between a state of the scantiest existence and a state of dependent charity, will come to us hand in hand with the free genius of the American people, operating under just and equal laws. A recovery which fails to bring to all our people a decent standard of living, a living wage, complete economic freedom, will be a cruel deception and nothing less than a brutal interlude to another catastrophe. We will make progress in reducing our debts and our taxes and unemployment, we will start to restore confidence to business and give courage to the average citizen, we will make progress in restoring purchasing power to the masses, indispensable to permanent economic recovery, when we establish and maintain free enterprise and break the hold of both private and public regimentation.

The opposition in this State are constantly saying that I am out simply to make trouble, that I do not really care about the high honor the Convention will confer upon someone, but that I simply want to make trouble. Make trouble for whom? I should like to see my party win. I should like to see the Republican Party repossess the confidence of the millions of voters who have left it and gone elsewhere. I should like to see it become a power again in shaping national affairs in the interest of a sorely perplexed people. I am perfectly certain that, if the leaders of the opposition in Ohio and their associates elsewhere control the national convention and write the platform and name the candidate, the party will not return to power—the Republican State of Ohio will continue to be in the Democratic column. Under their leadership and under their policies in which they believe, the party has forfeited the confidence of the average man and woman to a degree never before experienced in its history. It has ceased to be a power in the Nation. I oppose them, and I oppose their policies. That is the kind of trouble I am making. I confess my limitations, and I shall not likely be able to do all I should like to do. In their political philosophy, in their conception of economic justice, I see not one single promise or one single assurance looking to the betterment of the conditions of the 50,000,000 people who, when they were in power and their theories prevailed, were compelled to live on the bare necessities of life. Believing as I do, there is only one thing I can do, and that I am doing and that I will continue to do.

We have the laws on the statute books, if enforced, to end monopoly and protect our people against its wrongs. We have the laws to protect the housewife against the economic masters who now determine the standard of living for the family. If we have not the laws already we have the power under the Constitution and the decisions of the courts to enact all necessary laws. It is solely a question of when we will use the constitutional power we have.

This cannot be done by fine phrases in a political platform. It will not be done by a party or candidate who accepts favors and incurs obligations to these influences. For 40 years political parties have told the people over and over again of the great evils of monopoly, and how, if given power, they would deal with this subject in the interest of the people. The results accruing by reason of the failure to carry out these pledges are now to be seen on every hand. It is my conviction that the whole scheme of American life, of personal liberty, depend upon our effectively keeping this long-standing pledge.

DUTIES OF THE "WHIP" IN CONGRESS

Mr. GUFFEY. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the pen of the distinguished senior Senator from Illinois [Mr. LEWIS] on the subject of the duties of "The Whip" in Congress, the article having been published in the Illinois State Register, of Springfield, Ill.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Illinois State Register, Springfield, Ill.]

DUTIES OF "THE WHIP" IN CONGRESS

By JAMES HAMILTON LEWIS, United States Senator

What is a party whip?
What are his duties?
Why have one?

What purpose is there in the selection of such a representative of a party in connection with legislation or the management of affairs in legislative business?

Since my designation as the first party whip of the Senate in the Sixty-third Congress, these questions have often been asked me. A satisfactory reply sometimes is confusing, often not sufficiently informative to enable the inquirer to understand the reason for the selection of a whip. As a result, I have endeavored to trace the history of the whip in legislative and historical affairs.

INSTRUMENT OF DISCIPLINE

We find the whip used throughout the ages as the instrument of punishment and sometimes of torture. The Babylonians used it for the punishment of slaves who sometimes were captured, kings, nobles, and generals of unfortunate nations that came under their control.

The Persians followed a similar course. The Egyptian taskmasters always carried a whip for the driving of the slaves. Ghengis Khan and Kublai Khan armed their disciplinary officers with whips which were used generally in the punishment of violators of their orders.

It remained, however, for the English to establish some order and to record the purposes of the legislative whip. They sought a more modern title from which to take the name of whip but which was, nevertheless, an instrument of discipline, menace, and punishment.

ENGLISH ADAPT HUNTING NAME

The English were great hunters. They had what was known as the "whipper-in" in their fox hunts. Webster defines a "whipper-in" as "a huntsman who keeps the hounds from wandering and whips them in, if necessary."

The Encyclopedia Britannica, fourteenth edition, page 569, gives the following definition of the whip, which is the only authentic description I have been able to find:

"Whip, in English parliamentary usage, denotes a member, chosen by the leader or leaders of a political party for the special duty of securing the attendance of the other members of that party on all necessary occasions, the term being abbreviated from the whipper-in of a hunt. The name is also given to the summons urging members of the party to attend. The urgency or importance of the notice sent by the whips to their following is indicated by the number of lines underscoring the notice, a four-line whip usually signifying the extremest urgency. The chief government whip also holds the office of patronage secretary to the treasury, so called because when offices were freely distributed to secure the support of members, it was his chief duty to dispose of the patronage to the best advantage of his party. He is still the channel through which such patronage, if left to the prime minister, is dispensed. The parties not in office have unpaid whips. The whips also arrange for the pairing of such of the members of their party as desire to be absent with those members of the opposition who also desire to be absent. The chief whips of either party further arrange in consultation with each other the leading speakers in an important debate, and also its length, and give the list of speakers to the speaker or chairman, who usually falls in with the arrangement. They take no part in debate themselves, but are constantly present in the house during its sittings, keeping a finger, as it were, upon the pulse of the house, and constantly informing their leader of the state of the house. When any division is regarded as a strictly party one, the whips act as tellers in the division."

It will be noted from the foregoing that the duty of the whip under the English system is dual—that is, both in the election of members of Parliament and in legislative performance afterward.

TITLE ANGLO-SAXON

I do not find any reference to the employment of whips in the legislative bodies of the other great nations. A reference occurs in a French treatise on the British system as "les whippers in." Of the numerous parties in the French Chamber of Deputies, leaders are frequently taken into the cabinet, but there is no indication of a person charged with the responsibility of obtaining party support. If it is done at all, it is through the party leaders who make a partisan appeal.

With the establishment of Fascist control in Italy, the various parties disappeared. This also happened in Germany when the Nazis took over the Government.

According to the Encyclopedia of Europe, VI, page 640, in Russia "the All-Union central executive committee numbers 451. It meets four times a year and once more at the conclusion of the All-Union Congress. This body is the nearest equivalent to a parliament in the Russian constitution, since the All-Union Congress of Soviets, with more than 1,100 members, can only give general directions on main principles. The preparation for its sessions are made by the Presidium of 27 members elected by the executive committee from among its own members and for its own period of office. It prepares the order of business which it publishes 2 weeks at least before the session commences, and provides members with necessary reports."

Japan has no official corresponding to the whip in its parliament.

DUTIES OF A WHIP

Perhaps before going into detail under the American system, it might be well to give the definition of the duties of the whip in the American Congress as outlined by William Tyler Page during his tenure as Clerk of the House of Representatives. Mr. Page gave me this description in the last administration when he was clerk of the Seventy-second Congress:

"The office of whip comes to us from the British Parliament. That is, the name does, and it has been used for some 200 years. It is probable that every legislative body, as long as there have been such bodies, has had some person who has acted in this capacity.

"The whip looks after the membership of his party and endeavors to have them present to vote on important measures. When the vote is apt to be close he checks up, finds out who is out of the city, and advises absentees by wire of the important measures coming up.

"There are many hours of long debate when many Members do not feel it necessary to be present and listening, and they go along attending to their other business, which in many cases is pressing. The whip keeps posted on the daily program, and if something important comes up where votes will be taken he notifies the membership of his party. Occasionally Members' offices are notified by phone from the whip's office that 'all Members are desired on the floor immediately.' After such notice is phoned around you will see the House gradually fill up with Members."

REPUBLICAN WHIP

The whip has also a duty to perform in connection with the White House. The President occasionally seeks information from the whip as to the sentiment of the House on important administration measures, about the prospect of passage of certain bills, and the whip naturally reflects the President's view about many things and is in a position to know the administration's policy.

By substituting the word "Democratic" or "Republican", the duties of the whip, as defined by Mr. Page, are identical.

The close association with the White House depends upon the membership of the respective Houses of the Congress. If the administration is Democratic, as at present, and there is a Democratic majority in both Houses, the connection is direct. Should the membership of either House become Republican with a Democratic President, the minority becomes the contacting party in place of the majority. This condition frequently has existed during the life of the Republic and may prevail under either or any party.

WHIP SYSTEMS COMPARED

It will be noted from the description of the powers of the whip in the English Parliament and the duties defined by Mr. Page that the whip in Parliament represents the Government, while the whip in Congress is a party designation. The English whips resign with the Cabinet when there is a change. The American whips may continue in the performance of their duties regardless of a change in the administration, simply shifting from the majority to the minority side, or vice versa—that is, of course, with the understanding that they are again designated by their parties in the organization of the new Congress.

Another difference in their duties may be found in the distribution of patronage by the English whips, whereas the congressional whips have no direct connection with the distribution of party patronage except insofar as it pertains to the portion allotted to them as individual Members of the Congress.

METHODS OF DISCIPLINE

Under the English system whips are empowered to indicate punishment in the event of failure to perform according to the wishes of the Government. For instance, in Volume I, Government of England, House of Commons, it is related that the whips may send a one-line lithograph notice indicating that the presence of a member is desired at a particular session of Parliament. A notice of two thick lines indicates "come on pain of being thought a deserter." A four-line notice is only sent as a signal of the extremest urgency in the nature of a division of the House when the future of the Government may be determined.

American whips have no such authority as this. They may send notices to the Members to be present. Through the clerks of the majority and minority they may arrange pairs; that is, the voting of some absentee or present Member in favor of the question with some absentee or present Member who is opposed. Under the English system the whips make up the committees. Under the American system committees of the Members of the Congress designate committees.

Under the English system the government whip is paid, while the whips of the minority parties are designated by their leaders and are independent of the governmental organization. Under the American system the whips are Members of the Senate and House and have clerks representing the majority and minority to assist in their work.

The Speaker, the party caucus, or the floor leaders may appoint whips in the House, and the Committee on Committees, a party caucus, or the floor leaders select them in the Senate.

CALLING ABSENTEES

Some years ago a system of electric calls was instituted in the Government buildings. Now, wherever Members may be—in the committee rooms of the Capitol or the Senate and House Office Buildings or in their own offices—bells are rung announcing the time for convening, roll calls, executive sessions, recess, and adjournment, so that any Member wherever he may be in the aforementioned buildings can proceed to the Chambers and respond to roll call if necessary. Should a Senator be visiting the House or a Representative calling on a Senator, he would have to be reached by a messenger, if his vote should be required.

In the old days personal messengers had to be sent. It was the duty of the whips to see that a quorum was present and that all

the Members in Washington who could be reached were on hand when an important question was under consideration. Then came the telephone. Now the electric system eliminates the messenger service, and messengers are required only when there is a call of the House or Senate, when the Sergeants at Arms have to summon each individual Senator or Congressman.

FIRST DEMOCRATIC WHIP

So far as I have been able to learn, I was the first Democratic whip appointed in the history of the United States Senate. It was during the first Wilson administration. We had many important questions before the Senate in that pre-war period. Then came the war, when the demands on the whip's time were continuous and exacting. A similar condition existed in the Seventy-third Congress, when all the emergency legislation under the Roosevelt administration was being considered. Congressman ARTHUR H. GREENWOOD, of Indiana, was the whip of the House.

There was no time when our duties did not require the most solicitous attention and consideration. Tact, patience, good humor, and unfailing courtesy are required.

The duties of the Senate whip demand his presence on the floor as constantly as possible. Sometimes the long hours test his physical capacity, but generally he is devoted to "watchful waiting." He is ex-officio assistant floor leader, and in the absence of the floor leader, and other assistants, may be called upon to represent his party.

REPORTS ON SITUATION

At roll calls he reports absentees and pairs which have been brought to his attention. He is not supposed to introduce bills lest they may divert his attention from his floor duties. While the parliamentary whip is not supposed to engage in debate, there is no such restriction on the congressional whips. In fact, as assistant floor leaders it often becomes necessary for them to do so.

I count it a crowning honor that after serving through three Congresses, I was again selected as whip by my colleagues after being out of the Senate for 12 years. Again they honored me in the Seventy-third and Seventy-fourth Congresses. Six times whip of my party is a record of which I am extremely proud.

ADMINISTRATION OF RELIEF FUNDS

Mr. DAVIS. Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the Philadelphia Inquirer of Monday morning, May 11, 1936, entitled "The Battle of Relief Giants."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Philadelphia Inquirer of May 11, 1936]

THE BATTLE OF THE RELIEF GIANTS

The intensified struggle now in progress between P. W. A. Chief Ickes and W. P. A. Chief Hopkins over the spending of the relief billions conceivably may have a powerful influence on the national political situation in this Presidential year.

Mr. Ickes' threat to reduce his administrative personnel by 25 percent is the direct result of the refusal of the House to earmark for the use of P. W. A. $350,000,000 to $700,000,000 of the new relief funds. President Roosevelt has been vigorously opposed to an additional P. W. A. grant, and the House—what else would it do?—agreed with him.

If the proposed P. W. A. personnel reduction could be regarded as an authentic economy move, purposefully directed toward a trimming of 2,000 jobholders from bureaucratic pay rolls, there might be good reason for taxpayers to rejoice. But this is not clear. First, Mr. Ickes' move seems to be intended as an importunate plea to the Senate for P. W. A. aid. Second, if none of the new relief money is allocated to Ickes, it means that virtually all of it will be administered by Chief Boondoggler Hopkins, of W. P. A.

One of the more difficult problems posed for the citizenry by the New Deal is how to choose between evils, how to select the less futile of two futilities. P. W. A. has been a costly luxury. Its ability to provide jobs has been disappointing in relation to the millions it has expended.

But whatever its efficacy as a recovery agency, P. W. A. manages to show something achieved through the money spent. In this respect, if in no other, its record is in marked contrast to that of W. P. A. The Hopkins department of work relief provides jobs and wages for the enactment of the most useless, unnecessary public program known to man.

It has been plain for some time that President Roosevelt believed with Hopkins that relief, rather than work, should be emphasized in work-relief projects. At the same time there could be no mistaking the fact that the President's enthusiasm for Mr. Ickes' endeavors had waned to the vanishing point. The present prospect is that unless the Senate responds to the Ickesian cry for help and specifies part of the $1,425,000,000 proposed relief fund for projects requiring large expenditures for materials, or unless there should be a separate appropriation for the purpose, the P. W. A. will be permitted quietly to lapse.

While it would be inadvisable to appropriate for P. W. A. funds which would be in addition to the $1,425,000,000 relief bill, there is something to be said for letting Mr. Ickes have a share in the spending of the work-relief money. Industry would receive some benefit thereby, and the W. P. A. boondoggiers would be prevented from frittering away the entire fund.

In this strange situation the political anomaly is readily perceptible. W. P. A. has come to be a political factor of no inconsequential moment. A large W. P. A. fund, unburdened by liens for the purchase of materials, would be a powerful campaign instrument.

But W. P. A. has become a synonym for futility, for waste, for politics in relief, for failure of accomplishment. Scandals and controversies over it exist in many States. On the other hand, Ickes' P. W. A. has been virtually free from charges of politics and graft. For the administration to put all its relief and campaign eggs in W. P. A.'s basket to the virtual exclusion of P. W. A.'s seems to be something less than astute political management.

Out of this battle of the giants over which group of New Deal spenders shall administer the new relief fund emerges one shining fact. It is that the whole Federal relief and work-relief system as organized and operated by the New Deal is a hopeless conglomeration of waste, ineffectiveness, and politics, and that it demands a thorough and complete overhauling.

The Roosevelt administration is ill-equipped to correct a grave condition for which it is primarily responsible.

A NEW APPROACH TO THE TARIFF QUESTION—ADDRESS BY HENRY F. GRADY

Mr. BARKLEY. Mr. President, I ask unanimous consent to have printed in the CONGRESSIONAL RECORD an address delivered at the convention of the National League of Women Voters in Cincinnati on April 29, 1936, by Henry F. Grady, of the State Department, with reference to "A new approach to the tariff question." A few days ago I asked that this address be printed in the RECORD, but since, on account of its length, an estimate of the number of pages it would cover was required, it was not printed at that time. I have obtained the estimate, and I renew the request.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I am very happy to have an opportunity to address the members of the National League of Women Voters. The fact that the subject of the tariff, in both its domestic and international phases, has had a place on your study program for a number of years indicates that you have been doing your own thinking on the fundamental economic principles involved in the question of tariffs. I feel, therefore, that I can proceed at once to the consideration of certain aspects of the tariff question and the reciprocal trade agreements program, which, in view of widely held misconceptions, apparently cannot be clarified too carefully nor emphasized too strongly.

One of these misconceptions is the belief that the United States is not dependent in any important degree upon international trade for prosperity. How many times have you read or heard it said that since exports amount to only 10 percent or less of domestic production, they are unimportant and efforts to restore our international trade are useless? I need not discuss with you at length the utterly misleading nature of this shallow generalization. You know what the loss of export markets has meant to the farmers who grow crops for export; to the industries which must export a large part of their output in order to enable them to operate profitably with full working forces; to the transportation companies, banks, and other agencies which facilitate the movement of goods in foreign trade; and to all of us as consumers. Nor is the cotton farmer, the tobacco grower or the manufacturer of automobiles or agricultural machinery impressed by such specious reasoning; he knows that good export markets bring him prosperity and that loss of those markets means reduced purchasing power and hardship. Half of the population of the Southern States depends, directly or indirectly, upon cotton production for its income, and over half of our cotton crop normally is sold abroad. When cotton exports decline and the price of cotton falls, the decreased purchasing power of millions of people in the South has a depressing effect upon virtually every State and every industry in the country. The welfare of many growers of crops sold entirely in the domestic market is closely linked with that of the export industries and the size of industrial pay rolls; just as the prosperity of many manufacturers of products sold very largely or solely in the domestic market depends importantly upon the purchasing power of farmers in the sections of the country where export crops are grown.

Those who belittle the importance to this country of international trade generally are interested in, or supported by, the branches of agriculture or industry which fear foreign competition and which rely upon high tariffs as a substitute for efficiency and economy. Among those who regard as futile any effort to restore our international trade are a number of persons of some intellectual attainment. Some in this group recognize the dependence of American agriculture and industry upon export markets, but instead of advocating measures designed to restore lost markets abroad, they conclude that we should free ourselves from that dependence by adjusting our agricultural and industrial plant to the requirements of the domestic market alone. These theorists apparently give little or no thought to the vast economic and social problems which such a violent adjustment would involve;

they offer no hope to the millions of unemployed workers in our cities or to the impoverished farmers and farm workers who for decades or generations have come to depend upon the exchange of our exportable surpluses for the products of other countries which we need or desire. Others in this group of intellectual antiforeign traders jump to the conclusion that however desirable a restoration of our international trade might be, the obstacles to its restoration are insuperable. Therefore, they counsel, our energies should be devoted to the unhappy task of adjusting our production to the requirements of the domestic market, regardless of the economic and human cost. In the first place, these well-meaning prophets of doom usually greatly exaggerate the rigidity of the obstacles to be overcome, in some cases being misled by the superficially reasonable notion that the post-war industrialization in many countries and agricultural developments in others have destroyed forever the basis for any important volume of foreign trade for the United States. In the second place, they generally fail to realize that effective means of restoring our international trade are at our disposal.

Most of the conclusions drawn by minimizers of the importance to this country of international trade would be harmless if they were not believed in by people who have not had an opportunity to study intelligently the economic and social significance of such trade. An unusual argument is that in the late twenties, when we were at the peak of prosperity, our exports were just about balanced by our imports, hence, if there had been no foreign trade at all, prosperity would have remained in all its vigor. Surely no one could believe that our prosperity did not, in fact, depend in an important measure upon the production, exchange, and consumption of the nine or ten billion dollars' worth of products represented by our average annual exports and imports in those years. If this flourishing foreign trade had not existed there would have been less production, less trade, less purchasing power, and a lower standard of living. The use of production facilities for foreign trade does not mean that those facilities are taken away from production for the domestic market; it means the employment of workers and resources in the most profitable ways and a larger national income than would be possible without foreign trade.

The issue in the field of foreign trade does not lie between those who favor extremely high tariffs and those who advocate free trade. No responsible Government official at the present time is advocating the latter policy. The real issue lies between those who would keep our tariff at its present high level and add still higher restrictions on noncompetitive as well as competitive imports and those who advocate the removal of excessively high trade restrictions so that international trade may again move along natural channels and resume the profitable proportions it had attained prior to 1930. Those who advocate maintenance of the tariff and the further reduction of imports maintain that internationalists overestimate the importance of foreign trade. They profess to believe that an approach to self-sufficiency is desirable as a means of bringing about a more diversified industrial and agricultural society and as a means of giving industry and agriculture stability by making them independent of the commercial policies of foreign countries. They make much of the false argument that only by keeping out imports can we maintain our standard of living.

A number of European countries today are making a great effort to establish economic self-sufficiency. They are growing wheat at costs far above the world price. They are developing artificial fibers as a substitute for cotton and are pushing the production of artificial silk. They are replacing American lard with vegetable oils and whale oil, and are experimenting with the production of synthetic sugar. They are doing all these things, regardless of cost, in an effort to make themselves independent of other countries in case of war or as a means of protecting endangered currencies or various branches of agriculture. But no one would say that they are improving or even maintaining their standards of living.

The United States is in a more favorable position than perhaps any other country to establish an autarchy. We have wheat, vegetables, citrus and other fruits; we have cattle and poultry; we have sugar and tobacco; we have cotton; we have iron and coal; and we have wood and oil. We could get along without bananas, chocolate, tea, spices, and silk; and we could substitute glass for tin containers. We might have difficulties about rubber and a few other commodities, but on the whole, it is agreed, we could attain an exclusively American standard of living. But, definitely and inevitably, it would not be nearly as high a standard of living as we have enjoyed in the past. If we should insist upon producing a maximum of goods for ourselves without regard to costs, our standard of living would go down. Our farmers, industrial workers, and others would have to make painful adjustments involving great economic hardships and vast social and governmental problems. Moreover, the permanent loss of our foreign markets inevitably would bring with it a degree of regimentation and Government interference quite incompatible with the freedom of private enterprise which we associate with American political ideals. The experiences of the past few years of depression would seem delightful by comparison. While it is true that there are in this country relatively few advocates of thoroughgoing self-sufficiency, there are not a few who seek additional barriers against imports of foreign products, which would be a step in the direction of self-sufficiency and of its consequences that I have just indicated.

What is needed if we are to regain the standard of living which prevailed in the twenties is a downward revision of our tariff and a scaling down of foreign barriers against our exports. Widespread recognition of this necessity would greatly facilitate the task of restoring our foreign trade. Unfortunately such recognition is delayed by the lack of appreciation on the part of many people of the fact that our own tariff has had a disastrous effect upon our foreign trade and that the decline of that trade has contributed heavily to present unemployment and lowered standards of living. That tariffs increase the cost of living is admitted even by legislators who advocate high tariffs. An analysis of votes on the Hawley-Smoot tariff bill of 1930, for example, reveals that Senators from metropolitan and industrial areas, who consistently voted for increased tariffs on industrial and other items, voted against increases when it came to tariffs on food items in demand by their metropolitan constituents.

Those of you who act as custodian of the family budget doubtless are interested in the consumer aspect of the trade-agreements program, since the value of your income and the standard of comfort it will provide for your families are directly determined by the cost of living and the amount your dollar will buy. In this connection, I should like to mention the illusion that consumer advantages resulting from foreign trade are incompatible with the economic welfare of the country. Buying "American" at the expense of your purse is likely to be worse than a futile sacrifice. By doing so you may be increasing the profits of a particular industry, but you are not adding to the sum total of employment nor to the fuller use of our domestic production facilities. On the contrary, you may create unemployment in the country's export industries by helping to make it more difficult for foreign countries to acquire purchasing power for our products.

There is much confused thinking about the farmer's relation to the tariff. Of late there has been an encouraging amount of discussion of this question from which has emerged more clearly than heretofore the realization that our high tariff on manufactured products has subsidized many branches of industry at the expense of the farmer and the consumer. Farm leaders realize that our tariff on agricultural products has in general been ineffective by reason of the fact that many of the products are on an export basis, and frequently refer to the disparity between agriculture and industry. However, the preponderance of opinion among farm leaders and their supporters appears to be that parity between agriculture and industry can be obtained sooner and with greater certainty by measures giving the farmer special benefits than by measures affecting the tariff privileges accorded to industry. That is why they hailed the Agricultural Adjustment Act benefits as "the farmer's tariff."

Unfortunately, many farmers have been swept along with the current of this superficially attractive short cut to parity with industry without realizing how it affects their immediate and long-run interests. They are prone to regard the emergency measures adopted by the Administration to tide them over a difficult period when our agricultural exports were at low ebb and stocks were piling up, as a permanent solution of their problems, whereas the real objective of these measures was to effect an orderly retreat, through planned curtailment of production, from a temporarily adverse world-market situation. If the farmers of this country, particularly those who customarily grow crops far in excess of domestic requirements, realized fully what has caused their present difficulties I believe that the sentiment in favor of short cuts to parity with industry would wane and finally evaporate. I believe this because it must be obvious to anyone who takes the time to think about it that these short cuts do not contribute in any way whatever to the restoration of the farmer's export markets. Indeed, if such measures involve further restrictions upon imports of largely or wholly noncompetitive agricultural products they make the farmer's basic problem worse rather than better. They make it worse by decreasing the purchasing power of the people in other countries for the products of our farms and factories when what is urgently needed is an increase of foreign purchasing power for our cotton, pork products, tobacco, fruits, and other farm products. Moreover, such measures encourage log rolling by means of which, in return for industrial support of ineffective agricultural tariffs, the farmers are induced to support industrial tariffs which are effective and which add to the farmers' burden as consumers and as exporters.

In the absence of loans to other countries, which appear to be out of the question at this time on any important scale, the only way the people of those countries can buy more from us is to sell more to us. From this it follows as night follows day that we should reduce some of the excessive barriers to the sale in this country of foreign products needed or desired by our industries, our farmers, our industrial workers, and by all of us as consumers. If the truth of this could be brought home to the farmers of this country, their leaders, and their supporters, I am convinced that their good sense would lead them to endorse the efforts which our Government is making to restore foreign markets for our agricultural and other products by means of reasonable adjustments of our tariff in connection with trade agreements with foreign countries.

Under these agreements we not only obtain the reduction or removal of foreign tariffs, quotas, and other restrictions against our agricultural and other export products but also create the opportunity for the people of other countries to acquire additional purchasing power for our products. Literally hundreds of concessions on agricultural products have been obtained from foreign countries under trade agreements concluded to date as compared

with a relatively few and limited concessions on foreign agricultural products, mainly noncompetitive or only indirectly competitive, necessarily given in return. This fact, and the encouraging increases in the exports of certain agricultural products to countries with which trade agreements have been in force for some time, demonstrate the effectiveness of the trade-agreements program as a means of reopening foreign markets for the products of our farms. This fundamentally sound method of attacking the farmer's problem is gradually but surely bringing the farmer closer to parity with industry, at a higher instead of a lower level, without serious injury to the latter. Certain persons unfriendly to the trade-agreements program have endeavored to minimize its importance to the farmer by pointing to the increase in imports of certain agricultural products in 1935 and inferring or baldly stating that such imports resulted from the trade-agreements program. There is, of course, no truth in such inferences or statements. The unusual imports were caused mainly by the unprecedentedly severe drought of 1934 and unusually high prices, and came in over the rates of the Hawley-Smoot tariff.

Before leaving the subject of the farmer's relation to the tariff, I should like to mention another short cut to prosperity which seems to appeal to certain farm groups and their supporters. I refer to export-bounty plans. These plans, which assume a variety of forms, involve a drain upon the general funds of the Treasury, to which we all contribute, for the benefit of a limited number of beneficiaries; they encounter resistance on the part of foreign countries which offset with special charges or restrictions any bounties granted in the country of export; and they are wholly ineffective with respect to quota restrictions and exchange controls imposed by foreign countries. Obviously they do not help to increase foreign purchasing power for the products of our farms; they do not strike at the root of the farmer's difficulties.

Many industrial workers, and people who would be industrial workers if only they could find jobs, have been led to believe that our generally high tariff on industrial products, including prohibitive rates of duty on many items, is a necessary protection against foreign competition and a guaranty of their wage scales and standards of living. How they can believe this after the bitter experiences of the depression years, when our highest tariff was matched by the highest level of unemployment ever known in this country and when wages and standards of living sank to levels not believed possible a few years earlier, is understandable only on the assumption that they are not fully aware of the damage done by our own short-sighted tariff measures and by those of other countries. Another explanation of the persistence of the notion that a high tariff protects the worker's wages and his job probably is to be found in the fact that during the twenties our huge loans to foreigners enabled them to buy our products despite our high tariff which, had it not been for such loans, would have prevented them from acquiring the necessary purchasing power for such large quantities of our goods by means of exports of their products to this country. Thus the stifling effects of our tariff were postponed until the loans to foreigners ceased abruptly. After that, our export as well as import trade collapsed; unemployment mounted rapidly; wages and standards of living fell.

Intelligent industrial workers must realize now that they have been the dupes of the real beneficiaries of high tariffs, namely, the relatively small number of industrialists and capitalists who have reaped the benefits of the tariff in the form of monopoly profits at the expense of consumers, including the workers in their own factories. They must be beginning to realize also that, in the absence of loans to foreign countries, our own tariff wall against imports is also an effective barrier against the exportation of the products of our strongest branches of industry and agriculture. From the viewpoint of labor generally, the stoppage of the flow of international trade by our tariff and by the trade restrictions imposed by other countries has meant the slowing up of industrial activity, depressed wage scales, and restricted opportunities for employment; the increase in international trade which would result from the reduction of excessive trade barriers would, just as surely, mean greater industrial activity, improved wage scales, and reemployment of many workers.

There is evidence that labor leaders and organizations are becoming interested in the relationship between international trade and employment. Thus the governing body of the International Labor Office, Geneva, recently adopted a resolution calling for a study of employment in countries where significant changes in exports and imports, or either, have taken place and of the incomes of workers in such countries. This I regard as a very encouraging step in the direction of freeing the workers of this and other countries from misconceptions in regard to the importance to them of a flourishing two-way trade and in regard to the tariff question.

Any effective measure designed to restore our foreign trade should command the active support of agriculture and labor, since greater industrial activity and larger pay rolls in the industrial centers mean improved demand and firmer prices for farm products and greater purchasing power in the farming sections means an improved market for manufactured products. This applies to farm and factory products sold entirely within our borders as well as to the products of which we normally have supplies in excess of domestic requirements. Figures show that there is a definite correlation between factory pay rolls and farm income, which indicates that increases in the purchasing power of industrial workers are in large part passed on to farmers in the form of increased purchases of dairy products and other foodstuffs.

The removal of excessive trade restrictions naturally involves some economic readjustment, but the maintenance of our present high-tariff barriers would mean the permanent renunciation of a healthy foreign trade and hence would involve far greater economic and social readjustments. Free trade between the States of our Union involves constant economic readjustment, yet there has been no serious agitation for an amendment to the Constitution which would permit the States to impose tariffs as a means of avoiding such readjustments. One of my colleagues recently pointed out that in his State, Massachusetts, the dairy industry has been shrinking and that Massachusetts is buying milk from Vermont, butter from Minnesota, and cheese from Wisconsin when it has available many hundreds of acres on which it could, if necessary, support an adequate dairy industry of its own. In the textile field, industries have been moving south and have taken with them many markets formerly served by Massachusetts. The carriage factories formerly operating in Massachusetts might have been turned into automobile plants if Massachusetts could have secured protection against Detroit automobiles. Unable to utilize a State tariff as a means of reserving the Massachusetts market for producers in that State, the people of Massachusetts have turned to new and more profitable industries which find markets far beyond New England to the west and in foreign countries. The adjustments caused by the freely competitive conditions under which American industry is functioning are more than compensated for by the huge markets which the absence of trade restrictions has created in this country and which have enabled American industry to develop mass-production methods to an unparalleled extent.

The conditions and circumstances which enable American industry to function under competitive conditions in so large an area as the United States, I believe, hold good to a considerable extent in the international field. The inventive genius of the American people along mechanical lines is universally acknowledged. We have shown our supremacy in the designing of industrial machinery and in the production of automotive vehicles, office equipment, and other products, and we have applied scientific methods to agriculture. We have sold enormous quantities of various commodities in the world market before serious competition could appear; and as competition develops our mechanical processes ordinarily are several steps in advance of those of other countries so that we retain competitive advantages while at the same time we are forging ahead with new and different products. Nevertheless many persons promptly become alarmed when lower tariffs are discussed because they fear that American workers will be displaced to the degree that imports are permitted to enter. Statistics give clear proof, not, indeed, that increased imports are necessarily the cause of increased home employment but that increased imports and increased employment are by no means incompatible. When we compare the index figures of employment compiled by the Federal Reserve Board since 1916 with import statistics, we find that as imports increased, employment increased and that each year that imports decreased, employment likewise decreased. With the exception of one year, the same statement applies to imports in relation to factory pay rolls. Those who call for still higher barriers against foreign products, ostensibly on the ground that otherwise some industry or branch of agriculture in this country will be ruined, evidently have a very low regard for the inventive genius, adaptability, and resourcefulness of the American people and underestimate the abundance and variety of our natural resources.

You are, of course, well aware of the main objectives of the trade-agreements program. They are indeed so clear-cut that it is somewhat difficult to believe that there could be any misconceptions concerning them. However, from time to time and in certain quarters come statements which indicate that the objectives of our program for the restoration of our international trade are not thoroughly understood. It has even been alleged, for example, that under trade agreements with foreign countries American agriculture is being sacrificed in the interest of American industry. The opposite also has been alleged, namely, that industry is being sacrificed for the benefit of agriculture. The plain truth is that neither is being sacrificed. On the contrary, foreign markets for important branches of both agriculture and industry are being effectively reopened by means of these agreements. The allegation that the trade-agreements program is being carried out by free-trade theorists is scarcely worthy of comment. The facts themselves, as they appear in the trade agreements concluded, are sufficient refutation of such an absurd charge.

There is comparatively little criticism of the use of the bilateral trade-agreements method rather than unilateral tariff legislation as a means of reducing trade barriers. It seems to be quite generally appreciated that the unilateral method would not be practicable at this time. If the world's commerce were free from the many restrictive devices instituted in recent years, and if some sort of a stable international monetary standard were in operation, the lowering of our own tariffs doubtless would result in an increase in export commerce more or less corresponding to the increase in imports facilitated by our tariff reductions. But with conditions as they are today, a unilateral tariff-reduction program, even if politically feasible, probably would not increase exports quickly enough to compensate for disturbances to certain branches of American industry. At a time when we are just emerging from a depression, it is necessary that our tariff program provide immediate opportunity for increased exports through reciprocal concessions granted certain of our products.

The method of reciprocal bilateral bargaining which has been adopted as the most immediately feasible and promising approach to our tariff and foreign-trade problem reflects a departure from isolationism at a critical time when isolationism has grown to such

an exaggerated stature that it tends to destroy economic progress and to endanger the peace of the world. Its full implications mean a new American commercial policy adapted to our present international commercial, economic, and financial position. To the extent that this new policy becomes established in our institutional system we will have moved from an autonomous to a conventional tariff policy.

The method of reciprocal bilateral agreements has a number of important advantages over the congressional or autonomous method which the United States has followed in the past:

(a) The trade-agreements program has been remarkably free from lobbyists and from the high-pressure tactics generally used by special-interest groups to secure increased tariff privileges.

(b) Perhaps for the first time the tariff question is being approached from the point of view of national interest—the general welfare of farmers, workers, industrialists, and consumers—rather than from the standpoint of special industrial or sectional groups. The careful study and investigation carried out by a large group of experts regarding the commodities in respect of which our tariff rates might be reduced in the interest of expanding our export trade assures a type of scientific tariff adjustment such as our country has never had before.

(c) Our country has been among the last of the important commercial countries to give up the procedure of tariff making by purely autonomous legislative action. The present method brings the United States into line with the tariff method used by other countries. In foreign countries, tariff making generally has been placed largely in the hands of the executive, aided by technical experts. In these days of rapidly shifting economic situations it seems desirable that the tariff system of the United States be equally flexible to meet changing conditions and to enable our Government to defend and build up our international trade effectively.

(d) The adoption of the bilateral-agreements method is a recognition of the inescapable fact that our own tariff, perhaps equally or more than the trade restrictions of other countries, has a direct bearing upon the volume of export trade which this country can develop.

(e) The bilateral trade-agreements method is a recognition also of the fact that our tariff does not concern the United States alone, just as the tariffs and other trade restrictions imposed by foreign countries do not concern their interests alone but affect our interests as well. By means of mutually advantageous and simultaneous tariff adjustments the United States and a foreign country are able to stimulate a revival of two-way trade to the advantage of the people of both countries. These arrangements make for better international understanding and good will.

The reciprocal trade-agreements program of the United States differs radically from that of certain other countries which attempt to bargain for preferential positions in foreign markets. Preferential bargaining has been used by certain countries which normally and naturally have so-called unfavorable balances of trade to force the countries from which they import to purchase larger amounts of their export products, regardless of price and quality. These attempts at bilateral balancing of trade have resulted inevitably in a leveling down of trade rather than in a building up of the total trade between the two countries. Perhaps the worst feature of trade agreements under the bilateral balancing of trade policy is the discriminations they involve against the products of third countries. In short, such agreements not only involve the victimizing of the industries and consumers in the country called upon to increase its purchases from the country taking the initiative but also harm the trade of the other countries; they are destructive instruments of economic warfare which tend to reduce international trade as a whole and create international friction and ill will.

The principle underying the trade-agreements program is that of unconditional most-favored-nation treatment. This means that any concession granted in a trade agreement is automatically extended to all other countries which grant the United States such treatment, even when no formal treaty or agreement to that effect exists. It is important to keep in mind that the nongeneralization of concessions would constitute harmful discriminations against all other countries and that in self-defense other countries would be inclined to retaliate against our commerce—a development which would nullify the purpose of the trade-agreements program, which is to facilitate a general increase of our foreign trade, but not at the expense of other countries.

The question is sometimes raised, What is the value of a bilateral agreement, the advantages of which are immediately extended to all other countries? The answer is that the unconditional most-favored-nation principle is wholly compatible with bilateral bargaining by the simple fact that ordinarily concessions granted in any agreement are of importance and value chiefly to the particular country with which the agreement is made. Our sources of imports of any particular product generally are few in number, with one country the leading source. For this reason there is ample bargaining power for bilateral negotiations with all important trading nations. The countries which benefit secondarily or slightly or not at all from our concessions as a general rule extend to our exports the benefit of any advantages they may accord to other countries. In sharp contrast to preferential tariff bargaining, trade agreements under the unconditional most-favored-nation principle are instruments of economic peace which tend to increase international trade as a whole and create international good will.

The members of the National League of Women Voters will render the people of this country a great service if they will carry forward energetically their work of education in regard to the tariff, the role of international trade in our economic life, and the trade-agreements program. They will thus help to dispel the baseless fears and misconceptions which impede the progress of the Government's trade-recovery measures.

THE CALENDAR

The VICE PRESIDENT. The morning business is closed.

Under the unanimous-consent agreement entered yesterday, the clerk will call the calendar for the consideration of unobjected bills.

The first business on the calendar was the bill (S. 944) to amend section 5 of the Federal Trade Commission Act.

Mr. VANDENBERG. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 213) to amend section 113 of the Criminal Code of March 4, 1909 (35 Stat. 1109; U. S. C., title 18, sec. 203), and for other purposes, was announced as next in order.

Mr. McKELLAR (and other Senators). Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 1506) to change the name of the Pickwick Landing Dam to Quin Dam was announced as next in order.

Mr. KING. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 574) relative to Members of Congress acting as attorneys in matters where the United States has an interest was announced as next in order.

Mr. McKELLAR (and other Senators). Let that go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 509) to prevent the use of Federal offices or patronage in elections and to prohibit Federal officeholders from misuse of positions of public trust for private and partisan ends was announced as next in order.

Mr. ROBINSON. Let that go over.

The VICE PRESIDENT. The bill will be passed over.

PREVENTION OF LYNCHING

The bill (S. 24) to assure to persons within the jurisdiction of every State the equal protection of the laws by discouraging, preventing, and punishing the crime of lynching was announced as next in order.

Mr. McKELLAR (and other Senators). Let that bill go over.

Mr. COPELAND. Mr. President, I wish the Senators would withhold their objections for a moment until I may say a word.

Mr. McKELLAR. I withhold the objection.

Mr. COPELAND. I think this bill, the antilynching bill, ought at some time to have a vote of the Senate. Regardless of what its fate may be, it is only right, as I view the matter, that there should be an opportunity to vote upon it.

From my State I have insistent demands that something be done regarding this bill. Regardless of how I may feel about it personally, I think it is only right that before the end of the session there shall be an opportunity to have a vote on a matter so important as this.

Mr. LEWIS. Mr. President, may I be pardoned if I ask the Senator from New York whether it would not be appropriate at least that some action be taken looking to setting a special time for the consideration of the bill?

Mr. SMITH. No.

Mr. McKELLAR. Let the bill go over.

Mr. KING. Over.

Mr. LEWIS. Mr. President, I am propounding a query.

Mr. COPELAND. I hope Senators will bear with me a moment until I answer the Senator from Illinois. I think it would be wise to have the bill made a special order.

Mr. ROBINSON. Mr. President, this bill was brought forward during the last session, and was discussed for a great many days. I am satisfied that it would not be practicable to take it up again during the present session.

The PRESIDENT pro tempore. Objection having been made, the bill will be passed over.

BILLS PASSED OVER

The bill (S. 1452) providing for the employment of skilled shorthand reporters in the executive branch of the Government was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 87) to prevent the shipment in interstate commerce of certain articles and commodities, in connection with which persons are employed more than 5 days per week or 6 hours per day, and prescribing certain conditions with respect to purchases and loans by the United States, and codes, agreements, and licenses under the National Industrial Recovery Act was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1460) to fix standards for till baskets, climax baskets, round stave baskets, market baskets, drums, hampers, cartons, crates, boxes, barrels, and other containers for fruits or vegetables, to consolidate existing laws on this subject, and for other purposes, was announced as next in order.

Mr. CLARK and Mr. BURKE. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

REFINANCING OF FARM INDEBTEDNESS

The bill (S. 212) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a board of agriculture to supervise the same, was announced as next in order.

Mr. McKELLAR and Mr. KING. Let that go over.

Mr. FRAZIER. Mr. President, I wish, if I may, to make a statement of a minute or two on this bill.

This is the companion bill of the one which at the present time is before the House of Representatives, the unfinished business of that body, known as the Frazier-Lemke refinancing bill.

The statement has been repeatedly made that the bill is radical, and something new. It provides for issuing farmland bonds bearing 1½-percent interest. It provides that the bonds shall not be sold for less than their face value. It provides that if they cannot be sold for their face value, the bonds shall be turned over to the Federal Reserve Board, and the Federal Reserve bank shall issue Federal Reserve currency to the face value of the bonds, backed by the bonds and also backed by first mortgages on the lands to be mortgaged, which are to be refinanced under the terms of the bill. In other words, the new money issued will be backed not only by the bonds but by first mortgages on the land that raises the food products to feed the Nation. Under the present law Federal Reserve notes are backed by Government bonds.

It has also been stated that the bill is inflationary. I desire to call attention to some figures which were submitted a short time ago to the Senate Committee on Agriculture and Forestry. They were compiled by Lewis B. Ward. He has a table in the little booklet he has prepared, showing the credit curtailment in the check-book credit accounts of the banks throughout the Nation by States. The total curtailment of bank credits from 1929 to 1934 was $6,500,000,000. That was the curtailment or deflation of bank credits from 1929 to 1934. If the $3,000,000,000 of new money that is provided for in this refinancing bill is all issued at one time, it will be less than 50 percent of the deflation which has taken place in the curtailment of our bank credits since 1929. In other words, it would be a reflation of less than 50 percent of the deflation since 1929.

Mr. President, I shall not now take more time to discuss the measure, but I desired to make that brief statement.

The PRESIDENT pro tempore. Objection having been made, the bill will be passed over.

DEVELOPMENT OF MINERAL RESOURCES

The bill (S. 1476) to provide for unemployment relief through development of mineral resources; to assist the development of privately owned mineral claims; to provide for the development of emergency and deficiency minerals, and for other purposes, was announced as next in order.

Mr. VANDENBERG. Let that go over.

Mr. POPE. Mr. President, if the Senator will withhold his objection, I wish to make a few remarks about the bill.

This is an important bill. It could not be considered this morning, of course; but some time ago it received the unanimous approval of the Committee on Mines and Mining. It is my desire at an early date to discuss the bill, and, at as early a date as possible, to move that it be taken up by the Senate.

The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 476) relating to promotion of civil-service employees was announced as next in order.

Mr. McKELLAR. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1952) extending the classified executive civil service of the United States was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2405) to provide for a special clerk and liaison officer was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 916) to carry into effect the decision of the Court of Claims in favor of claimants in French spoliation was announced as next in order.

Mr. VANDENBERG. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 2583) establishing certain commodity divisions in the Department of Agriculture was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 379) to provide for the deportation of certain alien seamen, and for other purposes, was announced as next in order.

Mr. COPELAND. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

TRADE IN ARMS, AMMUNITION, ETC.

The bill (S. 2998) to control the trade in arms, ammunition, and implements of war was announced as next in order.

Mr. KING. Is any member of the committee present?

Mr. JOHNSON. Mr. President, I think the subject matter of the bill has already been taken care of in a bill which was passed.

The PRESIDENT pro tempore. This bill ought to be indefinitely postponed.

Mr. JOHNSON. I think that is the appropriate course. Because the subject matter has been heretofore taken care of, I move that the bill be indefinitely postponed.

The PRESIDENT pro tempore. Without objection, it is so ordered.

BILL PASSED OVER

The bill (S. 1632) to amend the Interstate Commerce Act, as amended, by providing for the regulation of the transportation of passengers and property by water carriers operating in interstate and foreign commerce, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, it is obvious that under the limitation of debate prescribed under the rule, this important bill could not be considered at this time. Let it go over.

The PRESIDENT pro tempore. The bill will be passed over.

NATIONAL PLANNING BOARD

The bill (S. 2825) to provide for the establishment of a National Planning Board and the organization and functions thereof, was announced as next in order.

Mr. KING. Let that go over.

Mr. COPELAND. Mr. President, will the Senator withhold his objection for just a moment?

Mr. KING. Mr. President, the objection has been withheld several times, and the Senator has made eloquent speeches in behalf of the bill. However, I shall withhold my objection again.

Mr. COPELAND. I am very much obliged to the Senator, because, if I had any eloquence, I should use it right now.

If there is one bill on the calendar that ought to be passed, it is this one. Some branch of the Government ought to be looking forward to the conservation of all of our natural resources—water power, the prevention of soil erosion, forestation, mineral wealth, and so forth—and this proposal is to permit one of the worth-while emergency bodies to go forward.

Senators know that I have been opposed to most of these emergency operations, but here is one which I think has been of tremendous value to our country; and some agency of the Government ought to be at work all the time giving thought and study to the preservation of the natural resources of the country.

I wish the bill might be passed.

Mr. KING. I call for the regular order.

The PRESIDENT pro tempore. The regular order is called for, and the bill will be passed over.

BILLS PASSED OVER

The bill (S. 3072) to amend the Tariff Act of 1930, as amended, was announced as next in order.

Mr. COPELAND (and other Senators). Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

CHANGE OF NAME OF DEPARTMENT OF THE INTERIOR

The bill (S. 2665) to change the name of the Department of the Interior and to coordinate certain governmental functions was announced as next in order.

Mr. SMITH. Let that go over.

Mr. LEWIS. Mr. President, will the Senator indulge me 1 second? As to this particular bill, permit me to say that there is lying on the table another bill, the object of which is merely to change the name of the Department. I take the liberty of suggesting that that bill take the place of the bill now on the calendar, and then be left to take the ordinary course of measures on the general calendar.

I ask at this time merely the privilege of substituting on the calendar the bill providing only for the change of name in place of the pending bill, which has to do with other matters than the change of name.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. LEWIS. I yield to the Senator from New York.

Mr. COPELAND. As I understand, the other bill to which the Senator refers provides merely for the change of name, and not for the transfer of various activities, as this bill does.

Mr. LEWIS. The Senator is quite correct. It provides for a mere designation. I ask to have it take the place of this bill on the regular calendar, for subsequent debate or consideration when it shall be reached.

Mr. SMITH. Let this bill go over.

Mr. KING. I call for the regular order.

The PRESIDENT pro tempore. The bill will be passed over.

BILLS PASSED OVER

The bill (S. 2969) to authorize the deportation of criminals, to guard against the separation from their families of aliens of the noncriminal classes, to provide for legalizing the residence in the United States of certain classes of aliens, and for other purposes, was announced as next in order.

Mr. VANDENBERG. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1826) for the retirement of employees in the classified civil service to include employees in the legislative branch was announced as next in order.

Mr. VANDENBERG (and other Senators). Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 8555) to develop a strong American merchant marine, to promote the commerce of the United States, to aid in national defense, and for other purposes, was announced as next in order.

Mr. VANDENBERG, Mr. COPELAND (and other Senators). Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3420) to amend the Interstate Commerce Act, as amended, by providing for the regulation of the transportation of passengers and property by aircraft in interstate and foreign commerce, and for other purposes, was announced as next in order.

Mr. McKELLAR. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3393) to create a Federal Board of Foreign Trade was announced as next in order.

Mr. VANDENBERG. Let that go over.

Mr. SHEPPARD. Mr. President, permit me to say that I have introduced another bill on this subject, and the latter bill is now under consideration by the Committee on Foreign Relations.

The PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT OF GRAIN FUTURES ACT

The bill (H. R. 6772) to amend the Grain Futures Act to prevent and remove obstructions and burdens upon interstate commerce in grains and other commodities by regulating transactions therein on commodity futures exchanges, to limit or abolish short selling, to curb manipulation, and for other purposes, was announced as next in order.

Mr. KING. Let that go over.

Mr. SMITH. Mr. President, I should like to make a statement in reference to this bill.

There are now being prepared, and perhaps will be ready for consideration by the committee tomorrow, certain amendments to the Grain Futures Act pertaining to cotton. Therefore I ask that the bill go over, and I state that not later than Friday, at the outside, the amendments proposed will be perfected, and I hope we can then take the bill up and pass it.

The PRESIDENT pro tempore. On objection, the bill will be passed over.

BILLS PASSED OVER

The bill (S. 2003) to amend section 13 of the act of March 4, 1915, entitled "An act to promote the welfare of American seamen in the merchant marine of the United States; to abolish arrest and imprisonment as a penalty for desertion and to secure the abrogation of treaty provisions in relation thereto; and to promote safety at sea" was announced as next in order.

Mr. VANDENBERG. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3646) to repeal an act of March 3, 1933, entitled "An act to provide for the transfer of powder and other explosive materials from deteriorated and unserviceable ammunition under the control of the War Department to the Department of Agriculture for use in land clearing,

drainage, road building, and other agricultural purposes" was announced as next in order.

Mr. KING. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 3604) to place William H. Clinton on the retired list of the Navy was announced as next in order.

Mr. KING. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3113) to provide a government for American Samoa was announced as next in order.

Mr. McKELLAR. Mr. President, this appears to be an important matter, and I ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

DISPOSITION OF COTTON

The joint resolution (S. J. Res. 205) providing for disposition of certain cotton held by the United States was announced as next in order.

Mr. SMITH. Mr. President, I ask that this joint resolution go over, because later, on the calendar, there is a measure on the same subject which has been reported by the committee and has been recommended by the Department of Agriculture—a measure which is very important. So I ask that this joint resolution go over, and I will ask that the other measure be considered when it is reached.

The PRESIDENT pro tempore. On objection, the joint resolution will be passed over.

FRANCIS GERRITY

The bill (S. 3627) for the relief of Francis Gerrity was announced as next in order and was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Francis Gerrity shall be held and considered as having been honorably discharged from the military service of the United States as a private, Troop D, Fourth Regiment United States Cavalry, on December 16, 1901: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

Mr. McKELLAR. Over.

Mr. SHEPPARD. Mr. President, will the Senator withhold the objection?

Mr. McKELLAR. The Senator from Texas asks that the objection be withheld, and I withhold it a moment. However, I call the Senator's attention to the fact that this man was imprisoned by a civil court for pocket picking, and if he has been guilty of picking pockets, he should not be pensioned, it seems to me.

Mr. SHEPPARD. Mr. President, does the Senator never consider that a man may reform and lead an honest and upright life? Has the Senator ever advocated a pardon at the Department of Justice?

Mr. McKELLAR. Oh, yes; frequently. I ask the Senator whether there is testimony in the record to the effect that this man has reformed?

Mr. SHEPPARD. It appears that he has.

Mr. McKELLAR. Under those circumstances I will be glad to go into the matter, and allow the bill to be considered the next time the calendar is called, if the Senator desires to be heard.

Mr. SHEPPARD. Very well.

The PRESIDENT pro tempore. On objection, the bill will be passed over.

JESSIE S. POST

The bill (H. R. 3340) for the relief of Jessie S. Post was considered, ordered to a third reading, read the third time, and passed.

CHARLES E. WILSON

The Senate proceeded to consider the bill (S. 2041) for the relief of Charles E. Wilson, which was read, as follows:

Be it enacted, etc., That in the administration of any laws conferring rights, privileges, and benefits upon honorably discharged soldiers Charles E. Wilson, who was a member of Battery N, Fifth Regiment United States Artillery, shall hereafter be held and considered to have been honorably discharged from the military service of the United States as a private of that organization on the 20th day of September 1899: *Provided*, That no bounty, back pay, pension, or allowance shall be held to have accrued prior to the passage of this act.

Mr. KING. Mr. President, the report from the Secretary of War states that this man was discharged without honor, and the military record furnished by the Department shows that he served only about 5 months and 14 days, although he enlisted to serve for 3 years. It shows further that he was accepted by the authorities at the time of the enlistment while suffering from myopia. The record shows that he was discharged without honor on September 20, 1899, on the ground that he was affected with myopia and had a disease not incident to the line of duty. His record shows no combat service, but that he was in the service only a few months, being discharged on account of his physical condition. Let the bill go over.

Mr. SHEPPARD. Mr. President, I am sure the Senator from Utah would not object to having this man's record corrected. Certainly he should not have been discharged without honor on account of near-sightedness. He served in good faith, and he is certainly entitled to an honorable discharge, and that is all the bill provides for. The only thing against him was near-sightedness, and the Army accepted him knowing he had that defect.

Mr. KING. Is not the bill introduced for the purpose of enabling him to obtain a pension?

Mr. SHEPPARD. Not at all.

Mr. KING. Will that not be the result?

Mr. SHEPPARD. The Senator may offer an amendment that no benefits are to follow as a result of the enactment of the bill.

Mr. KING. If the Senator will present such an amendment, I will withdraw the objection.

Mr. SHEPPARD. Very well. I move to amend, on page 1, line 11, after the words "prior to", by inserting the words "or shall accrue subsequent to."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 3659) to promote the efficiency of the Judge Advocate General's Department of the Army was announced as next in order.

Mr. VANDENBERG. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3726) to provide suitable rank for the Deputy Chief of Staff, United States Army, was announced as next in order.

Mr. VANDENBERG. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

RECOMMITTAL OF BILL

The bill (H. R. 8588) to authorize the deposit and investment of Indian funds was announced as next in order.

Mr. THOMAS of Oklahoma. Mr. President, I ask unanimous consent that this bill be recommitted to the Committee on Indian Affairs.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and the bill is recommitted to the Committee on Indian Affairs.

BILL PASSED OVER

The bill (S. 3580) granting and confirming to the East Bay Municipal Utility District a municipal utility district of the State of California and a body corporate and politic of said State and a political subdivision thereof, certain lands, and for other purposes, was announced as next in order.

Mr. JOHNSON. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

MAJ. GEN. JOHNSON HAGOOD

The resolution (S. Res. 239) to investigate the circumstances attending the removal of Maj. Gen. Johnson Hagood

from command of the Eighth Army Corps Area was announced as next in order.

Mr. METCALF. Mr. President, I ask that the resolution be indefinitely postponed.

The PRESIDENT pro tempore. Without objection, the resolution is indefinitely postponed.

BILLS AND JOINT RESOLUTION PASSED OVER

The bill (S. 70) for the relief of agriculture, the producers of livestock, and the producers of raw materials generally, and for other purposes, was announced as next in order.

Mr. VANDENBERG. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

The joint resolution (H. J. Res. 179) authorizing the President to present in the name of Congress a Navy Cross to J. Harold Arnold was announced as next in order.

Mr. McKELLAR. Let that go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

The bill (H. R. 9074) granting pensions to certain soldiers and sailors of the Regular Army and Navy, etc., and certain soldiers and sailors of wars other than the Civil War, and to widows and dependents of such soldiers and sailors was announced as next in order.

Mr. McKELLAR. If the Senator in charge of this bill is not present, I ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

RETIREMENT OF EMPLOYEES OF LEGISLATIVE BRANCH

The bill (H. R. 3044) to amend the act of May 29, 1930 (46 Stat. 349), for the retirement of employees in the classified civil service and in certain positions in the legislative branch of the Government to include all other employees in the legislative branch was announced as next in order.

Mr. VANDENBERG. Let the bill go over.

Mr. COPELAND. Mr. President, I ask the Senator from Michigan to withhold his objection for a moment.

Mr. VANDENBERG. Certainly.

Mr. COPELAND. This bill was heretofore under consideration by the Senate, as I understand, and the Senate adopted an amendment to it. Am I correct about that?

The PRESIDENT pro tempore. The amendment has not been agreed to by the Senate. The parliamentary situation is that the committee recommended that all after the enacting clause be stricken out and a substitute adopted.

Mr. KING. But objection was made.

Mr. COPELAND. The objection has been withdrawn for a moment, as I understand.

Mr. VANDENBERG. Temporarily.

Mr. COPELAND. The proposal is that the employees of the legislative branch may have exactly the same privileges as those enjoyed by all other employees of the Government. There is a persistent mistaken idea that somehow or other we are proposing to do more for the persons employed in the legislative branch than is being done for other employees of the Government. As a matter of fact, all other employees of the Government, when they retire, receive $30 a month as a contribution from the Government, plus contributions which they themselves make in addition to that, which are put out at interest. In that way they have the amount increased. I think it is eminently fair that those who for years have been in the legislative branch should have consideration, and should have this little stipend, which would amount to less than $1,000 a year for one who has been here for 20 years. I hope the Senator from Michigan will not press his objection.

The PRESIDENT pro tempore. Is objection made?

Mr. VANDENBERG. I object.

The PRESIDENT pro tempore. On objection, the bill will be passed over.

BILLS PASSED OVER

The bill (H. R. 10104) to aid in providing the people of the United States with adequate facilities for park, parkway, and recreational-area purposes, and to provide for the transfer of certain lands chiefly valuable for such purposes to States and political subdivisions thereof was announced as next in order.

Mr. ADAMS. Let that bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 4886) providing for the employment of skilled shorthand reporters in the executive branch of the Government was announced as next in order.

Mr. VANDENBERG. Over.

The PRESIDENT pro tempore. The bill will be passed over.

PHILIPPINE CURRENCY RESERVES

The bill (S. 3486) to repeal the act entitled "An act relating to Philippine currency reserves on deposit in United States" was announced as next in order.

Mr. ADAMS. Mr. President, the Senator from Maryland desires to be present when this bill is taken up, so I ask, in his absence, that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

BILL PASSED OVER

The bill (S. 3500) to develop a strong American merchant marine to promote the commerce of the United States, to aid national defense, and for other purposes, was announced as next in order.

Mr. COPELAND. Let that go over.

The PRESIDENT pro tempore. The bill will be passed over.

LIQUIDATION OF LOANS TO COTTON PRODUCERS

The joint resolution (S. J. Res. 242) authorizing and directing the Commodity Credit Corporation to facilitate the liquidation of loans to cotton producers was announced as next in order.

Mr. KING. Let that joint resolution go over.

Mr. SMITH. Mr. President, I am sure the Senator from Utah does not understand the situation. The Government has about 4,000,000 bales of what is known as the 12-cent loan cotton. A process of liquidation has been inaugurated, and farmers can repossess themselves of this cotton under certain conditions. It has now become apparent that if this amount of cotton is put on the market it will seriously affect the incoming crop. So the Committee on Agriculture and Forestry reported favorably this joint resolution, which provides that only a certain amount of cotton may be sold up to September 1.

I have received a letter from the Secretary of Agriculture endorsing the limitation proposed and the regulation prescribed by the very simple joint resolution.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. BARKLEY. Some weeks ago, when the committee favorably reported and the Senate passed the bill authorizing the increase of the capital stock of the Commodity Credit Corporation from $3,000,000 to $100,000,000 on the recommendation of the Reconstruction Finance Corporation, it was stated that that legislation would obviate the necessity for passing any additional legislation with respect to the disposition of the cotton in question.

Mr. SMITH. That is true, except as to the amount of cotton to be sold. If an unlimited amount of the cotton in question can be sold, the new crop coming in will suffer by virtue of that additional cotton placed upon the market. The Secretary of Agriculture in writing to me said in the last paragraph of his letter:

> With the suggestions heretofore made, it is believed that Senate Joint Resolution 242 embodies a sound program for the orderly disposition of these stocks of cotton. Furthermore, as has been heretofore indicated, while authorization to adopt such a plan is inherent in general laws already enacted, it is the opinion of this Department that it would be desirable to obtain more definite and specific authorization from the Congress.

The bill does not affect the first matter at all. It has nothing to do with that except that the bill limits the amount of cotton which may be sold over certain markets;

not the current crop markets. Seven hundred and fifty thousand bales could be sold up to the first of September.

Mr. BARKLEY. It was represented that the increase in the capital stock of the Commodity Credit Corporation would enable the corporation to take care of the situation.

Mr. SMITH. The increase in capital stock was made to enable it to take care of the oversupply of cotton.

Mr. BARKLEY. The bill increasing the capital stock had relationship to the gradual placing on the market of the cotton held. Will this joint resolution interfere with that purpose?

Mr. SMITH. In no way whatever. As the Secretary of Agriculture indicated, the measure prescribes how much cotton may be sold up to the beginning of incoming new crop. That is all there is to it.

Mr. KING. Mr. President, I regret to have to differ from my dear friend from South Carolina, whose knowledge of the cotton situation is very much greater, of course, than mine.

Mr. SMITH. Mr. President, I cannot hear what the Senator is saying.

Mr. KING. I said that I regretted exceedingly to have to differ from my dear friend from South Carolina, whose knowledge of the cotton question exceeds by a great deal that which I possess. Some objection against the bill has been lodged with me. I shall have no objection if later on the Senator can secure consent to the bill being taken up.

Mr. SMITH. I am afraid my friend has this bill confused with another bill.

Mr. KING. No; Mr. President, I have not.

Mr. SMITH. What objection has the Senator to the bill?

Mr. KING. I insist on the objection, and ask for the regular order.

The PRESIDENT pro tempore. The regular order is called for. The bill will be passed over.

MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION

The Senate proceeded to consider the bill (S. 4105) authorizing the Secretary of Agriculture to convey certain lands to the Maryland-National Capital Park and Planning Commission, of Maryland, for park purposes, which had been reported from the Committee on Agriculture and Forestry, with amendments, on page 1, line 8, after the word "all", to insert "or such part or parts"; on the same page, line 9, after "land", to insert "as may now or hereafter be designated by the National Capital Park and Planning Commission"; and on page 5, line 9, before "purposes", to insert "parkway, or playground", so as to make the bill read:

Be it enacted, etc., That the Secretary of Agriculture be, and he is hereby, authorized and directed to convey by a good and sufficient deed to the Maryland-National Capital Park and Planning Commission, a public agency created by the General Assembly of Maryland, chapter 448 of the laws of the 1927 session of said assembly, all or such part or parts of the following pieces or parcels of land as may now or hereafter be designated by the National Capital Park and Planning Commission situate, lying, and being in Montgomery County, in the State of Maryland, being a part of a tract of land called Oatland, designated and described as follows: Beginning for the same at a point at the end of 631.62 feet measured on the last line of a conveyance made the 13th day of December 1855, by John Davidson and wife to James H. Davidson for 60 acres 1 rood and 23 square perches of land, more or less, a part of said tract, it being where said line is intersected by a line of fence running southward from said point and with the last line of the aforesaid conveyance north 87¼°, west 73.93 perches, to a large post and stone; thence with the first line of said conveyance with 3°35′ allowance for west variation and running with the fence south 40.1′, west 71.32 perches; thence with the second line with 3¼° allowance for west variation, running with the fence south 77°, east 26½ perches, to a stake; then north 3½°, west 28¾ perches, to the division fence of the experimental station; thence with said fence south 87¼°, east 75.67 perches; then still with the line of fence north 3½°, east 7.81 perches; thence to include a small piece of land running through a house and bisecting a pear tree south 87¼°, east 20.3 perches, to a stake in the first aforesaid line of fence running southward from the place of beginning; thence with said fence north 3°, west 26.15 perches, to the place of beginning, containing 20 acres of land, more or less, being all of the same land and premises described in and conveyed by deed from Henry Bradley Davidson and Mary S. P. Davidson to the United States of America, dated July 5, 1899, recorded July 7, 1899, among the land records for said Montgomery County in Liber T. D. No. 8, folio 429, and the following; also all that tract or part of tract of land situate in said Montgomery County called Friendship, or by whatever name or names the same may be known, contained within the metes and bounds, courses, and distances following, to wit: Beginning for the same at a stone at the end of 1,432.67 feet on the twelfth line of a conveyance made the 10th day of February in the year 1863 by William Peters to Allison Naylor for parts of tracts of land called Pritchett's Purchase and Friendship, containing 161 acres, more or less, and running thence with the twelfth line of said conveyance south 2°3′, west 642.2 feet, to a stake on the east side of the branch; still with the outlines of said conveyance south 29°, east 227.7 feet, to a point where formerly stood a bounded white oak tree marked for Batemans corner in the division line of the land of John Davidson and the land formerly owned by Charles King; then with said division line reversed south 35°32′, west 1,419 feet, to the end of the seventeenth line of Friendship; then with said seventeenth line reversed north 23°25′, west 1,538.12 feet, to a stake; then leaving the outlines and running across said conveyance north 66°35′, east 1,469.58 feet, to the place of beginning, containing 34.09 acres of land; excepting, however, 4.09 acres of land heretofore conveyed by Elizabeth Jane Wilson and others to the Metropolitan Southern Railroad Co. on the 10th day of July in the year 1890 by deed of that date recorded among the land records of Montgomery County, Md., in Liber J. A. No. 19, folio 450, and the following, leaving the quantity of land hereby intended to be conveyed to contain 30 acres of land, more or less, being all of the same land described in and conveyed by deed from Elizabeth J. Wilson, Robert Wilson, and others to the United States of America, dated August 11, 1902, recorded December 18, 1902, among the land records for said Montgomery County in Liber T. D. No. 24, folio 224, and the following to be used exclusively for public-park, parkway, or playground purposes. If the said Maryland-National Capital Park and Planning Commission fails to use such lands for the purposes herein provided, or at any time discontinues the use of such lands for the purposes herein provided, or attempts to alienate such lands, title thereto shall revert to the United States of America.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Secretary of Agriculture to convey certain lands to the Maryland-National Capital Park and Planning Commission, of Maryland, for park, parkway, and playground purposes."

ROSCOE M'KINLEY MEADOWS

The bill (S. 3715) for the relief of Roscoe McKinley Meadows was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That in the administration of the Emergency Officers' Retirement Act of May 24, 1928, Roscoe McKinley Meadows shall be held and considered to have served as an officer of the Navy of the United States during the World War other than as an officer of the Regular Navy.

MRS. E. L. BABCOCK

The bill (H. R. 2119) for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor, was announced as next in order.

Mr. ROBINSON. Mr. President, will the Senator from Nebraska [Mr. BURKE], who reported this bill, explain its provisions? Apparently there is an adverse report by the War Department. I think the bill had better go over, and I ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. ROBINSON subsequently said: Mr. President, having just come from a conference into the Senate Chamber, I was informed that the calendar number under consideration a moment ago was 1856. I have no objection to the consideration of Calendar No. 1840, being House bill 2119. The claim involves only $58. I have no objection to its consideration.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill (H. R. 2119) for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor, was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 5867) for the relief of E. C. Willis, father of the late Charles R. Willis, a minor, was announced as next in order.

Mr. McKELLAR. Mr. President, that is a bill which the Department opposes, and I ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

JOSEPH J. BAYLIN

The bill (H. R. 8089) for the relief of Joseph J. Baylin was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 6719) to amend the Canal Zone Code was announced as next in order.

Mr. WHITE. I ask that the bill be passed over.

Mr. ROBINSON. Mr. President, this is an important bill. If it is to be considered, there should be some discussion of the bill.

Mr. COUZENS. The Senator from Maine [Mr. WHITE] asked that the bill be passed over.

Mr. DUFFY. In the absence of the Senator from Oklahoma [Mr. GORE] I have been asked to look after this and other bills which have been favorably reported from the Committee on Interoceanic Canals. There will be some discussion of the bill. I do not think we can take it up under the 5-minute rule. However, at the first opportunity I shall attempt to bring it before the Senate for discussion.

The PRESIDENT pro tempore. The bill will be passed over.

THOMAS MARINE RAILWAY CO., INC.

The Senate proceeded to consider the bill (H. R. 4148) for the relief of the Thomas Marine Railway Co., Inc., which had been reported from the Committee on Claims with an amendment, on page 1, after "United States", to strike out "Lighthouse Service" and to insert in lieu thereof "Quartermaster Corps", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Thomas Marine Railway Co., Inc., the sum of $974, such sum being in full settlement of all claims against the Government. The said Thomas Marine Railway Co., Inc., sustained damages to the extent of $974 due to negligent handling of the United States Quartermaster Corps tug *Sprigg Carroll* by United States Coast Guard patrol boats *CG–232* and *CG–196* on April 22, 1932, at Morehead City, N. C., while in possession of the Thomas Marine Railway Co., Inc., enroute Fort Moultrie, S. C. to Norfolk, Va., for repairs: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILLS PASSED OVER

The bill (S. 2609) for the relief of Charles G. Johnson, State treasurer of the State of California was announced as next in order.

Mr. JOHNSON. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 8039) for the relief of John B. Meisinger and Nannie B. Meisinger was announced as next in order.

Mr. McKELLAR. Mr. President, may we have an explanation of that bill? The Senator in charge of the bill does not seem to be present in the Chamber at the moment, and I ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

JOHN L. SUMMERS AND OTHERS

The bill (S. 3075) for the relief of John L. Summers, former disbursing clerk, Treasury Department, and various former Treasurers of the United States was announced as next in order.

Mr. McKELLAR. Mr. President, may we have an explanation of that bill?

Mr. TOWNSEND. Mr. President, the bill was introduced by the senior Senator from North Carolina [Mr. BAILEY] for the relief of John L. Summers, former disbursing clerk, Treasury Department, and Frank White, G. F. Allen, H. T. Tate, and W. O. Woods, former Treasurers of the United States. This measure was introduced at the request of the Treasury Department, and it has been the custom, as I understand, to take care of similar matters in the way proposed by this bill.

Mr. McKELLAR. Mr. President, the sum involved is considerable.

Mr. TOWNSEND. Yes.

Mr. McKELLAR. What is the explanation of the need for the bill?

Mr. TOWNSEND. The accounts of John L. Summers show disallowances under various Treasury appropriations from December 10, 1925, to December 9, 1929, of $3,346.62, and from December 10, 1929, to December 9, 1933, of $90,615.45. Of this total, $86,440 represents an amount paid by him to the Consolidated Engineering Co. in connection with additional work on the Department of Commerce Building due to changes in plans and specifications. This payment was ratified by departmental action. The matter was referred to the Attorney General, who refused to prosecute because of ratification of payment by the Secretary of the Treasury. There is no evidence of any fault or negligence on the part of Summers in making payments covered by these disallowances over an 8-year period.

Mr. ROBINSON. Mr. President, may I ask, what is the recommendation and the report of the Treasury Department on the bill?

Mr. TOWNSEND. The Treasury Department requested the Senator from North Carolina [Mr. BAILEY] to introduce the bill.

Mr. McKELLAR. In other words, the Treasury says that these various Treasurers paid out sums wrongfully, for which they are being held, and the bill is to adjust the accounts so as to relieve the former Treasurers for their wrongful payments?

Mr. TOWNSEND. That is correct.

Mr. McKELLAR. That is the substance of the bill?

Mr. TOWNSEND. Yes.

Mr. McKELLAR. Have the various individuals named in the bill actually paid out the money?

Mr. TOWNSEND. Yes.

Mr. McKELLAR. Did the Committee on Claims go into the facts and ascertain whether they properly paid it?

Mr. TOWNSEND. I did not go into the question as carefully as I would have done had the Secretary of the Treasury not recommended the bill.

Mr. McKELLAR. The sums involved are very large. Suppose the Senator lets the bill go over until another call of the calendar, and I shall be glad to look into the matter.

Mr. TOWNSEND. Very well.

The PRESIDENT pro tempore. The bill will be passed over.

TOM ROGERS AND OTHERS

The Senate proceeded to consider the bill (H. R. 8262) for the relief of Tom Rogers, which had been reported from the Committee on Claims with an amendment to the title.

Mr. ROBINSON. Mr. President, I suggest that the Senator who reported the bill, or some Senator who is familiar with it, explain the measure.

Mr. GEORGE. Mr. President, I will be glad to make an explanation of the bill. Tom Rogers and the other persons named in this bill were employed under the Department of Agriculture on Blackbeard Island on biological-survey work. They were en route from the Georgia coast to Blackbeard Island, which lies off the coast, when they were shipwrecked, and some five of them were drowned. Tom Rogers was severely injured as a result of exposure for some 2 days before his final rescue.

Originally bills were introduced for each separate claimant, but by amendment they were consolidated, and, as will

be observed, there is an appropriation made by the House bill of $1,000 to Tom Rogers and then $2,000 to the heirs of W. A. Bell, who was foreman of the particular job, and who was transporting these men across the sound from the mainland to the island daily or at stated periods to carry on the work. Appropriations are also provided for the heirs of the other victims.

The bill is recommended by Secretary Wallace, who expresses rather strongly the conviction that the payment should be made to the heirs of the five drowned employees or workmen.

Mr. McKELLAR. Mr. President, I have no objection to the bill.

The PRESIDENT pro tempore. If there be no objection, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Tom Rogers the sum of $1,000; to the heirs of W. A. Bell the sum of $2,000; to the heirs of Israel Walker the sum of $1,000; to the heirs of Henry Shaw the sum of $1,000; to the heirs of Thomas Bailey the sum of $1,000; and to the heirs of Joseph Watson the sum of $1,000; in all, $7,000, in full settlement of all their claims against the United States for injuries sustained by said Tom Rogers, and for the death by drowning of said W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson, as a result of being shipwrecked on October 21, 1934, while en route to Blackbeard Island, Ga., to take up their duties as employees of the Bureau of Biological Survey, United States Department of Agriculture: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The title was amended so as to read: "An act for the relief of Tom Rogers, and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson."

ONE HUNDREDTH ANNIVERSARY OF INDEPENDENCE OF TEXAS

The Senate proceeded to consider the bill (S. 3721) to provide for a change in the design of the 50-cent pieces authorized to be coined in commemoration of the one hundredth anniversary of the independence of the State of Texas, which had been reported from the Committee on Banking and Currency with an amendment to strike out all after the enacting clause and insert:

That for the purpose of carrying out the provisions of the act entitled "An act to authorize the coinage of 50-cent pieces in commemoration of the one hundredth anniversary in 1936 of the independence of Texas, and of the noble and heroic sacrifices of her pioneers, whose revered memory has been an inspiration to her sons and daughters during the past century", approved June 15, 1933, the Director of the Mint, with the approval of the Secretary of the Treasury, is authorized and directed to provide for the coinage of not to exceed 1,000,000 silver 50-cent pieces of standard size, weight, and composition and of a special appropriate single design to be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, but the United States shall not be put to the expense of making the necessary dies and other preparations for this coinage. The coins herein authorized shall be issued only to the American Legion Texas Centennial Committee of Austin, Tex.

SEC. 2. For the purpose of carrying out the provisions of the act entitled "An act to authorize the coinage of 50-cent pieces in commemoration of the one hundredth anniversary of the admission of the State of Arkansas into the Union", approved May 14, 1934, the Director of the Mint, with the approval of the Secretary of the Treasury, is authorized and directed to provide for the coinage of not to exceed 400,000 silver 50-cent pieces of standard size, weight, and composition, and of a special appropriate single design to be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, but the United States shall not be put to the expense of making the necessary dies and other preparations for this coinage. The coins herein authorized shall be issued only to the Arkansas Honorary Centennial Celebration Commission or its duly authorized agent.

SEC. 3. The coins herein authorized shall bear the date 1936, irrespective of the year in which they are minted or issued, shall be legal tender in any payment to the amount of their face value, and shall be coined at one of the mints of the United States to be designated by the Director of the Mint. Not less than 5,000 such coins shall be issued at any one time and no such coins shall be coined or issued after the expiration of 1 year after the date of the enactment of this act. Such coins may be disposed of at par or at a premium by the organizations to which they are issued, and the net proceeds shall be used by them in defraying the expenses incidental and appropriate to the commemoration of such events.

SEC. 4. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same; regulating and guarding the process of coinage; providing for the purchase of material and for the transportation, distribution, and redemption of coins; for the prevention of debasement or counterfeiting; for the security of the coins; or for any other purposes, whether such laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize additional coinage in commemoration of the one hundredth anniversary of the independence of the State of Texas and the one hundredth anniversary of the admission of the State of Arkansas into the Union."

BILLS PASSED OVER

The bill (S. 3143) for the relief of the Passaic Valley Sewerage Commission was announced as next in order.

Mr. KING. Mr. President, I should like to have an explanation of the bill. As the author of the bill is not present, I ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 3373) to credit the tribal funds of the Indians of the Fort Belknap Indian Reservation in Montana with certain sums expended therefrom for the purchase and maintenance of a tribal herd, and for the purchase of horses destroyed during a dourine epidemic was announced as next in order.

Mr. McKELLAR. Mr. President, I should like to have an explanation of the bill, and will ask that it go over.

The PRESIDENT pro tempore. The bill will be passed over.

HOLY CROSS MISSION HOSPITAL

The bill (H. R. 2467) for the relief of Holy Cross Mission Hospital, was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to pay, out of the Alaska Railroad special fund (U. S. C., title 48, sec. 306), the sum of $50 to the Holy Cross Mission Hospital, of Holy Cross, Alaska, for hospital services rendered to Jack Mort for injuries and illness incurred while removing mail from the Alaska Railroad steamer *Nenana*, in full payment of all claims against the United States for such services: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

BILL PASSED OVER

The bill (H. R. 3914) for the relief of Oscar Gustof Bergstrom was announced as next in order.

Mr. KING. Mr. President, Mr. McCarl, Comptroller General of the United States, says in regard to this bill:

I am constrained to recommend most urgently that favorable consideration be not given to the bill.

Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

R. D. STEPHENS AND VERA STEPHENS

The Senate proceeded to consider the bill (S. 3808) for the relief of R. D. Stephens and Vera Stephens, which had been reported from the Committee on Claims with amendments.

Mr. McKELLAR. Mr. President, may we have an explanation of the bill?

Mr. DUFFY. Mr. President, this bill was held up at my own request the last time the calendar was considered, because the committee arbitrarily reduced the amount of damages that a jury in the Federal court in the western district of Wisconsin had allowed these claimants. There was no question about the claim. The investigation showed that there was clear negligence on the part of the Government employee. I talked to some members of the committee, and though there did not seem to be any good reason why the committee reduced the amount which the jury had awarded, yet I thought perhaps it would save time and get something for these claimants to let the bill go through as recommended by the committee.

Mr. McKELLAR. How did the case get in the district court?

Mr. DUFFY. In order to determine the amount of damages, the claimants sued the driver, who was financially irresponsible, and the jury in the Federal court determined the amount of damages the claimants suffered.

Mr. McKELLAR. The Senator is willing that the amount as reported by the committee be accepted at this time?

Mr. DUFFY. I objected the other day because I could not see any good reason why the amount was cut down, but since then, upon consideration, I have thought that I would be willing to let the bill go through carrying the amount the committee fixed.

Mr. McKELLAR. Very well.

The PRESIDENT pro tempore. If there be no objection to the consideration of the bill, the amendments reported by the committee will be stated.

The amendments reported by the Committee on Claims were, on page 1, line 5, after the word "Treasury", to strike out "not otherwise appropriated" and insert "allocated by the President for the maintenance and operation of the Civilian Conservation Corps"; on the same page, line 8, after the words "sum of", to strike out "$2,250" and insert "$1,000"; on the same page, line 9, after the words "sum of", to strike out "$5,000" and insert "$3,000"; and on page 2, at the beginning of line 5, to strike out "1935" and insert "1934", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, to R. D. Stephens, of Paxton, Ill., the sum of $1,000, and to Vera Stephens, wife of said R. D. Stephens, the sum of $3,000, such sums being in full satisfaction of their claims against the United States for damages arising out of property damage and personal injuries sustained by them when the automobile in which they were riding was struck by a Civilian Conservation Corps truck driven by Joseph L. Kindral near Virgin Lake, in Oneida County, Wis., on January 2, 1934: *Provided*, That no part of the amounts appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claims. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amounts appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claims, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FILING OF SUITS BY WORLD WAR VETERANS

The Senate proceeded to consider the joint resolution (S. J. Res. 200) to extend the period of suspension of the limitation governing the filing of suit under section 19, World War Veterans' Act, 1924, as amended, which had been reported from the Committee on Finance with amendments.

Mr. ROBINSON. Mr. President, I observe that this joint resolution was reported by the Senator from Georgia [Mr. GEORGE]. I ask him to explain the joint resolution.

Mr. GEORGE. Mr. President, the author of the measure is the senior Senator from Alabama [Mr. BLACK], who, I am sure, will be glad to explain it.

Mr. BLACK. Mr. President, this is a joint resolution which, if enacted, would prevent the Government from setting up the statute of limitations with reference to certain insurance claims of veterans. It is made necessary by reason of the fact that the rules and regulations adopted by the bureau, and which the bureau claims are necessary because of the law make it practically impossible and have made it practically impossible for veterans to sue on their claims without being successfully prevented from recovery by the statute of limitations. If a claim had been filed by a veteran, for instance, from the State of California, and that claim was passed upon 2 days before the expiration of the last day for passing upon the claim, it was necessary for the veteran to file a suit in the courts of California within 2 days of the time the claim was denied in the city of Washington. Hundreds of veterans have been prevented from having a trial on the merits of their policies by reason of this unjust statute of limitations.

This joint resolution is intended to give a veteran the right to file a suit within 90 days instead of requiring the impossible task of filing it within 1 or 2 days after the claim is denied in the city of Washington.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. BLACK. I yield to the Senator.

Mr. ROBINSON. In view of the statement made by the Senator from Alabama, and the explanation he has given, I have no objection to the consideration of the joint resolution.

The PRESIDENT pro tempore. If there be no objection to the consideration of the bill, the amendments reported by the Committee on Finance will be stated.

The amendments of the Committee on Finance were, on page 1, line 8, after the word "date", to insert "of the mailing of notice"; on the same page, line 9, after the word "suit", to strike out "as herein provided"; and, on page 2, line 13, after the word "record", to insert "*Provided further*, That the term 'denial of the claim' means the denial of the claim after consideration of its merit", so as to make the joint resolution read:

Resolved, etc., That in addition to the suspension of the limitation for the period elapsing between the filing in the Veterans' Administration of the claim under a contract of insurance and the denial thereof by the Administrator of Veterans' Affairs or someone acting in his name, the claimant shall have 90 days from the date of the mailing of notice of such denial within which to file suit. This resolution is made effective as of July 3, 1930, and shall apply to all suits now pending against the United States under the provisions of section 19, World War Veterans' Act, 1924, as amended; and any suit which has been dismissed solely on the ground that the period for filing suit has elapsed but wherein the extension of the period for filing suit as prescribed herein would have permitted such suit to have been heard and determined may be reinstated within 90 days from the date of enactment of this resolution: *Provided*, That on and after the date of enactment of this resolution notice of denial of the claim under a contract of insurance by the Administrator of Veterans' Affairs or someone acting in his name shall be by registered mail directed to the claimant's last address of record: *Provided further*, That the term "denial of the claim" means the denial of the claim after consideration of its merits.

The amendments were agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 3879) for the relief of James W. Grist was announced as next in order.

Mr. KING. I ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

D. E. WOODWARD AND MRS. MURRAY A. HINTZ

The Senate proceeded to consider the bill (S. 2114) for the relief of D. E. Woodward and Mrs. Murray A. Hintz, which had been reported from the Committee on Claims with amendments.

Mr. McKELLAR. Mr. President may we have an explanation of the bill by the Senator from Alabama?

Mr. BLACK. Mr. President, I shall be glad to explain these bills.

Mr. McKELLAR. There seem to be several of the same nature.

Mr. BLACK. The clerk has evidently reported the bill embodying the two claims and not the individual bills, one for each claimant. It will be necessary, if the Senate concludes to pass favorably upon the report of the committee, to postpone indefinitely the two individual bills.

This bill was introduced by the Senator from New Mexico [Mr. HATCH]. It was brought about by reason of the injury of Mr. D. E. Woodward and Mrs. Murray A. Hintz in the State of New Mexico. Their injury resulted from the collision of an automobile in which they were riding with a C. C. C. truck. There can be no question from the facts of the case as to the negligence of the driver of the truck. It was not properly lighted so as to have a clear light at night. As a result the driver of the automobile in which Mrs. Hintz and Mr. Woodward were riding collided with the rear end of the truck, which, as I recall, had some iron pipes projecting from the rear.

Mr. McKELLAR. Were there any lights on the rear of the truck or any lights or flags on the pipes that extended from the rear?

Mr. BLACK. There are two of these cases, and I will have to look up to see which is which, but I will explain the bill to the Senator. In one of them the pipes were projecting out about 35 feet. It was unquestionably negligence to have the pipes projecting without having a light at the end of the pipes. In the other case there was a light on the truck, but it was completely obscured by reason of certain oil barrels on the truck. The undisputed evidence shows that the light was obscured.

Mr. KING. Mr. President, will the Senator yield?

Mr. BLACK. I yield to the Senator from Utah.

Mr. KING. The report submitted by Mr. Tugwell, Acting Secretary, states:

> All official reports show that Otero was partially under the influence of liquor—

Mr. BLACK. That report refers to the next bill.

Mr. KING. Oh (reading):

> Which is corroborated by the testimony of several witnesses. It is evident that he failed to see the truck on which rear lights and reflector were visible, or that he did not exercise proper care to avoid striking it.

Mr. BLACK. That is the next bill. The administrator recommended that the claimant be paid $255 instead of $5,000, and the committee made a favorable report for $255. With reference to the driver of the other truck, there was some question as to whether he was drinking. However, this recovery is not for the driver of the truck, but for two passengers, one being the wife of the driver.

Mr. KING. The wife of the man who was drinking?

Mr. BLACK. Yes. From my investigation of the facts I am convinced that the injury was not due to the fact that the man had had a drink, but was due to the fact that on a dark night, when it was raining, the truck, which was partly diagonally across the road, did not have proper lights upon it. It would seem to me the driver did an excellent job in endeavoring to escape danger after the situation was discovered. The injuries were very serious to both persons.

Mr. KING. What did the committee recommend?

Mr. BLACK. The committee in one case recommended $3,500 and in the other case $5,000.

Mr. McKELLAR. Were the two injured parties in the truck or in the automobile which collided with the truck?

Mr. BLACK. In the automobile which collided with the truck. Suppose I make a statement as to the injuries? In the Otero case, where $255 is allowed, the injury was the result of his own fault, perhaps, and but for the recommendation of the Department we might have been inclined not to pay anything. The injuries to Mrs. Hintz were reported as follows:

> Mrs. Hintz suffered severe lacerations of the face and head. She had probably had a concussion of the brain and fracture of the skull because her mind was still somewhat cloudy and her vision very much impaired. The vision of her eyes did not clear up completely during the entire time she was under my care. She had a bad fracture of the metatarsal bones of the right foot with considerable displacement. She had also a fracture of the thumb on her left hand. Due to the displacement of the metatarsal bones, Mrs. Hintz was not and probably never will be able to walk without considerable difficulty.

We recommended $5,000 for her.

Mr. McKELLAR. She was simply a passenger in the car?

Mr. BLACK. She was.

Mr. McKELLAR. Was she the wife of the driver of the car?

Mr. BLACK. Yes.

Mr. McKELLAR. On that statement of the facts I see no reason why the allowance should not be made.

Mr. BLACK. Mr. Woodward was only a passenger. Certainly even if there was any negligence which could be attributed to the driver, no negligence could be attributed to Mr. Woodward, and the $3,500 allowed is a very moderate allowance for the injuries he received.

The PRESIDING OFFICER. The amendments reported by the committee will be stated.

The amendments of the Committee on Claims were, on page 1, line 4, after the word "Treasury", to strike out the words "not otherwise appropriated, the sum of $5,000" and insert in lieu thereof the words "allocated by the President for the maintenance and operation of the Civilian Conservation Corps, the sum of $3,500"; and in line 8, to strike out the numerals "$10,000" and insert in lieu thereof "$5,000"; and at the end of the bill to insert a proviso, so as to make the bill read:

> *Be it enacted, etc.*, That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, the sum of $3,500 to D. E. Woodward, and the sum of $5,000 to Mrs. Murray A. Hintz, both of Raton, N. Mex., in full satisfaction of their claims against the United States for damages for personal injuries sustained by them on a State highway near Santa Fe, N. Mex., on September 23, 1934, when the car in which they were riding struck a Government truck attached to the Civilian Conservation Corps camp located in the vicinity of Santa Fe, N. Mex., such truck having been improperly parked on the highway: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. BLACK. In view of the passage of the joint bill I ask that Order of Business 2038 and Order of Business 2039, being, respectively, the bill (H. R. 6163) for the relief of Mrs. Murray A. Hintz, and the bill (H. R. 6258) for the relief of D. E. Woodward be indefinitely postponed.

The PRESIDENT pro tempore. Without objection, the two bills will be indefinitely postponed.

Mr. BLACK subsequently said: Mr. President, the House has passed House bill 6163, which is Calendar No. 2038, and House bill 6258, which is Calendar No. 2039. In order that we may act upon the House bills, I ask that the action of the Senate in passing Calendar No. 2034, Senate bill 2114, may be reconsidered.

Mr. McKELLAR. I think that is the proper way to deal with the matter. Then we can pass the other two individual bills, and that will not require the measure to go to the House.

The PRESIDING OFFICER. Without objection, the request to reconsider is agreed to.

Mr. BLACK. Now I ask that Senate bill 2114 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, the bill is indefinitely postponed.

Mr. BLACK. Now I ask that the action of the Senate in indefinitely postponing House bills 6163 and 6258 may be reconsidered.

The PRESIDING OFFICER. Without objection, that order will be entered.

Mr. BLACK. Now I ask for the consideration and passage by the Senate of the two House bills as proposed to be amended by the Senate committee.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H. R. 6163) for the relief of Mrs. Murray A. Hintz, which had been reported from the Committee on Claims with an amendment, on page 1, line 5, after the word "Treasury", to strike out "not otherwise appropriated" and insert "allocated by the President for the maintenance and operation of the Civilian Conservation Corps", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, to Mrs. Murray A. Hintz, of Raton, N. Mex., the sum of $5,000. Such sum shall be in full settlement of all claims against the United States on account of damages sustained by the said Mrs. Murray A. Hintz when she was injured in an automobile collision with a United States owned truck near Santa Fe, N. Mex., on September 23, 1934: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The Senate proceeded to consider the bill (H. R. 6258) for the relief of D. E. Woodward, which had been reported from the Committee on Claims with an amendment, on page 1, line 5, after the word "Treasury", to strike out "not otherwise appropriated" and insert "allocated by the President for the maintenance and operation of the Civilian Conservation Corps", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any moneys in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, to D. E. Woodward the sum of $3,500. Such sum shall be in full settlement of all claims against the United States on account of damages sustained by the said D. E. Woodward when he was injured in an automobile collision with a United States owned truck near Santa Fe, N. Mex., on September 23, 1934: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

MANUEL D. A. OTERO, ADMINISTRATOR

The Senate proceeded to consider the bill (S. 2576) for the relief of Manuel D. A. Otero, as administrator of the estate of Teresita S. Otero, deceased, which had been reported from the Committee on Claims with amendments, on page 1, line 6, after the word "Treasury", to strike out the words "not otherwise appropriated, the sum of $15,000" and insert in lieu thereof the words "allocated by the President for the maintenance and operation of the Civilian Conservation Corps, the sum of $255.44"; and at the end of the bill to insert a proviso, so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Manuel D. A. Otero, as administrator of the estate of Teresita S. Otero, deceased, out of any money in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, the sum of $255.44. Such sum shall be in full settlement of all claims against the United States on account of the death of the said Teresita S. Otero, resulting from personal injuries received on the 16th day of January 1935, on United States Highway No. 60, between Willard and Mountainair, N. Mex., while riding in an automobile which collided with an improperly parked Government truck, attached to Civilian Conservation Corps Camp F–35–N, located about 3 miles southwest from Manzano, in Torrence County, N. Mex.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MEDICAL ADMINISTRATIVE CORPS

The Senate proceeded to consider the bill (S. 4390) to amend the National Defense Act relating to the Medical Administrative Corps, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and to insert in lieu thereof the following:

That the third sentence of section 24e of the National Defense Act, as amended by the act of June 4, 1920 (41 Stat. 759, 774), is hereby amended by striking out that portion relating to the qualifications for appointment in the Medical Administrative Corps, which reads, "enlisted men of the Medical Department between the ages of 21 and 32 years, who have had at least 2 years' service", and substituting therefor the following: "pharmacists between the ages of 21 and 32 years who are graduates of recognized schools or colleges of pharmacy requiring 4 years of instruction for graduation, under such regulations and after such examination as the Secretary of War shall prescribe: *And provided further*, That the number of such pharmacists in the Medical Administrative Corps shall not exceed 16."

Mr. KING. Mr. President, may we have an explanation of the bill?

Mr. SHEPPARD. Mr. President, at present those performing the duties of pharmacists in the Medical Administrative Corps are taken from among the enlisted men in the Medical Corps, and they have at first no special knowledge or technical qualifications to fit them for the work. The bill requires that before men shall hereafter be appointed to the position of pharmacist they must be graduates of recognized schools or colleges of pharmacy having 4-year courses. The bill adds nothing to the cost of administration but merely provides that as vacancies occur in the positions of pharmacists in the Medical Corps they shall be filled by men specially qualified as I have indicated. This will give the Army a group of pharmacists with thorough technical training and attainment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HOWARD HEFNER

The Senate proceeded to consider the bill (S. 3671) for the relief of Howard Hefner, which had been reported from the Committee on Claims with an amendment to insert a proviso at the end of the bill, so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Howard Hefner the sum of $5,000 in full settlement of all damages sustained by him as the result of permanent personal injuries inflicted upon him when, on May 26, 1935, the car which he, Howard Hefner, was driving on State Highway No. 11 was struck by a United States Forestry truck driven by one Grady Helton at a point on said highway about 1 mile north of Cleveland, Ga., and near a place

known as "Skeet's Place" on a deep curve on said highway, the said Howard Hefner being on his side of the road when the accident occurred: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. GEORGE. Mr. President, this bill was introduced by my colleague the junior Senator from Georgia [Mr. RUSSELL], who is absent on an official mission. I promised my colleague I would bring it to the attention of the Senate.

I find an adverse report from the War Department. The facts are gone into rather fully by the committee, and the evidence submitted in support of the bill is sharply conflicting on the question of negligence.

A truck in the Forestry Service was being driven along a Georgia highway, the truck having been assigned to a C. C. C. camp, when the claimant, who was riding in the opposite direction on the same highway, collided with the truck, or the truck collided with his car, and the injury which he suffered was sustained.

The War Department takes the position that an immediate investigation—that is, an investigation following immediately the accident—disclosed that the claimant himself was at fault, in that, coming around a curve, he ran into the side or rear wheel of the truck. The evidence submitted in opposition to that view shows that the claimant was on his own side of the road and had observed the rules of the road and the law of the road, and that the negligence and fault were on the part of the driver of the Forestry Service truck assigned to the C. C. C. camp, as I have already stated.

Mr. McKELLAR. Mr. President, may I ask the Senator from Georgia the extent of the injuries?

Mr. GEORGE. The injuries were most severe. I think there is no question of the amount carried in the bill being only adequate damages if there was negligence on the part of the Government or on the part of the driver of the C. C. C. truck. My colleague is very familiar with this particular matter. I think he has some very intimate knowledge of the facts of the case.

Mr. McKELLAR. I see a large number of affidavits were submitted. Do they set forth the negligence of the driver of the truck?

Mr. GEORGE. The evidence sustained the case on the part of the claimant. The Department in making its immediate investigation said that its finding should be against the claimant because there was no negligence on the part of the Government.

Mr. McKELLAR. I have no objection to the bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

EMMA GOMEZ

The Senate proceeded to consider the bill (S. 2575) for the relief of Emma Gomez, which had been reported from the Committee on Claims with amendments, on page 1, line 5, after the word "Treasury", to strike out the words "not otherwise appropriated" and insert in lieu thereof the words "allocated by the President for the maintenance and operation of the Civilian Conservation Corps"; in line 7, to strike out "$5,311.70" and insert "$500"; and, at the end of the bill, to insert a proviso, so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Emma Gomez, out of any money in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, the sum of $500. Such sum shall be in full settlement of all claims against the United States on account of damages for personal injuries sustained by the said Emma Gomez on the 16th day of January 1935, on United States Highway No. 60, between Willard and Mountainair, N. Mex., while riding in an automobile which collided with an improperly parked Government truck, attached to Civilian Conservation Corps Camp F-35-N, located about 3 miles southwest from Manzano, in Torrance County, N. Mex.: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

FORT FREDERICA NATIONAL MONUMENT

Mr. GEORGE. Mr. President, I ask unanimous consent to refer to Calendar No. 2079, House bill 8431, and I ask for its immediate consideration. This bill has not been reached on the calendar; but engagements in the Finance Committee and other official engagements make it necessary for me to leave the Chamber at this time.

I may say that the bill merely provides for the establishment of the Fort Frederica National Monument on St. Simon Island, Ga. It does not provide for any appropriation. The bill is amended as suggested by the Secretary of the Interior and is recommended by the Secretary of the Interior. It is in the usual form of bills establishing national monuments.

The bill authorizes the Secretary of the Interior to accept lands and property, of course, and to maintain a museum. It authorizes subsequent purchases of lands within the monument, but makes no appropriation; and such purchases, if made at all, would have to be made out of moneys subsequently appropriated to the Secretary.

The PRESIDING OFFICER (Mr. McGILL in the chair). Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill H. R. 8431, which had been reported from the Committee on Public Lands and Surveys with an amendment, in section 1, page 1, line 8, after the word "area", to insert "not to exceed 80 acres", so as to make the section read:

Be it enacted, etc., That when title to the site of Fort Frederica, on St. Simon Island, Ga., and such other related sites located thereon, as may be designated by the Secretary of the Interior, in the exercise of his discretion, as necessary or desirable for national-monument purposes, shall have been vested in the United States, said area, not to exceed 80 acres, shall be, and is hereby, set apart as a national monument for the benefit and inspiration of the people, and shall be called the "Fort Frederica National Monument."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

OLIVER FAULKNER

The bill (H. R. 8506) for the relief of Oliver Faulkner was considered, ordered to a third reading, read the third time, and passed.

CLAUDE CURTEMAN

The Senate proceeded to consider the bill (H. R. 8705) for the relief of Claude Curteman, which had been reported from the Committee on Claims with an amendment, on page 1, line 5, after the word "Treasury", to strike out "not otherwise appropriated" and insert "allocated by the President for the maintenance and operation of the Civilian Conservation Corps", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury allocated by the President for the maintenance and operation of the Civilian Conservation Corps, to Claude Curteman, of the city of Ontario, Calif., the sum of $1,876 in full settlement of all claims against the Government of the United States for all injuries sustained by him on April 1, 1934, when an automobile in which he was riding was in collision with a United States Government truck being carelessly and negligently operated by a member of the Civilian Conservation Corps: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BILL PASSED OVER

The bill (H. R. 9170) for the relief of Montie Hermanson was announced as next in order.

Mr. McKELLAR. Mr. President, may we have an explanation of that bill? If not, let it go over.

The PRESIDING OFFICER. The bill will be passed over.

FRANK CORDOVA

The bill (H. R. 9370) for the relief of Frank Cordova was considered, ordered to a third reading, read the third time, and passed.

H. L. & J. B. M'QUEEN, INC., AND JOHN L. SUMMERS

The bill (H. R. 9373) for the relief of H. L. & J. B. McQueen, Inc., and John L. Summers, former disbursing clerk, Treasury Department, was considered, ordered to a third reading, read the third time, and passed.

ROBERT J. MANN

The bill (H. R. 9455) for the relief of Robert J. Mann was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 11052) for the relief of Joseph M. Purrington was announced as next in order.

Mr. McKELLAR. May we have an explanation of that bill? In the absence of an explanation, let it go over.

The PRESIDING OFFICER. The bill will be passed over.

H. R. HEINICKE, INC.

The bill (H. R. 11346) for the relief of H. R. Heinicke, Inc., was considered, ordered to a third reading, read the third time, and passed.

R. R. PURCELL

The Senate proceeded to consider the bill (S. 949) for the relief of R. R. Purcell, which had been reported from the Committee on Claims with an amendment, on page 1, line 3, after the words "That the", to strike out "Administrator of Veterans' Affairs" and insert "Secretary of the Treasury", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Treasury be, and he hereby is, authorized and directed to pay to R. R. Purcell, of Helena, Mont., the sum of $86.06, in full satisfaction of his claim against the United States for expenses incurred in traveling from Breckenridge, Minn., to Fort Harrison, Mont., and return, pursuant to his appointment, on August 8, 1933, as a member of a special board of review of the Veterans' Administration at Fort Harrison, Mont., such R. R. Purcell being ineligible to serve thereon because of his appointment, prior thereto and unknown to him, as director of the National Reemployment Service in Montana.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, was announced as next in order.

Mr. KING. Mr. President, that bill cannot be discussed under this order of business.

Mr. VANDENBERG. That is too important a bill to be passed under this order. I suggest that it go over.

The PRESIDING OFFICER. The bill will be passed over.

PREVENTION OF COLLISIONS ON WATERWAYS

The Senate proceeded to consider the bill (H. R. 10308) to amend article 3 of the "Rules Concerning Lights, etc." contained in the act entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States", approved June 7, 1897.

Mr. McKELLAR. Mr. President, may we have an explanation of the bill?

Mr. WHITE. Mr. President, the bill is a very simple one. The present law as to lights on a vessel which is towing another vessel, or other vessels, does not require it to be indicated whether the tow is alongside or is astern of the vessel which is furnishing the motive power. The bill simply changes the law so that the lights will show whether the towed vessel is alongside or is astern.

Mr. McKELLAR. Will the bill provide better precautions against collisions?

Mr. WHITE. It is designed to remove some confusion which has existed under the present situation and to avoid some collisions of the kind that have occurred. It is recommended by the Department; and, so far as I know, no one has voiced any opposition to it.

Mr. McKELLAR. If the bill will help to avoid collisions, I am for it.

Mr. WHITE. I will say to the Senator that that is the purpose of the bill.

Mr. McKELLAR. Let it be passed.

The bill was ordered to a third reading, read the third time, and passed.

COMBINATION FISHING AND FREIGHTING LICENSE

The Senate proceeded to consider the bill (H. R. 11036) to amend section 4321, Revised Statutes (U. S. C., title 46, sec. 263), and for other purposes.

Mr. McKELLAR. Mr. President, I should like to have an explanation of the bill.

Mr. WALSH. Mr. President, I also should like a brief explanation of the bill. I am favorable to it, but I desire to have it explained.

Mr. WHITE. I can understand the interest of the Senator from Massachusetts, for the bill deals with a matter of some concern to fishermen and other interests on the coasts of his State and of concern to all who have coastwise trade and fisheries in their States.

Under a recent ruling of the circuit court of appeals, the law with respect to licenses was interpreted so that now a vessel licensed for the coastwise trade may not engage in the fisheries, and a vessel licensed for the fisheries may not engage in the coastwise trade. That is a recent decision of the circuit court of appeals, and is contrary to the long understanding and long practice heretofore. The bill simply amends the present law so that the license may be issued in the alternative, so that the vessel may engage in the fisheries or may engage in the coastwise trade, as it sees fit.

Mr. McKELLAR. Does the Department recommend the bill?

Mr. WHITE. The Department recommends it. The enactment of the bill will avoid delay; it will avoid expense to fishermen; it will avoid expense to those in the coastwise trade; and the Department has recommended it to the Congress.

The bill was ordered to a third reading, read the third time, and passed.

INCORPORATION OF VETERANS OF FOREIGN WARS

The bill (S. 4100) to incorporate the Veterans of Foreign Wars of the United States was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the following persons, to wit: James E. Van Zandt, Altoona, Pa.; Bernard W. Kearney, Gloversville, N. Y.; Scott P. Squyres, Oklahoma City, Okla.; Robert B. Handy, Jr., Kansas City, Mo.; Henry F. Marquard, Chicago, Ill.; William E. Guthner, Denver, Colo.; Edward J. Neron, Sacramento, Calif.; Dr. Joseph C. Menendez, New Orleans, La.; the Reverend Paul L. Foulk, Altoona, Pa.; Robert E. Kernodle, Kansas City, Mo.; Walter I. Joyce, New York City, N. Y.; George A. Ilg, Cranston, R. I.; James F. Daley, Hartford, Conn.; Charles R. Haley, Pittsburgh, Pa.; F. C. Devericks, Clarksburg, W. Va.; John J. Skillman, Miami, Fla.; Ellie H. Schill, New Orleans, La.; Gerald C. Mathias, Lagrange, Ind.; James W. Starner, Effingham, Ill.; Leon S. Pickens, Wichita, Kans.; Archie W. Nimens, Minneapolis, Minn.; Dr. Harvey W. Snyder, Denver, Colo.; Charles O. Carlston, San Francisco, Calif.; Walter L. Daniels, Seattle, Wash.; John E. Swaim, Tulsa, Okla.; Peter J. Rosch, Washington, D. C.; and their successors, who are, or who may become, members of the Veterans of Foreign Wars of the United States, a national association of men who as soldiers, sailors, and marines have served this Nation in wars, campaigns, and expeditions on foreign soil or in hostile waters, and such national association, are hereby created and declared a body corporate, known as the Veterans of Foreign Wars of the United States.

SEC. 2. That the said persons named in section 1, or their successors, and such other persons as are duly accredited delegates

from any local post or State department of the existing national association known as the Veterans of Foreign Wars of the United States, under its constitution and bylaws, are hereby authorized to meet and to complete the organization of said corporation, by the adoption of a constitution and bylaws, the election of officers, and to do all other things necessary to carry into effect and incidental to the provisions of this act.

SEC. 3. That the purposes of this corporation shall be fraternal, patriotic, historical, and educational; to preserve and strengthen comradeship among its members; to assist worthy comrades; to perpetuate the memory and history of our dead and to assist their widows and orphans; to maintain true allegiance to the Government of the United States of America and fidelity to its Constitution and laws; to foster true patriotism; to maintain and extend the institutions of American freedom; and to preserve and defend the United States from all her enemies, whomsoever.

SEC. 4. That the corporation created by this act shall have the following powers: To have perpetual succession with power to sue and be sued in courts of law and equity; to receive, hold, own, use, and dispose of such real estate, personal property, money, contract, rights, and privileges as shall be deemed necessary and incidental for its corporate purposes; to adopt a corporate seal and alter the same at pleasure; to adopt, amend, apply, and administer a constitution, bylaws, and regulations to carry out its purposes, not inconsistent with the laws of the United States or of any State; to adopt and have the exclusive right to manufacture and use such emblems and badges as may be deemed necessary in the fulfillment of the purposes of the corporation; to establish and maintain offices for the conduct of its business; to establish, regulate, or discontinue subordinate State and Territorial subdivisions and local chapters or posts; to publish a magazine or other publications, and generally to do any and all such acts and things as may be necessary and proper in carrying into effect the purposes of the corporation.

SEC. 5. That no person shall be a member of this corporation unless he has served honorably as an officer or enlisted man in the Army, Navy, or Marine Corps of the United States of America in any foreign war, insurrection, or expedition, which service shall be recognized as campaign-medal service and governed by the authorization of the award of a campaign badge by the Government of the United States of America.

SEC. 6. That said corporation may and shall acquire all of the assets of the existing national association known as the Veterans of Foreign Wars of the United States upon discharging or satisfactorily providing for the payment discharge of all its liabilities.

SEC. 7. That the said corporation shall have the sole and exclusive right to have and to use, in carrying out its purposes, the name Veterans of Foreign Wars of the United States and the sole and exclusive right to the use of its corporate seal, emblems, and badges as adopted by said corporation.

SEC. 8. That said corporation shall, on or before the 1st day of January in each year, make and transmit to the Congress a report of its proceedings for the preceding fiscal year, including a full and complete report of its receipts and expenditures: *Provided, however*, That said financial report shall not be printed as a public document.

SEC. 9. That as a condition precedent to the exercise of any power or privilege herein granted or conferred, the Veterans of Foreign Wars of the United States shall file in the office of the secretary of state of each State the name and post-office address of an authorized agent in such State upon whom legal process or demands against the Veterans of Foreign Wars of the United States may be served.

SEC. 10. That the right to repeal, alter, or amend this act at any time is hereby expressly reserved.

ACQUISITION OF LAND IN NEW YORK CITY

The bill (H. R. 10847) to authorize the acquisition of land for cemeterial purposes in the vicinity of New York City, N. Y., was considered, ordered to a third reading, read the third time, and passed.

BILLS PASSED OVER

The bill (S. 3041) to authorize the appointment of John Easter Harris as a major, Corps of Engineers, Regular Army, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 3405) for the relief of Capt. James W. Darr, was announced as next in order.

Mr. KING. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

ADDITIONAL CIRCUIT JUDGE, THIRD CIRCUIT

The Senate proceeded to consider the bill (S. 4457) authorizing the appointment of an additional circuit judge for the third circuit, which was read, as follows:

Be it enacted, etc., That the President of the United States is authorized and directed, by and with the advice and consent of the Senate, to appoint an additional circuit judge of the United States Circuit Court of Appeals for the Third Circuit, who shall possess the same powers, perform the same duties, and receive the same compensation as the present circuit judges of said circuit.

SEC. 2. That when a vacancy shall occur in the office of circuit judge for the third circuit, by the retirement, disqualification, resignation, or death of a circuit judge at present in commission, such vacancy shall not be filled, and thereafter there shall be but four circuit judges in the said circuit.

SEC. 3. That this act shall take effect upon its approval by the President.

Mr. GUFFEY. Mr. President, this measure authorizes the appointment of an additional circuit judge for the third circuit, a temporary appointment, which is made necessary by the severe illness of one of the three judges of the circuit. The circuit embraces New Jersey, Pennsylvania, and Delaware, and, owing to the sickness of one of the judges, Delaware has not been represented on this bench for a year. The judge who is ill desires to retire a year from next September, and I ask that the Senate pass this bill at this time in order to take care of the situation.

Mr. KING. Mr. President, will the Senator yield?

Mr. GUFFEY. I yield.

Mr. KING. Is it understood that this does not contemplate the addition of another judgeship?

Mr. GUFFEY. Absolutely. The bill is worded so as to take care of the contingency the Senator has in mind.

Mr. KING. I have no objection.

Mr. ASHURST. Mr. President, I call the attention of the Senator from Utah to the second paragraph of the bill we are now considering:

That when a vacancy shall occur in the office of circuit judge for the third circuit by the retirement, disqualification, resignation, or death of a circuit judge at present in commission, such vacancy shall not be filled, and thereafter there shall be but four circuit judges in the said circuit.

Mr. KING. Mr. President, I have no objection, but it seems to me that some provision ought to be made under the terms of which the Chief Justice of the United States might allocate from some other circuit a judge to serve temporarily when a judge is disqualified.

Mr. ASHURST. That is an excellent suggestion, and such action is taken in some instances.

Mr. COPELAND. Mr. President, I have no objection to the bill under consideration, but I desire to take this opportunity to say a word about the appointment of additional judges.

There is one very simple provision of law, the correction of which would take care of the difficulty in the situation of the northern judges. I refer to the provision relating to subsistence. There is now a provision of the general law fixing $5 a day as the allowance for subsistence of judges, and that is not sufficient. In the city of New York, for example, one cannot rent a single room in a hotel for $5 a day.

Mr. ASHURST. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. ASHURST. The Senator from New York is correct, as usual. The Senate Committee on the Judiciary has given its attention to the question he now raises.

It will be remembered that for years there was provided a sum not to exceed $10 a day for subsistence of a judge who went out of his district to hold court elsewhere, but about 10 years ago the sum of $10 a day for subsistence was reduced to $5 a day. Only yesterday the Senate Committee on the Judiciary, after careful consideration, by unanimous vote of the members present, ordered a favorable report on a bill providing that the maximum for subsistence when judges are called away from home shall be $10 a day, and not $5.

If I may be indulged further, it is known to every observing man that the judiciary of our country is being considerably criticized. Likewise the legislative branch of the Government is being criticized. Personally, I approve of the criticism of judges and of Congress. One of the most wholesome features of representative government is the right of the citizen to criticize his parliament, his legislature, his congress. Strange as it may seem, the right of the citizens to criticize their parliament or congress is an infallible index of a free people.

With regard to the judges, we are, as we should do, going to hold our Federal judiciary—I shall not say to a terrible accounting—but we should hold them to a strict accounting.

That is going to be done, and I approve, and I hope in a modest way to be a party thereto. But it is obligatory upon Congress, it is our duty, before we attempt to hold judges to a strict accounting as to behavior to see that they are adequately compensated; secondly, to see that they have proper clerical and stenographic help and sufficient help of all sorts, and that their salaries and retirement pay shall be secure. Then we should say to them, "Your Honors, you must have no social, no political, no financial ambition if you are to be judges of the United States."

I approve of these bills giving the judiciary adequate help, adequate pay, clerks, and stenographers, and I am glad to have the valuable assistance of the Senator from New York [Mr. COPELAND]. By the way, his colleague the junior Senator from New York [Mr. WAGNER] introduced the bill to increase the subsistence allowance, to which I referred.

Mr. COPELAND. Mr. President, I am glad to have heard what has been said by the distinguished chairman of the Committee on the Judiciary. There has been much discussion lately about the Federal court in the southern district of New York. As a matter of fact, there has been a vacancy in that court for years, and it could have been filled a year ago. If the vacancy had been filled, no doubt the calendar would have been up to date; but, as a matter of fact, there has been no help for those Federal judges in New York for several years because of the existing provision of law regarding subsistence. The situation could have been taken care of if the subsistence allowance had been raised to $10 a day.

We cannot ask judges from the South and from other sections of the country, who are dependent wholly upon their salaries, to come to a place like New York, where living costs are high, unless we provide a sufficient subsistence allowance, and $5 a day is not enough. As a matter of fact, the maintenance allowance of the New York Supreme Court justices when sitting outside their districts is $20 per day.

I observed a few days ago that the distinguished Chief Justice of the United States used the southern district of New York as an example of what ought to be done in the way of increasing the number of judges. As a matter of fact, with all deference to the great ability and high place of the Chief Justice, I fear he is mistaken about the southern district of New York. If the vacancy on the bench there had been filled, and if there had been the subsistence provision spoken of here, there would not have been any delay in clearing the calendar.

In that district one of the judges was sick for a long time, as in the case now before us, and that caused some congestion of the calendar. But, so far as I can see, there is at the present time no possible excuse for the appointment of additional judges and increasing the number in the southern district. If provision were made for increasing the subsistence allowance, I have no doubt at all that the court in the southern district of New York would catch up with the calendar.

The Chief Justice in his statement was mistaken regarding admiralty cases, also, when he said that, according to the press report I saw, the court was 2 years behind in disposing of admiralty cases. As a matter of fact, letters which I have from judges in New York indicate that suits in admiralty can be reached for trial within 4 or 5 days or a couple of weeks. One judge of the Federal court in the southern district said that "admiralty suits can be reached for trial a few days after they are at issue."

Let us not be misled in the matter of these judgeships. We should be very slow in imposing forever and ever upon the taxpayers of the United States the necessity of carrying the burden of additional judges when we can go along very well without them.

Mr. ASHURST. Mr. President, I do not know that I am in order, but the Senator's speech, although he is always fair, is hardly generous toward me, because, according to the record, he triumphed and defeated the effort I made to secure two additional Federal judgeships for the southern district of New York. So I believed that the Senator would be kind enough to withhold any galling reference to my defeat in that matter.

Mr. COPELAND. Mr. President, I would have no occasion to reflect at all upon the able Senator, who is one of the most generous and kindly persons in the world. But, of course, I was rather pleased when the amendment was withdrawn, and I hope yet that there will be no additions to the Federal bench in New York City.

Many splendid, fine men are applicants for the places which may be created, and I have no doubt they would make excellent judges if actually appointed and confirmed. But, in the last analysis, we all know how it is; politics may creep in, and we do not know just exactly what sort of men will be put upon the bench. Then, for life, or until charges are preferred and solemn impeachment proceedings gone forward with, every such man stays upon the bench. There is no more important or solemn act than the appointment of a Federal judge.

Mr. KING. Mr. President, I agree with what my friend from New York has said as to the improvident creation of new judicial districts or the appointment of additional judges. At the last session of Congress bills were passed creating additional Federal judgeships in a number of States. In my opinion, aside from one of the States, there was no necessity whatever for additional judgeships.

Unfortunately, when there is change in administration, too often demands are made for the creation of additional judicial districts and the appointment of additional judges, and throughout the United States we have loaded up the Federal courts with too many judges, in my opinion, and evidence has been brought to my attention showing that in some districts the judges are not as diligent in the prosecution of their work as they should be.

England, Scotland, and Wales have fewer judges, I am told, than are found in one of the States of our Union, and it is not one of the most populous States. The judges in Great Britain are men of character and of great ability, as are the judges here, but those judges have great executive ability, and they dispose of business with a rapidity which I commend to the judges of the United States.

Too many of our courts are clogged with bankruptcy proceedings and applications for receiverships, and I regret to say that from the evidence which has been taken it appears that the salaries and fees and compensation allowed the lawyers and commissioners and those who have charge of the bankruptcy proceedings have become scandalous. Some judges, in my opinion—and I say this with great reluctance, because of my high regard for the court—have been too generous in their allowance of fees to lawyers and to those who have had charge of estates. It seems to me that certain judges may get into trouble if the policy or practice of allowing such enormous fees shall be long continued.

Mr. ASHURST. Mr. President, I do not wish to continue the discussion of what we might call a "hang-over", but the defeated party is at least always allowed the poor privilege of venting such emotion as he may feel on the subject.

First, with regard to the southern district of New York, surely I do not need to advise the Senate that I have no interest whatever in the matter beyond a public interest. The judicial conference, provided for in the act of 1922, is composed of the Chief Justice of the United States, who presides over the conference, and the senior circuit judges of the 10 circuits. They make a report each year. In 1931, among other things, the conference recommended two additional district judges for the southern district of New York. In 1932 the judicial conference again recommended two additional district judges for the southern district of New York. In 1933 the judicial conference again recommended two additional district judges for the southern district of New York. In 1934 the judicial conference said, among other things, the following:

> The most serious congestion and delays are found in the southern district of New York and in the southern district of California, and this condition is caused by the failure to provide a sufficient number of judges.

In 1935 the judicial conference reported, in part, as follows:

The conference called attention last year to the serious congestion and delays that were found in the southern district of California and in the southern district of New York. In the former the average interval between joinder of issue and trial in ordinary course is about 18 months. But that situation has been met by the action of the Congress in providing for the appointment of two additional judges in that district.

Similar relief has not yet been provided for the southern district of New York, and relief there is most seriously needed. In this district the interval between joinder of issue and trial is found to be 22 months for civil jury cases, 23 months for suits in equity, and 27 months for suits in admiralty.

Mr. President, the following are my figures: The southern district of New York disposed in 1 year of 6,175 cases, employing the attention of eight judges. Some of them were required to come to the southern district and, as suggested by my able friend the Senator from New York [Mr. COPELAND], no judge of a district outside of New York City would be anxious to leave his home and try cases in New York City when the subsistence allowance was only $5 a day, for which sum he could hardly secure a room in a New York hotel. The judges in question each disposed of an average of 772 cases in 1 year.

I have now said all I should say or intend to say about the necessity for additional judges for the southern district of New York. The Senate acted after a debate which I considered able so far as the opponents of the measure were concerned, because I was vanquished and was unable to get the Senate to act favorably on my request. I have no sore spots. I simply did my duty as I saw it and believed it to be, and I beg my friend the Senator from New York to believe that, instead of being irritated I am proud rather of the fight I made. It is not a question of winning a fight in which you take part; it is, rather, a question whether you are profoundly convinced you are right. Results are not with us.

Mr. COPELAND. Mr. President, I should like to say to my able friend from Arizona that he did make a noble fight. It was a vigorous fight he made in behalf of his bill. He had what he thought to be the very best of reasons why there should be additional judges in the southern district of New York.

I do not know anything about the judicial conference or council. I am not of a profession which permits me to enter that body. But sometimes councils—even medical councils—are wrong, and in this case I am satisfied that the judicial conference made a mistake.

I wish I had known this discussion was coming up. I am going to quote some day from the judges themselves in the southern district of New York. I have every one of them on record. Some of them want the two additional judges. Some of them are insistent that provision should be made for them. There are others, however, who say, "No; we do not need them." So I want to say, in all good nature, that I am satisfied we do not need to commit ourselves to two more judges, which means $20,000 a year in salary; and with the clerk hire, equipment and furniture, and so forth, it would mean $40,000 or $50,000 a year. That is the interest on a million dollars forever and ever to be added to the burden of the taxpayers of the United States.

We do not need additional judges. If the relief is given which is suggested by the able Senator, the chairman of the Judiciary Committee, and the subsistence allowance raised, the southern district of New York will get along. There may be some brokenhearted politicians who will not get what they want; but suppose that should happen, at least the taxpayer will be saved from the burden, and, so far as justice is concerned, he will be duly served. I say to my friend that of course he was right, and he always is right, but the trouble was that the argument which was presented by the judicial conference was not well founded. They wrote the same report 4 or 5 years in succession, assuming that a certain condition must continue because it prevailed last year. However, anyone who makes a study of the situation in the southern district of New York as I have done must be convinced that no more judges are needed there. So I am rather pleased that the Senator from Arizona, the chairman of the Committee on the Judiciary, has so kindly a feeling over what he has considered to be a defeat. Nothing is a defeat when right is served.

Mr. ASHURST. Mr. President, it is one of the worst parliamentary defeats I have received in all my terms of service in the Senate. Another was the defeat in connection with the Boulder Dam. The Senator from New York also helped to inflict that defeat upon me, but I am, frankly, in good humor.

The PRESIDING OFFICER. The question is on the engrossment and third reading of Senate bill 4457.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 11690) relating to the admissibility in evidence of certain writings and records made in the regular course of business was announced as next in order.

Mr. JOHNSON. I ask that that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

ACTING HIGH COMMISSIONER TO THE PHILIPPINE ISLANDS

The Senate proceeded to consider the bill (S. 4340) to authorize the President to designate an Acting High Commissioner to the Philippine Islands, which was read, as follows:

Be it enacted, etc., That the President is hereby authorized, in his discretion, to designate a member of the staff of the United States High Commissioner to the Philippine Islands or an officer of the Army or Navy of the United States, to act as the High Commissioner in the event of a vacancy in said office, or the temporary disability or absence of the High Commissioner, and the official so designated shall have all the powers and perform all the duties of the High Commissioner during such vacancy, disability, or absence.

Mr. LEWIS. Mr. President, on the subject of Senate bill 4340, which we have now reached, I wish the Senate would do me the great courtesy of possibly permitting some addition of time to the 5 minutes given me to speak under the rule under which the Senate is now operating.

The bill under consideration has for its purpose to authorize the President to designate an Acting High Commissioner for the Philippine Islands. From my own point of view, I regard measures touching the Philippine Islands as involving very serious subjects at this particular time. I possibly depart from the views of many who have sought to interest themselves concerning the islands when I say I am utterly opposed to the policy my Government has assumed in wholly abandoning the Philippine Islands. I ask the Senate to hear me upon the suggestion for future consideration when this bill shall be further developed.

We have seen, sir, the movement in Ethiopia. Italy has moved up and become the possessor. The return day of what may be called, sir, imperial power has again unfolded itself in the world. I say to my colleagues as a suggestion of advancing history they shall now see the beginning of a completely new era, long contemplated, but just now hastily precipitated upon us by opportunity. Because of the precedent that the League of Nations has been powerless in any form to obstruct, much less to defeat, concerning the advance of a nation seeking to possess itself of available territory, and upon the basis of events that have just transpired touching Ethiopia, and allowed by the League of Nations in its failure of procedure, we shall behold, sir, that England will find a license to advance further in her colonizing conquest and take all of Egypt. We shall then see later, sir, the step by Holland, with the counsel of Germany, of moving forward as proprietor and consume all of Java.

Then, sir, you will observe in a very short while that Japan will see the temper of the times, particularly, as demonstrated, the futility of the League of Nations and its confession of abortive assumption and will feel that it is opportune to move on and up and take such remainder of China as England, with her sphere of influence in China, and France, with Indochina, will tolerate and permit by understanding and joint arrangement.

So as we move forward, Mr. President, it will be discovered that there is a new era when, as I see it, fellow Sena-

tors, the United States is going to be greatly imperiled in its situations of trade and independence as to Asia. I use the word "independence", meaning thereby its independence in its processes of protection of its interests. For myself, sir, I trust the able chairman of the Committee on Territories and Insular Affairs, the distinguished Senator from Maryland [Mr. TYDINGS], who lately has observed the situation personally, will pause to consider whether it were not wise to present this bill at a time when there can be debated fully, in view of revelations transpiring all around us, the subject whether this Government should not retreat from its previous act of generosity and hold where it must in the Orient such possessions either of territory or political influence as will enable it to protect itself in the future hour of danger and embarrassments as I see it now approaching.

It may be asked what do I mean, what shadow do I see? For myself, sir, I behold that as the nations go forward, rapidly consuming such available territory and such spheres of influence as they will be enabled to do, this United States will be made the object of discriminating and forcible ejection of its trade from any of these lands that have become powerful in developing their assets and their possessions.

Mr. President, as the matter stands, as I behold it, were we properly positioned in the Philippines to protect the commerce of the United States on the seas and had there, sir, a proper guardianship, we would be able to resent the efforts which will surely be made to eject us from the trade in Asia. Sirs, we will find that the two great nations that have large spheres of influence there—nations which are European and, naturally, our competitors—will be active in projecting an alliance with oriental countries, among other things, to bring about the exclusion of the United States from the opportunities of trade and to monopolize, so far as can be effected by agreement, the privileges of such trade to the few nations that have their spheres in Asia, recognized as privileged and superior.

Mr. President, with the United States out of the Philippines, and the Philippines out of our former possession, we are perfectly powerless, and, as everyone may see, we become unable to defend and protect our commerce unless we resort to such measures as will almost mean conflict; whereas in the Philippines under proper control we would have such representation of Navy in the waters and such representation of force on the land as would be, sir, a menace to those who would voluntarily seek to strike us from the trade and by discrimination deprive us of equal opportunity in the Asiatic sphere.

I, therefore, take the liberty to point out what I think I see the growing dangers to this country with a multiplication of the imperialistic power that is now possessing the world, and I dare now to suggest that the United States should hesitate to yield support for her privileges and her opportunities for her protection in Asia and in the field covered by the bill presented by the committee of which the able Senator from Maryland is chairman. I consider, instead of a high commissioner to be designated, that the United States should take some other action and create an agency that shall put itself in control of the Philippine Islands before their independence is wholly conceded, and this to the extent necessary to give us assurance of protection to our country in the event of the emergencies surely to arise there at the shores of Asia, where China and Japan join the Philippines.

I, therefore, take the liberty to suggest, as I see the evil and danger and what I see to be the march of events, that this important bill presented by the able Senator should be reserved for some occasion when the whole subject of our relations to Asia and the East may be revised, reconsidered, deliberated, and acted upon in an atmosphere of the perils such as I profess to behold.

I thank the Senate for letting me make these suggestions at this time.

Mr. TYDINGS. Mr. President, what the Senator from Illinois has said is worthy of much thought; but as to the bill which is now before the Senate, I believe the Senator has not had the opportunity which the committee has had to study its immediate relationship to the Filipino independence question. The Filipino independence bill provided for the appointment of a High Commissioner. That question, I may say to the Senator from Illinois, is not involved in the pending measure. All the pending bill seeks to do is to permit the President, in the absence of the High Commissioner, who is already appointed, to designate someone to sign papers for the routine operation of the Philippine Government in the interim.

Under present circumstances the High Commissioner, who, as I have said, has already been appointed, and who is Governor Murphy, may be called home because of sickness or may have to go to the hospital for an operation; any one of a number of imaginary possibilities may occur, in which event, as the law now is drawn, there would be no official in the Philippine Islands who could sign the papers necessary for the operation of the routine business.

All the pending bill proposes, I may say to my friend from Illinois, is in such emergency to permit the President to appoint someone who may act in the place of the High Commissioner until he returns to duty. The bill has nothing to do with the question of Filipino independence per se or with the appointment of the High Commissioner himself. It only deputizes someone to act in case of emergency.

I am sure that the Senator from Illinois would be the last who would want the American Government to have no representative in the Philippine Islands in the event the High Commissioner should be incapacitated, but unless this bill shall pass, our Government will be in even a worse position than that which he conjectures, for, if the High Commissioner were to be incapacitated, there would be no one in the islands representing the United States of America.

Mr. BORAH. Mr. President——

Mr. TYDINGS. I yield to the Senator from Idaho.

Mr. BORAH. We have never before had this particular officer. Does the bill provide for the creation of the office?

Mr. TYDINGS. No; I may say to the Senator there will be no new office created. The bill only provides that while the High Commissioner, which is the office created by the independence bill, is absent or incapacitated, the President may designate someone of the personnel to act in his behalf until the High Commissioner returns to his duty.

Mr. BORAH. There is no indication of any incapacity, is there?

Mr. TYDINGS. Well, Governor Murphy did come back to the United States about 2 years ago for medical treatment, and during that time, if he had been High Commissioner, there would have been a hiatus of 3 months when there would have been no official in the Philippine Islands who represented the United States Government The official designated is to function only in an emergency.

I do not think the Senator from Idaho has this in mind; but some people feel that if this bill shall be passed, Governor Murphy may come back and take part in the coming election, whereas if it is not passed Governor Murphy may have to remain in the Philippine Islands. I cannot believe that the Senate of the United States, with 13,000,000 people in the Philippines involved, is going to take such a small, political, narrow view as to provide that in an emergency the Government of the United States in the Philippine Islands may not have any representative. If there is any Senator who wants to take that view I wish he would rise now and assert it.

Mr. BORAH. That kind of an emergency did not present itself to me.

Mr. TYDINGS. I appreciate that.

Mr. BORAH. I really do not think the President is in great need of importing anybody for campaign purposes.

Mr. TYDINGS. I think that is correct.

I trust, therefore, with this brief explanation, that the gap in the present law may be closed, so that the United States at all times may have a representative in the Philippine Islands.

The PRESIDING OFFICER. If there be no objection to the consideration of the bill, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the President is hereby authorized, in his discretion, to designate a member of the staff of the United States High Commissioner to the Philippine Islands or an officer of the Army or Navy of the United States to act as the High Commissioner in the event of a vacancy in said office, or the temporary disability or absence of the High Commissioner, and the official so designated shall have all the powers and perform all the duties of the High Commissioner during such vacancy, disability, or absence.

BONDED INDEBTEDNESS OF MUNICIPALITIES IN ALASKA

The Senate proceeded to consider the bill (H. R. 8766) to authorize municipal corporations in the Territory of Alaska to incur bonded indebtedness, and for other purposes, which had been reported from the Committee on Territories and Insular Affairs with amendments.

The first amendment was, in section 1, page 1, line 4, after the word "authorized", to strike out "to incur bonded indebtedness for the construction, acquisition, extension, repair, or improvement of public works of a permanent character, including public utilities. The total outstanding bonded indebtedness of any such municipal corporation shall not" and insert "to construct, improve, extend, better, repair, reconstruct, or acquire public works of a permanent character and to incur bonded indebtedness and issue negotiable bonds for any or all of such purposes: *Provided, however,* That no municipal corporation shall incur a bonded indebtedness or issue its negotiable bonds under this act to an amount which, including existing bonded indebtedness shall"; and on page 2, line 6, after the word "municipal", to strike out "corporations: *Provided, however,* That nothing herein contained shall affect any bonded indebtedness heretofore incurred by a municipal corporation in said Territory" and insert "corporation. Such public work shall include but not be limited to streets, bridges, wharves and harbor facilities, sewers and sewage-disposal plants, municipal buildings, schools, libraries, gymnasia and athletic fields, fire houses, and public utilities", so as to make the section read:

That municipal corporations in the Territory of Alaska are hereby authorized to construct, improve, extend, better, repair, reconstruct, or acquire public works of a permanent character and to incur bonded indebtedness and issue negotiable bonds for any or all of such purposes: *Provided, however,* That no municipal corporation shall incur a bonded indebtedness or issue its negotiable bonds under this act to an amount which, including existing bonded indebtedness shall exceed 10 percent of the aggregate taxable value of the real and personal property within the corporate limits of such municipal corporation. Such public work shall include but not be limited to streets, bridges, wharves and harbor facilities, sewers and sewage-disposal plants, municipal buildings, schools, libraries, gymnasia and athletic fields, fire houses, and public utilities.

The amendment was agreed to.

The next amendment was, in section 3, page 3, line 4, after "Sec. 3", to strike out "All bonds so issued shall be serial in form and shall mature in not to exceed 30 years from the date of issuance thereof. Such bonds may" and insert "Bonds issued pursuant to this act shall"; in line 11, after the word "private", to strike out "sale and may be redeemable or nonredeemable (either with or without premium), and" and insert "sale, may be redeemable (either with or without premium) or nonredeemable"; at the beginning of line 16, to insert "and may be executed by such officers and in such manner"; in line 18, after the word "bonds", to insert "In case any of the officers whose signatures appear on the bonds or coupons shall cease to be such officers before delivery of such bonds, such signatures, whether manual or facsimile, shall, nevertheless, be valid and sufficient for all purposes, the same as if such officers had remained in office until such delivery"; and on page 4, line 1, after the words "per annum", to insert "payable semiannually", so as to make the section read:

SEC. 3. Bonds issued pursuant to this act shall bear such date or dates, may be in such denominations, may mature in such amounts and at such time or times, not exceeding 30 years from the date thereof, may be payable at such place or places, may be sold at either public or private sale, may be redeemable (either with or without premium) or nonredeemable, may carry such registration privileges as to either principal and interest or principal only, and may be executed by such officers and in such manner, as shall be prescribed by the governing body of the municipality issuing the bonds. In case any of the officers whose signatures appear on the bonds or coupons shall cease to be such officers before delivery of such bonds, such signatures, whether manual or facsimile, shall, nevertheless, be valid and sufficient for all purposes, the same as if such officers had remained in office until such delivery. The bonds so issued shall bear interest at a rate to be fixed by the governing body of the municipality issuing the same, not to exceed, however, 6 percent per annum, payable semiannually. All such bonds shall be sold for not less than the principal amount thereof plus accrued interest.

The amendment was agreed to.

The next amendment was, in section 5, page 4, line 12, after the word "conflict", to insert, "but nothing contained in this act shall affect any bonded indebtedness heretofore incurred or heretofore authorized by law. The powers conferred by this act shall be in addition and supplemental to and the limitations imposed hereby shall not affect the powers conferred by any other law", so as to make the section read:

SEC. 5. All acts and parts of acts in conflict herewith are hereby repealed to the extent of such conflict; but nothing contained in this act shall affect any bonded indebtedness heretofore incurred or heretofore authorized by law. The powers conferred by this act shall be in addition and supplemental to and the limitations imposed hereby shall not affect the powers conferred by any other law.

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

STATE OF CONNECTICUT

The bill (S. 4124) for the relief of the State of Connecticut was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to the State of Connecticut, out of any money in the Treasury not otherwise appropriated, the sum of $598,936.30 for and on account of advances and expenditures made by said State in the War of 1812 to 1815 with Great Britain, as found due by the Comptroller General of the United States under directions contained in Senate Resolution No. 67, Seventieth Congress, first session.

TALIESIN WATERS

The Senate proceeded to consider the bill (S. 4082) to authorize the presentation of a Congressional Medal of Honor to Taliesin Waters, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert in lieu thereof the following:

That the President is hereby authorized to cause the evidence on which the award of the Distinguished Service Cross was made to Taliesin Waters, formerly a first lieutenant, One Hundred and Seventh Regiment United States Field Artillery, for having distinguished himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty on September 6, 1918, near Basileux le Fismes, France, while under severe bombardment of gas, high explosives, and machine-gun fire, by administering aid to 36 wounded soldiers and by assisting in their removal to a place of safety, to be reviewed by the War Department to determine whether or not the award of a Congressional Medal of Honor in lieu of the Distinguishd Service Cross should be made, and if it is found that the Congressional Medal of Honor should be awarded, then such award is hereby authorized.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PLEAS SANDERS

The Senate proceeded to consider the bill (S. 4099) to authorize the award of the Congressional Medal of Honor for distinguished service to Pleas Sanders, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert in lieu thereof the following:

That the President is hereby authorized to cause the evidence on which the award of the Distinguished Service Cross was made to Pleas Sanders, formerly a sergeant, Company F, Thirtieth Infantry, United States Army, American Expeditionary Forces, for bravery in action near Cunel, France, October 10, 1918; for gallantry in action near Jaulgonne, France, July 26, 1918, to be reviewed by the War Department to determine whether or not the

award of a Congressional Medal of Honor in lieu of the Distinguished Service Cross should be made, and, if it is found that the Congressional Medal of Honor should be awarded, then such award is hereby authorized.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (S. 1636) to amend the Interstate Commerce Act, as amended, and for other purposes, was announced as next in order.

Mr. VANDENBERG. Let the bill go over.

The PRESIDING OFFICER. The bill will be passed over.

MERRITT-CHAPMAN & SCOTT CORPORATION

The Senate proceeded to consider the bill (S. 4542) authorizing the Comptroller General of the United States to settle and adjust the claim of the Merritt-Chapman & Scott Corporation, which had been reported from the Committee on Claims with amendments, on page 1, line 6, to strike out "$4,790.55" and insert in lieu thereof "$4,790.53", and on page 2, line 2, to strike out "$4,790.55" and insert in lieu thereof "$4,790.53", so as to make the bill read:

Be it enacted, etc., That the Comptroller General of the United States be, and he is hereby, authorized and directed to settle and adjust the claim of the Merritt-Chapman & Scott Corporation for an amount not exceeding $4,790.53 for services and material furnished at the request of the Secretary of the Navy under contract no. Nod–210, dated May 19, 1934, in connection with salvage of the steamship *Morro Castle*. There is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $4,790.53 for payment of the claim: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

HIGINIO ALVAREZ

The bill (S. 4556) authorizing an appropriation for the payment of the claim of Gen. Higinio Alvarez, a Mexican citzen, with respect to lands on the Farmers Banco, in the State of Arizona, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $20,000 of which amount $15,000 is to be paid to the Government of Mexico for the account of Gen. Higinio Alvarez in full settlement of his claim against the United States with respect to the ownership of lands on the Farmers Banco in the State of Arizona, and the remaining $5,000 is to be paid to the executors or administrators of the estate of R. E. Fishburn, deceased, in full settlement of such interest in the said Farmers Banco or the proceeds of the settlement therefor as was acquired by virtue of a grant to R. E. Fishburn dated January 6, 1927, signed by General Alvarez, or by the assignment by General Alvarez dated December 3, 1935, in favor of Mrs. R. E. Fishburn and other heirs of said R. E. Fishburn, or by both such grant and assignment, for distribution according to law: *Provided, however*, That no payment shall be made unless and until the Secretary of State shall have received from the Government of Mexico satisfactory assurances that no transfer, other than that specified herein, has been made by General Alvarez, or by anyone acting for or under him, or any part of his right, title, or interest in or to the property comprising the Farmers Banco, until the written opinion of the Attorney General shall be had in favor of the validity of the title, and until General Alvarez has given to the United States a quitclaim deed, in such form as may be deemed satisfactory to the Secretary of State, to all of his right, title, and interest in and to all of the land comprising the Farmers Banco claimed by him under an instrument of grant dated October 22, 1926, signed by the constitutional President of the United Mexican States, or otherwise.

BILL PASSED OVER

The bill (H. R. 5730) to amend section 3 (b) of an act entitled "An act to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaty signed at Washington February 6, 1922, and at London April 22, 1930, at the limit prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes", approved March 27, 1934, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The bill will be passed over.

Mr. WALSH. Mr. President, I ask to have printed in the RECORD at this point, for the information of the Senate, the report of the committee on the bill just passed over. I think if the report is read Senators will understand there is no change in principle involved, but the change is made in the administration of principle. I ask that the report be printed in the RECORD at this point.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

The Committee on Naval Affairs, to whom was referred the bill (H. R. 5730) to amend section 3 (b) of an act entitled "An act to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington, February 6, 1922, and at London, April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes", approved March 27, 1934, having considered the same, report it to the Senate with amendments with the recommendation that the bill do pass.

This bill deals only with section 3 (b) of the Vinson-Trammell Act, approved March 27, 1934, which is as follows:

"SEC. 3 (b). To pay into the Treasury profit, as hereinafter provided shall be determined by the Treasury Department, in excess of 10 percent of the total contract price, such amount to become the property of the United States: *Provided*, That if such amount is not voluntarily paid the Secretary of the Treasury may collect the same under the usual methods employed under the internal-revenue laws to collect Federal income taxes."

HISTORY OF SECTION 3 (B)

This section was not contained in the original Vinson-Trammell bill as introduced and reported by the House Naval Affairs Committee. It was offered as an amendment on the floor of the House and accepted by the chairman of the Naval Affairs Committee of the House. Later, this proposal in the House bill was amended in the Senate Naval Affairs Committee and also on the floor of the Senate. It was still further amended by conferees of the House and Senate, and finally became section 3 (b) in the Vinson-Trammell Act.

THE HOUSE BILL

H. R. 5730 as it passed the House of Representatives amends section 3 (b) in certain parts which has the following effects:

(a) Instead of having the profit computed on each individual contract and making refund, if required, contracts with any one company aggregated for the entire taxable year and refund is made if the company has realized over 10 percent profit on the total of the contracts.

(b) The act relieves the sureties on the performance bonds from the liability of refunding profit in excess of 10 percent in case the contractor does not do so voluntarily and the Bureau of Internal Revenue has not been able to collect it.

(c) It provides a method for a contractor to recover all or part of a loss in one year on the contracts of the next succeeding year.

(d) It makes effective for the purpose of collecting excesses of 10 percent profit, all the provisions of laws including penalties now applicable with respect to income taxes.

(e) It provides specific exemption to certain types of contracts or subcontracts relating to highly specialized scientific equipment used solely by the Navy Department.

THE SENATE BILL

The bill as reported by this committee to the Senate retains (a) and (b), strikes out (c), and retains (d) and (e).

The purpose of (a) is clear. For example, one company might have 10 or 12 contracts during a single taxable year; under the old provision there would be required a report and an audit on each separate contract, whereas under the amended provision only one report and one audit would be required at the end of the taxable year. This would vastly aid the Bureau of Internal Revenue and the Navy Department in their administration of the law.

As to (b), the Navy Department has been of the opinion, as has the Treasury Department, that the performance bond now required by law requires the sureties to guarantee refund of excess profit in case the contractor does not or cannot make the refund as now required. Legal opinion differs, however, on this question, but the bonding companies take the view that the performance bond under this requirement involves a new and uncertain risk, and as a result there has been a large increase in the bonding rates. As each contractor pays for his performance bond, he charges it in his cost price to the Government, and in the final analysis the Government pays the bill. This increase in bonding rates represents an annual charge of between one-half and $1,000,000 per year, which will be saved by the enactment of this new provision.

Both the Navy Department and the Bureau of Internal Revenue feel that the Bureau of Internal Revenue has ample means and ways of collecting these excess profits under the tax laws, and this change in the law is made to save the Government the additional sum of money, which is now being and will be spent for bonds for an unnecessary purpose.

As to (c), the Navy Department takes the position that it was the intent of Congress to permit contractors to make some profit not in excess of 10 percent and it is of the opinion, since the contractors cannot raise the prices of cost plus 10 percent, that they should be permitted to recover any losses sustained one year in the succeeding taxable year. For example, in the year 1933, a contractor makes a loss of $100,000 on all his contracts, which represents a 10-percent

loss, and in the subsequent year, namely, 1934, if he has contracts, he may make enough to recover his losses and make a profit of not over 10 percent on the 1934 contracts. Thus, it would be that over a 2-year period he might make a net profit of 5 percent on his total transactions. The Senate committee rejects this provision in the House bill.

The House provision does not change the provided limitation of 10 percent in the Vinson-Trammell Act. It seeks to change the method of ascertainment and groups 2 years instead of only 1 year for computation. The Senate committee did not accept this change and retains the limitations of 10 percent as ascertained at present.

As to (d), it merely makes effective for the purpose of collecting excesses of 10-percent profit all the provisions of laws including penalties with respect to income taxes.

As to (e), it relates to scientific equipment which specifically applies to certain types of contracts or subcontracts relating to highly specialized scientific equipment. This section was put into the bill by the House Naval Affairs Committee and was later approved by the Navy Department. The idea behind this is that any scientific development or improvement is dependent upon research. The Navy Department urged that you cannot have a research business without a possible 10-percent profit because in many researches there are a great many losses. The House committee, after hearings, decided to give scientific-research contractors an opportunity to recoup their losses on the basis that they are entitled to more than 10 percent on a successful scientific development in order to recover losses on an unsuccessful development. This applies to specialized instruments such as radio, instruments for target detection, range control, and synchronizing of gunfire. The Navy Department states that its experience has been that there are more losers than winners in these research developments. The continued efficiency of the Navy depends upon scientific improvement, and this is deemed an essential amendment.

Another amendment deals with the effective date of the bill, which was omitted in the House bill.

CONTRACTS MADE UNDER EXCESSIVE-PROFIT PROVISIONS

To date there have been 637 contracts, with a total contract price of $229,352,577.40, entered into subject to the provisions of the Vinson-Trammell Act. The reports received to date following completion of the contracts total 82, of which 7 show profits in excess of 10 percent, totaling $13,716.84; and 24 losses, totaling $197,609.74; the remainder of 51 showing a profit of 10 percent or less. None of the contracts for the construction of complete naval vessels subject to the provisions of the Vinson-Trammell Act have been completed to date.

CONCLUSIONS

This committee feels that it would be equitable and in the interests of the Government to enact H. R. 5730 as passed the House with the committee amendments, thereby broadening competition for naval material, reducing the cost of such materials, and encouraging the entry of new and small contractors into the field of Government supply with resulting better and cheaper material. This bill will result in a saving to the Government, particularly in the administration of the law, cheaper bond rates which will save over half a million dollars a year alone, and simplification of accounting in both the Navy Department and the Bureau of Internal Revenue. This measure is recommended by both the Navy Department and the Treasury Department and is in accord with the policy program of the President.

The committee believes this bill to be in the interest of economy, efficiency, and equity. It has the approval of the Bureau of the Budget and is recommended for passage by the Secretary of the Navy and has already passed the House of Representatives.

COMMITTEE AMENDMENTS

The bill is amended by adding after the word "profit" on line 9, page 2, a quotation mark and by striking out all the rest of lines 9, 10, 11, 12, 13, and the words "income taxable year" on line 14.

On line 15, after semicolon, strike out the words "by inserting the word 'further' after the word 'provided.'"

On page 3 strike out all of lines 19, 20, 21, 22, and 23 except the word "*Provided.*" Also strike out the word "further" on line 24.

On page 4, line 17, after the word "thereof", add the following proviso: "*And provided further,* That the income taxable years shall be such taxable years beginning after December 31, 1935, except that the above provisos relating to the assessment, collection, payment, or refunding of excess profit to or by the Treasury shall be retroactive to March 27, 1934."

MAXIMO MARIANO PRUNA Y HERNANDEZ

The joint resolution (S. J. Res. 257) authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Maximo Mariano Pruna y Hernandez, a citizen of Cuba, was read, considered, ordered to a third reading, read the third time, and passed, as follows:

Resolved, etc., That the Secretary of War be, and he is hereby, authorized to permit Maximo Mariano Pruna y Hernandez to receive instruction at the United States Military Academy at West Point for the course beginning not later than July 1, 1937: *Provided,* That no expense shall be caused to the United States thereby, and that Maximo Mariano Pruna y Hernandez shall agree to comply with all regulations for the police and discipline of the academy, to be studious, and to give his utmost efforts to accomplish the courses in the various departments of instruction, and that said Maximo Mariano Pruna y Hernandez shall not be admitted to the academy until he shall have passed the mental and physical examinations prescribed for candidates from the United States, and that he shall be immediately withdrawn if deficient in studies or in conduct and so recommended by the academic board: *Provided further,* That in the case of said Maximo Mariano Pruna y Hernandez the provisions of sections 1320 and 1321 of the Revised Statutes shall be suspended.

LOAN OF BLANKETS AND COTS TO UNITED CONFEDERATE VETERANS

The bill (H. R. 11302) to authorize the Secretary of War to lend to the Reunion Committee of the United Confederate Veterans 3,000 blankets, olive drab, no. 4, 1,500 canvas cots, to be used at their annual encampment to be held at Shreveport, La., in June 1936, was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized to lend, at his discretion, to the Reunion Committee of the United Confederate Veterans, for use at the United Confederate Veterans' Encampment, to be held at Shreveport, La., June 9, 10, 11, and 12, 1936, two hospital ward tents, with all pegs, poles, and equipment necessary for their erection; 1 storage tent complete with all equipment; 1 large wall tent complete with all equipment; 6 small wall tents complete with all equipment; 10 pyramidal tents complete with all equipment; 50 14-quart G. I. buckets; 3,000 blankets, olive drab, wool; 1,500 canvas folding cots; 1,500 comforters; 1,500 cotton-felted pillows complete with cotton pillow cases; 3,000 cotton bedsheets: *Provided,* That no expense shall be caused the United States Government by the delivery and return of said property; the same to be delivered from the nearest quartermaster depot at such time prior to the holding of said encampment as may be agreed upon by the Secretary of War and the Confederate Reunion Committee: *Provided further,* That the Secretary of War, before delivery of such property, shall take from said Reunion Committee of the United Confederate Veterans a good and sufficient bond for the safe return of said property in good order and condition, and the whole without expense to the United States.

JOSEPH W. HARRISON

The bill (S. 3736) authorizing and directing the appointment of Joseph W. Harrison as a captain in the Chaplain Reserve Corps was announced as next in order.

Mr. KING. Mr. President, I find a strong recommendation by the Secretary of War against the bill. Let it go over.

Mr. SHEPPARD. Mr. President, may I make a brief explanation? It is mainly because Reverend Harrison has passed the age limit that the Department objects. He had had three enlistments in the Army, and during the third enlistment was discharged on a surgeon's certificate of disability. It is the general desire of the various veterans' organizations in Texas that he be given this appointment. It is largely a matter of accommodating the sentiment in my State that Reverend Harrison should receive this recognition.

Mr. KING. Mr. President, I cannot refrain from challenging the attention of the Senator from Texas and of the Senate to the statement of the Secretary of War, as follows:

As it appears that no useful military end would be served by Mr. Harrison's appointment in the Chaplains' Reserve, and as such appointment would be unjust to all other applicants who are required to meet the provisions of existing law and regulations, the War Department strongly opposes the enactment of S. 3736.

Mr. SHEPPARD. There are exceptional circumstances surrounding this matter.

Mr. KING. I will ask the Senator to let it go over for the day. I will look into it further and discuss the matter with him and with the Secretary of War.

The PRESIDING OFFICER. On objection, the bill will be passed over.

WITHHOLDING OF COMPENSATION OF MEMBERS OF MILITARY AND NAVAL FORCES

The Senate proceeded to consider the bill (S. 3220) to authorize the Secretary of War or the Secretary of the Navy to withhold the pay of officers, warrant officers, enlisted men, and nurses of the Army, Navy, or Marine Corps to cover indebtedness to the United States under certain conditions, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and insert the following:

That hereafter whenever upon the statement of the account of any disbursing officer of the United States in the General Accounting Office credit shall have been disallowed for any payment to any person in the executive branch of the Government, otherwise

entitled to compensation from the United States or from any agency or instrumentality thereof, such compensation of the payee may be withheld until full reimbursement has been accomplished under such regulations as may be prescribed by the head of the department, branch, or independent establishment (including corporations) under which such payee is entitled to receive compensation: *Provided*, That nothing contained in this act shall be construed to repeal or in any way modify existing laws relating to the collection of the indebtedness of accountable or disbursing officers.

Mr. KING. Mr. President, may I ask the Senator from Texas [Mr. SHEPPARD] if the bill meets the approval of the War Department and Navy Department?

Mr. SHEPPARD. Mr. President, I am under the impression that this is a compromise which may turn out to be satisfactory to all concerned. I should like to explain the situation to the Senator.

Under present law, and because of decisions of the Comptroller General, there is doubt as to the authority of the Secretary of War and the Secretary of the Navy to withhold the pay of an officer payee who has received money paid to him by a disbursing officer by mistake. Present conditions work a hardship on disbursing officers, and place responsibility primarily on them for the reimbursement of the United States for money illegally paid out through a mistaken interpretation of the law, or honest errors in computations of pay, and so forth, which are sometimes very complicated. This bill enables all departments to hold those receiving illegal pay primarily responsible, and to take steps, such as stopping pay, and so forth, to collect from such payees. Of course, if collection cannot be made from these payees, the disbursing officers are still accountable.

Mr. KING. It involves no increase in expenditures?

Mr. SHEPPARD. None whatsoever.

Mr. KING. It involves no promotions?

Mr. SHEPPARD. No: it is a matter of administration only.

The Senator from Washington [Mr. SCHWELLENBACH] is familiar with the matter.

Mr. SCHWELLENBACH. Mr. President, the accounting department made certain suggestions with reference to the bill as submitted by the War Department. The bill was originally submitted by the War Department. One objection was that in the War Department bill it was provided that any officer who had defended a claim and hired an attorney, should be compensated for his attorney's fee. The accounting department objected to that. We felt that was a reasonable objection.

As a general proposition, I have the feeling that it is a purely accounting matter. It seemed to me the accounting department is in a better position to judge what the law should be than is the War Department. I could not find any real difference with the exception of this one point. I think there has been argument about it for several years. I believe the accounting department's bill fully meets the desire of the War Department. The bill, in my opinion, is entirely meritorious and should be passed.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Committee on Military Affairs.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize withholding compensation due Government personnel."

JOINT RESOLUTION PASSED OVER

The joint resolution (S. J. Res. 115) designating the last Sunday in September as "Gold Star Mother's Day", and for other purposes, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDING OFFICER. The joint resolution will be passed over.

PUBLIC PARK, CLACKAMAS COUNTY, OREG.

The bill (H. R. 5058) to convey certain lands to Clackamas County, Oreg., for public-park purposes was considered, ordered to a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Interior is authorized and directed to issue a patent to Clackamas County, Oreg., on behalf of the United States, for the south half southwest quarter and the west half northeast quarter southwest quarter section 11, township 3 south, range 4 east, Willamette meridian, in the State of Oregon, containing 100 acres, more or less, on condition that such county shall accept and use such lands solely for public-park purposes; but if such county shall at any time cease to use such lands for public-park purposes, or shall permit the use of such lands for any other purpose, or shall alienate or attempt to alineate them, they shall revert to the United States: *Provided*, That there shall be reserved to the United States, its patentees, or their transferees, the right to cut and remove therefrom the merchantable timber, reserving to Clackamas County, Oreg., when such sale is made under the provisions of the act of June 9, 1916 (39 Stat. 218), a preference right to purchase the timber at the highest price bid.

SEC. 2. The Secretary of the Interior shall prescribe all necessary regulations to carry into effect the foregoing provisions of this act.

BILLS PASSED OVER

The bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto, was announced as next in order.

Mr. VANDENBERG. Let the bill go over.

Mr. VAN NUYS. Mr. President, I think this bill should receive consideration at this time. It is requested by the Treasury Department and simply applies to the Railroad Reorganization Act the same provisions which apply to the Private Corporations Reorganization Act, whereby Federal claims for taxes must be taken care of before any others. There are at present taxes to the extent of $10,000,000 due from the railroads. Many of the railroad companies are trying to reorganize. I really think the bill should have consideration at this time.

Mr. VANDENBERG. Let it go over for the day.

The PRESIDING OFFICER. The bill will be passed over.

The bill (S. 4297) to amend section 80 of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, as amended, was announced as next in order.

Mr. VANDENBERG. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

EXAMINATION AND SURVEY OF SMUGGLERS COVE, OREG.

The bill (S. 4487) to provide for a preliminary examination and survey of Smugglers Cove, Oreg., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to cause a preliminary examination and survey to be made of Smugglers Cove (otherwise known as Short Sands Beach), on the coast of Oregon, with a view to determining the feasibility, advisability, and cost of converting such cove into a harbor of refuge. The Secretary of War shall report to the Congress, as soon as practicable, the result of such examination and survey. The cost of such examination and survey shall be paid from appropriations heretofore or hereafter made for examinations, surveys, and contingencies of rivers and harbors.

HAYDEN W. WREN

The joint resolution (S. J. Res. 250) extending thanks in appreciation of services rendered by Hayden W. Wren as superintendent of the docks of the port of New Orleans was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That in recognition of faithful performance of duties of a complex and extremely delicate nature, rendered during the World War by Hayden W. Wren as superintendent of the docks of the port of New Orleans, in the handling of tons of high explosives without mishap at a time when the Mississippi River was at one of its highest stages of water; for the manipulation of facilities and the handling of ships so efficiently as to avoid any serious congestion of traffic at a time when facilities of many major ports of the United States were seriously congested; for the salvaging of the interned Austrian steamship *Anna*, which was sinking at the Nine Mile Point as a result of attempts to scuttle by the Austrian crew, thus saving, among others, the lives of five United States deputy marshals stationed on the ship; for the vigilance and patriotic interning of five alien steamships and their removal to the Nine Mile Point without mishap to any of these ships, and the internment of their respective officers and crews; for the handling of the facilities at the port of New Orleans during the full period of the World War in close cooperation with the officers and men of the United States Government, the thanks of the people of the United States are hereby tendered to him as a tribute of his services rendered.

NEW ORLEANS ARMY BASE

The Senate proceeded to consider the bill (S. 4252) to provide for the modification of the contract of lease entered into on June 12, 1922, between the United States and the Board of Commissioners of the Port of New Orleans, which had been reported from the Committee on Commerce with amendments, on page 1, line 5, after the word "obligation", to insert "require repairs and maintenance"; in line 7, after the word "and", to strike out "stipulations" and insert "provisions"; in line 9, after the word "on", to strike out "December 29, 1930, supplemented by agreement of October 20, 1931", and insert "June 12, 1922, as now or hereafter supplemented, covering the New Orleans Army Base or portions thereof"; and at the end of the bill to insert *"Provided*, That the rental shall not be made lower than the fair rental value to be determined by the Secretary of War from an appraisal by qualified disinterested appraisers, the cost of appraisal to be paid by the Secretary of War from the rental collected under the lease", so as to make the bill read:

Be it enacted, etc., That the Secretary of War, with the consent of the lessee, may, in his discretion, and in such manner as he may consider desirable, reduce the consideration or obligation, require repairs and maintenance, and otherwise modify the terms, consideration, and provisions of the lease entered into between the United States and the Board of Commissioners of the Port of New Orleans on June 12, 1922, as now or hereafter supplemented, covering the New Orleans Army Base or portions thereof, in the event it appears that full performance of the lessee's obligations under such lease will result in default by, or impose undue hardship upon, the lessee: *Provided*, That the rental shall not be made lower than the fair rental value to be determined by the Secretary of War from an appraisal by qualified disinterested appraisers, the cost of appraisal to be paid by the Secretary of War from the rental collected under the lease.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MEMORIAL TO OFFICERS OF IMMIGRATION AND NATURALIZATION SERVICE, ETC.

The Senate proceeded to consider the joint resolution (H. J. Res. 439) authorizing the erection in the Department of Labor Building of a memorial to the officers of the Immigration and Naturalization Service and Immigration and Border Patrol who, while on active duty, lost their lives under heroic or tragic circumstances, which had been reported from the Committee on Public Buildings and Grounds with an amendment, on page 1, line 3, after the words "That the", to strike out "Director of Public Buildings and Public Parks of the National Capital" and insert "Director of the National Park Service", so as to make the joint resolution read:

Resolved, etc., That the Director of the National Park Service be, and is hereby, authorized to grant permission for the erection of a memorial to the officers of the Immigration and Naturalization Service and Immigration Border Patrol who, while on active duty, lost their lives under heroic or tragic circumstances. The design of the memorial shall be approved and the site in the Department of Labor Building shall be chosen by the Commission of Fine Arts, and the United States shall be put to no expense in or by the erection of the said memorial.

The amendment was agreed to.

The amendment was ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time and passed.

BILL PASSED OVER

The bill (S. 4376) authorizing the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, to construct, maintain, and operate a free or toll bridge across the Missouri River at or near Dodge Street in the city of Omaha, Nebr., was announced as next in order.

Mr. BENSON. Let that bill go over.

The PRESIDING OFFICER. The bill will be passed over.

MISSOURI RIVER BRIDGE, BROWNVILLE, NEBR.

The bill (S. 4461) to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Brownville, Nebr., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the times for commencing and completing the construction of the bridge across the Missouri River, at or near Brownville, Nebr., authorized to be built by the county of Atchison, State of Missouri, and the county of Nemaha, State of Nebraska, singly or jointly, by section 18 of the act of Congress approved August 30, 1935, are hereby extended 1 and 3 years, respectively, from the date of approval hereof.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

MISSOURI RIVER BRIDGES, NEBRASKA-IOWA

The bill (S. 4462) to extend the times for commencing and completing the construction of a bridge across the Missouri River between the towns of Decatur, Nebr., and Onawa, Iowa, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the times for commencing and completing the construction of the bridge across the Missouri River, between the towns of Decatur, Nebr., and Onawa, Ohio, authorized to be built by the county of Burt, State of Nevada, by section 29 of the act of Congress approved August 30, 1935, are hereby extended 1 and 3 years, respectively, from the date of approval hereof.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill (S. 4463) to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near the cities of South Sioux City, Nebr., and Sioux City, Iowa, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the times for commencing and completing the construction of the bridge across the Missouri River at or near the cities of South Sioux City, Nebr., and Sioux City, Iowa, authorized to be built by the county of Dakota, State of Nebraska, by section 30 of the act of Congress approved August 30, 1935, are hereby extended 1 and 3 years, respectively, from the date of approval hereof.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

COAST GUARD STATION, CRESCENT CITY, CALIF.

The bill (H. R. 1398) to provide for the establishment of a Coast Guard station at or near Crescent City, Calif., was considered, ordered to a third reading, read the third time, and passed.

COAST GUARD STATION, PORT WASHINGTON, WIS.

The bill (H. R. 8370) to provide for the establishment of a Coast Guard station at Port Washington, Wis., was considered, ordered to a third reading, read the third time, and passed.

MISSOURI RIVER BRIDGE, NIOBRARA, NEBR.

The bill (H. R. 10589) to amend section 32 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and/or completing the construction of other bridges over the navigable waters of the United States, and for other purposes", approved August 30, 1935, was considered, ordered to a third reading, read the third time, and passed.

REORGANIZATION OF DISTRICT OF COLUMBIA COURTS

The Senate proceeded to consider the bill (S. 4038) to amend an act of Congress approved March 3, 1863, entitled "An act to reorganize the courts in the District of Columbia, and for other purposes", which had been reported from the Committee on the Judiciary with amendments, on page 1, line 6, after the word "the", to strike out "District Court" and insert "district court", and at the end of the bill to insert *"Provided*, That nothing in this act shall affect the jurisdiction or functions of the court", so as to make the bill read:

Be it enacted, etc., That the court established by section 1 of the act of March 3, 1863 (12 Stat. 762) entitled "An act to reorganize the courts in the District of Columbia, and for other purposes", shall hereafter be known as the district court of the United States for the District of Columbia: *Provided*, That nothing in this act shall affect the jurisdiction or functions of the court.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. KING. Mr. President, I ask unanimous consent to have inserted in the RECORD, following the passage of the bill, the report of the committee, which fully explains the reasons for the change.

The PRESIDING OFFICER. Without objection, is is so ordered.

The report (No. 1997) submitted by Mr. KING on May 7, 1936, is as follows:

The Committee on the Judiciary, to whom was referred the bill (S. 4038) to amend an act of Congress approved March 3, 1863, entitled "An act to reorganize the courts in the District of Columbia, and for other purposes", having considered the same, report favorably thereon with the recommendation that the bill do pass with the following amendments:

Line 6, strike out the words "District Court" and insert "district court."

Line 7, strike out the period following the words "District of Columbia" and insert the following:

": *Provided*, That nothing in this bill shall affect the jurisdiction or functions of the court."

The purpose of this bill is to change the name of the principal trial court located in the District of Columbia so as to reflect more clearly its present nature and business. The court was established by act of Congress approved March 3, 1863 (12 Stat. 762), with the title "the Supreme Court of the District of Columbia." Since that time additional jurisdiction in matters strictly of a Federal nature has been given the court, and a very considerable part of its present business is that of the Federal district courts, with which it most closely compares.

Serious confusion arises because of the similarity of the name of this court to that of the Supreme Court of the United States, which is, of course, located in the District of Columbia. The judges of the court are in favor of the corrective legislation.

The form of the legislation, as introduced, was similar to an act approved June 7, 1934 (Public, No. 298), which changed the name of the appellate court in the District of Columbia from "Court of Appeals of the District of Columbia" to "United States Court of Appeals for the District of Columbia." While there has been no suggestion that the language of the latter affected materially the jurisdiction of powers of the appellate court, it is deemed wise to add the amendment proposed by this committee so that there shall be no possibility of impairment of the powers, jurisdiction, or duties of the present Supreme Court of the District of Columbia merely by reason of the proposed change in name.

BILL PASSED OVER

The bill (H. R. 8824) for the relief of the estate of John Gellatly, deceased, and/or Charlyne Gellatly, individually, was announced as next in order.

The PRESIDING OFFICER. This bill is reported adversely.

Mr. COPELAND. Let it go over.

The PRESIDING OFFICER. The bill will be passed over.

REVISION OF CONVENTION FOR PROTECTION OF LITERARY AND ARTISTIC WORKS

The joint resolution (S. J. Res. 253) to authorize an appropriation for the expenses of participation by the United States in a Conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works, concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $6,500, or so much thereof as may be necessary, for the expenses of participation by the United States in the Conference to convene at Brussels, Belgium, for the purpose of revising the Convention for the Protection of Literary and Artistic Works, concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928, including personal services in the District of Columbia and elsewhere without reference to the Classification Act of 1923, as amended; stenographic reporting and other services by contract if deemed necessary without regard to section 3709 of the Revised Statutes (U. S. C., title 41, sec. 5); rent; traveling expenses, purchase of necessary books, documents, newspapers, periodicals, and maps; stationery; official cards; entertainment; printing and binding; and such other expenses as may be authorized by the Secretary of State, including the reimbursement of other appropriations from which payments may have been made for any of the purposes herein specified, to be expended under the direction of the Secretary of State.

The PRESIDING OFFICER subsequently said: The Chair calls the attention of the Senate to the fact that the Senate has passed House Joint Resolution 569, which is identical with Senate Joint Resolution 253, which has also been passed. Without objection, the action of the Senate in passing Senate Joint Resolution 253 will be reconsidered, and it will be indefinitely postponed.

CONGRESS OF MILITARY MEDICINE AND PHARMACY

The joint resolution (H. J. Res. 538) to provide for participation by the United States in the Ninth International Congress of Military Medicine and Pharmacy in Rumania in 1937; and to authorize and request the President of the United States to invite the International Congress of Military Medicine and Pharmacy to hold its tenth Congress in the United States in 1939, and to invite foreign countries to participate in that Congress, was considered, ordered to a third reading, read the third time, and passed.

MRS. M. N. SHWAMBERG

The bill (S. 3844) for the relief of Mrs. M. N. Shwamberg was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500, United States currency, for payment to Mrs. M. N. Shwamberg, as an act of grace, and without reference to the legal liability of the United States, as full indemnity for the personal injuries sustained by her as the result of a collision between a public jinrikisha in which she was riding and a United States Marine Corps ambulance on Seymour Road, Shanghai, China, on January 31, 1935.

HOMER BRETT

The bill (S. 4140) for the relief of Homer Brett, Esq., American Consul at Rotterdam, Netherlands, as a result of money stolen from the safe of the American Consulate, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to Homer Brett, Esq., American Consul at Rotterdam, Netherlands, the sum of $116.58, such sum representing the unrecovered amount stolen from the safe of the American Consulate at Rotterdam, Netherlands, on the night of September 27, 1935.

AMENDMENT OF MIGRATORY BIRD TREATY ACT

The bill (S. 4584) to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755) to extend and adapt its provisions to the convention between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded at the city of Mexico February 7, 1936, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the title of the act entitled "An act to give effect to the convention between the United States and Great Britain for the protection of migratory birds concluded at Washington, August 16, 1916, and for other purposes", approved July 3, 1918 (40 Stat. 755), is hereby amended as of the day on which the President shall proclaim the exchange of ratifications of the convention between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded February 7, 1936, or on the day of the enactment of this act, whichever date is later, so that it will read as follows:

"An act to give effect to the convention between the United States and Great Britain for the protection of migratory birds concluded at Washington August 16, 1916, and between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded at the city of Mexico February 7, 1936, and for other purposes."

SEC. 2. That said act approved July 3, 1918, is hereby amended as of the day aforesaid by striking out the word "convention" wherever it occurs therein and by inserting in lieu thereof the word "conventions."

SEC. 3. That section 2 of said act approved July 3, 1918, is hereby amended as of the day aforesaid so as to read as follows:

"SEC. 2. That unless and except as permitted by regulations made as hereinafter provided, it shall be unlawful at any time, by any means or in any manner, to pursue, hunt, take, capture, kill, attempt to take, capture, or kill, possess, offer for sale, sell, offer to barter, barter, offer to purchase, purchase, deliver for shipment, ship, export, import, cause to be shipped, exported, or imported, deliver for transportation, transport or cause to be transported, carry or cause to be carried, or receive for shipment, transportation, carriage, or export, any migratory bird, or any part, nest, or egg of any such birds, included in the terms of the conventions between the United States and Great Britain for the protection of migratory birds concluded August 16, 1916, and the United States and the United Mexican States for the protection of migratory birds and game mammals concluded February 7, 1936."

SEC. 4. That section 4 of said act approved July 3, 1918, is hereby amended as of the day aforesaid by adding at the end thereof the following:

"It shall be unlawful to import into the United States from Mexico, or to export from the United States to Mexico, any game mammal, dead or alive, or parts or products thereof, except under permit or authorization of the Secretary of Agriculture in accordance with such regulations as he shall prescribe having due regard to the laws of the United Mexican States relating to the exportation and importation of such mammals or parts or products thereof and the laws of the State, District, or Territory of the United States from or into which such mammals, parts, or products

thereof, are proposed to be exported or imported, and the laws of the United States forbidding importation of certain live mammals injurious to the interests of agriculture and horticulture, which regulations shall become effective as provided in section 3 hereof."

SEC. 5. That section 9 of said act approved July 3, 1918, is hereby repealed as of the day aforesaid and the following is hereby substituted in lieu thereof:

"SEC. 9. That there is authorized to be appropriated, from time to time, out of any money in the Treasury not otherwise appropriated, such amounts as may be necessary to carry out the provisions and to accomplish the purposes of said conventions and this act and regulations made pursuant thereto, and the Secretary of Agriculture is authorized out of such moneys to employ in the city of Washington and elsewhere such persons and means as he may deem necessary for such purpose and may cooperate with local authorities in the protection of migratory birds and make the necessary investigations connected therewith."

SEC. 6. That all moneys now or hereafter available for administration and enforcement of said act approved July 3, 1918, shall be equally available for the administration and enforcement of said act as hereby amended.

USE OF WATERS OF THE RIO GRANDE

The bill (H. R. 10321) to amend section 4 of Public Act No. 286, Seventy-fourth Congress, approved August 19, 1935, as amended, was considered, ordered to a third reading, read the third time, and passed.

BLACK ROCK HARBOR IMPROVEMENT, BUFFALO, N. Y.

The Senate proceeded to consider the bill (S. 4317) to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y., which had been reported from the Committee on Commerce with an amendment, on page 2, line 9, after the word "lands", to strike out "northerly of the said lands forming the dike along the westerly side of the said Black Rock Harbor improvement, including the lands under the water between said dike and the westerly harbor line of the channel established by the United States" and insert "owned by the United States on the west side of Black Rock Canal, described as follows: Beginning at a point where the northerly line of property formerly owned by William H. Slade, or that line extended, intersects the United States Government property line (formerly New York State Blue Line); thence easterly parallel to the line forming the northeasterly boundary of lands heretofore granted to the city of Buffalo by the United States and known as Bird Island pier until a point is reached in direct prolongation of the easterly boundary line of said last-mentioned lands; then southwesterly in direct line with said easterly boundary of said lands to the northeasterly corner of said lands heretofore conveyed to the city of Buffalo by the United States; thence westerly along the northeasterly boundary of said Bird Island pier lands to said United States Government property line; thence northeasterly along said last-mentioned line to the place of beginning", so as to make the bill read:

Be it enacted, etc., That in addition to the grant made by the Secretary of War to the city of Buffalo pursuant to the act of Congress entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved February 27, 1911, for the purpose of establishing a public park and landing facilities on that part of the structure known as Bird Island pier on Niagara River lying north of Albany Street extended, in the city of Buffalo, N. Y., and forming a part of Black Rock Harbor improvement and the lands of the United States under water on both sides of said pier to the established harbor lines, subject to the terms, conditions, and stipulations in said grant specified, the Secretary of War is authorized to grant to the city of Buffalo, N. Y., also the right and privilege of occupying said lands and lands under water, and also the lands owned by the United States on the west side of Black Rock Canal, described as follows: Beginning at a point where the northerly line of property formerly owned by William H. Slade, or that line extended, intersects the United States Government property line (formerly New York State Blue Line); thence easterly parallel to the line forming the northeasterly boundary of lands heretofore granted to the city of Buffalo by the United States and known as Bird Island pier until a point is reached in direct prolongation of the easterly boundary line of said last-mentioned lands; thence southwesterly in direct line with said easterly boundary of said lands to the northeasterly corner of said lands heretofore conveyed to the city of Buffalo by the United States; thence westerly along the northeasterly boundary of said Bird Island pier lands to said United States Government property line; thence northeasterly along said last-mentioned line to the place of beginning, or so much thereof as may be necessary, for use either by the city of Buffalo or by the Buffalo Sewer Authority (created by chapter 349 of the Laws of the State of New York of 1935) for sewage-disposal facilities, on such terms, conditions, and stipulations as he may deem expedient and equitable and necessary for the protection of all the interests of the United States in and to said premises: *Provided, however*, That the city of Buffalo shall have secured the sanction and consent of the State of New York through its constituted agencies.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CAPT. LAURENCE V. HOUSTON, RETIRED

The bill (S. 3992) for the relief of Capt. Laurence V. Houston, retired, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the President is hereby authorized to transfer Capt. Laurence V. Houston from the retired to the active list of the United States Army and to place him on the promotion list in the position he would have occupied had he not been involuntarily transferred to the retired list on December 9, 1929: *Provided*, That no back pay or allowances shall accrue to Capt. Laurence V. Houston by reason of this transfer.

REVISION OF CONVENTION FOR PROTECTION OF LITERARY AND ARTISTIC WORKS

The joint resolution (H. J. Res. 569) to authorize an appropriation for the expenses of participation by the United States in a conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928, was considered, ordered to a third reading, read the third time, and passed.

BILL PASSED OVER

The bill (H. R. 9009) to make lands in drainage, irrigation, and conservancy districts eligible for loans by the Federal land banks and other Federal agencies loaning on farm lands, notwithstanding the existence of prior liens of assessment made by such districts, and for other purposes, was announced as next in order.

Mr. McKELLAR. Mr. President, may we have an explanation of that bill?

Mr. VANDENBERG. Let it go over.

The PRESIDING OFFICER. The bill will be passed over.

PORT NEWARK ARMY SUPPLY BASE

The Senate proceeded to consider the bill (H. R. 9042) to provide for the sale of the Port Newark Army Supply Base to the city of Newark, N. J.

Mr. McKELLAR. Mr. President, will some Senator explain that bill?

Mr. MOORE. Mr. President, this property was bought from the city of Newark by the United States Government before the war. The city of Newark has been trying to get the property back, and negotiations for that purpose have been pending; and an earlier bill was introduced providing for selling the property back to the city of Newark for $1,000,000. In the pending bill, however, the amount is raised to $2,000,000. I think that is fair enough, although the first bill called for $1,000,000; and I shall be very glad if the pending bill may be passed.

Mr. McKELLAR. The city of Newark is buying the property back?

Mr. MOORE. Yes, sir.

Mr. McKELLAR. It conveyed the property to the Government during the war?

Mr. MOORE. It did.

Mr. McKELLAR. I have no objection to the bill.

The bill was ordered to a third reading, read the third time, and passed.

LANDS IN CONNECTICUT

The bill (S. 4425) to relinquish all right, title, and interest of the United States in certain lands in the State of Connecticut, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to convey to the town of Westport, Conn., by quitclaim deed, all right, title, and interest of the United States in the land authorized to be conveyed by the act entitled "An act to authorize the sale of a parcel of land in the

town of Westport, Conn.", approved July 3, 1926. Such deed shall contain no restrictions or limitations as to the use of such land and shall remove all limitations and restrictions as to the use of such land which were contained in the deed executed on January 11, 1927, pursuant to such act.

JOHN C. REYNOLDS

The Senate proceeded to consider the bill (S. 4078) to authorize the award of the Distinguished Service Cross to John C. Reynolds, which had been reported from the Committee on Military Affairs with an amendment to strike out all after the enacting clause and to insert:

That the President is hereby authorized to cause the recommendation of the award of a decoration to John C. Reynolds, formerly a private, first-class, Company A, Fourth Infantry, United States Army, American Expeditionary Forces, for distinguished conduct in rescuing wounded in battle on October 2, 3, and 4, 1918, near Nantillois, France, and Montfaucon, France, and during the battle of the Meuse-Argonne, to be considered by the proper boards or authorities, and such award made to said Reynolds as his conduct merits.

Mr. McKELLAR. Mr. President, I see that the enactment of this bill is not recommended by the Department.

Mr. SHEPPARD. Mr. President, the bill has been amended so as to provide merely for a review and an investigation.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the award of a decoration for distinguished service to John C. Reynolds."

LOSS OF CHECKS IN THE MAILS

The Senate proceeded to consider the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration, which had been reported from the Committee on Post Offices and Post Roads with amendments to insert at the end of the bill two new sections, so as to make the bill read:

Be it enacted, etc., That section 3 of the act entitled "An act making appropriations for the payment of invalid and other pensions of the United States for the fiscal year ending June 30, 1913, and for other purposes", approved August 17, 1912 (37 Stat. 312; 38 U. S. C., sec. 50), is hereby amended to read as follows:

"SEC. 3. Pensions, compensation, insurance, or other allowances or benefits provided for by laws administered by the Veterans' Administration shall be paid by checks drawn, pursuant to certification by the Administrator of Veterans' Affairs, by the Division of Disbursement of the Treasury Department in such form as to protect the United States against loss, without separate vouchers or receipts, and payable by the Treasurer of the United States, except in any case in which the Administrator of Veterans' Affairs may consider a voucher necessary for the protection of the Government. Such checks shall be transmitted by mail to the payee thereof at his last-known address, and the envelope or cover thereof may bear an appropriate notice of the prohibition hereafter set forth in this section.

"Postmasters, delivery clerks, letter carriers, and all other postal employees are prohibtited from delivering any mail addressed by the United States bearing such notice and containing any such check (except that in the case of checks in payment of allowances and benefits other than pensions, compensation, or insurance, the prohibition shall apply only insofar as the Administrator of Veterans' Affairs deems it necessary to protect the United States against loss), to any person whomsoever, if the addressee has died or removed, or in the case of a widow believed by the postal employee intrusted with the delivery of such mail to have remarried (unless such mail is addressed by the United States in the name which the widow shall have acquired by remarriage); and the postmaster in every such case shall forthwith return such mail with a statement of the reasons for so doing, and if because of death or remarriage, the date thereof, if known. Checks returned as herein provided on account of death or remarriage shall be canceled."

SEC. 2. Section 4 of the Adjusted Compensation Payment Act, 1936, is hereby amended by adding at the end thereof the following paragraphs:

"At the request of the Secretary of the Treasury, the Postmaster General, under such regulations as he may prescribe, shall designate postmasters and other employees of the Post Office Department and of the Postal Service to perform, without extra compensation, such fiscal-agency services as may be desirable and practicable in connection with the redemption and payment of the bonds issued under this section; and the Postmaster General may require each such employee to furnish such bond as he may determine for the faithful performance of such fiscal-agency duties.

"The Secretary of the Treasury is authorized to advance, from time to time, to the Postmaster General, from the appropriation contained in the Supplemental Appropriation Act, fiscal year 1936, approved February 11, 1936, for 'Administrative expenses, Adjusted Compensation Payment Act, 1936, Treasury Department, 1936 and 1937', such sums as are certified by the Postmaster General to be required for the expenses of the Post Office Department in connection with the handling of the bonds issued hereunder. Such bonds, when received by postmasters for purposes of redemption and payment, shall be handled by the postmasters under such special regulations as may be promulgated by the Postmaster General. They shall be transmitted between post offices or from any post office to the Treasury Department, or fiscal agent thereof, without advance payment of any required postage. The Secretary of the Treasury shall reimburse the Postmaster General from the aforesaid appropriation contained in said Supplemental Appropriation Act, for such postage and registry fees as may be required in connection with such transmittal. Whenever it is proved to the Secretary of the Treasury, by clear and satisfactory evidence, that any such bond is lost, stolen, or destroyed while being so transmitted, the Secretary of the Treasury may, in accordance with such rules and regulations as he may prescribe, issue a duplicate thereof without requiring the furnishing of an indemnity bond."

SEC. 3. The salary of each of the four Assistant Postmasters General is hereby fixed at a rate of $10,000 per annum, effective on the date of the passage of this act.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

GLADYS HINCKLEY WERLICH

The bill (S. 4558) for the relief of Gladys Hinckley Werlich was announced as next in order.

The PRESIDING OFFICER. This bill is identical with House bill 12183, reported today without amendment by the Senator from Nevada [Mr. PITTMAN].

Mr. LEWIS. Mr. President, the bill before the Senate is a measure to award the sum ordinarily granted to the widow of one dying in the service, the unhappy experience to which this bill relates. A bill embodying the whole matter having passed the House and being before us for consideration, I move, sir, that it be given the place of the bill of the Senate, and, upon the substitution being made, that the House bill be passed by the Senate.

The PRESIDING OFFICER. Without objection, the House bill will be substituted for the Senate bill.

The Senate proceeded to consider the bill (H. R. 12183) for the relief of Gladys Hinckley Werlich, which was ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Without objection, Senate bill 4558 will be indefinitely postponed.

MICHAEL J. QUINN

The Senate proceeded to consider the bill (S. 3921) authorizing the Secretary of War to bestow the Silver Star upon Michael J. Quinn, which was read, as follows:

Be it enacted, etc., That notwithstanding the provisions of the act of May 26, 1928, the Secretary of War is authorized to pass upon the recommendations now in the War Department for the award of the Silver Star citation to Michael J. Quinn, late of Battery B, Seventh Regiment United States Field Artillery, and, if such recommendations are found sufficient under the law governing the award of the Silver Star, to award such decoration to Michael J. Quinn.

Mr. McKELLAR. Mr. President, may we have an explanation of that bill? The Department is against it.

Mr. SHEPPARD. Evidently there is a misunderstanding. The bill provides merely for an examination.

Mr. McKELLAR. In that event, I have no objection.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for the third reading, was read the third time, and passed.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

BANKRUPTCY PROCEEDINGS OF DRAINAGE DISTRICTS, LEVEE DISTRICTS, ETC.

Mr. ROBINSON. Mr. President, I ask unanimous consent to recur to Calendar No. 2083, being the bill (S. 4297) to amend section 80 of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, as amended.

Mr. McNARY. Mr. President, was objection entered to the consideration of this bill when the calendar was being called?

Mr. ROBINSON. I am informed that there was no discussion of the bill. The Senator from Michigan [Mr. VANDENBERG] made an objection, and I should like to have an opportunity of explaining the bill and having it considered, if there is no objection.

The PRESIDING OFFICER. The Senator from Arkansas asks unanimous consent that the Senate return to the consideration of the bill to which he has referred. Is there objection?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment.

Mr. ROBINSON. Mr. President, I should like to state what the bill proposes.

Mr. McNARY. Mr. President, I observe on page 15 of the calendar a notation of a similar bill, Calendar No. 2081, House bill 8940.

Mr. ROBINSON. Mr. President, that is an entirely different bill. It is a more general measure. I should like to have the privilege of explaining the bill to which I have called attention.

Mr. McNARY. My only reason for calling the matter to the attention of the Senator was that the titles seem to contain the same language. I thought probably the bill had been repeated on the calendar.

Mr. ROBINSON. They are entirely different bills. The bill which I ask to have considered exempts for a period of 1 year drainage, levee, irrigation, and reclamation districts from the limitations of the general bankruptcy law which prohibit the filing of a second proceeding in bankruptcy within 6 years, provided such district has filed a petition in bankruptcy prior to the enactment of this measure.

Shortly after the enactment of the Municipal Bankruptcy Act, which was approved May 24, 1934, some three or four of such districts filed petitions for refunding their respective debts without making application to the Reconstruction Finance Corporation for loans for that purpose. The result in these instances was an adjustment as to maturity of dates of their bonded or other obligations, and a consequent reduction in their interest rates.

Subsequently the landowners in some of these districts, through the directors of the districts, and with the consent of a majority of the bondholders, through their representatives, have applied for loans from the Reconstruction Finance Corporation with which to refinance their indebtedness, some of which applications have been approved.

Without the benefit of the effect of proceedings under the amendment of May 24, 1934, referred to, such districts cannot secure approval of the maximum required by the Reconstruction Finance Corporation for closing and disbursing these loans. As amended, the exemption proposed by the bill to which I am referring will not open the door to any abuses, inasmuch as the measure is restricted to those districts which find themselves in the situation outlined.

The bill was introduced by the Senator from California [Mr. McADOO], and it is intended to meet a situation found to exist in some three or four districts. I hope the Senator from Michigan may see fit to withdraw his objection.

Mr. VANDENBERG. Mr. President, may I ask the Senator from Indiana [Mr. VAN NUYS] whether this is the bill he was explaining to the Senate a few moments ago?

Mr. VAN NUYS. No, Mr. President; this is an entirely different bill.

Mr. VANDENBERG. I thought it was different. I have no objection, and I may say to the Senator from Indiana that I have read the report of the bill he was discussing since I made objection, and I am perfectly willing to withdraw my objection to the consideration of the bill he was handling.

The PRESIDING OFFICER (Mr. MOORE in the chair). The clerk will state the amendment proposed to the pending bill by the committee.

The LEGISLATIVE CLERK. It is proposed, on page 2, line 2, after the word "district", to strike out the words "filing a petition under this section, or to prevent the approval of a plan under this section for any such district in any case" and to insert in lieu thereof the words "which file a petition under this section within 1 year after the date this paragraph takes effect and which prior to such date has filed a petition in bankruptcy", so as to make the bill read:

Be it enacted, etc., That subsection (g) of section 80 of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, as amended, is amended by adding at the end thereof the following new paragraph:

"The provisions of clause (5) of subsection (b) of section 14 of this act (relating to the granting of a discharge in bankruptcy more than once in 6 years) shall not be construed to apply in the case of any drainage, irrigation, reclamation, or levee district which file a petition under this section within 1 year after the date this paragraph takes effect and which prior to such date has filed a petition in bankruptcy."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF OFFICERS AND SOLDIERS OF THE VOLUNTEER SERVICE

Mr. CAPPER. Mr. President, I move that the Senate proceed to the consideration of a motion to reconsider the vote by which the bill (H. R. 9472) for relief of officers and soldiers of the Volunteer service of the United States was passed.

Mr. ROBINSON. Mr. President, I have no objection to the motion.

Mr. VANDENBERG. Mr. President, I desire to speak on the motion.

Mr. ASHURST. Mr. President, in view of the fact that the Senator from Michigan has withdrawn his objection to the bill referred to a short time ago by the Senator from Indiana [Mr. VAN NUYS], I suggest that we might pass that bill. I am sure there would be no objection to it.

Mr. VANDENBERG. I do not want to lose the floor.

Mr. ASHURST. I should not want the Senator from Michigan to lose the floor, of course.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas [Mr. CAPPER] that the Senate proceed to consider the motion of the Senator from Utah [Mr. KING] to reconsider the vote by which House bill 9472 was passed.

Mr. ROBINSON. Mr. President, I should like to inquire, what is now pending before the Senate?

The PRESIDING OFFICER. The motion of the Senator from Kansas is before the Senate.

Mr. McNARY. Mr. President, I hope the motion may be acted upon favorably.

Mr. KING. Mr. President, I dislike to dissent from the statement of my friend the Senator from Oregon. I am willing to have the matter taken up at this time for consideration, and I shall give reasons for my opposition to the bill.

Mr. ROBINSON. Mr. President, I think there is some confusion as to what the order intended is. As I understand, House bill 9472, an act for relief of officers and soldiers of the Volunteer service of the United States, passed the Senate something like 2 months ago. The Senator from Utah [Mr. KING] gave notice of a motion to reconsider the vote by which the bill was passed by the Senate. That has had the effect of tying up the proposed legislation in the Senate. The Senator from Kansas [Mr. CAPPER] has moved that the Senate proceed to the consideration of the motion to reconsider, and it is my intention, when the Senator from Utah shall have had opportunity to discuss the subject, to move to lay the motion of the Senator from Kansas on the table.

The PRESIDING OFFICER. The question is on the motion of the Senator from Kansas to proceed to the consideration of the motion of the Senator from Utah to reconsider.

Mr. VANDENBERG. I understand I am recognized on that motion.

The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. VANDENBERG. I desire to proceed.

WORLD POULTRY CONGRESS

Mr. COPELAND. Mr. President, may I make a request of the Chair?

Mr. VANDENBERG. I yield.

Mr. COPELAND. There was presented from the Committee on Agriculture and Forestry this morning a favorable report on Senate Joint Resolution 235, with an amendment. This is a measure providing for the appointment of delegates to the forthcoming Poultry Congress. The matter has been delayed for a number of weeks; it is very important that it should be attended to at once, and I ask unanimous consent that the joint resolution may be considered at this time.

The PRESIDING OFFICER. Is there objection?

Mr. ROBINSON. Mr. President, what is the joint resolution?

The PRESIDING OFFICER. The joint resolution will be read by its title.

The legislative clerk read the joint resolution by title, as follows:

Senate Joint Resolution 235, authorizing the Secretary of Agriculture to expend funds of the Agricultural Adjustment Administration for participation by the United States in the 1936 Sixth World's Poultry Congress.

Mr. ROBINSON. I have no objection to the consideration of the joint resolution.

There being no objection, the Senate proceeded to consider the joint resolution, which had been reported by the Committee on Agriculture and Forestry with amendments, on page 1, line 3, to strike out "$40,000" and insert "$25,000", and in line 14, after the words "United States" to insert a colon and the following:

Provided further, That no part of the sum authorized to be expended by this resolution shall be used for the payment of expenses of delegates to such conference other than Government and State Agricultural college officials.

SEC. 2. The President is hereby authorized and requested to extend to the World's Poultry Science Association an invitation to hold the Seventh World's Poultry Congress in the United States in 1939, and to extend an invitation to foreign governments to participate in and be represented by delegates and exhibits in such Congress.

So as to make the joint resolution read:

Resolved, etc., That the sum of $25,000, or such sum thereof as may be necessary, may be expended by the Secretary of Agriculture from the unexpended funds of the Agricultural Adjustment Administration, with a view to expanding the foreign demand for American-bred poultry through participation in the 1936 Sixth World's Poultry Congress, such funds to be used for staging a live-bird and educational exhibit, and for the expense of delegates of the United States to this conference: *Provided,* That of this sum a sum of $10,000 is hereby made immediately available for assembling, preparing, and shipping the live-bird exhibit and material showing poultry-husbandry methods followed in the United States: *Provided further,* That no part of the sum authorized to be expended by this resolution shall be used for the payment of expenses of delegates to such conference other than Government and State Agricultural college officials.

SEC. 2. The President is hereby authorized and requested to extend to the World's Poultry Science Association an invitation to hold the Seventh World's Poultry Congress in the United States in 1939, and to extend an invitation to foreign governments to participate in and be represented by delegates and exhibits in such Congress.

The amendments were agreed to.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed.

GREAT LAKES EXHIBITION, CLEVELAND, OHIO

Mr. HARRISON. From the Committee on Finance I report back favorably without amendment House Joint Resolution 547, and I submit a report (No. 2023) thereon.

Mr. BULKLEY. Mr. President, I ask unanimous consent that House Joint Resolution 547 be immediately considered.

The PRESIDING OFFICER (Mr. MOORE in the chair). Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution (H. J. Res. 547) providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes, which was ordered to a third reading, read the third time, and passed, as follows:

Resolved, etc., That all articles which shall be imported from foreign countries for the purpose of exhibition at the international exposition to be held at Cleveland, Ohio, beginning in June 1936, by Great Lakes Exposition, or for use in constructing, installing, or maintaining foreign buildings, or exhibits at the said exhibition, upon which articles there shall be a tariff or customs duty, shall be admitted without payment of such tariff, customs duty, fees, or charges under such regulations as the Secretary of the Treasury shall prescribe; but it shall be lawful at any time during or within 3 months after the close of the said exposition to sell within the area of the exposition any articles provided for herein, subject to such regulations for the security of the revenue and for the collection of import duties as the Secretary of the Treasury shall prescribe: *Provided,* That all such articles, when withdrawn for consumption or use in the United States, shall be subject to the duties, if any, imposed upon such articles by the revenue laws in force at the date of their withdrawal; and on such articles which shall have suffered diminution or deterioration from incidental handling or exposure the duties, if payable, shall be assessed according to the appraised value at the time of withdrawal from entry hereunder for consumption or entry under the general tariff law: *Provided further,* That imported articles provided for herein shall not be subject to any marking requirements of the general tariff laws, except when such articles are withdrawn for consumption or use in the United States, in which case they shall not be released from customs custody until properly marked, but no additional duty shall be assessed because such articles were not sufficiently marked when imported into the United States: *Provided further,* That at any time during or within 3 months after the close of the exposition any article entered hereunder may be abandoned to the Government or destroyed under customs supervision, whereupon any duties on such article shall be remitted: *Provided further,* That articles which have been admitted without payment of duty for exhibition under any tariff law and which have remained in continuous customs custody or under a customs exhibition bond and imported articles in bonded warehouses under the general tariff law may be accorded the privilege of transfer to and entry for exhibition at the said exposition under such regulations as the Secretary of the Treasury shall prescribe: *And provided further,* That Great Lakes Exposition shall be deemed, for customs purposes only, to be the sole consignee of all merchandise imported under the provisions of this act, and that the actual and necessary customs charges for labor, services, and other expenses in connection with the entry, examination, appraisement, release, or custody, together with the necessary charges for salaries of customs officers and employees in connection with the supervision, custody of, and accounting for articles imported under the provisions of this act, shall be reimbursed by Great Lakes Exposition to the Government of the United States under regulations to be prescribed by the Secretary of the Treasury, and that receipts from such reimbursements shall be deposited as refunds to the appropriation from which paid, in the manner provided for in section 524, Tariff Act of 1930.

ADMINISTRATION OF EMERGENCY-RELIEF FUNDS

Mr. VANDENBERG obtained the floor.

Mr. JOHNSON. Mr. President, will the Senator yield?

Mr. VANDENBERG. I yield.

Mr. JOHNSON. I think the subject about to be discussed by the Senator from Michigan is of such importance that we should have a fuller attendance of Senators. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Coolidge	King	Robinson
Ashurst	Copeland	La Follette	Schwellenbach
Bachman	Couzens	Lewis	Sheppard
Bailey	Davis	Logan	Shipstead
Barkley	Dieterich	Lonergan	Smith
Benson	Donahey	Long	Steiwer
Black	Duffy	McGill	Thomas, Okla.
Bone	Fletcher	McKellar	Thomas, Utah
Borah	Frazier	McNary	Townsend
Brown	George	Maloney	Tydings
Bulkley	Gerry	Metcalf	Vandenberg
Bulow	Glass	Moore	Van Nuys
Burke	Guffey	Murphy	Wagner
Byrd	Hale	Murray	Walsh
Byrnes	Harrison	Norris	Wheeler
Capper	Hastings	Pittman	White
Caraway	Hayden	Pope	
Clark	Johnson	Radcliffe	
Connally	Keyes	Reynolds	

The PRESIDING OFFICER. Seventy-three Senators having answered to their names, a quorum is present.

Mr. VANDENBERG. Mr. President, the House of Representatives yesterday passed House bill 12624, which is the first deficiency appropriation bill, and includes the relief program and appropriation for the next fiscal year. Inasmuch as I am in complete disagreement with the relief section of the House bill, and inasmuch as I am offering a complete substitute for it, it has occurred to me that we could save time if I were to present my substitute to the Senate today, and make my statement and explanation regarding it.

I am seeking, at the present time, to submit my discussion of the proposed substitute for the relief bill, first, for the purpose of saving the necessity of a double discussion, once before the committee and then before the Senate; and, second, for the purpose of avoiding the necessity of discussion at a later date, perhaps when time may be infinitely more valuable.

I desire to submit a complete substitute for the section of the House appropriation bill which deals with relief. The proposed substitute does the following things:

(1) It appropriates the sum of $1,500,000,000, plus the unobligated and unexpended balances in previous relief appropriations, estimated at $1,800,000,000.

(2) It sets aside the first $100,000,000 to be allocated to the States to meet unforeseen emergencies.

(3) It requires the balance, or as much as needed, to be equitably allocated to the States on the basis of (a) relative population; (b) relative unemployment; (c) relative cost of living, including climatic and seasonal differentials; (d) relative taxpaying resources.

(4) It requires each State to set up a bipartisan board of relief trustees as custodians of Federal grants-in-aid, and to match Federal grants by not less than 25 percent of State and local funds.

(5) It turns over to the States—and this is the essence of the entire challenge—complete power of decision relative to the type of relief, and complete responsibility for subsequent administration.

(6) It specifically penalizes any relief discriminations on the basis of race, religion, or politics, and makes any relief assessments for political purposes a crime.

I ask, Mr. President, that the amendment in the nature of a substitute, be printed in the RECORD as an appendix to my remarks, and that it be referred to the Committee on Appropriations.

The PRESIDING OFFICER. Without objection, the amendment, in the nature of a substitute, submitted by the Senator from Michigan will be received, referred to the Committee on Appropriations, printed, and printed in the RECORD.

(The amendment, in the nature of a substitute, submitted by Mr. VANDENBERG appears at the conclusion of his remarks as exhibit A.)

Mr. VANDENBERG. Mr. President, I may say in passing that in the event the substitute shall be rejected and we shall be dealing with the text of the House bill ultimately, I shall want also to offer three amendments to the House text, which I also ask unanimous consent to submit at the present time.

The first will include within the penal clause of the House bill the following language relating to persons penalized:

or who solicits or receives any political contributions from persons for whom any portion of the foregoing appropriation is intended.

That amendment will be offered on page 23, line 7, after the word "doing."

At another point, again defining the persons within the punitive definition of the House bill, I propose to insert, on page 23, line 4, after the word "boycott", the words:

discrimination on account of race, religion, or political affiliations—

In respect, of course, to the administration of relief.

And a third amendment, reading as follows:

Provided further, That no work-relief project shall be undertaken unless it has been specifically authorized by act of Congress or unless the entire sum necessary to complete it is allocated to it from this appropriation.

The obvious purpose of the final amendment being to prevent the spectacle which we have seen during the last year or two of small allocations being made from relief funds to projects which are left generally to subsequent appropriation bills to finance.

I ask that these amendments be referred to the Committee on Appropriations and printed.

The PRESIDING OFFICER. Without objection, the amendments submitted by the Senator from Michigan to House bill 12624 will be received, printed, and referred to the Committee on Appropriations.

Mr. VANDENBERG. Mr. President, I want to present to the Senate and for the RECORD, and particularly for the benefit of the Appropriations Committee, in whatever degree it may consider the proposed substitute, some of the reasons why I think it is essential here and now sharply to depart from the existing relief formula and to embrace a new course.

The substitute for the pending bill accepts primary Federal obligation to finance the major costs of feeding, sheltering, and clothing all worthy Americans who are in need. But it restores responsibility to the States for relief decisions and relief administration, and enforces State cooperation. It would demobilize expensive and often scandalous Federal bureaucracy, and ultimately would bring us in sight of a balanced Budget. But it would multiply the dependable aids and hopes extended to the whole American army of the unemployed and destitute.

I have no illusions about the substitute's reception. Probably it is preordained that the country shall persist, for 1 more year at least, in the reckless, wasteful, corrupting, and inadequate relief process which is the administration's present infatuation. But the self-styled Presidential "quarterback" so frequently gives his "team" new signals for new play that I do not entirely despair of change before it is too late.

Indeed, I think I might digress to say, Mr. President, I am greatly encouraged in this later aspect by the courageous action of the Democratic majority of the Senate Finance Committee, joining with and cooperating with the Republican minority of that committee at the present time, in apparently insisting upon rejecting a tax bill which, in my very humble judgment, is the greatest legislative atrocity I have ever confronted. I have no intention to argue the tax bill at the moment, but I should like to add that no tax bill can be defended as good tax legislation which requires of a taxpayer that when he makes out his return he shall have at his elbow a lawyer, an accountant, a psychoanalyst, and a crystal gazer in order to keep out of jail. It might also be added that if this substitute relief plan were adopted—recapturing some $1,800,000,000 of already existing appropriations, unexpended and unobligated—it might be possible to avoid the necessity of any tax bill at all. But I do not want to talk about taxes. I want to talk about relief.

Mr. President, I think I can prove that the substitute is modeled on a principle which would win the approval of the majority of our citizens; that it would far better serve the whole of our people who deserve relief; yet that it would save ultimate billions of dollars to the hard-pressed Treasury and to our distraught taxpayers, and thus would hasten the essential hour when we shall once more pay as we go and when we shall quit the indecent and unsound habit of gaily charging our bills to our grandchildren. In whatever degree these life-giving objectives may be approached we surely can agree that the achievement would be a benediction.

Now, Mr. President, let me summarize my case in advance.

I complain against the existing relief system, which the pending House bill would extend and perpetuate, on the following grounds:

(1) It involves degenerating Federal dictation to the States in affairs which, both by tradition and logic, belong in the intimate jurisdiction of State decision and State re-

sponsibility. States' rights are inevitably matched by State duties. Abandonment of the latter emasculates the former.

(2) It invites the dangerous and ultimately fatal habit of quitting local self-reliance even as it destroys local autonomy. It progressively encourages the process of central subsidies, which have ruined every nation in history that has surrendered to their insidious and paralizing influence. Thus it destroys morale and creates more problems than it solves.

(3) It involves expensive duplication of effort and crushing costs in needless Federal bureaucracy which sap the funds that rightfully belong to citizens in legitimate need of relief. Thus, too, it ominously drains the public credit. Therefore it is a dangerous reliance, particularly for those who require relief, because those who thus rely upon the public credit for subsistence have the greatest stake of all in preserving the public credit from destruction.

(4) It spells poor business. We have learned in the House hearings that during the period of 1933 to 1935, 10.7 percent of all funds expended for relief went for administrative purposes. This seems to me to be a shocking diversion; and it becomes doubly shocking when we discover that the cost of relief administration can go as low as 5.4 percent in one State yet can leap to an altitude of 18.3 percent in another. These unnecessary charges upon relief—a burden alike to the needy and to the taxpayers—can inevitably be reduced when the Federal bureaucracy is demobilized and the vigilance of home-rule responsibility is returned to its essential function.

I may add, parenthetically, at this point that the administration's disregard of the lessons of experience is completely proved by its purpose to concentrate this year on W. P. A. and to abandon the more fruitful and infinitely cleaner P. W. A. entirely.

(5) It wastes vast sums upon experiments which are no part of our immediate problem. Thus it prodigally speculates in the thinning resources of the Republic at a moment when conservation should be the watchword of the hour.

(6) The existing system invites inequities as between the States which are as insufferable as they are inevitable when an enormous Federal bureaucracy, fattening upon the food which it administers to others, attempts to apply common standards to the complex and diversified problems of thousands of different and differing communities scattered across 3,000 miles of continental empire.

(7) The system which would be perpetuated by the House bill, received today, is constantly exposed to political exploitation, because no matter how bravely the central authority may resist these pressures and these cankers it is impossible to protect such a ramifying system from the consequences of political administration, political prostitution, and political duress.

(8) The existing system is inadequate to meet the complete relief necessity because it acknowledges a Federal interest solely in employables who are transferred from relief to work relief, entirely abandoning to doubtful local resources the care of employables who have not been on relief, plus all unemployables. Thus it produces class favorites among the hungry themselves. It extends special privilege to some and ruthlessly denies all consideration to others.

(9) Under the existing system relief loads, relief costs, and reemployment increase together. It is a positively fantastic anomaly. As the need for relief goes down the burden of relief goes up. Where will such a topsy-turvy process end? Either times are not better—a premise which the administration hotly rejects—or the relief system is bad. Take your choice. I am driven by the sheer weight of the proofs which I shall submit to embrace the latter alternative. Therefore I am driven to seek a better way; and the better way seems obvious.

The proposed substitute undertakes to cure these infirmities. It makes no pretense of perfection. Undoubtedly it, too, is vulnerable in spots. But it asserts a principle and points a goal. These are its intended purposes:

(1) To accept Federal obligation to finance the major burden of all basic relief, but to demobilize the entire Federal relief bureaucracy and to return the responsibility of decision and administration to the States.

(2) To create reliable nonpartisan trusteeship in each State for the disbursement of the joint relief funds created, first, by Federal allocation; and, second, by State contribution, which must be at least 25 percent of the whole.

(3) To entrust the Federal allocation to the President on the basis of, first, relative population; second, relative unemployment; third, relative cost of living, with a special fund for emergencies; and, fourth, relative financial resources.

(4) To leave each State entirely free to choose its own mode of relief and thereupon to require each State to take entire and complete responsibility for administration.

Mr. SCHWELLENBACH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Washington?

Mr. VANDENBERG. I yield.

Mr. SCHWELLENBACH. I wonder if the Senator has given consideration to and would discuss in detail the length of time necessary to survey the country in order to arrive at that point of distribution as between the various States?

Mr. VANDENBERG. If the Senator will indulge me I shall hope to reach that precise point very shortly.

Continuing the list of claimed assets at least for the substitute:

(5) To cure all political exploitation of relief, so far as possible, and to assure all needy persons equitable treatment regardless of race, religion, or political affiliations.

(6) To meet the entire relief emergency in a complete and adequate way, yet to largely reduce the cost of the entire undertaking and thus to hasten the moment when wild Federal financing will cease to threaten not only the solvency of the Government but also the restoration of successful private business and the restoration of private jobs.

Mr. President, I shall subsequently enlarge upon my discussion of these purposes. Suffice it for the moment to say that the substitute accepts the President's estimate that $1,500,000,000 of additional funds are required for the next fiscal year, although we do not believe any such sum is necessary or will actually be used after present unexpended balances are recaptured and after the new system sheds existing duplication, extravagance, and waste. But we prefer, for the time being, to use the President's own figure lest the paramount consideration—namely, the establishment of a sound principle—be handicapped by an irrelevant argument in emotional mathematics. The ultimate advantage, in terms both of money and human values, will be inevitable and irresistible.

It will be my contention that such a system will largely cure all eight of the indictments which I have filed against the existing regime. It will save money by its sheer simplifications. It will save human values by acknowledging a Federal obligation to all distressed persons. It will save scandal and exploitation by the irrepressible authority of neighborhood opinion. It will save waste by concentrating a maximum use of available funds upon the distressed. It will save prejudicial inequities as between States and as between individuals. It will save the public credit and thus hasten that restabilization which is prerequisite to reemployment on a large scale. Last, but far from least, it will halt the deadly trends toward undemocratic centralization of power in a Washington dictatorship. It will save the American system.

Let me repeat that the substitute does not pare the total requested by the President. It is my conviction, however, that this new system will pare itself, particularly in another year, when, for the first time, we shall have adequate relief statistics as required by one section of the substitute.

I digress to refer to the interrogatory of the able Senator from Washington [Mr. SCHWELLENBACH], and to agree that there is at this moment a gross lack of adequate statistics covering the basis of this challenging problem. One of the primary essentials to any businesslike approach to the matter now certainly must include arrangements for the accumulation, the mobilization of authentic and dependable

statistics touching all phases of the problem. I think we have reached that point in the substitute.

In the substitute we also propose to reappropriate any unobligated and unexpended balances remaining from previous relief and work-relief appropriations. The only available testimony regarding these amounts would indicate that on March 31, 1936, $2,061,000,000 of the last $4,000,000,000 bill were unexpended and $1,110,000,000 were unobligated. In the House hearings, P. W. A. Administrator Hopkins estimated that something over a billion dollars of the funds appropriated in 1935 for emergency relief would remain unexpended on June 30, 1936. Budget Director Bell stated that he believed that approximately $1,780,000,000 would remain unexpended from funds appropriated by Congress during the period 1933 to 1935 for the purpose of relief.

It is to be noted that, with the addition of the proposed $1,500,000,000, the Administration would have nearly $3,300,000,000, the amount of the original N. I. R. A. appropriation in 1933. On the basis of State allocations and responsibility this would do more, in terms of real relief for its rightful beneficiaries, than has yet been done for them under any bureaucratic device heretofore embraced, if we could proceed under the theory of the substitute, the theory of home rule and home responsibility, home decision, and home administration.

Mr. President, I undertook to say that I thought I could prove a supporting attitude in American public opinion for this totally different approach to the relief problem. Let us see about that.

What does the rank and file of American citizenship think about this problem? The well-known American Institute of Public Opinion undertook to answer the question in its poll published April 26, 1936. First, the institute sought to determine whether people believe that "politics plays a part in the handling of relief in your locality." The referendum resulted as follows: "No opinion", 17 percent; "No", 18 percent; "Yes", 65 percent.

I pass this phase of the poll for the time being because I am not here raising the political issue. It belongs in the consideration only because the institute considers it a major factor in settling the other question which it asked; namely, "Should the responsibility for caring for all persons on relief be returned now to State and local governments?"

It is a shocking thing, violating not only the sense of humanity but also the sense of American sportsmanship, to think of relief needs being prostituted to partisan politics; to think of worthy persons forced to sell their consciences—to barter their American birthright—before they can qualify for bread. Charges of this character, often well substantiated, have been a common sensation during the past year. They have come just as vigorously from Democratic as from Republican sources. Indeed, 55 percent of the Democrats who answered the institute's question about "politics in relief" responded in the affirmative.

To whatever extent this sordid, insufferable thing is true, it produces two malignant results: First, it degenerates and crucifies American citizenship; second, it vastly multiplies the burden of cost. Neither result can be tolerated either in humanity or in logic.

We never have been able to get a senatorial investigation of charges of this nature although the charges have rolled in from every section of the land. Adequate ventilation has never been permitted. Pious disavowals by administrative higher-ups is not enough. It is particularly disconcerting to read in the Washington Star that W. P. A. files are being destroyed on a large scale. I do not make the charge, because I do not know; but I do not close my eyes to statements in the public prints that are thus far unchallenged. This is an ugly contemplation. The whole thing is utterly unsavory. I do not linger upon it this afternoon. My present objective is something else. Neither do I impugn any motives, in the absence of proofs, because beyond any shadow of a doubt many earnest, patriotic, unselfish, devoted men and women are laboring for the common welfare in this great relief undertaking.

I do not question the utility or the integrity of scores and hundreds of the many great W. P. A. projects that have been undertaken. I simply say that, for the sake of clarity and a fair American understanding of the record, it is unthinkable to me that the present Congress should adjourn without initiating a complete and authentic relief investigation. I simply say that, in my judgment, these sordid infirmities are inevitably inherent in any relief system which centralizes its distributions and controls in Washington bureaucracy.

Mr. President, the situation certainly could not be worse if responsibility were returned to the States. In my view, and evidently in the institute's view, it would be immeasurably better. State politics might still obtrude in spite of every safeguard to the contrary, but the policing effect of neighborhood opinion, the most vigilant and effective of all watchmen, under a system of renewed State and local responsibility, would inevitably circumscribe this jeopardy. Consciousness in the States that they were again spending at least a portion of their own money would afford a further wholesome restraint. The criminal sections of the proposed substitute would afford an everlastingly effective restraint. In any event, the American Institute of Public Opinion evidently found this circumstance—the circumstance of politics in relief—to whatever extent it exists, to be one of the controlling factors in the responses which it procured from the country in answer to the primary question which is our immediate concern.

I repeat the question:

Should the responsibility of caring for all persons on relief be returned now to State and local governments?

What did the country answer? "Yes", said 55 percent. "No", said 45 percent.

This is far from an eloquently conclusive decision, although it is a convincing American majority; but I submit that under all the circumstances it is a rather amazing confirmation of the view which I am urging upon the Senate. Working against the proposition would be an inevitable fear, expressed or implied, that the dismissal of Federal responsibility might mean a corresponding reduction in Federal contributions. Working against it would be the perfectly understandable human interest of those who have a stake in the continuation of the existing Federal set-up—meaning those, for example, who have or expect Federal works contracts or those who live in communities with particularly vivid expectations of a spectacular share of continuing Federal bounty, or those who profit in any way whatever from the swollen Federal administrative pay rolls. Working against it would be the great influence of the President of the United States, who has specifically declared against this restoration of State autonomy; and his influence is inevitably reflected in the vast ramifications of his gigantic political machine, which touches every hamlet in the land. Yet in spite of all these adverse influences, and many others, more than half of our people endorsed the proposition for which I here contend. All but 16 States returned a majority in favor of it. Most amazing of all, 41 percent of the "reliefers" themselves voted for it.

What were some of the reasons assigned to these viewpoints? It seems to me they are highly significant and revelatory. The institute finds the following to have been the most frequent statements:

"It seems to me the States and counties understand the needs of their own citizens."

"States and counties know the needs of their own citizens better."

"Local governments can handle relief cheaper."

"Relieve Uncle Sam of the job. He's done his part."

"There's too much graft in Federal relief."

"The local governments have to shoulder the responsibility some day. Right now looks like as good a time as any."

Are these reasons wide of the mark? I think not. They are founded in reality. They put first things first. They face facts and are guided accordingly. They are distinctly in line with the expert and experienced view of Robert L. Johnson, former relief administrator for Pennsylvania, who declared, in a series of articles in the Saturday Evening Post, that the return of relief administration to the counties, with local taxpayers paying a share of the cost, "would put a check on the waste and inefficiency with which relief expenditures now are handled."

Is this or is it not a laudable objective? Do not our unemployed and our unemployables have an even greater stake

than any of the rest of us in "putting a check on waste and inefficiency"? Will there not be more of our substance left for them if less of it is needlessly frittered away on waste, inefficiency, extravagance, and politics?

The conclusion of the American Institute of Public Opinion was as follows:

A majority of the voters in a Nation-wide poll have come forward to approve a plan which they believe will help break the log jam of unemployment relief, often called the most stubborn problem of our time.

Nearly everybody knows that approximately 20,000,000 people were on relief in March 1933; that the Federal Government has spent or loaned $16,000,000,000 for relief and recovery since then; and that in March 1936 there were still 20,000,000 on relief.

The course of action which the voters favor, after watching 3 years of Federal aid to the needy, is to turn the responsibility for relief over to the States and localities—a course that many observers believe would lead to a reduction in relief rolls.

Mr. President, it is particularly useful and illuminating to consult the recommendations of the American Association of Social Workers, representing the front line of social defense in this battle, to determine the extent to which this social-service group approves the alternative for which I am arguing. While this association recommends the continuation of work relief—provided the work relief embraces only projects—

Which offer genuine work with material usefulness or cultural values which are suited to the capacities of those to be employed.

And provided further that—

The number so employed shall be conditioned upon the number of genuine jobs available, rather than upon pressure to put a maximum number to work at a given time.

The great, dominating recommendation of the American Association of Social Workers is for grants-in-aid to the States and then—

After the transfer of funds under such grants, the direct supervision and actual administration thereof should be left entirely to the State and its subdivisions.

That is the essence of my proposal. It is the key to a rational answer to this desperately important and complex problem which will plague the United States to the point of ultimate disaster unless it is speedily resolved. The direct supervision and actual administration of relief, after it is substantially financed by Federal grants in aid must be left to the individual State and its subdivisions. As a matter of fact, my own proposal is more liberal than that of the American Association, because the association suggests a Federal contribution as low as 25 percent with—

Equalization grants designed to balance the disparity between States in wealth and income on the one hand and needs and liabilities on the other hand.

Whereas my proposal invites the possibility of 75 percent of Federal aid. But the mathematics is far less important than the principle; and on the basic principle I find myself sustained by this great American Association of Social Workers. It is this principle that I urge upon the Senate's conscience, because the principle is absolutely essential to the preservation of American institutions and the protection of the public credit. We ignore this axiom at our peril.

Listen, Senators, to what this association has to say respecting the general problem:

No one defends existence on relief as a way of life. It is tolerated and must be perpetuated until self-support becomes a possibility. Let the condemnation of society be directed against the causes of human misery and not against the measures which have to be adopted to mitigate suffering.

Let us remember that sententious statement in assessing the relief courses which we shall pursue. We are not free agents to do precisely as we please. We are bound within unavoidable limitations. The dictates of the heart would order a made job at prevailing rates of wage for every unemployed person in the land. But the dictates of the sane head remind us that if we pursue such a course we shall bankrupt the Nation and leave nothing for the unemployed or anyone else. Wishful thinking is dangerous and deadly in such circumstance. Our problem, whether we like it or not, is to find the measures "which have to be adopted to mitigate suffering" pending the time when "self-support becomes a possibility" under the restored functioning of normal private business. Neither President Roosevelt nor Administrator Hopkins nor their entire emotional entourage can escape this naked necessity. To pretend to escape when we know better is to "fiddle while Rome is burning."

Listen again to the American Association of Social Workers:

The public fails to comprehend that despite the enormous sums available the recent change in the Federal program has increased rather than lessened the misery and deprivation of a large part of the unemployed and others in need.

That is an amazing statement, Mr. President, particularly to come from the social workers themselves through their national mouthpiece.

Do not run away from that indictment, Senators. Despite the expenditure of "enormous sums"—billions upon billions which we have cheerfully spent and equally cheerfully charged to posterity—misery and deprivation have increased. Shall you cling to such a system? Shall you incorrigibly multiply both debt and misery simultaneously? Is our legislative incompetence reduced to such pathetic impotence? Must we persist in the path of error lest a change of direction might confess that a mistake has been made? It is unbelievable.

There will be no recriminations if the change be frankly made in time. I state here and now that it was necessary to do something, and that I join myself to no indictment of any honest effort that has been made in this behalf. Neither does the American Association, which unreservedly applauds what it freely declares to be "a more effective influence than in any other period in the history of this country." I have no interest in withholding this compliment to good intentions. But good intentions alone are not enough. It is all beside the point. The point—the terrible point—is that we have made mistakes; that we must profit by these mistakes; and if we fail, through pride of opinion or for any other reason, thus to profit by these mistakes, then we deserve unmitigated condemnation.

The American Association of Social Workers points these mistakes. It says:

The imperative need is the realinement of Federal, State, and local forces in a supreme and sustained effort, reaffirming the policy of a cooperative relationship between the three levels of Government covering financial participation and standards of personnel and administration.

That, Mr. President, is my plea—a plea for a "cooperative relationship" in which each unit of Government shall do its own full part, the part which each is best equipped to do. The pending bill perpetuates all the mistakes and errors and wastes and extravagances and inequities of yesterday. The substitute seeks, in good faith, to avoid them, and to build a better, a safer, a wiser tomorrow upon these monitory experiences. To do less is neither courageous nor intelligent.

I do not want to labor the point. But I, for one, cannot escape the challenge which this American Assciation puts to us in the manifesto issuing from its delegate conference of February 16, 1936.

Listen to this. This is a manifesto issued by the mobilized social workers of America, those who are in the front line in immediate primary contact with the problem of relief. This is what they said:

The fact is that at no time since the Federal Government assumed responsibility through making loans to States in 1932 for aiding those unemployed has the position of vast numbers affected by the depression been so insecure.

There is the truth. Lay no unction to your souls, Senators, because the superficial statistics encourage a belief that some of our people are very much better off than they were 4 years ago. At no time, says this unpartisan authority, has the position of vast numbers affected by the depression been so insecure. Why? I continue to report the findings of the American association:

Our recent survey covering various States indicates that the governmental work programs do not and cannot provide for all those unemployed who are able to work. Vast numbers of other

persons are in need of relief, and for them there is no assured provision in the assistance programs of the State or local governments. These needs will continue for many years to come and are so vast that they create a relief problem far greater than any relief responsibility ever shouldered by State and local governments. The withdrawal of Federal relief funds has resulted in low-grade pauper treatment over wide areas, due to reduction of relief grants and lowering of personnel standards and administrative practices. Nothing but intense suffering and demoralization attendant upon harsh and oppressive administration of relief is in store for a great number of families.

Are you content with that prospectus? Make no mistake about it; so long as you cling to P. W. A. or W. P. A. or any of their alphabetical kin, you are meeting only a portion of the distress problem. You are ignoring the great group of employables not on relief and the greater group of unemployables. You are condemning millions of your fellow citizens to "intense suffering and demoralization"—not my words, but the words of the American Association of Social Workers. You are perpetuating "harsh and oppressive administration of relief." Your escape is in comprehending the whole problem on the basis of Federal grants-in-aid to the States with complete responsibility for net results restored to the States. This is no panacea; but it is the road to hope.

Mr. President, one of the sturdiest discussions of this subject which it has ever been my privilege to read was an address delivered recently by Frank J. Scott, former assistant administrator and comptroller of the Works Progress Administration in New York City. Here is one who, it must be acknowledged, knows whereof he speaks. He looks at W. P. A. from the inside. Then he turns it inside out. His argument marches to an invincible conclusion. It is substantially the same conclusion which I am urging upon the Senate this afternoon.

Mr. Scott is not content to linger in the realm of boondoggling theory. He is realist enough—and a few more realists at the helm would be a blessing if anything like W. P. A. is to continue—he is realist enough bluntly to recognize the fact that 17 cents out of every dollar earned in 1934 by everyone in the United States is consumed by the Federal Budget for the fiscal year now ending. He is realist enough to know that the existing system must sharply change in the near future, or even so rich a country as America will go bankrupt, and the first victims of the collapse will be those who depend upon our solvency for their subsistence. In other words, it is no kindness to our unemployed and our unemployables to persist in a system which will one day confront them with bare cupboards. They, of all Americans, have a major stake in the reorganization of this whole system on a basis of sound economy.

I repeat that Mr. Scott is a realist. Remember, too, that he speaks from inside W. P. A. He bluntly asserts:

W. P. A. is a glorified dole, but costs twice as much or more as something that might frankly be called a dole.

These are not my words. This is the ordered conclusion of the assistant chief administrator of W. P. A. in New York City.

There has been much talk about the dole taking away a man's self-respect, and that W. P. A. restores it because he is employed to do some useful work. That is a pleasant way to present it, but in my judgment it is just plain bunk.

This is Mr. Scott speaking, too:

Every man and woman employed on W. P. A. was taken from the relief rolls. To get on relief rolls an individual must, in effect, take a pauper's oath. That being the case, why all the cheers about W. P. A. maintaining a man's self-respect, particularly as anyone who has watched W. P. A. laborers work knows that they are not doing the kind of job that would be expected of them in private life?

Senators may or may not concur in this frank view. However, it cannot be contemptuously brushed aside without consideration. It goes squarely to the humanities involved in this survey of the Nation's biggest puzzle. I know of nothing more cruel, I repeat, than the present arbitrary and ruthless rule of action which requires of a man that he shall have been upon direct relief during the month of November 1935, before he can qualify for work relief. This penalizes every native element of self-reliance which has been the supreme American characteristic. It punishes brave individuals who battle upon their own resources to the last possible moment before yielding to the crushing burden of depression. It rewards quick, swift, and easy surrender. The sooner you quit struggling, the surer you will be to get help. I cannot subscribe to any such horrible distortion. I prefer a system under which all citizens in legitimate need shall stand upon an equality, and relief shall play no favorites.

I do not argue for the so-called dole, although I am not afraid of the word if it represents the greatest aid for the greatest number. The plan I favor returns to the States the right and the responsibility of decision. It is for the State to decide what formula it shall pursue, whether it be home relief or work relief, or a combination of the two. It is for the State to decide what it shall do with its liberal share of a liberal Federal grant-in-aid matched by its own draft upon its own resources.

But let me return to Mr. Scott who, incidentally, observes that the result of centralized Washington control over W. P. A. produces "operating duplications that are staggering in cost and ineffective in results."

There is testimony from one who knows. I have been speaking about the immense sums which can be saved without any diminution of relief itself, if we can only decentralize the Washington bureaucracy, with all its duplication and dictations and its nonessentials. Mr. Frank J. Scott, former assistant administrator and comptroller of the W. P. A. in New York City says it himself. He speaks of—

Operating duplications that are staggering in cost and ineffective in results.

Why should we run away from the problem? That is the thing we are asked to perpetuate in the House bill. Mr. Scott concludes as follows:

The per-capita public debt now totals $400, against $58 in 1913, an increase of 590 percent, whereas the per-capita income has only increased about 15 percent. In the face of these staggering facts, it is generally conceded that we still have 10,000,000 unemployed. To what extent and for how long can any government continue the present spending pace? Our present spending is so pleasant to so many and our direct taxes affect so few that no one seems to care. The Nation will go on its merry way until our elective Representatives have the courage to insist that we shall pay for every dollar spent henceforth by taxes, and that a substantial part of these taxes shall be direct taxes. Then, and only then, will each of us, as a committee of one, wake up to the fact that the Government is possessed of no magic which enables it to draw wealth from the skies. Then, and only then, will the subject of relief—

That is the thing I am stressing, and that alone—

Then, and only then, will the subject of relief be taken out of politics—

And put where?—

and put back to local communities, where it belongs, and on a basis that will protect the real "forgotten man"—the great middle class—who, now and always, whether he knows it or not, has paid the bulk of Federal taxes. As a committee of one appointed by myself, at the recent suggestion of President Roosevelt, I invite your attention to the necessity of a policy to pay as you spend, so that the citizens of this country can determine for themselves how much altruism this country can really afford and still not too heavily mortgage the lives of this and future generations.

I emphatically agree both that we must pay as we spend and that relief must be taken out of politics and out of Washington and put back upon primary State and local responsibility, where it belongs.

Mr. President, there are several highly illuminating exhibits which I desire to include in the RECORD, but which I shall not burden the Senate to read in detail. I simply indicate that one very amazing experiment took place in Huron Township, Wayne County, Mich. This is an interesting and significant exhibit. It involves the smallest unit of government, a township; but, in the final analysis, our national experience is the sum total of these local experiences. I quote briefly from a report in the Detroit News, respecting Huron Township, Wayne County, Mich.:

Huron Township, which seceded from the county welfare relief administration and went on its own to administer and finance relief February 1, today is congratulating itself.

The township board, headed by Otto C. Koster, supervisor, who last January notified the county relief administration, "We'll take

care of ourselves and set an example for the Nation", reviewed local relief activities at its monthly meeting at Improvement Hall with gratification.

The case load has been cut from 19 families to 12; relief costs were sliced in half; ne'er-do-wells elected to move out of the township, and idlers suddenly found jobs in time to escape a cordwood project set up by the township board.

I have no interest in harsh or unsympathetic treatment for persons who deserve and require relief. On the contrary, everything I am saying trends in the direction of better treatment for more of them than has been the record heretofore. But local responsibility, I am bound to say again and again, polices these situations to eliminate their wastes and exploitations in a fashion utterly impossible when absentee overlords and treasurers operate the system from Washington.

When John F. Ballenger, Wayne County relief administrator, heard about what had happened in Huron Township, this is what he said:

I'm not so sure but what those officials are right. I always have been of the opinion that those closest to the picture would be bound to know the business best. It looks like a step in the right direction.

"Those closest to the picture * * * know the business best." That is the beginning and the end of my argument. It pleads for the restoration of home responsibility and home rule. Those farthest from the picture know the business worst. That is the story of central Washington controls—and it is the inevitable story, because distance dilutes the mutual sense of obligation.

Take the converse of the Huron Township case. I suppose there is no more challenging exhibit than that of Fulton, N. Y. "The Mystery of Fulton, the City the Depression Missed" was the title of the revelation in the New York Sun of March 21 last. Listen to this amazing balance sheet!

I am speaking, Mr. President, about what happened in Fulton, N. Y. In 1928 private employment took care of 3,464 workers and private charity took care of 136 cases at a cost of $17,500. In 1936 private employment takes care of 4,327 workers and Government charity takes care of 858 cases at a cost $350,000. Not only does the number of workers in private industry increase heavily but the private pay rolls increase from a predepression high of $2,753,000 to a 1936 altitude of $4,404,027. But at the same time, in this same city which "the depression missed", the relief cases have multiplied 600 percent and the cost of the relief load has multiplied 2,000 percent.

And, Mr. President, precisely that same sort of relationship, in greater or less degree, exists in every community in this land, and it is a fundamental, basic, inescapable challenge against this centralized bureaucratic attempt to run the whole relief program of America from the city of Washington.

What has happened at Fulton, N. Y., simply typifies, in magnified form, the Nation-wide experience. Reliance upon imported relief funds, administered under absentee formula, inevitably multiplies the cost and divides the efficiency. It is bad social service, bad morale, bad economy, bad business, and bad citizenship.

Every community in the Nation has had its own experience in this respect; and usually, if the testimony be candid, it will be conceded that the present system, no matter how nobly meditated, is infinitely more expensive and infinitely less efficient and less satisfactory than home-rule responsibility for these dispensations. "Those closest to the picture know the business best."

Mr. President, I do not want to labor this point, but I have one or two other exhibits which I desire briefly to submit for the RECORD. Of course, the major problem in connection with success for the alternative proposal which I am submitting turns upon the question of an equitable allocation by the President to the States in the first instance. But I submit that this is not too difficult; and I am now coming to the question submitted some time ago by the able Senator from Washington [Mr. SCHWELLENBACH]. Indeed, the old F. E. R. A. effectively discussed this matter in response to a Senate resolution in the first session of the Seventy-fourth Congress. Assistant Administrator Corrington Gill, who is still with us, indicated four indices that should be consulted in arriving at equitable State allocations. He named: (1) relative relief needs, which is to say, relative unemployment; (2) relative abilities of the political units to finance relief; (3) relative amounts spent by the political units for public welfare purposes other than direct relief; and (4) geographical variations in living standards and relief costs, as well as weather and seasonal factors. It will be noted that my substitute substantially pursues this same formula which was recommended by the F. E. R. A. itself, 3 years ago, and which, therefore, I assume, has a feasible reality upon which we may lean. Therefore the formula should be accredited high and persuasive credentials by my Democratic friends across the aisle. My proposal is not without precedents. I am no lonesome pioneer.

Mr. Gill's report said something else, and it bears significantly upon the problem. He also found that the need for Federal assistance may be affected by—

The unwillingness of some Governors to call special sessions of the State legislatures, the lack of responsibility or the presence of political factionalism which may prevent legislative action, and in a few cases perhaps the unwillingness of the people dominating the political scene to go on record as favoring the raising of funds for the relief of their unemployed.

Those are not my words; those are quoted from the testimony of the Assistant Administrator of F. E. R. A. before a congressional committee.

So far as I am concerned, I am unwilling to surrender to any of these latter vicissitudes. I am unwilling to consent that the Federal Government inherits an obligation merely as the result of the deliberate failure or refusal of a State to do its own duty. I particularly resent any system which burdens the national taxpayer simply because some State regime is unwilling to face its own responsibilities; but I strongly suspect that this element has not been absent from these past inequitable equations. The existing system, which I condemn, is made to order to encourage just such unpatriotic and unsportsmanlike attitudes. It is made to order to reward the slacker. I prefer a system under which cooperation, at least to a minimum extent, is mandatory. Let it be noted that my substitute provides leeway for real emergencies, for I would be the last to penalize real State distress. But it requires a ruggedly honest accounting; and the patriotic taxpayers of the Nation always are entitled to a rugged accounting whenever bounties move out of the National Treasury to anybody. Any other rule invites political favoritism, which is the anteroom to political despotism. Capacity to pay and relative need must be the rule of allocation or any relief system is sheer exploitation. The old F. E. R. A. has testified that an equitable rule of allocation is possible. My proposed substitute invokes that rule. Anything else is unfair, and the existing system is something else.

Mr. President, just one further exhibit and I shall then reward the patience of my friends by subsiding.

Nothing could better illustrate the wide divergence of the relief problem in the various States—and thus the wisdom of getting the determination of relief policies and their administration back as closely as possible to the individual States—than the wide divergence in relief standards among the various States as revealed in recent experience. Direct relief costs per family for the 3 years of 1933, 1934, and 1935 have varied from a total—now think of this—of $3,472 in one State to $426 in another. They have varied from a State average of $1,479 in the highest-cost group to a State average of $644 in the lowest-cost group.

I ask to have printed at the conclusion of my remarks a table which will be marked "Exhibit A" to sustain the contention.

The PRESIDING OFFICER. Without objection, the table will be printed in the RECORD.

(See exhibit B.)

Mr. VANDENBERG. Mr. President, many factors contribute to these variations. It is inevitable that there must be variations. The localized problem differs, depending

upon such things as higher living costs in urban areas, lower living costs in warm latitudes, and so forth. It emphatically differs in respect to traditional standards of relief and the local disposition to economize both in the cost of relief and the cost of administration. But since these variations, many of them legitimate variations, are unavoidable, it seems a matter of elementary logic to me that we must strive for a system which puts a premium upon holding them within the narrowest possible bounds. It seems equally logical that this demands a restoration of maximum local responsibility.

Federal control accentuates the difficulties and the discrepancies. State responsibility brings home the consciousness of obligation. Until this occurs, definitely and specifically, there is no curb upon the variations. Therefore, it seems incontestably sound to me that, first, each State must again become the responsible unit of decision and administration, and, second, that each State must be required, as the sole practical means of holding it to strict accountability, to match in some appropriate percentage the relief funds received from the central government.

It always will be impossible to reduce Federal grants in aid to a basis of absolute and exact equity because there never can be any absolute rating of relative relief needs and relative capacity to pay. But it should be possible to avoid the wide discriminations now apparent on the face of the record. No one wants to divide the United States into 48 watertight compartments and to say that each shall live unto itself alone or that all shall stand on a dead level, regardless of their resources, in respect to Federal aid. But the sense of responsibility should be the same in every State. I know of no way to measure it and require it except to demand an arbitrary minimum of State contribution to match the larger Federal contribution.

For the calendar year 1935 the proportions of the relief bill in each State paid by each State itself have varied quite as widely as the relief standards to which I have referred. One State paid 65 percent of her own bills, for example, while another paid less than 1 percent of her own bills. I beg to be acquitted of pretending any invidious comparisons. That is not my purpose. I simply show the facts. They may speak for themselves in whatever fashion they deserve.

Mr. SCHWELLENBACH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Washington?

Mr. VANDENBERG. I yield.

Mr. SCHWELLENBACH. I should like to ask which State it was that paid less than 1 percent.

Mr. VANDENBERG. I shall be glad to give the Senator the information, though I shall ask to have placed in the RECORD a table which will fully illuminate it.

Mr. SCHWELLENBACH. I should like to know which State it was.

Mr. VANDENBERG. I shall have to beg the Senator's indulgence until I can locate it. I have it among my papers, but do not want to detain the Senate while I look for it now. I shall provide the Senator with the information before I conclude.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. VANDENBERG. Certainly.

Mr. McKELLAR. Does the Senator's statement show what amount each State received in the way of relief?

Mr. VANDENBERG. Yes. I think I know the answer to the inquiry of the Senator from Washington [Mr. SCHWELLENBACH], but I hesitate to announce it without being absolutely certain.

Let me catch up again with the comparison. One State paid 65 percent of her own bills while another State paid 1 percent of her own bills. Fourteen States paid less than 10 percent of their bills, while 10 States paid more than 30 percent of their bills. That this does not reflect the actual capacity to pay is indicated by another table for a longer period, which embraces not only the relief statistics, but also relative rankings in respect to per-capita wealth, per-capita income, and per-capita taxpaying ability.

Mr. President, I ask that all the three tables to which I have referred may be inserted as exhibits at the end of my observations so all the references I have been making may be readily identified by Senators who may wish a bill of particulars.

The PRESIDING OFFICER. Without objection, that will be done.

(See exhibits B, C, and D.)

Mr. VANDENBERG. Mr. President, it would be absurd to pretend that these statistics are conclusive. They are not. One of the great tragedies of the present situation is that we have not, during all of this depression period, developed any accurate census of unemployment and these related factors in serving the distress problem. These figures are only an index. But, I repeat, they demonstrate some of the imponderable variations and discriminations. Any rule which the human mind might devise will be vulnerable to some attack. I simply argue that the variations and discriminations will approach a minimum in proportion as local responsibility is invoked in terms of minimum cooperation.

The substitute which I have offered sets this minimum cooperation at 25 percent. I am not suggesting that State and local funds shall match the Federal funds dollar for dollar as has been our traditional custom. I am suggesting the far more liberal ratio of three Federal dollars for one State and local dollar with an added discretionary fund for tolerance and emergency. But this will level off the peaks and valleys and command substantial equity between the States. It may be significantly noted in this connection that the average percentage of total relief expenditures from Federal funds for the calendar year 1935 was 74.4 in continental United States. Therefore, my proposed ratio is the average. It may also be noted that the average State and local contribution to relief for the period from January 1933 to September 1935 is 22.2 percent. My proposed formula increases this figure by only 2.8 percent. It is the nearest possible approach to a rule of reason.

But I contend that all our experience demonstrates that when local responsibility is restored, and when the heavy burden of Federal administration is abandoned, and when we confine ourselves to the immediate relief and work-relief problem, shorn of all the costly experimentation which now eats away so large a share of our relief funds, the net result will be relatively advantageous to every State and to the sum total of all the victims of depression within each State.

Let me summon another interesting witness. One may or may not be partial to the views of Mr. Walter Lippmann, the well-known columnist who, I concede, is now anathema in some high quarters where he was once an oracle so long as he was their unfailing eulogist. But no one can dismiss his powers of analysis, nor can anyone justly discard him as a mere partisan special pleader. Mr. Lippmann significantly says:

> The problem never will be soluble as long as Washington undertakes to fix relief standards and wage rates. The system is, as it were, upside down. What ought to be decided in Washington is how much Federal assistance must be given to the States in order to relieve unemployment and need at the rate determined by the States.
>
> The question for Washington should not be: How much income and what wage does a man need in the township of Hopkins in Farley County, in the State of Roosevelt? That is an impossible question for Washington to answer.
>
> The question should be: How much assistance must be given to the State to match what the State, the county, and the township have decided they must spend?
>
> The mysteries and paradoxes of relief would begin quickly to resolve themselves once the system were turned right side up. For the size of the appropriation would then be determined by what the States and localities are themselves willing to finance. As it is today, they are determined by Mr. Roosevelt's and Mr. Hopkins' guess at what it would be desirable to spend.

There we have the same old challenge in different dress. Turn the system "right side up"—go back to the State as the unit of administrative decision and responsibility—and the perplexities will begin to resolve themselves. In other words, rely upon a principle rather than upon a device. That is the burden of my plea.

I go back to President Roosevelt's own statement of June 14, 1933, to a conference of Governors and State emergency relief administrators in Washington. The President then said:

> The Emergency Relief Act is an expression of the Federal Government's determination to cooperate with the States and local communities with regard to financing the emergency-relief work. The Federal Emergency Relief Administration has acted on the principle that it means just that. It is essential that the States and local units of government do their fair share. They must not expect the Federal Government to finance more than a reasonable proportion of the total.

There have been many swift changes in policy since that sturdy sentiment was uttered. One of the greatest vices in the situation has been this lack of constancy in the design and pattern of our Federal purpose. There has been a progressive desertion of State and local responsibility; a progressive expansion of Federal domination and contribution, and with it a progressive growth in Federal bureaucracy. I maintain it is time to turn back to the sound principles upon which we relied when we started. There is nothing but grief, extravagance, and ominous prophecy in continuing blindly to pursue these later devices. The relief problem must be adequately met; but it must be met without imposing unbearable burdens on present and future generations. As has been well said, we must keep clearly in mind not only the fifth of our population who are out of work but also the four-fifths who are at work and on whose shoulders the burden of paying for our relief problem now falls.

I repeat that the program has progressively changed. From February 1932 to November 1933 it was characterized chiefly by Federal grants-in-aid to State and local governments. The original formula called for $1 of Federal money for $3 of State and local money—the precise reverse of the more liberal formula which I now propose—with additional discretionary funds for extraordinary situations. The next formula was the dubious C. W. A. program from November 1933 to April 1934, when the Federal Government embarked upon "make work" relief projects. It costs a cool billion; and no one subsequently condemned it by more vigorous inference than the President himself. The next period bridged the gap to the inauguration of W. P. A. in the autumn of 1935 and put its emphasis upon work-relief and special-relief projects. The final period is the contemporary W. P. A. regime characterized by a complete withdrawal of Federal grants-in-aid to States, a complete break-down in local responsibility, a complete abandonment of the initial Presidential purpose, and a complete substitution of a vast work-relief program with countless social experiments attached. I respectfully but earnestly submit that we have learned from this experience that we must return to first principles.

If present trends persist, the Government of the United States will be driven straight to bankruptcy because, if our experience is any criterion, we see that the present system feeds and builds upon itself. As economic conditions improve, the relief load multiplies. No responsible Government official dares ignore such a terrific challenge. It is too utterly hopeless to contemplate the anomoly of a great increase in relief rolls and a still greater increase in relief costs in spite of an encouraging revival of industrial production, and an increase in national income, particularly farm and labor income. You cannot run away from the challenge. It is here, confronting the wisdom and the conscience of the Senate. You may continue—smugly and expediently—to ignore it. You may, a little longer, hide the reality behind a facade of lofty humanitarian orations. You may "whistle through the woods." But your deadly problem will soon catch up with you.

President Roosevelt himself said in his relief message of last March 18 that there are still 5,300,000 families and unattached persons in need of relief—which is 300,000 more than the year previous.

During this recent 2-year period, when relief costs of all kinds have increased 600 percent and relief rolls about 40 percent, factory employment has increased 30 percent, factory pay rolls increased 62 percent, and national income increased 10 percent. Boast of the latter figures all you please, but I say to you that the more emphasis you put upon them the more appalling becomes the contemplation that your relief program is a deadly, devastating mistake. The increased number on relief rolls, in the presence of better economic times, is itself a warning that there is something wrong and that you had better give up this vain effort to run the intimate life of this vast country from a centralized authority at Washington.

But it has been the sudden shifts in the relief programs, the growing tendency to favor "make work" projects rather than home relief grants, and the undertaking of numerous special experimental programs rather than the increased number on relief rolls, which threatens your Budget with permanent and fatal dislocation. In all honesty I know of but one answer, and that one answer is to restore home responsibility to the States for making and then policing these relief decisions.

The present Federal program not only costs too much—often because of expenditures which never actually serve those whom we would protect—but it fails to meet the needs of many families not reached by Federal work projects who cannot receive adequate care from their local communities without some Federal aid. It is a situation crying out for a practical solution which shall warrant humane and adequate treatment of all worthy families now in need of relief, yet which shall stay within the financial resources of Federal, State, and local Governments. It seems to me that thoughtful citizens must be driven to the conclusion that the only solution will return to a cooperative system of relief in which major responsibility will be returned to State and local governments, where it logically belongs, while the Federal Government makes grants-in-aid to guarantee the major costs involved. Such a solution would leave to home-rule decision the discretion whether relief should be in the form of work-relief wages, cash home relief, or a combination of the two.

I have seen authentic estimates that while the total cost of all forms of relief to all units of Government in the next fiscal year will crowd four and one-half billion dollars if present plans are carried forward without modification, yet under home-rule auspices a home-relief and work-relief program combined can adequately serve 4,000,000 cases—the estimated load—for $1,365,000,000, or a home-relief program alone can adequately serve 4,000,000 cases for $960,000,000. It is a far cry from one to the other. If there be any validity in these estimates at all, my proposal for the next fiscal year is utterly generous. If anything, it is too generous because it surpasses the prospective needs. But I prefer to err on the side of generosity. It is vastly more important at the moment to restore a sound principle of action—a sound working program—than it is to argue over a few hundred millions of dollars, although these still are sums that ought to command respect.

I frequently disagree with the National Economy League, but I refuse to run away from logic, no matter what its source. The league's director of research, John C. Gebhart, has prepared a temperate, dispassionate, factual analysis of this problem, which reaches the following persuasive conclusion, in which I concur:

> The Federal Government has already spent over $6,000,000,000 for relief and work relief. If public works (P. W. A.) are included, we have already spent over seven and a half billion dollars in an effort to create jobs, to prime the pump of industry, and to furnish cash relief. Next year, if present plans are carried forward, the Federal Government will spend $4,000,000,000 for relief, work relief, and public works. So long as this program continues, the Federal Budget cannot be balanced, and we shall continue to run into debt to the extent of $4,000,000,000 a year.
>
> We face two interrelated problems: We must balance the Federal Budget if we are to avoid inflation, unbearable taxes, or both; we must devise a system of cooperative relief for destitute families which is effective and humane and which can be kept within revenues of Federal, State, and local governments.
>
> This study of the various experiments with relief and work relief, their practicability and their costs, is offered in the hope that it will aid in the solution of this problem. Our experience with 4 years of Federal relief leads, we believe, to but one conclusion: We must stop pouring out Federal funds for costly and cumbersome work-relief programs, centered in Washington, and return to a program which places the responsibility for the administration of relief on State and local governments, with Federal assistance confined to grants-in-aid to States and localities.

Such a program will save the Federal Government nearly three and a half billion dollars a year and will not add to the financial burden for relief which States and localities are now carrying. It will make possible the balancing of the Federal Budget—the one factor most needed to restore business confidence and to promote private employment.

Mr. President, it is upon this theory of relief, sustained by these exhibits, that I have taken the liberty to submit this amendment, in the nature of a substitute. I ask that it may be referred to the Committee on Appropriations for proper attention and survey.

The PRESIDING OFFICER. The amendment in the nature of a substitute will be referred to the Committee on Appropriations.

Mr. VANDENBERG. When the original relief bill was before the Senate I voted in favor of amendment submitted by the able Senator from Colorado [Mr. ADAMS] and then an amendment submitted by the able Senator from Virginia [Mr. BYRD], each of which proposed to cut that $4,880,000,000, one of them to $1,880,000,000 and the other to $2,880,000,000. I voted for both those amendments because I believed that on a proper basis the relief problem thus could be met.

The argument I am presenting today is completely consistent with my attitude at that time because I continue to be ready to vote for whatever relief appropriations are essential to meet the fundamental challenge, but I am not willing to continue a system which is shot through with inequity, which is prejudiced inevitably by political administration, no matter how nobly the man at the top may attempt to administer it, and which cannot continue at the present rate of spending if a solvent Republic is to be preserved.

EXHIBIT A

Amendment in the nature of a substitute intended to be proposed by Mr. VANDENBERG to House bill 12624: Strike out from line 9, on page 21, down to line 14, on page 25, and insert in lieu thereof the following:

"To provide adequate home relief and/or work relief, including the cost of administration thereof, in the United States and its Territories and possessions, in cooperation with these subdivisions and on the basis of their administrative responsbilty and pursuant to their decisions respecting the character of relief within their jurisdictions, $1,425,000,000, to remain available until June 30, 1937, subject to the following terms and conditions:

"(a) This appropriation shall be available for payment of grants in aid to the States, Territories, and possessions in the following classifications: (1) $100,000,000 for emergencies, $1,325,000,000 for regular allocations.

"(b) The sum designated for emergencies shall be available for grants in aid by order of the President to meet any extraordinary or unforseen contingencies, according to the discretion of the President, and without regard to any other requirements in this section; provided that this sum also shall include the expense of Federal administration of the entire relief appropriation.

"(c) The sum designated for allocations shall be allocated by the President at his discretion with due and equitable regard for all of the following factors: (1) Relative population; (2) relative unemployment; (3) relative living costs, including seasonal and climatic conditions; (4) relative financial resources.

"(d) The sums allocated under subsection (c) shall be paid on a quarterly basis by order of the President to the States, Territories, and possessions when (1) the Governor of each subdivision, or the District Commissioners in the case of the District of Columbia, shall have certified to the President that he has appointed a bipartisan board of relief trustees, who shall become custodians for the receipt and disbursement of the Federal grants in aid; and when (2) each such board of relief trustees shall have certified to the President that its subdivision or any unit thereof has provided, or is prepared to provide, not less than 25 percent of the cost of the relief programs, including cost of administration, which each such board of relief trustes shall designate to receive the Federal grants in aid.

"(e) Each subdivision shall decide through its own duly constituted authorities, with the approval of its board of relief trustees, what type of relief shall be undertaken, and each subdivision shall assume full administrative authority therefor; provided only that any such relief shall be distributed without discrimination on account of race, religion, or political affiliations. Any person who knowingly violates this proviso in connection with the allocation or administration of any such grant, or who knowingly makes any false statement in connection with any applications or reports that may be required by this section, or who solicits or receives political contributions from any other person on relief or connected with the administration thereof, shall be deemed guilty of a misdemeanor and fined not more than $2,000 or imprisoned not more than 1 year, or both.

"(f) Each board of relief trustees shall furnish such reports from time to time as may be required by the President, and shall account for the expenditures of all Federal funds disbursed by it, and such reports shall include comprehensive information respecting all phases of relief needs that may be required hereafter in determining future grants in aid.

"(g) There is hereby reappropriated for the purposes described in subsection c, and in addition thereto, all unobligated and unexpended balances of the amounts appropriated by the acts approved June 16, 1933, February 15, 1934, June 14, 1934, and April 8, 1935, or such portions thereof as the President shall deem necessary. Any unexpended balances at the end of the next fiscal year shall be returned to the general fund of the Treasury.

"(h) The President is authorized to prescribe such rules and regulations as may be necessary to carry out the purposes of the foregoing appropriations in this section."

EXHIBIT B

Direct relief costs per family (cents omitted) for 1933, 1934, and 1935

GROUP 1

	Federal	State and local	Total
Wyoming	$1,619	$156	$1,775
District of Columbia	1,256	457	1,714
Montana	1,141	145	1,287
California	1,087	530	1,617
Illinois	1,005	328	1,333
Idaho	1,003	189	1,193
Oregon	985	255	1,240
New York	968	858	1,827
Wisconsin	961	364	1,326
Average	1,114	365	1,479

GROUP 2

	Federal	State and local	Total
Colorado	$955	$175	$1,131
Washington	925	207	1,132
Massachusetts	895	813	1,709
Maryland	891	336	1,227
Minnesota	889	274	1,164
South Dakota	885	100	985
Louisiana	840	26	867
Utah	840	224	1,064
Michigan	837	302	1,140
Arizona	831	144	975
Average	879	260	1,139

GROUP 3

Pennsylvania	$814	$334	$1,149
New Jersey	802	370	1,172
New Mexico	792	28	821
Nebraska	791	239	1,030
Kansas	763	282	1,045
North Dakota	762	121	883

[1] Data from CONGRESSIONAL RECORD (Jan. 30, 1936, p. 1228). The period covered by this data is believed to be most representative of what took place during the life of F. E. R. A. since it covers practically the whole period in which extensive grants were made. Shifting of the load to W. P. A. began in the fall of 1935, with the result the total expenditures for emergency relief declined from $188,571,767 in May 1935 to $70,555,119 in December 1935. The proportionate contribution by the Federal Government declined due to the fact that W. P. A. attempted to care for all employables.

[2] Based on National Industrial Conference Board estimates.

[3] Based on Brookings estimate in America's Capacity to Consume (p. 173).

[4] This is taken from Mabel Newcomer, An Index of the Taxpaying Ability of State and Local Governments (New York (1935), p. 59). This index was constructed by applying a model tax system to each of the States and determining the yield from each of the component taxes. The taxes used in the system are as follows: Real property, $20 per thousand dollars of full value; severance tax, 2 percent gross on oil and gas; personal income, rates vary from 1 to 6 percent; business net income, 4 percent on corporations and 2 percent on unincorporated enterprise; the incorporation of business enterprises, 0.5 of 1 percent of value of stock; stocks transfer, 0.04 of 1 percent of value of stock; liquor varies from 3½ cents per gallon of beer to $1 per gallon of whisky; and a progressive tax on inheritances ranging from 1 to 10 percent. This model tax system is practically the same as one developed by a committee of the National Tax Association.

[3] Includes some duplication of families or individuals who received relief under both the general relief and rural rehabilitation programs.

Mr. ROBINSON. Mr. President, the Senator from Michigan [Mr. VANDENBERG] has precipitated in the Senate the issues, or some of them, involved in the work-relief bill which passed the body at the other end of the Capitol yesterday and which was received in the Senate today.

For that action the Senator is not to be condemned. We all understand that one of the subject matters which it is important shall be considered and acted upon before the end of the present session of the Congress relates to relief; and by presenting promptly his substitute and his views concerning the proposed legislation, the Senator has perhaps facilitated its final disposition.

We all realize that the problems connected with unemployment relief are not easy of solution. For my part, I do not contend that any plan which has been proposed or adopted is approximately perfect. Indeed, it seems readily maintainable that the subject is so affected with complications and difficulties that no plan which may be devised would meet the very highest standard of efficiency.

No doubt the Senator from Michigan feels that the plan he has proposed would constitute a great improvement over that incorporated in the bill passed by the body at the other end of the Capitol. His whole argument has been based on the assumption that work relief as now administered is controlled by political influences, and that work relief as he proposes it shall be administered would be entirely free from any questionable influence and would be placed upon a basis of efficiency, thus assuring entirely satisfactory results.

There is nothing new in the proposal submitted by the Senator from Michigan. It was offered in the body at the other end of the Capitol, not in the identical form in which it is presented here but in substantially the same form. It was voted upon yesterday by the House of Representatives in connection with a motion to recommit the bill with instructions. By reference to page 7021 of the CONGRESSIONAL RECORD it appears that in the body at the other end of the

Capitol a motion was made to recommit the bill with instructions to substitute the following language:

That for the purpose of providing direct relief in the United States, its Territories and possessions, and the District of Columbia, there is hereby appropriated the sum of $1,425,000,000; and there is hereby reappropriated for the same purpose all unobligated and unexpended balances, with the exception of allotments to the Civilian Conservation Corps, of the amounts appropriated by the acts approved June 16, 1933 (48 Stat. 274); February 15, 1934 (48 Stat. 351); June 14, 1934 (48 Stat. 1055); and April 8, 1935 (Public Res. No. 11, 74th Cong.), and to remain available until June 30, 1937, to be allocated and disbursed by the President to the States, Territories, and possessions, and the District of Columbia, for relief according to their respective need: *Provided*, That no part of this appropriation shall be allocated or paid to a State, Territory, or possession, or the District of Columbia, or subdivision thereof, which shall not contribute an amount equal to at least 25 percent of the total proposed expenditures, both local and Federal, and shall not administer such expenditures by and through a nonpartisan board.

While there are differences between the language employed in the substitute offered by the Senator from Michigan and that used in the motion to recommit with instructions just quoted, it is submitted to the consideration of the Senate that there is no substantial difference. The two are closely analogous. The results sought to be accomplished by each, as is conceded by the able Senator from Michigan, are about the same.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. ROBINSON. Certainly.

Mr. VANDENBERG. I desire to confirm what the Senator is saying. The problem has been studied jointly by Members of the House and Senate, and the plan in the House and the plan in the Senate are as nearly alike as they could be.

Mr. ROBINSON. The Senator confirms the statement just made. The plan that is now presented as a substitute was worked out properly by those who are opposed to the system contemplated by the House bill, and it was first presented in the body at the other end of the Capitol.

Evidently the theories of the proponents of the substitute were not persuasive to the minds of the Members of the House of Representatives. That conclusion is sustained by the vote which was taken in the House. On page 7228 of the RECORD of May 11, 1936, there appears the vote on the motion to recommit, which included substantially the Vandenberg substitute for the House bill. The vote on that motion was—yeas 90, nays 287—more than three to one of those voting having opposed the substitute of the Senator from Michigan as expressed in the motion to recommit. To repeat, more than three times as many voted against the motion to recommit, with instructions incorporating the substitute, as voted for it. Following the vote just described, there was a vote on the passage of the bill. That is the bill which the Senator from Michigan proposes to amend by his substitute; and on the vote on the passage of the bill the yeas were 341 and the nays were 38.

Mr. President, do you realize what those votes mean? They mean that after months of criticism—some of it justified, some of it based purely on political considerations and prompted by political motives, as your present speaker conceives—the great body at the other end of the Capitol rejected by more than three to one the proposal which is now advanced here, and finally passed, by a vote of 341 to 38, the bill which has come to the Senate. Only ?3 Members of the other body found it consistent with their duty and responsibility to vote against the passage of the bill. Three hundred and forty-one voted for it.

Of course, it may be said that the action taken by the other body is not conclusive of the action that should be taken here; but the point I am making is that although the Senator from Michigan spoke eloquently and persuasively, as he always does, his conclusions were based on assumptions which, in my judgment, are not sustained by sound reasoning.

What is his primary proposition? That the Federal Government shall pay most of the expense of work relief, but abdicate its responsibility in the administration of relief. He says, "Turn back to the States and the local subdivisions of the States the entire responsibility of determining who shall be relieved and who shall not have help; give to the States the power of performing that function, using principally Federal moneys, and by doing that you will solve the great problem underlying the whole question", as the Senator conceives it; namely, that of eliminating politics from the administration of relief.

The record will show that there has been less politics in the administration of W. P. A. than there was in the administration of F. E. R. A. F. E. R. A. was under the control of the States and of the local subdivisions. I doubt whether there is any plan which human ingenuity can devise, although one may possess the powers demonstrated by the able Senator from Michigan, which will entirely eliminate politics from matters of this sort. The end sought is wholesome, the object is just, and we all wish to contribute as much as we can to its accomplishment; but I hope my friend from Michigan will not get the idea in his head that by vesting the administration of relief in Governors and county judges and other State and local authorities he will be eliminating politics, and making the administration of relief as spotless as the white robe of a virgin. [Laughter.]

Governors and State and county officers have to be elected. They are in politics as much as are Senators and Representatives, and it is absurd to say that you can wash the linen clean by abolishing Federal agencies and putting the responsibility wholly on local agencies.

Home rule is a good thing, but influences appeal to the residents of communities called upon to administer laws just as much as they sometimes appeal to officers of the Nation, and there would be more politics in the plan of the Senator from Michigan than there is in the plan of the House bill. The only difference would be that the politics in his plan would suit him a little better than the politics in the House bill plan. He knows what I mean, and all who hear me know what I mean.

But there is an unsound principle in the proposal that the Federal Government shall pay most of the cost or all of it, when necessary, and have no control whatever over the administration of the funds. What restraint would there be on the appropriation of relief funds if by mere trivial contributions the States or localities could enter into competition in efforts to procure Federal funds with no inhibition on the power or method of expenditure except those which are to be self-imposed?

You have not moved a step forward; you have not proposed an advance; nothing is accomplished so far as saving money is concerned or procuring better administration is concerned by taking away the existing supervision of expenditures by Federal agencies. As a matter of fact, the system now employed and that incorporated in the House bill is a system of divided responsibility. It does contemplate cooperation between localities and the National Government. There is nothing unjust, there is nothing improper, there is nothing unfair in the suggestion that the localities be required to contribute as they may be able to contribute to relief programs. But the proposal to make the Federal Government provide the funds and yet deny it supervision over the expenditure of the funds cannot be justified.

Under F. E. R. A. there were contests between States and localities in efforts to secure liberal allotments, each State, through its public authorities, making demands for as much as those authorities felt could be justified. Now it is proposed to reestablish that system, and it is proposed in the name of perfecting the existing system.

How does the substitute propose to reestablish local responsibility? The argument of the Senator from Michigan, as I heard it ably presented, really is based on the theory that the whole problem ought to be relegated to the States and their local subdivisions, that the Federal Government ought to get out of the relief business. Of course, that is a desirable end. All of us would like to see brought about a situation in which we could discontinue making these appropriations. But, Mr. President, the significant thing in all

these proposals is that not one of those offered as a substitute contemplates reducing by one dollar the amount that is included in the House bill—the amount suggested by the President. They talk economy; they discredit by arguments; and if you read the speech of the able Senator from Michigan, you will find running all the way through it expressions of contempt for any relief system. But when they propose to change it, they do not even suggest a reduction in the amount to be expended by the Federal Government.

The provision in the House motion to recommit and in the substitute of the Senator from Michigan each says, "There is hereby appropriated, or authorized to be appropriated, $1,425,000,000 for the purposes of work relief"—the exact amount suggested by the President—"to be allotted by the President to the States, and to be expended by the States." Wherever possible, local agencies are to supply 25 percent of the amount to be expended. I repeat, there is no objection to a requirement of that nature, with that qualification, where it can be met. Some of the States have had their credit greatly improved by reason of the activities of the Federal Government, by reason of the measures which the Government has passed and enforced. There is no reason which appeals to my conscience and judgment why they should not be expected to assist in the performance of this monumental task; but there is a discrepancy, an irreconcilable discrepancy, between the proposal that the Federal Government shall pay 75 percent or 100 percent of the cost, and that the States, without restraint and guidance, or suggestion from the Federal Government, shall expend not only the amount raised by the States, but the amounts provided by the Federal Government. That is, the spending agency is to have no accountability for the amount to be supplied; the spending agency is to be invited to obtain all it can in competition with others occupying the same relationship to the subject. Quite naturally, the result would be that the different States and the different localities would compete with one another in efforts to secure recognition by obtaining comparatively large shares of the funds to be allotted, and when they had obtained them there would be no supervision, no general restraint. There would be 48, 50, or 54 different standards set up for the administration of the funds if there were no national regulation or supervision.

So you have not gone anywhere. You made a speech based on assumptions that do not stand the test of argument and reason. You would not eliminate politics by creating 48 separate political agencies. But, you say, the administration is to be by a nonpartisan board. You are going to have the administration by two Democrats and three Republicans, or three Democrats and two Republicans. Washington is now filled with so-called nonpartisan or bipartisan boards. I do not think very much has been accomplished by efforts to establish that system. The point is you want the Nation to provide the money. You are unwilling to give it any control whatever over expenditures, except insofar as control is implied in authorization to the President to make an equal or equitable allotment of the funds to the States.

Much that the Senator from Michigan said is true. It is all based, however, on assumptions of fact that are not warranted by the evidence. Once you concede that his plan is the one pure, holy, and incorruptible plan for spending Federal money, his conclusions follow. But I answer, by arguments that neither he nor anyone else here or elsewhere can answer, that his plan has no such characteristics; that, like every other plan that has been devised, it is open to criticism, it is susceptible of objection, it involves weaknesses. I am sure that in the study of this subject the body at the other end of the Capitol did what it believed was best. I am sure that in further study of this subject the Senate Committee on Appropriations and the Senate will do what is found to be best. The fact that the House discredited the scheme of the Senator from Michigan by 341 votes to 38, as implied in the vote on the passage of the bill, and by 287 votes to 90, as expressed in the direct vote on the motion to recommit—these facts establish irresistibly the conclusion that the proposal of the Senator from Michigan is not what he believes it to be, is not what the proponents of the substitute contend it should be.

I shall not attempt at this juncture to enter into a further discussion of the subject; but, Mr. President, I was unwilling that the Senator from Michigan should succeed in his effort to make the bill unpopular on the theory that he had a far better plan which could only be objected to on the ground of partisanship. The plan in the bill is better than his plan. Both plans will have to meet the test of fire, of thought, and debate, and I conceive that the result in the Senate will be comparable to that in the House of Representatives.

Mr. BYRNES. Mr. President, I share the wish of the Senator from Arkansas [Mr. ROBINSON] that we might at this time return to the States this very perplexing problem. However, we know that it is impossible. I think the Senator from Arkansas has shown that by adopting the suggestion of the Senator from Michigan [Mr. VANDENBERG] we certainly would not eliminate political consideration from the administration of W. P. A.

There is still another thought. W. P. A. is now functioning. Organizations have been perfected. If at this time we should undertake to change the whole system and to authorize the Governor of Michigan, for instance, to take charge of the administration of the organization in his State, and if the Governor of Michigan, being of the opposite political party from the administration here, should change the administration of W. P. A., the only result would be that the organization would be disrupted and there would be delay in the functioning of the all-important agency at this time.

I am surprised that the Senator from Michigan, in seeking information on the subject, should go to the American Association of Social Workers. From a letter, a copy of which is before me, from a citizen of his State I am advised that the thought of that association of social workers is that we should return to the dole. The Senator, therefore, is quoting a group of social workers employed by private individuals and private organizations in the country to support an argument which he is making against their view because, as I understand, he is not in favor of returning to direct relief.

It seems to me instead of going to the Institute of Public Opinion, published in the New York Herald Tribune and the Washington Post, for information as to W. P. A. and what the people think of it, he should go to his own State of Michigan and should take the trouble to inquire as to the opinion of responsible officials of county and city governments and of the State officials of the State of Michigan. Had he done that he never would have made the argument which has been submitted this afternoon in criticism of W. P. A.

From his own home town of Grand Rapids I read what was said in the Grand Rapids Press about W. P. A. Listening to the Senator from Michigan one would think its operation in Michigan had been corrupt, had been inefficient, that there had been waste of money, and that it was a proper subject for condemnation. But here is what the newspaper in his home city said about it:

> Popular funsters and radio wise talkers frequently make the W. P. A. worker the butt of their jokes. Recently a radio straight man inquired, "Are you a statue?" Whereupon the comedian retorted, "No; a W. P. A. worker." For the sake of a laugh such wit seems rather cheap.
>
> Unqualified approval of the W. P. A. program in Grand Rapids is contained in a letter received by Harry L. Pierson, Michigan administrator, from Peter A. Kammeraad, Grand Rapids director of public service.
>
> Kammeraad praised not only the rate of absorption of workers from the relief rolls but the quality of work by these crews in Grand Rapids streets.
>
> He made special comment on the safety measures employed by the W. P. A. to protect these men, many of whom are doing this type of work for the first time.
>
> "We are pleased to report," Kammeraad wrote the administrator, "on the successful operation of the W. P. A. in the city of Grand Rapids, both from an employment standpoint and to set forth some of the handicaps overcome in putting men to work.
>
> "At the present time we have between 1,400 and 1,500 men employed on various W. P. A. projects, and as far as we are able to determine the men are highly pleased with the employment and the manner in which the work is being handled. This, of course, is most gratifying to the officials in charge."

Concluding, he said:

It is our opinion today that the type of work being turned out by these men is equal to that which might be done by a private contractor. Consequently a very high grade of street pavement is being constructed, which we are sure will be to the greatest satisfaction of the general public.

Then from the mayor of the city in which the Senator lives comes a commendation of W. P. A. The mayor said, among other things:

I believe that most of the men employed understand that the W. P. A. is a means of earning a livelihood rather than accepting charity. Consequently they are well satisfied with the opportunity to do so.

The city of Grand Rapids, in which the Senator lives, is governed by a commission. That commission, through its chairman, Henry W. Walstrom, on March 26, 1936, wrote as follows:

With reference to the opinion of myself, as well as, I am sure, the majority of the Board of Supervisors of Kent County regarding the W. P. A. program, I am pleased to advise that while the county has been somewhat limited along this line because of the city of Grand Rapids handling its projects as a separate unit, we feel that whatever experiences we have had as a county have been very satisfactory.

All our work has been of a substantial nature and we know that there has been no project but what was warranted and would stand on its merits.

The personnel of the W. P. A. local office is such that our relations have been most cordial and friendly, and as for myself, there is no criticism whatever that I would offer in considering all conditions and situations which had to be confronted.

Mr. President, I now desire to quote from a letter written by the principal of the schools at Hamtramck, Mich., who said, among other things:

I belong to the Republican Party, but I believe Franklin D. Roosevelt was right when he said, "If industry will not furnish employment, the Government will." The social structure of our Nation is so complex that the United States Government should accept the responsibility for maintaining employment. We school people have seen enough of the grim tragedy of unemployment so that we are very anxious to have the W. P. A. continued.

He wants the United States Government to assume the responsibility for administering W. P. A. He does not share the views of the Senator from Michigan that it should be returned to the States.

The Senator from Michigan, in quoting many people, mentioned only one from his State that I can recall. From the county of Wayne, Huron Township, the director of the assessment record project in Wayne County, after praising the projects which have been undertaken by W. P. A. in that county, says:

It is the sincere hope of the sponsors of this project that its work may be continued and completed under the auspices of the Works Progress Administration. Such completion will accomplish a valuable and constructive piece of work for the county of Wayne and give employment to a group of white-collar workers whom we know to be competent and efficient.

Mayor Couzens, of the city of Detroit, also writes commending W. P. A. for the kind of work that has been done in the city of Detroit.

The book which I hold in my hand contains letters from nearly every mayor in the State of Michigan and from county officials in nearly all the counties in Michigan. The Senator from Michigan will look in vain through this list of letters and telegrams from the officials of the cities and counties of his State if he looks for one letter sustaining him in his criticism of W. P. A. With unparalleled unanimity they commend W. P. A. for what it has done, and they urge the continuation of the Works Progress Administration.

Because the speech of the Senator from Michigan contains many insertions, I ask permission to have printed in the RECORD some letters contained in this book from officials of cities and counties in the State of Michigan.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The letters are as follows:

PETOSKEY, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Cheboygan, Mich.

GENTLEMEN: It has come to the attention of the city officials of Petoskey that the United States Government intends to discontinue the work of the W. P. A. program.

The work now handled by the W. P. A. will have to be taken over by the States and local governmental bodies if this work program is discontinued, and it is our belief that with the existing organization and the experience you have obtained, the work can be more efficiently handled as a United States Government agency.

Business is on the upgrade but still many laborers are and will be out of work the coming summer due to the demand of private industry not being able to take up the slack.

Yours very truly,

P. T. MITCHELL,
City Manager, Petoskey, Mich.

Mr. ABNER E. LARNED,
National Emergency Council,
415 Federal Building, Detroit, Mich.

DEAR SIR: I wish to state that the W. P. A. is certainly a big help toward solving our relief problem, and I think the men they have handling the affairs are very capable.

Yours very truly,

E. D. VINCENT,
County Clerk, Presque Isle County, Rogers City, Mich.

STANDISH, MICH., *March 28, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
District Office, Clare, Mich.

GENTLEMEN: The city of Standish, through its mayor, wishes at this time to express its appreciation to the several public-works administrations for the great assistance they have been to us during the past 3 years.

The Works Progress Administration has financed for us one of the finest waterworks systems in the country; the C. W. A. has built for us a fine new city hall, and for our county an addition to the courthouse, and new garage for the road commission. Now, through the W. P. A., we have street widening, water-main extensions and addition to the high-school building project awarded and these will be built immediately.

It would have been years before we, with our small capital, could have acquired the improvements we now have. Not only this, but the working men of Standish and Arenac County have been employed for the past 3 years, which, in itself is a great thing.

The city is deeply grateful to the administration for the above.

Yours very truly,

MARTIN SHANNON, *Mayor.*

BEAVERTON, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
District Office, Clare, Mich.

GENTLEMEN: We have about just completed a project in the city here and we are very well satisfied with it.

This was work that was needed very badly and I do not know how we could have carried on without your help, both as to man-hours and material.

Very truly yours, L. J. BUDGE, *Mayor.*

ST. LOUIS, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Clare, Mich.

GENTLEMEN: In replying to your letter of March 23 I want to say that in my opinion the sewer and water-main project we are now working on here is a very valuable one to St. Louis, as this city has been greatly in need of new sewer and water mains and there is no place where money could be used to greater advantage than in a project of this kind.

I think that all W. P. A. projects are very valuable and much needed in the different communities.

Yours very truly,

JAMES B. SUMNER, *Mayor.*

ALMA, MICH., *March 25, 1936.*

WORKS PROGRESS ADMINISTRATION,
District No. 2, Clare, Mich.

DEAR SIRS: The W. P. A. projects in Alma are working out very satisfactorily both to the city and to the unemployed in our vicinity.

We highly recommend the idea behind the W. P. A. and the results being obtained in our community.

Very truly yours,

CHARLES R. MURPHY,
Mayor of the City of Alma.

Mr. F. S. SCHOUMAN, MARCH 25, 1936.
Works Progress Administration,
601 Water Board Building, Detroit, Mich.:

In my opinion the sewer and water-main project we are now working on here is a very valuable one to St. Louis, as this city has been greatly in need of new sewer and water mains and there is no place where money could be used to greater advantage than in a project of this kind. I think that all W. P. A. projects are very valuable and much needed in the different communities.

Mayor SUMNER,
St. Louis, Mich.

F. S. SCHOUMAN, MARCH 25, 1936.
Works Progress Administration, Detroit:

The W. P. A. projects in Alma are working out very satisfactorily both to the city and to the unemployed in our vicinity. We highly

recommend the W. P. A. and the results being obtained in our community.

Mayor MURPHY, *Alma, Mich.*

MARCH 25, 1936.

F. S. SCHOUMAN,
Works Progress Administration,
601 Water Board Building, Detroit, Mich.:

I am pleased to have this opportunity to extend to you the appreciation of the various agencies in our city and county whose task it is to assist in providing work for our unemployed for the very material contributions you have found it possible to make from funds made available through the Works Progress Administration. These additional funds have not only provided for the immediate needs of many of our people but have also made possible the earlier realizations of several much-needed improvements and additions. Assuring you of my desire to be of any service in the great task.

Mayor HORN,
Mount Pleasant, Mich.

Copy of telegram sent to Mr. Harry L. Pierson, administrator, Michigan Works Progress Administration, dated March 25, 1936

Mighty good program in aiding the unemployed, also given our city developments which could not be otherwise financed. The city improvements completed and in progress would have been a great burden to the taxpayers without this aid.

JOHN BRUGGER,
Mayor of Tawas City, Mich.

PINCONNING, MICH., *February 25, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Bay City, Mich.

GENTLEMEN: The Pinconning sewer projects are completed. Of course you know it, Mr. Krause, but what you do not know, is how much that means to us in Pinconning, that is why I am writing this letter to you.

Thanks to you and your Department, we today have a complete sewer system, capable of taking care of the needs of Pinconning. I think, however, and we are for the first time in the history of our city, able to give the west-end and south-end residents sewage facilities, that is because we accepted your recommendations as to the depth and size of the pipe. We could never do it ourselves, because of our total population, could never assume that burden, and working as we did, would take us years to complete what you and your Department did this year.

Another thing that personally I want to mention is the fact of cooperation, the way you did it. At no time was there any misunderstanding between your Department and ourselves, you and your men were very fair; we accepted your suggestion and you accepted ours in the spirit that they were given; in other words, you worked with us and we tried to work with you, and for myself and the council, I do say, thank you much, Mr. Krause. We are very much pleased with our sewers, and we hope that you are satisfied with us.

Again thanking you, I remain,
Sincerely yours,

JOHN W. JANKOWIAK,
Mayor, City of Pinconning.

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Flint, Mich.

GENTLEMEN: Am taking this opportunity of bringing to you my views and impressions of the work being done, and also what has been completed in our village by the Works Progress Administration.

First: We have completed a much-needed sewer that had been talked of here for many years and yet the village had not felt able to finance without an increase in taxation which at this time was almost impossible.

Second: The water-works dam and river-improvement project that has been in progress since the autumn of last year is nearing completion. Both of these projects have been of the most worthy nature and have come at the most opportune time, benefiting the municipality financially as well as giving employment to a great number of men in our community who were without work, and also put into circulation many dollars that in turn went through the various channels of our community to benefit those not directly related to this work.

I do not know of any dissatisfaction on the part of any of the employees as far as I have been able to ascertain, and I believe that the executives in charge have done their several duties in a conscientious manner. There has been no rumor of friction between workmen and executives as many have been neighbors and friends all their lives.

This dam and river improvement project is a monument to this village, and our people are appreciative of the W. P. A. in helping to make Fenton a more progressive municipality.

As president of the village of Felton, speaking in behalf of my officials connected with me in my duties, as well as myself, I want to thank you and all members of your organization for your fine cooperation, and I am satisfied this same spirit will prevail during the completion of this project and any future work we undertake.

Any assistance I can render to you and your organization will be given in the most cheerful manner.

Sincerely yours,

HARRY LENNEN,
President of the Village of Fenton.

CLIO, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Flint, Mich., District No. 3.

GENTLEMEN: I wish to offer words of appreciation in behalf of the citizens of Clio for the Works Progress Administration for approving and allotting projects sponsored by officials of city of Clio.

I wish to mention W. P. A. project no. 3-102, which is the development of an old creek bottom formerly a pond into a park and playground; outdoor theater in connection.

The city of Clio has never had a park in connection with the city, and the citizens are looking forward to the completion of this park with considerable enthusiasm, as it will afford our citizens a place for recreation.

A large portion of the rough work has been completed, such as removing the old dam, straightening the creek bed, and widening the channel, removing old fallen timber and stumps, and grading and leveling land alongside of creek.

I wish also to mention W. P. A. project no. 3-353, which is the construction of a storm sewer draining the northwest portion of the city of Clio, known as the Center Street sewer.

The portion of the town served by sewer has had no sewer drainage, and in wet times of the year the roads and sidewalks were under water. A portion of this drain was through a deep cut and was too expensive for the city to undertake. While this project is uncompleted on account of frozen ground holding up its development, however, the citizens in this district look forward to the completion of this project with great anticipation.

I, as mayor of the city of Clio, for the citizens of Clio wish to offer our appreciation and whole-hearted support of the people of the city of Clio.

I also wish to offer words of appreciation to the officers of the Works Progress Administration at Flint, Mich., for their cooperation and assistance in working out of the details connected with putting these projects across.

Yours respectfully,

CHAS. E. TAYLOR,
Mayor of the City of Clio.

BOARD OF EDUCATION,
Richmond, Mich., March 25, 1936.

WORKS PROGRESS ADMINISTRATION,
Mount Clemens, Mich.

DEAR SIR: This community is very grateful to the Federal Government for its help in the building of the Roosevelt Civic Auditorium. We realize that we would not have had this building without President Roosevelt's plan.

The cooperation given us by the Mount Clemens and Flint offices has been very fine and we appreciate everything they have done to help us bring this building so near to completion. It fills a long-felt need in our little village-school system and will be a joy and benefit to many generations.

Very truly.

E. N. MCINTOSH.

FERNDALE, MICH., *March 25, 1936.*

WORKS PROGRESS ADMINISTRATION,
503 Peoples State Building, Pontiac, Mich.

GENTLEMEN: In the city of Ferndale we have had approved and have started work on six different W. P. A. projects. These projects include construction of lateral sewers, water mains, and the grading and graveling of streets. The sewers are all being constructed where there is an actual need for the work. Construction of the trunk sewers is eliminating an overloaded condition in existing trunk sewers, and we believe will prevent backing up of storm water in the basements.

The sanitary lines are either new lines where no sewers have been built or are replacing old shallow sewers which have been causing considerable trouble in the last few years.

The water main is connecting up a series of dead-end mains so as to give a circulating system in one portion of our city.

In the street-grading work, we are establishing grades on subdivision streets and graveling the streets so that they will be passable during the fall and spring rains.

All of the work which is being done under this program is work which is very much needed in our city, and which could not be done for a number of years, due to our high debt and low tax collections. The people are very appreciative of this work, and are pleased because of the fact that the program includes only constructive jobs.

Yours very truly,

THEO. L. DEGENHARDT, *Mayor.*

FARMINGTON, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
503 Peoples State Bank Building, Pontiac, Mich.

GENTLEMEN: I wish to express to you at this time the appreciation of the members of the city commission and the general public of Farmington City for the amount of W. P. A. work allotment we have had and the fine cooperation we have had from the county administration in furnishing us with labor and materials.

Our projects, consisting of sewer construction and water-main installation, is well along toward completion. These installations have been much needed for a long time and the opportunity to have them installed at this time under W. P. A. have been of great benefit to our city.

We certainly appreciate the number of projects that have been granted to us and assure you that every dollar has been well spent here in permanent improvements that will be of benefit to the public for years to come.

Accept my personal thanks for the cooperation given in carrying this along.

Very truly yours,

E. O. HATTON,
Commissioner, D. P. W.

FERNDALE, MICH., *March 25, 1936.*

WORKS PROGRESS ADMINISTRATION,
503 Peoples State Building, Pontiac, Mich.

GENTLEMEN: In the city of Ferndale we have had approved and have started work on six different W. P. A. projects. These projects include construction of lateral sewers, water mains, and the grading and graveling of streets. The sewers are all being constructed where there is an actual need for the work. Construction of the trunk sewers is eliminating an overload condition in existing trunk sewers, and we believe will prevent backing up of storm water in the basements.

The sanitary lines are either new lines where no sewers have been built, or are replacing old shallow sewers which have been causing considerable trouble in the last few years.

The water main is connecting up a series of dead-end mains so as to give a circulating system in one portion of our city.

The people are very appreciative of this work and are pleased because of the fact that the program includes only constructive jobs.

Yours very truly,

THEO. L. DEGENHARDT, *Mayor.*

HAZEL PARK PUBLIC SCHOOLS,
Hazel Park Branch, Royal Oak, Mich., March 23, 1936.

MICHIGAN WORKS PROGRESS ADMINISTRATION,
503 Peoples State Building, Pontiac, Mich.

GENTLEMEN: The W. P. A. project in operation in our schools is proving very satisfactory. The attitude of the men toward their work is better than in any previous public-works project and consequently the project is making good progress.

Much of the furniture that is being repaired, cleaned, and varnished had been neglected for the past 7 years due to lack of finances. It was so badly in need of repair that it was not conducive to the training of good citizenship.

We are very appreciative of the work that is being done.

Very truly yours,

JOHN E. ERICKSON,
Superintendent of Schools.

Mayor Frank Couzens placed the city government of Detroit behind a continuance of W. P. A. for another year and opposed a return to the dole system in a report to the United States Conference of Mayors at Washington.

Couzens declared the city would be unable to finance relief without Federal assistance.

Praising the quality of W. P. A. projects, the mayor refuted charges of boondoggling in this area.

"Detroit sponsors have produced and can produce plenty of useful projects for a continuance of W. P. A.," he said.

"The largest single project in Detroit is sponsored by the department of public works," he pointed out. "It alone employs nearly 10,000 men and will repair and modernize 200 miles of unpaved streets. Such improvements are of sound benefit to the public."

Couzens urged the mayors to "exert every effort toward the establishment of a Federal work-program fund large enough to take care of the employables who are forced to accept relief."

John T. Millen, general superintendent of the Detroit zoo, is enthusiastic over the construction program undertaken by the Works Progress Administration to make the zoo one of the finest in the country.

"All projects now under way, and all that have been approved, were on the original master plan for the Detroit zoo," Millen said. "Some of these projects should have been carried out 7 years ago, but had to be postponed because of a lack of funds. Now, thanks to the Government's assistance, we are going to secure within the space of a few months a group of improvements that will give us the most beautiful zoological gardens in the country."

Speaking of the W. P. A. workers employed on zoo projects, Millen said:

"All in all, they are good workers despite the fact that many have been out of employment for years and some of them have never done manual labor. We do not push them; neither do we mollycoddle them. In the ordinary course of events it would take us 5 years to get the improvements we are getting through this program.

"The zoo is a universal attraction. It is open to all the people. An average of 2,000,000 people a year come here to see the displays we have arranged. They will find a vastly improved zoo when the gates are opened in the spring."

BOARD OF EDUCATION,
Detroit, Mich., March 26, 1936.

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Water Board Building, Detroit, Mich.
(Attention Mr. Frederic S. Schouman.)

GENTLEMEN: In answer to a request received this day, kindly be informed that the value of the improvements obtained for the public school system of Detroit through the W. P. A. channels are vast and extensive, and if continued, provided funds are made available, will greatly improve the condition of our public-school buildings and premises.

Yours very truly,

CHARLES A. GADD,
Business Manager.

HIGHLAND PARK, MICH., *March 26, 1936.*

Mr. F. S. SCHOUMAN,
Administrative Assistant, W. P. A.,
Sixth Floor, Water Board Building, Detroit, Mich.

DEAR SIR: Replying to your recent request for an expression by city officials as the necessity and value of continuing the W. P. A. program, I wish to say that with the experience I have had with the works program in the last 3 or 4 years I am of the opinion that it is vitally necessary that this program be continued.

I am heartily in favor of the work that has been carried on in the past by the Federal Government. In Highland Park we congratulate ourselves on the works program that we have had here, and I feel that the projects that have been done are worth while and are of such nature that they will have saved the taxpayers of the community in expenditures that sooner or later would have to be made.

We have certain projects under way at the present time which it may be possible to complete by June 30. I am anxious that these projects be carried on to completion in the near future.

I can see nothing in the future but chaos after July 1 if this program is not continued, either by W. P. A. or a similar program.

Very truly yours,

JOSEPH M. HACKETT, *Mayor.*

HIGHLAND PARK, MICH., *March 27, 1936.*

Mr. F. S. SCHOUMAN,
Administrative Assistant, W. P. A.,
Sixth Floor, Water Board Building, Detroit, Mich.

DEAR SIR: I wish to write you about a project which I understand is being considered by the W. P. A. for the city of Highland Park, that is the field house proposed to be constructed at Ives Field located on Hamilton Avenue at Pitkin Avenue.

The city of Highland Park is very much in need of such a house. In my opinion this project is one well suited for our city and also one that in future years we might look to as a visible monument constructed by the Government to create employment for the unemployed.

The projects so far started and completed by the city under the programs of the W. P. A. and P. W. A. in most cases are of a permanent nature and have been of considerable value to our city and I for one would like to see these programs continued.

Thanking you, I am,

Yours truly,

THOMAS E. SHAWCROSS, *City Clerk.*

DETROIT, *March 26, 1936.*

Mr. FREDERIC S. SCHOUMAN,
Administrative Assistant,
Michigan Works Progress Administration,
Water Board Building, Detroit, Mich.

GENTLEMEN: There are 10 W. P. A. projects in progress in the village of Ecorse, Wayne County, Mich., at the present time, giving employment to approximately 325 men. These projects include street improvements, sewer construction, water-main extensions, spraying trees, and public-building repairs. All of these projects are of great value to the municipality and will result in a great saving to the general budget, since practically all of these projects are urgently needed.

It is to be hoped that this Federal program will continue, particularly in view of the fact that greater progress can now be made since we have passed over the serious obstacles entailed while working during the past severe winter. These projects during the coming months of good weather can be accomplished at greatly decreased costs and with improved organization of the workmen. Even during the past week or two of good weather, the morale of the men on the job is greatly improved, which has been indicated by the results and workmanship obtained on the various jobs.

Very truly yours,

MASON L. BROWN & SON,
P. G. BROWN,
Engineers.

WYANDOTTE, MICH., *March 26, 1936.*

Mr. HARRY L. PIERSON,
State Director, W. P. A., Lansing, Mich.

DEAR MR. PIERSON: I wish to make an appeal for the continuance of W. P. A. work in our city. We are doing an exceptionally good job and, in fact, all of the jobs are of a successful nature to benefit the city a great deal; incidentally, it has taken a burden from our welfare relief.

We are ready now to start on five projects that have been O. K.'d and we have seven other projects that are vitally necessary. Four jobs are widening of streets in the business district and three important sewer jobs.

Therefore I am requesting you to do your utmost for the continuance of W. P. A. work in our city.

Sincerely yours,

T. A. DAVIS,
Mayor of Wyandotte.

FORDSON BOARD OF EDUCATION,
DEARBORN, MICH., *March 24, 1936.*

MICHIGAN WORKS PROGRESS ADMINISTRATION,
Water Board Building, Detroit, Mich.

GENTLEMEN: The Fordson Board of Education has gone on record to the effect of instructing me to write a representative of the W. P. A. a letter of appreciation for the benefits that have accrued to the Fordson school district through your assistance and cooperation.

During the worst years of the depression the board cut maintenance work in the schools to the lowest possible point. It was felt that it was much better to keep the education of the school children on a par with that of previous years rather than to keep the buildings and equipment in their former state of condition. Of course, as a result there was an enormous amount of maintenance work that accumulated. In a way it seemed that the policy of the board might have been a penny-wise one. And it was at this point that your help came as a godsend. Our schools have been brought up to a point of maintenance and condition that would have been utterly impossible under our maintenance appropriations alone. We esteem the Government's action on our behalf and we especially regard the courteous cooperation of your office.

Our type of work called for a large proportion of skilled labor. We thought at first that there might be a lot of grumbling on the part of the men who were employed on our projects because of their former rates of pay. However, we are happy to relate that the morale of the men was surprisingly fine in the overwhelming majority of cases. In fact, after the C. E. R. A. was discontinued many of them were willing to work and volunteered to do so for only the amount they received from dole. Perhaps you will be interested to know that.

Respectfully yours,

GEORGE T. MARTIN, *Secretary.*

BOARD OF EDUCATION,
Hamtramck, Mich., March 25, 1936.

Mr. FREDERIC S. SCHOUMAN,
Administrative Assistant,
Michigan Works Progress Administration,
601 Water Board Building, Detroit, Mich.

MY DEAR MR. SCHOUMAN: May I take this opportunity to express my appreciation of the many valuable projects we have been able to secure for the Hamtramck public schools through the W. P. A.? All of these projects are still under way.

The bookbinding project is enabling us to place our libraries in very usable condition.

Under the furniture project we have and are repairing much of our school equipment and are securing new equipment which we should not have been able to have.

The comparative health statistics projects is making it possible for us to bring together and analyze a great deal of very valuable information regarding our boys and girls. I know that we shall be able to use this information for their benefit.

The project for remodeling the shower and locker rooms, in connection with the swimming pool in the Hamtramck Senior High School, is making it possible for us to do something which we have long wanted to do. The arrangements there have never been satisfactory. This project is providing excellent facilities for senior high-school students.

The project for completing the swimming pool at the Copernicus Junior High School is enabling us to complete a part of that plant which we are unable to do with our own resources. This school has gone without a swimming pool since the completion of the building about 5 years ago. It will be the only swimming pool in the city in addition to the senior high school swimming pool which is in a widely separated part of the city.

Hamtramck has for many years needed a football stadium. We have never been able to provide decent seating facilities for the fans of our high-school football games. The W. P. A. project, which is under way, will give us one of the finest football stadiums of any high school in the State. This, too, would have been impossible with the local resources at our command.

I know that the people of the school district of the city of Hamtramck are very thankful to the Federal Government for making these many excellent projects available to the public schools. I sincerely hope that we may continue to cooperate with the W. P. A. in these and other projects so that we may provide for our boys and girls many things which would be impossible without W. P. A. assistance.

Very truly yours,

M. A. KOPKA,
Superintendent of Schools.

MELVINDALE, MICH., *March 26, 1936.*

Mr. L. R. HOFFMAN,
Assistant District Director, Michigan Works Progress Administration, Detroit, Mich.

DEAR SIR: Having been informed that the W. P. A. may be discontinued in June, the writer wishes to go on record as being opposed to discontinuing work and placing men on relief. As commissioner of public works and project director, I have been in close contact with the men of this community during the C. W. A., F. E. R. A., and W. P. A. It is the writer's opinion that upward of 90 percent of the people are glad to have the opportunity to work for their living. I also find that these men on W. P. A. seem to be more contented than they have been in the past year or two.

There have been many improvements to streets, alleys, schools, sewers, which under ordinary conditions could not have been accomplished due to the lack of finances in the immediate community. All of this work has been for the better health and beautification of the district. I feel that with such a large percentage of the people unemployed to stop this program and not replace it with another like program would cause a great deal of dissatisfaction, locally and nationally.

Hoping that our Congressmen can see fit to finance and continue work in place of relief, which, in the writer's opinion, is the logical thing to do.

Kindly accept this as an unbiased opinion.

Yours very truly,

CLARK A. ROWLEY,
Project Director, City of Melvindale.

MELVINDALE, MICH., *March 25, 1936.*

Mr. L. R. HOFFMAN,
Assistant District Director,
Michigan Works Progress Administration, Detroit, Mich.

DEAR SIR: It is indicated, by the failure of Congress to appropriate additional funds for works projects, that the present program will be discontinued in the near future. It is the opinion of the writer that it would be a grave error to throw these families who have been receiving support through the Works Progress Administration back on relief, if any. There has been a great many improvements in Wayne County, due to the present program, which, ordinarily would not have been done.

Hoping that this will tend to show the general feeling throughout this community, I remain

Yours truly,

LEROY ADAMS,
Wayne County Board of Supervisors.

TAU BETA COMMUNITY HOUSE,
Hamtramck, Mich, March 27, 1936.

Mr. F. S. SCHOUMAN,
Administrative Assistant,
Works Progress Administration, Detroit, Mich.

MY DEAR MR. SCHOUMAN: It cannot be possible that the Government is planning to discontinue its work program.

The testimony of the delegate conference of the American Association of Social Workers held in Washington on February 14, 15, and 16, was evidence of the suffering and hardship of the American people. And those conditions existed with W. P. A. at its height. An urgent demand for a return of the Federal Government into the field of direct relief ran through the entire conference. If they saw this need then, what will conditions be like if the Government withdraws the work program?

Locally, we need our recreation, adult education, and labor projects, and we need to complete the junior high swimming pool and school stadium. However, the important factor is the opportunity for our people to work. Will private industry be able to absorb them? If not, what will take its place?

Yours very truly,

BORGHILD HALVORSEN,
Head Resident.

LINCOLN PARK, MICH., *March 27, 1936.*

Mr. HARRY L. PIERSON,
State Director, Michigan Works Progress Administration,
601 Water Board Building, Detroit, Mich.

DEAR MR. PIERSON: Having read with much interest discussions in the daily press for and against the continuation of the W. P. A. program, I wish to state briefly my own personal opinions based upon close contact with the work in my own community, and taking into consideration the general attitude of the men employed and also comparing that attitude with the previous Emergency Relief Administration and the C. W. A., all of which I had contact with.

It is my firm conviction that the giving of a dole has damaged the morale of the people receiving it to an extent that can hardly be realized, and that the making available of employment through a form of public work, such as the W. P. A. and its predecessor, the C. W. A., has done much to restore confidence and a feeling of security in the ranks of the unemployed, and at the same time has maintained their sense of personal responsibility for the care and protection of their immediate families. Also, it has been an outstanding fact that men who appeared to take no interest in the ordinary routine grading of streets and similar manufactured work

where no immediate benefit is apparent, immediately they are placed on useful and constructive labor, take an interest in their work.

From the standpoint of the community, I wish to say that through the W. P. A. program and its predecessor, the C. W. A., the city of Lincoln Park has accomplished work, such as repairs to sewers, schools, water mains, streets, and is now engaged in the construction of municipal buildings. All of this work was badly needed and would have been impossible for the city of Lincoln Park to accomplish due to their own serious financial condition.

With all these conditions in mind, I wish to place myself on record as being in favor of the continuation of the W. P. A. program, and, further, that I feel such a program would be of the greatest value to the country at large if it was established on a permanent basis, as I fully believe we can expect a large number of unemployed citizens at all times during the future, particularly of those men who have passed the age where they are readily absorbed in industry.

Yours very truly,

WILFRED L. CROWLEY,
Project Director, Lincoln Park.

Oscar G. Olander, Michigan commissioner of public safety:

"Cooperation of the W. P. A. is giving us in a few months an entire new physical set-up, which would have required 20 to 25 years to obtain from available State funds.

"I can wholeheartedly commend the necessary work the Works Progress Administration is doing for this commission and for other units of government throughout the State. Clean and modern quarters, replacing antiquated and inadequate facilities, will have a salutary effect on the morale of the State police force."

"When the W. P. A. program is carried to a successful conclusion, Michigan will have as fine a network of airports and landing fields as any State", declares Col. Floyd E. Evans, director of the Michigan State Department of Aeronautics, which is sponsoring and supervising W. P. A. work.

"Thanks to Federal aid we are now making 20 years' progress in one stride."

LANSING, MICH., *March 23, 1936.*

Mr. HARRY L. PIERSON,
W. P. A. State Director, Detroit, Mich.

DEAR MR. PIERSON: I wish to urge you to do all possible to continue W. P. A. projects in our city. These projects have been of great help in meeting the demands for work relief.

I would like very much to see this work continued in Lansing for another year.

Yours very truly,

MAX TEMPLETON, *Mayor.*

LAW ENFORCEMENT

Mr. ASHURST. Mr. President, superlatives in speech are frequently looked upon as evidences of a weary man or sometimes an indolent man who does not seek a more nearly exact medium of expression. Nevertheless, I choose in these remarks to employ superlatives, because the results achieved by Hon. Homer S. Cummings, the Attorney General, in his successful and constant warfare upon gangsters, are of surpassing importance, and only superlatives would truly delineate and set forth the arduous labors of Attorney General Cummings and his Department with particular reference to the energies of the Federal Bureau of Investigation of that Department in coping with professional criminals.

I ask unanimous consent to have printed in the RECORD at the end of my remarks a detailed statement showing the recorded activities of the Federal Bureau of Investigation, Department of Justice, for the past 3 years.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit A.)

Mr. ASHURST. Mr. President, there is no such thing as the "clueless crime." In every crime, no matter what degree of cunning may be employed or how many times the perpetrator may double on his track, there invariably remains that which, in the nomenclature of detection and investigation, is called the "dropped stitch." The "dropped stitch" is that inescapable, irresistible, unavoidable impression, sign, or track made by any and all human activities. To find the "dropped stitch" and then ascertain who dropped it is, of course, the duty and task of all who are engaged in the work of detection and investigation.

The Department of Justice, under the administration and leadership of Attorney General Cummings, has proved that there is no such thing as a "perfect crime." The Federal Bureau of Investigation in the Department of Justice is equipped, among other apparatus and paraphernalia, with microscopes for examination of bullets and other articles of evidence, an ultraviolet—black light—device for revealing secret writing and identifying stains, chemicals for developing latent fingerprints, and analyzing various substances.

The activities of Attorney General Cummings, through the Federal Bureau of Investigation, embrace and comprehend physics, that is to say, that branch of science which deals with biology, chemistry, geology, mechanics, ballistics, electricity, heat, light, and sound. The G-men must be cool, courageous, resourceful, unpurchaseable. They must be trained in psychology—the science of human emotions—and must know what a particular person would be likely to do under given circumstances. Then G-man must have a camera eye and a phonographic brain.

Today, the laboratory of the Department of Justice in its Federal Bureau of Investigation is housed in rooms especially constructed and equipped to meet the needs of the research experts engaged in the varied phases of criminological study.

So-called perfect crimes are almost daily solved by the test tube, by the microscope, and other intricate instruments of science in the technical laboratories of the Federal Bureau of Investigation in the Department of Justice.

When Homer S. Cummings was inducted into the office of Attorney General, he made a careful investigation of the character and attainments of Mr. J. Edgar Hoover. I say advisedly that General Cummings exhibited much courage and foresight in retaining Mr. Hoover as Director of the Federal Bureau of Investigation, and he gave Mr. Hoover all possible encouragement and assistance in order that the work of thwarting gangsters might be successfully performed. Arguments were made to General Cummings to try to induce him not to retain Mr. Hoover's services, but Mr. Cummings, with a judgment and a foresight almost telepathic, retained Mr. Hoover.

Mr. Cummings' judgment and sagacity have been vindicated.

This Federal Bureau of Investigation is charged with the duty of investigating violations of the laws of the United States, and collecting evidence in cases in which the United States is or may be a party in interest. The organization has a personnel of over 1,600 employees throughout the United States. Under the supervision of the Attorney General, the Director of the Bureau directs the work of the special agents who are employed for the purpose of detecting crime and collecting evidence.

The Attorney General has under his immediate supervision the identification division of the Federal Bureau of Investigation, which has on file over 5,700,000 sets of fingerprint records of persons who have been arrested in the United States and foreign countries, representing the largest and most nearly complete collection of fingerprint records of current value in existence. In addition, he has under his supervision the technical laboratory of the Federal Bureau of Investigation, wherein scientific detection aids are utilized in connection with the solving of crimes under the Bureau's jurisdiction. The experts of this laboratory also assist State and local law-enforcement officials throughout the country in the use of scientific crime-detection aids, such as handwriting and typewriting analysis, the examination of blood, hair, cloth, soils, and bullets, the use of ultra-violet light in the examination of substances, and the decoding of cryptographic messages.

Not the least in importance of the arduous labors of Attorney General Cummings, was his formulation and advocacy of the so-called antigangster or anticrime laws passed during the Seventy-third and Seventy-fourth Congresses. This task of itself was of immense proportion. The more prominent of these recent Federal anticrime laws include those relating to kidnaping, extortion, the interstate transportation of stolen property, the robbery of banks organized or operating under the laws of the United States, interstate flight to avoid prosecution or to avoid testifying in certain cases, the Federal Antiracketeering Act, and the killing or assaulting of Federal officers. One of the most helpful and enlightening of all the conferences ever held in Washington was the Attorney General's "conference on crime", called by Mr. Cummings in 1934, from December 10 to

December 13, inclusive. The program of the various sessions of that conference were planned by the Attorney General so as to give cross-sectional views of the problem of crime control in its various aspects. It would have been possible to have held one session on crime prevention, to be attended by teachers, medical authorities, juvenile court authorities, and churchmen; another session on detection and apprehension to be attended by police and investigators; another on courts and prosecution to be attended by judges, prosecuting attorneys, and defense lawyers; another on probation and parole; another on penal institutions; another on legal research and legislation; and so on throughout the whole contributing structure of governmental organization and professional service. Instead, representatives of all professional groups, together with representatives of outstanding civic and scientific associations, met here in common conference.

If the so-called gangsters—that is, the unsocial persons—become convinced that detection and punishment follow their unlawful forays, such forays will, if not entirely subside, at least vastly diminish in volume. The unsocial, the malicious, those who try to reap where they have not sown, those who have no regard for human life and who have no regard for the property of others, have found to their dismay that the policy of Attorney General Cummings was to prosecute with vigor, determination, and success. They—the unsocial—have discovered that behind the criminally disposed persons there follows silently but relentlessly the shadow of retributive justice. Some shallow-pated citizens have from time to time mistakenly believed that a tinge of romanticism surrounded desperate public enemies. One of the master strokes of Attorney General Cummings was to divest crime of any and all of its supposed romance by showing that crime does not pay and that so far from being romantic or glamorous, crime is instead sordid, low, ignoble, and debased, and that professional criminals are neither brave, nor chivalrous, nor generous, but are cowardly, cruel, unfair, and obscene.

There is no honor among thieves; they always sell out one another. In many, if not most, instances, the capture and conviction of the gangster or professional criminal has been brought about by clues or evidence furnished to the officers by other gangsters. These professional criminals or so-called gangsters or public enemies, desire ease, luxury, money, and excitement. Civilization has been geared up to a point where only men of industriousness, honesty, superior mind, and courage can ever hope to win these prizes legitimately.

The gangster or public enemy possesses none of these attributes, but vainly and illegitimately endeavors to win these prizes.

Statistics covering the work of the Department of Justice through its Federal Bureau of Investigation are prepared to cover fiscal-year periods. During the past 3 fiscal years 11,144 convictions were secured in cases wherein special agents of the Department of Justice performed investigative work. Fines of $1,433,090 were imposed. The Department of Justice is now obtaining convictions in 94 percent of all cases brought to trial which it investigates. The total value of recoveries effected in cases wherein special agents of the Department of Justice performed investigative work amounted to $9,718,220, whereas the entire cost of operating the Bureau of Investigation during this period was $9,726,241. In addition, there was saved the Government in Court of Claims cases and other civil cases investigated by the Bureau, exclusive of war-risk insurance cases, the sum of $1,378,693.62. The war-risk insurance suits terminated since this work was taken over by the Bureau on September 10, 1933, to this date has resulted in a saving to the Government of $78,879,532.04.

For each $1 appropriated for the use of the Federal Bureau of Investigation during the past fiscal year there has been returned to the Government approximately $8, in the form of fines, recoveries, and savings effected in war-risk insurance, Court of Claims, and miscellaneous cases.

In conclusion, Mr. President, it will be perceived that I was justified in employing superlatives while describing the activities of the Department of Justice in its efforts to detect crime, prosecute law violators, and guarantee to the peaceful, law-abiding citizen protection and security from unlawful attempts against his person or his property. The industrious citizen of good will, walking the paths of peace, is entitled to protection and security, and these rights Attorney General Cummings and Mr. J. Edgar Hoover have nobly striven to provide.

EXHIBIT A

STATEMENT OF THE RECORDED ACTIVITIES OF THE FEDERAL BUREAU OF INVESTIGATION, DEPARTMENT OF JUSTICE, FOR THE PAST 3 YEARS

On September 19, 1934, Bruno Richard Hauptmann was taken into custody by special agents of the Federal Bureau of Investigation, assisted by local and State police officers, and subsequently turned over to the New Jersey State authorities.

The kidnaping of Mr. Charles F. Urschel at Oklahoma City on July 22, 1933, is an illustration of the need of an agency such as the Federal Bureau of Investigation, which is unhampered by State boundaries. Immediately after Mr. Urschel's kidnaping Mrs. Urschel telephoned the Federal Bureau of Investigation, and special agents of the Bureau immediately instituted an investigation.

The kidnapers demanded $200,000 ransom and, during the time the negotiations were in process, the special agents of the Bureau conducted their investigation in such a manner as would insure the safe return of the victim, which is the procedure followed in all kidnaping cases, the Bureau having this as its primary objective at all times. Within 90 days after Mr. Urschel was kidnaped, 16 persons had been convicted in Federal courts, 6 of these receiving life sentences; ultimately 20 persons were convicted and 3 persons are still in custody awaiting trial.

The investigation conducted in this case covered 23 States, resulting in the apprehension of the notorious "Machine-Gun" Kelly, who is credited with having first applied the appellation "G-men" to representatives of this Bureau at the time of his apprehension. Harvey Bailey was apprehended near Paradise, Tex., Albert Bates in Denver, Colo., and in addition, the money changers, lawyer criminals and individuals who harbored the criminals during their flight were taken into custody in various sections of the country. Ransom money was located in Oregon, Washington, California, and Texas. Investigation as to the activities of this gang was conducted in many other States.

Of the persons convicted and now awaiting trial, only a small number actually participated in the kidnaping, the remainder aided and assisted the kidnapers by providing places of refuge, acting as money changers, or otherwise assisting. Ben B. Laska, a lawyer criminal of Denver, Colo., was convicted of receiving part of the ransom money and was sentenced on July 29, 1935, to 10 years, from which he has taken an appeal, and Mollie O. Edison, another attorney associated with Laska, is now in custody awaiting trial.

The case involving John Herbert Dillinger demonstrates the necessity for an organization having jurisdiction beyond the confines of State boundary lines. After having served 8½ years for assault and battery with attempt to rob, Dillinger was paroled from the Indiana State prison on May 10, 1933, comparatively unknown to law-enforcement officers. He was killed by special agents of the Federal Bureau of Investigation while resisting arrest on July 22, 1934. Within this brief period of time he became the country's most notorious and highly publicized outlaw. Within 15 months he committed major offenses, mostly bank robberies, in over half a dozen Midwestern States and his apprehension was sought in virtually every section of the country.

The Federal Bureau of Investigation, as a result of its investigation, convicted 27 persons; 4 of his companions were killed while resisting arrest, including "Baby Face" Nelson, Homer Van Meter, Tommy Carroll, and Eddie Green, all of whose depredatory activities extended throughout the country and many atrocious crimes were attributed to them; one of the members of the Dillinger gang was found murdered; one had committed suicide; and one received a life sentence. In addition to those who were killed, the total convictions represent individuals who in any way assisted these criminals in their flight. These individuals included persons who rendered medical assistance by plastic surgery work, attempts to mutilate prints and treatment of their wounds, and, in addition thereto, those persons who harbored these individuals.

During the course of the investigation conducted looking to the apprehension of the so-called Dillinger gang, three special agents of the Federal Bureau of Investigation, namely, Inspector Samuel P. Cowley, Special Agent Herman E. Hollis, and Special Agent W. Carter Baum, were murdered while engaged in gun battle, resulting from the resistance of John Dillinger, "Baby Face" Nelson, Homer Van Meter, and other members of the gang to arrest.

On January 17, 1934, Edward George Bremer, president of the Commercial State Bank, St. Paul, Minn., was kidnaped between 8:15 and 8:45 a. m., immediately after he had driven his daughter to the Summit School. He was taken to an unknown hideout, where he was held until February 7, 1934, when he was released near Rochester, Minn., after the payment of $200,000 by Walter McGee, who was named by the victim as the intermediary.

The arrest of Alvin Karpis on May 1, 1936, at New Orleans, La., and the arrest of Harry Campbell at Toledo, Ohio, on May 7, 1936, by a group of special agents personally led by the Director, brought about a solution and apprehension of all persons involved in this abduction. There are presently in custody awaiting trial eight persons; by way of recapitulation, five life sentences were received, three persons were killed while resisting arrest, being "Ma" Barker, Fred Barker, and Russell Gibson; two were murdered by the underworld; a total of 75 years and 6 months was meted out to those persons who assisted in any way members of the Barker-Karpis gang. The Bureau relentlessly sought all individuals, whether doctors, lawyers, relatives, or other associates who in any way rendered aid to these persons, and it was as a result of the Bureau's activities that 15 convictions have so far been obtained.

The latest major kidnaping case which has been investigated by this Bureau was that of George Weyerhaeuser, who was kidnaped while en route home from school at noon on May 24, 1935. He was released on June 1, 1935, after the payment of $200,000 ransom. Within 2 weeks after the kidnaping of the Weyerhaeuser child the perpetrators of the kidnaping were known to the Federal Bureau of Investigation, and two of them had been apprehended, Harmon Metz Waley and his wife, who were subsequently sentenced in Federal court to 45 and 20 years, respectively. Extensive investigation was immediately begun seeking the apprehension of William Dainard, investigation being conducted throughout the entire United States and Canada, which resulted in his apprehension by special agents of the Federal Bureau of Investigation in San Francisco on May 7, 1936. On May 9, 1936, Dainard was sentenced in Federal court to serve 60 years on each of the two counts of the indictment charging him with this kidnaping, to run concurrently. There has been recovered in this case over $142,000 of the ransom which was paid.

As a result of the Bureau's investigation of kidnaping cases, kidnapings have temporarily ceased. Since the passage of the Federal kidnaping law, 142 of the kidnapers involved in 62 cases have been convicted, 29 received life sentences, 4 death sentences, 2 individuals were lynched, 3 committed suicide, 6 were murdered, and 5 were killed while resisting arrest, the remainder receiving sentences approximating 2,000 years. Twenty-three persons are now in custody awaiting trial and sentence.

Not all of the notorious criminals who are apprehended by special agents of the Federal Bureau of Investigation are involved in kidnaping cases. One of the most atrocious crimes committed in modern times was the murder of four peace officers, including a special agent and their prisoner, at Kansas City, Mo., on the morning of June 17, 1933, when an attempt was made by "Pretty Boy" Floyd and two associates, Adam Richetti and Verne Miller, to deliver Frank Nash, an escaped Federal prisoner, who was being returned to the United States penitentiary at Leavenworth, Kans., by special agents and local officers. Frank Nash was originally sentenced to this penitentiary on March 1, 1924, to serve 25 years upon his conviction of the charge of assaulting a mail custodian. He escaped from the penitentiary on October 19, 1933. Inasmuch as the Federal Bureau of Investigation is charged with the responsibility of apprehending all escaped Federal prisoners, an immediate investigation was instituted which resulted in evidence being obtained by special agents indicating Nash's participation in the sensational escape of seven notorious prisoners from the United States penitentiary, Leavenworth, Kans., on December 11, 1931. He was apprehended by employees of the Bureau in a pool hall at Hot Springs, Ark., on June 16, 1933, and it was while being returned to Leavenworth that he and the law-enforcement officers, including Special Agent Raymond J. Caffrey, were killed. Verne Miller was the victim of a gang slaying in Detroit; Adam Richetti was apprehended by local officers, and "Pretty Boy" Floyd was killed by special agents while resisting arrest near East Liverpool, Ohio.

The Bureau has primary investigative jurisdiction over the Federal Extortion Act, approved July 8, 1932, and since that time has performed investigative work in a large number of extortion cases. The investigation in these cases resulted in the conviction of 230 persons who received actual, suspended, and probationary sentences of 1,359 years 7 months and 6 days, and there are now in custody 55 persons awaiting trial.

A part of the armed horde of criminals operating in the United States today secure their firearms and ammunition through the robbery of Government arsenals and armories, which constitutes a theft of Government property and which is within the investigative jurisdiction of the Bureau. Since January 1, 1933, to date, a total of 278 such robberies have been investigated by the Bureau. In these cases a total of 2,409 pistols, rifles, machine guns, and other miscellaneous weapons were stolen. There have been recovered 1,099 of these weapons. Two hundred and eighty-seven thousand seven hundred and fifty-one rounds of ammunition were also taken, of which 205,578 rounds have been recovered. Two hundred and fifteen convictions have been obtained, and there are now 46 persons awaiting trial.

There also falls within this Bureau's investigative jurisdiction violations of the National Motor Vehicle Theft Act. In violations of this act in which the Bureau performed investigative work during the past 3 fiscal years, 8,274 automobiles have been recovered, valued at $3,301,473.52. Since the passage of the act in October 1919, a total of 41,544 stolen motor vehicles, valued at $25,803,793.73, have been recovered in cases in which the Bureau performed investigative work. While persons violating this act are usually considered to be minor criminals, it has in some instances given the Bureau investigative jurisdiction in cases of the more notorious criminals; in fact, it was the violation of this act which permitted the Bureau to undertake the investigation seeking the apprehension of such notorious individuals as John Herbert Dillinger, Eddie Doll, and others.

One of the recently enacted Federal statutes is that of the Federal Bank Robbery Act, approved by the President on May 18, 1934, making it a Federal offense to rob a national bank or member bank of the Federal Reserve System. This act was amended on August 23, 1935, to include insured banks in the Federal Deposit Insurance Corporation. There has been a total of 183 robberies of national banks and member banks reported to the Bureau, and 62 robberies of insured banks since the enactment of the legislation. Prior to the passage of this act the average number of robberies per month in the national banks and member banks, based upon the figures of the American Bankers' Association, were 16 per month. This number of robberies was reduced until during the year 1935 the average robberies of such banks were 6.4 per month. The average robberies of all banks, other than national and member banks, based upon the American Bankers' Association figures, for the 5-year period 1929 to 1933, inclusive, was 30 robberies per month. The average monthly number of robberies of the State banks insured by the Federal Deposit Insurance Corporation since these banks were included under the provisions of the Federal Bank Robbery Act has been less than six per month.

Indicative of the effectiveness of the Bureau's investigation in bank-robbery cases is the result secured in the robbery of the Peoples National Bank, Kingfisher, Okla., on May 31, 1934. The identity of the perpetrators of this robbery was ascertained, through investigation conducted by the Bureau, to be James Clark, Frank Delmar, Aubrey Curtis Unsell, and Ennis Smiddy. Clark and Delmar escaped from the Kansas State penitentiary, Lansing, Kans., on January 19, 1934. Clark had previously escaped from this same institution on May 30, 1933, with Harvey Bailey, George Brady, Wilbur Underhill, and other noted desperadoes. He had been originally received in the penitentiary on July 8, 1932, to serve a life sentence as a bank robber and habitual criminal. The other participants in the robbery were equally notorious. Clark was apprehended by agents of the Bureau on July 1, 1934, at Tulsa, Okla. Delmar was taken into custody near Claremore, Okla., on August 11, 1934. Unsell was apprehended on September 10, 1934, by special agents, assisted by local officers, and on Christmas Day, 1934, Ennis Smiddy was taken into custody by special agents of the Bureau assisted by local officers.

Clark, Delmar, Unsell, and Smiddy were indicted in Federal court on January 19, 1935; all entered pleas of guilty. Clark and Delmar were given actual sentences of 99 years each and fined $5,000. Unsell and Smiddy were given actual sentences of 50 years each and fined $5,000. The total actual sentences imposed upon the four robbers of this bank were 298 years.

As a result of investigations conducted in bank robberies by the bureau, 116 persons have been convicted in Federal courts and given sentences, actual, suspended, and probationary, of 2,523 years, 6 months, and 2 days, and three individuals were sentenced to life imprisonment.

Jurisdiction of the Federal Bank Robbery Act not being reserved exclusively to the courts of the United States, investigation was conducted in numerous bank robberies resulting in the information developed by this Bureau being furnished to State officials for prosecution in State courts.

During the year 1935 the Bureau conducted investigation in a case involving the theft of $185,000 in jewelry from Mrs. J. C. Bell at the Miami-Biltmore Hotel, Coral Gables, Fla. The investigation of this case was important inasmuch as the participants were engaged in a particularly evil practice which had arisen in recent years in various sections of this country, whereby robberies of jewelry, securities, and other valuables have been settled by the return of the stolen property in consideration for the repayment of rewards by insurance companies and other interested persons, affording a practical immunity for the perpetrators of the original crime. As a result of the Bureau's investigation of this case, a Federal grand jury at New York City returned an indictment charging Noel C. Scaffa, the head of a private detective agency, who had specialized in operations of this crime, with perjury. Scaffa was convicted in Federal court and sentenced to serve 6 months in prison on each of three counts of the indictment to run concurrently. Scaffa and associates, including one Robert C. Nelson, reported to be a well-known "fence", are presently under indictment for violation of the National Stolen Property Act.

Another case recently investigated by this Bureau involving a violation of the National Stolen Property Act resulted from the theft of $590,000 from the United Trust Co. of New York City during December 1934. Subsequent information was obtained indicating that the securities stolen had been transported in interstate commerce. The Bureau was successful in recovering over $300,000 of the stolen securities and in apprehending eight individuals, some of whom are nationally known sneak thieves, as well as known international dealers in stolen securities. However, investigation is still being continued in this case looking toward the identification and the apprehension of other individuals who participated in the disposition of these stolen securities.

As recently as last Monday, May 11, Thomas H. Robinson, Jr., kidnaper, was captured in Glendale, Calif., by G-men and was immediately taken by plane to Louisville, Ky., to be placed on trial for abducting and kidnaping Mrs. Alice Speed Stoll.

Investigations are also conducted by the Bureau in antitrust cases. Many complaints involving violations of the Federal antitrust laws have been investigated by the Bureau since July 1,

1933. Since that date 151 convictions have been obtained in cases in which the Bureau conducted investigations, resulting in actual, suspended, and probationary sentences of 28 years and 6 months. Fines totaling $65,996 were imposed, and 17 fugitives were located. Of the 151 convictions obtained, 41 persons and corporations were perpetually enjoined from continuing business operations which would be in direct conflict with the antitrust laws of the United States.

Investigations were conducted by the Bureau in violations of the White Slave Traffic Act during the fiscal years 1933, 1934, and 1935, which resulted in the obtainment of 744 convictions in which actual, suspended, and probationary sentences were imposed of 1,560 years 1 month 18 days, and fines of $30,466.01. During this same period of time 269 fugitives whose apprehension was being sought for violations of the White Slave Traffic Act were located.

The Bureau also conducts investigations of the impersonation statutes, which make it a Federal offense for any person, with the intent to defraud, to impersonate a Government employee, and to take it upon himself to act as such an employee and demand or obtain a thing of value. Investigations conducted in this type of violation during the past 3 fiscal years resulted in 552 convictions. Actual, suspended, and probationary sentences totaling 1,272 years 7 months 9 days, and fines of $30,066.87 were imposed, and 243 fugitives were located.

Relative to violations of the National Bankruptcy Act during the 3-year period ending June 30, 1935, there have been secured 501 convictions, resulting in the imposition of sentences totaling 1,038 years 22 months 16 days. Fines amounting to $74,136.20 were imposed, and recoveries were effected amounting to $187,858.55. From the period June 30, 1935, to date there have been secured 102 convictions, resulting in the imposition of sentences amounting to 230 years 9 months 15 days. Fines totaling $19,100.04 were imposed, and recoveries effected totaling $105,518.13. In addition to the aforementioned results, 118 fugitives have been apprehended since July 1, 1933.

The Federal Bureau of Investigation has investigative jurisdiction over all violations of Federal laws and matters in which the United States is or may be a party in interest, except those matters specifically assigned by congressional enactment or otherwise to other Federal agencies, and performing other duties imposed upon it by law. Among those matters under the primary jurisdiction of this Bureau, which have not previously been referred to, are the following: Admiralty law violations, bank embezzlements in the District of Columbia, bondsmen and sureties, bribery, claims against the United States, claims by the United States, condemnation proceedings, conspiracies, contempt of court, copyright violations, crimes on the high seas, crimes in Alaska, crimes in connection with Federal penal and correctional institutions, crimes on Indian reservations, crimes on Government reservations, destruction of Government property, espionage, frauds against the Government, harboring of Federal fugitives, illegal wearing of service uniforms, interstate transportation of explosives, intimidation of witnesses, international claims, larceny from interstate shipments, National Bank Act, neutrality violations, obstruction of justice, peonage statutes, passports and visas, patent violations, parole and probation violations, Federal, perjury, Red Cross violations, theft or embezzlement of Government property, treason, Veterans' Administration violations.

During the fiscal years 1933, 1934, and 1935, 3,121 fugitives, whose apprehension was being sought by the Bureau for the violation of some Federal law, were located as a result of investigations conducted by the Bureau.

Not all of the investigations conducted by the Bureau are confined to violations of the criminal statutes of the United States. During the past 3 fiscal years there were conducted for the Department of State and other Federal agencies a large number of investigations which did not require actual court procedure, including the investigation of applicants for positions in the Department of Justice; and, at the request of the Attorney General, the Bureau also inquired into the qualifications of applicants for appointment as United States judges, United States attorneys and their assistants, and United States marshals. As an indication of some of the miscellaneous investigations so conducted during the past few years, as a result of an Executive order of April 5, 1933, requiring the return to Federal Reserve banks outstanding gold, which was generally known as the Gold Hoarding Act, an additional burden was placed on the Bureau which necessitated the interviewing of approximately 10,000 persons, calling upon them to return this gold.

Probably the more important types of civil investigations now being conducted by the Bureau are those investigations involving fraudulent claims made in connection with war-risk insurance cases. Since this work was taken over by the Bureau on September 10, 1933, a total of 6,949 cases have been investigated, resulting in savings to the Government of $78,879,532.04. When the Bureau took over these investigations, the percentage of suits terminated favorably to the Government was approximately 60 percent. At this time the percentage of suits which are terminated favorably to the Government is slightly less than 95 percent. These figures are exclusive of compromises and cases reversed upon appeal.

In addition to the criminal and civil investigations conducted by the Bureau of Investigation, it is also charged with the duty of acquiring, maintaining, preserving, and disseminating identification data. The growth of the Identification Division of the Bureau of Investigation has increased appreciably as indicated by the fact that at the end of 1932 there were 4,712 fingerprint contributors, which number has increased until today there are over 9,600 contributors. Since the first of 1933 the total number of fingerprints on file has increased from 3,078,572 to over 5,800,000 at the present time. At the present time an average of over 3,700 criminal fingerprint cards are received each day which are answered to the contributors within 36 hours after receipt in the Bureau. There are a grand total of over 5,800,000 fingerprint cards on file. During the past 3 fiscal years effective progress has been made in the exchange of international fingerprints with foreign countries. The officials of 70 of the indentification bureaus of the principal nations of the world are cooperating with the Identification Division of the Federal Bureau of Investigation. This is the largest depository of criminal identifying data in the world which will be readily realized when it is considered that Scotland Yard has only approximately 750,000 prints on file and the French Sûreté 1,800,000. The percentage of identifications made on criminal prints now being received in the Bureau is over 50 percent. During the fiscal years 1933, 1934, and 1935, 12,577 fugitives whose apprehension was being sought by Federal, State, and local law-enforcement agencies were identified in the Identification Division of this Bureau through their fingerprints.

Civil-service fingerprints of applicants for appointment to the Federal service are also received in the Identification Division of this Bureau. The fingerprints of such applicants are searched against the Bureau's files, and the Civil Service Commission is advised of any police record of the applicant.

During the year 1935 a civil identification section was established where the fingerprints of citizens are filed for personal and precautionary reasons. Indicative of the interest in civil identification is the fact that at this time 600 fingerprint cards are being received in the Bureau each day for inclusion in this file, and there are now on file the fingerprints of over 100,000 citizens.

The technical laboratory of the Federal Bureau of Investigation was formed for the purpose of making scientific examinations of evidence developed in cases investigated by the Bureau and also for the purpose of aiding and assisting local law-enforcement officials by making such examinations for them of physical evidence secured in the investigation of some criminal offense within their jurisdiction. Since the establishment of this laboratory until the end of the fiscal year 1935 there has been made a total of 3,300 examinations. Of this total, 2,337 were made during the fiscal year ending June 30, 1935. The following tabulation is indicative of the types of scientific examinations made in connection with criminal cases during the fiscal year 1935:

Examination of questioned documents	2,028
Microscopic examinations	57
Chemical analyses	60
Examination of firearms evidence	165
Examination of coded messages	23
Miscellaneous examinations	4
Total number of examinations	2,337

In its efforts to combat bank robberies, kidnapings, and other serious crimes the Bureau established a single fingerprint file, in which are included the single fingerprints of approximately 12,000 known kidnapers, bank robbers, extortionists, and gangsters. One thousand eight hundred and seventy-six examinations were made in connection with this file during the fiscal year ending June 30, 1935.

There has also been established for the same general purpose a modus-operandi file upon bank robberies, affording detailed information on the methods of commission of bank robberies in order that the identities of the perpetrators may be established by a comparison of similar methods of operation.

During the year 1935 there was initiated the first police training school of the Federal Bureau of Investigation. In this school selected, qualified law-enforcement officials from police and State law-enforcement agencies throughout the country are given instructions in scientific and practical law-enforcement methods. The graduation exercises of the first training school were held on October 19, 1935, and since that time an additional class has completed the course of instructions. The entire staff of instructors and lecturers of the Bureau's regular training school, and in addition 41 outstanding criminologists and police officials selected from higher institutions of learning and law-enforcement agencies, assisted in the course of instructions. During the past 3 years the training course for newly appointed special agents has been increased from 4 to 14 weeks, the present course of training affording theoretical and practical instructions under experienced instructors and investigators. The retraining of experienced agents of the Federal Bureau of Investigation was initiated during the fiscal year ending June 30, 1935, this training affording the experienced investigator the latest approved instruction upon the developments in scientific investigative methods, firearms training, and kindred subjects.

Since September 1932 a monthly publication entitled "F. B. I. Law Enforcement Bulletin" has been circulated to law-enforcement officials and agencies contributing fingerprint records to the Bureau. This publication includes information relative to the fugitive status of criminals and makes this information available to police agencies throughout the country upon the earliest practicable date. Information is cataloged in the publication concerning individuals sought for the offenses of murder, burglary, robbery, rape, kidnaping, and escapes growing out of these offenses.

Information is also published in the bulletin concerning those fugitives whose apprehension is being sought by this Bureau. Physical descriptions and fingerprint classifications of the fugitives are listed, in addition to the reproduction of the fingerprint pattern of one finger. Articles of special interest to law-enforcement officials dealing with the science of fingerprint identification, the deciphering of charred paper, the handling of bombs and explosives, information on police problems and criminology, and the dissemination of practical and scientific knowledge intended to aid police officials in the detection and apprehension of criminals is also published in each issue of the bulletin.

Mr. DUFFY. Mr. President, will the Senator from Arizona yield?

Mr. ASHURST. I yield.

Mr. DUFFY. The Senator has performed a very fine service in calling the attention of the country to the remarkable work which has been done under the Attorney General, and particularly through Mr. J. Edgar Hoover, the Director of the Bureau of Investigation. On last Saturday I spent 2 hours going through that Bureau; and while the Senator's picture of it is very fine and most illuminating, I would recommend to my fellow Senators, at any time they can find an extra hour, to go to the Bureau of Investigation and make a personal inspection. They will get a graphic picture of a splendidly run Department of this Government.

Mr. ASHURST. Mr. President, I thank the able Senator from Wisconsin. I now yield the floor.

RELIEF OF OFFICERS AND SOLDIERS OF THE VOLUNTEER SERVICE

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas [Mr. CAPPER] that the Senate proceed to the consideration of the motion of the Senator from Utah [Mr. KING], that the vote by which House bill 9472, for relief of officers and soldiers of the volunteer service of the United States, was passed, be reconsidered.

Mr. ROBINSON. Mr. President, I have been advised by Senators, including the Senator from Utah [Mr. KING] and the Senator from Kansas [Mr. CAPPER], that they desire to have the matter go over until tomorrow. I understand the Senator from Indiana [Mr. VAN NUYS] wishes to submit a motion. After that has been done, I shall move an executive session.

REORGANIZATION OF CORPORATIONS UNDER BANKRUPTCY LAW

Mr. VAN NUYS. Mr. President, I move that the Senate proceed to the consideration of the bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

Mr. LEWIS. Mr. President, is it not in order for me to make my motion now to substitute my bill respecting a change in the title of the Interior Department for the bill now on the calendar?

Mr. ROBINSON. Mr. President, I may say to the Senator that the Senator from Indiana has made a motion.

Mr. LEWIS. I beg pardon.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Indiana.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto, which had been reported from the Committee on the Judiciary, with amendments.

EXECUTIVE SESSION

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. MOORE in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations and a treaty, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

He also, from the Committee on Appropriations, reported favorably the nominations of the following persons to be State directors of the Public Works Administration:

George M. Bull, Colorado;
John Latenser, Jr., Nebraska; and
Arthur S. Tuttle, New York.

Mr. HARRISON, from the Committee on Finance, reported favorably the nominations of Henry F. Canby and Robert H. Moore, assistant dental surgeons (Reserve), to be assistant dental surgeons in the United States Public Health Service.

The PRESIDING OFFICER. The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the first nomination in order on the calendar.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. McKELLAR. I ask unanimous consent that the nominations of postmasters be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc. That completes the calendar.

FRED W. SCHUMAN—RECONSIDERATION

Mr. McKELLAR. Mr. President, on Thursday, May 7, the nomination of Fred W. Schuman to be postmaster at Osceola, Nebr., was confirmed. The nomination is still in the Senate, not having been transmitted to the President, and I ask unanimous consent that the vote by which the nomination was confirmed be reconsidered, and that the nomination be recommitted to the Committee on Post Offices and Post Roads. I do this at the request of the senior Senator from Nebraska [Mr. NORRIS].

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee? The Chair hears none. The vote by which the nomination was confirmed is reconsidered, and the nomination is recommitted to the Committee on Post Offices and Post Roads.

LLOYD H. BULGER

Mr. McKELLAR. I have received a telegram asking that the nomination of Lloyd H. Bulger to be postmaster at Arcadia, Nebr., which was reported today, be recommitted to the Committee on Post Offices and Post Roads. I make that request.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee? The Chair hears none, and the nomination is recommitted to the Committee on Post Offices and Post Roads.

RECESS

The Senate resumed legislative session.

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 18 minutes p. m.) the Senate took a recess until tomorrow, Wednesday, May 13, 1936, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 12, 1936

DIPLOMATIC AND FOREIGN SERVICE

George Orr, of New Jersey, now a Foreign Service officer of class 5 and a consul, to be also a secretary in the Diplomatic Service of the United States of America.

Earl L. Packer, of Utah, to be a Foreign Service officer of class 4, a consul, and a secretary in the Diplomatic Service of the United States of America.

Vinton Chapin, of Massachusetts, to be a Foreign Service officer of class 6, a consul, and a secretary in the Diplomatic Service of the United States of America.

COMMISSIONER GENERAL, GREAT LAKES EXPOSITION

A. Harry Zychick, of Ohio, to be United States Commissioner General for the Great Lakes Exposition.

PROMOTIONS IN THE NAVY

MARINE CORPS

Maj. Charles I. Murray to be a lieutenant colonel in the Marine Corps from the 1st day of October 1935.

Second Lt. Eustace R. Smoak to be a first lieutenant in the Marine Corps from the 9th day of February 1936.

The following-named midshipmen to be second lieutenants in the Marine Corps, revocable for 2 years, from the 4th day of June 1936:

Paul R. Tyler	Robert B. Moore
Jean W. Moreau	William D. Roberson
George B. Bell	Louis B. Robertshaw
Andrew B. Galatian, Jr.	James W. Ferguson
Elby D. Martin, Jr.	Harrison Brent, Jr.
William K. Davenport, Jr.	William F. Kramer
John H. Masters	Ralph Haas
Wilfrid H. Stiles	Maynard M. Nohrden
Richard W. Wallace	Ben F. Prewitt
Randolph S. D. Lockwood	John W. Graham
John H. Spencer	Marvin C. Clayton
Donald C. Merker	Richard Rothwell

CONFIRMATIONS

Executive nominations confirmed by the Senate May 12, 1936

POSTMASTERS

CONNECTICUT

Ralph W. Bohannon, Guilford.
Nina P. Hudson Arnold, Haddam.
Charles T. Kelly, Oakville.
Thomas J. Maher, Old Greenwich.
Hans M. Hansen, Jr., West Willington.

KENTUCKY

Wayne Damron, Catlettsburg.
J. Hampton Burch, Fancy Farm.
D. Lawrence Johnson, Owenton.
Philip B. Hyden, Russell.

MAINE

Tobias L. Roberts, Bar Harbor.
Argie S. Henderson, Brownville.
Natt R. Hubbard, Kittery.
Marion Jordan Ricker, Lisbon.
Wesley H. Carver, Ridlonville.
Louis S. Marquis, Springvale.
Harold T. Ricker, Stratton.

MICHIGAN

Alva C. James, Central Lake.
Bert A. Dobson, Jonesville.
Harry A. Newcomb, Kalamazoo.
George H. Walters, Laingsburg.
William H. Coffin, Levering.
Matthew O'Toole, Merrill.
Thomas W. Jackson, Pontiac.
Nelson Joseph Coash, Romulus.
Frank H. Lynch, Rosebush.

TENNESSEE

Wilson L. Tollett, Pikeville.
Theron Myers, Sewanee.

HOUSE OF REPRESENTATIVES

TUESDAY, MAY 12, 1936

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty and everlasting God, we hail this bounteous, radiant day; wood and grove, hill and dale tell of Thy glory. We thank Thee for the sunlit sky and the blossoming earth, for the springtime flowers that border our paths with loveliness, and for happy bird song, lifting our hearts to responsive joy and praise. Heavenly Father, Thy voice is as the voice of many waters; let us hear its melodies in the deeps of our souls. May it touch every hidden desire and purpose, making us more grateful, more heroic, going forth conquering and to conquer. We pray that we may enter heartily into our manifold duties, ever cherishing a serious view of life. Always keep us from the murky depths of low thinking, feeling, and action, rejoicing in an inner light and assurance that fill the heart with peace and certainty. Through Christ our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

THE FRAZIER-LEMKE BILL

The SPEAKER. The Chair may say that under the rule nothing is in order this morning except the consideration of the bill which was provided for by rule yesterday. However, with the unanimous consent of the House, the Chair will recognize Members to correct the RECORD. The Chair does not believe that, technically speaking, anything is in order this morning except the consideration of the bill just mentioned.

The Chair may make the further statement that under the rule adopted yesterday it is provided that the Chair recognize the Representative at Large from North Dakota [Mr. LEMKE] to call up the bill H. R. 2066 and to move that the House go into the Committee of the Whole for the consideration of the bill. It is further provided that the time shall be equally divided and controlled by the Member of the House requesting the rule for the consideration of H. R. 2066 and a Member of the House who is opposed to said bill, H. R. 2066, to be designated by the Speaker.

Mr. O'CONNOR. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. O'CONNOR. The rule refers to the gentleman who requested the rule. Personally, I have not been able to interpret that, and I do not know whether it means the gentleman who introduced the rule or the gentleman who requested a hearing before the Rules Committee.

The SPEAKER. The Chair has determined to recognize the gentleman from North Dakota [Mr. LEMKE] to make a motion to go into the Committee of the Whole, and has so construed the rule. The Chair will designate the gentleman from Texas [Mr. JONES] to control the time in opposition.

Mr. RICH. Mr. Speaker, may I correct the RECORD? Yesterday there was a roll call, no. 91, on the resolution offered by the gentleman from New York [Mr. TABER] to correct the RECORD. The roll call shows yeas 115, nays 239, which was in opposition to correct the RECORD. It seems to me if the House wanted to do the right thing the Members would have voted to correct the RECORD. This they should have done.

The regular order was demanded.

The SPEAKER. The Chair cannot recognize the gentleman for such a request.

Mr. RICH. Mr. Speaker, yesterday the gentleman from New York offered a resolution to correct the RECORD.

The SPEAKER. Does the gentleman say that the RECORD is incorrect insofar as the record of the vote is concerned?

Mr. RICH. The RECORD is incorrect.

The SPEAKER. In what respect?

Mr. RICH. In the statements that were made yesterday in connection with the resolution offered by the gentleman from New York [Mr. TABER] and admitted by the gentleman from Colorado [Mr. MARTIN].

The SPEAKER. The House has disposed of that matter by a formal record vote.

Mr. RICH. Nevertheless the RECORD is incorrect.

The SPEAKER. The gentleman is taking issue with the entire House which voted on the matter.

Mr. RICH. I am taking issue with the entire House. Right is right and wrong is wrong.

The SPEAKER. The gentleman does not present a question in connection with correcting the RECORD.

Mr. CELLER. Mr. Speaker, may I ask unanimous consent to extend my own remarks in the RECORD?

The SPEAKER. The Chair will not recognize the gentleman for that purpose without the consent of the gentleman from North Dakota [Mr. LEMKE].

Mr. RANKIN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. Under the express provisions of the rule there is nothing in order this morning except a motion by the gentleman from North Dakota to go into the Committee of the Whole for the consideration of the bill. The Chair is not responsible for the rule, but it is up to the Chair to construe it.

Mr. RANKIN. Mr. Speaker, I wanted to propound a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RANKIN. I want to propound a parliamentary inquiry whether or not when general debate is concluded the bill will be taken up under the 5-minute rule.

The SPEAKER. The rule expressly provides that shall be done.

Mr. LEMKE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 2066) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a board of agriculture to supervise the same.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 2066, with Mr. WOODRUM in the chair.

The Clerk read the title of the bill.

Mr. LEMKE. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. LEMKE. Mr. Chairman, I yield myself 30 minutes.

In the first place, I wish to thank all of the Members who signed petition no. 7 and permitted us to bring this bill up for consideration, and I want to thank all of those who were liberal enough yesterday to vote with us, both on the Democratic and the Republican side, for the reason that this is strictly a nonpartisan measure, if there ever was one.

I want to say at the very beginning that I want all those who opposed the resolution yesterday to give us the careful consideration we are entitled to. I want to say there never was a bill before this House that had the support of the public that this bill has, and I may also state that yesterday this Capitol radiated hope, joy, and aspirations to every State in this Union. The telephone and the radio talked and the telegraph sputtered the news that we were finally to be permitted to get a vote on a bill that has been before the Congress for 5 years and has not been permitted to come up for discussion on the floor of the House.

I appeal to each and every Member to follow this discussion, because I can truthfully say that there are not 100 Members on the floor that know what this bill is. They have accepted erroneous reports about it, they have accepted misleading statements about it, and I want to say that the bill should be judged upon its merits, the bill itself and not upon what somebody has said about it. I think this is fair.

I want to say in concluding my statement before I start in to discuss the details of the bill, this morning there was sent to every Member of the House a document coming out of the Farm Credit Administration which I consider unfair and unjust, because the Governor of the Farm Credit Administration has been before the Senate committee. I have the statement here. He was asked by Senator FRAZIER whether he wanted to discuss this bill and he said he did not, and he made the suggestion to us that it was for Congress to consider.

When we had the heavens before the Committee on Agriculture of the House, I phoned the Farm Credit Administration, but they did not appear. They did not appear in opposition to this bill, but at this late moment, this very morning, using the funds of the Government to lobby with, using the Government of the United States to send information here that we have not time to analyze and explain, this document goes to every Member, and I submit it is not fair practice, and I hope that the Black Lobbying Committee will include, before they get through, salaried lobbyists. They are the most dangerous to representative government. [Applause.]

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. No; I will not yield to anybody until I get through with my explanation, and then I shall be pleased to yield.

I am doing this so there may not be any misunderstanding because there are Members who want a correct explanation of this measure.

With these remarks by way of preface, let us take up this bill and let us find out what it is, and I wish to say to the Members of the House that before I get through I shall convince you this bill is not inflation unless every Federal Reserve bank note that has ever been issued is inflation.

I want you who hesitate on this point to follow carefully the statement that this bill is not inflationary, that we are not doing anything in this bill that the Federal Reserve bank has not been doing, not for 4 percent of the people as this misguided misinformation stated this morning, but for one hundred-thousandth of 1 percent, or for a few international bankers. There is not anything we are going to do that the Federal Reserve bank has not already been doing for a handful of individuals, but we are going to ask that the Federal land bank be permitted to get just a small part of the power that the Federal Reserve bank has. Is there anything wrong with this? Is not the Federal land bank as great an institution as the Federal Reserve bank? Will it not use its discretion and its good judgment as to how much of this $3,000,000,000 it needs the same as the Federal Reserve bank uses its discretion as to how many Federal Reserve notes they are going to ask for when the sky is the limit for the Federal Reserve bank and this bill limits us to $3,000,000,000. We are asking only a small part of that same power for the Federal land banks representing 32,000,000 of our population. Not only this, but in asking this power for the Federal land bank we are willing to pay 1½-percent interest, whereas the Federal Reserve bank pays nothing but the cost of printing, and I challenge anybody opposed, who questions this statement, to make it here on the floor and I will quote the law to him.

The Federal Reserve bank gets its Federal Reserve notes for absolutely nothing except the cost of printing or seven-tenths of 1 cent per bill, or 30 cents for $1,000, which is the average cost. The farmers are willing to pay $15 for a thousand, not only 1 year but for 47 years, if you please. In other words, under this act the Federal land bank will pay 50 times as much the first year for a thousand dollars of Federal Reserve notes as the Federal Reserve bank now pays. I am not denouncing that system, but I am calling the attention of those of you who have voted for the Federal Reserve Bank System that you are not fair or just to the Federal land bank when you deny the same privilege to the Federal land bank that the Federal Reserve bank has, when we are willing to pay 50 times as much the first year for the same service.

Now, I say that the Federal land bank has already been doing this same thing only in a roundabout way.

What is the roundabout way? When the Federal land banks cannot sell their bonds the Federal Farm Mortgage Corporation Bank buys their bonds and borrows the money from the Government. It has borrowed as much as $700,000,000. Where did the Federal Government get the money? I say to you there are only two ways to get it. One is to go into the Treasury and take it out and then the Government borrows more of its own money back from the Federal Reserve banks, who put up more bonds of the United States and get more money issued to them. Then they loan this

money back to the Government and the Government pays interest on its own credit.

Well, I am not condemning the System, but let us be honest and give a part of that same power to the Federal land banks. There can be no question about the fairness of that.

Remember that we are not doing anything that the Government has not already done, nothing that the Federal Reserve banks have not been authorized to do, and that this Congress and the Government has not already authorized the Federal Reserve banks to do.

All we want to do is to liberalize it so it can go direct to the people without the limitations and red tape so that we can save 2,000,000 homes in these United States.

I do not care what the Farm Credit Administration says in regard to this question, but when the head of that institution refuses to discuss the bill and then at the last moment becomes a lobbyist, we will take the liberty to show that in 1935 they took away 13,000 homes from farmers.

Oh, they say, that little percentage does not make any difference. I want to say that there is not a man or woman in this body who has probably not received hundreds of telegrams and letters from men and women, begging them to save their homes which the Federal land banks are not doing and could not do under the present law.

Why should we permit one who wrote the Farm Credit Act, now Governor, to try to influence a Member of Congress when he is not subject to cross-examination?

But I understand that has all gone by. This body is now going to write its own laws from now on and save 2,000,000 farm homes.

Now the Farm Credit Administration and the Department of Agriculture come and tell you there is more activity and more farms are being sold. We were selling those farms? The Farm Credit Administration and the other mortgagees that took the homes away from the men and women who wanted those homes. They are the ones selling them, not the farmers themselves. One million, five hundred thousand dollars of farm homes were foreclosed prior to this administration. Of the remaining $8,000,000,000, the Federal land bank has refinanced about one-quarter—two billion and something, let us say three billion—out of the $8,000,000,000. They took the cream, and nobody dare come up here and deny it. They took the cream. They mortgaged and took the mortgages on these three billions and left the rest that wanted to be refinanced to their mercy, so that you have $5,000,000,000 that the Federal land bank has not and cannot and will not take care of. What are you going to do with them?

They tell us that this bill will help only 4 percent of the people. I say to you Members that that is not a correct statement of the facts. Those five billion represent at least fifteen or twenty million men, women, and children. That is the way we count population. If what they say is true, if the percentage is too small, then let us wipe out the Federal land bank, because, if their statement is correct, that $3,000,000,000 represents only 4 percent. Then, since two billion represents the loans that they have made, they have no business to exist. But no one is ignorant enough to believe the slush that is printed in this pamphlet.

Now, I have it from high authority connected with the Federal land bank that the bigger part of this five billion will be liquidated by mortgage foreclosure unless this bill is passed. I am not going to mention any names, because I do not want anybody to lose his job. I have it from good authority that some of them are trying to resign because they see that the present situation cannot work out. And it cannot.

Now, what does the Frazier-Lemke bill do? It provides that the United States Government shall refinance existing farm indebtedness at 1½ percent interest and 1½ percent principal by selling bonds at 1½ percent, tax exempt, the same as the others. I do not like that, but that is what we have been doing. Then, if those bonds are not readily sold, the Government of the United States, through the Federal Reserve System, issues Federal Reserve notes, the same as we do now on Government bonds and other security; but this time it is secured by farms, the best security on the face of the earth—real estate, if you please. That is the situation.

Now we are doing this same thing. There is not any inflation about it, but we are going to offer an amendment that I hope will be accepted, but I will discuss that later.

Now, that is the machinery of the Frazier-Lemke refinance bill. There is absolutely nothing new about it. The Government of the United States sold several hundred million dollars of bonds recently at 1½ percent and they were oversubscribed. If they cannot sell them for 1½ percent, let us put agriculture on its feet and then they can sell all these bonds. It would be 3 years at least before we would issue the full amount of three billion under this act. This Congress would be in session at least three times before all that money is issued.

Now, let us take the bill.

Section 2 of is no importance, except that it outlines the policy just as I have told you.

Section 3:

> The Farm Credit Administration is hereby authorized and directed to liquidate, refinance, and take up farm mortgages and other farm indebtedness.

Now, in that section, beginning with line 19, we will strike out everything on that page, because that refers to bankruptcy. Let us take all that refers to bankruptcy out of this bill. We do not need it. We want to pay our debts. The farmer does not want any moratorium. A moratorium just means that he is going to stand still for 3 years. So our steering committee has agreed that we cut the following language out:

> In case such farm mortgages and other farm indebtedness to be liquidated and refinanced exceed the fair value of any farm and 75 percent of the value of insurable buildings and improvements thereon, then such farm mortgages and indebtedness shall be scaled down in accordance with the provisions of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto. Such loans shall be made at a rate of 1½ percent interest and 1½ percent principal per annum, payable in any lawful money of the United States.

We have agreed to cut that out. It has nothing to do with the bill, and we are willing to let the farmers go through bankruptcy on their own account if they want to.

Now, we come to the next provision under section 4, with reference to livestock. The steering committee has agreed to cut out all of section 4, which relates to livestock, because we feel that the cooperative farm-credit banks can and ought to take care of the livestock situation. So we will cut out livestock. There will not be any livestock provision in this bill if the amendment approved by our steering committee is accepted. So we will have nothing but real estate back of these mortgages.

Section 5 makes an appropriation of $100,000 for administration. Another inaccurate statement made in this lobbying pamphlet is that it will cost 1 percent to administer the farm indebedness. That is not true. The bill provides that all of the expense shall be charged against the farmers, and that that be done from time to time, so that the Government gets net 1½ percent interest and loses nothing out of it.

Recently they pulled a red herring across the road when they said that the Government pays 1 percent interest to the Farm Credit Administration on farm mortgages. The farmer does not want the Government to pay 1 percent to the coupon clippers. The farmers want to pay their own interest. Therefore, we are willing to charge all expense, under the provisions of this bill, to the farmer.

Section 5 tells you how it is to be charged against them. I will read:

> The necessary and actual expenses incurred in carrying out the provisions of this act shall be apportioned and prorated and added to each individual mortgage and such sums so added shall be paid to the Farm Credit Administration for administrative purposes.

That is a clear statement of what the bill says. Read the bill. Study it carefully, and the reports and hearings thereon, and you will have no trouble in knowing what these hearings are. We have plenty of them. There is a book containing the hearings both in the Senate and in the House on that bill, and every intelligent person ought to be willing to read those before jumping at conclusions.

Then we come to section 6. We cut out all that part of section 6 that refers to livestock, and we suggest several immaterial amendments.

Then section 7 is the section we find so much dispute about. That is the section that the international bankers do not like but that 95 percent of the American people want.

SEC. 7. In case all of said farm-loan bonds are not readily purchased, then the Land Bank Commissioner shall present the remainder to the Federal Reserve Board, and the Board shall forthwith cause to be issued and delivered to the Land Bank Commissioner Federal Reserve notes to an amount equal to the par value of such bonds as are presented to it.

Now, my friends, those of you who are opposed to this because it is inflation, let me say to you that is exactly what the Federal Reserve bank is doing right along. Why should we deny this same right to the Federal land bank with limitation? That is all we are asking. The Federal Reserve bank can go as high as it wants to, get as many notes as it has bonds, but we are limiting the Federal land bank to $3,000,000,000; and, in addition to limiting the Federal land bank to $3,000,000,000, we are making them pay 1½ percent interest, or 50 times as much for every $1,000 as the Federal Reserve bank pays for the same privilege. I submit to you this is more than fair. We do not ask the same privileges that the Federal Reserve bank enjoys.

Then what follows? I want you to follow me carefully now. I may say that the steering committee was unanimous that the farm mortgages were better security than gold. They were unanimous in saying that it is not necessary to add any amendment to this part of the bill, but in order to satisfy a public psychology that is still wedded to yellow metal, the metal that we buried, and I hope forever, in Kentucky; and I hope you Kentuckians get it all, and I hope you will keep it there, we can get along without it; but in order to satisfy that psychology we give the President authority, if he wishes to put the same amount of gold—not gold, but pretended gold, make-believe gold, back of this bill as you have back of the Federal Reserve notes. That is fair enough, is it not? So we proposed this amendment, or they, the steering committee, accepted it, not that we need it—I prefer it were not there. I do not think we should fool people all the time, but some people must be fooled or they will die; they think gold is money. So we said, "Let us go ahead with it and give them the same security they think they have now behind the other money", and we put in the following proviso:

Provided, however, That the President, in his discretion, by Executive order, may set aside a gold fund in the Treasury, as a reserve for such notes, out of free gold in the Treasury or out of the exchange stabilization fund created by section 10 of the Gold Reserve Act of 1934, and maintain such a reserve fund in an amount equivalent in dollars to not less than 20 percent of such notes outstanding.

We give the President this authority if he wants to use it in order to satisfy a false psychology, if you please, that many people have. It is wrong for me to assume that we can take a goldbug who has been trained and raised all his life up to the age of 60 to believe that gold was the only kind of money; it is more than one can expect to change his belief in 1 year; it would be unfair to him. So we give him the same thing he is getting at the present time.

We come now to the machinery that is set up for this act. I may say that as to the machinery we create a farm agricultural board. This board is created in order to relieve you and me from answering all those letters we get. It is a board that represents the farmers. According to amendments we have agreed on, the board has no power except to advise the Farm Credit Administration, perhaps, not to send that kind of slush that they sent to us this morning when we are to vote on a bill when it ought to be here a sufficient time beforehand that we could study and analyze it. The farm agricultural board has only advisory power and it represents the farmer. If it is to represent the farmer, why should not the farmers select their own representatives rather than to have the places filled by ward politicians? When this board is set up and I get 100,000 letters complaining, I will just hand them over to the board and say, "This is your job." It is an executive committee of three here in Washington, and stands between the farmers and their representatives and the bureaucrats up here as the representatives of the other end of Government. There is nothing wrong about that. We have amended it to make its powers advisory only. Surely no one can object to that.

I have given you a rough outline. I want to call your attention to a few things. The statement has been made that the Federation of Labor is against this bill. I challenge the accuracy of this statement, because I was present and know that the late Mr. Truax got the statement from Mr. Green that neither he nor his organization were fighting the Frazier-Lemke refinance bill; that they had no objection to it. That was in May 1934, and it has not been repudiated in writing. Mr. Green did give out a statement that he was against inflation, but he knew enough to know, as I assume—I did not talk to him—that this bill is not inflation.

Mr. KVALE. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. Just a minute, if the gentleman does not mind.

Mr. KVALE. If my memory serves me correctly, the late Mr. Truax made the statement himself from the well of the House.

Mr. CONNERY. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. Very briefly.

Mr. CONNERY. I looked up this matter last night and find that the only record made by the American Federation of Labor was in 1934 during their annual convention, when the executive committee issued a resolution against uncontrolled inflation. Mr. Green in his statement recently came out against uncontrolled inflation, but you will find no record from the American Federation of Labor placing it on record against the Frazier-Lemke bill. [Applause.]

Mr. DUNN of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. Yes.

Mr. DUNN of Pennsylvania. Why should the American Federation of Labor be opposed to legislation that is humane and progressive?

Mr. LEMKE. May I make the statement that this is the same kind of misinformation that has been given to the Members of Congress in regard to this bill so far as inflation is concerned all the way through. This is not inflation at all. It is not any kind of inflation, let alone uncontrolled inflation. No one is for uncontrolled inflation. We are simply asking for expansion of the currency under the same rules and regulations that you have expanded it by the issuance of $4,000,000,000 of Federal Reserve notes.

Mr. DEEN. Will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Georgia.

Mr. DEEN. The gentleman knows I am one of the Members who signed his petition, and the gentleman also knows it was on condition that we would consider the bill and perhaps amend it if we could. Will the gentleman tell the House whether or not he is in favor of this proposition? In the event a bond cannot be sold is he in favor of having the money issued by the Treasury on chattel mortgages taken on livestock, cattle, hogs, goats, sheep, and use that as a basis for the money? Will the gentleman tell us whether or not he expects the House to vote for the bill in that condition?

Mr. LEMKE. I appreciate the good work the gentleman has been doing, and may I say to him that we are getting that kind of money right now, through these cooperative banks, and this was brought out in the Senate hearings on this bill. They are lending money on cattle. However, we are going to take that paragraph out entirely so that there will be no question about that. We will wipe it out.

Mr. DEEN. In other words, the gentleman is going to eliminate the provision which will require the issuance of money on livestock of any kind or description?

Mr. LEMKE. That is correct.

Mr. BARRY. Will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from New York.

Mr. BARRY. Under section 17 of this measure, it states that the benefits of the bill shall be extended to any tenant or member of his or her family who desires to purchase part or all of the farm lost or another like farm provided he or she has lived on and operated a farm as a tenant for at least 2 years prior to the enactment of this act. In other words, this bill permits any tenant who has operated a farm for 2 years prior to the enactment of this measure to obtain money. Will the gentleman tell me just how many tenant farmers in the United States would be eligible to obtain money under this act?

Mr. LEMKE. I may say the question is impossible of answer, because there are a lot of tenants who do not want to own a farm. As far as I am concerned, we are willing to do the same as the Federal land bank has done; that is, go as far as the bill possibly can, so far as taking care of the people is concerned. I may say we are putting a limitation in there taking out the unencumbered part, and our steering committee will accept that as an amendment. I may say to the gentleman from New York, that there never has been a bill offered that covered all of the cases or put all the people on an equal basis. When we passed the Home Loan Act in this Congress, we permitted the people living in cities and town to mortgage their homes.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield myself 15 additional minutes.

Mr. BARRY. Is it not a fact that under this section, regardless of what the gentleman may say, there are enough people eligible to obtain money to absorb the entire $3,000,000,000 that the act provides for?

Mr. LEMKE. No; because I am satisfied, if we have a proper rate and if we have the same power as the Federal Reserve banks, that they will be glad to buy these farms. In fact, there is enough money in the banks now if they would just use it to take care of the whole bond issue.

Mr. DOXEY. Will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Mississippi.

Mr. DOXEY. The gentleman has made references in his speech to the steering committee. Do I understand that is the regular steering committee of the House?

Mr. LEMKE. No; it is not.

Mr. DOXEY. Let us get the record straight.

Mr. LEMKE. The steering committee to which I refer is composed of men and women who are in favor of the Frazier-Lemke bill. It is an unofficial steering committee, but it will be official later on.

Mr. DEEN. Can the gentleman tell us whether or not he expects the membership of the House to vote for the provision of this bill which sets up a farm board to be elected by the people of the respective counties and parishes of the different States? In other words, the gentleman does not expect me to vote for a proposal which would turn this whole thing into the greatest political organization in the history of the Nation? I could not vote for a matter of that kind; neither could I vote for that livestock proposition.

Mr. LEMKE. I am not suggesting that this be a political machine. It is the same kind of machine as the Federal land bank has, which sends out scores of collectors and spends the farmers' money. There are so many collectors that the farmer does not know which way to turn. We are amending the bill to make that only advisory. Surely the gentleman would have no objection to his farmers getting together and selecting someone who will advise them as to the best method of liquidating the mortgages on their farms and someone to cooperate with the Farm Board?

Mr. DEEN. The gentleman knows that the land bank and the Farm Credit Administration, as well as the Federal Reserve banks, do not hold elections to elect people to operate this whole business.

Mr. LEMKE. Unfortunately they were supposed to under the original Farm Land Bank Act, and that is what the gentleman from Nebraska [Mr. BINDERUP] will tell you about before he gets through. But that has been taken away.

Mr. FULMER. Will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from South Carolina.

Mr. FULMER. Is it not a fact that under the original bill that was the whole purpose of the bill? But today they are sending men into the various land-bank districts who have never been in those districts, and they are running the affairs of the Federal land banks.

Mr. LEMKE. That is correct.

Mr. DONDERO. Will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Michigan.

Mr. DONDERO. Under section 17 of the bill I notice that it extends to any farmer or member of his family who lost his or her farm by foreclosure since 1921 certain benefits. Now, suppose the gentleman had foreclosed a mortgage for a client of his in 1922 and the redemption period has become absolute. The farm has been sold to a third person. How would this bill apply to a situation of that kind?

Mr. LEMKE. I am afraid the gentleman has misread the bill. The farmer may buy a similar farm. It says, "similar farm", expressly. The gentleman is misconstruing the intent of the bill. That is not the intent and we are going to amend that and bring it up to about 1925 or 1928.

Mr. BOILEAU. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. BOILEAU. The clear purpose of that provision is to permit a farmer or a person who has lost his farm to buy it back, provided the person who now holds it wants to sell it.

Mr. LEMKE. Yes.

Mr. O'MALLEY. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Wisconsin.

Mr. O'MALLEY. Does not this bill purely and simply give the farmer an opportunity to reorganize his capital structure to meet present-day conditions? This Congress voted for section 77B, which permits business to go into court and reorganize its capital structure downward, and does not this measure give the farmer the same opportunity?

Mr. LEMKE. It gives the farmer the privilege of reorganizing at such a rate of interest that he can make good. It takes into consideration ability to pay, rather than the rate of interest involved.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. CELLER. Is it or is it not true, according to the paper we received from the Farm Credit Administration, that only 66 percent of the farms of the country are not mortgaged?

Mr. LEMKE. I would say that is not true.

Mr. CELLER. How many farms are mortgaged, by percentage?

Mr. LEMKE. I would say that depends on what you consider to be a farm. If you take the acreage, I would say about 80 percent is mortgaged; but if you include the little, small farms and consider it from the standpoint of individual farms, including the little chicken and truck farms, and so forth, of those who live near the large cities, as is being done in that statement, then a lesser number are mortgaged; but I want to take it by acreage, and I would say that 80 percent or more of the acreage of the Nation is mortgaged.

Mr. CELLER. How many farms are there left that are not mortgaged?

Mr. LEMKE. I do not know, and neither does the Farm Credit Administration.

Mr. COLDEN. Mr. Chairman, will the gentleman yield for two questions?

Mr. LEMKE. Yes.

Mr. COLDEN. The gentleman's bill provides, as I understand it, for about one-third of the farm indebtedness of this

country. What is the gentleman going to do about the other two-thirds?

Mr. LEMKE. I may say that this refinancing under the bill will be under the control of the Farm Credit Administration, and at present it has been unable to take care of them all; and we will take $3,000,000,000 more out of the $5,000,000,000 it has not seen fit to take care of, and then we will use the money that comes in as a revolving fund and continue this plan until we get all the farmers of this Nation out of debt; and suspend all this resettlement business where it costs $18,000 to settle a farmer in Alaska, when if the same amount of money had been given to the farmers here in this country they would be the richest people in the Nation.

Mr. COLDEN. And you are going to charge one class 4 and 5 and 6 percent and another class 1½ percent.

Mr. LEMKE. You have always done that, and some are now paying 6 and 7 and 8 percent and some are paying less.

Mr. COLDEN. As I read the bill, there is no limitation on the amount you are lending to each farmer.

Mr. LEMKE. The limitation is already fixed by the Farm Credit Administration.

Mr. COLDEN. What is the limit?

Mr. LEMKE. I think $25,000.

Mr. CARPENTER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. CARPENTER. According to my experience, the greatest difficulty the farmer is up against today is the high rate of interest he has to pay. Does the gentleman agree with that?

Mr. LEMKE. Yes.

Mr. CARPENTER. And one of the greatest benefits the farmer will get out of this bill will be lower rates of interest.

Mr. LEMKE. Lower rates of interest, and not only that but the preservation of 2,000,000 farm homes in this Nation.

Mr. CARPENTER. And is it not the gentleman's judgment that one of the main reasons for the opposition to this legislation is the opposition of the banks and mortgage companies to the lower rates of interest as proposed in the legislation?

Mr. LEMKE. I do not know where the opposition comes from. It seems to be an underground channel, and I have not been able to discover it.

Mr. FULMER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. FULMER. I would like to state to the gentleman, in line with the statement made by the gentleman to my right that you are discriminating as to $6,000,000,000 worth of farm mortgages; is not that the case today with the Federal land banks?

Mr. LEMKE. Certainly.

Mr. FULMER. They have refinanced about $3,000,000,000 worth and under this bill we would continue to take that same type of loan just as fast as any other and the farmers are now paying 5, 6, 7, and 8 percent.

Mr. LEMKE. Yes.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Michigan.

Mr. CRAWFORD. With reference to mortgaged farms, under date of May 9, the Farm Credit Administration addressed me and sent me five tables. Table no. 5 states:

Number of farms in the United States, January 1, 1935, census of 1935, 6,812,049.

Estimated number of mortgaged farms, 2,300,000.

Number of tenant farms, including croppers, in the United States, January 1, 1935, census of 1935, 2,865,155.

Mr. LEMKE. I thank the gentleman for the information.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. ASHBROOK. I want to say to the gentleman that I am sympathetic, as you know, and expect to vote for this bill, but I would like to ask the gentleman a question for information.

I had a wire this morning from a constituent of mine who lives in my home county. He bought a valuable farm at peak price. He has a loan on it with the Federal land bank. Due to the depression and the slump in the value of real estate and farm commodities he has been unable to meet the payments and the farm is advertised to be sold on the 23d of this month. I would like to ask the gentleman in what way will this bill benefit and help that farmer?

Mr. LEMKE. I do not know what the law is in your State but if he has a year redemption then he would have an opportunity to refinance up to the present value of that farm. If he cannot make an arrangement there is no relief because we cannot compel the creditor to accept less than the amount due unless he has the good judgment and decency to take another loan on the farm and put the man on a self-sustaining basis.

Mr. ASHBROOK. Do I understand if the farm is sold on the 23d of this month and this bill became a law, which I hope it will, that within a year he will have an opportunity to refinance the farm at present values?

Mr. LEMKE. Absolutely.

Mr. GILLETTE. Will the gentleman yield?

Mr. LEMKE. I yield.

Mr. GILLETTE. Section 3 authorizes the liquidation of farm mortgages and 75 percent of the value of the insurable buildings. What is the limit?

Mr. LEMKE. The limit is the lien indebtedness. The lien, perhaps, on his home. It puts the limit on his indebtedness as the present value of the farm.

Mr. GILLETTE. The limit is the loan indebtedness?

Mr. LEMKE. Yes.

Mr. McFARLANE. Will the gentleman yield?

Mr. LEMKE. I yield.

Mr. McFARLANE. The question of interest is the main question here involved in this bill as I see it. Since the Federal Government loans to the Federal land banks at the actual cost of printing—about 30 cents a thousand dollars—why should anybody object to a farmer paying 50 times as much—1½ percent interest?

Mr. LEMKE. That is what the farmers cannot understand.

Mr. MARTIN of Colorado. Will the gentleman yield?

Mr. LEMKE. I yield.

Mr. MARTIN of Colorado. I want to ask this question as bearing on the alleged inflation. The gentleman said that the Reconstruction Finance Corporation had issued four billions in notes. I want to ask the gentleman where is the money; has it not all been reabsorbed by the banks?

Mr. LEMKE. The money is in the banks, but they cannot loan it out because there is no credit left.

Mr. MARTIN of Colorado. This money will go into the banks, too, will it not?

Mr. LEMKE. It will ultimately find itself in the banks, and it will wipe out some of the three hundred billion too much public and private debts, and you will not have to be looking for new cows to milk in order to satisfy the tax-eaters of this Nation. [Laughter and applause.]

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. CELLER. I would like to ask the gentleman this question: We come from the city. We would like to know whether or not the gentleman would be willing to include in this bill city dwellings; and if so, what would be the total cost to the Government?

Mr. LEMKE. I may state you cannot include everything in one bill. If I had the power to draw a bill that would make everything perfect for all the future, I would decline to do it, because I want our children to have something to do. [Applause.]

Mr. CELLER. Does not the gentleman think we should have some relief in the cities?

Mr. LEMKE. You have had the H. O. L. C. A similar bill to this was introduced in the Seventy-third Congress by Congressman Swank, of Oklahoma, and it has not been followed up by any of these people who wish to help the city

home owners. I have been fighting just as hard and will continue to fight for the city people. I want the homes preserved wherever they are. You do not expect the Federal land banks to make loans in the city any more than we expect the H. O. L. C. to make loans on farms. You have to keep these two institutions separate.

Mr. CELLER. But we pay 5 percent on loans in the city.

Mr. LEMKE. Why do you not introduce a bill to lower it? I am with you. [Applause.]

Mr. KENNEY. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. KENNEY. The gentleman has made a statement which has gone unchallenged, which is a source of some concern to me. It has to do with section 7 of the bill. It is there provided that the bonds that are not readily purchased may be taken to the Federal Reserve Board and Federal Reserve notes may be issued against them.

The CHAIRMAN. The gentleman has consumed 45 minutes.

Mr. LEMKE. I yield myself 5 additional minutes, please.

Mr. KENNEY. In that connection the gentleman has stated that is no more or less than a privilege accorded to the Federal Reserve Board at the present time.

Mr. LEMKE. That is correct.

Mr. KENNEY. Will the gentleman tell us whether or not there is not a distinction there in this case: That we are forcing the Federal Reserve Board to issue notes against securities that have not been purchased, and for which presumably there is no ready market, whereas today, under the principle in vogue, currency is issued only against bonds which have already been purchased and which presumably are marketable.

Mr. LEMKE. I will state that the bonds against which Federal Reserve bank notes have been issued, we have been informed, were backed by Insull bonds, and some of those may be back of some of the notes that we have in use now.

Now, I must limit myself because there are others who want to speak on this bill.

Mr. AYERS. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. AYERS. The gentleman allowed one question to go unanswered that must be answered before this House. The question was asked where the opposition to this bill came from. The opposition comes from the same people who opposed the original Patman bill, and secured a bond issue in order to pay the bonus bill, so that the banks would secure the privilege. It comes from the Liberty League. It comes from people outside of this House, organizations in this country who have fought every relief measure that this administration has put over. That is where it is coming from. It is coming from people who are not for the people of this Nation.

Mrs. GREENWAY. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mrs. GREENWAY. Am I correct in understanding that the city home cannot be used as a parallel issue for the reason that the home in the city is an expression of money earned, while the farm is an expression of the basis of earnings?

Mr. LEMKE. That is correct. They should be treated separately in separate bills. The problems are different and must be kept entirely separate for administrative purposes. The loan on a farm home is an entirely different problem than a loan on a city home. There should be a bill drawn to cover urban homes.

Mr. MARTIN of Colorado. And is it not a fact that a home owners' amendment would not be germane to this bill?

Mr. LEMKE. It would not be.

Mr. MICHENER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. MICHENER. There is some difference of opinion. For instance, I do not agree exactly with the gentleman from Montana [Mr. AYERS] on this question of inflation. The gentleman whom I am interrogating and I possibly do not agree on the question of inflation, but I have been told recently that the gentleman has a bill prepared, and that it is his purpose, if this bill passes, carrying $3,000,000,000—call it inflation or whatever you want to; to introduce that bill covering city property, and that Members from the city here are being asked to vote for this bill with the understanding that the city property will be taken care of in the follow-up bill. Is that true?

Mr. LEMKE. That is not correct. I have offered to draw a bill for some of these people who have opposed this bill and who have taken their names from the petition, if they would introduce it. If they do not know how to draw it, I will draw it for them. [Laughter and applause.]

Mr. MICHENER. There are some who do not fear $3,000,000,000 as inflationary, but there are some of us who fear unlimited inflation which another bill might mean.

Mr. LEMKE. One further word in regard to labor's position, because a number of statements have been made on this subject that are very misleading. I have a letter from Hon. I. M. Ornburn, former member of the United States Traffic Commission, and now secretary-treasurer of the Union Label Trades Department of the American Federation of Labor. He has endorsed this bill. The Union Label Trades Department comprises 43 out of 110 national and international unions, including over 1,000,000 members of organized labor. On January 15 of this year Mr. Ornburn sent me the following letter:

> I heartily endorse the Frazier-Lemke bill, the purpose of which is to refinance the farm mortgages at a lower rate of interest. I do not know of any security for Government loans better than first mortgages on the productive land owned by American farmers. Surely if the farms that produce our raw material are not good security—nothing else is.
>
> The opponents of the Frazier-Lemke bill point out that if it is passed, more money will be put into circulation. I do not know of any better method of restoring prosperity than by increasing purchasing power, especially when such money is based upon sound security.
>
> Cordially yours,
>
> I. M. ORNBURN.

[Applause.]

[Here the gavel fell.]

AMENDMENTS TO H. R. 2066 PROPOSED AND ACCEPTED BY THE STEERING COMMITTEE

Section 2

Page 2, line 4, beginning with the word "and", strike out all down to and including the word "annum" in line 6.

Section 3

Page 2, line 13, strike out "farms" and insert in lieu thereof "farm lands."

Page 2, line 14, strike out "farms" and insert in lieu thereof "farm lands."

Page 2, line 19, beginning with the word "In", strike out all down to and including the period in line 3, page 3.

Section 4

Page 3, strike out lines 6 to 17, both inclusive.

Renumber sections 5 to 19 as sections 4 to 18.

Section 6

Page 4, line 7, strike out the first comma and all that follows down to the period in line 9.

Page 8, lines 10 and 11, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

Page 8, line 17, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

Section 17

Page 9, line 1, strike out "1921" and insert "1925."

Page 9, line 4, strike out "an encumbered farm" and insert in lieu thereof "a farm not exceeding $10,000 in value."

Page 9, line 5, strike out the word "two" and insert in lieu thereof the words "three consecutive."

Section 18

Page 9, line 7, beginning with the word "executive", strike out all down to and including the word "Agriculture" in line 8, and insert in lieu thereof "Farm Credit Administration."

Mr. JONES. Mr. Chairman, I yield 15 minutes to the gentleman from North Carolina [Mr. COOLEY].

Mr. COOLEY. Mr. Chairman, while this controversy does not involve the issue of life and death, at the same time it is of vital importance. It is important to me because it is important to the people whom I have the honor of representing. Regardless of the outcome of this debate, I believe that all of us, Republicans and Democrats alike, can well afford to center our hopes in the rising glories of this great Nation of ours. Surely we are making progress and our leadership has declared, "We shall not retreat." I do not believe this Congress will subvert or destroy, but, on the other hand, that it will at all times seek to reconstruct and to save the great American system, that system which has been builded upon the everlasting and immutable principles of justice and "equal rights to all men with special privileges to none."

I come from one of the great agricultural districts of this country, and I am bold and frank to state that as a Congressman my first love is the farmer of my district, my State, and my Nation. I regard agriculture as the mother of all arts and the nursemaid of all industry. It animates every species of industry; it creates and maintains manufacturers; it gives employment to navigation; it furnishes the material for commerce; it is the art of arts and the most honorable employment of man; it is the bedrock of well-regulated society and is the surest basis of internal peace.

Coming as I do from one of the great agricultural sections, I am anxious at all times to devote my time, my attention, and my talent to the solution of the great problems facing the farmers of this country today. It was because of my interest in agriculture that I wanted to be elected by you as a member of the House Committee on Agriculture, so that I might have an opportunity to consider all legislation which was proposed which might affect the welfare and the happiness of those people who earn their living on the farms. But, my friends, I hope that I will not permit my zeal to become intemperate to the extent that I will depart from the leadership of the great party now in power to follow some fantastic monetary scheme which is advocated, not by this administration, not by the Farm Credit Administration, or the Treasury, but by a Republican leadership which seems for the moment to have taken over the control of this Democratic House of Representatives. [Applause.]

I take the position that this bill is not fair, that it is not just. Why, this bill discriminates within the very class it seeks to benefit. If this $3,000,000,000 of additional currency is not an expansion of the currency, if it is not inflation, why limit the amount to $3,000,000,000 when the farm mortgages of the Nation amount to approximately $9,000,000,000?

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. No; I must decline to yield.

Mr. RANKIN. The gentleman asked for an answer to his question.

Mr. COOLEY. I do not yield. The gentleman can answer it in his own time.

Mr. RANKIN. I shall be very glad to do so. It can very easily be answered.

Mr. COOLEY. It stands to reason that the Government, under this measure, will be called upon to take over the bad mortgages. We know that by no act we may pass here today or at any time in this Congress, in the light of the decisions of the Supreme Court, can we impair the obligations of an existing contract. We know that a majority of the land mortgages of this Nation are held by the insurance companies and the banks. We know further that the effect of this bill will be to "bail out" the insurance companies and the banks to the extent of the bad loans they now have on hand, because they will not be willing to surrender the good loans which pay a higher rate of interest. Yet how can it be suggested that this bill, which will benefit the banks and the insurance companies to the extent of relieving them of their bad mortgages to the extent of the full value of the property which is encumbered by the mortgage, is opposed by the banks and that the bankers have any interest in defeating it.

Notwithstanding the propaganda, notwithstanding the radio speeches, notwithstanding the activities of the National Union for Social Justice and the Catholic father in the Shrine of the Little Flower, and notwithstanding the speeches that have been made here and elsewhere, I have not received a single letter from a single farmer in the Fourth District of North Carolina asking me to put my stamp of approval upon this bill.

Mr. DUNN of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. COOLEY. No; I have only a little time.

I do not own any stock in any insurance company or bank; I have no interest in any bank or insurance company, and my only interest is to try to do the right thing.

The author of this bill complains about propaganda. Does he stop to think about the propaganda that has emanated from the sponsors of this bill, who now complain about the information given by the Farm Credit Administration, which they call slush? What part of it is slush? What part of it is false? What part of it is misleading? They can answer this when their time comes. You cannot point out wherein it is false or wherein it is misleading. O Mr. Chairman, there has been a desperate effort made to bullwhip and browbeat some Members of this Congress into voting for this bill. Why, they told me that the general assembly of the great State of North Carolina had memorialized me to vote for this bill. Yes; and the general assembly of my State of North Carolina has done other foolish things, my friends. One day during the last session its members memorialized me to vote for the repeal of the processing tax, the one thing that brought more happiness to the farm homes in North Carolina than any other act that has ever been passed by the Federal Congress. [Applause.] But when they realized what they had done and the effect of that act on their part, about 2 or 3 days later they sent us another memorial requesting that we not consider the memorial sent earlier urging us to vote against the processing tax.

The proponents of this bill have brought pressure to bear from every nook and corner. Shall the legislature of my State dictate to me what I should do as a Representative of the people of the Fourth District? No, Mr. Chairman; I have no control over any votes in this House except one, but, thank God, I have control over that vote, and I will not be bullwhipped, browbeaten, or intimidated by even the general assembly of my own State, and much less by the Catholic priest of Michigan.

We may as well be fair in the consideration of this matter. Are we going to discriminate to the extent of helping only one-third of a class? If this is not expansion of the currency, or inflation, why not put it up to the limit and make it $9,000,000,000? What about the city man who comes to me as a Member of Congress and says, "You gave the farmers an interest rate of 1½ percent. What about the poor city

dweller?" The humble citizen who is living in a hut in a city, trying to earn a livelihood for his little brood, striving to pay off the mortgage on his house in order to give shelter to his children, are we going to deny him the same fair treatment you are asking for the farmer?

Mr. Chairman, I could not be so unfair. I could not be so unjust. Then, if we are going to embrace city mortgages, it will not be just $9,000,000,000, but somewhere near $29,000,000,000, and even the most ardent inflationist in this House would throw up his hands in holy horror at any such suggestion as $29,000,000,000 in new currency. Yet we Democrats are asked today, after hearing the Governor of the Farm Credit Administration ridiculed and denounced on the floor of the House by a Republican, to turn our backs, not only upon the leadership of the House, not only upon the Democratic Party, but upon that great President who now occupies the White House. I know not what course the other Members may choose, but, Mr. Chairman, I prefer to stand by MARVIN JONES, of Texas, and Franklin D. Roosevelt, who I know are friends of the farmers, than to stand by LEMKE and FRAZIER, the Republicans from Dakota. [Applause.]

What will happen to the financial structure of this Nation? When Uncle Sam holds a mortgage on every poor man's farm and on every poor man's home in America, either by virtue of this legislation or otherwise, what will be the situation then? Uncle Sam will be called a Shylock, the cruel holder of the lien, and will not be permitted at any time to foreclose or collect. There will be cries for moratorium after moratorium, and ultimately there will be a demand for cancelation, which can end only in chaos. This program will lead us down the primrose path of inflation and bring chaos to this Nation. Do not forget that it is being sponsored by a gentleman who delights in opposing the present occupant of the White House and who would rejoice in his defeat. Shall we repudiate our President and follow a new leadership? The gentleman sponsoring this bill seems to be very much excited about helping the farmers of this Nation, but back of it all is money—money.

Mr. Chairman, this bill is not a solution of our farm problem. It leads us not to equality for agriculture. The Federal land banks and the land bank commissioner have refinanced practically all of the debt-burdened farmers of my district. We could give the farmers an interest rate of 1½ percent, but still the great problem would confront us tomorrow just as much as it did yesterday. We should enact legislation which will bring to the farmers of this Nation a fair and just price for the commodities they produce by their sweat and toil, a price that will return them a fair profit for their labors. Then you would not hear the farmers complaining about an interest rate of 1½ percent or 3 or 4 or 5 percent. We must find a market for the tremendous surpluses produced by this great Nation and when we find that market, either at home or abroad, or when we can give the farmers of the Nation even the price they received under the A. A. A., they will pay the 3½-percent interest rate, they will retire their loans, they will pay their taxes, and they will not be calling upon Congress to pass relief bills for them. Therein is the solution, and instead of our talking so much about this measure, if we would devote our time and attention to a solution of the surplus problem of this country we would be making headway. [Applause.]

I believe that the present administration is fostering the highest form of democracy, that it is sincerely seeking to find a new freedom for the men and women who work in the fields and factories of the Nation, and is sincerely striving to solve the titanic problems confronting a complex civilization. This administration has brought a degree of relief to the farmers of the Nation and will continue in its efforts in the direction of equality for agriculture. Again I repeat, shall we repudiate that leadership and place our stamp of approval upon a half-baked proposition which is sponsored by Republicans?

The low rate of interest which this bill proposes to give to approximately one-third of the debt-burdened farmers, would be unfair to the remaining two-thirds who must continue to pay interest rates varying from 3½ to 8 percent. The same injustice will be visited upon future generations of farmers, who, of course, will not be benefited by the pending bill. The contemplated low rate of interest would, in effect, put a premium upon mortgaged property and penalize the thrifty while benefiting the unfortunate. The difference in the rate of interest which will be paid by those whose property is mortgaged and who are fortunate enough to refinance under the pending measure, and the rate of interest which will be paid by the ordinary citizen who has been thrifty and whose farm is not mortgaged, and by those whose farms are mortgaged and who are unable to refinance under the bill, would be more than sufficient to pay the taxes upon the property. The effect of the measure, therefore, would be to make the farms refinanced under the bill tax free while other farmers are tax burdened. Is this just? Is this fair? The premium placed upon the mortgaged property would naturally increase its resale value to such an extent that the benefits of this bill would be more than offset by the increased price which subsequent purchasers would have to pay. The only benefit, therefore, would go to the owner of the property which is now mortgaged and which is refinanced under the bill. The two-thirds of the farmers whose farms are now free and clear of debt, as well as farmers who could not refinance under the bill, would obviously be hurt rather than helped by this proposed legislation. No individual or private agency could compete with the Government in this field. The result would be, to illustrate what I mean, if a prospective purchaser desired to purchase a farm, say of the value of $10,000, which is encumbered with the Frazier-Lemke mortgage, for its full value, at the rate of interest of 1½ percent, the principal to be repaid over a period of 47 years, and another man owns a $10,000 farm which is unencumbered, which he is willing to sell upon reasonable terms, the deferred payments to bear a reasonable rate of interest, but who is unable to finance the deferred payments at 1½-percent interest and over a period of 47 years, certainly, it is only natural to suppose that the prospective purchaser would prefer to purchase the mortgaged farm with the low rate of interest and easy terms. Certainly, it would be difficult, under these circumstances, for a thrifty man, whose farm was not mortgaged, to dispose of it profitably in the event he desired to sell.

Since only approximately 66 percent of the farms in the United States are mortgaged, and since the amount contemplated by this bill is only approximately 33⅓ percent of the amount of the outstanding farm mortgages, the $3,000,000,000 provided under H. R. 2066 would take care of approximately 30 percent of the farmers whose farms are mortgaged at the present time and would, therefore, provide benefits for less than 15 percent of all of the farmers of the country at the expense of the 85 percent remaining, of the farmers and other taxpayers.

FEDERAL LAND BANK SYSTEM WOULD BE RUINED

If a substantial percentage of land-bank borrowers refinanced their loans under the provisions of H. R. 2066, the Federal land banks would receive cash for the mortgages so refinanced, which cash they would have to hold, since they would be unable to call outstanding issues of farm-loan bonds, most of which bear interest at from 3 to 4½ percent and are not callable for from 8 to 10 years. Since there are no sound securities in which the banks could invest the cash thus obtained on a basis which would yield an amount sufficient to pay the interest on their bonds, they would inevitably be forced to default, which would mean receivership and eventual liquidation of the system. This would mean the loss of the $113,000,000 capital stock investment of some 600,000 farmer borrowers through the system, as well as some $217,000,000 which the Government has invested.

ACCOMPLISHMENTS UNDER PRESENT LEGISLATION

Nearly 750,000 loans for approximately $2,000,000,000 have been made by the Federal land banks and the land bank commissioner since May 1, 1933. Estimated scale-downs in con-

nection with these operations approximate $200,000,000. Annual interest reductions as a result of such refinancing amount to $38,000,000 on the basis of the contract rate. When temporary interest reductions are added, the total saving to the farmers of the country for the year ending June 30, 1936, will approximate $74,000,000.

Liberal provision has been made for deferring principal payments and for granting an extension of time on past-due items where farmers, through no fault of their own, have been unable to meet their obligations.

With decreased interest charges and improved prices the amount of farm products required to pay interest charges has decreased materially. Whereas in 1932, 25.5 bales of cotton were required to pay the interest on a $10,000, 6½-percent farm mortgage; the interest charges on a $10,000 Federal land-bank loan in 1935 could be paid with only 5.9 bales of cotton. Similar improvement has taken place in other lines of agricultural production.

For the country as a whole, 9.6 percent of the gross farm income was required to pay the interest on the farm-mortgage debt in 1932. In 1935 the corresponding figure was 4.5 percent, the lowest during the 10-year period, 1926–35.

The number of delinquent Federal land-bank borrowers has declined substantially. As of December 31, 1933, approximately 47 percent of all Federal land-bank borrowers were delinquent; as of December 31, 1934, 34 percent of such borrowers were delinquent; while as of December 31, 1935, only 27 percent of all borrowers were delinquent.

During 1935 the farmers of the country voluntarily repaid principal to the Federal land banks in an amount greater than they would have been required to pay had no deferment privilege been granted.

During 1926 it is estimated that there were 18.2 foreclosures per 1,000 farms in the United States. In 1932 the figure reached 38.8 foreclosures per 1,000 farms. By 1935 the number had decreased to 19 foreclosures per 1,000 farms.

I am consistent in my opposition to the pending bill in its present form. I voted against reporting it by the Agriculture Committee. I was anxious to have an opportunity to study the feasibility of lowering the rate of interest now given to farmers by the Farm Credit Administration and, if possible, to vote for and to support some measure which might bring some equitable relief to the farmers of the Nation at large, but a vote was demanded and the bill was reported. The Rules Committee was discharged and the bill is now before the House. I can only express the hope that it may meet with defeat. While I have no desire to urge unduly the Members of the House to cast their vote against this measure, I do urge you to give it the benefit of your very best thought. I may be wrong and I may be mistaken. If I am, the error can some day be corrected. [Applause.]

Mr. JONES. Mr. Chairman, I yield 15 minutes to the gentleman from Maryland [Mr. LEWIS].

Mr. LEWIS of Maryland. Mr. Chairman, this bill proposes an immediate inflation of the currency by more than 50 percent. I cannot vote for the bill, worthy as its intended beneficiaries are, and I want to give my reasons.

There are 33,000,000 life-insurance policy-holders in the United States. These policies average $2,000. And their paid-in value aggregates over $20,000,000,000, more than the total value of the railroads of the United States. Nearly one in every four of the population holds such a policy or is interested in its benefits. Some 328 insurance companies are conducting this massive business, and it may be said with patriotic pride for them that they have in recent years passed through the most crucial financial test that insurance companies might have ever successfully met.

Sir, in Austria, in Germany, in France, and in Italy, before the war they had like life-insurance companies equally well managed and discharging a similar great function of saving for the people; but what happened to them? Following the war, under an inflation of the currency of these countries, the entire value of the Austrian insurance policyholders was lost. Eighty percent of the paid-in value of the French insurance policyholders was lost, 75 percent of the Italian policyholders was lost, and 90 percent of the German policyholders was sacrificed.

What was the occasion of tragedies so Nation-wide and so utterly devastating to such a worthy part of their population? Ah, it was the policy of paying public debts and marketing public policies with printing-press money by inflation statesmen in those countries. In Germany, for example, although they came out of the war with less than 37 billion marks, later inflation raised the currency to 2,000 billions in 1922 to 28 quadrillion marks in September of that year and by December to the superastral figure of 497 quintillion marks.

Mr. Chairman, this stupendous inflation of these currencies occurred not because anybody wanted it to occur, not because anybody intended that it should occur, it occurred because once inflation got started down its toboggan, nobody could stop its headlong descent to financial anarchy and perdition.

In Germany, for example, the purchasing value of the mark began rapidly to fall. At length employers and employees found it necessary to readjust their wages monthly; soon they had to readjust wages weekly; then, at length, every day; and near the tragic end of the chapter the workmen were allowed an extra hour at noon to go out and spend the day's wages, in order that they might get some value for their toil before the day's inflation had destroyed the fruits of the morning's labors. Depositors, sensing the situation, withdrew their savings out of the savings banks to spend them before they became valueless, and within a year all the savings banks were empty and have not yet fully recovered.

The farmers—yes, the farmers, too—were victims, for when they sold their products they immediately had to spend. They bought diamonds—diamond rings—and stockbrokers bought carpenter tools in order that at the end of the insane frenzy of inflation they should have something real in their hands to trade for their needs. All kinds of pensions existed over there, earned pensions as well as public pensions, and what happened to them? In Austria a $50 pension, for example, dropped to a value of $7.35 a month and never got back beyond the point of $25.

Now, perhaps, you say, "Oh, well, Mr. LEWIS, this was all due to the war." It was not due to the war. It did not happen in Great Britain, that suffered as much from the prosecution of the war as Italy, France, Germany, or Austria. It was due to the falsity, implicit and inescapable, in the inflation philosophy.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. LEWIS of Maryland. I cannot yield.

Now, in this measure there is an immediate issue of $3,000,000,000 involved. I want to say to you sober Representatives of the American people, this is the largest first step in inflation ever undertaken in history. If it succeeds in this measure, it will be followed by others. We will then be on the toboggan with Austria, Germany, Italy, and France, and when once on that toboggan, our statesmen will no more be able to control the subsequent train of events than the inflation leaders of those countries.

My God, have we not had enough of the lessons of inflation in the fields of both public and private finance? We know what such inflation, printing-press stocks and bonds, did in the field of private investment. We know the story of 1929, 1930, 1931, and 1932—what followed that false philosophy which closed every bank in the United States. After all, what is it we want—the restoration which we all seek so urgently? It is confidence. Businessmen must have, not only confidence in Government—thank God, that confidence we fully have—but they must have a confidence in one another and especially in the financial instrumentalities of commerce.

We ourselves have worked earnestly to restore the purpose of the confidence essential in commerce, in industry, and in our financial organization. But the passage of a bill like this, ladies and gentlemen, would, by one act, utterly wreck

this work of restoration during the last 3 years. It would destroy all reasonable hopes for years. I dare not now pull back the curtain to disclose the financial anarchy that would ensue with another break-down of the financial credit of both the Government and our private financial organizations.

Sir, there are two motives impelling this measure. I shall speak of the worthy one first. It is that appeal which the farm makes to all human beings. Yes, the farm was the cradle of civilization. Yes, the farm is still the best man maker and the best woman maker on the face of the earth. Certainly there could have been no government, no religious or ethical system without their development on the farm throughout the ages.

(The time of Mr. LEWIS of Maryland having expired, he was given 2 minutes more.)

Mr. LEWIS of Maryland. We all acknowledge that, but I want to say that this bill provides no remedy for farm injustices. Give the farmers a just price for their product; that is the remedy. [Applause.]

Now, another motive actuating this measure is politics. If the American people do not soon go on strike against politics, they may wake up some morning to learn that they have no Government left to play politics with. It is true that no Philip of Macedon has ever horsed his way over the North American Continent; and firmly we Americans are resolved that no ambitious and unscrupulous imitator of Stalin, Hitler, or Mussolini ever shall. Yet if ever the work of Washington shall be undone, charge it now to irresponsible legislation of this character.

Now, my fellow Members, I thank you warmly for the patience with which you have heard the reasons why one Member, representing, as I think, one of the best agricultural districts in the United States, finds it necessary to so differ with the proponents of this bill. [Applause.]

Mr. LEMKE. Mr. Chairman, I yield 10 minutes to the gentleman from Maryland [Mr. GOLDSBOROUGH].

Mr. GOLDSBOROUGH. Mr. Chairman, I listened with great interest to the speeches of the gentleman from North Carolina and of my distinguished friend from Maryland. I think it is a pity that this discussion cannot avoid emotion, because if there ever was a matter which required intellectual processes, it is the matter now before the committee.

My distinguished colleague from Maryland, in his impassioned appeal about inflation, lost sight of two fundamental facts which stand out through all history from the beginning of time until the present moment. One of these facts is that inflation has never occurred anywhere at any time in a stable government. The second fact is that inflation cannot occur until all the wanted goods and services which can be produced have been distributed or are being distributed. These two fundamental facts are entirely lost sight of by the eloquent gentleman from North Carolina and by my colleague from Maryland.

Now, let us see whether or not some of those who find it necessary to vote for this bill are inflationists. When we began to consider the Banking Act of 1935, we found that the excess reserves of the member banks of this country amounted to $2,700,000,000. We found that the necessary reserves amounted to $2,700,000,000. We realized that there was danger of a tremendous inflation, because these excess reserves, when used by the banks, could be multiplied by at least 15 and result in $40,000,000,000 of loanable funds. So the House committee, when it introduced the bill, provided that the Federal Reserve Board, in order to prevent excessive inflation or deflation, should have control of the reserves of member banks and raise and lower them as they saw fit, in order to prevent inflation and deflation.

We did two other things in the House in order to prevent inflation. We knew that the reserves of the Federal Reserve banks amounted to $4,200,000,000. We realized that meant that the Federal Reserve banks had available to lend to member banks two and one-half times that amount, or over $10,000,000,000. We realized that if that money was borrowed by the member banks and expanded 15 times when loaned, it would amount to more than $150,000,000,000. We realized that combining the two potential inflations of the member banks and the reserves of the Federal Reserve banks, we would have the tremendous sum of over $190,000,000,000. So what did the House Committee on Banking and Currency do? We tried to give the entire right to raise the reserves to the Governors of the Federal Reserve Board. But what we were finally able to do over the opposition of the conferees on the part of the Senate, and over the bankers' opposition, was to give the Federal Reserve Board the right to raise the reserves up to 100 percent. With that right to raise the reserves up to 100 percent, it could wipe out the $2,700,000,000 of excess reserves of the member banks, and prevent that $40,000,000,000 inflation. That is what the House Committee on Banking and Currency and the conferees, supported by the House, did to prevent inflation. That is one of the things. And realizing the tremendous potential inflation because of the $4,200,000,000 of reserves of the Federal Reserve banks which could be translated into $157,000,000,000, we succeeded, after days and nights of toil, in getting into the bill a provision that the Federal Reserve Board should control the rediscount rates, which means that the Federal Reserve Board can so raise the rediscount rates as to entirely prevent this $157,000,000,000 inflation or any part of it.

Did you ever hear of the Liberty League, did you ever hear of the Economy League, did you ever hear of the great credit structure which has its apex in Wall Street denounce the condition we found when we began to consider the 1935 bill? No. We had to fight that element every inch of the road in order to prevent this great inflation. They do not care anything about inflation so long as it is inflation created by debts to them. And they come in here and talk about inflation, involving the relatively insignificant sum of $3,000,000,000 in real money. God save the mark!

The CHAIRMAN. The time of the gentleman from Maryland has expired.

Mr. LEMKE. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. GOLDSBOROUGH. Mr. Chairman, it has been impossible up to this time to create the substantial medium of exchange in this country except by debt. This debt is mounting hundreds of millions of dollars a year. The backs of the American people are bowed down by it. Under this system, instead of the masses of the people getting the benefit of what the people can produce, we are destroying production that is needed by millions of people who do not know where their breakfast is coming from 10 days from now. While I could not have introduced a bill like this, arbitrary in its provisions, unscientific in its demonstration, yet it serves notice on the great creditor class that the people of the United States are beginning to find out there is some way they can transact their business without going from the cradle to the grave with a burden of debt on their shoulders, which their children for the next generation, and for generations yet unborn, will have to bear.

So, Mr. Chairman, it is because of that broad principle, because of the fact that this socialization of credit constitutes a beginning of understanding that there is no reason in a rich country like this why we should transact our business based on debt, that I am supporting this bill. There is another reason. For 50 years I have been watching the farmer. When I was a little boy driving around with my grandfather, who was a country doctor, I saw how they were burdened with debt. I know of hundreds of cases where that same debt, as I said before, has been transmitted from generation to generation; and whenever I can help them I propose to do it. [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. MAY].

Mr. MAY. Mr. Chairman, I grew up on a farm, remained on it, and worked on it until I was 25 years of age. I went from the farm to the practice of law and in connection with it had the privilege of serving at the head of a national

bank for more than 20 years. When the inflation, or deflation, or whatever you call it, came to us in 1933 and all of the banks in this country were closed, the one with which I had been associated for 20 years stood like the Rock of Gibraltar and paid out at the back door while the President's Executive order was in existence in order to keep people from starving. That was because we had adopted a rule early in the history of the institution that we loaned money on real-estate mortgages based upon 50 percent of the fair market value of the farm. The Frazier-Lemke bill, in violation of the banking rule, and of the rule of insurance companies that have made millions and billions of dollars of real-estate loans, authorizes the Federal Government to lend money based upon not the fair and reasonable value of land but upon the fair value of the land. It authorizes loans to be made based upon 75 percent of the value of the buildings and improvements. It authorizes loans to be made upon 65 percent of the value of livestock—something that is transitory, something that is liable to be carried away, liable to to be lost; in fact, it is perishable property, just like the buildings are perishable, as they may be lost through fire and things of that kind. Having grown up on a farm, having worked with my hands as a toiler for low wages from the age of 10 to 25, having been associated with banking circles, having had long years of experience in the law practice, I feel that I am in position to know something of the danger of this character of legislation, and I feel that I am able to speak with some feeling of confidence on this subject. I want some of the proponents of this legislation to answer this question, Whether the Federal Government has done more for any other group of our people than it has done for the American farmer? And whether or not the Seventy-third and Seventy-fourth Congresses have done any more for any other class of people than we have done for the American farmer? I am glad to have voted for and supported all farm-relief legislation since I have been a Member of this body.

I, therefore, as a Democrat, and as one who believes in the fundamental principle of equal and exact justice to all men with exclusive privileges to none, believe it is infinitely unfair to say to about 85 percent of the American farmers who have borrowed from the Federal land banks and from the Federal Land Bank Commissioners at 5 and 6 percent interest that we will lend to another class of American farmers at 1½ percent interest. I believe in equal treatment to all and special privileges to none. I am afraid—desperately afraid—that after this Congress—and when I say this Congress I mean the two sessions of the Seventy-fourth Congress—has laid upon the back of the Federal Government a bonded indebtedness of $21,000,000,000, that if we thrust upon it through these loans another $3,000,000,000 we may bring the terrible monster of inflation upon this country that will make it necessary for the people of this country—what people?—the laborers of America, the working people, numbering in all the crafts and trades more than 40,000,000 of our citizens, to do what the people of Germany had to do during their period of inflation. Following the World War the streetcar conductor who worked on a wage base of $5 per day had to get off his streetcar in the evening and take a market basket full of German marks to the store before he could buy enough food for one meal. This is the thing we are coming to if this character of legislation is passed. I do not care whether the President of the United States be Herbert Hoover or Franklin D. Roosevelt, I would follow him in opposition to this bill because I believe first in the foundation stone of the great American Republic that is laid upon the great doctrine of equal and exact justice to all men, with exclusive privileges to none. [Applause.]

Let us see what else they do in this bill. They will, of course, never come to do it unless this Congress has gone crazy or unless I have gone crazy; and I hope I have not; but if I should vote for this bill I would feel as though I had.

Do you believe it is fair to me as a farmer to require me to pay even 5-percent interest on a farm loan and then say to my neighbor just across the fence that you will lend him money at 1½ percent? What happens to the 85 percent of our farmers who have not borrowed from the banks? Sixty-six percent of them have no mortgages at all. This 85 percent of the farmers who have not borrowed from the banks would be up against the worst sort of discrimination any man could conceive. Why? Because you know that a loan extending 47 years at 1½-percent interest is far below a reasonable rental value of any farm, and the result of it would be that there would be a market for the man whose loan extended 47 years at 1½ percent, and no market for the man who is paying 6 percent. So it would discriminate against 85 percent of the farmers in order to help 15 percent of them. If you are going to lend $3,000,000,000 in this country to 15 percent of the farmers and make it on a 47-year basis, at 1½ percent, you are going to leave out of consideration $21,000,000,000 of indebtedness on urban and city property that is under mortgage at from 4 to 6 percent.

Let justice be done to all our farmers without discrimination. Inflation is always followed by an era of destructive deflation, such as we have experienced since October 1929, for which we are now having to pay the penalty in billions of dollars. Who were the greatest sufferers under the deflation that followed that credit inflation? It was the laborer and the consumer. The laborer in lower wages and resulting inevitable suffering. The consumer in higher prices and less to eat and wear. Notwithstanding my great sympathy for the farmer, this is such a dangerous and discriminatory character of legislation that I cannot support it. I must stand by the toilers and wage earners and with the President of the United States. [Applause.]

If it is not inflationary, then let us bale out all of the banks and insurance companies that hold these mortgages. If it is not inflationary, let us put on top of the $20,000,000,000 that we have already put the Government in debt another twenty or thirty billion dollars; then we will have a sure enough problem on our hands. We will have not merely inflation but chaos.

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. MAY. Mr. Chairman, I want to answer the distinguished gentleman, who is a member of the Banking and Currency Committee.

Mr. WHITE. Will the gentleman yield?

Mr. MAY. I yield to the gentleman from Idaho.

Mr. WHITE. Was not the same condition practiced by the Reconstruction Finance Corporation? Did they not lend money cheaper to one borrower than the borrower could get from outside sources? The Reconstruction Finance Corporation did all the things the gentleman has been complaining of.

Mr. MAY. If the gentleman is going to answer, I will not have time to answer my colleague. The Reconstruction Finance Corporation laid down certain rules and regulations covering industries, which rules and regulations were based on sound banking rules and the Reconstruction Finance Corporation followed them. But if it be true that Reconstruction Finance Corporation has discriminated, is that a reason why we should? In this instance we are adopting a rule which provides for 1½-percent interest, based on the full value of the farm. If the farmers are as hard up as they say they are, and everybody knows they are doing better than they have done in the last 10 years, they will move off, abandon, and leave their farms.

Mr. KLEBERG. Will the gentleman yield?

Mr. MAY. I yield to the gentleman from Texas.

Mr. KLEBERG. Following the question asked by the gentleman from Idaho [Mr. WHITE], my distinguished friend, does the gentleman think that because the Reconstruction Finance Corporation might have practiced some little discrepancy or discrimination that makes it right for us to go ahead with this kind of legislation and continue that sort of practice?

Mr. MAY. I should say that was the basis of the gentleman's argument and the reason for his statement. His position is perfectly in harmony with this bill.

Mr. Chairman, I want to answer the gentleman from Maryland, who is a member of the great Banking and Cur-

rency Committee of the House. He says there has been no complaint from the Federal Reserve Bank, there has been no complaint from insurance companies, and there has been none from Wall Street. Of course, they do not complain because they expect the Federal Government to bail them out on a lot of stale loans. [Applause.]

Mr. LEMKE. Mr. Chairman, I yield 5 minutes to the gentleman from Minnesota [Mr. KNUTSON].

Mr. KNUTSON. Mr. Chairman, there seems to be some apprehension on the part of the preceding speaker that the passage of this legislation will bring on inflation. I would direct the attention of the Members of the House to section 6, on page 4, which provides for refinancing farm indebtedness through the issuance of bonds, and only in the event the bonds fail to sell will currency be issued, and then in an amount not to exceed $3,000,000,000.

I look upon this measure as the remedy necessary to bring agriculture back to a reasonable level of prosperity. We may legislate until we are black in the face in an attempt to restore prosperity in this country, but I say there will be no prosperity, and there can be no prosperity, until we have restored the buying power of the farmers. You cannot expect the farmer to regain his buying power so long as the greater part of his income is devoted to the payment of taxes and interest. The gentleman from Maryland [Mr. GOLDSBOROUGH] referred to the fact that he had known several generations of farmers in his State, most of whom passed on debts from one generation to another. That is the case all over the country. The children of farmers inherit debts rather than property, and it has been my observation that these debts increase with time.

We reduced the interest rate for the farmer a short time ago, but the reduction was not sufficient to be of assistance. The farmer must get money at the rate that the Frazier-Lemke bill provides if he is going to work his way out and again become a contributing factor to the welfare of our country. There is no class legislation involved in the pending measure.

Can any Member of this House give any good reason why a farmer should not get money at the same rate of interest that is carried by much of the commercial paper put out by corporations? Surely no Member of this body will contend that a conservative farm mortgage is not better than any other form of security. I would say that a farm mortgage is even better security than Government bonds, because all wealth comes from the soil.

During the war we loaned billions of dollars to the Allies at 1½ and 2 percent. It has turned out that those advances have resulted in total loss through repudiation. Shall it be said that we are more considerate of foreign nations than we are of the people who raise the food for our tables and provide us with clothing?

The Frazier-Lemke bill deserves to pass both Houses of Congress with an overwhelming majority. It is one of the most beneficial pieces of legislation that we have ever had before us. I regard it as the best possible insurance for the perpetuation of the Republic.

One-third of our farmers are renters, according to the census of 1935. We may pass laws without number prohibiting the teaching of communism and other forms of destructive radicalism, but all of them combined will not contribute as much toward the maintenance of our institutions as will the passage of the Frazier-Lemke bill, because under its operation our tenant farmers would become farm owners, and property owners are never radical. I pass this thought on to you conservative Members who represent city constituencies.

Mr. Chairman, I have no fear that the passage of the Frazier-Lemke bill will bring on inflation, as I have discussed it with several sound financiers, who have assured me that there is not the least possibility of that happening unless the measure is materially broadened. Of course, no one wants inflation. We saw what happened in Europe following the war, and no Member of this body would vote to bring on such a condition in this country. I feel that this legislation is necessary to the welfare of our country, and I strongly urge every Member of this body to vote for it. [Applause.]

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. FIESINGER].

Mr. FIESINGER. Mr. Chairman, the discharge rule on the pending bill has caused me a great deal of trouble, because as a result of my refusing to sign the discharge petition I had opposition in the primary and the people in my district are voting on my case today. I have been out in my district for the last 2 weeks, and I have told the people that I was going to vote against this iniquitous bill. [Applause.] So they know where I stand. I would like to let the Members know where we stand as a Democratic Party if we pass this piece of legislation.

The Democratic Party in only one instance in its history has even gone off on the proposition of sound money. The Democratic Party in its platform of 1932 declared for sound money, and this bill violates every principle of sound money. It does more than that, Mr. Chairman; this bill violates a monetary principle that has come down to us through the centuries; that is, that money belongs to the people and does not belong to the state. This bill contemplates that money belongs to the state. If you set aside the principle that has come down through the experience of the centuries, then we are indeed going down the primrose path that was suggested by my friend, the gentleman from North Carolina.

The Committee on Agriculture voted this bill out of committee without any great studies made of it, and this bill was never passed upon by the Banking and Currency Committee of the House. They never had it up for consideration, and we are sitting here today being asked to change a principle, without competent committee consideration, that has come down through all the ages.

Mr. Chairman, Mark Sullivan, a week ago Sunday, in the Washington Star, had an article, and I want to read a small part of it, because I believe it tells what is going on and what is likely to happen in this country.

One of two major dangers which the depression brought to America, I have said, was violent inflation of the kind which after the war took place in several European countries. This danger still exists. I do not wish to overemphasize it. I would not make a 50–50 bet that it will take place, though some competent judges would.

And competent judges, as Sullivan says, will know more about it after we take a vote on this bill in the House.

This danger of violent inflation to whatever extent it exists, involves within itself the other danger, the danger of a new form of society and government, for, if inflation should really come in America and go on to a catastrophic stage, the result would be a collapse, a collapse much more serious than the depression, and after the collapse would come a period of chaos in which we would again be subject, as we were in the depression and to a greater degree than by the depression, to the danger of falling into or being taken into a changed form of society and government.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. FIESINGER. I cannot yield.

So that it is not possible to consider the two perils separately, one, the danger of inflation contains within itself the other, the danger of a changed form of society and government.

This is what you are voting for under this bill. You are voting in the final analysis for a changed form of government and I predict you are going to have a dictatorship in America. First, you will have chaos and then a dictatorship.

Mr. Chairman, the Roosevelt administration has with unusual and unrelenting vigor attacked the farm problem. The farm problem, in large measure, grew out of the fact that farm products had been left while industrial products were more or less restricted in their economic play, due to trade barriers, trade agreements, and monopoly. The result was that agriculture received too little and industry received too much out of the common reservoir of income; to express it another way, the farmer's dollar bought too little of what industry had for sale, and industry's dollar bought too much of what agriculture had for sale. Because of this abnormal

condition, in large part due to the fact that agriculture was subject to different and more hazardous play of economic forces than industry, it cost more to finance agriculture than it did industry.

Now, as I said, the Roosevelt administration has attacked the problem, attempting to give agriculture some of the privileges enjoyed by industry, to wit: Regulation of supply to demand, to the end that higher prices may be enjoyed; lower rates of interest on money needed to finance itself, and by the institution of reciprocal-trade agreements, that industrial prices may be kept in check if not lowered, and also as a means of giving purchasing power to people abroad to buy our agricultural products and thus relieve agriculture of too much restriction in product, and thus moderate the cost thereof, which falls heavily upon the Federal Treasury. That the economic system has responded to this treatment is borne out by the recovery we have had during the past few years. That these policies, in view of the whole economic picture, are essentially sound and helpful, hardly anyone will deny, except those who have adverse political motives, or those who, because of special economic pressure, are chasing rainbows in a field of proposals, which are, to say the least, in conflict with administration policies. This bill would wreck the whole Roosevelt recovery program.

Mr. Chairman, some weeks ago when I was being importuned to sign discharge petition no. 7 that was upon this desk, I tried to make a fair and impartial analysis of the Frazier-Lemke bill, and presently I am going to give the House and the country the result of my effort.

Before I begin, let me say that I have been interested in lower rates of interest on farm mortgages and I went down recently to the Farm Credit Administration and had a talk with Governor Myers, and I pleaded with him to recommend that we have lower rates upon farm mortgages. Governor Myers seemed to take the position, and with sympathy for the farm debtor, that it would disturb the fiscal policy of the Government. It is claimed by the proponents of this bill that 30,000,000 people—that is practically the entire farm population—in the United States are back of its enactment, and that some 29 State legislatures have petitioned the Congress that it be made into law. There is no doubt a considerable force is in favor of this bill. On the other hand, there is a very substantial force, including farmers, who are against the bill; but among those who have voiced their approval, how many would have done so if they had known just what consequences this bill would produce?

Fortunately, information and data is available to indicate the possible confines of those most likely interested in the measure. The following data was elicited from reports of the Department of Agriculture of a very recent date:

The number of farms in the United States is 6,800,000; mortgaged farms, 2,300,000; farms not mortgaged, 4,500,000.

According to the above there are 6,800,000 farms in the United States, and of this number about one-third are covered by mortgage debts. Of the 2,300,000 farm mortgaged, 800,000 are financed through the Federal land banks at the lowest rate of interest ever known for farm mortgages in this country or any other country.

I should think it reasonable to assume that the farmers without mortgage debt would not be interested in this measure, and those who are financed through the Federal land bank at the lowest rate of interest ever known would be only passively interested. The remaining owners of farms may have an active interest in the measure, although of this group not all, by any means, are in distress, for great numbers of them are now financed by banks and insurance companies.

In other words, it was estimated that of the farmers in this country, not over 10 or 15 percent were in distress, and we are changing a monetary principle that has come down through the experiences of the ages to satisfy 10 or 15 percent of the farmers of this country, and I noticed in the document handed to us this morning that has been criticized here, that out of a thousand farms in 1926 there were 17.3 foreclosures, while the number went up in 1933 to 38 farms per thousand, and in 1935 it came down to 21, while this year it is estimated the number will be back to 19, or almost equal to the 1926 figure, which was what we consider a normal year for agriculture. In that year agricultural prices were in parity with industrial prices.

Now, I do not wish anyone to infer from what I have said that I have not sympathy for the farmer, or anyone else for that matter, who may be in distress. I wish it were possible never to have another foreclosure, but that is impossible, and there are limits beyond which the Government may not go. The Government must at all times be just to all its citizens, including our churches, schools, and colleges which pay 4.5 and 6 percent, and if it accorded preferential treatment to a limited group of farm people it most certainly should extend the same consideration to all farm owners and to city home owners and other classes who can meet reasonable qualifications. The size of such an undertaking must serve to reveal the absurdity of such a proposition.

The liquidating and refinancing of these mortgages under the plan proposed in this bill would not establish parity on the part of agriculture with industrial prices. The use of banking credit under the plan proposed by the bill would most likely inflate all prices, industrial as well as agricultural, in like degree and continue any disequilibrium that may now exist. Its only effect would be to shift the burden of debt of the farmers benefited to the backs of the farmers not benefited and to the wage earners, savings-bank depositors, holders of insurance policies, and people having and living upon fixed incomes. But this is not the worst of it. These same classes would pay toll to speculators and holders of corporation equities who would reap a rich harvest.

This measure is class legislation. It is discriminatory without helping agriculture, and it injures every other class.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. FIESINGER. I will yield if I have the time.

And, again remembering that but one-third of the farms would be entitled to benefit under this bill, the owners of these farms would receive an unjustifiable, competitive advantage over the other two-thirds not entitled to participate, for immediately farms entitled to participate would reflect in value the advantage of a subsidized interest rate and long-term conditions of payment under amortization.

For example: A and B have adjoining farms of equal size and value. A is entitled to benefit under the terms of the bill. B is not. A's buyer would probably receive little or no advantage, because A's loan or right to secure a loan at less than half the rate of interest that long-term money commanded, would command a premium for A, measured by B's disadvantage. We cannot make fish of one farmer and flesh of another—class legislation is un-American.

The bill provides that the liquidation and refinancing undertaken is to be done through the use of the machinery of the Farm Credit Administration and the Federal Reserve Banking System. I submit that it is not machinery that is intended to be used, but the machinery facilities and credit of those institutions.

The bill would compel the refinancing of farm mortgages up to the fair value of farms and 75 percent of insurable buildings and improvements thereon. That is contrary to all experience and practice. I submit that would hardly place any restraint upon human nature. It is within a farmer's power to skin the land of its fertility, allow the buildings and fences to decay, and then depart, for unless he has sentimentalities there is little, if anything, to hold him. Bonds based upon such security would not float in open markets except at considerable discount, nevertheless national banks and Federal Reserve banks are required in the bill to invest all their surplus and undivided profits in those bonds, which are to be used as collateral to secure up to $3,000,000,000 of Federal Reserve notes. And notwithstanding the fact that the bonds which are secured by these mortgages and Federal Reserve notes are dependent for their stability upon the payments of interest and amortization payments, the executive committee shall have the power, in case of crop failures and in other meritorious cases, to extend the time of payment on loans under this act from time to time for a period of 3 years, provided the mortgagor keeps up the payments of all taxes on the

mortgaged property. There seems to be no limitation here. The executive committee may extend payments of interest and amortization for 3 years and then extend it again for 3 years, and then again for 3 years, provided the mortgagor keeps up his taxes. The bill places no limitation upon indebtedness other than it must be farm indebtedness and exist at the time of the act. That it may not be due, or that Congress could not accelerate its due date, or violate contracts between debtor and creditor, seems not to have bothered the writers of the proposed legislation.

The bill provides that the Farm Credit Administration, through the Land Bank Commissioner and the Federal land banks, shall issue bonds in the manner now provided by law, which bonds in full face amount shall cover farm and chattel mortgages in full face amount. These bonds are to be delivered to the Farm Credit Administration, which may offer them for sale at not less than par to any individual or corporation or to any State, National, or Federal Reserve bank or to the Treasurer of the United States.

Two of these classes mentioned may not exercise their free will to refuse the offer of the bonds, for Federal Reserve banks and national banks are required to invest their available surplus and net profits in the bonds. This procedure and the procedure as to Federal Reserve notes are perfect examples of forced loans. Such loans are not new to history, and became so obnoxious to English freemen that they long ago imbedded an inhibition against such practice in the fundamental law of England, and our constitutional fathers following their examples have provided likewise in the Constitution of the United States. Not to mention other features, this feature alone renders this bill clearly and unmistakably unconstitutional.

All bonds not sold freely or forced upon unwilling purchasers shall be presented to the Federal Reserve Board, which shall forthwith cause to be issued and delivered Federal Reserve notes in an amount equal to the face of the bonds, and the bonds are deemed sufficient collateral to secure the Federal Reserve notes, which shall not exceed at any one time $3,000,000,000. This amount is in addition to the amount taken by forced loans against the Federal Reserve and national banks, which are compelled to invest all surplus and profits after dividends. National banks under this bill are placed at a serious disadvantage compared to our State banks.

Federal Reserve banks are depositories for the reserves of member banks. Deposits are made by banks with Federal Reserve banks in about the same manner that one deposits money in his home-town bank. Outside of the stock and surplus account these deposits are the principal assets and liabilities of Federal Reserve banks. To liquefy these deposits, Federal Reserve banks must be kept absolutely liquid at all times. These banks are the last refuge of liquidity, and as such are the keystone to the whole banking and commercial structure.

Now, in compelling the Federal Reserve banks to issue these notes secured by farm mortgages, and in compelling Federal Reserve banks and national banks to invest their surplus and undivided profits in these bonds and absorb about all their liquid assets, what would happen?

Most sensible persons dislike to predict what the future holds, but I am sure most eminent authority in such matters would predict that the mere making of this bill into law would carry potentialities of wrecking the monetary and banking structure of the United States, causing widespread panic, trade stagnation, unemployment, bankruptcy, and a host of economic ills. Our currency must be sound and stable, our credit high among the nations of the earth, or our people have no hope of enjoying prosperity.

Mr. Chairman, I could not vote for a bill that even carries the potentialities of such frightful consequences. Heretofore I made the statement that these bonds would not float in financial markets except at a discount, that discount may be measured as to their security compared with Government bonds, and Frazier-Lemke bonds are not guaranteed by the Government, and the interest coupon is less than one-half of the average the Government has had to pay for money for the last 20 years, which average was approximately 3⅜ percent.

The bill further provides that all payments of interest and principal on bonds covered by Federal Reserve notes shall be paid to the Treasurer of the United States, and shall be kept by him for the purpose of redeeming said Federal Reserve notes, but in the meantime it shall be used as a sinking fund and invested in farm-loan bonds issued under the terms of this act. This means that principal and interest payments on bonds covered by Federal Reserve notes are not to be used in retiring the notes, but such payments are to be used for further investment in the bonds.

Mr. THOM. Will the gentleman yield?

Mr. FIESINGER. I yield.

Mr. THOM. Suppose the $9,000,000,000 in farm mortgages held by farmers were offered to this new institution in order to obtain 1½ interest rates. Which of these $9,000,000,000 would be recognized; which man would have the loan taken care of. There is only $3,000,000,000 authorized in this bill.

Mr. FIESINGER. The bill does not say anything about that.

Mr. THOM. Then there would have to be discrimination, would there not?

Mr. FIESINGER. Of course.

Mr. McFARLANE. The same proposition was made to the Farm Board and the Farm Credit Administration; why was not the same question raised then?

Mr. FIESINGER. We took care of that by orthodox financing. We were not violating a monetary principle which has come down through the ages.

Mr. WHITE. Will the gentleman yield?

Mr. FIESINGER. Yes; I yield to the gentleman from Idaho.

Mr. WHITE. Did not we finance the Federal Reserve System in the same way?

Mr. FIESINGER. No; by all means, no.

Mr. WHITE. And did not that bill violate the monetary principle?

Mr. FIESINGER. No; it does not. In answer to that question, I say this: I have been accused of talking one way and voting another. I stand strong on what I have always advocated in this House. I am as strong today as I ever was, and that is this, that the Congress of the United States should do its constitutional duty. [Applause.] That is, to coin money and regulate the value thereof. It has never done its duty and it is today allowing the bankers to do it, and I am against that just as strong today as I ever was.

But this bill does not reach that problem by any means.

Mr. WHITE. The Federal Reserve currency was issued against Federal obligations.

Mr. FIESINGER. I cannot yield further.

Mr. KENNEY. I think the gentleman ought to answer the gentleman from Idaho.

Mr. FIESINGER. I did not hear the gentleman's question.

Mr. WHITE. I said the Federal Reserve currency was issued against Federal obligations.

Mr. FIESINGER. But they were not forced on them. These are forced loans which the Constitution of the United States inhibits. You are changing the whole monetary structure and putting on the Federal banks and the national banks forced loans.

Mr. WHITE. What about the farm loans made by the farm-loan bank?

Mr. FIESINGER. There is no forcing of loans there. If those loans were forced the Supreme Court of the United States would say that the authority was unconstitutional, as they will say under this bill. I was about to answer that question. I will go on. I know my time is getting short. I want to talk about this board of agriculture.

Mr. MAY. Mr. Chairman, will the gentleman yield for a question?

Mr. FIESINGER. Yes; I will yield.

Mr. MAY. On page 4 of this bill there is a provision which provides that the Federal Reserve banks and national banks shall invest all their earnings and all payments of dividends in these bonds.

Mr. FIESINGER. Yes. What the proponents of this bill want is inflation. It is the same old wolf in sheep's clothing that has been snarling at the door of Congress ever since I have been here.

Mr. BOILEAU. Mr. Chairman, will the gentleman yield?

Mr. FIESINGER. I yield.

Mr. BOILEAU. An amendment will be offered to make it permissive instead of mandatory.

Mr. FIESINGER. It is rather perplexing for me, because I do not know what proposals are going to be offered. But in its final form it will either be inflation leading the way to uncontrolled inflation or saddling the debts, or part of the debts, of indebted farmers on the Government, which is what the bankers and insurance companies want.

Mr. BOILEAU. If it is made permissive, it certainly would not be an obstacle.

Mr. FIESINGER. If you make it permissive this bill will fall flat, because no Federal reserve bank and no national bank nor anybody else will ever invest in these bonds, because they will only be worth 50 cents on the dollar. Put mortgages upon farm land at full value, plus 75 percent of the insurable value of the buildings, and these bonds will go down to 50 cents on the dollar. There is no question about that in my mind.

Mr. WOLCOTT. Mr. Chairman, will the gentleman yield?

Mr. FIESINGER. I yield.

Mr. WOLCOTT. In that respect, may I call the gentleman's attention to the fact that under the Banking Act of 1935 we provided in the open-market provisions of that bill, authority whereby the Federal Reserve Board can compel banks, if it adopted as a policy, to take these or any other bonds that the Government may issue.

Mr. FIESINGER. Have you tried that out before the Supreme Court of the United States?

Mr. WOLCOTT. It is generally conceded that the Federal Reserve Board has the authority.

Mr. FIESINGER. I would like to see a decision of the Supreme Court of the United States on the proposition of forcing these banks which own the private money of this country. I would like to see the authority sustained by the Supreme Court of the United States.

Mr. WOLCOTT. That is what we provided for last year in the Banking Act of 1935.

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. FIESINGER. There is set up by the bill a board of agriculture to be composed of one member from each State elected by delegates selected by mass conventions of farmers in each county or parish within the United States who are indebted and declare it to be their intention to take advantage of this act. This could hardly be called democratic government, for only those who are indebted and declare it to be their intention to take advantage of this act are entitled to vote. A farmer having no indebtedness is not entitled to vote, nor is a creditor entitled to vote, although he may have long-term contracts with those entitled to vote. No representative of the Government, the Farm Credit Administration, the Federal banks, the Federal Reserve Board or banks, or national banks are entitled to vote. This is a government entirely of debtors and their elected State representatives shall elect members of the board of agriculture, one from each State, which, in turn, elects an executive board of three members, none of whom shall be members of the board of agriculture. This executive board or committee, as it is named in the bill, has some very extraordinary powers.

The members of the board of agriculture shall keep in touch with and report to the executive board on the progress made in liquidating and financing farm mortgages, and in doing so they shall cooperate with county or parish or State organizations, and with all farm and cooperative organizations within their respective States, and county or parish organizations shall at all times cooperate with and assist the board of agriculture, the Farm Credit Administration, the Federal land banks, and national loan associations. This executive board, with its disconnected network of cooperation, assistance, and report as a background, shall advise and supervise the work of liquidating and refinancing farm mortgages and farm indebtedness by the Farm Credit Administration and the Federal Reserve Board, and they, the said executive board, shall cooperate with the Federal Farm Administration, and so forth, and so forth.

The executive board is tied, and responsibly so, to the board of agriculture, because its tenure of office is subject to the will of the board of agriculture. The bill gives the executive board the power to advise with and supervise the work of liquidating and refinancing farm indebtedness by the Farm Credit Administration and the Federal Reserve Board. To advise with and supervise gives this board powers in connection with the purposes of the act greater than like powers conferred upon the President of the United States. It would give this board the power, in plain words, to boss the Farm Credit Administration and Federal Reserve Board. Let us take an example that no doubt would frequently happen. Suppose the Farm Credit Administration reported an appraisal of a farm at $5,000 and the executive board said the appraisal should be $10,000. Under its power to supervise, which means to have general oversight over, to superintend, inspect, the board's authority would no doubt be controlling; and if any member of the Farm Credit Administration or the Federal Reserve Board did not heed its supervisory power, the executive board would then report such member to the President of the United States for neglecting, hindering, or delaying the carrying out of this act. Before the President acts, cause must be shown; but the cause is shown when the Federal Reserve Board refuses to accept the executive board's judgment as to the fair value of the land and 75-percent value of the insurable buildings.

In other words, that farm board, that executive board, has more authority, as is provided in this bill, than the Federal Farm Credit Administration or the Federal Reserve Bank. Yes; more than the President of the United States.

Permit me to say this in conclusion: Our Government is inflating price levels through what is known as the credit route along orthodox lines. Credit inflation has never ruined a people, but, historically, at times it has become uncomfortable. Because of this experience this administration has set up certain banking controls by which it hopes to avoid many of the discomforts suffered in the past. This bill adopts a policy of monetary inflation. History records no single instance of monetary inflation that has not wrecked the people using it, and the worst of it is that the poorer classes and wage earners suffer most. The rich escape better than the poor because they know better the method of escape. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio has again expired.

Mr. LEMKE. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas [Mr. MILLER]. [Applause.]

Mr. MILLER. Mr. Chairman, I am one of those Members who signed the petition. I voted to discharge the Rules Committee from consideration of the rule. I expect to vote for this bill. I will vote for it just as it is, if it is necessary, to get it. There are some provisions of the bill, of course, that we would all probably like to see amended, but the important question before us is this, and, in my opinion, one cannot sit here and listen to this debate and reach any other conclusion.

The question is this: Who is in control of the money of this Nation and what is money created for? Is the money created to serve mankind or is mankind created to serve money? That is all that it amounts to. What has been our policy during the last 50 years? Why is our economic con-

dition such as it is in this Nation today? Whom has money been serving?

WHO IS THE FORGOTTEN MAN?

We have heard a great deal about the forgotten man. We heard a lot about him a year or two ago; we shall probably hear more about him in the next 6 months. We have heard a lot about relief for farmers in years gone by, and we shall probably hear more about it in the next 6 months. After all is said and done, the American farmer is the last great individualist in our Nation, and unless he is given an opportunity to sustain his individualistic character, individualism will fade away. He cannot compete, he cannot survive, under the present economic conditions. The farmer is the only class of man, farming is the only class of business of a substantial nature, that has to pay as high a rate of interest as is being paid on agricultural indebtedness. In Arkansas today the average is 8.1 percent. Other States are paying almost as high a rate of interest. It is no argument to say there are a lot of men who do not owe anything; that there are a lot of farms not mortgaged. This is true, of course. It is just as foolish to argue that this bill is a discrimination against the man who does not owe. It is not going to discriminate against the man who does not owe. Nobody wants to be in debt. Not a farmer in the United States wants to be in debt. How can the man who is not in debt be discriminated against by his neighbor who is in debt receiving a loan?

There are some things that just simply do not coincide with common sense. You may sit here and listen to these arguments and talk about inflation and all that kind of stuff, but let me tell you there is no danger in inflation if the property values are there, not a bit in the world. Upon what is the money of this country based if it is not the property values in this Nation? If you destroy the American homes you destroy the value behind our money. Some of you gentlemen who are so anxious to fly to the defense of the Federal Reserve banks and the banking interests in this country answer me this question: What are you going to do when you destroy the morale of the farming class in this Nation? When you, by defeating this bill, destroy agriculture, where is the value of your property and what is there behind the money of the country, be it inflated or not inflated? [Applause.]

ARGUMENTS AGAINST BILL ANSWERED

I am well aware of the arguments that have been advanced for the last few years by those opposed to this bill. They claim that it is inflationary—that it is unsafe and unwise for the Government to engage in the task of refinancing the farm indebtedness of this Nation. The claim is made that during recent years agriculture has received preferential treatment by the Congress and that a general bill for the refinancing of the farm indebtedness is not necessary. Men whose sincerity I do not doubt argue that the Government is not financially able to refinance this indebtedness, and that it is not for the best interests of the farmers themselves for the Government to do this. These same gentlemen talk earnestly about the necessity of preserving the financial integrity of the Government. They advocate that political philosophy that teaches that the monetary policies of the Government should be dictated by the financiers and by Wall Street. This policy has been followed by this Government for the last 50 years, with the result that money has become the master of man. People are compelled to serve the moneyed interests because of the political philosophy of the gentlemen who are opposing the passage of this bill. They overlook the fundamental principles upon which this Government is based and for which it was inaugurated.

EQUAL RIGHTS FOR ALL

This Government was set up as an instrument to promote the general welfare of our people, and in order to do this it is necessary that equal rights and opportunities be afforded to every class of citizens, regardless of whether they may be engaged in agricultural pursuits or some other pursuit. Money is merely an instrumentality that serves the needs of man, and unless we recognize this fundamental truth there cannot be any well-ordered and sustained prosperity in this Nation. [Applause.]

NECESSITY FOR BILL

It is not necessary to quote statistics and figures to show the absolute necessity for the enactment of this bill. We all personally know the actual conditions that exist in our own districts. We should face these conditions and not be led astray by any theories or by the arguments that are advanced against this bill.

This bill does not propose to create any new or additional interest-bearing tax-exempt securities. It does provide that the credit of the Government shall be used to refinance the farm indebtedness of this Nation in an amount equal to the fair value of such farms, if such an amount is necessary. The true wealth of this Nation is not in the stocks and bonds owned by the favored few, but all of our wealth rests upon the value of the property of the citizens. The bonds that are to be issued for the purpose of this act will be secured by the value of the property of this Nation. If the property is valueless, then our whole financial structure will crumble. We can only guarantee the value of the property of our citizens of this Nation by providing a means whereby those citizens can own the property and enjoy the fruits thereof. If the present conditions continue as they have in the last past several years, the morale of those engaged in agricultural pursuits will be undermined and destroyed. The farms will cease to be the homes of this Nation, and when that day comes we may expect the farmers of this Nation to demand that the Government discharge its plain obligations to them.

Farm tenancy is on the increase and will continue to grow unless this or a similar bill is enacted which makes it possible for the present landowner to continue to own and operate his farm.

Gentlemen claim that there has been a decline in agricultural indebtedness, but this decline since 1928 was not the result of normal liquidation, but it is the result of foreclosures and bankruptcies. It is not necessary for me to call to your attention the fact that present conditions cannot be tolerated much longer. The temporary measures heretofore enacted by the Seventy-third Congress and by this Congress are mere palliatives, and the invalidation of the Agricultural Adjustment Administration is only another indication and another reason why this bill must be enacted and should be enacted this session.

HOMES MORE SACRED THAN POLITICS

We Democrats are told that we are following a Republican in supporting this bill. Personally such an argument does not appeal to me. This is a question of giving actual relief to agriculture. It is, in my opinion, of greater concern than partisan politics. The responsible Democratic leadership of this Congress has failed to sponsor a bill to give relief to my people; the present bill does give relief to them and is a step in the right direction. I am more concerned about the welfare of the people of this Nation than I am about mere politics, and therefore I expect to continue my fight for the bill. It may be that this bill will be defeated in this session of the Congress, although I, for one, think we should stay here until this bill is passed. I have an opponent, just like many of you have, who is now busily engaged in a campaign against me, but the welfare of our people is more important than the political fortunes of any one man or any political party, and we should stay here until this bill is enacted.

A LIFE AND DEATH STRUGGLE

This is a death struggle for the economic freedom of agriculture, and those who vote against this bill should not be heard in the future to say that they want to grant relief to agriculture. The supreme test is at hand, and I call upon all of you who really and truly believe in providing equality for agriculture to vote for this bill. [Applause.]

It is argued that $3,000,000,000 will be required to finance the operations under this bill. Suppose it is true that $3,000,000,000 or more is required. We have, during this session of the Congress, appropriated more than a billion

dollars to maintain our Army and Navy. Heretofore we have spent billions of dollars on great reclamation projects. Millions have been spent on flood-control projects, on roads, and other internal improvements, but we have overlooked and have utterly failed to provide a means for those whom we expect to live in the reclaimed areas and on the farms of this Nation to pay their indebtedness and at the same time provide through their own industry a reasonable living for their families. Agriculture is feeding America today and those engaged in other pursuits do not have the legal nor the moral right to enjoy the fruits of agriculture without sharing with those engaged in agriculture some of the things that make life worth while.

OTHER LEGISLATION DOES NOT ANSWER PURPOSE

We have heretofore enacted a social-security law by which the Government undertakes to aid in the payment of an old-age pension; we have appropriated billions of dollars to provide employment for those without means of livelihood. As a rule, farmers have been excluded from sharing in these billions that were appropriated for work relief upon the assumption that the farmers had work to do on his farm. It is true that the farmer does have work to do upon his farm, but if he cannot retain that farm, and if the produce from the farm cannot be sold for a sum sufficient to support himself and family, then the discrimination becomes unbearable. We cannot expect the farmers of this Nation to continue the struggle to pay the exorbitant rates of interest that they are now compelled to pay upon the indebtedness and the high land taxes, and unless this bill is enacted it will be only a few years until agriculture is reduced to a state of peasantry.

Everyone within the sound of my voice knows the fight that I have made for a reasonable and adequate old-age pension upon such terms as will guarantee to those entitled thereto their economic freedom in their declining years. It is not necessary for me to review the record in this instance because the record speaks for itself of the fight that has been made to obtain this objective for our people. Neither is it necessary for me to call your attention to the fact that I have devoted days and weeks to the fight for the control of the flood waters on our streams, for the building of reservoirs in an effort to bring to those living in the valleys of the tributaries the same protection that is accorded to those living along the Mississippi River.

I have always made every effort to prevent the exploitation of the natural resources of our country by Wall Street controlled corporations. My fight for the development of hydroelectric energy in the White River Valley and other similar valleys of our Nation is sufficient to convince anyone that I believe that this Government must aid our people, and not the corporations, to conserve and develop the resources that we have if we are to continue to promote the best interests of our people as a whole. [Applause.]

All of these activities on the part of the Government and all of these great projects for the betterment of the living conditions of our people must and do necessarily depend upon the stability of the American homes. There can be no stability to our agricultural homes as long as the spectre of oppressive debt is hanging over those homes. I plead with you to join with us from the rural sections of our Nation in this fight to give to our people the opportunity to emancipate themselves from the crushing burden that is now theirs. By so doing we will in fact give those who want to work an opportunity to build and save their homes. We will be adding strength to the foundations of our greatest American institution, the home. [Applause.]

Mr. JONES. Mr. Chairman, I yield 8 minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Chairman, at the outset I want to pay a tribute to our colleague the gentleman from North Dakota [Mr. LEMKE] for the time, the energy, and the ability he has displayed and his consistency in trying to bring this farm-mortgage refinance bill before the House of Representatives. It was reported a year ago by the Committee on Agriculture and has been held up by the House majority and the Rules Committee. This is one of the most important bills that has come before the House in this session. It should have been brought before the House in an orderly way by the Rules Committee. You might just as well write over the door of the Rules Committee: "Abandon hope all ye who enter here", when important legislation of this kind cannot be presented for the consideration of the Members on the floor of the House of Representatives.

My views and sentiments are very much divided on this bill. I do not expect to vote for it on account of the inflationary machinery that is set up; but there is a fundamental principle in this bill that is vital that I would like to vote for because it upholds our American system, almost our American system of government founded on the ownership of private property. We cannot afford in times of depression or any other time to rob the farmers and the home-owners and make them pay such high rates of interest as 6 percent and amortization of 3 percent where they make only $800 a year with the help of all members of their families on the farms working 10 and 12 hours a day. If you want to promote communism and socialism in America, drive the farmers and the home owners out of their farms and their homes, destroy their savings; and then you will communize and socialize this country quicker than in any other way.

I would like to vote for this bill, but I cannot do it because I am firmly opposed to inflation. I propose to offer amendments which I assume will be voted down. I propose to offer an amendment for a 3-percent interest rate and then one for 2¾-percent interest rate, because we have already sold long-term bonds at 2¾ percent. I may even go to 2½ percent, but I do not propose to vote for any bill which carries, as the pending bill does in its present form, inflation to the amount of $3,000,000,000, a 50-percent increase in the currency of the United States.

What we need in America is an inflation of confidence, not an inflation of the currency. If you pass this bill, and if I were impelled only by political motives, I would like to wish this bill upon my neighbor's lap at Hyde Park with the 1½-percent interest rate and inflationary features without amendments. If I were to follow merely partisan views and wanted to hurt the Democratic Party, I would vote for this bill. Any number of people have come to me and said, "Why not vote for the bill? Pass it on to the President. Let him take the responsibility before the people. If he signed this bill in its present form, he would not carry an Eastern State." But, after all, I believe that we have a duty to perform as Members of Congress, and that duty is to legislate, to legislate honestly on the merits of the propositions presented and to the best of our ability to perfect legislation. I am one of those who voted to discharge the Committee on Rules. I did that gladly and would have voted for the rule, because I believe the time has come when the Members of Congress should legislate for themselves instead of being rubber stamps and taking orders from the "brain trust", or even from the White House. That is why I voted to bring the bill out on the floor of the House for consideration and that is why I propose, under the 5-minute rule, to offer various amendments which I hope will be discussed upon their merit and voted either up or down.

Gentlemen get up here on the floor of the House and talk in a sneering way about the great creditor class and try to make out that just a few millionaires in Wall Street are the sole creditors in the country. May I point out who the creditors are? The creditors are the American people—the wage earners and 125,000,000 consumers. They are the real creditors of this country. Eighty-five percent of all the income of the country goes to 40,000,000 wage earners who will suffer if we pass this inflationary bill. If you increase the currency by $3,000,000,000, all wage earners, consumers, people of small incomes, life-insurance policyholders, and those millions of Americans with savings accounts, disabled veterans, widows, and orphans, all will suffer financially.

Someone said that the American Federation of Labor was not for or against this bill. I do not know whether they

are or not, but I know that William Green, president of the American Federation of Labor, has repeatedly spoken against inflation. American labor is fully awake to the urgency of the situation and has expressed its stand in no uncertain terms through its president and spokesman, Mr. Green, who defined labor's attitude when he recently said:

> Labor knows that this is a problem that affects us vitally, because we know that when dollars are cheapened commodity prices rise but wages stand still. We have not forgotten how our workers in other nations in Europe suffered because it required on some occasions an amount of money that would fill a bushel basket in order to buy just an ordinary commodity.

That is still the position of the American Federation of Labor.

My main objection to the bill is if you pass this ruinous inflationary bill in its present form, recovery will be greatly retarded and business confidence destroyed. That is what is lacking in this country today. [Applause.]

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania [Mr. MORITZ].

Mr. MORITZ. Mr. Chairman, in this instance the people say to the Government, "Here are our farms—lend us $3,000,000,000", and we will pay you 1½-percent interest on the loan. We stipulate 1½ percent because we know it is impossible to pay 6 percent. Mr. Chairman, this is a fair deal. Why is it necessary to pay any interest? All the interest at one time was considered usury. It is only by custom that we countenance it now. Is not the vital question at present to help out our own citizens? Or is the vital question a matter of profit?

If our citizens are prosperous, will not the state of the Union forge onward to greater success and glory? The question often arises, What about the city home owner? Is he expected to pay 6 percent when the farmers are asked to pay only 1½ percent? There is no question but that the city dweller should have some help.

The tragedies and sorrows written over my home-town papers, for instance the Pittsburgh papers, every month for the last 4 years bespeaks this relief. Page after page of foreclosure advertisings appear monthly. It means many good citizens who aspired to be home owners have ended up in bankruptcy.

In this Frazier-Lemke bill we are marching to our first great battle against the racket control of the international bankers. This skirmish is likened to the Battle of Lexington where the shot fired that day was heard "around the world." Be assured our votes today will mark every man a friend or foe of the people.

Big interests financed by big bankers have consistently thrown into the eyes of the people the poison gas and bug-a-boo of inflation.

They would have the people believe that this is the first step of wholesale inflation as was witnessed right after the war in Germany. The truth is that the bankers have practiced inflation for years for their own benefit. Think of taking a borrower's most precious asset, his home, and in return giving the borrower only bookkeeping money and not real money.

It is about time we break up this unlawful special privilege and give the farmers, the backbone of our country, a fair deal. During the period after the war, when money seemed to be floating through the air and there was a seeming prosperity in the cities, the poor farmer, after laboring long and tirelessly on the sunbaked farms, was forced to pay high prices for his needs from the city, and the produce of his farm oftentimes could not find a market.

We read in the old law of Moses that almost every 50 years there was a tangle up of the societies' economics. Moses solved this problem by declaring a jubilee in which the mortgagee was forced to break his hold on the land and restore the land back free of encumbrances. Unless the people have access to the land there can be no real recovery. This Frazier-Lemke bill, in a mild manner, attempts to restore the land to the people who are willing to produce wealth instead of merely sitting idly by waiting for the necessary but harmful relief check. [Applause.]

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. HOLLISTER].

Mr. HOLLISTER. Mr. Chairman, I am only going to touch upon one aspect of this bill, because, manifestly, in 10 minutes it would be impossible to cover all the different points that this bill contains. I am going to speak today on the question of currency issue by the Federal Government as provided in this bill.

The gentleman from North Dakota [Mr. LEMKE], in his address today, used a great many of the arguments which we are accustomed to hear from those who wish an additional amount of currency to be issued by the Government. It is the speech that we have been accustomed to hear from the gentleman from Texas [Mr. PATMAN] on numerous occasions.

The chief points in the discussion which we hear so often are that the issuance of currency is a Federal function; that it is a function surrendered by the Congress to private bankers; that it is something of advantage to the bankers; and that other people in the country besides bankers should have the same advantage and be able to make the same use of it. I believe there is a well-known radio priest who talks along these lines every so often.

Mr. LEE of Oklahoma. Will the gentleman yield?

Mr. HOLLISTER. I am sorry I cannot yield now, but if I have time I will yield to the gentleman when I have finished.

Mr. Chairman, the sole purpose of currency is for the convenience of the people of the country in carrying on their everyday business activities. Currency will expand and contract as the needs of the country are made evident. At the time of the bank holiday the outstanding currency exceeded $7,000,000,000, because more people wanted currency to carry in their pockets than before the bank holiday. In 1929, when the business of the country, as is well known, reached probably a greater volume than ever before, and there was a theoretical prosperity to which we sometimes like to look back, the outstanding currency in the country was about a half billion dollars less than it is today. This was chiefly because more people used checking accounts, and therefore less people needed to carry currency around in their pockets. If through custom or because of other reasons more people want currency, it is available in the banks and can be issued. If the habits of the people change so that less currency is needed from day to day, that currency goes back into the banks.

The quantitative theory of money, based on the idea that as times improve more money is actually circulating, is absolutely fallacious. It is equally fallacious to think we can improve the times by putting more money into circulation. The question is entirely separate from the question as to whether or not the issuance of currency is to be done by the Government or done by private banks. If the Government should take over the banking functions of the country, if it should take over the issue of currency instead of having it done through the Federal Reserve banks as it is being done today, under Government supervision, there would still exist the same situation. There would still be the necessity for the amount of currency to be issued which the people needed to carry on their daily transactions, and the Government itself, operating these banks, would merely issue the currency that the people wanted. When people had more currency than they needed it would automatically come back.

Mr. Chairman, the understanding that currency should be put out in some arbitrary way is wrong. Even when $1 is put out, to that extent there is an arbitrary inflation of the currency. I do not mean to say by that that the effects are immediate. I do not mean to say that the issuance of $1, $1,000, $1,000,000, or even $1,000,000,000 can be traced immediately in its effect, but as soon as we depart from the

idea that currency is to be used as a convenience, as the medium of exchange for business done in this country, just to that extent we weaken the whole financial set-up.

Now, this bill provides, it is true, that Federal Reserve notes shall be put out, I suppose similar to other Federal Reserve notes. They are to be issued by the Federal Reserve Board as a branch of the Government. Let me answer here another argument which we hear from time to time, that if the Government has the right to issue a bond, which is a promise to pay, and on which it must pay interest, why should it not, instead of issuing a bond and paying interest on it, issue a piece of paper which we call a note, on which interest would not have to be paid? This argument, of course, followed to its logical conclusion means we could take some $30,000,000,000 of Federal Reserve notes or whatever you may wish to call the promise of the Government to pay, with them redeem our bonds on which we pay interest and thereby, perhaps, save ourselves almost $1,000,000,000 a year in interest. The answer, very briefly, Mr. Chairman, is this. The only way in which a government, just the same as an individual, can secure the wherewithal to pay its debts is by drawing on the wealth of the country, drawing on the accumulated resources that you and I and others may have gotten together in the past by our labors.

When the Government from day to day is spending more than it takes in, naturally, it must have to borrow this money from somebody. It does not borrow from any other country, it borrows from its own people, the same as you and I may borrow from somebody else. There is, and should be, the same relationship of debtor and creditor. If you borrow a horse from somebody for a year, you pay rent for the horse; and if you borrow a thousand dollars from somebody for a year, you pay for that thousand dollars. The Government, Mr. Chairman, is no different. If the Government hires your horse for a year, it pays you for it. If the Government hires your money for a year or more, it pays you for it, and that is a bond.

Now, the instant that the Government in paying for articles which it has to have or for services rendered, instead of borrowing from the accumulated wealth of the country, proceeds by fiat to issue a piece of paper which it compels you to take—and the compulsion may be concealed, but is nonetheless there—the instant this happens, at that instant the Government is making a forced loan, and forced loans are things which free peoples have fought against for many thousands of years. The instant you force anyone to take the promise of a government to pay, the instant it ceases to be a matter of free barter between borrower and lender whereby the Government offers you a bond on which the return is adequate to induce you to lend the accumulations of your savings to the Government—the instant you depart from that business transaction and force the person who has the money to take something which they would not freely and willingly take, that instant you have made a forced loan, and that instant the credit of the Government is impaired.

Now, I know it will be said that "Here is a Federal Reserve note. Would you not take a Federal Reserve note if the Government offered it to you?" Of course, because the only way today in which the Government gets Federal Reserve notes is by drawing them from some bank where the Government may have a credit set up in some legitimate way. The instant, however, that the Government manufactures by fiat of Congress a credit which did not arise from a legitimate transaction, the mere fact it issues against it Federal Reserve notes or issues against it any other kind of promise, that instant the Government is compelling the people of this country, even if they may not be the initial takers from the Government, to accept something which does not naturally belong in circulation, and that is the beginning of inflation.

I repeat, Mr. Chairman, that there is no group of economists we have in the country today, no group of economists the world has ever known who can tell you the exact time when you have exceeded what may be, apparently, a safe situation in the issue of additional currency. You all know what Gresham's law is. If you have two kinds of money outstanding, the more valuable will go into hiding and the less valuable, going down in value, will stay in circulation.

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. HOLLISTER. I just want to finish this thought.

I realize it will be said that one Federal Reserve note is as good as another and therefore Gresham's law would not operate. I will be asked why if the Government issues them the new ones are not just as good as the notes outstanding. You have, however, basically the same fundamental error, and that is that there is more money in circulation than is demanded by the people to carry on their ordinary activities, and when that condition is once created by Government fiat, then you have taken the first step. The evils may not be in evidence, but the evils are nonetheless there. The consequences are inexorable and can be predicted by no one. [Applause.]

I now yield to the gentleman from Oklahoma.

Mr. LEE of Oklahoma. The gentleman pointed out that the Government retires currency as it is not needed.

Mr. HOLLISTER. I did not say that the Government retired it at all. The Government does not retire it.

Mr. LEE of Oklahoma. I understood the gentleman to say that the Government retired it and only as it was needed kept it in circulation.

Mr. HOLLISTER. When not in circulation, it remains in the banks.

Mr. LEE of Oklahoma. Why cannot the Government do that as was provided in the Patman bill?

Mr. HOLLISTER. If that is sound, why cannot we buy up all the outstanding bonds with currency and retire them immediately?

Mr. LEE of Oklahoma. They are not due.

Mr. HOLLISTER. But we could call them all.

Let me analyze another statement frequently made by those who urge the issue of additional currency by the Government for one purpose or another. We hear that the bankers acquire bonds from the Government and in payment for them open up a credit on their books in favor of the Government. It is therefore argued that the banks have paid nothing for these bonds. We are then told that these same banks take these same bonds and deposit them as part security for Federal Reserve notes, the inference being that the bankers by this legerdemain have created something of value at the expense of others, and that this same something of value should be equally available to others as well as to bankers.

The first fallacy in this argument is as to the question of payment for the bonds. When the banks acquire bonds from the Government they acquire them either for resale to their own customers or for investment. If the banking system is to exist, it must be profitable. That means that the deposits of a bank's customers must be put to work earning money and this is done by lending or investing. The buying of bonds by banks from the Government is only a method by which the accumulated wealth of the country's citizens as expressed in their deposits in the banks is loaned to the Government at a time when the current revenue collections of the Government are insufficient for its needs. When the depositors need their money they draw it out, and the bank must call its loans or sell its investments.

The same thing is, of course, true of Government deposits in a bank, whether they represent a credit opened up on the books of the bank in payment for bonds, or a credit set up in some other way. In either case the Government may draw this deposit down the very next day and the bank must pay it out. As a matter of fact, the proceeds of recent sales of bonds by the Government have been to a great extent deposited, not in the banks that bought the bonds but in the Federal Reserve banks themselves.

The second fallacy in this familiar argument is the implication that the right to issue currency is of itself of actual

value, and that banks rush to deposit their bonds as security for the issue of Federal Reserve notes. As a matter of fact, the gold certificates, which were the property of the banks, and which, though not in circulation and inconvertible, are still held in the Federal Reserve banks as security for Federal Reserve notes, make up the great part of this security, and there is only a small portion of the Federal Reserve notes outstanding today which are secured by the deposits of bonds.

There is no advantage to a bank to have the right to have currency issued to it, for its sole use for this currency is to supply the convenience of its customers. It is just as profitable for a bank, which lends a man a thousand dollars, to open up a deposit for that man as it is to give him $1,000 in currency.

We thus get back to our starting point—that currency is a convenience for the use of people in trade; that the amount outstanding should never exceed that which is needed by the people generally for their daily use; and that any arbitrary issuance of it in excess of these needs is to the extent of such issue a dilution of the currency, and therefore a real inflation, though, if limited to small amounts, only inflation to a small degree. The only trouble is that no financial expert and no economist has ever been able to predict how far such a process may be followed without disastrous results, concerning which other speakers will tell you.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield 10 minutes to the gentleman from Tennessee [Mr. MITCHELL].

Mr. MITCHELL of Tennessee. Mr. Chairman, ladies and gentlemen of the Committee, I do not think there is a great deal in the proposed legislation that should seek to agitate gentlemen on either side of the House to the extent that some of our colleagues seem to be agitated as to the effect of this bill. I am glad to be a member of the Committee on Agriculture. I am glad to have worked alongside these distinguished gentlemen, some of whom favor the bill and others oppose it. Certainly it is due the House that legislation of this kind should have thoughtful consideration by the Members of the House representing our common country.

I am interested, as you are interested, in trying to help the American farmer retain his home; and I am interested, as you are interested, not to have undue inflation. I see nothing about this bill that is alarming.

I find in the bill that we now for the first time seek to do for agriculture what has already been done for other lines of business in this country. The railroads, municipalities, and corporations have refinanced their indebtedness. One-third of America are home-owning people. They are farmers, and they are the foundation stone upon which must rest the future security and prosperity of 125,000,000 people in America.

What do we propose to do in this bill? Simply use the credit of the people of the Nation. Let us not misunderstand one another. You talk about extending credit of $3,000,000,000 to do what? To help $100,000,000,000 worth of real estate in America.

What is the borrowing credit of these farms in America? I doubt if any statistician can tell what it is. A few years ago I noticed in a census report that there were $77,000,000,000 of value in the farm homes in America. A few years thereafter it seems to have been reduced in value to $33,000,000,000. That was back in 1935.

Let us be courageous. This great administration has done much in the depression to help the farmers in giving them liberal credit through the Federal land banks. We have helped all industry in an effort to make credit available to those institutions in America.

What is wrong with this bill? Not a thing. The maximum of inflation that is referred to could only be $3,000,000,000. What you are undertaking to do now is to lend a helping hand to the folks who have needed it so long and been so long neglected in America.

Mr. BARRY. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Tennessee. I yield.

Mr. BARRY. The gentleman said the maximum amount it is possible to use under this bill is $3,000,000,000. I refer the gentleman to section 17:

> This bill shall also extend to any tenant, or member of his or her family, who desires to purchase an unencumbered farm, provided he or she has lived on and operated a farm as a tenant for at least 2 years prior to the enactment of this act.

There are millions of tenant farmers in this country who can qualify.

Mr. MITCHELL of Tennessee. I understand what the gentleman is referring to. You will not have any trouble to understand that. There never was a perfect piece of legislation brought on any floor of any Congress. If this bill needs amending there are 435 sovereign, thinking lawmakers here. I would not say it is perfect. Propose your amendment, if you have it in mind. I am talking about the principle behind the measure. All you are doing is to loan money to agriculture, to the farmers of this country at 1½ percent interest.

Mr. MARTIN of Colorado. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Tennessee. I yield.

Mr. MARTIN of Colorado. Is there not a limit set at the top of page 5 of the bill in the language, "The outstanding Federal Reserve notes issued under this act shall at no time exceed $3,000,000,000"?

Mr. MITCHELL of Tennessee. That is specifically stated in the bill. It is "much ado about nothing." I think I am pretty close to the leadership on this side of the House. I have not had anybody pulling at my coattails about this bill. I think we are free and sovereign, and trying to meet and work out a constructive program to help the American people.

Mr. McFARLANE. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Tennessee. I yield.

Mr. McFARLANE. Has the gentleman heard anybody, as spokesman direct from the White House, say that the President is against this bill?

Mr. MITCHELL of Tennessee. I believe it is the best Democratic measure that could be passed, because the Democratic Party is the friend of the common people in this country. [Applause.]

Mr. BARRY. Will the gentleman yield further?

Mr. MITCHELL of Tennessee. I would yield, but I would rather see the gentleman wait until we reach the amendment stage of this bill. Some men can ask questions that a wise man cannot even answer. [Laughter.] The Bible tells about that kind. [Laughter.]

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. MITCHELL of Tennessee. I will yield to the gentleman from Kentucky, who has the unhappy faculty so often of getting on the wrong side of every proposition. [Laughter and applause.] If I could get my friend right on this bill, I would love to put my arms around him and hug him, because he is as baldheaded as I am. [Laughter.] I yield to the gentleman from Kentucky.

Mr. MAY. The trouble with the gentleman is that he has not hugged the right person. [Laughter.]

Mr. MITCHELL of Tennessee. The gentleman might not have been on the scene. [Laughter.]

Mr. MAY. I want to ask the gentleman from Tennessee, considering the testimony of the Secretary of the Treasury, a few days ago, that we will have a deficit of $6,000,000,000, Where are we going to get the money, in the language of the gentleman from Pennsylvania [Mr. RICH], to loan to the farmers?

Mr. MITCHELL of Tennessee. I appreciate, of course, when I made reference to my good friend from Kentucky, that he is a hard-working and fine Member of Congress, but you talk about the psychology of money. There is not any of us who understands it. [Laughter and applause.] I never saw a man who did, and the man who thinks he does understand money is fooled worse than anybody else. [Laughter.]

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. MITCHELL of Tennessee. Mr. Chairman, I ask unanimous consent to be permitted to extend my remarks, and I should like to include a part of this report filed by the Committee on Agriculture, pages 1 and 2.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. MITCHELL of Tennessee. Mr. Chairman, during the past 6 years the American farmer has been hard pressed for money. The bill under consideration proposes to do for the farmer exactly what every corporation, every railroad, and many municipalities in the country have already done, and that is to simply refinance the present outstanding indebtedness and to enjoy a cheaper interest rate. The indebtedness would be spread out over a long period of years and the carrying charges on the farmer's indebtedness would be commensurate with the present value of farm land and the average income which the farmer receives from the same.

The Government places itself in the role of a benefactor by loaning its credit behind the refunding operation and, in turn, receives full protection by holding a lien against the land itself. This is the best security we have in America and is the oldest and soundest basis for credit in the world.

There is nothing inflationary about the plan to save the American farmer from the bankruptcy court. It is sound common sense. It is justice to the farmers and the producers of what we eat and wear. The farmers provide for those engaged in manufacturing or commerce by purchasing the output from mills and factories.

It was not called inflation when we voted $4,800,000,000 for relief 2 years ago, and neither was it called inflation when we voted a billion five hundred million dollars a few days ago for the same purpose, but now it is called inflation if we are called upon, as this bill provides, to loan money to the farmers over a period of years with a reduced interest rate, when the maximum amount of money that can be provided for in the bill to relieve the farmers is $3,000,000,000. It is not consistent in those who oppose the bill to claim that it is inflationary. If so, it is needed and helpful inflation.

The fear I have is that the bankers and big interests will so influence the Congress as that the bill may not ultimately become the law. It is not inflation that I fear so much as deflation. The farmers in my district in Tennessee suffered greatly because of reduced farm prices, not only on their land but livestock and produce as well, from 1929 until the beginning of the New Deal legislation in 1933, which has resulted in a stimulation in prices. I hope that this may continue. One-third of the people of this Nation are engaged in work on the farm, and they produce that which feeds the remaining two-thirds of the population. Nothing would add so much to America just now as to have the farmers once again prosperous. When they are financially able, they spend money and make investments that keep the wheels of industry moving. When they cease to buy or cease to have an income, then bankruptcy overtakes industry.

This bill is not intended to increase farm indebtedness. No one should be encouraged to go into debt. The legislation proposed is to refinance outstanding farm mortgages at low rates of interest and so extend the indebtedness that the farmer can keep his home for himself, his wife, and children, and not suffer them and him to be cast out by the collector. No farm debts are increased because of the bill, but it will come to the relief of worthy farm people who are engaged in the all-important industry of agriculture. There are too many opportunities for the farmer to get in debt now, and what we seek to do by this bill is to get him out of debt.

The bankers and money sharks have had him and his earning capacity under mortgage for all too many years in the past. The farmer has been forced to work for the bankers and money interests longer than Jacob served for Rachel. He has been in bondage long enough; and while this bill may not lead him into the "promised land", it will lighten his burdens and reduce his interest rate and enable him to pay his debts and to keep his home and farm. This duty we owe the producers of the wealth of this country. Then, and not until then, will they acquire buying power and be enabled to go on the market and take part in business activity and in the restoration of prosperity to all classes of people. There has been but slight decline in farm indebtedness since 1928. The drop in farm-commodity prices brought about the destruction of many farmers. With a reduction in prices of farm products likewise came a reduction in farm values. Federal land banks have helped some, but they have not been adequate to care for the situation. Many legislatures have passed laws declaring a moratorium on debts to prevent the farmers from being sold out under the hammer and more of our people thus seeking shelter in charitable institutions. The passage of this measure will help to rid the country of bread lines. It will give a new faith and a new hope to agriculture, and the farmer can work with the assurance that his home can be kept from foreclosure and that his family may be made secure in the years to come. Surely there is nothing inflationary about making a happy and contented rural population in this country. Alone is their security for the United States when we have a contented farming people. No other people on earth work such long hours as do the farmers. They have no vacation, winter or summer, but theirs is a 7-day-a-week work proposition in many instances and with 14 hours per day as the average day's toil, without any fixed or guaranteed income. They are subject to droughts, storms, and pestilences. They are subject, in the sale of their commodities, to the speculator and the gambler. If they are to continue to pay tribute to the bankers and money changers, then their days are numbered. The farmers have been overwhelmed by conditions for which they were not responsible, and they have exhausted their resources. They are loath to permit their homes to be taken away from them and to see their loved ones sacrificed because of insolvency and foreclosures. The farmers believe in living up to their contract, and they believe in keeping their promises and their obligations. They are loyal to their country. They keep and preserve its laws. Along with this, surely the Government can lend him a helping hand and help rescue his wife and children from bankruptcy.

If he is thrown out of his home and put on the cold charity of the world, he becomes despondent and broods over his losses and loses confidence in his country and its flag. He becomes resentful and is no longer in love with the institutions that he formerly cherished and fought for. Despair and desolation will drive any of us to desperation. Those who eat the bread of the American farmer owe it to him to be willing to share his burden so as to bring about better conditions for him and make his home life more pleasant and reestablish him and his family in society on a basis of decent, bountiful, intelligent, and religious citizenship.

The things the farmer must buy have risen in value to a greater extent than have the prices increased on his farm products. No one can dispute this. Likewise his taxes have increased and during all this time the farmers, while going through bankruptcy and foreclosure, have been called upon to pay their taxes in increased amounts to help feed the unemployed and to furnish relief to 10,000,000 of our folks who are not farmers but are dependent upon Government bounty and Government doles.

This bill provides that farm indebtedness may be refinanced through the use of existing governmental machinery at an interest rate of 1½ percent and the further payment of 1½ percent annually to amortize or pay the loan incurred. It will require 47 years to pay such indebtedness, and during this time the debtor would make a yearly payment of $30 on the principal for each $1,000 borrowed. Provision is made to issue bonds which will be secured by first mortgages on the farm lands of the country. The bill has been approved by the national farm organizations in practically every State of the Union. It has been endorsed by the leaders of the Veterans of Foreign Wars and by the American Federation of Labor and by the National Union for Social Justice. It has also been endorsed by 29 State legislatures that have petitioned Congress to pass the bill, including my own State of Tennessee. Our people want this legislation passed dur-

ing the present session of Congress. The realization of their hopes should not longer be delayed. The best interest of America will be served when the bill is passed and the tenure of the Democratic Party in power at Washington will be assured so long as beneficial legislation of this type is written into law.

Mr. DOXEY. Mr. Chairman, I yield to the gentleman from Michigan [Mr. DINGELL] 15 minutes.

Mr. DINGELL. Mr. Chairman, as a Representative of the Fifteenth District of Michigan, which is composed of an element entirely urban, I desire while discussing H. R. 2066, known as the Frazier-Lemke bill, to make clear that I am not assuming a narrow or provincial attitude.

I am mindful that the benefits of this bill are intended solely for the farmer. I have proved my friendship toward the farmer by voting for every measure intended to grant him relief, and shall continue to do so in the future.

Moreover, Mr. Chairman, I have been on the firing line with my old friend, Tom Howard, of the Farmers' Union, doing everything possible for the benefit of the farmer, a long time before I came to Congress.

Let me first analyze the objectives and intended benefits of this bill. Its primary objective is the inflation of the currency system in an amount of at least $3,000,000,000. As I look upon and interpret section 9, it is quite apparent that considerable latitude is allowed above the figure of $3,000,000,000 contained in section 7.

I am not at all opposed to the bill because I fear controlled inflation. On the contrary, I believe in an elastic currency system which will meet the needs of the people. The wealth of this Nation as represented by its farm lands is sufficient to justify the amount, if it is found necessary. Over and above that, the Treasury of the United States has in its vaults at the present time an unprecedented amount of gold which might be used to secure any issue of additional currency. Thus even the gold adherents need not fear this phase of the bill.

The question, however, of necessity must be definitely proved before I can subscribe to inflation. In this instance inflation is absolutely necessary to the successful carrying out of the terms of the bill. Without it the bill is a rank failure, and its proponents know as much.

It is significant that the American Federation of Labor voices its opposition to the Frazier-Lemke bill. The liberal president of this great organization, Mr. William Green, contends that the inflationary provision of the bill would increase the cost of living and decrease the purchasing power of the wage earner.

The bill provides a smoke screen for the issuance of bonds which can be sold, but the bill further provides under section 7 that in case all of said farm-loan bonds are not readily purchased, then the Land Bank Commissioner shall present the remainder to the Federal Reserve Board and the Board shall forthwith cause to be issued and delivered to the Land Bank Commissioner Federal Reserve notes in an amount equal to the par value of such bonds as are presented to it.

The reason this provision is inserted is because the proponents of this bill know that the extremely liberal appraisal of land values, of such farms as are under mortgage and subject to the terms of the bill, will, in itself, impair the marketability of such bonds. Add to this the fact that bonds will be issued for a period of 47 years, the long pull being a further risk because the life of the bonds exceeds the normal life expectancy of the borrower. At the present time the life expectancy, according to the 1930 census of Commerce Department, is 59 years. So it is evident that when a farmer, not less than 21 years of age, applies for refinancing of his farm under the terms of this bill, he would be 68 years old at the time he completes his payments. This exceeds the normal span of life by 9 years. Taking as an example an older farmer applying for such a loan, the excess of years beyond his normal expectancy of life is correspondingly increased.

The drawback to the sale of the bonds is not confined to the long pull or the character risk. The lack of attraction will be further accentuated by the low return and lack of guaranty of the Government of the principal and interest. The request in the form of legislation for guaranty of principal and interest will come later.

The bonds, if secured by mortgages on farms, are to pay interest at the rate of 1½ percent per annum, and a similar amount to reduce the principal payment, making a total of 3 percent, payable annually.

I shall not deal here with the chattel mortgages on livestock. The weakness in that connection is about on a par with the basic provision of the act.

Many very sincere people have become interested in this bill because the proponents of the measure have very skillfully sold the idea that it is intended to relieve the distress among the farmers. That is only part of the bill, and certainly no one would object to that. The bill, however, provides for the refinancing of all farm mortgages. It does not take into account the ability or the inability of a rich farmer to pay his contractual obligation to the holder of his mortgage. The bill makes no distinction between a large incorporated farm and a small, individual-owned farm. In fact, all that is necessary for a farmer to refinance, and to benefit by the scaling down of the amount that he owes, is to apply to the agency of the Government established for the purpose of making these loans.

Members of this House, whether from rural communities or from the cities, cannot justify their action if they vote for this bill as it stands because it is unjust and one-sided. A farmer who is able to meet his principal and interest payments and who is otherwise prosperous is not in need of any relief. Members residing in the cities cannot justify their vote for this bill because there are thousands of mortgages held by poor, hard-working citizens who have suffered as much or more than did the farmer. I have never seen nor heard of bread lines on the farms, nor a farmer starving to death, but I have seen bread lines and starvation among the workingmen in the cities.

Why is it that these great humanitarian proponents of this measure did not include the city dweller in their plan of relief from high interest rates?

I insist that there be no favoritism shown. The man in the city should and must be included before I could vote for this bill.

Why is it that the proponents of this bill did not see fit to provide for a means test? This House under President Roosevelt has been extremely liberal and a means test could be provided which would square with the liberal view of the Members. According to this bill, however, the only means test is that a prospective applicant for these low refinancing rates must be a farmer and no other qualifications are necessary. He need not be in distress. In fact, he may be prosperous. He may be able to meet his interest and principal payments. That would make no difference. He would be entitled to refinance his mortgage regardless of his financial condition or character.

As I view this bill, such indiscriminate refinancing, using the $3,000,000,000 as a revolving fund to refinance approximately $9,000,000,000 of farm mortgages—only a part of which could be classed as distress cases—would work a tremendous hardship upon thousands of individual mortgage holders residing in the cities.

For example, let us assume that a laborer named Smith, living in my district, working in a brass foundry or an automobile plant, over a period of years saved $5,000 with which to educate his son. Laborer Smith goes to his banker where his savings are on deposit and drawing interest at the rate of 2½ percent. He tells his banker that he would like to invest this $5,000 life's savings in some reasonably safe security. His banker takes out the portfolio containing mortgages and discovers a farm mortgage held by the bank in the amount of $5,000 at 6 percent. For a nominal commission the banker sells Laborer Smith the mortgage. It is to produce $300 in interest per year, which might pay the tuition of his son.

Upon the passage of this bill this farm mortgage becomes subject to refinancing. Although the farmer may be

prosperous and quite able to meet his principal and interest payments, he goes to his new mortgage holder, Laborer Smith, and says to him: "I demand that you scale down the $5,000 which I borrowed originally to $4,000, and that you agree to accept 1½ percent per annum in interest and extend my payments from 3 years to 47 years, or I shall have to go to the Government and obtain the money with which to pay you off."

The proponents of this bill argue that there is no injustice, in that Laborer Smith will get his money if he does not accept the proposal, and that he can immediately reinvest it. That contention is either deliberate misrepresentation of fact or gross ignorance. With billions of farm mortgages ultimately placed in the hands of the Government, the investment market cannot possibly absorb any investments of this nature at a rate higher than that which prevails, which would be 1½ percent. In other words, there will be a common level established except in extremely speculative investments. The interest rates will be at or about 1½ percent; and on this score let me say I have no objection to reduced interest rates, but it must not be at the expense of the unfortunate individual mortgageholder who resides in the city.

Moreover, I must insist that any plan proposed to relieve the farmer must at the same time include the urban population in my district. I cannot allow that Laborer Smith should lose $1,000 in cash by scaling down and reducing the earning power of $5,000 from $300 in interest per annum to $60. It is unfair to cause him a deliberate loss of $240 per annum. This means the difference between an education and no education for the son of Laborer Smith.

Now let us analyze the situation as it applies to banks, insurance, and trust companies. We remember the tragic days of the national bank holiday, when thousands of our banks were closed; when millions of depositors faced the total loss of their life's earnings, which at a great sacrifice they put aside for a rainy day. I hold no brief for the banker. I was extremely critical of the banker, because I contend that he was, by his negligence and short-sightedness, to a great extent responsible for the impairment of the bank structure of this Nation. The heroic efforts of this administration, however, have placed the banks on a sound and sure footing once again.

In the 3½ years of the Roosevelt administration the total number of bank failures approximate the number of bank failures in 1 day under Mr. Hoover's administration, and of these not one dollar of loss was sustained by the depositor. We do not want to create a condition which will wreck the banks and destroy the deposits of our people. We most certainly would not permit the impairment, much less the destruction, of the insurance companies. While the insurance companies are great corporations, they are as a general rule mutually owned and belong to the policyholders.

I am told by the proponents that the insurance companies have no objection to the Frazier-Lemke bill. Some people even believe the insurance companies expect to be bailed out with this printing-press money. That is not so. Insurance companies are positively opposed to it, and it is not due to selfishness on their part or narrowness of viewpoint, but because insurance companies know it will destroy the equities of policyholders and the earning power of their investments.

There are approximately 63,000,000 persons in the United States holding one or more insurance policies, which makes a total of approximately 128,000,000 life-insurance policies in force. Taking into account the beneficiaries of these policyholders, it is estimated that the number of individuals protected by life insurance in the United States is about 94,000,000.

During 1935, Americans purchased approximately fourteen billion five hundred million of new life-insurance protection from United States legal-reserve companies. This is 1.5 percent more than in 1934. There is a notable extension of life-insurance companies' stewardship. At the end of 1935 the total amount of insurance in force reached the staggering amount of $101,000,000,000. These figures were gathered from a statement made before the Association of Life Insurance Presidents at New York in 1935. There are approximately 32,779,000 people living on farms, and approximately 6,812,350 farm operators, according to the census of the Agricultural Department on January 1, 1936.

So that for every farmer who might benefit under the terms of this bill, regardless of whether he needs assistance or not, three policyholders will be either wiped out or their equities dangerously reduced. Many insurance companies will certainly go to the wall and the policyholders will sustain the loss.

Thus the plan of a provident father and husband to secure the future of his loved ones will be destroyed. Widows and orphans, many of the latter not yet born, will suffer because of the iniquitous provisions of this bill. For the same reason trust companies as legal trustees for estates, large and small, will sustain severe losses or be likewise wiped out.

This week of May 11 to the 16th is life-insurance week. An Associated Press dispatch from New York dated May 9 places the admitted assets of all life-insurance companies of the country as of December 31, 1935, at $23,828,173,000, the highest on record. This is a gain in the asset level of around $2,000,000,000 over the years 1932 and 1933.

The assets of the same life-insurance companies in 1929 amounted to $17,482,308,607.

It is interesting to note that during the six depression years these companies paid out to policyholders and beneficiaries approximately $18,200,000,000, or the equivalent of $10,000,000 each business day for that period.

In the face of such forceful facts, are we going to undermine these companies which have had a stabilizing effect upon business and employment? Are we not aware of the fact that these companies are for the most part mutual and as such owned by the policyholders who live in the cities and on farms?

Because of the interest of the National Union for Social Justice in this bill, I have given a great deal of time and study before making my decision to oppose it. My course is clearly defined. I will vote as my conscience dictates.

I cannot reconcile myself to support a bill of this kind because it is unfair to my people, because it will destroy more than it will produce, because it favors the farm element and discriminates against the man in the city, because it makes no distinction between the farmer in distress and the prosperous farmer.

When we passed the Home Owners' Loan Act for the relief of the home owners, a definite means test was provided. It was specifically stated that relief was intended for only those in distress, and it cannot rightfully or truthfully be stated that the farm element as a whole is in distress.

If $9,000,000,000 of farm mortgages are to be refinanced at 1½-percent interest, I contend that twenty-one billions in home mortgages throughout the United States must also be refinanced at the same time and at the same rate of interest.

Is there a man on this floor, a Representative of either a city or farm district, who can justify the asinine provisions of section 17, which states as follows?—

> The benefits of this act shall also extend to any farmer, or member of his family, who lost his or her farm through indebtedness or mortgage foreclosure since 1921, and who desires to purchase part or all of the farm lost or another like farm. It shall also extend to any tenant or member of his or her family who desires to purchase an encumbered farm, provided he or she has lived on and operated a farm as a tenant for at least 2 years prior to the enactment of this act.

Under the terms of this section a farmer who lost his farm through indebtedness or mortgage foreclosure at any time since 1921 can repurchase either the whole of that farm or perhaps the choicest part thereof, or, if he lost this farm willfully because he did not want it, he can obtain one of like value in that or another locality. Uncle Sam will finance Mr. Farmer with no questions asked.

This section further provides that the loaning facilities of this Government agency shall be available to any tenant farmer so that he can acquire by purchase an encumbered farm. The only qualification in addition to an expressed

desire is that he shall have operated a farm as a tenant for at least 2 years prior to the enactment of this act. The question of his character, credit rating, or any other reasonable qualification is not even mentioned or provided for. Bonds founded upon such a basis cannot attract capital. These loans cannot be financed by bonds sold in the open market. There is no assurance in the deal. Your Uncle Sammy would have to guarantee the bonds or make them eligible as backing for printing-press money. In either case the taxpayer will be the goat.

Why not permit the people of my district who have lost their homes since 1921 the privilege of repurchasing their homes, or any part thereof, or another like home, as provided in this section for the benefit of the farmer?

I have been an advocate of low interest rates for the home owner and for the farm owner, particularly during these times, when through no fault of their own, urban and rural citizens find themselves in distress. It is my contention that the only agency able to grant relief is the Government, and I am willing to support any reasonable measure which will relieve all those in distress.

The liberality of this House has been shown repeatedly. The farmers have been the special beneficiaries. Under the Federal Farm Loan Act and the Farm Credit Act of 1935, we passed legislation providing for loans on farm mortgages at the rate of 3½ percent. The law about to expire was again extended for a period of 2 years under the terms of the bill H. R. 10101, introduced by Mr. GILLETTE, of Iowa. Contrast this rate of 3½ percent with 5 and 6 percent being paid by the people in the cities. We must first provide relief for the workingman in the city by reducing the interest rate which he is called upon to pay.

I cannot and I will not, under any circumstances, support a bill which without any means test whatsoever will aid a prosperous farmer at the expense of the people in the cities. I will not destroy the equities held in trust by insurance companies and trust companies upon which the widows and children of provident husbands and fathers, who worked hard to establish them, are dependent. I will take no part in any move, legal or otherwise, which will undermine and destroy the bank structure of this country, thus wiping out the savings of millions of our citizens.

Mr. Chairman, it is my contention that it is not necessary to refinance the mortgages of any individual, be he a farmer or a resident of a city, who is capable of meeting his just obligations.

The provisions of this bill will revolutionize the entire scheme of life in this country, and I am certain that if the people are brought about to understand the pernicious provisions of this measure they will express themselves in opposition in such a way as to be thoroughly understood by those who have been erroneously led to support it.

During the period of agitation conducted by a small group of Members, who are not responsible to this administration nor to any responsible party, I was approached by Edward E. Kennedy, secretary of the Farmers' Union, by Messrs. Collins and Ward, representing the National Union for Social Justice, and likewise by Mr. LEMKE, the father of the bill. We conferred in my office, we lunched together and discussed the provisions of this bill. There has been no concrete argument produced which could convince me of the righteousness of this measure.

I was opposed to signing the petition to discharge the committee for various reasons. The first reason, but not the determining one, was because the bill had been favorably reported by the Agriculture Committee, and this is the first time in the history of Congress that the "blasting process" had been applied after a committee having jurisdiction reported such bill favorably. The chairman of such committee could have requested a rule and thus made the consideration of said bill in order. I was opposed to signing the petition on the grounds that the bill was a fake, that it was unfair, that it was destructive, that it would do infinitely more harm than good, and in addition the bill plays one element, the farmer, as a favorite against and at the expense of another element, the city dweller.

I agreed in the final analysis to sign the petition in order to give the bill a hearing, to show it up in all its comic raiment; but I specifically reserved the right to vote against it and to do everything legitimately possible to bring about its defeat. These Representatives whom I mention understood and readily admit the correctness of this statement.

Accordingly I have notified a number of my constituents who have written me in the premises, and who asked me to vote for the bill, that I could not agree to do so. I informed my correspondents, who are voters in my district, precisely how I feel about the measure, as I would not under any circumstances mislead them. Thus no registered voter in my district need labor under a misapprehension as to where I stand nor be misled in order that I may get his vote.

If this bill is amended to include the distressed home owners residing in the cities and in the country towns, and if the means test of actual distress is provided for in the bill, and the bond method of financing similar to the plan provided for in the Home Owners' Loan Act stipulated in this measure, I shall be most happy to support it. I will not, however, lend my support to this bill and thus destroy the banks, the insurance companies, the trust companies, and the savings and investments of millions upon millions of hard-working urban citizens, and much less would I permit the wiping out of the equities of the widows and orphans.

Anyone who advocates relief of a farmer according to the terms of this bill must think that my district is composed of a lot of uninformed rubes. The bill as now written is a sham and hoax. It must be defeated. [Applause.]

Mr. BOILEAU. Mr. Chairman, in behalf of the gentleman from North Dakota, I yield 10 minutes to the gentleman from Mississippi [Mr. RANKIN].

Mr. RANKIN. Mr. Chairman, I first wish to answer the gentleman from North Carolina [Mr. COOLEY], who, in his opening remarks, referred to this measure as a Republican bill, simply because the gentleman from North Dakota, Mr. LEMKE, who introduced it, happens to be a Progressive Republican. In answer to the gentleman from North Carolina, I desire to say that we who are supporting this measure are just as good Democrats as he is, and, coming from the State of Mississippi, I think I would probably have the last word, as my State has always gone Democratic and his went Republican in 1928. [Laughter.]

Besides that, Mr. Chairman, the author of this measure supported Franklin D. Roosevelt in 1932, stumped his home State of North Dakota for Roosevelt, and helped to carry it for him by an overwhelming majority; and no one has shown that the President is opposed to this bill.

Personally, I have no apologies to make to any man for supporting legislation that is sponsored by a Progressive Republican, when I know that it is right and in the interest of the distressed farmers of this country.

In the greatest fight in which I have engaged since I have been a Member of this House, and the one that probably meant more to the toiling millions of this world than any other battle I have gone through, was the struggle for the creation of the Tennessee Valley Authority, which is by far the outstanding accomplishment of the Roosevelt administration. In that contest I was carrying on at this end of the Capitol the same fight that was being waged in the Senate by Senator GEORGE W. NORRIS, of Nebraska, a Progressive Republican, and one of the best friends the common people of America ever had in either public or private life. [Applause.]

He was the author of the bill to create the T. V. A. He introduced it in the Senate and I introduced it in the House. That is why it is referred to as the Norris-Rankin bill. Without him and his untiring efforts at the other end of the Capitol we never could have passed such a measure. I went through that battle with him, and, as you Members know, if it had not been for my efforts here in the House section 12 of that measure would have been left out and the people in the T. V. A. area never could have enjoyed the full benefits of cheap electricity from Muscle Shoals, nor would any other dams have been built. It would have meant the

death knell of rural electrification so far as this generation is concerned.

I was glad to work with a Progressive Republican for the benefit of my people then, and I am glad to do it now. The farmers in my district are practically all Democrats, but they expect me to support legislation that will benefit them and help to save their homes, whether it is introduced by a Progressive Republican or a Progressive Democrat, for nothing that will do the farmers any good will ever come from the Old Guard reactionaries in either party.

The gentleman from Maryland [Mr. LEWIS] referred to this bill as wild, radical, and fantastic, and following in the wake of Germany. Why, the gentleman from Maryland [Mr. LEWIS] has been one of the chief sponsors of what is known as the Guffey coal bill, one of the most fantastic, wild, and unconstitutional measures that has ever passed the American Congress—one that would pile upon the backs of the consumers of coal in this country millions and millions of dollars in extra costs of coal to keep them warm. Instead of following Germany, that was probably following in the wake of Russia. [Applause.]

If the gentleman from Maryland could support that wild and unconstitutional measure to help the coal industry, he certainly ought to be able to support this sane, reasonable, and constitutional measure to help the farmers.

I am supporting this legislation for the simple reason that the farmers I represent, as well as the farmers of the whole country, are in dire distress. Their homes are being sold from under them and they are driven from the land. People who own some of the richest farm land in America are being driven from their homes today by foreclosures—driven from homes their people have occupied for 100 years—driven from their homes in crop time, when their wheat, corn, cotton, and other crops are in the field. Not only are they notified that they must leave, but they cannot even repurchase the land or rent it for another year—although it is often resold on credit to others for less than the real owner owes on it, and is willing to pay if given time and opportunity to do so.

They preach to us about the prosperous condition of the farmer, and the high prices of wheat, and corn, and cotton. Listen to this, you Democrats from agricultural districts: Wheat, and corn, and cotton prices are lower today than they were during the Taft administration, when the people rebelled in 1912 and drove that administration from power.

Yet the farmer's taxes have multiplied three, four, or five times since 1912, and everything he has to buy has increased in price in proportion since those days. Yet when he asks for this legislation, men who have voted to appropriate billions for relief, a large portion of which goes to people who are not even American citizens, denounce this legislation and try to stir up partisan prejudice against it. These farmers are Americans, let me remind you. [Applause.]

They are the ones who fight the Nation's battles in times of war and sustain its institutions in times of peace. You deny them this relief and yet vote money to take care of 1,500,000 aliens who are not American citizens, and have never tried to become American citizens, and the children of these farmers are going to have to help pay the bill.

Notwithstanding this, some of you arise and point out little discrepancies in the bill. You can amend this measure if you want to, and I will help you amend it, for I am not altogether satisfied with it in its present form. But 6,000,000 farmers in this country are appealing to us for help, and this is the only bill we have before us at this time that reaches their trouble. It is open to amendments to correct anything that is wrong with it. So do not vote to kill it and then try to make your farmers believe you did so because of some feature which you can correct by amendment if you really are sincere in your desire to do something for the farmers.

Mr. BARRY. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. Yes; I yield.

Mr. BARRY. Is the gentleman conscious that there are other distressed groups?

Mr. RANKIN. Yes, and let me say to the gentleman from New York [Mr. BARRY] that we have poured more money into their hands than we ever gave the farmers of this country. The gentleman from New York, and others who train with him, are perfectly willing to take money out of the Treasury and give it to aliens in their own districts, but are unwilling to vote this aid to farmers for fear it will raise the prices of the things the farmers have to sell, although it will not cost the taxpayers of the country a nickel. They do not want to pay them what their produce is worth.

Now, Mr. Chairman, let me tell the gentleman from New York another thing. We have heard a great deal about the wolves of Wall Street, but it does not matter to the farmer whether he is skinned by the wolves of Wall Street or torn to shreds by the tigers of Tammany. Nor does it matter to him whether this legislation is defeated by petrified Democrats or putrified Republicans, he and his children will pay the penalty. [Applause.]

I would very much prefer to be caught voting for this measure in company with a few Progressive Republicans, than to be caught voting against it with the old reactionary Republicans, every single one of whom will vote "no!"—and lick their lips. [Laughter.]

Oh, but they say this will mean "uncontrolled inflation", which is nonsense, pure and simple. It will simply mean the possibility of a reasonable, controlled expansion of the currency, which cannot exceed $3,000,000,000, without the imposition of a single dollar for extra taxes. But it would raise the prices of wheat and corn and cotton and hogs, and cattle and land, and lumber and labor, and hay and vegetables, dairy products, and everything else the farmer produces, and make it possible for the farmers to live and pay their debts and taxes.

This same condition confronted Abraham Lincoln during the Civil War. He issued $346,000,000 of United States currency, which is still in circulation and on which we have saved $11,000,000,000 in interest since that war closed, and have not been taxed a dollar to redeem that currency.

They talk about the gold standard; we have enough gold to issue about four times the amount of money at present in circulation, without in any way impairing our gold reserve—if we were really on a gold standard. With $8,000,000,000 in gold, which we have at the present time, with a gold coverage requirement of 40 percent under the Federal Reserve Act, our present supply of gold would support a currency of $20,000,000,000, whereas today we have considerably less than $6,000,000,000 of currency in circulation.

As I have shown before, we have had inflation or expansion of the currency before. I wonder where the gentlemen who have been criticizing this proposition were from 1914 to 1920? In 1914 we had in circulation in this country $34.93 per capita. Cotton and wheat and corn were at the same prices they are now. Then we inflated or expanded the currency through the Federal Reserve System—almost the same proposition as that contained in the measure pending before us. By 1920 the per-capita circulation was $53.21. We had expanded through the Federal Reserve banks from $34.93 per capita in 1914 to $53.21 per capita in 1920. It was profitable for the big Wall Street banks to inflate then. They would do so now if the same profits were in sight.

What was the result? You remember the effect it had on the price of raw materials? Cotton went from 11 cents to 30 cents a pound; wheat went from 90 cents to $2.50 a bushel; corn, hogs, land, labor, lumber, and other raw materials went up in proportion; and for a time the farmers were prosperous. On those price levels we not only contracted debts but we fixed our tax rates, our wage scale, and our standards of living. Then in 1926 they squeezed the currency, contracted it, and drove prices down, and are now demanding that these farmers pay debts that were contracted and taxes that were levied on a basis of 30-cent cotton and $2.50 wheat with 11-cent cotton and 90-cent wheat. It cannot be done.

This bill will give them relief. It will raise the prices of farm products to their normal levels and restore the prosperity of the people who till the soil. It will restore their purchasing power, enable them to pay what they owe and buy the things they need. That will start the wheels of industry, relieve unemployment without taking money out of the Treasury to do so, and in that way restore prosperity throughout the whole country. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. JONES. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. BARRY].

Mr. BARRY. Mr. Chairman, may I say to my colleague from Mississippi that although I am wearing stripes today I do not happen to be one of the Tammany Tigers.

Mr. Chairman, I yield to no one in my desire to see legislation enacted that is in the interest of social justice. During my short time as a Member of this House I have supported and voted for every measure that I believed was in the interest of the distressed people of our country, regardless of what group or class they belonged to.

The Frazier-Lemke farm bill has been heralded for a long time as an important social-justice measure. For that reason I have probably given it more consideration than I have any other piece of legislation this session.

I have examined it with the principle in mind that justice means "giving to everyone the same advantage, privilege, or consideration as is given to any other", and I regret to say that my conclusion, aside from the question of whether or not the method of raising the money under this bill is sound, is that it is one of the most unjust pieces of class legislation that has ever been proposed in Congress. It is not only class legislation, but in view of the financial condition of our country, it practically precludes the distressed people of 75 percent of our population from receiving any further help from Congress.

For instance, there are many more millions of home owners in the United States than there are farmers, and they have a mortgage indebtedness three times as great as that of the farmers, and they have just as much right to help as the farmer has. In fact, at the present time the farmer can borrow money at 3½-percent interest while the best the home owner can get is 5 percent. If anyone has a claim for further relief it is the latter.

I have discussed the injustice of this situation with some of the sponsors of the Frazier-Lemke bill. They lamely tell me that after their measure is passed they will support a similar measure for the home owners. When one considers that this bill provides for only approximately a third of the outstanding farm mortgages and that a similar measure for a third of the outstanding mortgages on homes would require an additional appropriation of $7,000,000,000, their position is absurd and untenable.

I further contend in connection with the amount of money required for this legislation that section 17 of the bill, which permits any farmer or any surviving relative who lost a farm since 1921 as well as any person who never owned a farm but who operated one for any 2 years prior to the enactment of the Frazier-Lemke bill to obtain money to buy a farm, makes it possible to spend the entire $3,000,000,000 without refinancing any farm mortgages at all. Nobody knows how many people are eligible to qualify under that section.

I represent a district containing approximately 1,000,000 people. At least 85 percent of them live in one-family homes. During the past 4 years over 100,000 of them have lost their homes as a result of foreclosure. Despite the good work of the Home Owners' Loan Corporation the percentage of foreclosures in 1935 decreased but slightly.

I have stated that I will support this measure if it is amended so as to give the same benefits to the home owners as it does to farmers, and I will if it is so amended. However, I have been informed that in all probability such an amendment will not be germane. If subsequent events prove that to be the fact, I will consider my vote for this bill or that of any Representative from an urban center a betrayal of the people we represent. [Applause.]

Mr. BOILEAU. Will the gentleman yield?

Mr. BARRY. I yield to the gentleman from Wisconsin.

Mr. BOILEAU. Who made the promise to the gentleman that someone would introduce legislation along the line the gentleman has just suggested?

Mr. BARRY. The gentleman from North Dakota [Mr. LEMKE] told me if I proposed such an amendment he would not oppose it. The gentleman from North Dakota [Mr. BURDICK], with whom I spoke the other day, told me if this goes through there will be a hue and cry from the home owners and we are bound to get such legislation.

Mr. BOILEAU. The gentleman from North Dakota said he would not oppose it. That is an entirely different matter from sponsoring such legislation.

Mr. BARRY. He told me he would support legislation for the home owners.

Mr. LEMKE. I told the gentleman I would support the legislation of home owners and would support them all in the future regardless of where they were located, whether in the city or out on the farm, but suggested that the gentlemen who are so interested in the home owners should themselves introduce further legislation.

Mr. BARRY. May I say that during the first or second week of this session I introduced a bill to reduce the interest charged by the H. O. L. C. to 3½ percent, and I introduced a second bill to give the owners in the H. O. L. C. a moratorium for 1 year.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield such time to the gentleman from Nebraska [Mr. STEFAN] as he may desire.

Mr. STEFAN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD at this point and to include therein a brief table on farm imports.

The CHAIRMAN (Mr. BLAND). Is there objection to the request of the gentleman from Nebraska?

Mr. MAVERICK. Mr. Chairman, reserving the right to object, is the gentleman going to extend his remarks on the Frazier-Lemke bill?

Mr. STEFAN. Yes.

The CHAIRMAN. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. STEFAN. Mr. Chairman, the bill we have under consideration today is of great importance to the people in the Third Congressional District of Nebraska, which I have the honor to represent. The State Senate of Nebraska and the Nebraska House of Representatives have endorsed this bill by resolutions sent to me. More than 30 other State legislatures have endorsed it. I have hundreds of letters from farmers in my district asking that the bill be passed. I feel that a majority of people in my district want this kind of legislation passed by this Congress. Many businessmen, and even some bankers, have told me they favor the passage of a lower-interest-rate measure for farm-mortgage refinancing. Laboring men who realize that they cannot hope to secure steady employment unless the farmer is successful also demand that this legislation be passed.

I feel that unless farmers secure a lower rate of interest to refinance the mortgages on their homes, the future of the American farmer is doomed. Farm income has dropped from around $19,000,000,000 in 1920 to around seven billion in 1936. Farm-land values have declined over 32 percent; nearly half of the farms in my State are not owned by the farmers who work on those farms; hundreds of farmers are on the relief rolls because they lost their farms because they could not refinance the mortgages; the amount offered to our farmers by the regular Government lending agencies is far under the amount of the mortgages.

Farmers are unable to borrow the difference between what the Government will loan them today and the total of the mortgage held by the loan companies. As a result there are many foreclosures, and farmers are being driven off

their farms and away from their homes by the thousands. A refinancing of these farm mortgages at a low rate of interest with a long time in which to pay will relieve this situation. There is no other remedy to this problem, in my opinion. There is no other real farm relief offered today. Unless this bill is passed and enacted into law the present farm problem will never be solved.

Loans have been made to private industry, to the railroads, to the private shipping industry, to banks and corporations in order to refinance their business in order to keep it from collapse; private banks loan money at very low rates of interest to packers and other industry. But the farm industry is neglected. Unless it is saved from its present plight, the collapse of the farming business is very near. Unless something is done immediately, we will have a country of tenant farmers working for loan companies who hold the mortgages or who eventually will own all of the farms of our land. Individual ownership of these farms by the farmers who work the land is the only answer to future prosperity in this country. A refinancing of these mortgages at a low rate of interest is the only answer to this problem.

Mr. Chairman, the happiest farmers are those who have individual liberty and own their own land. They look to the future in order to raise happy families and to lay by for a rainy day and to provide a start in life for the future generation. Let us give them the same opportunity to do that as our pioneers had when they plowed up the raw prairie and made it bloom with the fruits of Mother Earth. Today there is slavery on our farms. Men and women who have been digging a living for our country out of the ground are penniless. They are being driven from their homes by foreclosures to seek charity on the relief rolls in the towns and cities of our country.

Under the provisions of this bill these farmers are not asking for charity. They are asking the Government to loan them money with which to pay their debts. They want the same opportunity to borrow money from their Government as is given to more power industry. They want to pay that money back at a lower rate of interest. Their Government will not be giving them charity. They will give their Government the best security in the world for these loans—land; good land—from which the world's living comes. The Government will be making money in this venture. It will be securing interest on this loan, which is backed by the best security in the world—land.

Private industry will never continue to be prosperous until the farmer is prosperous. I have called attention of this great body of representatives several times that no town or city will ever continue to be prosperous unless the farmer is given an opportunity to get the same advantages from his business as is given to the businessman in the town. The merchants demand a fair return on their investments. The factories demand at least cost of production for their products plus a reasonable profit. The farmer is the biggest businessman in the world, yet he is the poorest paid for his work and for his products. He seldom gets cost of production for his products.

Towns and cities have been moved as close to the farms as possible for one reason and one reason only: to wait for the farmer to dig something out of the ground and bring it into the town to trade or sell. When he sells, he buys from the merchant; and the merchant in turn sends this money through his bank to the larger centers of factory towns to buy more goods to sell to the farmer.

My district of 22 counties, known for years as the richest agricultural district in the world, was once made up of farmers who owned their own farms. They are the best farmers in the world. They are frugal, hard-working, industrious, and honest. All they ask is to make a decent living for their families. All they want is to raise enough for the feeding of the livestock which they keep on their farms and for the human beings who operate the farm. A little to lay by for the rainy days and for protection against droughts and hard times; a little to leave behind for the children who follow them. This most of them have been able to do until recent years. They now find themselves in a worse plight financially than many of the great business enterprises which have been refinanced. They now call on their Government for the same opportunity, the same advantages as are given to other businesses of our land.

Give the farmers who need now to refinance their mortgages a lower rate of interest and they will pay it back to the Government tenfold. They will pay back the principal and the interest plus the knowledge that happiness has again returned to the men and women who dig the food out of the ground for you to eat. They will pay it back tenfold, because thousands of them will return to the land from the bread lines and from the relief rolls. They will pay it back tenfold because there will again be happy families united on farms where today there is much misery and suffering.

Thousands of letters from high-minded farmers telling of their present financial plight have reached me. I should like to quote many of these letters to prove to you that conditions are bad and that these conditions must be remedied. I am personally acquainted with many of the writers of these letters. I know them to be men and women of high standing in their communities. Many of them are men and women who have been working on those farms for 20 to 30 years, only to find now that they cannot refinance the mortgages on their homes and that they have been ordered to leave the place where they have lived most of their lives. Refinancing under the Frazier-Lemke idea will save these people.

One letter I quote from:

> This is to ask you to do all you possibly can to have the Frazier-Lemke bill, or one better, passed at this session of Congress. We need immediate aid as our farm home is about to be foreclosed. It just seems unjust that people who have always tried by diligence and care and thrift should lose their lovely home which they have worked years to attain. Especially does this seem terrible when parents have children, small boys, such as we have, who must be provided for in order to have them grow up to be good citizens. They must have a sense of security which the present conditions are not giving them. We must have immediate aid or lose our home.

This comes from the farmer and his wife in my district. From a family representative of the fine, stanch American citizens who make up the citizenry of my district and who I am proud to represent in this national body. We cannot and we must not refuse to listen to these pleas from these good people. They are looking to us for the same consideration that we have been giving to other people of our land. They are entitled to this consideration.

Mr. Chairman, since I have been in Congress I have fought for the solutions of the many problems which face the people who live on the farms and in the towns of my district. I discovered early that powerful industrial organizations are not helping the farmer. Neither are they helping the smaller towns and cities of our land. I have endeavored to represent my district from a nonpolitical party standpoint. I have worked and voted for those things which I believed to be for the best interests of all the people of our land, whether these things were sponsored by Democrats or Republicans. I have gone along with either side when I believed their suggestions and their legislative proposals were in my opinion for the best interests of all the people. But I have fought against all of those things which I believed were not good for all of the people, no matter by which party these things were sponsored. I have fought hard against useless expenditure of the taxpayers' money; I have fought and voted against legislation which would place class against class; and I have endeavored to bring before this body those problems especially confronting our farm population. I have learned early that our committee meetings are our workshops and that our House meetings are mostly showrooms.

I have the honor of being a member of three important committees—Educational, Buildings and Grounds, and Insular Affairs. Through work on these committees and the work with the Prairie State group, of which I have the honor of being one of the first members, I learned early that the

farm States' representatives have great obstacles to overcome if they hope to keep the interests of farming communities before the attention of this legislative body. I have learned that already great organizations have developed campaigns to take from the farmer the market entitled to his grain by the importations of blackstrap molasses which they hope will be a substitute as the basis for future industrial and beverage alcohol in our land. I have learned, too, that great organizations are planning to take over through the importation of coconut oil the market to which the product of the farm cow is entitled. I learned early to fight against the importation of great quantities of foreign-produced farm products to compete in the American market which rightfully belongs to the American farmer. There are many contributing factors to the present plight of the penniless American farmer. The so-called depression may have much to do with it, but continual importation of farm produce from foreign lands, the inroads of foreign substitutes for real American farm produce have much to do with the present conditions. The present farm relief apparently does not contemplate a remedy of this evil. How much the importation of foreign farm products into our land at this time contributes to the plight of American farmers can be seen in official figures of imports.

These importations come directly in competition with the products of American farms and forests. They have a value of approximately 25 percent of the total cash income of the American farmers for 1934, less the benefit payments. Nearly every dollar's worth of these products can be produced on American farms, provided always the Congress and the President will protect the American farmer in his fundamental right to produce these commodities.

The following official figures on imports of farm products for the years of 1932 and 1935 demonstrate more forcibly than mere words what has been taking place since the present administration has been in power, and more particularly to what extent President Roosevelt, through his reciprocal trade-agreement treaties, has surrendered the American market for farm products to the foreign farmer:

Product	Unit	1932 imports	1935 imports
Corn	Bushels	347,627	43,242,296
Oats	Bushels	58,786	10,106,903
Wheat	Bushels	10,026,320	27,438,870
Barley, malt	Pounds	52,532,636	320,622,537
Rye	Bushels	87	9,642,523
Tapioca (starch substitute)	Pounds	130,000,372	202,112,319
Hay	Tons	13,858	67,171
Soybean	Pounds	36,568,700	107,463,044
Cottonseed (cake and meal)	Pounds	1,058,945	59,743,572
Butter	Pounds	1,052,598	22,674,642
Cattle	Number	95,407	364,623
Hogs	Pounds	28,875	3,414,317
Fresh pork	Pounds	1,657,500	3,922,609
Hams, bacon, etc	Pounds	3,015,489	5,297,335
Fresh beef	Pounds	796,594	8,564,114
Canned meats	Pounds	24,638,261	76,653,242
Total meat products	Pounds	45,706,926	115,059,124
Eggs in shell	Dozen	243,784	432,076
Dried yolks	Pounds	726,400	3,952,664
Frozen yolks	Pounds	422,060	1,199,772
Egg albumen	Pounds	1,275,790	1,876,445
Wool and mohair	Pounds	56,535,176	202,732,658
Dried milk	Pounds	596,448	2,743,349
Hides	Pounds	188,013,286	303,475,633
Inedible molasses	Gallons	155,888,307	235,161,684
Beet sugar	Pounds	1,139,134	1,681,598
Sunflower-seed oil	Pounds	16,456,724	37,051,732
Palm-kernel oil	Pounds	2,938,209	7,977,812
Peanut oil	Pounds	1,512,682	80,723,225

This table does not show the tremendous loss to the American farmers resulting from the annual importation of 4,500,000 tons of sugar, valued $405,000,000, every pound of which could be raised on American farms if our farmers were permitted to do so. Nor does it disclose the reprehensible administration program under which the American production of sugar is curtailed.

The fact that we grow and refine only 30 percent of the sugar we consume is given no consideration whatever by the bureaucrats now regimenting the sugar industry. They go merrily on their crackpot way, taxing our people to pay the farmers to take out of production millions of acres of fine agricultural lands upon which we might well produce those foreign products now flooding the American market and ruining the price the American farmer receives for the products of his labor and investment.

It is announced that the President has completed negotiations with the Republic of France for another trade agreement. This treaty has already been signed, sealed, and delivered, and no American citizen is allowed to know until May 15 a single thing incorporated in the treaty, no matter how adversely he may be affected by its provisions. We may be sure, however, that this treaty will still further open our gates to the French, who give us something in return, and also to the 77 other nations who give us nothing in return. This "hoss trading" engaged in by Mr. Roosevelt and his Secretary of State is of a quality to make even the most unenlightened "hoss trader" seem a veritable mental giant in comparison.

How all of these contributing factors deal with the life on the farm should be taken into consideration by those who claim a refinancing of present farm mortgages is not timely. These contributing factors must be taken into consideration by those who claim on the floor today that we have done too much for the farmer; these factors must be taken into consideration by those who are fighting this refinance bill and who were so eager to vote to appropriate money to refinance other business—business which owes its very existence to the farmers, because all industry depends upon how much the farmer can raise and sell and how much the farmer can buy back to keep his farm in operation.

Farmers of my State will not be satisfied until their farm business is on a paying basis. It will never be on a paying basis until this farm business is given the same opportunity for refinancing as is given to other business in our country. I hope, Members of this House, that you will join with us today in refinancing the real business of America—the farm business.

Mr. LEMKE. Mr. Chairman, I yield such time to the gentleman from North Dakota [Mr. BURDICK] as he may desire.

Mr. BURDICK. Mr. Chariman, in view of the fact I have spoken five times in this Congress on the pending bill, I deem it only fair that other Members should have a chance to be heard on this subject. I therefore ask unanimous consent to extend my own remarks in the RECORD at this point and to include a table of the Liberty bond loans sold in this country, as prepared by the Secretary of the Treasury, and also tables that I have prepared myself as to the settlement of those debts and how they were settled in foreign countries.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

SHALL WE RELIEVE THE DEBTORS IN THE UNITED STATES? DID WE CANCEL LOANS MADE TO FOREIGN GOVERNMENTS DURING AND IMMEDIATELY FOLLOWING THE WORLD WAR?

Mr. BURDICK. Mr. Chairman, I desire to place before Congress and the country a statement concerning the loans made to foreign governments during and immediately following the World War, the amount loaned, the terms of the loan, the various settlements made since, the amount paid, and the amount outstanding today.

At the same time it will be necessary to show how this money for these loans was raised in this country and the condition today of the obligations incurred.

In the development of the scope of this inquiry, it will be necessary to show something of the cost of that war to the people of this country.

If all these real truths were brought home to the people of this country, it would put a stop to future wars so far as this country is concerned, unless there should sometime be a war of self-defense brought to our own shores.

Many people in this country are much concerned because the Federal Budget is out of balance. When we consider that drought and flood and other acts of God have been to a large degree responsible for much of the relief expenditures,

we can well say that the Budget in relation to ordinary expenditures is not far from being balanced today. The relief expenditures added to the ordinary expenditures throws the Budget out of balance. What we have spent for relief—and any just government should always stand ready to make these expenditures—is not a drop in the bucket when compared to war expenditures from 1917 to 1919. During that period the people of this country were actuated with a sort of wild hysteria to go ahead with war expenditures. Today, with the relief situation acute in many sections of the country, and suffering more acute than that ever before known in war or peace times in this country, we find the press—especially the metropolitan press—demanding that we put a stop to these expenditures. There is much merit in saying that the money for relief has been improperly, unfairly, unjustly, and politically expended, but this does not justify the statement that all further relief expenditures must be stopped. As a matter of fact, we shall be obliged to spend more billions for relief before we are through with this war of depression.

HOW THE MONEY WAS RAISED TO LOAN TO FOREIGN GOVERNMENTS

From June 1917 to May 1919, five Liberty loans were issued by the United States, in a total amount of $21,432,924,700.

On March 31, 1936, all of the Liberty loans had matured, and were paid, or refunded into other issues. On that date $125,000,000 of these loans had not been presented for payment and were, therefore, outstanding. A large percentage of these bonds will probably never be presented for the same reason that money is not all presented. Since the Government started, we are about $500,000,000 ahead on the issue of money for the reason that that amount has been lost, burned, or sunk in the oceans, and has never been and will not be presented for payment. The Government will come out many millions ahead in the issue of these Liberty bonds.

HOW THE LIBERTY BOND STANDS TODAY

Total	$21,432,924,700
Paid and retired	10,276,196,800
Refunded into other bonds	11,039,650,450
Outstanding	117,077,450
Total	21,432,924,700

The interest rate on the various Liberty loans was as follows: First issue 3½ percent, and the rates of interest on conversion and other issues is fully set forth in the tables below.

In this connection it should be remembered that in reality the Government did not loan its own money to any foreign government. The proceeds from the sale of Liberty bonds came from the people of this country. The people put the money in. In many instances good citizens were forced to buy these bonds, even when they did not have the money. In the tables below the number of people who purchased these bonds are listed. In the last sale—the Victory Liberty Bonds—11,803,895 people bought these bonds. In my section of the country, thousands bought bonds by borrowing money at the banks and giving as security their livestock, machinery, and land. Many farmers really were coerced into buying for fear that they would be charged with being German sympathizers. In fact, thousands of citizens were arrested, when the only evidence against them was that they had not bought bonds. Some of the purchasers never saw the bonds—they were left with the banks as security. Being actually forced into the bad business of going into debt, many people now wonder why the farmer today has a debt structure hanging over him which never can be paid.

When the Federal Reserve Board manufactured the depression in 1920, for no reason at all, and the bottom fell out of farm prices, including land, the farmer was forced to sell his Liberty bonds to raise ready cash. When the farmer got that far along, he found out that he must take a discount on these bonds, although he bought them at par. Discounts of 10 percent were common, and in many sections it ran up as high as 28 percent. At any rate, the farmers and workers lost their bonds but were forced to pay the purchase price in full. Countless numbers of first farm mortgages were made in this country for the sole purpose of paying the purchase price of these bonds.

While the people paid for the bonds the money was squandered, as we shall soon see, and still over 50 percent of the bonds or reissues of them are still outstanding and drawing an average rate of 4¼ percent. They must be paid, and the only way they ever will be paid is through taxation. Thus the people will pay for the bonds a second time. What has been paid was paid by taxation against the people. In addition to that, the interest charges on these bonds extracted annually from the people another $910,000,000 until the first bonds were paid. Since 1919, when the last Liberty Loan was made, this interest charge has amounted to $10,470,000,000. Adding this to the principal of the Liberty bonds issued, we have the following figures:

Principal	$21,432,924,700
Interest to date	10,470,000,000
Total Liberty-bond debt for the war	31,902,924,700

WHAT WAS DONE WITH THE PROCEEDS OF THESE BONDS

It will be interesting now to see how lavishly the Government handed out the people's money. Remember again, it was not Government money. At the time this country entered the World War, England and France had floated bond issues in this country, which were either held by the banks who floated the loans or by their customers. England's debt was $354,000,000. France owed $290,000,000.

The House of Morgan saw a chance to collect this money, and one of the very first uses made of the people's money—Liberty-bond proceeds—was to pay off this debt. There are many reasons assigned by the Government why this was done, but the one outstanding, undisputed reason is that these debts were actually paid. Money was advanced to foreign governments from the proceeds of these bonds in the amount of $9,610,405,575.45. Remember again, this was the people's money.

The money thus loaned, can, for the purpose of a complete understanding of the matter, be divided into two classes:

Pre-armistice loans amounting to	$7,077,114,750.00
Post-armistice loans amounting to	2,533,288,825.45
Total	9,610,405,575.45

These loans were made on demand, and drew interest at the rate of 5 percent.

To the above amount loaned to these governments must be added the following items:

Surplus supplies in Europe sold	$599,122,733.21
Relief after the war	84,093,963.55
Relief under the act of 1920	56,858,802.49
Principal as given above	9,610,405,575.45
Total loans	10,350,479,074.70

The next question the American people want to know is how much of their money is outstanding and not paid, and what has been done about it. A statement from the Treasury Department under date of January 10, 1936, presents the whole story:

In 1921 and 1922 the world was in a state of financial disorder. No debtor nation could have paid its debts to the United States (the people) had payment been demanded. Many of them were unable to pay the interest at 5 percent called for in their obligations. Only with time and more stable conditions could the possibility of settlement arise.

Recognizing that the debtor nations could not pay on demand, Congress originally authorized the debts to be funded (recontracted) on no longer than a 25-year basis and at not less than 4¼-percent interest. The act of February 9, 1922, created the World War Foreign Debt Commission, consisting of five members, with authority—

And so forth. This meant that this Commission had authority to carry out the provisions of the act of Congress.

Through subsequent acts of Congress the Commission made the following settlements respecting these foreign debts:

The total debt at date of funding	$11,586,820,828.53
Less payments made from 1917 to 1923, 1925, 1926	9,559,943.53
	11,577,260,885.00

There are people in this country who still assert that we did not cancel any of these debts. The Government still makes this claim, although the facts to which they agree demonstrate beyond the province of argument that the Government did actually give away over 50 percent of the people's money, and in effect all of it, in these settlements in the following particulars:

First. The time was changed from demand to 62 years.

Second. The interest was reduced from 5 percent to as low as four-tenths of 1 percent.

Third. Payments were arranged over this long period.

Fourth. The cash value of the paper they received in lieu of the old obligations was only $5,888,000,000 instead of $11,577,260,885, or a net loss of $5,689,260,885.

In addition to this, the story is not half told. For every dollar of this money loaned, the people of the United States are paying on Liberty bonds, and will pay for years to come, 4¼ percent, while the interest rate fixed for France was 1.6 percent, Italy four-tenths of 1 percent, England 3.3 percent. For years to come the people of the United States will have to pay this additional interest for all of the countries who settled for a lower interest rate than that which the people are required to pay on the Liberty bonds of their reissue.

I submit, for the purpose of illustration, the funding settlements with England, France, and Italy:

Data on war-debt settlements

	England	France	Italy	Average and grand total
Date of settlement	Dec. 15, 1922	June 15, 1925	June 15, 1925	
Total debt at time of settlement	$4,715,310,000	$4,230,777,000	$2,150,150,000	$11,096,237,000.
Total debt after settlement	$3,296,001,690 (cut of 30.1 percent).	$1,697,618,369 (cut of 60.3 percent).	$425,729,700 (cut of 80.2 percent)	$5,041,349,759 (average, 51.34 percent).
Total payments to be made over period of 62 years.	$7,105,965,000	$6,847,674,104	$2,407,677,500	$16,361,316,604.
Original rate of interest	5 percent annually	5 percent annually	5 percent annually	
Rate of interest after settlement	3.3 percent	1.6 percent	Four-tenths of 1 percent	Average, 2.51 percent.
Total indebtedness to United States Jan. 10, 1936.	$4,950,595,301	$4,041,152,328	$2,014,065,749	$11,005,813,378.
Excess interest paid by people of United States over all payments received.	$1,517,827,582	$1,977,756,125	$968,647,958	$4,464,233,665.

(1) Only 3 large debtors are included.
(2) The carrying charge to the people of the United States on these debts figured at 4¼ percent.
(3) Source of information; (a) Memorandum of the Secretary of the Treasury, revised Jan. 10, 1936; (b) combined annual reports of the World War Foreign Debt Commission, 1922–26.

WHAT IS THE PRESENT SITUATION OF THESE FOREIGN OBLIGATIONS?

How much is still due, although we discounted the total 50 percent and gave away in the next 62 years billions of interest which the American people will have to pay?

Funded debt unpaid	$11,229,078,286.95
Unfunded debt unpaid	204,851,113.64
Total	11,433,929,400.59
Interests postponed by moratorium agreements	184,164,561.52
Interest due and unpaid	810,743,068.22
Total due Jan. 10, 1936	12,437,837,030.33

Since the last funding date in 1925, with the exception of Austria and Greece, this foreign war debt has not been reduced, but actually increased from $11,577,260,885 to $12,437,837,030.33, or an increase during the last 11 years of $860,576,145.33.

In addition to the above debt of	$12,437,837,030.33
We must add the debt due us from Germany for the expenses of our army of occupation, amounting Jan. 10, 1936, to	1,332,250,360.95
Total debt	13,669,087,391.28

If these governments actually paid us the interest they agreed to pay, over a period of 62 years, the American people would lose on interest the difference between that rate and the rate of 4¼ which they have to pay on this debt of nearly $14,000,000,000.

In the case of Italy we lose annually interest on $2,150,150,000, the difference between 4¼ percent and four-tenths of 1 percent, which amounts to 3.85 percent. Annually this amounts to $82,780,775. If this process were kept up for 62 years, the loss in interest to the American people would be $5,132,408,050. But that is not all. Italy will probably never pay a cent of this debt, as it can better afford to use its money in wars of conquest than in paying its just debts.

At any rate the American people will have to finance foreign loans to the extent of nearly fourteen billions at the rate of 4¼ percent, while the average interest which foreign governments agree to pay—but have not—is 1.76 percent, representing an annual loss in interest of $350,000,000. Since these governments, or most of them, are paying no interest at all, the American people support those obligations at 4¼ percent annually, or an annual toll of $630,000,000.

In figuring the present value of the securities which we received on the date of settlement was only 50 cents on the dollar, in light of what has happened in the last 11 years, the present value of those obligations could not be more than 33 cents on the dollar. In the further light of the developments in Europe, I have no confidence whatever that, outside of a few governments, any of these debts will be paid. At the end of the 62-year period it is possible that we shall collect enough to pay 25 percent of the interest the people of this country will have to pay on the same amount of money represented by outstanding bonds.

Where is the informed, thinking Member of this Congress who will rise in his seat and deny that we have made a complete cancelation of the $12,000,000,000 of the people's money which this Government loaned to foreign countries?

There were many good reasons advanced why we should enter into these funding settlements. I present here some of them:

Speaking of the settlement with Great Britain, the Debt Commissioners, including Mellon, Hughes, Hoover, Smoot, and Burton, said in February 1923:

> It has not been the thought of the Commission that it would be just to demand over a long period the high rate of interest naturally maintained during the war and reconstruction, and that such an attempt would defeat our efforts at settlement. Beyond this the Commission has felt that the present difficulties of unemployment and high taxation in the United Kingdom should be met with suitable consideration during the early years, and therefore the Commission considers it equitable and desirable that payments during the next few years should be made on such basis and with such flexibility as will encourage economic recuperation not only in the countries immediately concerned but throughout the world.
>
> This settlement between the British Government and the United States has the utmost significance. It is a business settlement fully preserving the integrity of the obligations, and it presents the first great step in the readjustment of the intergovernment obligations growing out of the war.

Would not such a pronouncement, in regard to the affairs of the people of the United States, be in order now? We are now, as Great Britain was then, burdened with unemployment and mounting taxes. Would it not be in order

now in this country to extend our obligations over a long period of time and reduce what the commission called "high interest rates"? Would it not be in order to give the debtors of the United States a plan of debt payment that shall have in it the "flexibility" proclaimed for Great Britain by the august commission?

Would it not be a business settlement, preserving the integrity of obligations, to permit our farmers and home owners to have access to a system of finance that shall not take from them their last nickel to keep up an unconscionable and unbearable rate of interest?

When this commission canceled, according to the admissions of the Treasury Department, 50 percent of the foreign debts, they called it a business settlement, although the written contract provided for full payments with 5-percent interest annually. I wonder just where the "inviolability of contracts" which every court in America subscribes to was when these settlements were made.

I wonder how it came about that the present Chief Justice of the United States forgot the "inviolability of contracts", the "sacredness of contracts", when he subscribed his name to settlements, in clear and positive violation of contracts. When the Frazier-Lemke Farm Bankruptcy Act came before the same Justice, the principle of the inviolability of contracts, when applied to citizens of this country, came back in full force and significance. Even the presence of a great emergency where all farmers were helplessly mired in financial disorder, through no fault of their own, did not prevent the full and complete working of the American court custom of the "inviolability of contracts." Yes, the "sacredness of contracts" must be preserved, even though 10,000,000 farm people must be dispossessed to maintain this great principle of law.

Listen to President Harding on the debt settlement with Great Britain, under date of February 7, 1923:

> But here is a great nation acknowledging its obligations and seeking terms in which it might pay. So your Commission proceeded to negotiate in a business way for a fair and just settlement.
>
> It is the recommitment of the English-speaking world to the validity of a contract.

The contract of Great Britain—the original contract to borrow money, the note, the bond, the mortgage—was absolutely canceled and a new one substituted. If it was not, if the same contract was to be kept, why did Great Britain seek terms of payment? The terms were fixed in the bond. Yet, President Harding had the audacious nerve to say to Congress that this new contract maintained the principle of "validity of contracts."

The farmers of the United States want to pay; they will pay when they can. But they must have, like England, a reduction of the interest and a long period of time in which to pay. That is all. Under the debt contracts which they now have, this cannot be done, because the "inviolability of contracts" will be raised against them in the Supreme Court of the United States and there be sustained. Great Britain was a mighty nation seeking terms in which it might pay. We granted it. Today the farmers of the United States, involved in a great war of depression—a war that has lost them $47,000,000,000 in land values alone—are "seeking terms in which they may pay." The only possible way it can be done, in view of the "inviolability of contracts" doctrine of the courts, is to discharge the old contracts—debts—and enter into new contracts that will permit them to pay.

It is a sad commentary on American justice, if we shall be accused of funding $12,000,000,000 of debts to foreign countries but will now fail to fund $9,000,000,000 owed by the farmers of the United States.

Let us do here in this Congress what the Debt Commission did in those settlements. They said then, what we say now:

> This is a business settlement, fully preserving the integrity of contracts, and it presents the first step in the readjustment of, not inter-Government obligations, but the farm-debt obligations growing out of the war.

Do that and pass this bill providing for a just, a safe, a reasonable, and equitable, a constitutional, plan of farm refinance that will permit the farmers of the United States to retain their homes, protect their families, and taste again that spirit of American liberty which was kindled in the home. Permit them to pay their just debts—give them a chance to do it. Give them cause to respect this Government and if need be lay down their lives for it. Make them again, as they always have been, the unswerving defenders of American liberty. In that farm home is the spirit that no foreign invader can subdue; in that home live the men and women who produce the Nation's food—that thing that wins all wars. From that home come the gallant young soldiers who bare their breasts to the enemy fire, the men who go over the top, the men who have always preserved this Government and always will—if this Government will return to them a portion of that protection which they have always offered to their country. Destroy the homes in this country by whatever means you will—foreclosure, dispossession, unbearable interest burdens, and this great country will take its place with other failures of government whose records now lie forgotten among the musty pages of ancient history.

The tables above referred to are as follows:

THE LIBERTY LOANS (LIBERTY BONDS AND VICTORY NOTES), JUNE 30, 1935

FIRST LIBERTY LOAN OF 1932–47

Original issue of First 3½'s, dated June 15, 1917; subsequently in part converted (or reconverted) into other First Liberty Loan bonds bearing higher rates of interest. The date of maturity of all the bonds of this loan, whether of the original issue or a converted issue, was June 15, 1947; the bonds were callable for redemption on and after June 15, 1932, on 3 months' notice. On March 14, 1935, the outstanding bonds of this loan were called for redemption on June 15, 1935, on which date interest ceased.

First 3½'s—original issue June 15, 1917:		
Offered for subscription		$2,000,000,000
Subscribed		3,035,226,850
Allotted—final (issued)		1,989,455,550
Retired on conversion:		
To First 4's	$568,318,450	
To First 4¼'s	7,570,550	
To First-Second 4¼'s	3,492,150	
		579,381,150
Redeemed:		
Uncalled before Mar. 14, 1935	17,848,150	
Called since Mar. 14, 1935	1,317,667,200	
		1,335,515,350
		1,914,896,500
Outstanding June 30, 1935		74,559,050
First 4's—converted issue Nov. 15, 1917:		
Issued on conversion from First 3½'s		$568,318,450
Retired on conversion to First 4¼'s		547,641,750
Redeemed		20,676,700
Uncalled before Mar. 14, 1935	$15,674,250	
Called since Mar. 4, 1935	3,839,200	
		19,513,450
Outstanding June 30, 1935		1,163,250
First 4¼'s—converted issue May 9, 1918:		
Issued on conversion:		
From First 3½'s	$7,570,550	
From First 4's	547,641,750	
		555,212,300
Redeemed:		
Uncalled before Mar. 14, 1935	22,723,200	
Called since Mar. 14, 1935	463,667,400	
		486,390,600
Outstanding June 30, 1935		68,821,700
First-Second 4¼'s—converted issue Oct. 24, 1918:		
Issued on conversion from First 3½'s		3,492,150
Redeemed—called since Mar. 14, 1935		3,234,500
Outstanding June 30, 1935		257,650
Total First Liberty Loan bonds outstanding June 30, 1935 (payable on presentation)		144,801,650

SECOND LIBERTY LOAN OF 1927–42

Original issue of second 4's dated November 15, 1917; subsequently largely converted into second 4¼'s dated May 9, 1918. The date of maturity of these bonds was November 15, 1942, but the bonds were callable for redemption on and after November 15, 1927, on 6 months' notice. On May 9, 1927, the outstanding bonds of this loan were called for redemption on November 15, 1927, on which date interest ceased.

Second 4's, original issue Nov. 15, 1917:		
Offered for subscription (with right reserved to allot up to one-half the amount of any oversubscription)		$3,000,000,000
Subscribed		4,617,532,300
Allotted—final (amount issued)		3,807,865,000
Retired on conversion (into second 4¼'s)	$3,707,936,200	
Redeemed	99,313,050	
		3,807,249,250
Outstanding June 30, 1935		615,750
Second 4¼'s:		
Issued on conversion from second 4's	3,707,936,200	
Redeemed	3,706,815,750	
Outstanding June 30, 1935		1,120,450
Total second Liberty Loan bonds outstanding June 30, 1935 (payable on presentation)		1,736,200

THIRD LIBERTY LOAN OF 1928

Third 4¼'s, original issue May 9, 1918; matured for payment Sept. 15, 1928, on which date interest ceased:	
Offered for subscription (with right reserved to allot full amount of any oversubscription)	$3,000,000,000
Subscribed	4,176,516,850
Allotted—final (amount issued)	4,175,650,050
Redeemed	4,172,846,500
Outstanding June 30, 1935 (payable on presentation)	2,803,550

FOURTH LIBERTY LOAN OF 1933–38

Fourth 4¼'s—Original issue Oct. 24, 1918. The date of maturity of these bonds was Oct. 15, 1938, but the bonds were callable for redemption on and after Oct. 15, 1933, on 6 months' notice. All outstanding bonds of this loan have been called for redemption as follows: First call (Oct. 12, 1933) for redemption on Apr. 15, 1934, included bonds bearing serial numbers ending in 9, 0, or 1; second call (Apr. 13, 1934) for redemption on Oct. 15, 1934, included bonds bearing serial numbers ending in 8 or 2; third call (Oct. 13, 1934) for redemption on Apr. 15, 1935, included bonds bearing serial numbers ending in 5, 6, or 7; fourth (final) call (Apr. 13, 1935) for redemption on Oct. 15, 1935, includes bonds bearing serial numbers ending in 3 or 4. The interest on bonds included in each call ceases on the day fixed in each instance:

Offered for subscription (with right reserved to allot full amount of any oversubscription)	$6,000,000,000
Subscribed	6,992,927,100
Allotted—final (amount issued)	6,964,581,100

	Total amount	Total redeemed	Outstanding June 30, 1935
Uncalled	$722,344,250	$722,344,250	
First called (due Apr. 15, 1934)	1,880,428,200	1,868,737,150	$11,691,050
Second called (due Oct. 15, 1934)	1,246,231,800	1,228,925,850	17,305,950
Third called (due Apr. 15, 1935)	1,869,346,100	1,809,606,250	59,739,850
Fourth called (due Oct. 15, 1935)	1,246,230,750		1,246,230,750
Total	6,964,581,100	5,629,613,500	1,334,967,600

NOTE.—Fourth Liberty Loan bonds (temporary coupon, permanent coupon, and registered) were numbered serially beginning with no. 1 for each denomination, and all bonds have been issued in this serial order. Accordingly the outstanding bonds were divisible into 10 approximately equal series as determined by the final digits of the serial numbers, and this approximate division has been the basis for separating the amounts included in each of the four calls. It follows that the amounts above stated for each call are approximate amounts, subject to adjustment as bonds are redeemed.

VICTORY LIBERTY LOAN OF 1922–23

Victory 3¾'s and Victory 4¾'s: Two series of interconvertible notes, dated May 20, 1919; maturity date, May 20, 1923; but either or both series callable for redemption in whole or in part on June 15 or Dec. 15, 1922, on 4 months' notice. Victory 3¾'s called for redemption on June 15, 1922; Victory 4¾'s in part called for redemption on Dec. 15, 1922, the balance matured May 20, 1923. Interest ceased on such respective dates:		
Offered for subscription		$4,500,000,000
Subscribed		5,249,908,300
Allotted—final (amount issued)		4,495,373,000
Victory 3¾'s:		
Original issue	$672,585,100	
Issued on conversion	424,666,750	
		1,097,251,850
Retired on conversion	505,068,900	
Redeemed	592,172,050	
		1,097,240,950
Outstanding June 30, 1935		10,900
Victory 4¾'s:		
Original issue	$3,822,787,900	
Issued on conversion	505,068,900	
		4,327,856,800
Retired on conversion	424,666,750	
Redeemed	3,902,417,450	
		4,327,084,200
Outstanding June 30, 1935		772,600
Total outstanding June 30, 1935 (payable on presentation)		783,500

RECAPITULATION—FIVE LIBERTY LOANS

Liberty loan	Subscribed	Issued	Redeemed	Outstanding June 30, 1935
First	$3,035,220,850	$1,980,455,550	$1,844,653,000	$144,801,650
Second	4,617,532,300	3,807,865,000	3,806,128,800	[1] 1,736,200
Third	4,176,516,850	4,175,650,050	4,172,846,500	[1] 2,803,550
Fourth	6,992,927,100	6,964,581,100	5,629,613,500	[2] 1,334,967,600
Victory	5,249,908,300	4,495,373,000	4,494,589,500	[1] 783,500
Total	24,072,111,400	21,432,924,700	19,947,832,200	1,485,092,500

[1] Matured, on which interest has ceased.
[2] $88,736,850 matured on which interest has ceased; $1,246,230,750 called for redemption on Oct. 15, 1935, on which date interest will cease. (See note under Fourth Liberty Loan of 1933–38.)

Estimated number of subscriptions

First Liberty Loan	4,000,000
Second Liberty Loan	9,400,000
Third Liberty Loan	18,302,325
Fourth Liberty Loan	22,777,680
Victory Liberty Loan	11,803,895

TREASURY DEPARTMENT,
Office of the Commissioner of the Public Debt, July 26, 1935.

Mr. JONES. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. PEYSER].

Mr. PEYSER. Mr. Chairman and ladies and gentlemen of the Committee, I am going to consume but 5 minutes of your time. There is one point I would like to bring to the attention of the Committee that has not been touched upon Although there was reference made to the fact that there were 63,000,000 life-insurance policyholders in this country, the subject as to how they would be affected was not particularly touched upon.

Prior to the passage of the first Frazier-Lemke bill, which has been held unconstitutional, I then expressed the belief that that measure would hurt instead of helping the farmer.

I believe that I have been justified in that belief, because I have the figures of one life-insurance company alone that in their annual report for the year 1933 showed $220,000,000 of farm loans. In 1935 that was reduced to $110,000,000.

Whether that result was reached as the result of the company bailing out, as some proponents claim, or not, it is my belief that the reduction was due to the fact that the company withdrew from purchasing farm mortgages.

I believe if this measure should become a law the result would become more hazardous, not only to the farmers but the 63,000,000 people who hold life-insurance policies.

These companies today set up a rate based on the combined table of mortality, using 3-percent interest. Some companies have 3½ percent and some 4 percent. How in the world can they exist where the style has changed and the interest has been reduced to 1½ percent?

It means only two things: It means that the policyholders in mutual companies will be deprived of their dividends and the companies will be forced to have policies in force based on 1½ rate of interest, instead of 3, 3½, or 4 percent, as called for when the policies were issued.

It means bankruptcy for those who come under that plan. Further, it means scuttling of all insurance rates in the country.

Mr. JOHNSON of Oklahoma. Will the gentleman yield?

Mr. PEYSER. No; I have only a few minutes. I claim under this bill that the farmer will be even worse off than before. It is not only life-insurance companies that invest in mortgages. The country banks and savings banks that formerly paid 3 and 3½ percent on deposits would be forced to cut the interest rate.

I hope this bill will be beaten here in the House and relieve the minds of millions of people now in fear of the inflation that would surely follow.

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman, I ask unanimous consent to revise and extend my remarks and include some brief quotations.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. REED of New York. Mr. Chairman, I am opposed to this bill because of its inflationary purposes. I do not think the Frazier-Lemke bill presents a partisan question. I believe that every vote cast in this House should be based upon the individual's honest conviction as to whether or not the bill is a good thing for the country as a whole. I believe that the House should, whenever it can in considering legislation, turn back the pages of history and see whether or not similar experiences have been tried and whether they have been successful or whether they have failed.

I do not suppose I can make very much of an impression upon any Member here. You, no doubt, have determined now how you intend to vote. I know how I am going to vote, and I am basing it very largely upon experience that various nations have had in years gone by, including our own.

I want to take you back about 200 years to the time when a great financial genius by the name of John Law lived. He was the son of a Scotch banker. He had given considerable study to the question of money and he had come to the definite conclusion that you can maintain the value of money by backing it with land, or purely as a credit money, rather than with metal.

He could not interest the Scotch bankers in his scheme. He went over to Amsterdam and tried to interest Dutch bankers, but they turned him down. Then he traveled into France and approached Louis XIV, who also declined to entertain his scheme. Later, when France was in desperation, the regent of Orleans showed sympathy for John Law's scheme for issuing paper money based upon land or credit, and just 220 years ago a bank was established and John Law was put in charge of it, the function of the bank being to issue paper money, and it did issue paper money to the ruin of France. This paper money rapidly diminished in purchasing power, inflation came, and one issue followed another until finally, to divert attention from the approaching fiscal disaster, he plunged into the Louisiana scheme where he had promised investors to open up mines of great wealth. This scheme also collapsed and he had to flee from France, and later died a dissolute gambler in a foreign land.

Now, you would have supposed that France would have learned a lesson from that experience, but such was not the case. Eighty years later, in 1790, the National Assembly met. France was in debt. The Government was spending more than it was receiving in revenue. The statesmen decided to again resort to the plan of issuing currency backed by land. The National Assembly confiscated all church property, valued at a billion dollars, which constituted one-fifth of the richest land in France. A motion was made in the National Assembly by Talleyrand, Archbishop of Autun, and seconded by the greatest orator of the time, the great leader, Mirabeau, to issue paper backed by the church land, and it was carried. The Assembly proceeded to issue currency, and it passed a resolution that never under any circumstances would they issue currency in excess of the value of the land; that they were going to restrict the issue to about $400,000,000 in our currency.

No sooner was that currency off the press than all kinds of metal, the smaller coins that were in circulation, disappeared. Then came a demand within 3 months—of course, under pressure of the paper-money groups—for more money, and the legislature again issued more paper money; and that kept up for a period of 5 years, until just one item, a pound of bread, cost $16 in our money, and everything else cost in proportion. It took 40 years to rebuild the industry and capital structure of that country. Yet, at the time of each issue of this paper money, starting in a small way at first, there was great enthusiasm displayed. The people held torchlight parades to celebrate the so-called new influx of wealth; chambers of commerce and various municipal organizations sent in resolutions commending the Assembly for issuing more and more of this paper money, but the periods of joy became shorter as the issues became more frequent.

We had an experience in our own country. We had an experience right after the Revolutionary War. The little State of Rhode Island found itself burdened with debt. The farmers had mortgages on their places, and they had their share of the national debt to carry. The farmers thought they saw a way out of their difficulty by issuing paper money backed by farm mortgages. They proposed to the Assembly of Rhode Island that it establish a paper-money bank, that it issue money based upon mortgages on the farms of Rhode Island. They went to the assembly with the proposal and it was turned down. Finally their groups grew larger and they went to the assembly again in 1786, but the assembly defeated their proposal by a vote two to one. Then what did they do? Exactly what political groups do today. They went out into the country districts and organized a paper-money party, with the result that they swept Rhode Island in the next election. They had control of the assembly. They immediately established a paper-money bank capitalized at 100,000 pounds. They provided that any farmer who wanted money could, by simply pledging twice the amount of farm property, receive currency. The farmers flocked in to get this new printing-press money. They, too, held celebrations. They saw great prosperity as a result of this so-called influx of new wealth. When the new money was issued it started to depreciate. The farmers took their produce into Providence and Newport; then when the farmers endeavored to buy goods the merchants refused to receive the new money at par.

The farmers would not sell at a discount. Finally the pressure became very great and the merchants in desperation closed their shops or else they sold by barter. They would not accept the new money. Then the assembly came to the rescue again and started passing forcing acts. They passed an act which provided that any person who refused to take this paper money at par could be fined for the first offense about 6 to 30 pounds, and for the second offense still more, and finally the penalty of imprisonment was imposed. A butcher refused to take this paper money for meat. He was hailed into court. Leading lawyers appeared on both sides and argued the question all day. The court held that the act was unconstitutional. Then the assembly summoned the court before it and finally removed four of the judges. Still the people would not take that paper money. They refused to take it, even in the face of the drastic forcing acts. The farmers would not sell their produce, unless the people would take the money at par. Finally the cities had

to borrow money and procure produce outside to keep the citizens from starving to death. There were riots and bloodshed on the street, but still the people refused to take this money. Finally the assembly formulated an act that required every person to take an oath to take the money at par. Otherwise a man could not run for office, a lawyer could not practice law, a ship captain could not take a boat in or out of the State, and it went on down the line; but the assembly had started to reflect; its members decided they would not assume full responsibility for it, instead they submitted the proposal to a referendum vote throughout the State, with the result that the people, realizing the futility of this paper money backed by land, voted it down. Only three townships in the whole State voted in support of this oath.

We are traveling, Mr. Chairman, in the same direction; and just as surely as you inflate the currency by starting the printing press by printing $3,000,000,000 you will have one group after another demanding more issues of fiat money. You are now traveling the same course that has been traveled by every country, even our own, which has tried this form of inflation. [Applause.]

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon [Mr. PIERCE].

Mr. PIERCE. Mr. Chairman, I have written up carefully what I wanted to say on this bill, because I knew the time would be short and perhaps I would not get much. I therefore ask unanimous consent that I may revise and extend my remarks and add thereto a short letter containing some questions that were asked by a constituent of mine, together with resolutions from the grange of which he is master.

Mr. SNELL. Mr. Chairman, I am sorry, but I shall refuse unanimous consent except to the gentleman revising and extending his own remarks.

Mr. MAVERICK. Mr. Chairman, reserving the right to object, several Members have asked permission to extend their remarks, and I have asked myself if it was on the Frazier-Lemke bill and did not object when it was. In other words, I thought this battle was just on the basis of matter extraneous to what we are debating.

Mr. SNELL. Mr. Chairman, if the gentleman's question is addressed to me, I will say there is no argument about any question. If we cannot be protected in correcting the RECORD when it is false, nothing except what goes on on the floor and the usual revision and extension of a Member's own remarks will go into the RECORD by unanimous consent.

Mr. MAVERICK. The gentleman will remember that he objected——

Mr. SNELL. I do not remember anything.

Mr. MAVERICK. That he objected to a unanimous-consent request to correct the RECORD. The gentleman himself objected to that.

Mr. SNELL. No; I did not. I objected to outside matter going in, not to the gentleman revising and extending his own language.

Mr. PIERCE. Then, Mr. Chairman, I ask unanimous consent to revise and extend my own remarks.

The CHAIRMAN. Is there objection to the gentleman revising and extending his own remarks?

There was no objection.

Mr. PIERCE. Mr. Chairman, I listened with interest to our historian friend, the gentleman from New York [Mr. REED]. There is a clear-cut answer. I have read it; I have taught it in school; and I hope somebody who is going to speak tomorrow will take occasion to prepare himself and express it in the words in which it has been expressed by brilliant men who have handled this very subject.

Recently my friend, the gentleman from Colorado, and I were talking to a man high in authority in the Government, and he said to us that for every $100 in currency outstanding in the United States there is today $130 in gold to redeem it in the Treasury, making of it the strongest currency in the world.

What does this bill do? This bill simply calls for the issuance of money that we provided for, months ago, in 1933, when in the act we passed we provided that the President could issue, through the authority he was granted, three thousand millions of currency; and, if it is issued and the bill is amended as the author intends to amend it, there will be 100-percent backing in gold against all currency outstanding. Then where is the inflation?

The forced consideration of the Frazier-Lemke refinancing bill marks an epoch in the legislative procedure of the Congress of the United States. A bill openly and bitterly opposed by certain groups in both parties is by a petition of 218 Members brought before the House for open discussion and final disposition. From my point of view, this is a proper procedure under representative government.

The Frazier-Lemke refinancing bill—H. R. 2066—now under consideration, is drawn to give the farmers of the United States the opportunity to refinance their farm-mortgage indebtedness. It states in section 1 that it shall be known as "The Farmers' Farm Relief Act." The bill creates an elective national board of agriculture representative of the borrowing farmers of each State. This board will control the administration of the law, cooperating with the Farm Credit Administration and the Federal Reserve Board. The bill provides that the farmer may have his farm appraised for refinancing, and money will be provided at an annual interest rate of 1½ percent, with an additional annual amortization or payment on principal of 1½ percent.

Under the original bill, a loan for the full appraised value was to be granted, but proposed amendment agreed upon by friends of the bill will somewhat reduce the amount. It is provided that bonds to finance the loans shall be offered at 1½-percent interest. These bonds will probably not be sold to the public but will be held in the Treasury because of the low-interest rate, then currency may be issued to the amount of $3,000,000,000, backed by the farm lands, the faith and credit of the United States, and pledge of the gold in the Treasury. The total amount of lending for mortgage refinancing under this bill is limited to $3,000,000,000.

The farmers of Oregon are earnestly demanding the passage of this bill so that they may be able to save their homes. I shall vote for the bill for several reasons which I desire to discuss with some care because of the importance of the proposed plan in its permanent influence on our farm-credit system.

FARM CREDIT AGENCIES

This administration, when it came into power in 1933, found many agencies of Government undertaking to extend credit to the farmers—the land banks, the cooperative banks, and the intermediate credit banks. In 1933, the crop-production associations were inaugurated and the entire farm-credit system was welded together under the Farm Credit Administration. Interest rates were reduced, loans provided for cooperatives, land bank commissioner's loans on second mortgages were added, to an amount of 75 percent of appraised value. We have made distinct progress through legislation, but many of the benefits hoped for through this legislation have been nullified by administrative interpretations. It was, no doubt, the intention of Congress that the borrowers should control the operation of the Federal land banks, but this has not transpired. A governor, not provided for in the original act but included in the administrative set-up, is now sanctioned by law. Rules and regulations now adopted have entirely changed the temper of the act which was originally supposed to allow the farmers to manage their own institution, for which they had provided the capital. It should never be forgotten that the farmer has no other source of credit. I know that the claim is made that life-insurance companies are again in the field, but their loans are so few and far between and so conservative that they are of practically no value in solving the problem of farm credit.

The Farm Credit Administration gives a great array of figures showing the large amounts loaned, but I judge it cannot be doing more than 10 percent of the business in farm

mortgages that was done in 1926, 10 years ago, when private lending agencies were really in the field and doing business. In other words, the Farm Credit Administration, by its extreme conservatism, has done much to depress farm values and build up the urgent demand for this bill, now pending.

I repeat, this bill is a protest against the restrictive and overconservative methods of the Farm Credit Administration which has not fulfilled our expectations in providing for agriculture the money necessary to prevent wholesale foreclosures. I am well aware of the fact that the success or failure of the Farm Credit Administration is dependent on commodity prices. If there is to be no advance in commodity prices, then many of the mortgages that have already been made, since 1929 as well as prior to that date, will be foreclosed by reason of the fact that the farmer, regardless of all the sacrifices he may make, will not be able to earn enough to pay the interest and amortization to keep his loan with the Farm Credit Administration in good standing. Foreclosure, in thousands of cases, must necessarily follow.

FARM INTEREST RATES TOO HIGH

The breathing spell mercifully provided by the Seventy-third Congress in remitting the semiannual payments on principal to the Federal land banks has indeed been a life-saver. It is possible this must be further extended or adjusted if farm prices do not come back. The reduction of interest on Government farm loans, under this administration, to 3½ percent was also a blessing. The farmer has, however, never been able to understand why his basic industry was originally, and is now partially, indirectly financed by borrowed money—bonds privately owned—necessitating interest rates vastly higher than those granted on Government funds lent other industries, financially more hazardous. He knows these other more-favored borrowers of public funds were privileged solely because of the power to demand and to coerce governmental bodies, legislative and administrative. We must have a more satisfactory farm-credit system and a more democratic organization worked out before the day of reckoning comes for payment of principal. This bill is offered to meet that emergency.

The farmer reads about ship subsidies, loans to banks, favors to railways, legislation to bail out mortgage companies under the guise of benefactions to home owners, Government-financed housing programs for the industries, and cheap money for great utility concerns. He becomes cynical and bitter when he reflects upon the tight-fisted governmental agencies through which he is financed. Screws are turned on the farmers, and their interest rates are higher, because they have not yet organized to speak loudly and firmly. The time is not far distant when they will organize and speak in a voice that will be heard across the country. It may be as a political party and it may be as an economic unit, but we shall then be wise to refrain from suggesting compromises.

I am for this bill because it is so decidedly advanced on the matter of interest. In future years when some economic student records the doings of this period, undoubtedly that historian will give high interest rates, far beyond the ability of the people to pay, as one of the principal causes of the crash of 1929 and the heart-rending incidents that have followed in its wake. Many times in the well of this House and on platforms in the Pacific Northwest I have denounced high interest rates as one of the major causes of the great break in our prosperity. I have announced, time and again, my belief that interest on money should never be higher than the increase of wealth when measured through a series of years, which would be from 1½ to 2 percent annually. The 1½-percent annual interest added to the 1½-percent amortization provided in the pending bill makes an annual charge of 3 percent for the use of money. This is all the producers of the foods and fibers of America can afford to pay, possibly more than they can or should pay. One of the lasting benefits of this legislation will be permanently lower interest rates for farmers.

I have always doubted the wisdom of compelling the borrower to guarantee his neighbor's mortgages to the amount of 5 percent of a loan as now required. I am well aware of the fact that the managers of the Farm Credit Administration believe this forces cooperation among the agricultural communities, and helps to hold down fraud and collusion. I think it has just the opposite effect. The borrower, in most cases, bids goodbye to the 5 percent taken out of his loan and feels that it is higher interest taken from him by the Government just as heartlessly as extra commissions were taken from him by private lending companies a few years ago.

FARM APPRAISALS UNFAIR

In recent months the Farm Credit Administration from coast to coast has adopted rules and methods of valuation, undoubtedly coming from headquarters in Washington, of such restrictive nature that it is practically impossible for many farmers to refinance themselves through the Federal land banks.

In the Pacific Northwest we never were affected by the extremely high price of agricultural lands which prevailed during the boom period in the Middle West, so we did not have to write off inflated valuations. There was an advance, but nothing comparable to the advance in states like Iowa and Illinois. In the extreme height of the boom in 1929, the very peak of prices on the best of farming lands was about $200 an acre. This has since fallen until, if the lands can be sold at all, the average price will not exceed $75 an acre.

When the Farm Credit Administration, through its appraisers, applies the yardstick which has undoubtedly been supplied from Washington, the values of these lands are forced down to, perhaps, $50 an acre, and a first loan of $25 is all that is granted. Then the Commissioner's second-mortgage additional loan, provided by the Seventy-third Congress, at 75 percent of the appraised value, would, perhaps, bring the loan up to about one-half of what the land would sell for, if a purchaser could be found. In other words, the Federal land bank, through its administrative methods, has practically nullified the law of Congress granting the commissioner's loan up to an amount of 75 percent of the appraised value. This is one cause for the agitation which has accentuated the demand for the passage of this Frazier-Lemke bill.

The Federal land bank has been generally administered, throughout the Nation, by men who lost their all in some banking crash, and perhaps in their earlier business ventures they were unduly optimistic. They are now certainly unduly pessimistic. They are thoroughly imbued with the bankers' viewpoint and generally look upon the farmer who seeks credit as a failure and a business incompetent. Most of them are, by political and economic faith, opposed to the present administration. Again I repeat that the administration of the Federal land banks and the attitude of its employees has had more to do in bringing about the strong agrarian movement in favor of the pending bill than any other one thing.

MORTGAGED FARMS

It has recently been stated in this House that farms are being foreclosed today at the rate of 20,000 a month. If present conditions continue, foreclosures will be wholesale and farmers will generally be trespassers on the very land their energy, skill, and labor has made fit for human habitation. It is still an open question, even if this bill becomes a law, whether the steady march of the farming people toward peasantry can be stopped. This bill and other laws must be passed soon in order to assure reasonable prices for farm products and to avert serious trouble.

I know that it is published and asserted and reasserted that only a very small percentage of the farms of America are mortgaged. I have seen statements that only 25 percent are under mortgage. It is now stated on this floor that 66 percent of all farms are not mortgaged. I do not know where the authors of such statements get their figures. Perhaps they count as a farm every acre of garden patch

throughout the entire country. I do know that in the real agricultural West and Middle West, nearer 90 percent of all farms are mortgaged, and in many sections the percentage is close to 100.

MONEY AND THE MEASURE OF VALUE

Now we come to the real heart of the matter and the reason for the outcry against this bill. Some of our friends fear the subject of money as politically dangerous. Others cry "inflation", because they have no understanding of the subject or because they are not willing to go along on the program for adequate and satisfactory farm credit. Privileges which have been accorded industry and have made it powerful and dictatorial and dangerous must not be extended to farmers, so they think. I grant that some honestly interested in justice to agriculture fear this proposed legislation, and I address myself to this group in an effort to assuage their fears and dispel their illusions.

To one who believes as I believe that the management of money and credit had much to do with the crash of 1929, the bill is most welcome, because it does bring into the campaign of 1936 the subject of money. I welcome the discussion. Until we go before our people facing openly and unafraid our major problems of money, unemployment, and concentration of wealth, we cannot ask for the allegiance of those who understand our critical situation and realize the imperative need for remedial legislation. Yes; it may be experimental, as science and economics are alike, dependent upon experiment for advancement. Such legislation must be based on research and experiment, supplemented by the determination to use all our governmental powers for betterment of our economic and social conditions.

In our intellectual progress we have delved deep into the secrets of Nature; we have invented machines which extend and increase all our natural faculties. We are enjoying the arts of civilization. We are happy in comforts and conveniences far exceeding those of the preceding generations. What a pity that we have failed, miserably failed, to divide, with any degree of equity, the products and rewards of human toil! I think it is largely owing to the control of the medium of exchange, money and credit. We cannot revert to the days of barter and maintain any degree of our marvelous civilization. I have been amazed, during the past few years, at the quick return to barter and exchange. We cannot contemplate a longer period of such procedure.

The farmer must have some more equitable and stable measure of the value of the things he produces and takes to market. There must be some just and assured system by which those products may be exchanged for the finished products of the factory which he must have for his own satisfaction as well as for the prosperity of the manufacturer. We have not yet offered a solution of this difficult problem. The Brookings Institution has made a real contribution in its series of studies, which set forth the situation and clearly propound the questions, but afford no sufficient answer. Our legislative bodies are groping in the dark passages of ignorance, tradition, and prejudice. Is the answer to be found in the commodity dollar with its varying value based upon the rise or fall in the prices of a certain number of commodities? This may be the solution. We cannot cast it aside. We must consider it. Is it to be sought under continuation of the present system of a managed currency? If so, what group is to be the powerful manager?

ADDITIONAL CURRENCY ALREADY AUTHORIZED

Our opponents say that this bill is highly inflationary. Did those who are so vehemently using that argument today, use the same argument when, in 1933, the Seventy-third Congress provided by law that the President might issue the same amount of currency, three billions, as provided in this act? Did those men who voted for that measure know that the President would allow that law to remain upon the statute books unused? Those who voted for the measure might never have been called upon to consider the Frazier-Lemke bill if the currency had been issued.

I am for this bill because it will bring into existence and circulation those three billions in currency authorized by congressional action many months ago, and based on the faith and credit of this Government. We now know that we have, in fact, an ample gold base for such an issue. If the farmers are given the chance this bill provides, that money will go into circulation. It will be used to buy the products of industry, and then those who work in factories and industries will be able to buy the products of the farm. The natural tendency will be to raise commodity prices. The issuance of more money is not the only thing necessary to increase commodity prices, but it is one of the contributing factors toward higher price levels. Do I hear you ask, what is the use of higher prices for everyone? Well, if you put a mortgage on your place you will certainly pay it more easily if you get more dollars for your products. I admit that the benefits will accrue chiefly to the debtor, whose debt was incurred before the crash. His load of debt has ever since been one of the main obstacles to farm recovery. This bill is reflationary. It will help to bring back normal prices, prices that will enable the farmer again to buy products of the factory, thus helping labor. I find progressive labor leaders in this House and elsewhere supporting the bill because they believe that what helps farmers will help them, and they desire to continue cooperation with the farm world. He will be able again to pay interest and taxes, and to take his proper and dignified position as a self-respecting, independent producer.

SILVER LEGISLATION AND HIGHER PRICES

I want higher prices for farm commodities not only in the United States but in the world's markets. When a cargo of wheat is sold in one of the world's markets, it is paid for in ounces of gold, or if sold in a silver-using country, then in ounces of silver. I believe that if the Government were, by law, to give to anyone the privilege of bringing silver bars to the United States Treasury to be coined into dollars at a ratio not greater than 16 to 1 as measured in gold, or, better still, to deposit the silver in the Treasury and have issued against it silver certificates, it would undoubtedly raise the price of silver. One of the causes of the agitation for this bill is low prices of farm commodities in foreign as well as in domestic markets. It seems reasonable to conclude that real silver legislation might have forestalled the movement for this bill.

SOUND MONEY

This administration deserves our commendation for many epoch-making achievements. In the economic field, I give first place to the courage with which it faced nullification of the gold clause in contracts, and the reduction of the number of grains in the gold dollar. This, undoubtedly, has been one of the real factors in the increase of commodity prices. Yes; bankers may strive to dictate otherwise, and editorial sanctums may ring with denunciations, but nothing can keep the money question out of this coming campaign of 1936.

We hear much about "sound money", and so far we have failed to get any understandable definition of the phrase. "Sound money" sounds well; it appeals to the ear, and undoubtedly has some effect upon the unthinking. Suppose the Government should retire one-half of the money outstanding today, what effect would it have? Do you think the channels of business would be full to overflowing? Do we not all know that stagnation would follow? Some of my good friends across the aisle say, "You want inflation." That is the bugaboo that is raised to scare the uninformed and the timid.

Someone will say, "Do you want to go like Germany and issue money in such quantity that it has no value, that it will take a million dollars to buy a dinner?" Nobody wants to follow that road. It is a well-known fact, and it will be admitted by all in a few years, that Germany deliberately and intentionally, with malice aforethought, issued untold quantities of paper money and ruined the value of her

currency, thereby wiping out much of her debt. Germany, through sale of her marks, took millions upon millions of ounces of gold out of other countries, including the United States, vastly increasing her own real wealth. Then Germany issued another kind of currency based on gold in limited quantities with an inadequate base. Germany has recovered from the disaster she suffered in the Argonne in 1918, rearmed, and is again a menace to world peace. No such speedy economic revival is to be found anywhere in history. We are not proposing the German method. We have an adequate gold base and a totally different economic and political situation. It is not fair nor intelligent nor honest to try to brand this bill with the German label.

Someone else says, "You have heard of the Continental money of the American Revolution. Do you want to issue paper money in such quantities as will call forth again the expression, 'not worth a continental'?" What else could our fathers have done in the dark days of the Revolution? No gold nor silver was obtainable. They had to have money of some kind with which to pay the soldiers so they might provide the necessities of life for their dependents. It was simply one of the devices used to win independence. Then came the Civil War and the issuance of Confederate money. What else could the South do? They were making a life-and-death struggle. They had no gold and silver, and could get none to pay their soldiers and buy munitions of war. They staked their all on the fate of battle, and lost. Such citations are not conclusive proof, by any means, that the banker group of the Atlantic border should continue to dominate the financial affairs of the National Government to the detriment of our farming population.

THE GOLD BASE

Our opponents ask, "What is behind this currency?" I reply, "The farmers' farms, the faith in the credit of the Federal Government and the gold buried in our Treasury." There is a far larger percentage of gold on deposit in the Treasury of the United States than is to be found in the vaults of any other country, larger in total and in ratio to the currency. The United States owns and has in its vaults almost one-half of the monetary gold of the world. I believe that the theory that all currency should have a metal base of gold or silver makes a fetish of metals. It is true that our ancestors have had, for countless generations, great veneration for gold and silver, and this has become imbedded in our thought. We shall shed it in time, but it will take time and economic leadership. Millions have believed and still naively believe that there is intrinsic value in gold and silver, and that they were especially designed by the Creator for use as money.

Long centuries ago when our ancestors first commenced to exchange the products of their labors they bartered; then gold and silver were used as one measure of the value of the ox sold or the slave purchased, and gradually came to be the only measures of value, or the constant medium of exchange. Those people who possessed large quantities of these precious metals had an advantage which gave them a commanding place in the world. The search for precious metals became the incentive which sent men forth on uncharted seas and opened up geographic knowledge of the earth. Gold and silver still play the leading part in commerce. The gold ounce is still the measure of the balance in the world's trade.

The careful student of history will find many times when prosperity was achieved without the help of the precious metals. Generally speaking, when gold and silver have come in quantity from Mother Earth, and have been poured into the channels of business, there has been a revival of prosperity, and when these metals have disappeared from circulation or gone into hiding or have been accumulated in a few hands man has retrograded in the arts of civilization. Our fathers could clearly recall the impetus toward material progress by reason of the discovery of gold in California and Australia 67 years ago. Many on this floor are old enough to remember the difficult financial days of 1893 and 1894. We who were then active know that a new and prosperous period dawned when out of South Africa came the tons of gold which went into the channels of business. Then from the frozen North came more gold found by the boys who climbed the Chilkoot Pass in the dreary days of 1898.

For many years legal money has, in most countries of our western civilization, been limited to gold through legislative act. The gold of the world was quadrupled from 1890 to 1898 and doubled again before the World War broke out in central Europe. In the light of these historic facts, it is no wonder that a great number of the American people still believe in metal money and are enchanted by the luster and glamour of gold and silver. I cannot think that civilization would disappear from the earth if gold and silver were to come in such quantities that they would be as cheap as wood or coal or if they were to disappear altogether.

Gold and silver are valuable in the arts and sciences and convenient as mediums of exchange, but that they are the nucleus of civilization is pure fiction. Being somewhat of a realist, I think it better to deal with this frailty of belief as we find it, rather than to attempt to disregard age-old traditions. Hence, I welcome the proposed amendment to this bill which provides that a gold reserve may be created in the Treasury for a substantial percentage of all currency issued under its terms. This gold is to be a security in addition to the mortgaged farms and the faith and credit of the Government of the United States.

According to its May 6 statement, there is in the United States Treasury $10,248,949,352 in gold. This same statement gives $4,467,568,907 as the amount of outstanding currency issued against the gold base, only a relatively small portion of which is earmarked for other purposes.

It was admitted to me by high authority a year ago that there was in the Treasury $130 in gold to redeem every $100 in currency outstanding. If that was true a year ago, and I have every reason to believe it was underestimated, the amount of gold and silver in the Treasury to redeem every outstanding hundred dollars in currency is nearly $200 today. The law requires a 40-percent base for the issuance of currency. In the light of this, why is it necessary to carry 130 or 200 percent, or whatever it may be? By all who know anything about it, it is admitted that there is more free gold in the Treasury than there is currency outstanding. Suppose a great gold strike should come, and tons of gold should come from Mother Earth. Ever in the past such an influx of money has meant prosperity, business, happiness. Under the present arrangement that stream of the yellow metal would simply move into the vaults in Kentucky, into the ground from which it came, and would have no appreciable effect upon prices or upon business. I think a fair analysis of the daily statement of the United States Treasury shows that if this entire currency issue of three billions is issued and loaned to farmers, as provided under the terms of this bill, there will still be hundred-percent backing or base against every dollar of currency outstanding. How, then, can it justly be called "phoney money" or unjustifiable inflation?

WORLD TRADE

Many on this side of the aisle approve the efforts of our Secretary of State to revive world trade, but we bitterly resent his often-repeated sacrifices of agricultural prices to promote the foreign sale of the products of industry. We of the Pacific Northwest deeply regret that he found it necessary to reduce the duty upon the importation of lumber, cattle, and grain from our neighbor on the north for the benefit of the automobile manufacturers in Detroit. Many who voted for the reciprocal tariff which placed in his hands this great power will refuse to vote to continue that power if the desire to promote amity and friendship with foreign countries leads to the sacrifice of the man behind the plow. He should not be called upon to bear all the burden of trade revival. If national isolation must come—and many believe it is inevitable, though deplorable—we must prepare ourselves to bar from our land everything we can produce here and reserve American markets for American industry, and agriculture as well. Prices paid for farm products must be

such as to leave not only the cost of production but a fair margin of profit. If the days of isolation must come, the only solution will be along the lines of the pending bill.

FARM-RELIEF LEGISLATION

The majority of the farmers of America are ready to admit that the Triple A worked marvelous results, especially for the larger farmers. These same farmers have great hope that the present temporary law for soil conservation will prove beneficial. We must supplement it with further credit legislation as embodied in this bill, and we must particularly care for the small farmer. The thinking and the observing farmers realize full well that our agricultural problems are not yet solved. They know that if America is forced to give up its foreign markets for surplus agricultural products, drastic forms of production control must come in some form. It has been constantly reiterated that agriculture is basic. Those who face the storms and perform the labor, those who raise the foods and the fibers, have a right to try this method of refinancing their debts, especially in the face of the partial failure of other methods. Should this measure be defeated, there will be such a storm of protests and discontent that I fear attempts in some places to set aside the due and regular processes of the law. Disheartened, discouraged, and financially wrecked farmers, having lost confidence in government, may lose self-control. The banking group of the Atlantic border, which has reigned supreme here in Washington since the days of the War between the States, should not forget that organization and methods of communication are so highly perfected that people cannot now be kept in ignorance of the facts about their public affairs. The banking and financial world of America must take its choice between increased commodity prices or wholesale repudiation of debts and final bankruptcy, not only for farm but factory as well.

WILL HELP END UNEMPLOYMENT

No thoughtful person can view with complacency the present desperate situation of our country in regard to unemployment. Times are better for thousands and millions, but there has not been the expected decrease in the unending line of the unemployed. There has been practically no decrease in the immense sums that must daily flow from the Federal Treasury to feed the hungry and clothe the unfortunate. Every effort has been made to solve this major problem, and it has been faced with sympathy and courage, but it still baffles us. This legislation will keep thousands upon thousands from the dreaded breadline. It will afford opportunity for thousands to return to farm life. It will, many of us believe, be the forerunner of a degree of prosperity and advancement in the agricultural communities that will stimulate the entire Nation.

WILL RESTORE FARM CONFIDENCE

This bill is the spearhead of the rise of the agrarian West against the dominating and governing banker group of the Atlantic border. In this bill is wrapped up the hopes and ambitions of thousands of broken, despondent people. Its passage by this Congress and its enforcement will be the opening of a new era in the affairs of America. No one who has not had the experience can realize the despair and hopelessness of the farmer and his family when the service of summons and complaint is made by the mortgagee. It means taking his home as well as his business and setting his family out on the highroad—all because of conditions over which he has no control. The conditions imposed upon him made it impossible for him to gather a sufficient number of bushels of wheat, pounds of pork, or whatever products he may have, to buy in the markets of the world the necessary number of ounces of gold or silver or their equivalent, with which to pay the annual debt of interest and principal. His life has been blighted by debt and that fateful heartless mortgage—a word made from two Latin words, "mort" meaning death and "gage" meaning grip.

This is not the first fight the farmer has made, nor will it be his last battle. Some of us were on the firing line during the prolonged struggle to shift a part of the tax burden from real property to incomes. Our adversaries were the same groups now denouncing this legislation. Before long the farmer will center his attention on the matter of farm machinery. He is now demanding the facts regarding the relative price movements of farm machinery and farm products since 1914. He wants to know about the concentration of control of the manufacture and distribution of such machinery and equipment.

As a Representative and a farmer acquainted with the life and struggles of farmers, I ask for your votes in support of this measure. In a certain sense it may be revolutionary; in another it is simply putting into effect the law we have already upon our statute books. Much has been done for farmers by this administration. Something more must be done to make the life of the American farmer more tolerable. He must have more opportunity to enjoy "the durable satisfaction of life." He must find it possible to realize some of his aspirations. He is entitled to security and stability in his important work. He demands it. He will see that he gets it.

Those who refuse to support this bill must accept the responsibility of a substitute satisfactory to the farming world. No such substitute has been offered. This bill cannot safely be rejected with indifference as to the result.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. HULL].

Mr. HULL. Mr. Chairman, no measure has been before Congress in years which has had such strong support among the people of Wisconsin, and the Northwest in general, as the Frazier-Lemke bill. The interest in the bill, and the demand for its passage, due to conditions which compel the people of that section to ask for this form of national legislation. The demand for it has not been confined to farmers alone, nor has its support been given only by the Farmers Union, the Grange, the Farm Federation, and other farm organizations. County boards in many counties of our State, commercial organizations, and city councils have united in asking for the legislation. The Wisconsin Federation of Labor is heartily back of those demands.

The Federal Government has been extremely liberal in extending credit facilities to the railways, banks, trust and insurance companies, and even to large industrial organizations which have borrowed liberally from the Federal Treasury through the R. F. C. to enlarge their plants and equipment, and to build new industries. The amount which has been loaned to these agencies is far in excess of the total farm debt.

When it comes to the farm-mortgage situation, however, its activities have been limited to less than two billions of dollars of land-bank credit. Local banks, because of strict Government regulations, have been denied the opportunity of easing the farm-mortgage situation. In the past few weeks, foreclosures have been proceeding at the rate of 2,000 per week. About one-fourth, or 500 foreclosures per week, have been brought by the Federal land banks, which have been extremely arbitrary in the making of loans, even more arbitrary in the extension of loans, and have set an example of hard-boiled attitude as to farm borrowing.

At the rate we are proceeding in this calendar year, over 100,000 farm mortgages will be in the process of foreclosure. Within another year 100,000 farmers, or approximately 500,000 farm people, will have been evicted from the title to their lands. In other words, within a year the country faces the possible eviction of more people from their farm homes than now reside in the entire city of Washington.

Much has been said about the continually increasing number of unemployed and the number on the relief rolls. No Government agency, however, has undertaken to ascertain how many have been driven from farms already foreclosed. Even in the plans of the Resettlement Administration for the rehabilitation of farmers on marginal lands, options are being taken on the lands which have been sold under foreclosure to provide new homes for those desiring

rehabilitation, and many will be purchased for that purpose. In every such instanace they are driving another farmer from his farm and home into the ranks of the unemployed.

The Government has been extremely liberal in the extension of foreign credit. Over $12,000,000,000 are due our Treasury from foreign governments for war debts, and no attempt whatsoever is being made to enforce collection of the principal or even the interest on those loans. Many of those loans were made at a lower rate of interest than is provided in the Frazier-Lemke bill. Over a million dollars a day of American taxpayers' money is being put into the Treasury because of the interest on debts which the European nations owe us. In fact, that portion of our national debt represented in the European war loans calls on the taxpayers of this country for an annual interest charge nearly as great as the interest on all the farm-mortgage loans. There is no attempt being made of compelling those nations which are spending billions for new armaments and ostensively forcing our Government to spend its billions for the same purpose, to pay their indebtedness to us.

Objections are made to various features of the Frazier-Lemke bill. Those who are the objectors, however, fail to offer any other plan of refinancing the farm-mortgage indebtedness and saving the farms to our farmers. Their objections are to extending the Government credit to farmers while continuing to extend it to foreign countries and to our own commercial and industrial organizations. In other words, the Government which spends billions for the relief of many of those hard pressed by the depression, closes the door in the face of the farmers who are pleading for an opportunity to retain their farms, lessen the depression, and help bring back a period of prosperity.

Unless the Frazier-Lemke farm refinancing bill shall be passed at this session, there will be no measure passed. The acute condition which exists in the northwest sections of our country will grow even worse. The land banks of this country in the past 2 years have advanced $57,000,000 to pay the local taxes on farms on which they hold mortgages. The Federal land banks now hold thousands upon thousands of farms which they have obtained by foreclosure proceedings, and they are continuing to add to that number.

This situation is due not only to the depression, nor to the dry years culminating in the drought of 1934. Farmers long have been forced to compete in the markets of their own country with foreign farm products, which in the past 4 years has caused our country to send to foreign farmers for farm products more billions than are asked for in this farm-refinancing plan as contained in the Frazier-Lemke bill. Continuing to sacrifice their markets by tariffs too low for proper protection, the negotiation of reciprocal-trade treaties, which further limit our domestic markets for our own producers, and many other policies, have resulted in conditions back of the demands for the passage of the Frazier-Lemke bill. If it fails to pass, these conditions will grow so much worse that a greater agricultural problem than we now have will face future Congresses and the Nation.

I have worked earnestly from the beginning of this Congress for the enactment of this legislation. I shall vote for it, and shall continue to work for it, with the hope that Congress will not turn a deaf ear to the millions of farmers and millions of other rural people who are being driven to the wall through no fault of their own. [Applause.]

Mr. LEMKE. Mr. Chairman, I yield 7 minutes to the gentleman from Texas [Mr. BLANTON].

Mr. BLANTON. Mr. Chairman, there may be some gentlemen farmers in this House who own farms and someone else does the farming for them, who may be against this bill, but I challenge the membership of the House to show me one single man who has been on a farm, who has done the farming himself, who has had to do his own plowing, his own planting, his harvesting, and his selling, who is against this bill. Show me one.

Mr. FADDIS. Will the gentleman yield?

Mr. BLANTON. I yield to the gentleman from Pennsylvania.

Mr. FADDIS. I am one.

Mr. BLANTON. The gentleman quit the farm, did he not? He found out he could not make a living there.

Mr. KLEBERG rose.

Mr. MAY. And here is another one.

Mr. BLANTON. Every few years the farmer who has to get his living out of the ground found some money lender was taking a part of his acreage away from him under a mortgage. He had to quit and get out and come to Congress in order to make a living. [Applause.]

Mr. Chairman, I have been on a farm. I have seen just as fine a young crop of cotton as you ever saw, a crop that promised a yield of a bale per acre, and then the drought or the boll weevils or the bollworm came along and there would not be a pound to the acre. I have seen a fine crop of corn that promised a yield of 60 bushels to the acre. You could ride down the corn row on a big horse and it would be above your head. The first thing you knew the grasshoppers came along and ate it all up and you would not get a bushel to the acre. I have seen fine fields of wheat and oats. Rust would come in or a storm would come along and there would not be a bushel to the acre. The farmer of the country has more natural enemies than any other person who has to make his living. The farmer has to suffer the drought. He has to suffer too much rain. He has to contend with early frost. He has to contend with this enemy and with that enemy, and when he appeals to Congress the cry is "inflation."

Are you fellows over here who are against this bill, who helped to vote for the law that gave Charley Dawes the right to borrow $90,000,000 for one bank, and the money has not been paid back yet, afraid of inflation? Why were you not afraid of inflation when you did that for Charley Dawes and other big bankers of the country? You are much afraid now.

Mr. Chairman, I want to do something for the farmers of this country. For 50 years I have seen them growing poorer and poorer. I have seen them forced to give up their farms. I have seen the money lenders take the acreage away from them. The time has come when we should do something for the farmers, and I am going to give them my vote on this bill. I do not care what it costs me in my district. [Laughter and applause.]

Mr. Chairman, the Agricultural Committee is one of the responsible committees of the House. Some of the leading Members of the House form this committee. What are we going to do about this bill when a committee like the Agricultural Committee votes for a bill, reports it out, and puts it on the calendar? Has my distinguished colleague from Texas, the head of the committee, filed any minority report against this bill? No. I have been looking for it. There is not a minority report filed against it. If it is a bad bill, I look to him as my leader on the Agricultural Committee to tell me what is the matter with it. He should tell me in a minority report if it is a bad bill. Then I shall follow him, but he has not done this, and I am following his committee that has reported out this bill and put it on the calendar, and I was not afraid to sign that petition, although they told me the bill did not come from a Democrat. It did come from a distinguished former attorney general of his State. [Applause], and whether it came from our side or not, it comes from a proper source. It has the proper stamp of approval on it. It has the stamp of the Democratic Committee on Agriculture of this House, and I am going to vote for it, Governor, just like you are.

Mr. PIERCE. Good for you.

Mr. BLANTON. And we are going to help to pass it, and we are going to tell agriculture we are behind them.

Look at this. Here is a letter I have just traced, received from the Treasury Department—the Bureau of Customs—

which tells me that on the steamship *American Legion* that arrived in port March 12, 1936, from the Argentine they brought 74,040 cases of canned beef.

From the Argentine—to compete with the beef that is raised in my district. Oh, I saw thousands of good calves in west Texas—up in the Amarillo country and in the Abilene country—taken out and shot; and they would not even let the poor people eat them. Henry Wallace shot them, and now he is permitting 74,000 cases of canned beef on one little boat to come in here from the Argentine. It ought to stop. We ought to protect the farming interests of this country better than that. [Applause.]

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I ask unanimous consent that every Member who has spoken on this bill today may have permission to revise and extend his remarks, and also that I may extend my own remarks, including therein the amendments that the steering committee has approved so that the Members may know the amendments that are going to be offered to the bill.

The CHAIRMAN. The Chair is advised that a request of such a general character is usually made in the House.

Mr. LEMKE. Then, Mr. Chairman, I ask unanimous consent to extend my remarks and include therein the amendments I referred to in my remarks this morning during general debate.

Mr. MAVERICK. Mr. Chairman, reserving the right to object, if any similar objections are going to be made on the other side I shall object to this request, too.

Mr. BOILEAU. These are the remarks of the gentleman himself setting forth the amendments he has prepared and which he expects to offer to the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. LEMKE. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. WOODRUM, Chairman of the Committee of the Whole House on the state of the Union, reported that the Committee having had under consideration the bill (H. R. 2066) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve banking system, and creating a Board of Agriculture to supervise the same, had come to no resolution thereon.

EXTENSION OF REMARKS—FRAZIER-LEMKE BILL

WHO RUNS THE COUNTRY—THE BANKERS OR THE PEOPLE?—BY THEIR VOTES YOU SHALL KNOW THEM

Mr. HOEPPEL. Mr. Speaker, my experience and observation in the Congress has but confirmed the views that I had before I became a Member; that is, that the bankers of the United States have more influence in the Congress than do the people themselves.

I left the Republican Party in 1932 because I considered that there was more promise for the people in the Democratic Party than in the Republican Party under the leadership of the "old guard." I stood beside Mayor LaGuardia, of New York, and only a short distance behind the President, on March 4, 1933, when he delivered his inaugural address, in which he promised to drive the money changers from the temple. Mr. LaGuardia, a Republican and former Member of Congress, appeared to be as enthusiastic as I in reference to the pronouncements of the President, and I am satisfied that millions of our citizens felt the same as we did—that here, at last, we had a President who represented the people and who would drive the money changers from the temple.

I cannot speak for these millions or for Mr. LaGuardia, but I can speak for myself, and I believe that I reflect the views of many of my fellow citizens when I state that in my opinion not only have we failed to drive the money changers from the temple but they are now more firmly established in the halls of finance than ever before, and thus far absolutely no effort has been made to prevent them from continuing their trespassing on the rights of the people and their usurpation of the constitutional prerogative of the Congress to coin money and regulate the value thereof. People throughout the land are asking themselves this question: What keeps the money changers in the temple? The answer is simple—money changers. The international banker and his fellows are still working at the same old game, exchanging money for propaganda to perpetuate the system which permits them to exact their pound of flesh from our distressed citizens, home owners, and farmers.

THE THREE P'S OF THE POLITICIANS—PARTISANSHIP, PATRONAGE, AND THE PUBLIC

Many officeholders appear to be actuated primarily by partisan considerations. They are influenced, if not actually controlled by patronage, and although they profess to have a sincere interest in the public, they appear to conveniently overlook that interest when it comes to a question of an issue between the people and the bankers.

We read a great deal about the Magna Carta of personal liberty. I am hopeful that before this session of Congress concludes we may give to the people a magna carta of financial and monetary liberty so that our Nation may go forward under the Constitution and in the observance of every provision thereof.

LET THE PEOPLE DECIDE

The vote on the Frazier-Lemke bill will show to the world the Members of Congress who are interested in the people and it will show just as decisively the Members who feel that the private, international banker should control the finances of our Nation. We might well reorganize our political parties, separating the sheep from the goats on the basis of their vote on this important measure, undeniably in the people's interest, which has been held up in the Congress for the past four sessions, and which comes to us now for a vote only after a determined battle on the part of the distinguished gentleman from North Dakota [Mr. LEMKE] and those of us who have cooperated with him. We shall soon know whether the controlling vote of the Congress represents the voice of the people or the voice of the money power.

If the Frazier-Lemke bill carries in the House, I advocate the circulation of a resolution, which I will be pleased to head, pledging the signatories to hold Congress in session until the Frazier-Lemke bill has been acted upon by the Senate, and if passed by the Congress, until it has been acted upon by the President, so that there will be no danger that after passage by the Congress it will die aborning in a pocket veto. In my opinion, this is an issue of the people versus the bankers, and as a Democrat who left the Republican Party because, under the "old guard", it had sold out to Wall Street, I hope that my own party, the Democratic Party, will show itself today in the Congress to be the champion of the people's cause against the selfish interest of the financial power, and that the faith which the people have in us may thus be confirmed and strengthened.

WHO IS RESPONSIBLE FOR THE CONTINUED ISSUANCE OF TAX-EXEMPT BONDS?

I was present on the floor of the Congress and witnessed a battle there between the chairman of the Committee on Banking and Currency and the chairman of the Committee on the Judiciary in which both were clamoring for jurisdiction of a bill which had been proposed to abolish tax-exempt bonds. The Committee on the Judiciary was given jurisdiction of such legislation, and thus far has failed to act. I was recently informed that the failure of the committee to take up legislation to abolish tax-exempt bonds may be attributed to administration pressure against its enactment.

If this is true, it appears the administration is in favor of the continued issuance of tax-exempt bonds, to which all thinking Americans must object.

There is no reason why the American people should pay interest on their own credit, and it is for this reason that I am so anxious to see the enactment of the pending Frazier-Lemke farm refinancing bill, which, if enacted into law, will

bring mortgage relief to our distressed farmers and at the same time will bring billions of dollars of profit to our Government in interest payments, which under our present system accrue to the private banker. Furthermore, the enactment of the Frazier-Lemke bill will set an admirable precedent for the enactment of similar legislation in the interest of the urban home owner and also for the extension of credit to legitimate business at not over 1½-percent interest. God help the American people if we as a people are to continue to be subject to the power of unearned, entrenched wealth in the hands of the international banker and his fellows!

Those opposed to the Frazier-Lemke bill have sought to defeat it by terming it "inflationary" without the slightest basis of fact for such a charge. Under existing law—made by the bankers—we are authorized to coin two and one-half times as much paper money as there is gold in the Treasury. Today we have over $10,200,000,000 in gold which we are soon to bury in the ground for safekeeping, and we have only one-half of this amount in circulation in paper money. Under existing law, which, I reiterate, the bankers made, we are authorized to print approximately $25,000,000,000 Treasury certificates or notes, yet the Frazier-Lemke bill, which calls for only $3,000,000,000 in Treasury notes, is termed inflationary. If we enact this bill, there will be only 80 cents in paper money for every $1 in gold which we have buried. This certainly cannot be considered as inflationary if we have 20 percent more gold than we have paper money in circulation.

We should bear in mind that Treasury notes cannot be destroyed by the Federal Reserve System in lieu of bonds. It is for this reason that the bankers oppose the Frazier-Lemke bill. They do not want money in circulation except such "rubber" Federal Reserve notes as they can issue or destroy, at will, to control prices for their advantage.

I have not yet filed for reelection to Congress. The enactment of the Frazier-Lemke bill and a constitutional amendment forever abolishing tax-exempt securities is of more interest to me than partisan politics. I look to the national convention of our party in the hope that our party platform will declare for a constitutional amendment forever abolishing tax-exempt bonds and establishing a more equitable system of taxation whereby those who have the wealth will be called upon to carry at least their proportionate share of our increased and increasing tax burden. If we are to have "equal justice under law", we also should have equal taxation, and no man's wealth should be tax exempt.

Let us consider for a moment the Frazier-Lemke bill in comparison with the discredited A. A. A., which I opposed. It must be admitted that the Frazier-Lemke bill will give real, substantial assistance to the distressed farmer and that at the same time, as a result of such assistance, a profit will accrue to the National Treasury in the interest payments. Contrariwise, under the A. A. A. the distressed mortgagees, farm tenants, and sharecroppers received very little benefit, while the opulent landholders, and in many instances foreign absentee landlords, obtained "agricultural relief" as high as $1,000,000 or more per individual or corporation. A comparison of these two measures shows how much more effective and just is the Frazier-Lemke farm-refinancing bill than was the A. A. A., under which a large share of the benefits which were intended for the distressed farmers were absorbed by wealthy landlords. Unlike the A. A. A., which increased the prices of farm products to the consumer—we are still suffering from the high price of meat attributable to this act—the Frazier-Lemke bill is not an indirect sales tax on foodstuffs but it is a real, legitimate aid to the farmer, without the intervention of the international banker, and the profits under this bill will go to the Government and not to Wall Street.

I for one am proud of the opportunity to cast my vote in support of the Frazier-Lemke bill. If we are to progress we must legislate for the people who are in distress and not for those who have brought about our present depression and who thus far have profited out of all proportion in so-called relief measures. In the storm which has overtaken our economic ship of state the financial interests have ensconced themselves safely in the lifeboats and have been given every possible assistance, while the unfortunate shipwrecked citizens who are floundering in the waters of depression, millions of them without life preservers of any kind, have been considered as "the least among these." I hope that before this Congress adjourns a life line strong enough to bring them safely to shore will be thrown to these unfortunate struggling citizens who, notwithstanding their desperate plight, still have the utmost faith in our promises to save them.

Shall we dissipate their hopes? Shall we play the part of hypocrites and tell them with one voice that we are concerned over their plight and will do all in our power to rescue them and provide for them "the abundant life", while at the same time we ignore their immediate needs and give every aid and succor to those who are already safely in the lifeboats and who have more than enough of this world's goods? If we abandon them now, they will be indeed "the forgotten men."

I reiterate, the Frazier-Lemke farm-refinancing bill, free from profits to the international banker, is the real magna carta of financial and monetary liberty, and the action we take on this measure and on the abolition of tax-exempt securities will stamp every one of us with the brand we deserve—either for the people or for the bankers.

CALENDAR WEDNESDAY

Mr. BANKHEAD. Mr. Speaker, I desire to submit a unanimous-consent request. I ask unanimous consent that business on Calendar Wednesday tomorrow may be dispensed with so that we may conclude the pending bill.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

HOUR OF MEETING TOMORROW

Mr. JONES. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 o'clock tomorrow.

The SPEAKER. Is there objection?

Mr. SNELL. I shall not object, but I should like to ask the majority leader if he will tell us what the program is for the rest of the week and why it is necessary to meet at 11 o'clock tomorrow?

Mr. BANKHEAD. I will state that there are several conference reports which we are anxious to dispose of and which have been pending for a long time. We hope that after the pending bill is disposed of we can take up the conference reports, one of which is the Interior Department bill, which is rather controversial and will take probably a day.

Mr. SNELL. You will take that up on Thursday?

Mr. BANKHEAD. Yes; if the pending bill is concluded.

Mr. LAMBERTSON. I have understood that the gentleman from Colorado [Mr. TAYLOR] will not be back until the first of the week.

Mr. BANKHEAD. The last information I had was he would be able to be here this week. I will say that there is no other legislative program yet arranged because we hope to take up the conference reports.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEAVE TO ADDRESS THE HOUSE

Mr. HANCOCK of North Carolina. Mr. Speaker, I ask unanimous consent that on Thursday after the reading of the Journal and disposition of matters on the Speaker's table I may be permitted to address the House for 10 minutes.

The SPEAKER. The Chair will entertain that request in the event that the pending bill is completed.

Mr. HANCOCK of North Carolina. My request is made on that understanding.

The SPEAKER. Is there objection?

There was no objection.

EXTENSION OF REMARKS

Mr. JONES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their own remarks on the pending bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WHITE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include therein an address by the Assistant Secretary of the Interior.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

Mr. SNELL. I object.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolutions of the Senate of the following titles were taken from the Speaker's table and under the rule referred as follows:

S. J. Res. 226. Joint resolution authorizing the President to invite foreign countries to participate in the San Francisco Bay Exposition of 1939 at San Francisco, Calif.; to the Committee on Foreign Affairs.

S. J. Res. 229. Joint resolution providing for the contribution by the United States to the expense of the celebration by the State of Arkansas of its admission to the Federal Union; to the Committee on the Library.

SENATE ENROLLED BILL SIGNED

The Speaker announced his signature to an enrolled bill of the Senate of the following title:

S. 3161. An act to amend section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia, and so forth", approved March 3, 1925, as amended.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 21 minutes p. m.), the House under the order just adopted adjourned until tomorrow, Wednesday, May 13, 1936, at 11 a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII.

Mr. DUFFY of New York: Committee on the Judiciary. H. R. 12329. A bill to reenact section 259 of the Judicial Code, relating to the traveling and subsistence expenses of circuit and district judges; without amendment (Rept. No. 2607). Referred to the Committee of the Whole House on the state of the Union.

Mr. MILLER: Committee on the Judiciary. S. 3043. An act for the relief of the State of Maine; without amendment (Rept. No. 2608). Referred to the Committee of the Whole House on the state of the Union.

Mr. LAMBETH: Committee on Printing. House Joint Resolution 583. Joint resolution authorizing the Veterans' Administration to prepare and publish a compilation of all Federal laws relating to veterans of wars of the United States; without amendment (Rept. No. 2610). Referred to the Committee of the Whole House on the state of the Union.

Mr. LAMBETH: Committee on Printing. S. 3440. An act to amend certain acts relating to public printing and binding and the distribution of public documents and acts amendatory thereof; without amendment (Rept. No. 2611). Referred to the Committee of the Whole House on the state of the Union.

Mrs. GREENWAY: Committee on the Public Lands. H. R. 12062. A bill to authorize the Secretary of the Interior to accept unsurveyed lands in numbered school sections in the State of Arizona in exchange for certain other lands, and for other purposes; with amendment (Rept. No. 2612). Referred to the Committee of the Whole House on the state of the Union.

Mrs. GREENWAY: Committee on the Public Lands. H. R. 11183. A bill to provide for the acquisition of certain lands by the town of Benson, Ariz., for school and park purposes; without amendment (Rept. No. 2613). Referred to the Committee of the Whole House on the state of the Union.

Mr. GREEVER: Committee on the Public Lands. S. 3805. An act to authorize the Secretary of the Interior to reserve certain lands on the public domain in Nevada for addition to the Walker River Indian Reservation; without amendment (Rept. No. 2614). Referred to the Committee of the Whole House on the state of the Union.

Mr. GREEVER: Committee on the Public Lands. S. 4230. An act to amend section 28 of the Enabling Act for the State of Arizona, approved June 20, 1910; without amendment (Rept. No. 2615). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. S. 4026. An act to amend the National Defense Act of June 3, 1916, as amended; without amendment (Rept. No. 2616). Referred to the Committee of the Whole House on the state of the Union.

Mr. HILL of Alabama: Committee on Military Affairs. S. 4190. An act to amend the act approved February 7, 1913, so as to remove restrictions as to the use of the Little Rock Confederate Cemetery, Arkansas, and for other purposes; without amendment (Rept. No. 2617). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. GREEVER: Committee on the Public Lands. S. 4374. An act for the relief of Ruth Edna Reavis (now Horsley); without amendment (Rept. No. 2609). Referred to the Committee of the Whole House.

Mr. TURNER: Committee on Military Affairs. S. 1464. An act for the relief of Frank P. Hoyt; without amendment (Rept. No. 2618). Referred to the Committee of the Whole House.

Mr. TURNER: Committee on Military Affairs. S. 3067. An act for the relief of A. J. Watts; without amendment (Rept. No. 2619). Referred to the Commitee of the Whole House.

Mr. TURNER: Committee on Military Affairs. S. 3128. An act for the relief of Daniel Yates; without amendment (Rept. No. 2620). Referred to the Committee of the Whole House.

Mr. TURNER: Committee on Military Affairs. S. 3663. An act for the relief of William Connelly, alias William E. Connoley; without amendment (Rept. No. 2621). Referred to the Committee of the Whole House.

Mr. TURNER: Committee on Military Affairs. Senate Joint Resolution 110. Joint resolution authorizing Brig. Gen. C. E. Nathorst, Philippine Constabulary, retired, to accept such decorations, orders, medals, or presents as have been tendered him by foreign governments; without amendment (Rept. No. 2622). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DEMPSEY: A bill (H. R. 12676) to provide for the establishment of an agricultural experiment station within the Middle Rio Grande Conservancy District in the State of New Mexico; to the Committee on Agriculture.

By Mr. HAMLIN: A bill (H. R. 12677) to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the founding of York County, Maine; to the Committee on Coinage, Weights, and Measures.

By Mr. O'MALLEY: A bill (H. R. 12678) to provide for the control of floodwaters in the Wisconsin Valley, to improve navigation on the Wisconsin River and its tributaries, to provide for the irrigation of arid and semiarid lands, and for other purposes; to the Committee on Flood Control.

By Mr. ROBINSON of Utah: A bill (H. R. 12679) to correct the description of a portion of the Fort Douglas Military

Reservation, State of Utah; to the Committee on Military Affairs.

By Mr. LEA of California: A bill (H. R. 12680) to regulate the transportation and sale of natural gas in interstate commerce, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mrs. NORTON (by request): A bill (H. R. 12681) to amend section 1 of the act of Congress entitled "An act to fix the salaries of officers and members of the Metropolitan Police force, the United States Park Police force, and the fire department of the District of Columbia", approved May 27, 1924, and for other purposes; to the Committee on the District of Columbia.

By Mr. O'CONNELL: A bill (H. R. 12682) authorizing the construction and operation of two American trans-Atlantic airships; to the Committee on Interstate and Foreign Commerce.

By Mr. BUCKLER of Minnesota: A bill (H. R. 12683) authorizing the Secretary of Commerce to establish a fish-cultural station in northern Minnesota; to the Committee on Merchant Marine and Fisheries.

By Mr. CASTELLOW: A bill (H. R. 12684) providing for the sale of certain lands within the Fort Benning Military Reservation, Ga.; to the Committee on Military Affairs.

By Mr. GASQUE: A bill (H. R. 12685) granting the consent of Congress to the county of Horry, S. C., to construct, maintain, and operate a free highway bridge across the Waccamaw River, at or near Red Bluff, S. C.; to the Committee on Interstate and Foreign Commerce.

By Mr. McLAUGHLIN: A bill (H. R. 12686) authorizing the Chief of the Weather Bureau to enter into 3-year contracts for airplane observation flight services; to the Committee on Agriculture.

By Mr. MAVERICK (by request): A bill (H. R. 12687) to provide for the protection of workmen on public buildings; to the Committee on Labor.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CANNON of Missouri: A bill (H. R. 12688) granting a pension to Hattie B. Roberts; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN: A bill (H. R. 12689) for the relief of William McKinley Gill; to the Committee on Military Affairs.

Also, a bill (H. R. 12690) authorizing the President of the United States to present, in the name of Congress, a Medal of Honor to Thomas E. Langdon; to the Committee on Military Affairs.

Also, a bill (H. R. 12691) granting a pension to Harriett M. Hughes; to the Committee on Invalid Pensions.

By Mr. SHANLEY: A bill (H. R. 12692) for the relief of David W. Morgan; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10871. By Mr. CULLEN: Petition of the Bricklayers' International Union, Local No. 9, Brooklyn, N. Y., endorsing and supporting the Wagner-Ellenbogen housing bills (S. 4424 and H. R. 12164); to the Committee on Banking and Currency.

10872. By Mr. HILDEBRANDT: Resolution of the American Legion, favoring the construction of a veterans' hospital at some point east of the Missouri River; to the Committee on World War Veterans' Legislation.

10873. By Mr. JOHNSON of Texas: Memorial of G. P. Todd, of Ennis, Tex., in behalf of the Smith resolution, regarding payment of cotton-pool certificates; to the Committee on Agriculture.

10874. By Mr. KENNEY: Petition of the North Hudson Real Estate Board, Inc., requesting the Interstate and Foreign Commerce Committee to favorably consider the Copeland-Kenney bill (H. R. 31) now before the House of Representatives; to the Committee on Interstate and Foreign Commerce.

10875. Also, resolution of the executive committee of the Newark Newspaper Guild, urging the President and Congress to continue the Federal arts projects on a national basis under direct Federal control, and requesting resolution be sent to the President and to Members of Congress; to the Committee on Appropriations.

10876. Also, petition of the American Association of University Women, Grand Junction, Colo., favoring the pure food and drug bill with elimination of provisions permitting claimant whose goods have been seized to require trial in a court in his own district; preventing multiple seizures of misbranded products; and urging the retention of enforcement of advertising provisions of the act under the Food and Drug Administration; to the Committee on Interstate and Foreign Commerce.

10877. By Mr. PFEIFER: Petition of the Bricklayers' International Union, Local No. 9, Brooklyn, N. Y., urging support of the Wagner-Ellenbogen housing bills (S. 4424 and H. R. 12164); to the Committee on Banking and Currency.

10878. By Mr. SUTPHIN: Petition of the executive committee of the Newark (N. J.) Newspaper Guild, commending the Federal arts projects of the Works Progress Administration, and urging that same be continued on a national basis under direct Federal control; to the Committee on Appropriations.

10879. By Mr. TREADWAY: Petition of the custodial employees of the Post Office and Treasury Departments in Boston, Mass., urging the enactment of the Boylan bill; to the Committee on the Civil Service.

SENATE

WEDNESDAY, MAY 13, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Tuesday, May 12, 1936, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

MESSAGE FROM THE HOUSE—ENROLLED BILL SIGNED

A message from the House of Representatives by Mr. Haltigan, one of its reading clerks, announced that the Speaker had affixed his signature to the enrolled bill (S. 3161) to amend section 13 (c) of the act entitled "An act to provide for the regulation of motor-vehicle traffic in the District of Columbia, etc.", approved March 3, 1925, as amended, and it was signed by the Vice President.

CALL OF THE ROLL

Mr. LEWIS. Mr. President, it being obvious that a quorum is not present, I ask that the roll be called.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Byrnes	Gibson	McAdoo
Ashurst	Capper	Glass	McGill
Austin	Caraway	Guffey	McKellar
Bachman	Clark	Hale	McNary
Bailey	Connally	Harrison	Maloney
Barbour	Coolidge	Hastings	Metcalf
Barkley	Copeland	Hatch	Minton
Benson	Couzens	Hayden	Moore
Black	Davis	Johnson	Murphy
Bone	Dieterich	Keyes	Murray
Borah	Donahey	King	Norris
Brown	Duffy	La Follette	Nye
Bulkley	Fletcher	Lewis	Pittman
Bulow	Frazier	Logan	Pope
Burke	George	Lonergan	Radcliffe
Byrd	Gerry	Long	Reynolds

Robinson	Smith	Truman	Walsh
Russell	Steiwer	Tydings	Wheeler
Schwellenbach	Thomas, Okla.	Vandenberg	White
Sheppard	Thomas, Utah	Van Nuys	
Shipstead	Townsend	Wagner	

Mr. LEWIS. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are absent because of illness; that the Senator from New Mexico [Mr. CHAVEZ] is absent because of a death in his family; and that the Senator from Mississippi [Mr. BILBO], the Senator from Oklahoma [Mr. GORE], the junior Senator from West Virginia [Mr. HOLT], the senior Senator from West Virginia [Mr. NEELY], the junior Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Louisiana [Mr. OVERTON] are necessarily detained from the Senate.

Mr. McNARY. I announce that the Senator from Wyoming [Mr. CAREY], the Senator from Iowa [Mr. DICKINSON], and the Senator from New Jersey [Mr. BARBOUR] are necessarily absent.

The VICE PRESIDENT. Eighty-two Senators have answered to their names. A quorum is present.

ADDITIONAL CIRCUIT JUDGE, THIRD CIRCUIT—RECONSIDERATION

Mr. DAVIS. Mr. President, I enter a motion to reconsider the vote by which the bill (S. 4457) authorizing the appointment of an additional circuit judge for the third circuit was passed on yesterday.

The VICE PRESIDENT. The motion will be entered.

DEFICIENCY ESTIMATES, DEPARTMENT OF JUSTICE (S. DOC. NO. 212)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting deficiency estimates of appropriations for the Department of Justice, amounting to $112.30, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

DEFICIENCY AND SUPPLEMENTAL ESTIMATES, DISTRICT OF COLUMBIA (S. DOC. NO. 211)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting a deficiency estimate of appropriation for the District of Columbia for the fiscal year 1933 and supplemental estimates of appropriation for the fiscal year 1936, amounting in all to $4,137.99, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

ACTIVITIES AND EXPENDITURES OF RESETTLEMENT ADMINISTRATION (S. DOC. NO. 213)

The VICE PRESIDENT laid before the Senate a letter from the Administrator of the Resettlement Administration, transmitting, in response to Senate Resolution 295 (submitted by Mr. BARBOUR and agreed to May 8, 1936), a report covering the objectives, accomplishments, and effects of the resettlement program, which, with the accompanying report, was referred to the Committee on Agriculture and Forestry.

Mr. McNARY subsequently said: Mr. President, I have just been advised that the Resettlement Administration, in response to a resolution offered by the Senator from New Jersey [Mr. BARBOUR], has submitted a report to the Senate, and in the absence of the Senator from New Jersey, and for him, I ask that the report be printed, with illustrations, as a Senate document.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a resolution adopted by the Central Labor Union of Philadelphia, Pa., and vicinity, favoring the enactment of legislation for the creation of a court of appeals for civil-service employees with employee representation thereon through a recognized union representative, which was referred to the Committee on Civil Service.

He also laid before the Senate resolutions adopted by the City Council of Greenville, S. C., and the Council of the City of Dearborn, Mich., favoring the enactment of the so-called Wagner bill, being Senate bill 4424, known as the United States Housing Act of 1936, which were referred to the Committee on Eudcation and Labor.

He also laid before the Senate a resolution adopted by Hope Council of the Sons and Daughters of Liberty, of Washington, Ill., favoring the prompt enactment of the so-called Reynolds-Starnes immigration-restriction and alien-deportation registration bill, which was referred to the Committee on Immigration.

He also laid before the Senate a resolution adopted by the joint legislative board of the four transportation brotherhoods assembled at Waco, Tex., favoring the enactment of the so-called Pettengill bill, being the bill (H. R. 3263) to amend paragraph (1) of section 4 of the Interstate Commerce Act, as amended February 28, 1920 (U. S. C., title 49, sec. 4), which was referred to the Committee on Interstate Commerce.

He also laid before the Senate a resolution of the Nonpartisan County Convention of Mountrail County, N. Dak., favoring the enactment of the so-called Frazier-Lemke refinance bill at the present session, which was ordered to lie on the table.

He also laid before the Senate a resolution adopted by the Republican Territorial Convention at Honolulu, Hawaii, opposing the making of any changes in the organic act of the Territory of Hawaii unless such changes receive the prior approval of the people of the Territory expressed through their legislature, which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a resolution adopted by the Republican Territorial Convention at Honolulu, Hawaii, reaffirming its belief in the protective-tariff policies of the Republican Party, and favoring the broadening of the tariff policy so as to include in its benefits those who depend upon agricultural pursuits for a livelihood, which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a resolution adopted by the Republican Territorial Convention at Honolulu, Hawaii, favoring the same treatment for the Territory of Hawaii in all Federal legislation as is accorded to the States of the Union, which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a resolution adopted by the Republican Territorial Convention at Honolulu, Hawaii, favoring the enactment of legislation authorizing an Hawaiian regiment of infantry to be raised locally and for service only in the Hawaiian Islands, which was referred to the Committee on Territories and Insular Affairs.

Mr. WAGNER presented the petition of delegates of the Niagara Falls Central Labor Union, American Federation of Labor, Niagara Falls, N. Y., praying for the enactment of the so-called Walsh-Healey bill, relative to contracts for the sale of materials, supplies, etc., to the United States, which was referred to the Committee on Education and Labor.

He also presented a resolution adopted by the New York Unemployment Insurance State Advisory Council, favoring amendment of the Federal Social Security Act so as to provide that employers shall be given an allowance of credit against the Federal tax for all contributions paid by them into an approved State unemployment insurance fund, etc., which was referred to the Committee on Finance.

He also presented a resolution adopted by the Lockport (N. Y.) Board of Commerce, favoring the enactment of the so-called Pettengill bill, being the bill (H. R. 3263) to amend paragraph (1) of section 4 of the Interstate Commerce Act, as amended February 28, 1920 (U. S. C., title 49, sec. 4), which was referred to the Committee on Interstate Commerce.

He also presented a petition of sundry citizens of Elmira, N. Y., praying for the enactment of the bill (S. 4174) to foster and protect interstate commerce by authorizing the Interstate Commerce Commission to approve or disapprove of the consolidation or abandonment of carrier facilities of public service, which was referred to the Committee on Interstate Commerce.

He also presented a resolution adopted by the New York Adult Blind Aid Association, of New York, N. Y., favoring the enactment of the bill (H. R. 7122) providing for the granting of pensions by the Federal Government to certain blind persons, imposing duties upon the United States Treasurer in connection therewith, providing penalties, and making an appropriation, which was referred to the Committee on Pensions.

LOW-COST HOUSING

Mr. WAGNER presented various resolutions relative to the enactment of pending legislation for improvement in housing conditions, which were referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

PAUL LAURENCE DUNBAR APARTMENTS, INC.,
New York, April 30, 1936.

Hon. ROBERT F. WAGNER,
United States Senate, Washington, D. C.

DEAR SIR: The following resolution for the Wagner-Ellenbogen slum clearance and low-rent housing bill has been adopted by the tenant subscribers of the Paul Laurence Dunbar Apartments, Inc.:

"Whereas we, the tenants of the Paul Laurence Dunbar Apartments, Inc., feel that the passage of the Wagner-Ellenbogen slum clearance and low-rent housing bill will inure to our great benefit and we are anxious that the measure be given favorable consideration by the Congress for the following reasons:

"1. Low-income wage earners in every part of the country are obliged to occupy dwellings which are a constant menace to health and safety, to life itself.

"2. Insanitary and unsafe conditions of housing are an economic drain upon the entire community because the cost to the city of servicing them is commonly many times greater than the amount received by the city in taxes from such property.

"3. Private enterprise finds it unprofitable to provide accommodations of modern standard at rents sufficiently low to meet the needs of low-income workers and therefore it becomes the responsibility of Government to do so.

"4. The clearance of slums and the gradual rehousing of low-income families will provide for a steady flow of activity in the long dormant building industry:

"Be it therefore

"*Resolved*, That the tenants of the Paul Laurence Dunbar Apartments, Inc., hereby goes on record as favoring the purposes and the general provisions outlined in the Wagner-Ellenbogen slum clearance and low-rent housing bill."

Respectfully,

CHARLES W. JOYCE, *Secretary.*

Resolution adopted unanimously by International Longshoremen's Association, Local 1416, Miami, Fla.

Be it known and to go on record that the International Longshoremen's Association, Local 1416, Miami, Fla., do hereby adopt this resolution and to forward same to the President of these United States and also to the Congress and the Senate of the United States and do hereby urge and beseech you this 8th day of May, A. D. 1936, to pass on and enact into law the United States Housing Act, Senate bill No. 4424, introduced by Senator ROBERT F. WAGNER, and that the House of Representatives enact the identical bill introduced in said House by Congressman HARRY ELLENBOGEN, of Pennsylvania, and being H. R. 12164.

That this local go on record and adopt the following resolution:

Whereas the availability of decent sanitary and safe housing for all of the people is now recognized as a proper concern of the Government; and

Whereas the people of low income can be housed adequately only by a degree of Government aid; and

Whereas the low-income group is of necessity occupying cast-off housing in what are known as our slum and blighted areas; and

Whereas the continued maintenance of our slums is socially undesirable and an economic waste; and

Whereas the city of Miami has embarked upon a low-cost housing and slum-clearance program with the aid of the Housing Division of the Emergency Administration of Public Works; and

Whereas no funds are available to carry on this work without additional appropriations; and

Whereas it is desirable to preserve the benefits of the emergency housing experiences by providing for a permanent housing agency in the Federal Government; and

Whereas the building trades are still in need of stimulation in order to bring back a greater degree of employment; and

Whereas this resolution constitutes an emergency in that the same provides for the immediate preservation of public property and the usual daily operation of a municipal department: Now, therefore, be it

Resolved by Local 1416 of the International Longshoremen's Association, city of Miami, Fla., and to go on record that we of this organization unanimously adopt this resolution and ask the Congress of the United States, and also the Senate, to enact the above-mentioned bills into law at their earliest possible convenience.

NIAGARA FALLS CENTRAL LABOR UNION,
Niagara Falls, N. Y., May 9, 1936.

Hon. ROBERT F. WAGNER,
United States Senator, Senate Office Building,
Washington, D. C.

MY DEAR MR. WAGNER:

Whereas we in the city of Niagara Falls, N. Y., are urgently aware of the bad housing conditions here and elsewhere, of the acute housing shortage which is growing rapidly worse, of the inability of private enterprise of local initiative alone to remedy this situation, and of the suffering caused by continuous unemployment in the building trades; and

Whereas the Wagner-Ellenbogen housing bill (S. 4424, H. R. 12164) presents the first concrete forward step toward fulfillment of labor's housing program: Be it therefore

Resolved, That the Niagara Falls Central Labor Union heartily endorses the Wagner-Ellenbogen housing bill, and urges its immediate adoption by the Congress of the United States; and be it further

Resolved, That we hereby petition the Congress, while leaving the general policy and administrative set-up as it now is in the bill.

Fraternally yours,

WALTER A. KOSKE,
Recording Secretary.

LACKAWANNA CITY HOUSING AUTHORITY,
Lackawanna, N. Y., May 5, 1936.

At the regular meeting of the Lackawanna City Housing Authority, held May 4, 1936, the following resolution was passed:

"Whereas it has been proven that bad housing is detrimental to the health of the people in a community and that slums constitute an economic waste; and

"Whereas it is an acknowledged fact that good housing for persons of low income cannot be provided through the ordinary channels of private enterprise; and

"Whereas city, State, and National Governments have accepted the principles and acknowledged the obligations of governmental responsibility for the housing of persons who cannot be reached through private enterprise; and

"Whereas it is necessary for the Government to bear a certain portion of the burden of financing the clearance of slums and the construction of low-rent housing: Therefore be it

"*Resolved*, That the Lackawanna City Housing Authority endorses a bill introduced in the Senate by the Honorable ROBERT F. WAGNER, United States Senator from New York, and in the House of Representatives by the Honorable HENRY ELLENBOGEN, Congressman from Pennsylvania, which reads as follows: 'A bill to provide financial assistance to the States and political subdivisions thereof for the elimination of unsafe and insanitary housing conditions; for the development of decent, safe, and sanitary dwellings for families of low income; and for the reduction of unemployment and the stimulation of business activity; to create a United States housing authority, and for other purposes.' Be it further

"*Resolved*, That a copy of this resolution be forwarded to Hon. ROBERT F. WAGNER and ROYAL S. COPELAND, Senators from New York, and the following Representatives: Hon. JAMES MEAD, Hon. W. G. ANDREWS, Hon. ALFRED BEITER, Hon. HENRY ELLENBOGEN."

N. H. STEBBINS,
Chairman, Lackawanna City Housing Authority.
Rev. JOSEPH GLAPINSKI,
SUZANNE V. KUBIAK,
GERTRUDE WHITEHILL,
TIMOTHY N. MCCORMICK,
Members, Lackawanna City Housing Authority.

Resolution of the Lower East Side Public Housing Conference, 265 Henry Street, N. Y.

Whereas it has been proven that bad housing is detrimental to the health of the people in a community and that slums constitute an economic waste; and

Whereas it is an acknowledged fact that good housing for persons of low income cannot be provided through the ordinary channels of private enterprise; and

Whereas city, State, and National Governments have accepted the principles and acknowledged the obligation of governmental responsibility for the housing of persons who cannot be reached through private enterprise; and

Whereas private enterprise finds it unprofitable to provide housing accommodations of modern standard at rents sufficiently low to meet the needs of low income wage workers, and therefore it becomes the responsibility of the Government to do so: Therefore be it

Resolved, That the Lower East Side Community Council endorses a bill introduced in the Senate by the Honorable ROBERT F. WAGNER, United States Senator from New York, and in the House of Representatives by the Honorable HENRY ELLENBOGEN, Congressman from Pennsylvania; be it further

Resolved, That a copy of this resolution be forwarded to the President of the United States, the Honorable ROBERT F. WAGNER and ROYAL S. COPELAND, Senators from New York, and the Honorable DAVID I. WALSH, chairman of the Senate Committee on Education and Labor, and the following Representatives: Hon. HENRY B. ELLENBOGEN, Hon. EMANUEL CELLER, Hon. JAMES O'LEARY, Hon. SAMUEL DICKSTEIN, Hon. CHRISTOPHER D. SULLIVAN, Hon. WILLIAM

I. SIROVICH, Hon. JOHN J. O'CONNOR, Hon. MARTIN J. KENNEDY, Hon. HENRY B. STEAGALL; and be it further

Resolved, That the Lower East Side Community Council urge the chairman of the Committee on Banking and Currency to arrange for public hearings on this bill, at which time they may appear and present their arguments for its enactment.

Resolution adopted by the housing authorities of the State of New York at a State-wide conference in Syracuse on the 29th of April 1936 sponsored by the New York State Board of Housing and the conference of mayors and other municipal officials of the State of New York

Whereas housing is one of the major social problems in this country; and

Whereas housing for persons of low income is impossible without subsidy; and

Whereas it is now impossible for State and local governments to provide this necessary subsidy; and

Whereas, under Federal administration, great progress has been made in providing housing for families of low income; and

Whereas failure to continue Federal aid would seriously retard housing progress in the United States: Therefore

We, representatives of housing authorities in the State of New York, do by resolution adopted at a State-wide conference in Syracuse on the 29th of April 1936 urge upon the President and the Congress of the United States their support of Senate bill 4424, introduced by Senator ROBERT F. WAGNER, of New York, and H. R. 12164, introduced by Congressman HENRY ELLENBOGEN, of Pennsylvania.

New York City Housing Authority; Langdon W. Post, chairman; Municipal Housing Authority of Schenectady; John MacGathan, chairman; Mrs. Willis T. Hanson, Jr., vice chairman; Richard J. Carmichael; Housing Authority of the City of Port Jervis; Byron E. Harding; Syracuse Housing Authority; T. Aaron Levy, chairman; Mrs. William F. Canough; Orville H. Greene; John A. Dittman; Yonkers Municipal Housing Authority; Theodore T. McCrosky.

REPORTS OF COMMITTEES

Mr. THOMAS of Utah, from the Committee on Military Affairs, to which was referred the bill (S. 4609) to correct the description of certain land granted to the University of Utah, reported it without amendment and submitted a report (No. 2025) thereon.

Mr. CONNALLY, from the Committee on Finance, to which was referred the joint resolution (H. J. Res. 497) to permit articles imported from foreign countries for the purpose of exhibition at the International Petroleum Exposition, Tulsa, Okla., to be admitted without payment of tariff, and for other purposes, reported it without amendment and submitted a report (No. 2026) thereon.

Mr. McADOO, from the Committee on Patents, to which were referred the following bills, reported them each without amendment:

H. R. 9995. A bill to grant a renewal of patent no. 59560 relating to the emblem of the Disabled American Veterans of the World War; and

H. R. 10194. A bill granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and by unanimous consent the second time, and referred as follows:

By Mr. McADOO:

A bill (S. 4625) for the relief of Vincent Ford (with an accompanying paper); to the Committee on Military Affairs.

By Mr. POPE:

A bill (S. 4626) to create a Federal crop insurance corporation, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. ROBINSON:

A joint resolution (S. J. Res. 266) for the appointment of boards to study and report upon the Atlantic-Gulf Ship Canal project, Florida, and the Passamaquoddy tidal power project, Maine, and for other purposes; to the Committee on Commerce.

INVESTMENTS OF FOREIGN CITIZENS IN UNITED STATES

Mr. McADOO. Mr. President, I ask unanimous consent to introduce a joint resolution and have it read to the Senate—it is not very long—and then I should like to have it lie on the table.

The VICE PRESIDENT. Without objection, the joint resolution will be received, and the clerk will read, as requested.

The joint resolution (S. J. Res. 265) authorizing an inventory or census of all property, including investments of every kind and character, in the United States belonging to citizens or subjects of foreign nations, and for other purposes, was read the first time by its title and the second time at length, as follows:

Resolved, etc., That the Secretary of Commerce, in cooperation with the Securities and Exchange Commission, is authorized and directed to make an inventory or census of all property, including investments of every kind and character, in the United States belonging to or held or controlled for or on behalf of any cititzen or subject of any foreign nation, or any corporation, association, company, firm, trust, or partnership organized under the laws of any foreign nation.

SEC. 2. As used in this act—

(a) The term "property, including investments of every kind and character, in the United States", shall mean all property of every character and description, whether real, personal, or mixed, tangible or intangible, in any State, or in any Territory, possession, or place subject to the jurisdiction of the United States, including all obligations of, and capital stock or beneficial interests in, any corporation, unincorporated association or company, firm, trust, or partnership organized or existing under the laws of any such State, Territory, possession, or place, irrespective of the physical location of such obligations, capital stock, or beneficial interests.

(b) The term "person" shall, unless otherwise expressly provided, mean and include every individual who is a citizen of the United States or a resident within any State, Territory, possession, or place subject to the jurisdiction of the United States, and every corporation, association, company, firm, trust, or partnership organized or existing under the laws of any such State, Territory, possession, or place, or of any foreign nation or political subdivision thereof if residing in any such State, Territory, possession, or place.

SEC. 3. Every person who, alone or jointly with others, holds or has or shall hold or have custody or control of any property in the United States of, for, or on behalf of a citizen or subject of a foreign nation or a corporation, association, company, firm, trust, or partnership organized under the laws of a foreign nation, and any person who is or shall be indebted in any way to any such citizen, subject, corporation, association, company, firm, trust, or partnership shall, within such time or times and under such rules and regulations as the Secretary of Commerce may prescribe, make and deliver to the Secretary a full report of such fact by written statement, sworn to by such person, or in case such person is not an individual, by the representative of such person, containing such particulars as the Secretary shall require.

SEC. 4. Every person, other than an individual, issuing shares or certificates representing beneficial interests, shall, within such time or times, and under such rules and regulations as the Secretary of Commerce may prescribe, make and deliver to the Secretary a statement in writing, sworn to by a duly authorized representative of such person, showing the amount and character of the shares or certificates issued by such person and held by each such citizen, subject, corporation, association, company, firm, trust, or partnership, or by a representative or nominee of any one of them.

SEC. 5. The Securities and Exchange Commission is authorized and directed to cooperate with the Secretary of Commerce, upon the request of said Secretary, in any way which may be practicable for carrying out the purposes of this act; and the said Commission and all other agencies and establishments of the Government are authorized and directed to furnish to the Secretary of Commerce, upon request, all information in their possession which may aid the Secretary in carrying out the purposes of this act.

SEC. 6. The Secretary of Commerce is authorized to prescribe such rules and regulations as may be necessary effectively to carry out the purposes of this act. Any violation of this act or of any such rule or regulation shall be punished by fine of not to exceed $500 or imprisonment for not to exceed 6 months, or both.

SEC. 7. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this act.

The VICE PRESIDENT. The joint resolution will lie on the table.

INTERNAL-REVENUE TAXATION—AMENDMENT

Mr. BONE submitted an amendment intended to be proposed by him to the bill (H. R. 12395) to provide revenue, to equalize taxation, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

JOHN N. HUNTER ET AL.—AMENDMENT

Mr. FLETCHER submitted an amendment intended to be proposed by him to the bill (H. R. 8799) for the relief of John N. Hunter, Edmund M. Cook, Fred C. Putnam, Merchants National Bank of South Bend, Ind., and St. Joseph

Loan & Trust Co., of South Bend, Ind., which was referred to the Committee on Claims and ordered to be printed.

AMENDMENTS TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. LEWIS submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

At the proper place in the bill to insert the following:
"The Secretary of the Treasury is hereby directed to pay to Gladys Hinckley Werlich, widow of McCeney Werlich, late a Foreign Service officer of the United States at Paris, France, the sum of $4,100, as authorized by H. R. 12183. This sum of $4,100 being 1 year's salary of the late McCeney Werlich, who died while in the Foreign Service."

Mr. HAYDEN submitted an amendment intended to be proposed by him to House bill 12624, the first deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 3, after line 13, to insert the following:
"For the printing and binding of a compilation containing the provisions of Federal laws held unconstitutional by the Supreme Court of the United States, $1,200."

REORGANIZATION OF CORPORATIONS UNDER BANKRUPTCY LAW

The Senate resumed the consideration of the bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

The VICE PRESIDENT. The first amendment reported by the Committee on the Judiciary will be stated.

Mr. ROBINSON. Mr. President, I think it is generally felt by Senators that the Senator in charge of the bill, the Senator from Indiana [Mr. VAN NUYS], should make a general explanation of the purposes and provisions of the measure.

Mr. VAN NUYS. Mr. President, I shall be glad to explain the provisions of the bill and the amendments proposed by the Committee on the Judiciary of the Senate.

The bill, which originated in the House, proposes certain amendments to section 77B of the Bankruptcy Act, which is the corporate reorganization provision of the act passed in the Seventy-third Congress. Under the old law three creditors holding an aggregate of over $1,000 in debts against a corporation could file a petition and bring an action to reorganize the corporation. The first material amendment proposed by the House bill is that the three creditors must be possessed of at least 5 percent of the total indebtedness of the corporation. The Senate Committee on the Judiciary approve that amendment and think it is very reasonable to impose a limitation or requirement of the possession of at least 5 percent of the total indebtedness before creditors may file a petition for reorganization.

The second amendment to the existing law proposed by the House bill provides that the petition of creditors must set out in detail the status of the corporation and its indebtedness and the facts showing the necessity for the relief prayed. This amendment requires the creditors' petition to conform to the same requisites as in the case of a corporation in the event a corporation had filed a petition.

The third material amendment proposed by the House bill is to the effect that if the manager, after the petition has been approved, shall continue in possession of the property and be appointed trustee under the law, he shall receive only one fee or salary. Experience has shown that often the manager has been appointed trustee and has drawn both the trustee's salary and the manager's salary. This amendment would prevent the pyramiding of salaries.

Mr. KING. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Indiana yield to the Senator from Utah?

Mr. VAN NUYS. I yield.

Mr. KING. Some of us, and I am speaking principally for myself, are not familiar with the workings of the present act, and do not know whether it has proved satisfactory or unsatisfactory. We are not familiar, perhaps, with some of the details of the act. Will the Senator kindly explain the bill, its object, and also the amendments which he deems necessary to perfect it, so its general purposes may be understood?

Mr. MINTON. Mr. President, will my colleague yield?

The VICE PRESIDENT. Does the Senator from Indiana yield to his colleague?

Mr. VAN NUYS. Certainly.

Mr. MINTON. I understand the amendments my colleague has just been discussing would prevent one from being trustee and at the same time manager. Is there anything in the amendment which compels him to make a choice, or anything of that kind?

Mr. VAN NUYS. No.

Mr. MINTON. Does the amendment provide that if he is one he cannot be the other?

Mr. VAN NUYS. No. The amendment provides that if the court, in its discretion, shall appoint the manager of the corporation as trustee under the law, he cannot draw two salaries, one as trustee and one as manager of the corporation. Experience has shown that that has been done in some instances.

Recurring to the query of the Senator from Utah [Mr. KING], these are amendments to section 77B of the Bankruptcy Act, which is the Corporate Reorganization Act passed in the Seventy-third Congress. I wish I had the time this afternoon, and I think I shall take occasion later on, to discuss the wholesome workings of this particular statute. Hundreds of corporations in failing circumstances have invoked the relief provided by this statute. Under the workings of the statute corporations which otherwise would have had to go into bankruptcy and complete collapse have rehabilitated themselves, keeping their doors open, and employing thousands of employees who otherwise probably would have gone on the relief rolls. I really think one of the most constructive pieces of legislation passed by the Seventy-third Congress was the Corporation Reorganization Act.

Mr. KING. Does the act fully protect the creditors?

Mr. VAN NUYS. It fully protects creditors and has been invoked by creditors in many instances.

Coming now to the amendments proposed by the Senate Committee on the Judiciary, the first of such amendments will be offered on page 4, line 17. This amendment is not in the bill as reported by the Committee on the Judiciary, but will be submitted as a committee amendment.

Mr. KING. Mr. President, will the Senator yield again at that point?

Mr. VAN NUYS. Certainly.

Mr. KING. This is rather a long bill. Does it reenact part of the existing law with amendments, and does that account for its length?

Mr. VAN NUYS. That is true.

Mr. McNARY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Indiana yield to the Senator from Oregon?

Mr. VAN NUYS. Certainly.

Mr. McNARY. I merely wish to suggest that some of us on this side of the Chamber would like to know what is going on. I should like to have the Senator speak louder so he may be heard. Is the Senator referring now to the Senate committee amendments?

Mr. VAN NUYS. Yes; at this time I am. The first committee amendment will be found on page 4, line 17, and would substitute the words "the security" for the words "secured debts." It was never intended that the creditor should possess $1,000 of debts over and above their secured debts, but over and above the security which any of them might have. The same amendment will be offered in line 25.

On page 4, beginning in line 18, the committee has added different classes of creditors who may be eligible as petitioners for reorganization. These include those holding provable claims against corporations engaged in owning, holding, or selling real estate, real-estate mortgages, or oil or gas royalties. In instances such petitioning creditors have been refused the relief provided by the present law, and it is to assist them in invoking the relief provided under the law that this amendment is proposed.

On page 5, in line 14, after the word "appointed", the committee proposes to add the words "or any arrangement in lieu thereof has not been approved." The purpose of that amendment is to take care of a situation existing in several places, but particularly in the city of Chicago. When petitioning creditors ask for relief under this law the courts have appointed trustees to collect the rents and profits on mortgaged properties, but refuse the creditors relief. It is to get away from that abuse of the statute that the amendment is proposed.

On page 5, line 16, after the word "jurisdiction", we propose to add the words "in equity or foreclosure." That is required because the courts of Chicago and of the seventh circuit and the circuit court of appeals of the seventh circuit have decreed that when a receiver is appointed in a foreclosure proceeding the trustee appointed by the court under the act has no authority to claim possession of the property under a receiver in a foreclosure proceeding. To a great degree this has defeated the operation of the statute in the seventh circuit.

The next amendment is on page 6, and provides that the court must find that the corporation was in need of the relief at the time of the adjudication, as well as at the time when the petition was filed. Under the old law, the court was confined to making a finding that the corporation was in need of relief at the time of filing the petition. Between the filing of the petition and the approval of the plan, which covers several weeks, many a corporation has rehabilitated itself; so if the court finds that at the time he is called upon to approve the plan there is no demand for the relief, he is at liberty to refuse the petition.

Mr. ROBINSON. Mr. President, under the present law, if at the time the petition was filed a condition existed making necessary the relief, the court would be required to make the order. This amendment permits the court to exercise his discretion and to decline to make the order if the necessity has disappeared?

Mr. VAN NUYS. That is correct, if the necessity has disappeared at the time he is called upon to approve the petition.

The next amendment is the addition of a new section. Section 3, the new section in question, does not apply to section 77B, but to section 74, which is the statute giving to an individual the same right that has been given to farmers, corporations, and railroads. It is necessary to propose this amendment because, as I have said, when property of a petitioning individual is in the hands of a receiver under a foreclosure sale, many courts have held that the relief demanded by the individual cannot be afforded, and have refused to turn over to the trustee named in the relief act the property in the hands of the trustee under a trust deed, or in the hands of a receiver under a foreclosure proceeding. This section is very important and has been initialed and approved by committees of the American Bar Association and others who have studied it and who are very familiar with the bankruptcy statute.

Mr. KING. Mr. President, will the Senator yield?

Mr. VAN NUYS. I yield.

Mr. KING. Does the Senator feel that in the application of the provisions of this bill there should be any distinction between individuals and corporations or copartnerships?

Mr. VAN NUYS. I will say to the Senator from Utah that these amendments attempt to coordinate the relief provided for corporations, for individuals, the attempted relief for farmers with which the Senator is familiar, and for railroads, which acts have been in existence for some time, to unify and make uniform the provisions for all these different classes of petitioning creditors.

Mr. KING. The Senator believes, then, if I correctly interpret his position, that under the provisions of the Constitution of the United States relating to bankruptcy there are no separate categories, but that corporations, individuals, municipalities, and all may avail themselves of the provisions of any law which may be passed based upon the constitutional provision?

Mr. VAN NUYS. That is the general purpose of all these amendments and of these different bills. That is true.

Mr. KING. From what the Senator has learned as to the operation of the statute, does he believe there has been any abuse of the power granted on the part of those who sought relief under bankruptcy proceedings?

Mr. VAN NUYS. The only abuse I have been able to discover has been in the courts of the country, which are slow to adopt innovations such as these different statutes provide. The chief abuse—and it applies to millions of dollars' worth of property in the city of Chicago—is the holding of the circuit court of appeals for the seventh circuit that when a property is in the hands of a receiver under foreclosure, the trustee appointed under the terms of the statute is not entitled to possession of the property. What has happened? Action for foreclosure is brought and a receiver is appointed, and the proceeding is allowed to drift for years and years, and the petitioning creditors are helpless.

I may say that Mr. Justice Cardozo, of the Supreme Court of the United States, upheld the position of the seventh circuit court of appeals, and I think properly so, because the act provides that the trustee shall have all the duties and responsibilities of a receiver in equity; and therefore he held that if the property was in the hands of a receiver in foreclosure, the trustee appointed under the terms of the Bankruptcy Act could not take possession of the property. That decision has paralyzed the functioning of the act in a proper degree, and these amendments are designed to correct that condition.

Mr. KING. Let me say to the Senator that a number of complaints have come to me, not only from Chicago but from New York and a number of other cities, and indeed from some rural districts, that there have been conflicts between the State courts and the Federal courts, and between those proceeding under the bankruptcy statute and those who had control under mortgage foreclosure or State statutes, as a result of which expenses were piled up, so that when final adjudication was had the creditors received an insignificant sum, or perhaps nothing at all.

Mr. VAN NUYS. The Senator is correct, and the purpose of these amendments is to correct the very evil of which the Senator speaks.

Mr. KING. One other question: Are any amendments to be tendered by the Senator which will protect the creditors as well as the owners from the greedy, grasping, avaricious—I was about to say "criminal", but I will withdraw that expression—attitude of so many trustees and attorneys, and the complacency with which the courts too often have received their applications for enormous fees, and have granted what I have conceived to be extortionate rewards?

Mr. VAN NUYS. I desire to be very frank with the Senator from Utah. There is nothing in this bill, or in the amendments it contains, touching the abuses to which the Senator now refers. They ought to be the subject matter of separate legislation.

Mr. MINTON. Mr. President, will the Senator yield for a question?

Mr. VAN NUYS. I yield.

Mr. MINTON. Is not the compensation of all trustees in bankruptcy specifically fixed by statute?

Mr. VAN NUYS. It was under the old bankruptcy act, but not under this bill. The court has the right to fix the compensation of the trustees.

Mr. MINTON. Let me ask the Senator another question. I do not know that I caught the significance of the question of the Senator from Utah [Mr. KING] a moment ago. Do I understand that the amendment which the Senator is now discussing would make it possible, where a suit for foreclosure is pending, to institute a proceeding in bankruptcy, and divest of its jurisdiction the court which had the foreclosure proceedings?

Mr. VAN NUYS. The bill provides that when there is a receiver in foreclosure the trustee is entitled to take possession away from the receiver in foreclosure, which will eliminate one of the worst abuses in connection with the original legislation. As I have said, under the ruling of the circuit court of appeals for the seventh circuit, sustained by the decision handed down on behalf of the Supreme Court of the United States by Mr. Justice Cardozo, the trustee under the act was not entitled to possession of property which was in the hands of a receiver under foreclosure proceedings; and that decision has defeated the proper functioning of the act, particularly in the city of Chicago.

Mr. MINTON. Then, the effect of this bill, if it should pass, would be to abate the foreclosure proceeding, to stay it?

Mr. VAN NUYS. Yes. That is, the effect would be to give to the trustee the right to take possession of property in the hands of the receiver in foreclosure.

Mr. MINTON. Would the foreclosure proceedings proceed to a finality or would they be stayed?

Mr. VAN NUYS. That would be the end of them. That is the purpose of the bill.

Mr. CONNALLY. Mr. President, will the Senator yield for a question?

Mr. VAN NUYS. I yield.

Mr. CONNALLY. Heretofore it has been the theory of bankruptcy and foreclosure proceedings that a foreclosure proceeding represented the creditors, and the trustee in bankruptcy took the place of the defendant in a sense. Is that true?

Mr. VAN NUYS. That is true; yes, sir.

Mr. CONNALLY. In other words, the trustee in bankruptcy represents the estate, whereas the foreclosing creditors proceed independently of the bankruptcy. They are not required to file anything at all in bankruptcy, are they?

Mr. VAN NUYS. No; but the abuse we are trying to correct——

Mr. CONNALLY. I was just wondering if the abuse resulting from taking the property out of the hands of the receiver in foreclosure would be any worse than the abuse resulting from some of the bankruptcy proceedings in the Federal courts.

Mr. VAN NUYS. This is not really a bankruptcy proceeding; it is a rehabilitation proceeding. The creditors come in and propose a plan of rehabilitation and reorganization.

Mr. CONNALLY. But we are proposing to take this action under the general power of Congress to regulate bankruptcies.

Mr. VAN NUYS. Oh, exactly; the Senator is entirely correct.

Mr. CONNALLY. I should be very glad to do anything to minimize the scandals and the outrages in both bankruptcy courts and receiverships, for that matter; but in equity proceedings, where the creditors file a bill for foreclosure of a mortgage, we will say, and they are really the beneficial owners of the property, in the last analysis, I was just wondering how we can oust their jurisdiction and turn them over to the bankruptcy trustee.

Mr. VAN NUYS. If the receiver in foreclosure would perform his duties and responsibilities as he should, there would never be any necessity of doing so.

Mr. CONNALLY. But is it not just as much the duty of the Federal court to make the receiver in foreclosure perform his functions as it is the duty of the Federal court to see that the trustee in bankruptcy performs his functions?

Mr. VAN NUYS. No; because the receiver in foreclosure is appointed by the State court, and over the receiver the Federal court has no jurisdiction.

Mr. CONNALLY. That is true in some cases, of course, but in many other cases the Federal court has jurisdiction first.

Mr. VAN NUYS. I will say to the Senator from Texas that 99 percent of the foreclosures are in State courts.

Mr. CONNALLY. Is it a desirable public policy to oust the State authorities from the enforcement of these trusts and turn them over to the Federal jurisdiction? I am not familiar with the proposed legislation, and I have great respect for the judgment and legal ability of the Senator from Indiana, as well as a personal attachment for him, and I am not seeking any quarrel with his views, but I am seeking enlightenment.

Mr. VAN NUYS. It is desirable from the standpoint of public policy. Within my own knowledge there are many instances where a receiver has been appointed in a foreclosure, and the courts have held that a trustee appointed by a Federal court could not touch the property, and the receivership has been continued and continued for years and years, with exorbitant fees granted by the State court to the receiver. It is to correct that very abuse that these amendments have been proposed.

Mr. MINTON. Mr. President, will the Senator yield?

Mr. VAN NUYS. I yield to my colleague.

Mr. MINTON. Are the amendments limited to reorganization proceedings under section 77B, or would they be broad enough to cover any proceeding in bankruptcy?

Mr. VAN NUYS. The amendments are limited to section 77B and section 74, as set out in the new section 3, page 13 of the bill.

Mr. MINTON. Let me ask the Senator whether, in his opinion, the amendments would cover a case where a proceeding had been started to foreclose a mortgage, we will say, in a State court, the State court assumed jurisdiction and possession of the property, either by a receiver or otherwise, and an ordinary proceeding in bankruptcy was instituted. Would this measure then apply to divest the State court of its jurisdiction and transfer it to the Federal court?

Mr. VAN NUYS. In my opinion, it would.

Mr. POPE. Mr. President, will the Senator from Indiana yield?

Mr. VAN NUYS. I yield.

Mr. POPE. I think the Senator stated awhile ago that where a man was appointed manager and receiver by the court he could draw only one salary. Does he have the choice of drawing the salary as manager or as receiver?

Mr. VAN NUYS. No; that is up to the court; but his fee in his joint capacity as manager and trustee shall be no more than it was originally as manager of the corporation.

Mr. McADOO. Mr. President, will the Senator yield to me?

Mr. VAN NUYS. I yield.

Mr. McADOO. I may say to my distinguished friend from Indiana that I have not had a chance to examine the bill, and for that reason the question I am about to ask may be superfluous. Suppose a State court has taken jurisdiction of an action brought by the trustee under a mortgage to foreclose for the benefit of the bondholders.

Mr. McNARY. Mr. President, it is impossible for us to hear the Senator.

Mr. McADOO. I am asking a question about the pending bill.

Mr. McNARY. I have no doubt of that, but I should like to know the nature of the question; and I cannot hear the Senator.

Mr. McADOO. I am not familiar with the bill, and I am addressing myself to the point that was under discussion.

I ask the Senator from Indiana this question: Suppose a proceeding for foreclosure of a mortgage had been instituted in a State court by the trustee under the mortgage for the benefit of the bondholders and the State court had taken jurisdiction. Under the pending measure would the jurisdiction of the court be ousted upon the filing of a petition in bankruptcy?

Mr. VAN NUYS. It would if the petition and plan of reorganization were approved by the court and were acquiesced in by the proper percentage of the creditors.

Mr. McADOO. I may say to the Senator that one of the great abuses we have discovered in an investigation by a committee of which I happen to be chairman is that investors in the bonds of corporations find that they are not permitted to pursue their legitimate remedy in the courts because in some cases bankruptcy proceedings have displaced the jurisdiction of the State courts. That of itself

causes a lack of confidence in investments generally, and to that extent is very harmful to enterprise throughout the country. If by this bill we are going to make the position of the secured creditor less secure than it is already, I should feel considerable apprehension about it. I ask the question merely because I wish to know whether the bill deprives a secured creditor, in those circumstances, of the right to pursue his remedy in the courts.

Mr. HASTINGS. Mr. President, will the Senator from Indiana yield to me?

Mr. VAN NUYS. I yield.

Mr. McADOO. I should like to have an answer to my question before the Senator from Delaware asks a question.

Mr. HASTINGS. I should like to call the attention of the Senator from Indiana to the fact, for fear he may overlook it, that the committee was informed that in many cases such as that suggested by the Senator from California the trustee takes possession and holds on and the minority bondholders have no opportunity at all to realize on the value of the property. The trustee takes it and operates it and holds onto it for a long while. I desired to remind the Senator from Indiana that that was my recollection of the testimony.

Mr. VAN NUYS. Mr. President, I appreciate the observation of the Senator from Delaware, and I will say to the distinguished Senator from California that the only relief the minority bondholders of whom he speaks will have will be found in some legislation such as that provided by the pending bill. The only channel through which minority bondholders and creditors may protect themselves is through some such amendments as we are proposing here. That is one of the main purposes of the amendments.

Mr. KING. Mr. President, I desire a little more light upon a bill so important, and I am not sure but that the questions propounded by the Senator from California and the replies thereto did not make the matter clear. I should like to inquire again, if the inquiry was not made by the Senator from California, where in good faith a creditor has pursued his proper remedy in a State court, for instance, in the foreclosure of a mortgage, and the court has appointed someone to take charge of the property and collect the rents pending a final disposition of the claim, whether some other creditor could then deprive the State court of jurisdiction of the suit then pending, and of the subject matter, and transfer it to the Federal court.

The Senator is familiar, I think, with a situation which has been called to my attention, one existing particularly in New York and Chicago, and in one or two other cities, namely, that there are certain individuals, not to say firms, lawyers and accountants, and others, whose ethics do not reach the standard we would like, bankruptcy rings, who wait and watch for the purpose of getting property into the Federal courts where for an indefinite period it is retained, and they are reaping enormous rewards in the meantime.

I have faith in the Federal courts, of course, but I have faith in the State courts also, and where a State court in good faith has taken jurisdiction over a matter and is administering a trust, I do not want to see a Federal court authorized to jerk that proceeding out of the hands of the State court and transfer it over to the Federal court, where some of these rings, or some creditor who has a subordinate lien or a subordinate claim against the property, goes into the Federal court for that purpose.

Mr. VAN NUYS. Mr. President, I suggest to the Senator from Utah that the plan of reorganization has to be approved by two-thirds of the creditors before the Federal court can approve the plan, appoint a trustee, and demand the possession of the property from a receiver in a State court. It is to defeat the very abuses the Senator from Utah has mentioned that these amendments are proposed. In the city of Chicago there are many tenement houses and hotels for which receivers have been appointed under State courts, and unreasonable, unthinkable compensation has been allowed the receivers and the attorneys for the receivers, eating the very life and the vitals out of the assets of the corporations. It is to take such property away from that kind of abusive administration and put it in the Federal courts that these amendments are proposed.

Mr. MINTON. Mr. President, does it require a two-thirds vote of the secured and unsecured creditors, or of the secured creditors only?

Mr. VAN NUYS. Of all types.

The PRESIDENT pro tempore. The clerk will state the first amendment of the committee.

Mr. VAN NUYS. Mr. President, on behalf of the committee I should like to offer an amendment to come at a point in the bill before the first amendment reported by the committee.

The PRESIDENT pro tempore. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 4, line 17, after the words "value of", it is proposed to strike out the words "secured debts" and to insert in lieu thereof the words "the security."

The amendment was agreed to.

The PRESIDENT pro tempore. The clerk will state the first amendment of the committee as printed in the bill.

The LEGISLATIVE CLERK. On page 4, line 18, after the word "over" and the comma, it is proposed to insert the words "and three or more creditors who have provable claims against a corporation principally engaged in owning, holding, or selling real estate, real-estate mortgages, or oil and gas royalties, or three or more holders of beneficial interest certificates in a common-law trust, principally engaged in owning, holding, or selling real estate, real-estate mortgages, or oil and gas royalties which amount in the aggregate, in excess of the value of the securities held by them, if any, to $1,000 or over."

Mr. VAN NUYS. Mr. President, I desire to offer an amendment to the committee amendment, on page 4, line 25, after the words "value of the", to strike out the word "securities", and to insert in lieu thereof the word "security."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the committee was, on page 5, line 14, after the word "appointed", to insert the words "or any arrangement in lieu thereof has not been approved"; on page 5, line 16, after the word "jurisdiction", to insert the words "in equity or foreclosure"; and on page 6, line 1, after the word "faith" and the comma, to insert the words "and that the corporation was at the date of the filing of the petition and is at the date of the approval thereof in need of the relief provided for in this section", so as to make the section read:

That subdivision (a) of section 77B of the act of July 1, 1898, entitled "An act to establish a uniform system of bankruptcy throughout the United States", as amended, be amended to read as follows:

"SEC. 77B. Corporate reorganizations: (a) Any corporation which could become a bankrupt under section 4 of this act, and any railroad or other transportation corporation, except a railroad corporation authorized to file a petition or answer under the provisions of section 77 of this act, and except as hereinafter provided, may file an original petition, or, before adjudication in an involuntary proceeding, an answer, or in any proceeding pending in bankruptcy, whether filed before or after this section becomes effective, provided the present operations of such corporation do not exclude it hereunder, and whether or not the corporation has been adjudicated a bankrupt, a petition stating the requisite jurisdictional facts under this section; the nature of the business of the debtor; in brief description, the assets, liabilities, capital stock, and financial condition of the debtor; if a prior proceeding is pending, the name of the court in which it is pending and the nature of such proceeding; facts showing the need for relief under this section; and that the corporation is insolvent or unable to meet its debts as they mature and that it desires to effect a plan of reorganization. The petition shall be filed with the court in whose territorial jurisdiction the corporation, during the preceding 6 months or the greater portion thereof, has had its principal place of business or its principal assets, or in any territorial jurisdiction in the State in which it was incorporated. The court shall, upon petition, transfer such proceedings to the territorial jurisdiction where the interests of all the parties will be best subserved. The petition or answer shall be accompanied by payment to the clerk of a filing fee of $100, which shall be in addition to the fees required to be collected by the clerk under other sections of this act. Upon the filing of such a petition or answer the judge shall enter an order

either approving it as properly filed under this section if satisfied that such petition or answer complies with this section and has been filed in good faith, or dismissing it. If the petition or answer is so approved, an order of adjudication in bankruptcy shall not be entered and the court in which such order approving the petition or answer is entered shall, during the pendency of the proceedings under this section, have exclusive jurisdiction of the debtor and its property wherever located for the purposes of this section, and shall have and may exercise all the powers, not inconsistent with this section, which a Federal court would have had it appointed a receiver in equity of the property of the debtor by reason of its inability to pay its debts as they mature. The corporation shall be referred to in the proceedings as a 'debtor.' Any corporation the majority of the capital stock of which having power to vote for the election of directors is owned, either directly or indirectly through an intervening medium, by any debtor, or substantially all of whose properties are operated by such debtor under lease or operating agreement, may file, with the court in which such debtor had filed its petition or answer, and in the same proceeding, a petition stating that it is insolvent or unable to meet its debts as they mature and that it desires to effect a plan of reorganization in connection with, or as a part of, the plan of reorganization of such other debtor; and thereupon such court, if it approves such petition, shall have the same jurisdiction with respect to such corporation, its property, and its creditors and stockholders as the court has with respect to such other debtor. Three or more creditors who have provable claims against any corporation which amount in the aggregate to not less than 5 percent of the total amount of all indebtedness of such corporation as shown by a balance sheet, as of a date within the preceding 12 months, of the corporation or by its latest annual report or by its books and which amount in the aggregate, in excess of the value of the security held by them, if any, to $1,000 or over, and three or more creditors who have provable claims against a corporation principally engaged in owning, holding, or selling real estate, real-estate mortgages, or oil and gas royalties, or three or more holders of beneficial interest certificates in a common-law trust, principally engaged in owning, holding, or selling real estate, real-estate mortgages, or oil and gas royalties which amount in the aggregate, in excess of the value of the security held by them, if any, to $1,000 or over, may, if such corporation has not filed a petition or answer under this section, file with the court in which such corporation might file a petition under this section, a petition stating the requisite jurisdictional facts under this section, the nature of the business of such corporation, a general description of its assets, liabilities, capital stock, and financial condition, if a prior proceeding in bankruptcy or equity receivership is pending, the name of the court in which it is pending and the nature of such proceedings, facts showing the need of relief under this section, that such corporation is insolvent or unable to meet its debts as they mature, and if the corporation has not been adjudicated a bankrupt or a receiver of the corporation has not been appointed, or any arrangement in lieu thereof has not been approved, by any court of competent jurisdiction in equity or foreclosure, that it has committed an act of bankruptcy within 4 months preceding the date of the filing of the petition, and that such creditors propose that it shall effect a reorganization; and such corporation shall, within 10 days after the service of a copy of such petition upon it, answer such petition. If such answer shall admit (a) the jurisdiction of the court, and (b) the material allegations of the petition, the court shall enter an order approving the petition as properly filed under this section if satisfied that it complies with this section and has been filed in good faith, and that the corporation was at the date of the filing of the petition and is at the date of the approval thereof in need of the relief provided for in this section, or dismiss it if not so satisfied. If such answer shall deny any material allegation of the petition, the judge shall determine summarily the issues presented by the pleadings, without the intervention of a jury, and if the material allegations of the petition are sustained by the proofs and the court is satisfied that the petition complies with this section and has been filed in good faith, it shall approve the petition; otherwise the court shall dismiss the petition; and if any such petition shall be so approved, the proceedings thereon shall continue with like effect as if the corporation had itself filed a petition or answer under this section. In case any such petition or answer or proceedings shall be dismissed in the manner provided in this subdivision (a) or in subdivision (c), clause (8), of this section, the same shall not constitute an act of bankruptcy or an admission of insolvency or be admissible in evidence, without the consent of the debtor, in any proceedings then or thereafter pending or commenced under this act or in any Federal or State court. If three or more creditors who have provable claims which amount in the aggregate in excess of the value of securities held by them, if any, to $1,000 or over, or if stockholders holding 5 percent in number of all shares of stock of any class of the debtor outstanding shall, prior to the hearing provided for in subdivision (c), clause (1), of this section appear and controvert the facts alleged in the petition or answer, the judge shall determine as soon as may be the issues presented by the pleadings, without the intervention of a jury, and unless the material allegations of the petition or answer are sustained by the proofs, the proceedings shall be dismissed."

The amendment was agreed to.

The next amendment of the committee was, in section 2, page 12, line 15, after the words "as the", to strike out "judges" and to insert in lieu thereof "judge", so as to make the section read:

SEC. 2. Subdivision (c) of section 77B of the act of July 1, 1898, entitled "An act to establish a uniform system of bankruptcy throughout the United States", as amended, is amended to read as follows:

"(c) Upon approving the petition or answer or at any time thereafter, the judge, in addition to the jurisdiction and powers elsewhere in this section conferred upon him, (1) may, after hearing upon notice to the debtor and to such others as the judge may determine, temporarily continue the debtor in possession or appoint a trustee or trustees of the debtor's estate, and shall require the debtor, or such trustee or trustees, if appointed, to give such notice as the order may direct to creditors and stockholders and to cause publication thereof to be made at least once a week for 2 successive weeks of a hearing to be held within 30 days after such appointment, or, if no such appointment, within 30 days after the approval of the petition or answer, at which hearing or any adjournment thereof, or at any subsequent hearing after notice, the judge may make permanent any such appointment, or terminate it and restore the debtor to possession, or, if no trustee has been appointed, may appoint a trustee or trustees, and may remove any such trustee or trustees and continue the debtor in possession or appoint a substitute trustee or trustees and may appoint an additional trustee or trustees: *Provided, however,* That if the debtor is continued in possession, or if the management of the debtor is appointed trustee, no compensation shall be allowed the management as trustee in addition to the compensation of the management as salary, which salary shall not be in an amount greater than the salary of which the management was in receipt at the time of the approval of the petition or answer; (2) shall fix the amount of the bond of every such trustee, and every such trustee, upon filing such bond, shall have all the title and shall exercise, subject to the control of the judge and consistently with the provisions of this section, all the powers of a trustee appointed pursuant to section 44 of this act, and if authorized by the judge, the same powers as those exercised by a receiver in equity to the extent consistent with this section, and, subject to the authorization and control of the judge, the power to operate the business of the debtor during such period, fixed or indefinite, as the judge may from time to time prescribe; (3) may, for cause shown, authorize the debtor or the trustee or trustees, if appointed, to issue certificates for cash, property, or other consideration approved by the judge for such lawful purposes, and upon such terms and conditions and with such security and such priority in payments over existing obligations, secured or unsecured, as may be lawful in the particular case; (4) shall require the debtor, or the trustee or trustees if appointed, at such time or times as the judge may direct, and in lieu of the schedules required by section 7 of this act, to file such schedules and submit such other information as may be necessary to disclose the conduct of the debtor's affairs and the fairness of any proposed plan; and may direct the debtor, or the trustee or trustees if appointed, to prepare (a) a list of all known bondholders and creditors of, or claimants against, the debtor or its property, and the amounts and character of their debts, claims, and securities, and the last known post-office address or place of business of each creditor or claimant, and (b) a list of the stockholders of each class of the debtor, with the last known post-office address or place of business of each, which lists shall be open to the inspection of any creditor or stockholder of the debtor, during reasonable business hours, upon application to the debtor, or to the trustee or trustees, if appointed, and the contents of such lists shall not constitute admissions by the debtor or the trustees in a proceeding under this section or otherwise; (5) may direct the rejection of contracts of the debtor executory in whole or in part; (6) shall determine a reasonable time within which the claims and interests of creditors and stockholders may be filed or evidenced and after which no such claim or interest may participate in any plan, except on order for cause shown, the manner in which such claims and interests may be filed or evidenced and allowed, and, for the purposes of the plan and its acceptance, the division of creditors and stockholders into classes according to the nature of their respective claims and interests; and may, for the purposes of such classification, classify as an unsecured claim the amount of any secured claim in excess of the value of the security therefor, such value to be determined in accordance with the provisions of section 57, clause (h), of this act; (7) shall cause reasonable notice of such determination and of all hearings for the consideration of any proposed plan, or of the dismissal of the proceedings, or the liquidation of the estate, or the allowance of fees or expenses, to be given creditors and stockholders by publication or otherwise; (8) if a plan of reorganization is not proposed or accepted within such reasonable period as the judge may fix, or, if proposed and accepted, is not confirmed, may, after hearing, whether the proceeding be voluntary or involuntary, either extend such period or dismiss the proceeding under this section or, except in the case of a railroad or other public utility or of a debtor which has not been found by the judge to be insolvent, direct the estate to be liquidated, or direct the trustee or trustees to liquidate the estate, appointing a trustee or trustees if none shall previously have been appointed, as the interests of the creditors and stockholders may equitably require; (9) may allow a reasonable compensation for

the services rendered and reimbursement for the actual and necessary expenses incurred in connection with the proceeding and the plan by officers, parties in interest, depositaries, reorganization managers and committees or other representatives of creditors or stockholders, and the attorneys or agents of any of the foregoing and of the debtor, but appeals from orders fixing such allowances may be taken to the circuit court of appeals independently of other appeals in the proceeding and shall be heard summarily; (10) in addition to the provisions of section 11 of this act for the staying of pending suits against the debtor, may enjoin or stay the commencement or continuation of suits against the debtor until after final decree; and may, upon notice and for cause shown, enjoin or stay the commencement or continuance of any judicial proceeding to enforce any lien upon the estate until after final decree; and (11) may refer any matters to a special master, who may be one of the referees in bankruptcy, for consideration and report, either generally or upon specified issues, and allow such master a reasonable compensation and reimbursement for his services and actual and necessary expenses. The debtor shall have the right to be heard on all questions. Any creditor or stockholder shall have the right to be heard on the question of the permanent appointment of any trustee or trustees, and on the proposed confirmation of any reorganization plan, and upon filing a petition for leave to intervene, on such other questions arising in the proceeding as the judge shall determine. In case a trustee is not appointed, the debtor shall continue in the possession of its property, and, if authorized by the judge, shall operate the business thereof during such period, fixed or indefinite, as the judge may from time to time prescribe, and shall have all the title to and shall exercise, consistently with the provisions of this section, all the powers of a trustee appointed pursuant to this section, subject at all times to the control of the judge, and to such limitations, restrictions, terms, and conditions as the judge may from time to time impose and prescribe. While the debtor is in possession (a) its officers shall be entitled to receive only such reasonable compensation as the judge shall from time to time approve, and (b) no person shall be elected or appointed to any office, to fill a vacancy or otherwise, without the prior approval of the judge."

The amendment was agreed to.

The next amendment of the committee was, at the end of section 2, to insert a new section, as follows:

SEC. 3. The first sentence of subdivision (m), section 74, of the act of July 1, 1898, entitled "An act to establish a uniform system of bankruptcy throughout the United States", as amended, be, and it is hereby, amended to read as follows: "The filing of a debtor's petition or answer seeking relief under this section shall subject the debtor and his property, wherever located, to the exclusive jurisdiction of the court in which the order approving the petition or answer as provided in subsection (a) is filed, and this shall include property of the debtor in the possession of a trustee under a trust deed or a mortgage, or a receiver, custodian, or other officer of any court in a pending cause, irrespective of the date of appointment of such receiver or other officer, or the date of the institution of such proceedings: *Provided*, That it shall not affect any proceeding in any court in which a final decree has been entered unless the debtor's right of redemption has not expired."

That section 74, subsection (e), be amended to read as follows: "An application for the confirmation of a composition or extension proposal may be filed in the court of bankruptcy after, but not before, it has been accepted in writing by a majority in number of all creditors whose claims if unsecured have been allowed, or if secured are proposed to be affected by an extension proposal, which number must represent a majority in amount of such claims; and the money or security necessary to pay all the costs of the proceedings, and in case of a composition, the consideration to be paid by the debtor to his creditors have been deposited in such place as shall be designated by and subject to the order of the court. After the first meeting of the creditors as provided in subdivision (c), the debtor fails to obtain the acceptance of a majority in number of all creditors whose claims are affected by an extension proposal representing a majority in amount, the debtor may submit a proposal for an extension, including a feasible method of financial rehabilitation for the debtor which is for the best interest of all the creditors, including an equitable liquidation for the secured creditors whose claims are affected."

The amendment was agreed to.

The next amendment of the committee was, at the end of the section just agreed to, to insert a new section, as follows:

SEC. 4. Subdivision (a) of said section 77B, as amended by this amendatory act, shall apply to all petitions under said section 77B filed prior to the effective date of this amendatory act which shall not have been approved prior to said date. All other provisions of this amendatory act shall apply to all proceedings under sections 74 and 77B pending on the effective date of this act in which a plan of extension or composition or reorganization has not been finally confirmed by the court or judge.

The amendment was agreed to.

The PRESIDENT pro tempore. That completes the committee amendments. Are there further amendments to be offered?

Mr. VAN NUYS. Mr. President, I send to the desk a further amendment, which I ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. On page 14, after line 22, and after the committee amendment heretofore agreed to, it is proposed to insert a new section, as follows:

SEC. 5. The first sentence of subdivision (i) of section 77B of the act of July 1, 1898, entitled "An act to establish a uniform system of bankruptcy throughout the United States", is amended by striking out all of the first sentence of said subdivision (i) after the words "if the petition or answer is approved" and inserting the following in lieu thereof "The trustee or trustees appointed under this section, or the debtor if no trustee is appointed, shall be entitled forthwith to possession of and vested with title to all property of the debtor, including property in the possession of any receiver or prior trustee, whether appointed by a court or otherwise, and the judge shall make such orders as he may deem equitable for the protection of obligations incurred by such receiver or prior trustee and for the payment of such reasonable administrative expenses and allowances as may be fixed by the court in any proceeding in which such receiver or prior trustee was appointed."

Mr. KING. Mr. President, will the Senator from Indiana explain the purpose of the amendment?

Mr. VAN NUYS. The amendment is recommended in order to meet the dictum of Mr. Justice Cardozo in the DuParquet case, recently decided. In that case Justice Cardozo stated that in proceedings under section 77B a court has no power to direct a receiver in a foreclosure action to deliver possession of the property being foreclosed. It seems highly desirable that the 77B court be given this power. The amendment is intended to grant such power. It has also been worded in such manner as to include the power to direct a trustee taking possession under a trust indenture to deliver the property held to the trustee or debtor in proceedings under section 77B. This power seems desirable in order to enable the 77B court to administer all the property of the debtor.

We amended one section, and, in order to coordinate the later section, it is necessary to make the amendment in question.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Indiana.

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

BUREAU OF NAVIGATION AND STEAMBOAT INSPECTION—CONFERENCE REPORT

Mr. COPELAND submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8599) to provide for a change in the designation of the Bureau of Navigation and Steamboat Inspection, to create a marine casualty investigation board and increase efficiency in administration of the steamboat inspection laws, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 7.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 5, 6, 8, and 9, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 4450. (a) The Secretary of Commerce shall prescribe rules and regulations for the investigation of marine casualties involving loss of life in order to determine whether any incompetence, misconduct, unskillfulness or willful violation of law on the part of any licensed officer, pilot, seaman, employee, owner or agent of such owner of any vessel involved in such casualty, or any inspector, officer of the Coast Guard, or other officer or employee of the United States, or any other person, caused, or contributed to the cause of such casualty. For the purpose of investigating such a marine casualty, the Secretary of Commerce shall appoint a marine casualty investigation board or boards consisting of a chairman and two other members; the chairman shall be an officer or employee of the Department of Justice (learned in maritime laws) designated by the Attorney General; one member shall be a representative of the Bureau of Marine Inspection and Navigation designated by the Secretary of Commerce; and the other member shall be an officer of the United States Coast Guard designated by the Secretary of the Treasury. All reports shall be made to the Secretary of

Commerce and such reports shall be public records and be open to inspection at reasonable times by any persons. Copies of such reports shall be sent to the Attorney General and to the Secretary of the Treasury."

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment as follows: On page 5 of the Senate engrossed amendments, line 3, after the comma insert "any owner, licensed officer, or any holder of a certificate of service, or any other person whose conduct is under investigation, or any other party in interest, shall be allowed to be represented by counsel, to cross-examine witnesses, and to call witnesses in his own behalf, and"; and the Senate agree to the same.

ROYAL S. COPELAND,
DUNCAN U. FLETCHER,
HIRAM W. JOHNSON,
WALLACE H. WHITE, Jr.,
MORRIS SHEPPARD,
Managers on the part of the Senate.

S. O. BLAND,
WILLIAM I. SIROVICH,
ROBERT RAMSPECK,
RICHARD J. WELCH,
Managers on the part of the House.

The report was agreed to.

REGULATION OF STEAM BOILERS, ETC., IN THE DISTRICT

The PRESIDENT pro tempore laid before the Senate the amendments of the House of Representatives to the bill (S. 2953) to provide for the inspection, control, and regulation of steam boilers and unfired pressure vessels in the District of Columbia.

Mr. KING. I move that the Senate disagree to the amendments of the House, request a conference with the House on the disagreeing votes of the two Houses thereon, and the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. KING, Mr. REYNOLDS, and Mr. CAPPER conferees on the part of the Senate.

RELIEF OF OFFICERS AND SOLDIERS OF THE VOLUNTEER SERVICE

Mr. ROBINSON. Mr. President, I understand a motion is pending to reconsider the vote by which the Senate passed House bill 9472, for the relief of officers and soldiers of the Volunteer service of the United States mustered into service for the War with Spain and who were held in service in the Philippine Islands after the ratification of the treaty of peace April 11, 1899, and that Senators desire to have that motion taken up now.

The PRESIDENT pro tempore. The motion is pending before the Senate.

Mr. KING. Mr. President, I should like to debate the motion for a few minutes.

Mr. McNARY. Mr. President, as I understand, the motion is to reconsider the vote by which the Senate passed the bill.

The PRESIDENT pro tempore. The Senator is correct. The Chair will state the parliamentary situation as the Chair understands it.

There is pending a motion made by the Senator from Kansas [Mr. CAPPER] to proceed to the consideration of the motion of the Senator from Utah [Mr. KING] to reconsider the vote by which House bill 9472 was passed. Under the motion pending the Senator from Utah is recognized.

Mr. KING. Mr. President, the bill before us—H. R. 9472—passed the House in March, and later, during the morning hour, was brought up in the Senate. Like many other bills that are reached during the morning hour, or under the 5-minute rule, the message passed the Senate without any discussion and, as I am advised, without any consideration. Shortly thereafter my attention was called to the fact that a bill—H. R. 2024—in substantially the same form had passed last year and had been vetoed on the 2d of September 1935 by the President. In view of the action of the President, I believed that it was only fair that the Senate should have an opportunity to consider the bill and to learn of its provisions. Accordingly, I entered a motion to reconsider the action of the Senate in the passing of the bill, and the motion to reconsider is now before the Senate.

In my opinion, the President's veto message presents the issue involved, and is a sufficient explanation of the bill which is now before us. It occurs to me that we owe it to the President to consider his position with respect to the bill, and the reasons assigned by him for vetoing a measure which, as I stated, is practically the same as the one before us. The President, upon many occasions, has evinced his interest in those who have rendered service either on land or sea in behalf of our country and flag, and his action in vetoing the bill referred to, should be a challenge to the Congress to consider the reasons assigned and to investigate all facts involved with a view to determining the validity and justice of the President's position. He stated in the message which I have just referred to that the approval of the message presented to him would result in the—

Payment of a gratuity to each of the officers and men concerned in an amount exceeding his pay for a full year, plus the value of rations for the period involved in sea travel from the Philippine Islands to the United States.

He further stated that this would be a "benefit utterly without warrant" for the reason that—

Each individual concerned has already received transportation and subsistence at Government expense for the journey performed in addition to full pay for the entire time.

Mr. President, all Americans appreciate the services rendered by the military forces of the United States, whether those in the Regular Army or in the voluntary forces, during the Spanish-American War. Both in Cuba and the Philippine Islands our military forces rendered conspicuous and important service in behalf of our country. Their record is one of which they and the American people are proud.

The message of the President to which I have referred is as follows:

THE WHITE HOUSE,
September 2, 1935.

I have disapproved H. R. 2024, an act for the relief of officers and soldiers of the Volunteer service of the United States mustered into service for the War with Spain and who were held in service in the Philippine Islands after the ratification of the treaty of peace, April 11, 1899.

The effect of this bill is that the beneficiaries thereof "shall be entitled to the travel pay and allowance for subsistence provided in sections 1289 and 1290, Revised Statutes, as then amended and in effect, as though discharged April 11, 1899, by reason of expiration of enlistment, and appointed or reenlisted April 12, 1899, without deduction of travel pay and subsistence paid such officers or soldiers on final muster out subsequent to April 11, 1899."

I am advised by the Secretary of War that there was approximately 15,000 officers and soldiers of the Volunteer forces of the United States in the Philippine Islands at the conclusion of peace with the Kingdom of Spain who would become beneficiaries of this act.

The Comptroller General, in his report of February 23, 1935, advises that the enactment of this bill would authorize payment of travel pay at the rate of 1 day's pay and 1 ration for each 20 miles, inclusive of the distance by water from the Philippine Islands to San Francisco, approximately 8,000 miles, and that such payments for the water travel alone will exceed 1 year's pay plus 1 day's ration for each day of such period. It is estimated the cost of the legislation will approximate $7,000,000.

Congress has heretofore recognized the service of these officers and men by the award of a special medal, and there was also an allowance by the act of Congress approved January 12, 1899, of 2 months' extra pay to all Volunteers who served honestly and faithfully beyond the continental limits of the United States. I join most heartily in recognizing and appreciating the patriotic service of these men.

However, approval of this bill would result in the payment of a gratuity to each of the officers and men concerned in an amount exceeding his pay for a full year, plus the value of rations for the period involved in sea travel from the Philippines to the United States, a benefit utterly without warrant, since each individual concerned has already received transportation and subsistence at Government expense for the journey performed in addition to full pay for the entire time.

I have recently signed an act restoring pensioners of the War with Spain and Philippine Insurrection to their full rate of pension. I feel that no breach of trust has been committed by the Government as regards the men who served their country in the War with Spain and Philippine Insurrection, and from the facts in this case general legislation upon this subject as provided in H. R. 2024 is not deemed advisable.

Mr. President, the facts, as I understand them, are substantially as follows: During the Spanish-American War the Government sent a large number of soldiers to the Philippine Islands. Among them were several thousand Volunteers. Under the terms of their enlistment, when peace was declared, automatically their military services terminated. The

situation, however, in the Philippine Islands was such as to require our Government to maintain in the Archipelago a considerable military force. Several thousand Volunteers whose terms of services were ended volunteered to remain, and reenlisted for service in the islands.

The President states that the treaty of peace between the United States and Spain was ratified on April 11, 1899, and, as I have indicated, the American Volunteers were entitled to their immediate discharge. Several thousand who were within this category immediately reenlisted; others were mustered out and returned to the United States, the Government furnishing water transportation to the mainland and cash from the landing port to the place where they enlisted. The Volunteers who returned home at the termination of their enlistment were treated just the same as officers and men of the Regular Army—i. e., the Government transported them from the Philippine Islands to continental United States and also furnished them cash to take them from the landing ports to their homes. The Volunteers who elected to reenlist the same day or the day after the termination of their enlistment received a cash allowance from the continental port where they would have landed to their respective homes, even though they did not return home at that time. The Volunteers who did reenlist, and they were mustered out several months later, were transported by the Government to continental ports, from which they went, presumably by train, to their homes. As stated, those in this class had received the usual cash amount or payment to meet transportation costs from the landing ports to their various homes. There is no question but that the Volunteer officers and men, when they were finally mustered out, received the same consideration by way of money and transportation as was accorded to the Volunteer officers and men who did not reenlist or those who were in the Regular military service of the Government. A number of the Volunteers did not return home, but remained, and still remain, in the Philippine Islands. They received the same cash payment as if they had returned to their homes in the United States.

The contention is now made by those supporting the pending bill that the Volunteers who reenlisted the same day or the next day after they were entitled to discharge, upon the ratification of the Paris Treaty, are entitled to double payment, i. e., are entitled to assume that when their term of enlistment expired on the 11th or 12th of April 1899 they were entitled to transportation to their homes in the United States, even though they immediately reenlisted and served for several months, at the expiration of which time they were mustered out; and that the Government, when they were mustered out, should again pay for their transportation to the United States. Moreover, as I understand, they claim that notwithstanding all other persons in the military service, whether in the Regular Army or in the Volunteer forces, when their services in the Philippine Islands terminated, were transported by the United States to ports in continental United States and also received a regular cash allowance from such ports to the places of their enlistment, they are entitled to be paid, as and for water transportation, 20 cents per mile from the Philippines to San Francisco, and also cash allowances from that port to their homes.

It may be that those in the Regular Army did not receive cash allowances from the continental ports at which they were landed to the places at which they enlisted if their term of service had not expired.

Those who are supporting this bill contend, as I understand, that the Volunteers who reenlisted should receive not only double payment in cash from the continental ports at which they landed to their respective homes but also 20 cents a mile from the Philippine Islands to such ports. It was a bill containing substantially these provisions which the President would not approve.

Mr. President, as I understand the facts, the President was justified in his veto message of September 2, 1935.

Mr. CAPPER. Mr. President, House bill 9472 provides for the payment to about 15,000 officers and enlisted men, State Volunteers, who served in the Philippine Islands beyond the period of their enlistment, of the same amount of travel pay as was paid to enlisted men of the Regular Army who were discharged in the Philippines. These officers and men enlisted for the War with Spain and voluntarily remained in service in the Philippine Islands after the conclusion of peace by the treaty with Spain of April 11, 1899, for a period of several months for the purpose of engaging in the suppression of the Philippine Insurrection, which began in February 1899.

Their retention in service followed an exchange of cablegrams between Adjutant General Corbin and General Otis, in command in the Philippines. In answer to a cablegram from Adjutant General Corbin on March 16, 1899, General Otis replied as follows:

> Believed after inquiry majority Volunteer organizations willing to reenlist for 6 months from ratification of treaty, provided that upon original discharge are paid traveling allowances to places of muster in, and that after expiration of second enlistment they are transported to those places by United States.

This reply from General Otis was based on responses he had received from the several organizations of Volunteers under his command to whom the inquiry from the President had been submitted. In some units the inquiry had been read to the men by their officers and voted upon, while in others where the men were scattered the officers had spoken for the men and agreed to reenlist and stay for the period required, not to exceed 6 months. The condition contained in the cablegram was in substance a statement of the law then in effect governing travel-pay allowances to officers and men discharged (honorably) and who were again appointed or who reenlisted.

On March 25, 1899, a general advance was ordered against the insurrectionists, and from that date until in June these Volunteer troops were in active combat—some of them longer—in the campaign against the insurrectionists. They were required to meet unusual hardships in this campaign, fighting as they were under a tropical sun, badly equipped, without adequate food and water, and continually harassed by surprise attacks. When the date of the exchange of ratifications of the treaty of peace arrived, April 11, 1899, these Volunteers were in the field and continued so for months. It would have been a physical impossibility to have effected the signing of a muster-out roll and muster-in roll, so that the service of these men would actually show a discharge and a reenlistment or reappointment, but these officers and soldiers believed when they accepted the duty of remaining on so long as their services were required in the Philippine Islands, not to exceed 6 months, that they had in effect reenlisted. Their services in the field were accepted and utilized by the Government following almost immediately the agreement to remain in service until troops to replace them could be supplied. This service in active combat continued until after the date of the conclusion of peace with Spain, for some units not longer than 3 months, for others and most of the troops in the Volunteer service of the United States for the greater part of 6 months.

Had these officers and soldiers insisted upon their discharge as of the date of the conclusion of peace with Spain, it would have meant the abandonment of the islands to the insurrectionists except for the very limited number of Regular Army troops then in the islands.

The result would have been the retaking by the Aguinaldo forces of the territory then held by these Volunteers, the strengthening of the insurrectionist organization, and the expenditure of many millions not only for the transportation of another army to take up the fight again but also for a long and fierce combat by nonacclimated troops against well-equipped and well-organized native soldiers accustomed to the climate and acquainted with the country. The organized insurrection was broken by the continuous drive of the Volunteers, and the replacement troops which took their places had but to clear the country of unorganized detached bands. It is pertinent to remark here that the insurrectionists, numbering between 30,000 and 40,000, had been equipped and trained by the United States and had been cooperating with American troops in the War with Spain, and that, knowing

the Volunteers were entitled to be discharged when the War with Spain terminated, they counted upon the withdrawal of the Volunteers to make it possible for them to gain control of the islands and eventually their independence.

It is obvious that there is no legal liability on the part of the Government because the formality of mustering the troops out and mustering them in as again appointed officers and reenlisted soldiers did not take place; but the men did perform valiant service, for which they were commended by President McKinley, and which Congress recognized by the awarding of a special medal; they did remain in service for from 3 to 6 months beyond the termination of the War with Spain on April 11, 1899, on which date they were entitled to their discharge; and they did this all believing that they were to be regarded as having reenlisted in the temporary forces authorized by section 15 of the act of March 2, 1899, and were thereby entitled to the travel pay and allowances authorized by then existing law as though their first enlistment had terminated on April 11, 1899, and they had entered upon a second enlistment beginning April 12, 1899. They fulfilled all the requirements of such temporary enlistment without having formally gone through the process of veteranizing.

Mr. ROBINSON. Mr. President, will the Senator yield for a question?

Mr. CAPPER. I yield.

Mr. ROBINSON. Does the Senator distinguish between this bill and the bill which was referred to by the Senator from Utah [Mr. KING] and which was vetoed by the President last year?

Mr. CAPPER. I can only say that this bill passed the House after full consideration; there was practically no opposition there; and there is every reason, I think, why the bill should receive the approval of the Senate.

Mr. ROBINSON. The Senator is not answering the question which I directed to him. The Senator from Utah made the statement that an almost identical bill was passed last year, went to the President, and was vetoed by him. Evidently the implication of that statement is that if this bill be passed it also will encounter an Executive veto. I should like to be informed a little more definitely. I understand that there has been some change in the bill?

Mr. CAPPER. There is a change in the bill.

Mr. ROBINSON. And my question is, What is the difference between this bill and the one passed last year which we did not try to pass over the President's veto?

Mr. CAPPER. The important change is found on page 2, at the end of line 6, where the following proviso is added:

Provided, That no benefit shall accrue under any provision of this act to any person whose claim is based upon the service of any officer or soldier discharged in the Philippine Islands at his own request.

Mr. KING. There are 26 of those persons.

Mr. BORAH. Mr. President, I could not very well hear the statement of the Senator from Utah, but I understood him to say that these Volunteers received their pay.

Mr. KING. That is true.

Mr. BORAH. If that is true, that ought to be a matter which could be demonstrated. Certainly we do not want to pay them again. The letters which I have received are to the contrary. As the Senator knows, I should be glad to know the facts.

Mr. KING. Mr. President, I have stated what I understand the facts to be in connection with the matter before us, and I can add but little thereto. I have conferred with a number of officers in the War Department, and what I have stated is based largely upon the information derived from them and from the facts recited in the President's veto message. I am repeating when I state that after the Paris Treaty was signed, the Volunteers were entitled to be mustered out of service. The situation in the Philippine Islands, however, called for the maintenance there of military forces by the United States, and, as I have stated, several thousand Volunteers elected to reenlist for a short time. A number of Volunteers preferred to return home and the Government furnished them water transportation to continental ports and supplied them with cash, such as the law required, to take them from such ports to their respective homes. If all of the Volunteers had returned home at that time they would have been accorded the same treatment as those Volunteers who did return, as well as a number who were in the Regular Army who were returning—some as the result of the termination of their enlistment and some by reason of their physical disabilities. Those who voluntarily remained, as I have stated, received the usual cash payments from the continental landing port to their homes as they would have received if they had gone home at that time. The Government still owed them the duty to transport them by water from the Philippine Islands to some port in the United States.

But it is claimed now that those who did remain, and at the end of their second enlistment were transported to continental ports by the Government, should be paid according to a different rule, cash at the rate of 20 cents per mile from the Philippine Islands to the United States, and a further payment of cash from San Francisco, if the boat landed there, to their various homes.

I repeat what I said a few moments ago that the Government did transport to San Francisco all the Volunteers who did not remain in the Philippine Islands, and in addition, as stated by the President, gave them an additional 2 months' pay. There is some justification for the claim that double pay is sought.

Mr. BORAH. Did all the soldiers reenlist?

Mr. KING. No. Some of them came home and those who did are not concerned in this proposed legislation. It is simply those who remained and reenlisted and who subsequently returned to the United States who are involved and who are asking this double transportation benefits.

Mr. BORAH. Are there any reports from the War Department on the subject?

Mr. LOGAN. Mr. President, may I suggest that, as I recall, I have seen a report from the General Accounting Office. It is a very lengthy and complicated report. After reading it I remember that I was left in some confusion. I should like to suggest, however, that the Senate Committee on Claims amended the House bill in accordance with the contention of the War Department. I do not know whether this bill contains the amendment which the Claims Committee of the Senate reported or whether the House bill contains a similar provision. The amendment to the bill was acceptable to the War Department.

Mr. BORAH. What was the effect of the amendment?

Mr. LOGAN. The effect of the amendment was to exclude from the benefits of the bill the classes to which the Senator from Utah [Mr. KING] has been referring, and confine the payment of the travel pay to those who did not voluntarily fail to take advantage of the travel pay which they might have received at the time of the expiration of their service. A similar bill was vetoed by the President last year for the reasons given by the Senator from Utah. When the bill came before the Senate Committee on Claims at this session we took up the matter with the War Department and the suggestion of an amendment was made to the committee. We then reported the bill with that amendment included in it. I do not know whether the bill which we are now considering is that bill or whether we are considering the House bill.

Mr. KING. I see no amendment suggested by the War Department. I received a letter from the Secretary of War a few days ago, saying:

The matter is under investigation in this Department, and as soon as the investigation is completed, I will write you further relative thereto.

Mr. LOGAN. It was taken up personally with the Secretary of War and the War Department. The Committee on Claims was advised by the clerk of the committee that the War Department said if the bill should be passed at all, it should be amended in the manner indicated, and such an amendment was inserted in the bill by the committee. That was perhaps before the House passed the bill. That was the Senate bill. It is possible that when the Senate

bill was called on the calendar the House bill was substituted for it and passed. I am frank to say I do not know whether the bill we are now considering is the House bill as it passed the House or whether it is the Senate bill.

Mr. BORAH. We ought to be able to find out which bill we are considering, it would seem to me.

The PRESIDENT pro tempore. May the occupant of the chair suggest that the bill now before the Senate contains a provision which was submitted as a committee amendment. The clerk will report it for the information of the Senate.

The LEGISLATIVE CLERK. On page 2, line 6, the following proviso was added:

Provided, That no benefit shall accrue under any provision of this act to any person whose claim is based upon the service of any such officer or soldier discharged in the Philippine Islands at his own request.

Mr. KING. There is no controversy over that fact. There were a number of persons who took advantage of the situation and remained in the Philippine Islands.

I do not think there can be any controversy about the facts. The men were entitled to their discharge from the service on the 11th of April 1899. Many preferred to remain in the service; the Government desired them to remain, and they did remain and rendered valient and patriotic service. When they were discharged about 6 months later the Government transported them to the United States. They now say, "We are entitled to two payments, because when we were first discharged we were entitled to receive transportation home, but in view of the fact that we did not avail ourselves of that and did not return home then, but remained 6 months longer, we are entitled now to two payments."

Mr. BORAH. Then, if we should pass this bill we would be practically passing the bill which was vetoed at the last session?

Mr. KING. Yes; that is my opinion. I have received a letter from the Secretary of War, dated April 11, in which he says:

I have your letter of April 3, in which you request information relative to the number of persons eligible for payment of travel pay, the average cost per person, and the total cost to the Government in the event H. R. 9472, Seventy-fourth Congress, known as the so-called Philippine travel pay bill, was enacted into law. The matter is under investigation by this Department, and as soon as the investiagtion is completed I will write you further.

It seems to me if there is any controversy the matter might be delayed a few days, and the Senator who is the proponent of the bill, or any other Senator interested, should confer with the War Department and obtain information which I am sure will corroborate the statement I have made.

Mr. BORAH. Mr. President, I have a letter from a gentleman who served in the Philippines. I know him well personally. He contends that he was never compensated for his return expenses, and so forth, at any time. I should like to know if the bill is what the Senator from Utah contends, for, if it is, I myself should not want to vote for it.

Mr. KING. Mr. President, if I may repeat—and I know the Senator from Kansas will pardon me—I read again from the President's message:

Congress has heretofore recognized the service of these officers and men by the award of a special medal, and there was also an allowance, by the act of Congress approved January 12, 1899, of 2 months' extra pay to all Volunteers who served honestly and faithfully beyond the continental limits of the United States. I join most heartily in recognizing and appreciating the patriotic service of these men.

However, approval of this bill would result in the payment of a gratuity to each of the officers and men concerned in an amount exceeding his pay for a full year, plus the value of rations for the period involved in sea travel from the Philippines to the United States, a benefit utterly without warrant, since each individual concerned has already received transportation and subsistence at Government expense for the journey performed in addition to full pay for the entire time.

That was less than a year ago.

Mr. BORAH. I should think the bill ought to go over until we know about these things.

Mr. KING. I have no objection, and I shall be glad to join with the Senator from Kansas [Mr. CAPPER] in calling at the War Department for the purposes of obtaining full and complete data in regard to all questions involved in connection with this proposed legislation. I suggest that the bill go over until Monday, hoping that by that time any additional information may be obtained.

Mr. ROBINSON. I ask unanimous consent that final action on the motion to reconsider be postponed until next Monday.

Mr. McNARY. For the purpose of obtaining further information from the Secretary of War?

Mr. ROBINSON. Yes, sir.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

Mr. ROBINSON. It is my suggestion that some Senator who is interested in the bill procure the information.

Mr. KING. I will join with my friend from Kansas in an effort to secure all information bearing upon the matter before us.

CHANGE OF NAME OF DEPARTMENT OF INTERIOR

Mr. LEWIS. Mr. President, I ask the Senate if it will be generous enough to let me explain a matter.

I desire to request that Senate bill 2665, which, with the amendment to be proposed, will merely provide for a change of the name of the Department of the Interior, be considered at this time.

The original bill which is on the calendar provides for the amalgamation of certain governmental agencies and the exercise of their functions by the Interior Department. That being wholly abandoned, and the amendment providing only for a change of name, I ask the Senate to consider the Senate bill, and then I shall ask the Senate to adopt the amendment.

Mr. McNARY. Mr. President, Senate bill 2665 was reported early in the present session of Congress. It contains provisions which I should very vigorously oppose. I understand from the declaration of the Senator that he desires to offer an amendment in the nature of a substitute.

Mr. LEWIS. Exactly.

Mr. McNARY. The amendment strikes out all after the enacting clause, all the controversial provisions, and relates only to changing the name of the Department of the Interior?

Mr. LEWIS. The Senator from Oregon correctly states the premises.

Mr. BORAH. Mr. President, I have a letter from the Secretary of the Interior in which he says there is now nothing in the bill except the change of name.

Mr. LEWIS. Nothing more.

Mr. ROBINSON. Mr. President, it will be necessary for the Senate to proceed to the consideration of Senate bill 2665 with the understanding that the author of the bill, the Senator making the motion, will offer an amendment to the bill striking out all after the enacting clause and inserting language which will be limited to effecting a change in the name of the Department.

Mr. McNARY. That is correct, Mr. President.

The PRESIDENT pro tempore. That is the understanding of the Chair. The Chair understands that the Senator from Illinois desires the consideration of Senate bill 2665 with the understanding that he will offer the amendment which now lies on the desk, which proposes to strike out all after the enacting clause and to substitute matter which will be read for the information of the Senate.

The LEGISLATIVE CLERK. The amendment proposes to strike out all after the enacting clause and in lieu thereof to insert the following:

That the Department of the Interior shall hereafter be called and known as the Department of Conservation, and the Secretary of the Interior shall be called and known as the Secretary of Conservation, and all the provisions and sections of titles IV and XI of the Revised Statutes, including all acts supplementary thereof and amendatory thereto, are hereby amended accordingly.

The PRESIDENT pro tempore. Is that the amendment which the Senator proposes to offer?

Mr. LEWIS. Yes, Mr. President. The clerk has failed to read the last part of the amendment.

The LEGISLATIVE CLERK. It is also proposed to amend the title so as to read:

A bill to change the name of the Department of the Interior, to be known as the Department of Conservation.

Mr. LEWIS. It is such that I tender now as the amendment and, using the words of the Senator from Oregon, as a substitute, the original text of the bill, containing the provision for amalgamation, being wholly withdrawn.

The PRESIDENT pro tempore. The Senator from Illinois asks unanimous consent, under that statement, that the Senate proceed to the consideration of Senate bill 2665. Is there objection?

There being no objection, the Senate proceeded to consider the bill (S. 2665) to change the name of the Department of the Interior and to coordinate certain governmental functions.

The PRESIDENT pro tempore. The bill is before the Senate and open to amendment.

Mr. ROBINSON. The Senator now offers the amendment, as I understand.

Mr. LEWIS. Now I offer the amendment as explained by myself.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to strike out all after the enacting clause, and in lieu thereof to insert the following:

That the Department of the Interior shall hereafter be called and known as the Department of Conservation, and the Secretary of the Interior shall be called and known as the Secretary of Conservation, and all of the provisions and sections of titles IV and XI of the Revised Statutes, including all acts supplementary thereof and amendatory thereto, are hereby amended accordingly.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to change the name of the Department of the Interior, to be known as the Department of Conservation."

PARK, PARKWAY, AND RECREATIONAL FACILITIES

Mr. ROBINSON. Mr. President, I understand that the Senator from New York [Mr. WAGNER] wishes to bring a measure before the Senate. If the bill is made the unfinished business, I shall then shortly move a recess.

Mr. McNARY. What bill is it?

Mr. WAGNER. Mr. President, I desire to move the consideration of Calendar No. 1764, being House bill 10104, so as to make it the unfinished business. I move that the Senate proceed to the consideration of the bill.

Mr. McNARY. Mr. President, may the title of the bill be read?

The PRESIDENT pro tempore. The clerk will state the title of the bill for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H. R. 10104) to aid in providing the people of the United States with adequate facilities for park, parkway, and recreational-area purposes, and to provide for the transfer of certain lands chiefly valuable for such purposes to States and political subdivisions thereof.

Mr. WAGNER. Mr. President, as the Senator from Oregon will recall, the bill was before the Senate for consideration earlier in the session. A number of objections were made to the effect that the bill did not give the right to recommend the transfer of certain Federal properties to the States upon the approval of Congress. The bill thereafter was recommitted to the committee, and it has been redrafted so as to remove all the objections that were made upon the floor, and now is limited to a study and survey of the recreational facilities of the country for the purpose of coordinating State and Federal recreational facilities; and that study and survey are to be reported to Congress.

Mr. McNARY. I have no objection to having the bill made the unfinished business, with the understanding that we shall recess at this time to a future date.

The PRESIDENT pro tempore. The question is on the motion of the Senator from New York that the Senate proceed to the consideration of House bill 10104.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 10104) to aid in providing the people of the United States with adequate facilities for park, parkway, and recreational-area purposes, and to provide for the transfer of certain lands chiefly valuable for such purposes to States and political subdivisions thereof, which had been reported from the Committee on Public Lands and Surveys with amendments.

STATUS OF BONUS RECIPIENTS ON WORK-RELIEF PROJECTS

Mr. VANDENBERG. Mr. President, if I may have the attention of the junior Senator from Washington [Mr. SCHWELLENBACH] I desire to address a question to him prefaced by a brief statement.

I did not vote for the immediate payment of the bonus when the bill for that purpose was before the Senate, but now that the bonus is to be paid I have a very distinct feeling that it would be nothing short of an outrage if veterans entitled to it should be penalized in respect to work relief because they are receiving their bonus.

I am advised from some sections of the country, including my own State, that an order either already has gone out or is in contemplation which will take veterans off work relief so long as they have their bonus payments in their possession. I desire to ask the junior Senator from Washington if my recollection is incorrect that when the bill was on the floor of the Senate he offered an amendment specifically for the purpose of preventing this sort of practice and whether he did not withdraw it upon the distinct assurance that no such practice would be pursued.

Mr. SCHWELLENBACH. Mr. President, I will say that the Senator from Michigan is correct. I had offered that amendment, and the junior Senator from South Carolina [Mr. BYRNES] came to me, and we had the understanding, which he confirmed with the Works Progress Administration, that it would not be the practice of the Works Progress Administration to penalize anyone because of the fact that he had received a bonus. Upon that understanding I withdrew the amendment.

I have received information, and, in fact, proof, that in at least three States, Michigan, California, and one other—I do not remember the name of the other State—immediately after the passage of the Bonus Act steps were taken to prevent men who might be recipients under the Bonus Act from being eligible under W. P. A. I have now offered an amendment to the appropriation bill to the same effect as the amendment I offered to the bonus bill. The amendment has been referred to the Committee on Appropriations, and I intend to present it as soon as the facts have been gathered together for me showing that the Works Progress Administration is attempting to discriminate against men because of the fact that they are to receive a bonus.

Mr. VANDENBERG. I thank the Senator for his statement.

It seems to me that this process is utterly indefensible. Regardless of what one's attitude may be toward the payment of the bonus itself, certainly we are not justified in substituting adjusted compensation for whatever obligation the Government owes to those who are in distress. I am glad the Senator is pursuing the matter, and I thank him for his statement.

PAYMENTS TO EASTERN CHEROKEES

Mr. THOMAS of Oklahoma. Mr. President, there is now pending before the Committee on Indian Affairs a bill in the nature of a jurisdictional act giving the Cherokee Indians the right to go into the Court of Claims. Before the committee can pass upon the bill it will be necessary to ask for certain information. I have prepared a resolution asking the Comptroller General for the information.

The resolution has been printed and is on the table.

At this time I ask unanimous consent to take from the table Senate Resolution 285 for immediate consideration.

The PRESIDENT pro tempore. Without objection, the unfinished business will be temporarily laid aside for that purpose. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution (S. Res. 285) submitted by Mr. THOMAS of Oklahoma on April 21, 1936, calling for information concerning payments to the Eastern Cherokees for lands ceded under treaty of December 29, 1835, which was agreed to, as follows:

Resolved, That the Comptroller General of the United States, for the information of the Senate, is hereby requested to advise the Senate of the amounts appropriated by Congress in payment of the lands and improvements of the Eastern Cherokees ceded by them by treaty of December 29, 1835 (7 Stat. 478); what charges against such funds were found justly due and payable by the Supreme Court of the United States after deducting such just charges; whether or not the balance bore interest; and, if so, from what date and at what rate. He is further requested to advise the Senate what amount or amounts of payments were made thereon to the Eastern Cherokees per capita since the dates of appropriation; and the balance due the Eastern Cherokees per capita, if any, after applying such payments made in accordance with the established law governing partial payments. Also what gratuities, if any, have been paid to the Eastern Cherokees per capita.

RESTRICTION OF MARKETING OF GOVERNMENT-HELD COTTON

Mr. SMITH. Mr. President, during the call of the calendar yesterday objection was made to the consideration of Senate Joint Resolution 242, authorizing and directing the Commodity Credit Corporation to facilitate the liquidation of loans to cotton producers. I think the objection was made under a misapprehension. As I stated yesterday, the joint resolution has the approval of the Department of Agriculture. It simply proposes to restrict the sale of cotton held by the Government during the slack period, from the present time up to the 1st of September, to a certain amount, and that is all. The remainder of the measure is a recital of what is already being done. It would simply restrict the amount of Government holdings that could be put on the market.

Mr. McNARY. Mr. President, what is the calendar number of the joint resolution?

Mr. SMITH. It is Order of Business 1822 and is Senate Joint Resolution 242. I assure my colleague on the Committee on Agriculture and Forestry that the only object of the measure is the restriction of the amount of cotton held by the Government that may go on the market during what is known as the slack period.

Mr. McNARY. Who objected to the consideration of the joint resolution? If it came up under the unanimous-consent agreement to consider unobjected bills on the calendar, it would not be fair to take it up out of order if objection was made.

Mr. SMITH. I think the objection has been removed.

Mr. McNARY. I understand the Senator to say that when we were considering unobjected bills on the calendar, objection was made to the consideration of the joint resolution.

Mr. SMITH. But the objection has been removed.

Mr. McNARY. Who objected?

Mr. SMITH. The Senator from Utah [Mr. KING].

Mr. McNARY. The Senator from Utah only?

Mr. SMITH. Yes; alone.

Mr. ROBINSON. Has the joint resolution been considered by a department or an agency of the Government?

Mr. SMITH. I have a letter from the Department of Agriculture in which they endorse the joint resolution.

Mr. McNARY. Would it not be well to have it inserted in the RECORD?

Mr. SMITH. I read from it yesterday.

The PRESIDENT pro tempore. The Senator from South Carolina asks unanimous consent to temporarily lay aside the unfinished business and proceed to the consideration of Senate Joint Resolution 242. Is there objection?

There being no objection, the Senate proceeded to consider the joint resolution (S. J. Res. 242) authorizing and directing the Commodity Credit Corporation to facilitate the liquidation of loans to cotton producers.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That the Commodity Credit Corporation is authorized and directed to facilitate in the following manner the liquidation of the loans it has made to cotton producers:

1. The borrowers shall be permitted until August 31, 1936, to repossess their cotton, in an amount not exceeding 750,000 bales by the payment of:

A. The average quotation of Middling ⅞" in the 10 designated spot markets on the day preceding date of notice of payment less one-quarter of a cent per pound, on cotton on which loans of 12 cents per pound have been made and less 1¼ cents per pound on cotton on which loans of 11 cents per pound have been made: *Provided, however*, That in no instance will the cotton on which loans have been made of 12 cents per pound be released for an amount less than 11¼ cents per pound, nor will the cotton on which loans of 11 cents per pound have been made be released for an amount less than 10¼ cents per pound.

B. Reconcentration costs of freight, compression, and patches, if any, shall be paid by the borrower.

C. The Commodity Credit Corporation shall pay all carrying charges to and including the month in which the cotton is repossessed.

2. Between February 1 and August 31 of each succeeding year thereafter, the same concessions as these set out in paragraphs A, B, and C shall be made on an amount not exceeding 1,000,000 bales during each year: *Provided, however*, That the minimum prices stipulated in paragraph A shall be substituted by such minimum prices as shall be determined by the Commodity Credit Corporation, and such prices so determined shall be announced by the Commodity Credit Corporation not later than December 15 of each year.

3. When there remains not more than 500,000 bales in said loans the Commodity Credit Corporation shall take such steps as it deems best to liquidate said remainder.

UNITED STATES DISTRICT COURT IN MISSISSIPPI

Mr. HARRISON. Mr. President, there appears on the calendar House bill 12162, to create an additional division of the United States District Court for the Southern District of Mississippi, to be known as the Hattiesburg division. The bill has been reported favorably by the Committee on the Judiciary, after having been passed by the House of Representatives. The bill merely provides for the creation of another division of the court. It would involve no extra expense. The additional division is very much needed, and I ask that the bill be considered and passed at this time.

Mr. McNARY. Mr. President, I am advised that the bill would not result in the creation of a new judicial district but would merely provide for the court's sitting in some other place in the district than that at which it now sits.

Mr. HARRISON. That is correct.

Mr. McNARY. I have no objection.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Mississippi?

There being no objection, the Senate proceeded to consider the bill (H. R. 12162) to create an additional division in the United States District Court for the Southern District of Mississippi to be known as the Hattiesburg division, which was ordered to a third reading, read the third time, and passed.

EXECUTIVE SESSION

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting a nomination and a convention, which were referred to the appropriate committees.

(For nomination this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

Mr. COPELAND, from the Committee on Commerce, reported favorably the nomination of A. Harry Zychick, of Ohio, to be United States Commissioner General for the Great Lakes Exposition.

Mr. WALSH, from the Committee on Naval Affairs, reported favorably the nominations of sundry officers in the Navy and the Marine Corps.

The PRESIDENT pro tempore. The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the first nomination on the calendar.

PUBLIC WORKS ADMINISTRATION

The legislative clerk read the nomination of George M. Bull, of Colorado, to be State director in Colorado.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of John Latenser, Jr., of Nebraska, to be State director in Nebraska.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Arthur S. Tuttle, of New York, to be State director in New York.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

PUBLIC HEALTH SERVICE

The legislative clerk read the nomination of Henry P. Canby to be assistant dental surgeon.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Robert H. Moore to be assistant dental surgeon.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. ROBINSON. I ask unanimous consent that the nominations of postmasters be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc.

RECESS TO FRIDAY

The Senate resumed legislative session.

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon on Friday next.

The motion was agreed to; and (at 1 o'clock and 18 minutes p. m.) the Senate took a recess until Friday, May 15, 1936, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate May 13 (legislative day of May 12), 1936

COLLECTOR OF INTERNAL REVENUE

Harry M. Hickey, of Albany, N. Y., to be collector of internal revenue for the fourteenth district of New York, to fill an existing vacancy.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 13 (legislative day of May 12), 1936

PUBLIC WORKS ADMINISTRATION

George M. Bull to be State director of the Public Works Administration in Colorado.

John Latenser, Jr., to be State director of the Public Works Administration in Nebraska.

Arthur S. Tuttle to be State director of the Public Works Administration in New York.

PUBLIC HEALTH SERVICE

Henry F. Canby to be assistant dental surgeon.

Robert H. Moore to be assistant dental surgeon.

POSTMASTERS

ALABAMA

Jack Vaughan, Cuba.

CALIFORNIA

Earle Heath Stanley, Cedarville.
George P. Meek, Covina.
Allie C. Cook, Montebello.
Daisy E. Platt, Rice.
Ernest L. Finley, Santa Rosa.

COLORADO

Miles P. Tierney, Boscobel.
Paul W. Cornish, Fort Atkinson.
Fred C. Wolff, Lakemills.
Cora A. Thompson, McFarland.
Joseph R. Coyle, Menasha.
Charles F. Kurtz, Two Rivers.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MAY 13, 1936

The House met at 11 o'clock a. m.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most gracious Heavenly Father, while another night has been enfolding us, Thou hast kept us in Thy everlasting arms. For this beautiful day, we thank Thee; may we look up through nature to nature's God and be blest with the sunlight of a strong, happy faith. Conscious of our needs, blessed Lord, we beseech Thee to assure us of the constancy of Thy wise guidance. Evermore may we realize that in Thee we live and move and have our being. Identify us with truth so that right action may result from a will purified from selfishness. Grant that our lives may not die away amid toil and daily care, but so bless and sustain us that we may present both souls and bodies for Thy service, and Thine shall be eternal praises. Through Christ. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed without amendment bills and joint resolutions of the House of the following titles:

H. R. 1398. An act to provide for the establishment of a Coast Guard station at or near Crescent City, Calif.;

H. R. 2119. An act for the relief of Mrs. E. L. Babcock, mother and guardian of Nelson Babcock, a minor;

H. R. 2467. An act for the relief of Holy Cross Mission Hospital;

H. R. 3340. An act for the relief of Jesse S. Post;

H. R. 5058. An act to convey certain lands to Clackamas County, Oreg., for public-park purposes;

H. R. 8089. An act for the relief of Joseph J. Baylin;

H. R. 8370. An act to provide for the establishment of a Coast Guard station at Port Washington, Wis.;

H. R. 8506. An act for the relief of Oliver Faulkner;

H. R. 9042. An act to provide for the sale of the Port Newark Army Supply Base to the city of Newark, N. J.;

H. R. 9370. An act for the relief of Frank Cordova;

H. R. 9373. An act for the relief of H. L. and J. B. McQueen, Inc., and John L. Summers, former disbursing clerk, Treasury Department;

H. R. 9455. An act for the relief of Robert J. Mann;

H. R. 10308. An act to amend article 3 of the "Rules Concerning Lights, etc.", contained in the act entitled "An act to adopt regulations for preventing collisions upon certain harbors, rivers, and inland waters of the United States", approved June 7, 1897;

H. R. 10321. An act to amend section 4 of Public Act No. 286, Seventy-fourth Congress, approved August 19, 1935, as amended;

H. R. 10589. An act to amend section 32 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and/or completing the construction of other bridges over the navigable waters of the United States, and for other purposes", approved August 30, 1935;

H. R. 10847. An act to authorize the acquisition of land for cemeterial purposes in the vicinity of New York City, N. Y.;

H. R. 11036. An act to amend section 4321, Revised Statutes (U. S. C., title 46, sec. 263), and for other purposes;

H. R. 11302. An act to authorize the Secretary of War to lend to the reunion committee of the United Confederate Veterans 3,000 blankets, olive drab, no. 4, 1,500 canvas cots, to be used at their annual encampment to be held at Shreveport, La., in June 1936;

H. R. 11346. An act for the relief of H. R. Heinicke, Inc.;

H. R. 12183. An act for the relief of Gladys Hinckley Werlich;

H. J. Res. 538. Joint resolution to provide for participation by the United States in the Ninth International Congress of Military Medicine and Pharmacy in Rumania, in 1937; and to authorize and request the President of the United States to invite the International Congress of Military Medicine and Pharmacy to hold its tenth congress in the United States in 1939, and to invite foreign countries to participate in that congress;

H. J. Res. 547. Joint resolution providing for the importation of articles free from tariff or customs duty for the purpose of exhibition at Great Lakes Exposition to be held at Cleveland, Ohio, beginning in June 1936, and for other purposes; and

H. J. Res. 569. Joint resolution to authorize an appropriation for the expenses of participation by the United States in a conference at Brussels to revise the Convention for the Protection of Literary and Artistic Works concluded at Bern, September 9, 1886, and revised at Rome, June 2, 1928.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills and a joint resolution of the House of the following titles:

H. R. 4148. An act for the relief of the Thomas Marine Railway Co., Inc.;

H. R. 6163. An act for the relief of Mrs. Murray A. Hintz;

H. R. 6258. An act for the relief of D. E. Woodward;

H. R. 8262. An act for the relief of Tom Rogers;

H. R. 8431. An act to provide for the establishment of the Fort Frederica National Monument, at St. Simon Island, Ga., and for other purposes;

H. R. 8705. An act for the relief of Claude Curteman;

H. R. 8766. An act to authorize municipal corporations in the Territory of Alaska to incur bonded indebtedness, and for other purposes;

H. R. 9496. An act to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration; and

H. J. Res. 439. Joint resolution authorizing the erection in the Department of Labor Building of a memorial to the officers of the Immigration and Naturalization Service and Immigration Border Patrol who, while on active duty, lost their lives under heroic or tragic circumstances.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10267) entitled "An act to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8372) entitled "An act to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon."

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1975. An act to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 949. An act for the relief of R. R. Purcell;

S. 2041. An act for the relief of Charles E. Wilson;

S. 2575. An act for the relief of Emma Gomez;

S. 2576. An act for the relief of Manuel D. A. Otero as administrator of the estate of Teresita S. Otero, deceased;

S. 3671. An act for the relief of Howard Hefner;

S. 3715. An act for the relief of Roscoe McKinley Meadows;

S. 3721. An act to authorize additional coinage in commemoration of the one hundredth anniversary of the independence of the State of Texas and the one hundredth anniversary of the admission of the State of Arkansas into the Union;

S. 3808. An act for the relief of R. D. Stephens and Vera Stephens;

S. 3844. An act for the relief of Mrs. M. N. Shwamberg;

S. 3921. An act authorizing the Secretary of War to bestow the Silver Star upon Michael J. Quinn;

S. 3992. An act for the relief of Capt. Laurence V. Houston, retired;

S. 4038. An act to amend an act of Congress approved March 3, 1863, entitled "An act to reorganize the courts in the District of Columbia, and for other purposes";

S. 4078. An act to authorize the award of a decoration for distinguished service to John C. Reynolds;

S. 4082. An act to authorize the presentation of a Congressional Medal of Honor to Taliesin Waters;

S. 4099. An act to authorize the award of the Congressional Medal of Honor for distinguished service to Pleas Sanders;

S. 4100. An act to incorporate the Veterans of Foreign Wars of the United States;

S. 4105. An act authorizing the Secretary of Agriculture to convey certain lands to the Maryland-National Capital Park and Planning Commission, of Maryland, for park, parkway, and playground purposes;

S. 4124. An act for the relief of the State of Connecticut;

S. 4140. An act for the relief of Homer Brett, Esq., American Consul at Rotterdam, Netherlands, as a result of money stolen from the safe of the American Consulate;

S. 4252. An act to provide for the modification of the contract of lease entered into on June 12, 1922, between the United States and the Board of Commissioners of the Port of New Orleans;

S. 4297. An act to amend section 80 of the act entitled "An act to establish a uniform system of bankruptcy

throughout the United States", approved July 1, 1898, as amended;

S. 4317. An act to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.;

S. 4340. An act to authorize the President to designate an Acting High Commissioner to the Philippine Islands;

S. 4390. An act to amend the National Defense Act relating to the Medical Administrative Corps;

S. 4425. An act to relinquish all right, title, and interest of the United States in certain lands in the State of Connecticut;

S. 4461. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Brownville, Nebr.;

S. 4462. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River between the towns of Decatur, Nebr., and Onawa, Iowa;

S. 4463. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near the cities of South Sioux City, Nebr., and Sioux City, Iowa;

S. 4487. An act to provide for a preliminary examination and survey of Smugglers Cove, Oreg.;

S. 4542. An act authorizing the Comptroller General of the United States to settle and adjust the claim of the Merritt-Chapman & Scott Corporation;

S. 4556. An act authorizing an appropriation for the payment of the claim of Gen. Higinio Alvarez, a Mexican citizen, with respect to lands on the Farmers Banco in the State of Arizona;

S. 4584. An act to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755), to extend and adapt its provisions to the convention between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded at the city of Mexico February 7, 1936, and for other purposes;

S. J. Res. 200. Joint resolution to extend the period of suspension of the limitation governing the filing of suit under section 19, World War Veterans' Act, 1924, as amended;

S. J. Res. 235. Joint resolution authorizing the Secretary of Agriculture to expend funds of the Agricultural Adjustment Administration for participation by the United States in the 1936 Sixth World's Poultry Congress;

S. J. Res. 250. Joint resolution extending thanks in appreciation of services rendered by Hayden W. Wren as superintendent of the docks of the port of New Orleans; and

S. J. Res. 257. Joint resolution authorizing the Secretary of War to receive for instruction at the United States Military Academy at West Point, Maximo Mariano Pruna y Hernandez, a citizen of Cuba.

CALL OF THE HOUSE

Mr. O'MALLEY. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present.

Mr. BANKHEAD. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 94]

Allen	Cooper, Ohio	Fernandez	Kerr
Andrew, Mass.	Cox	Fish	Kloeb
Arends	Dear	Gambrill	Kvale
Bacon	Deen	Gasque	Lamneck
Berlin	Dempsey	Gassaway	Larrabee
Bolton	DeRouen	Green	Lehlbach
Brennan	Dietrich	Greenwood	Lesinski
Bulwinkle	Dockweiler	Hamlin	McGroarty
Burnham	Doutrich	Hancock, N. Y.	McLean
Caldwell	Duffey, Ohio	Harlan	McLeod
Cary	Duffy, N. Y.	Hartley	Mahon
Cavicchia	Eagle	Hoeppel	Maloney
Claiborne	Eaton	Jenckes, Ind.	Marshall
Clark, N. C.	Edmiston	Jenkins, Ohio	Merritt, Conn.
Coffee	Ferguson	Kee	Montague
Montet	Plumley	Sanders, La.	Steagall
Murdock	Polk	Sandlin	Taylor, Colo.
Nichols	Ramsay	Scrugham	Thomas
Oliver	Rich	Sears	Utterback
Pearson	Risk	Short	White
Perkins	Rogers, N. H.	Smith, W. Va.	Wigglesworth
Pettengill	Rogers, Okla.	Spence	Wood
Pierce	Sabath	Starnes	Zioncheck

The SPEAKER. Three hundred and thirty-five Members have answered to their names; a quorum is present.

Mr. WOODRUM. Mr. Speaker, I move that further proceedings under the call be dispensed with.

The motion was agreed to.

THE FRAZIER-LEMKE BILL

Mr. LEMKE. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H. R. 2066) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a board of agriculture to supervise the same.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 2066, with Mr. WOODRUM in the chair.

The Clerk read the title of the bill.

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. REILLY].

Mr. REILLY. Mr. Chairman, as one of the five Members of this House who signed, at the same time, the petition to bring the Frazier-Lemke bill before this body, I desire to state that it was understood by the friends of the bill and others at the time I placed my name on the said petition that I was opposed to the bill and was signing the said petition only for the purpose of giving the sponsors of the measure a chance to bring their bill up on the floor of the House for discussion and a vote, a right I believed they should have, in view of the wide interest in their bill. [Applause.]

Two years ago in reply to a letter from one of my constituents asking me to support the Frazier-Lemke bill I gave the reasons why I could not vote for the bill. This letter was published in the papers of my district, so that in the campaign of 1934 all of my constituents who were interested in this bill knew where I stood.

Since the beginning of the panic there have been four theories advocated for bringing our country out of the depression:

Theory no. 1, the do-nothing theory, holding that we are going through an ordinary industrial depression, the likes of which our country has gone through many times before, and that there is nothing that the Government could do or should do to help bring about economic recovery. All the Government and the country have to do is to wait and let the laws of economics and nature run their courses, and in due time our country would get back again on the highway of industrial prosperity.

Theory no. 2, the printing-press theory. The advocates of this theory believe that all we have to do to start the wheels of industry and put men back to work is to start the money-printing presses, and run them 24 hours a day until the country would be flooded with paper money, fiat money, rag money, and their proposal for starting the money flood is the Frazier-Lemke bill.

Theory no. 3 is based upon the belief that our individualistic, capitalistic system is all wrong; that it has not worked and cannot be made to work; and that if we are going to have general prosperity in this country, the capitalistic system must be wiped out, and some other economic system set up in this country, to take its place. If the advocates of this theory had their way all our individualism, rugged or controlled, would be something of the past. The capitalistic system is a nightmare to them and they would save none of it.

Theory no. 4, the New Deal theory, holding that this is an extraordinary industrial depression, or rather break-down of the capitalistic system, unparalleled in all our history; that as a result of the loss of our frontiers, our boundless West of the past, and the coming of the machine and power age that has revolutionized our industrial world and multiplied our jobless army, we are living in a new economic era, just as unlike the economic day of 1893, the date of our last great panic, as that day was unlike George Washington's day, and if we are going to save what is best of our capitalistic system we must modify our institutions so as to meet the demands of a changed and changing world.

The gentleman from North Dakota [Mr. LEMKE] is an inflationist, not a mild inflationist, but a wild inflationist, and his bill is a wild inflationary measure designed to carry out the theory of those who believe in traveling the printing-press road to industrial recovery.

The Frazier-Lemke bill is not a farm-relief bill except in a very limited sense. The slogan "farm relief" is simply used as a camouflage to conceal the launching in this country of a printing-press monetary system that is in direct conflict with the sound-money ideas of our country's past. The printing-press plan for saving our country has no place in the New Deal program, and the enactment of the Frazier-Lemke bill into law would wreck President Roosevelt's whole recovery program, and would be the beginning of a financial policy for our country that would bring wrack and ruin not only to industry but also to agriculture. We have plenty of money today. Our banks are filled to overflow with idle money and the exchange of $3,000,000,000 of farm mortgages for $3,000,000,000 of printing-press money would simply add that much more to the already too large bank reserve of the country.

The furnishing by the Government of $3,000,000,000 over a period of 3 years, to 15 percent of the farmers of the country, as provided by this bill, to take up their farm mortgages at an interest rate of 1½ percent could not materially affect the general prosperity of the other 85 percent of the farmers of the country. This bill certainly will not benefit in any way the 2,500,000 farm renters of the country or the 2,000,000 farmers who own their own farms clear of debt.

Again, the furnishing of mortgage money at 1½-percent interest rate per annum to 15 percent of the farmers of the country would be an unjust discrimination between such farmers and the millions of other farmers who have mortgages on their farms but who could not be taken care of with a $3,000,000,000-farm-mortgage-relief bill, and it would also be an unjust discrimination against the millions of city mortgagors who are paying 5 percent and 6 percent and 7 percent interest on their mortgages.

Of course, if this bill should become a law there would be an irresistible demand for a new Frazier-Lemke bill to take care of the balance of farm mortgages, about $5,000,000,000 and the $17,000,000,000 of city mortgages, with the result that not $3,000,000,000 but $25,000,000,000 of new money would have to be issued in order to treat all of our mortgagors alike. And, according to the statement of the gentleman of North Dakota, made on this floor on yesterday, he would favor such legislation.

The gentleman from North Dakota says that his bill is not an inflationary measure, but President Green, of the American Federation of Labor, asked Congress not to pass the bill because it was an inflationary measure and would bring economic distress to millions of wage earners of the country. And besides, many of the Members of this House who have spoken for this bill admit that it is an inflationary bill, and that is why they are in favor of it. If it is not a move toward inflation to issue $3,000,000,000 of new money, why not make the amount issued ten billion, or fifteen billion, or twenty-five billion, and take up all farm and city mortgages—and why stop then? And the gentleman from North Dakota would not stop then; he would not stop until he had issued about $33,000,000,000 more of new money, to take up all our national bonded debt, on the theory of saving interest. Such a riot of printing-press money might save interest but it would bring wreck and ruin to our country as the printing-press remedy for industrial ills has brought wreck and ruin to other countries where tried. The fact of the matter is $3,000,000,000 of new money is just to be a starter in this fiat-money program. It would let the camel get his nose under the financial tent, and then the floodgates of fiat money would be opened, and with the blessings of the author of the pending bill.

The farmers of the country—at least of my district—do not ask for any special favors at the hands of their Government. All they ask for is a square deal with industry. The farm problem today and yesterday and tomorrow is not and will not be a problem of interest but rather of prices. If the farmers of the country could get for their products what they should get, or prices on a parity with what industry gets for its products, the farmers would be able to pay their interest and their taxes and there would be no agricultural distress.

The farm problem today has resulted from the terrific shrinkage in farm prices that took place between 1929, when the farmers' crop was valued at about $12,000,000,000, and 1932, when the value of their crop was only a little over $5,000,000,000. In 1932, taking the country as a whole, 9.6 percent of the gross farm income was required to pay the interest on the farm-mortgage debts for that year, while in 1935 only 4.5 percent of the gross farm income went to pay the interest on farm mortgages. Again, farm-mortgage foreclosures have decreased about 50 percent since 1933, when they reached the peak for all times.

Of course, the farmer has a long way to go yet before he will receive his equitable share of the total income of the country, but he is on the way, and any printing-press legislation such as is proposed by the Frazier-Lemke bill will interfere with, and not help, the farmer to gain his goal of parity of prices with industry. The New Deal, without any printing-press aid, has made it possible for the farmers of this country to get for their 1935 crop about $3,000,000,000 more than they received for their crop in 1932.

The passage of the Frazier-Lemke bill would wreck our Federal land-bank system, and it would break every farm-mortgage association in the country. Six hundred thousand farm borrowers have invested $113,000,000 in the capital stock of our Federal land-bank system, and the Government has invested or loaned to such banks $217,000,000. At the present time a great many of the local farm-mortgage associations are broke because of losses resulting from mortgages given on the basis of a 50-percent value of the land. The Frazier-Lemke bill, as it was first presented before the House, provided for mortgaging up to 100 percent value of the land, and now the sponsors of the bill have agreed to cut down the loaning value to 80 percent. The farmers who joined the farm-mortgage associations went in with the understanding that they were to guarantee mortgages up to 50 percent value. Under the Frazier-Lemke bill they will be obliged to guarantee new mortgages up to 80 percent. The result, based upon past experience, cannot be otherwise than that every farm-mortgage association of the country will go broke.

The printing-press road to industrial recovery in every country is strewn with the wrack and ruin of industry. The inflation theory of bringing about industrial recovery as tried out in France and Germany, in recent years, tells a story of the ruin of the great middle class of these two countries. Four-fifths of the savings of the French people, and practically all of the savings of the German people were wiped out by the inflationary program tried by these nations.

Our farmers get the lowest rate of interest of any farmers in all the world, and as I have stated, the farm problem is not an interest problem, but a price problem, and the way to solve the farm problem is not by wrecking our monetary system but by legislation that will preserve a sound financial system for this country and at the same time make it possible for the farmer to secure prices for what he

sells, that are on a par with the prices he has to pay for what he buys.

I was born on the farm. My sympathies are with the men and women who toil early and late on the farms of our country in order that our industrial millions may be fed. I believe that agriculture is our principal industry and that there can be no general prosperity in our country until the farmers are prosperous. During all my congressional life I have supported legislation designed to help agriculture and to give the farmers a square deal, but I cannot support legislation allegedly designed to help the farmer but in fact intended to launch our country on a fiat-money spree.

When the present administration came into power the farm problem was a pressing problem. The farmers' income had been about cut in two during the panic years, and the farmers had no purchasing power. They were unable to meet their taxes and interest charges and they were practically out of the picture as buyers of the products of industry, with the result that industry suffered and the army of the unemployed grew.

President Roosevelt took up the farmers' problem just as he took up other problems, and launched a farm-relief program designed to give the farmer a parity of prices, with industry, and that program without the assistance of the printing-press remedy of the gentleman from North Dakota, Mr. LEMKE, has been successful in bringing to the farmers of the country a notable increase in their income. The fact is under Mr. Roosevelt's farm-relief program the farmers of the country had an increase of income in 1935 over 1932 of about 62 percent and in view of the increased income for the first 6 months of 1936 over the same months of 1935 it would appear that the farmers' income for 1936 will show an increase of about 70 percent over their income for 1932.

I have received quite a few letters from my constituents, individuals, and groups, asking me to support the Frazier-Lemke bill. Some of these letters were accompanied with a threat of defeat at the polls if I failed to vote for this bill. My constituents by this time ought to know that it does no good to threaten their Congressman with political exile from Washington for failing to vote as they think he should vote. Of course, I concede that the friends of this bill are just as honest in their convictions that the printing-press road is the right road for our country to travel in these times as I am in my belief that the printing-press road is a road of danger and ruin to our country. I am willing to listen to reason and arguments but not to threats. I do not believe that I could fittingly represent my constituency in Congress in these trying times if I voted with my eyes on the ballot box. I must vote my convictions regardless of the effect of such votes on my political fortunes. [Applause.]

Mr. LEMKE. Mr. Chairman, I yield to the gentleman from Oregon [Mr. MOTT] such time as he may desire.

Mr. MOTT. Mr. Chairman, whatever may be the verdict of the House upon the roll call which will follow this debate, it is my belief that this day will take its place in legislative history as one of the most important days of any session of the Congresses. For today, after 5 years of continuous struggle, and in the face of odds that have seemed almost insurmountable, the Frazier-Lemke farm mortgage refinancing bill is at last before the House of Representatives, not merely for academic discussion and debate but for an actual vote.

Whether this bill will pass the House today no one, of course, can predict. If it is decided upon its merits and not upon the basis of partisan politics, it is my opinion it will pass, for I am convinced that a majority of the people's representatives in this body are actually in favor of the bill. In all, 240 Members of the House or 22 more than a majority, have signed the petition to discharge the Rules Committee and to force this vote upon the bill today. All of these Members, of course, were not in favor of the bill when they signed the petition. Others have been persuaded from time to time by administration leaders to remove their names from the petition. Nevertheless, I am convinced that at the time the committee was discharged there were more than 218, or a majority, who favored the passage of the Frazier-Lemke bill.

But I am also aware, as is everyone here, that since the Rules Committee was discharged, the administration, which is opposed to this measure, has been using every ounce of pressure it could to destroy that support on the majority side of the aisle and to defeat the bill because it does not meet with the approval of the administration. It will be very interesting to note when the vote is taken today what effect that pressure has had. It will be important, as well as interesting, for the country to learn whether or not in this administration a bill strictly nonpartisan in character is to be given the strictly nonpartisan consideration to which it is entitled.

I regret that the debate up to now has not been entirely free of partisanship. I was particularly sorry to note the approach of the distinguished majority member of the Agriculture Committee, the gentleman from North Carolina, in the debate on yesterday. The gentleman complained, to quote his own words, that this bill "is advocated not by the administration, not by the Farm Credit Administration, but by the Republican leadership, which seems for the moment to have taken over the Democratic House", and he declared he would not permit his zeal for the farmer to become "intemperate" to the extent of departing "from the leadership of the great party now in power."

What an argument to advance against a bill which everyone knows has been from the first admittedly nonpartisan. Has this body descended to such an estate that we must decide the question of farm solvency and the future destiny of agriculture upon a partisan, political basis?

Likewise, in his remarks in the RECORD of Saturday the distinguished administration leader, the chairman of the Rules Committee, took occasion to emphasize very pointedly the fact that the authors of the Frazier-Lemke bill were Republicans.

Is that any reason for opposing the bill if it is a meritorious one? Must majority members of the national lawmaking body, with its overwhelming voting strength of more than 3 to 1, continue indefinitely to support only administration measures and to oppose everything else? Is there no virtue in any legislation unless it comes in here from the executive department stamped in advance with Executive approval?

It is true, of course, that the authors of this bill happen to be Republicans. But that certainly does not properly raise a partisan question. It is true, also, that a majority of the Republican membership of the House signed the petition to discharge the Rules Committee and to force this vote upon the bill. But that likewise does not make a bill of this kind a partisan issue, and I am glad the RECORD will show that no Republican in this body has ever tried to make it a partisan issue. Not a single word has come from the Republican side in this debate which anyone could construe as partisan. All that Republican supporters of the bill want to do is to pass it, and that is what everyone who believes in it should want to do, no matter whether he is Republican or Democrat.

Let me proceed now briefly to discuss this bill upon its merits, which is the only basis upon which any bill should be debated.

First, then, what is the purpose of the bill? What is the situation and what is the condition in the country which brings to Congress a measure like the Frazier-Lemke farm-mortgage refinancing bill? What is the problem that this bill presents and seeks to solve, and why must it be solved? Just what is it that the Frazier-Lemke bill proposes to do and why is it necessary that that thing should be done?

The Frazier-Lemke farm-mortgage refinancing bill proposes a comprehensive, carefully worked out national plan for permanently helping the farmer out of his present impossible state of insolvency through the refinancing of existing farm mortgages by the Federal Government at a rate of interest which the farmer can afford to pay.

The Frazier-Lemke bill undertakes to refinance farm mortgages at an interest rate of 1½ percent per annum, plus 1½ percent annually to be repaid upon the principal,

upon agriculture for their livelihood. This constitutes roughly about one-fourth of our population. In the days of normalcy and so-called prosperity when the farmer actually owned his farm and was able to sell his product at a profit, this one-fourth of the population constituted nearly one-fourth of the entire purchasing power of the United States, and that purchasing power was responsible in a large degree for whatever prosperity was enjoyed by all other industry. The farmer was the best customer the merchant had, the best client the lawyer had, the best buyer the materialman had, and the best risk the bank had. Whole communities in those days depended for their own welfare and happiness upon the success and prosperity of the farmer.

Today the major portion of this one-quarter of our population do not, in the first place, own their farms at all. They simply hold them through the sufferance of those to whom they have given mortgages which they cannot pay. They got into this condition when the price of what they had to sell went below the cost of producing it, and when the price of that which they had to buy arose above their ability to purchase it. This condition was thought at first by everybody to be a temporary one. To the bewilderment of everyone, however, including the farmer, the condition has remained permanent, and that is the condition which confronts agriculture today.

The result has been that this one-quarter of our population is today virtually without purchasing power, just as it has been without purchasing power for the past 5 years. The purchasing power of the farmer, although in some years there may be a slight exception to the rule, is, on the whole, decreasing instead of increasing, and this in spite of all the Government has tried to do heretofore to remedy this condition. And in addition to not being able to buy anything out of the income of their farms these farmers are losing the bare title and the equity to their property at a rate which is appalling to anyone who will merely read the cold figures on foreclosures.

And so, I repeat, unless a way can be found to give them a new lease on life, not only is the future of the farmer a hopeless one, not only is his own industry doomed, but the future of every industry in this country will likewise suffer irreparable loss. One-fourth of the population of the United States cannot be permanently deprived of its buying power, nor can it be deprived of the very land itself out of which its income is derived, without permanently injuring the whole population, and to argue otherwise is sheer nonsense.

No one, I think, will seriously deny that the statement of the situation as I have here outlined it is correct. The fact is that opinion on this point is virtually unanimous. It is agreed also by nearly everyone that a solution must be found, and found now for this problem, and that that solution is a legislative one. Furthermore, there are few who now contend that the Frazier-Lemke farm-mortgage refinancing bill, if enacted and put into operation, would not actually do what it proposes to do in the way of solving this problem.

What then is the objection to the Frazier-Lemke bill? The objection is that while the bill may do what is claimed for it, yet the method it proposes for doing it is a wrong method. It is proper, I think, to observe here that those who have raised objection to the bill have not undertaken to offer any substitute for the portions of it they object to. It is proper to observe also that the supporters of this bill have repeatedly stated that they are willing to accept any reasonable amendment which is offered in good faith. The opponents of the Frazier-Lemke bill therefore are put directly in the position of opposing a bill, the objects and purposes of which are admittedly both worthy and necessary, simply because they do not agree with the particular method by which those objects are sought to be attained.

Four principal objections to the Frazier-Lemke bill—aside from the political objections I have referred to—have been advanced during this debate. The first is that the rate of interest proposed to be charged is too low. The second is that the Government should not loan its credit to the farmer because that would be preferring him to other classes of citizens. The third objection is that if it is proper to refinance farm mortgages at an interest rate of 1½ percent, it is equally proper to refinance home mortgages at the same rate, and that unless we include home mortgages in the bill the measure should be defeated. And the fourth objection, and the one that has been loudest, is that the money proposed to be issued under the Frazier-Lemke bill would be fiat or printing-press money and that it would constitute inflation.

Let me try to answer these objections in the order I have named them.

In answer to the contention that the rate of interest proposed is too low, it is only necessary to observe that a total rate of repayment of 3 percent, principal and interest, is all the farmer can afford to pay. That amount, as experience has demonstrated, represents the maximum of his ability to repay. One of the principal reasons for the farmer's present financial plight is that he cannot pay the rate of interest he is now being charged either by the private lender or the Government. And unless you lend to the farmer at the rate of interest he can pay then, obviously, the lending does neither the farmer nor the Government any good and any attempted refinancing at a higher rate would be futile.

In further answer, let me say that the Government has already financed other private industries, including banks, railroads, and financial institutions, at a rate of interest in many cases very little higher than this and in no case higher than the borrower, under conditions then existing, could afford to pay. It has also financed foreign governments with the people's money at a rate even lower. On most of these foreign loans the Government has cut down the principal to almost nothing and few of us expect that we will get back even that.

The interest provided in the Frazier-Lemke bill is necessarily low, but it is sufficient; and it has this all-important and sufficient feature—and that is that the farmer can and will repay it.

The objection that the Government would be preferring farmers to other classes of citizens by extending its credit to them is sufficiently answered by showing that the Government has already extended its credit to almost every other form of industry and that it is extending its credit now to farmers, also, under various existing farm-loan laws. All of these loans, however, have carried a rate of interest which experience has already demonstrated the farmer cannot meet, and the attempted refinancing thus far has been a failure.

Furthermore, the Government has been loaning its credit to national banks, all of which are privately owned, ever since the first national-bank law was passed. And it has been loaning this credit to the banks free. Up until a few months ago it even allowed the banks to issue money of their own on the credit of the Government. There is absolutely nothing new in this bill so far as the lending of credit by the Government to private industry is concerned. That has been done for years and is still being done.

The third objection, that this bill does not include the refinancing of home mortgages, ought to be easily disposed of. In the first place this is exclusively a farm-loan bill. Home-loan refinancing is another subject entirely, and upon that subject several laws have already been enacted and are in effect. There is an essential difference between the necessity for comprehensive farm-mortgage refinancing, as such, and the refinancing of home mortgages by the Federal Government. The problems presented in these two proposals are so fundamentally different that they cannot properly be joined in the same bill.

Farm-mortgage refinancing presents a problem which is distinctly national and industrial in its scope. It is a problem of saving a basic industry, without which no other industry can survive, from bankruptcy. Home ownership is something which people in all walks of life and in all branches of business and industry may enjoy, or not, accordingly as they may prefer to own or to rent the homes in which they live. It is a very desirable thing, of course for a citizen to own his home, and for that reason I have supported and shall continue to support all sound and proper home-loan legislation. But home ownership, as such,

the entire loan to the farmer, both principal and interest, to be amortized over a period of 47 years.

As security for these loans, the Federal Government takes the farm mortgages and becomes the holder of these mortgages in the place of the present private holders. Upon these mortgages farm-loan bonds are issued, bearing interest at 1½ percent. The bonds are first offered to the public, and, if not readily sold, they are taken by the Treasury of the United States as the basis, in part, for a new issue of Federal Reserve notes with which the refinancing is done. The bill provides that "the outstanding Federal Reserve notes issued under this act shall at no time exceed $3,000,000,000." It should be clearly noted at this point that the security of the farm-loan bonds and mortgages is in addition to the regular security behind this and all other issues of Federal Reserve notes, which is the gold reserve in the Treasury.

While this $3,000,000,000 is somewhat less than one-half of all the farm mortgages now outstanding in private hands, the provisions of the bill for the annual repayment by the farmer of his loan to the Government are such that a greater amount than three billion will never have to be outstanding at one time. As the annual payments on principal and interest, amounting together to 3 percent, are made, this amount is loaned out again each year to refinance other farm mortgages until the refinancing is completed upon all farm mortgages existing at the time of the passage of this bill and which the mortgagor desires to have refinanced.

The question is often asked how much this refinancing will cost the Government. The answer, of course, is that it will cost the Government nothing. This bill provides for no grants and no subsidies. The Government gives the farmer nothing under the Frazier-Lemke bill. What the Government does under this bill is to loan its credit to the farmer, the same as it has been loaning its credit to banks for the past 100 years. For this credit the farmer gives to the Government the best security that anyone can give—the land of the Nation itself. And the farmer repays to the Government every dollar he borrows. One of the essential differences between this bill and other bills under which Federal farm-mortgage refinancing has been unsuccessfully attempted is that under the Frazier-Lemke bill the farmer repays his loan at a rate of interest low enough actually to enable him to pay it. The rate is still high enough, however, so that the Government not only will not lose money but will, as a matter of fact, make a small profit on the transaction.

This, then, is what the Frazier-Lemke farm-mortgage refinancing bill is, and what it undertakes to do. The refinancing benefits under this bill extend not only to farmers who are in present danger of losing their farms through foreclosure but also to those who have actually lost their farms in that manner within the statutory period prescribed in the bill. In other words, farmers in that unfortunate position are given an opportunity to repurchase the farms they have actually lost.

Several important amendments will be offered and adopted today, changing some of the original features of the bill. Under these amendments, the provisions for loans on farm chattels are eliminated and the refinancing will be confined exclusively to mortgages on real estate. The original bill provided for refinancing up to the full fair value of the property mortgaged. This feature is to be changed by amendment to provide for refinancing up to 80 percent, instead of 100 percent, of the fair value of the mortgaged property. There are other amendments which, while important, are not fundamental but which we think are valuable as tending to remove objection raised by some of the opponents of the bill.

Having stated what the Frazier-Lemke farm-mortgage refinancing bill undertakes to do and how it proposes to do it I come now to the question as to why it is necessary to do this.

To those who have made a careful study of the farm-mortgage problem the answer to this question presents no great difficulty. The simple fact is that unless farm mortgages are refinanced by the Federal Government at a rate of interest low enough to enable the farmer to repay his loan and again actually to own his farm, within a very few years there will be no such thing as independent farm ownership and operation in the United States. The average farmer under present conditions cannot pay his existing mortgage, and unless conditions should change fundamentally in the future he can never pay it. That is a statistical fact which does not even admit of argument. Page after page of statistics could be cited proving that it is a mathematical impossibility for the average farmer ever to get out from under his present mortgage load, and this is the case whether his loan be a private or Government one.

Between 70 and 80 percent of the farm acreage of the United States is mortgaged, and everyone now agrees that it is not possible, under any existing method of farm-mortgage refinancing, for the majority of the farmers in the United States to recapture the ownership of their mortgaged farms. It is for this reason that private banks and loaning agencies long since have ceased to make farm loans. They know that such loans cannot be repaid under any rates or terms the private lender can afford to make. For the same reason, even the Government, through its present land bank set-up, has practically ceased making any new farm loans, and it is now devoting a large part of its time to foreclosing the farm mortgages which it already holds. In other words, the average owner and operator of a mortgaged farm in the United States has reached the end of his financial rope and nothing remains for him except foreclosure.

Therefore, either the Federal Government, through the system proposed in the Frazier-Lemke bill, or through some other system equally effective and workable, must refinance those mortgages at a rate of interest that will permit the farmer to repay his loan, or within a very short time the American system of agriculture, as an independent owner-operated industry, must come to an end and must be replaced by a universal system of absentee ownership and farm tenancy. This is not mere prediction. It is a fact which is demonstrated conclusively by the farm foreclosure history of the past 10 years. Already nearly 40 percent of the farmers of the United States are tenant farmers.

It is generally conceded that there are two main problems which confront agriculture as an industry today, both of which must be solved if that industry is to be restored to its rightful and necessary place in our economic structure. First, a feasible way must be found to enable the farmer to liquidate his mortgage indebtedness and allow him again to own and operate his farm, and second, a rational scheme must be evolved and put into operation under which the farmer, when he does own his farm, may be assured of a fair chance of receiving at least the cost of production, plus a reasonable profit, on that part of his commodities which are sold and consumed in this country. If these two things can be accomplished the farmer has a chance to survive. If they are not accomplished then neither the agriculture population nor the rest of the population of the United States can prosper, because without a prosperous agriculture industry there can be no prosperity in any other industry.

The Frazier-Lemke bill is an attempt to solve only the first of these two problems. Obviously the first one is the more important of the two, because unless it can be solved the second problem is impossible of solution. The solution of the first, however, will greatly aid in the solution of the other.

I have said that the recovery and prosperity of the whole population of the United States depends largely upon whether the farmer can again be made solvent and capable of earning a reasonable return upon his labor and his farm investment. Let me tell you why this is so, and then you will see why the Frazier-Lemke bill is not merely a farm bill but a bill which affects the future and the destiny of every person in the United States no matter in what business or industry he may be engaged.

There are 6,000,000 farm families in the United States, or about 30,000,000 people, directly engaged in or dependent

however desirable and beneficial it may be, is not in itself essential either to the continuance or the prosperity of the particular business or industry in which the home owner is engaged and from which he derives his income.

Farm ownership by the farmer, on the other hand, is absolutely essential to that industry and unless the man who lives upon and operates the farm can continue to own it the agriculture industry as we have known it in the United States for the past 100 years will cease to exist and will be replaced by a new economic system of farm tenancy.

I come now to the fourth objection—namely, that the Federal Reserve notes proposed to be issued under this bill would be fiat or printing-press money and that their issuance would be uncontrolled inflation.

This is the argument which the opponents of the bill employ as their heavy artillery. The charge of inflation makes up the bulk of the propaganda that has been sent out against this bill. And although every argument advanced that the bill is inflationary has, in my opinion, been conclusively proven to be without merit, the charge still persists. Opponents continue to repeat it and to hold it forth as the bugaboo and the big bad wolf of the relief offered in the Frazier-Lemke bill. Let us see what that charge really amounts to. Let us see whether it is based upon anything substantial or whether it is merely a smoke screen behind which the fight against effective farm-mortgage refinancing is being waged.

At the outset let me direct your attention to the fact that the Federal Reserve notes to be issued under the Frazier-Lemke bill are exactly the same as the Federal Reserve notes already issued and outstanding under existing law, and which constitute the bulk of the currency of larger denomination with which we carry on our ordinary business transactions today. If you are fortunate enough to have in your pocket at this moment a $20 bill you will probably find upon examining it that it is a Federal Reserve note. The new issue of notes under this act will be exactly the same as that bill. They are issued in exactly the same way, under exactly the same authority, and with exactly the same security behind them as every other Federal Reserve note outstanding.

I submit, therefore, that it is obvious that unless the money with which we now carry on our daily business is fiat or printing-press money, neither will a new issue of the same kind of money, as proposed in this bill, be fiat or printing-press money, unless the issue should be so large as to impair the security and the credit upon which it is issued.

Now, then, of what does our currency consist? Aside from national-bank notes, the issuance of which is no longer permitted and which are now being withdrawn from circulation as rapidly as possible, we have only two kinds of lawful money in circulation in the United States, namely, the Federal Reserve note and the silver certificate. We have, of course, silver, nickel, and copper coins, but I am speaking of currency. Gold is no longer lawful money. Not only may no gold be coined under existing law, but it is unlawful for a citizen even to possess any gold of the value of more than $100. Furthermore, none of our money is redeemable in gold.

What, then, is this money which, as I have said, consists of Federal Reserve notes and silver certificates, and what is it that gives this money its value or purchasing power?

A silver certificate is a piece of paper upon which is printed the denomination of the bill and the statement that the United States Treasury will pay that amount to the bearer in silver dollars upon demand. Our silver certificates are our ordinary $1, $5, and $10 bills. The silver certificate is the only kind of money we have which is redeemable in metal or metal coins. Since nobody wants to carry silver dollars about with him, nobody ever demands payment of a silver certificate from the United States Treasury.

The silver dollar in which the certificate is redeemable has an intrinsic value of about 50 cents. The certificate, however, is worth 100 cents and will purchase 100 cents' worth of goods or services, and so will the coined silver dollar upon which it is issued. The value of the silver certificate, of course, does not depend upon the 50 cents' worth of silver in the Treasury, which is the specific metallic security or reserve upon which it is issued. If it depended on that, obviously, it would be worth only 50 cents. The reason the silver certificate or the coined silver dollar is worth 100 cents instead of 50 cents is because the United States Government says it is worth that much and because the faith and credit and the wealth and the taxing power of the Government is strong enough to make the statement good.

Now, what is a Federal Reserve note? A Federal Reserve note is a piece of paper upon which is printed the denomination of the bill and the statement that the United States will pay that amount to the bearer upon demand in lawful money. Since the only lawful money at present in circulation is the Federal Reserve note, the silver certificate, and the silver, nickle, and copper coins, a person demanding payment of the note at the Treasury could only receive in payment another Federal Reserve note, or its equivalent in silver certificates, or silver coins. Nobody, of course, ever demands payment either of a silver certificate or a Federal Reserve note because there would be no sense in doing so. The Federal Reserve note and the silver certificate are money—the only kind of money we have—and that is all there is to it.

Now, what is behind the Federal Reserve note, and what is it that gives it its value as money? It is the same thing that gives the silver certificate and the coined silver dollar their value—the faith and credit, the wealth and the taxing power of the Government which issues it.

It is true that even although none of our money is redeemable in gold its issuance is based, theoretically at least, upon the gold reserve in the Treasury. That gold reserve is an enormous thing. It is twice as large as it was when our money, under the gold standard, was actually redeemable in gold, and when we had more currency in circulation than we have now. The gold reserve in the Treasury of the United States is larger than that of all other governments in the world combined. That gold reserve today is a little over ten and one-quarter billion dollars, or more than twice as much as all the money of all kind in circulation in the United States today, including Federal Reserve notes, silver certificates, and national-bank notes still outstanding.

The Federal Reserve note has the strongest gold backing of any money in the world, and yet, after all, since neither the Federal Reserve note nor the silver certificate nor any other money is redeemable in gold, its real value, like that of all other money, is the faith and the credit of the Government, which in wealth and resources and taxing power is infinitely greater than the ten billions of gold metal which it has piled up in its Treasury. That amount, huge as it is, would only be enough to operate the Government about 2 years if that were all the wealth the Government had. And, incidentally, if that were all the wealth the Government had, its money would be worth nothing at all.

Thus, the most casual analysis of what the Federal Reserve note is should be enough to destroy the argument that it is fiat or printing-press money. If it is printing-press money we will have to get along with it anyway, because aside from silver and silver certificates it is the only money we have at present.

Equally untenable is the contention that the new issue of $3,000,000,000 of Federal Reserve notes under the Frazier-Lemke bill would constitute uncontrolled inflation or that it would make the notes any more fiat or printing press than they are now.

There is a limit, of course, to the amount of currency or money of any kind that a government may properly issue. The decision as to that matter is placed by the Constitution in the hands of the Congress, which has exclusive authority to "coin and issue money and to regulate the value thereof." The question at issue is, therefore, before the proper tribunal or forum.

The only legitimate argument against a new issue of Federal Reserve notes is, it seems to me, that the size of it would unduly expand the currency. That contention, if it

could be sustained, would be sufficient. But that it would be uncontrolled inflation, as some have persisted, is not a legitimate argument at all; first, because the amount of the issue is definitely limited in the bill; second, because it is issued for a specific object, and automatically ceases with the accomplishment of that object; and, third, because under the provisions of the bill a certain portion of the issue may be withdrawn from time to time to whatever extent may be necessary to keep the amount of currency outstanding in line with the actual currency needs. In this respect the Treasury has the same discretion that it has over any currency now outstanding. This argument, therefore, must fail because it is directly contradicted by the provisions of the bill itself.

As for the contention that $3,000,000,000 is too great an addition to the notes at present outstanding and that it would cause a strain on the gold reserve in the Treasury or on the credit of the Government, it is only necessary to observe that after this issue is made we will still have a gold reserve in the Treasury of more than 100 percent of all the money then outstanding and in circulation. This is twice as large a reserve as we had under the gold standard when you could actually take a Federal Reserve note to the Treasury and get gold for it. When our money was literally redeemable in gold a gold reserve of from 40 to 60 percent was considered sufficient, and that is all we ever had. Now, when our money is not redeemable in gold it is objected that a gold reserve of 100 percent behind these notes is not sufficient.

And so again the charge of inflation against this bill reduces itself upon analysis to an absurdity. There is no inflation in the Frazier-Lemke bill.

But the gold reserve in the Treasury is not the only tangible thing this bill offers in the way of security for the Federal Reserve notes. In addition to that gold reserve the Frazier-Lemke bill places in the Treasury of the United States, as a further security for this specific issue $3,000,000,000 worth of farm mortgages. The new issue would be 100 percent sound without this, upon the basis of the gold reserve alone. But in addition to that 100-percent gold reserve it has as security something which no other money has ever had—the land of the Nation itself.

Here, then, Mr. Chairman, is a proposal which, it seems to me, meets all the requirements that a Federal farm mortgage refinancing bill ought to meet or that it can meet. Here is offered a solution for a problem which we all agree must be solved in some way if agriculture is to be restored to its rightful and necessary place in our economic structure.

I have tried to discuss this bill fairly, temperately, and upon what I believe to be its merits. I have tried to answer all of the objections that have been raised to it and to answer them upon their merits. I intend to vote for the bill upon its merits and without regard for any consideration of partisanship or political expediency. Let me repeat what I suggested in the beginning—that that consideration has no proper place either in the discussion or the vote upon this bill, and that I hope that in the vote, at least, it will be given none on either side of the aisle.

Let me say with all the sincerity I can that if the authors of this bill were Democrats instead of Republicans I would be supporting it with just as much energy as I am supporting it now. If it were an administration bill, instead of one to which the administration is opposed, I would not only be supporting it myself but I would also be doing my best to persuade all Republicans to support it.

There is a proper place for partisanship in the consideration of some kinds of legislation. There are many bills in which to follow the call of party leadership is not only politically expedient but entirely legitimate and proper. The Frazier-Lemke bill, however, is not one of those bills, and I respectfully suggest to those who may consider it to be such that they will find they have made a serious mistake in that regard. Opponents may not be aware of it, but those of us who have been supporting this legislation here have had the satisfaction of knowing from the first that in this fight we have been representing the hopes and the desires of more people than have ever before united in a demand for any legislation of national scope, and that that demand is entirely nonpartisan in its character.

Gentlemen who may be inclined to view this legislation from a partisan angle should remember that 33 States of the Union have by formal resolution of their State legislatures petitioned the Congress to pass this bill, and that those resolutions, which are now on file in this body, come from Democratic and Republican States alike. There is not a single State which is generally classed as an agricultural State that has failed to adopt and file such a resolution with the Congress. Practically every unit of the Grange and the Farmer Union in the United States has formally gone on record in favor of this bill, and in doing so not a single one of them took a partisan view of this legislation.

And so let me suggest to those who have sounded the call to partisan solidarity on the majority side that the demand for this legislation comes as strongly from Democrats as from Republicans. Let me suggest that Democratic farmers are more concerned in saving their farms than they are in voting straight party tickets. And let me warn those who have sought to make a partisan issue of this measure that if it is defeated upon that basis there will be as many Democratic farmers as Republican farmers to reckon with when the membership of this House is called upon to give an accounting to the country of the action it is to take today.

Six million farm families this afternoon are looking to the National House of Representatives with hopes raised higher than they have ever been before. Thirty million farmers are asking us to give them a chance to save their farms and their homes by helping them to lift from their shoulders the mortgage load which is crushing them and destroying their industry. To American agriculture this bill means a new Magna Carta. As the Representatives of the people in the supreme lawmaking body of the Nation we have it in our hands today to grant that new charter to the farmer or to withhold it from him. Let us not withhold it. Let us affix to it the seal of our approval. Let us grant the charter.

Mr. LEMKE. Mr. Chairman, I yield 10 minutes to the gentleman from Wisconsin [Mr. BOILEAU].

Mr. BOILEAU. Mr. Chairman, in the brief time at my disposal I want to discuss one phase of the Frazier-Lemke bill that I know has been informally discussed by Members while sitting in their seats and in the cloakrooms during the time this bill has been under consideration. I hope I may be able to assist in clarifying one part of the bill and that I may be able to give some information to those Members who have not given this matter thorough consideration. I refer to that provision of the bill that permits loans to be made up to the fair value of the land and 75 percent of the value of the insurable improvements.

Many Members who have demonstrated, by voting for consideration of this bill, that they desire to have an opportunity to fully discuss and consider the bill, have stated that there is one provision that they feel is fundamentally wrong and that they cannot support the bill unless that provision is amended.

They feel it is an objectionable feature of the bill, and for that reason I want to devote my time to explain it, if I can, in the hope that those Members of the House who have that conviction may understand the position of those of us who are advocating the enactment of the Frazier-Lemke bill.

Objection is voiced to making loans up to the full value of the land. It has been stated that a loan to the full value of the land is a departure from accepted policy and is unsound. Some Members point to the fact that commercial loans have seldom been made in an amount greater than 50 percent of the value of a farm. They point out that in the case of home owners the H. O. L. C. does not lend up to the full value of the home, but loans an amount not in excess of 80 percent of the value of the home.

Mr. Chairman, there is a vast difference between a farm loan and a home loan. In the first place a home loan is not a loan made on business property. The home loan is not

based on property needed for making a livelihood, whereas, on the other hand, a farm loan includes both a home loan and a business loan. A farmer obtains a loan to enable him to carry on a basic industry of this country. There is a vast difference between the two types of loans.

For that reason, we are justified in making a distinction between a farm loan and a home loan. Under the terms of this bill, a farmer can borrow only 75 percent of the value of the insurable improvements. The insurable value does not mean the full value, and as a result, the farmer will not be able to borrow as great a percentage of the value of that part of his farm that constitutes his home as can the home owner borrow from the H. O. L. C. at the present time. Under the present provisions of the bill, we undertake to provide for the making of a loan up to the full, fair value of the land. In my judgment, that is not too much to loan a farmer who is in need of refinancing at present depressed values. There is no danger of the Federal land banks being required to take over these lands, and after all that is the test of the security of the loan. No one would object to making a loan on any piece of property in the world, up to 100 percent of its value, if he was assured that principal and interest would be paid. In determining the soundness of a loan, the test is whether or not the loan will be repaid in full with interest.

Mr. Chairman, I submit that a loan up to the full value of the land and 75 percent of the value of the insurable improvements, under the provisions of this bill, is a much better loan than those which have been made by the Farm Credit Administration under existing law. In other words, the Farm Credit Administration will have greater assurance of getting its money back from loans made under the provisions of this bill at 1½ percent interest than it has of being repaid on loans made up to 40 percent of the value of the farms at 4 percent interest under the present Farm Credit Act.

Why do I make this statement? We will assume the case of a farmer who has a thousand-dollar farm. In the first place, he may not borrow an amount equal to the full value of the farm if his debts are less than its full fair value. If a farmer has farm lands worth a thousand dollars, and he has a mortgage or other lien of $500 against it, all he could borrow would be $500, but if his indebtedness should amount to a thousand dollars, he could then borrow a thousand dollars under the provisions of the pending bill. He borrows this money at a rate of interest of 1½ percent. Is it not a fact that a mortgage of $1,000 on a $1,000 farm is better security, is more apt to be repaid, when it carries an interest rate of 1½ percent and an amortization of 1½ percent per year, than a $500 mortgage on a $1,000 farm that carries interest of 4 percent? A farmer is in a better position to repay a loan of $1,000 with 1½-percent interest than he would be to repay a loan of $500 if the interest rate was 4 percent. That is plain arithmetic. In other words, under the provisions of this bill a farmer can more easily carry a $1,700 mortgage than he can a $1,000 mortgage under existing conditions; that is really the test of whether or not the security provided under this bill is adequate to guarantee the repayment of the loan.

May I ask this further question. Assuming there are two farms of equal value having mortgages against them; one for $1,000, with interest at the rate of 1½ percent, and the other with a $1,000 mortgage with interest at the rate of 4 or 5 percent. Would you prefer to buy the farm subject to the mortgage which bears 1½ percent interest or the farm with the mortgage bearing 5 or 6 percent interest?

Mr. DINGELL. Is the gentleman asking a question to be answered?

Mr. BOILEAU. No. I am simply presenting the argument in the form of a question that answers itself.

Mr. Chairman, it seems to me that anyone who wants to purchase a farm would rather buy a farm with a $1,000 mortgage, bearing interest at the rate of 1½ percent than to buy one with a mortgage against it of $500 or $600, bearing interest at the rate of 5 or 6 percent. What does this mean? It means that a farm upon which one of these 1½-percent interest loans are made will take on an additional security value. There would be less likelihood of such farms being foreclosed upon, because the owner could more easily pay his interest. On the other hand, if such a farmer is pressed, he could readily sell his farm subject to the mortgage, and there would be no danger of the mortgage being foreclosed. There is absolutely no danger, as I see it, of these loans being foreclosed, and the Farm Credit Administration being forced to take over the property.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. BOILEAU. Mr. Chairman, in my judgment, such a loan at 1½-percent interest, based on the full fair value of the land and 75 percent of the value of insurable improvements, is amply and fully secured.

I call attention to the further fact that the Government of the United States will make money if we enact this bill into law.

The Federal Government will make a profit in excess of $1,400,000,000. Even if there should be some losses on loans, which I cannot conceive, the profit which will be made by the Government would more than reimburse us for any such losses.

This is the situation as I see it, and this is why I believe the bill in its present form should be approved; but I know there are a great many Members who want to go along with this legislation who are fearful of this one provision that I have referred to, and I also know that many gentlemen in the cloakrooms have successfully used this argument against the measure.

The steering committee had meetings last night and this morning and this matter was thoroughly discussed. Many Members of the House, in addition to the steering committee, who are friendly to the legislation, and who will vote for it, whether it is amended in this particular or not, decided that it was advisable to submit an amendment which will limit the loans to 80 percent of the value of the land, plus 75 percent of the value of the insurable improvements. [Applause.]

I do not think such an amendment is necessary, but I am going to support it. I am going along with other supporters of the bill and vote for such an amendment because we feel that the farmers will actually be taken care of and we feel further that the loan on such a basis will be large enough to take care of practically all the farmers who are in distress. Such loans may not be large enough to take care of all of them but it is the best we can hope to get, and we are hopeful that the membership of the House, in the interest of the passage of the bill, will accept the amendment which will be offered by the distinguished gentleman from North Dakota [Mr. LEMKE]. With this amendment and other amendments which we propose to offer and which have been given thorough and full consideration, we believe the bill will be in such form as will satisfy those Members who have expressed a desire to go along with this general type of legislation, but who have conscientious convictions against some particular provisions now in the bill and which we do not regard as being fundamental.

We have not compromised on fundamental principles, but we have made some concessions which we hope will appeal to the intelligent judgment of the membership of the House. [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield 4 minutes to the gentleman from Tennessee [Mr. BYRNS]. [Applause.]

Mr. BYRNS. Mr. Chairman, I have asked for this brief time in order to read to you a letter which has just been sent to me, expressing the wishes and the hopes of some 50,000,000 people.

Wage earners are involved in the proposition now pending before the House, as are all classes of our citizens, and I wish to read to you a letter from the president of the American

Federation of Labor with reference to this bill. It is addressed to me as the Speaker of the House:

AMERICAN FEDERATION OF LABOR,
Washington, D. C., May 13, 1936.

Hon. JOSEPH W. BYRNS,
Speaker, House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: The executive council of the American Federation of Labor, which is now meeting here in Washington, gave special consideration to the provisions of the Frazier-Lemke Act. The council is in thorough accord with all practical legislation which has been advanced for the purpose of relieving the economic situation existing among the farmers of the Nation. We wish to see them helped and assisted by the Federal Government. This fact was demonstrated when labor gave united support to the enactment of the processing tax which was embodied in the Agricultural Adjustment Act.

The executive council of the American Federation of Labor, however, is opposed to the Frazier-Lemke Act, largely because of the inflation feature of this proposed legislation.

Labor knows and understands that the proposal to print and circulate billions of currency as proposed in the Frazier-Lemke Act will very vitally affect the economic well-being and status of labor. We know quite well that when inflation of the kind and character embodied in the Frazier-Lemke Act is adopted commodity prices rise but wages stand still. We cannot subscribe to this sort of economic philosophy. Labor would suffer reduction in living standards, reduced buying power, and the problem of unemployment would become more acute. There are other features of the bill which are highly objectionable.

For this reason we call upon our friends in Congress to vote against the enactment of this legislation. We are confident that the best interests of the wage earners of the Nation would suffer very greatly if by any chance the Frazier-Lemke bill would be enacted into law.

We sincerely hope and trust that the Frazier-Lemke Act will be defeated. We rely upon the friends of labor to vote against this proposed inflation legislation.

Very sincerely yours,

W. GREEN,
President, American Federation of Labor.

I have read this communication to the Members of the House because, as I said at the outset, this bill concerns the entire country as well as the farmers, in whom I am as deeply interested as any man on the floor of the House. All of my ancestors, almost without exception, were farmers, and I have always been interested in all legislation which looked to their best interests; but as a Representative upon the floor of this House pledged not only to the farmers but to all classes, I cannot vote for a bill which makes a clear discrimination in favor of one class as against other classes of our people in this country, and the people whom I represent neither expect nor want me to do so. [Applause.]

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. SUMNERS].

Mr. SUMNERS of Texas. Mr. Chairman, I want to compliment the Members of the House on each side of this bill for the manner in which this discussion has been carried on. Whenever I do not agree with anybody, I know somebody is wrong, and I may be that somebody.

This is one of the most important bills that has been proposed since I have been here. I have been connected with the effort to do something for agriculture ever since I have been in Congress. With all respect to my distinguished friend who has introduced this bill, I believe this sort of proposed legislation is hurtful to the interests of agriculture.

There are two groups—and I mean no offense—hurtful to every forward movement—one who do not want to do anything and the other who want to go too fast. The latter, in my judgment, is the most hurtful.

If the cause of the American farmer is to be supported, he has got to go along with the other people. He must not run out ahead of public opinion and public support.

When I was a boy back in Tennessee pulling a steep hill a boy went along behind the wagon with a rock to scotch the wagon. He did a good service, but if he had gotten too enthusiastic about his part of the program and got his rock ahead of the wagon he would have stalled the team, and the wagon might have rolled down the hill and made it necessary to pull the hill again with a tired team. It would have been more difficult. If we put the agricultural program beyond the support of public opinion, we will lose the support of those on whom we must depend.

As has been said, this bill deals with capital structure. It proposes that the Federal Government shall advance every penny sufficient to buy farms; every penny necessary to pay off the indebtedness of farms mortgaged up to 100 percent of the value of the farm, to be paid for with printed money—by inflation of the currency.

Mr. BOILEAU, the able champion of this bill, stated the correct facts a minute ago when he said that this bill deals with the agricultural business.

If we advance this printed money, $3,000,000,000, to pay off all the capital investment of farmers, what are we going to say when the busted merchant or manufacturer comes in and asks Congress for billions of the same sort of money to go into business again?

If the Government advances 100 percent to take care of the mortgage on the farm or to buy a new farm as this bill provides, what can we say when the people of the cities come and say, "We want you to advance 100 percent of the value of our property to take care of the debts that we owe as you have done for the farmers", or "We want you to advance 100 percent of the cost of property we want to buy as you have done for the farmers", and then the businessmen come with their demands. They all come with demands which require inflation.

Is there anybody in this Chamber now who can get himself to believe that we will not have to face these problems tomorrow if we pass this bill? The arrangement in this bill is to authorize the issuance of $3,000,000,000, turned out from the printing presses. The gentleman from North Dakota [Mr. LEMKE] talked about provisions in the bill which are concessions to the psychology of the people. He provides for bonds, as a concession to that psychology, and puts the interest at 1½ percent on the bonds to insure they cannot be sold. I will not say it is slick stuff. But anybody knows that a bond is not going to sell with 1½-percent interest which runs for 47 years and is based upon the full value of the property. Stripped of the words in the bill, the arrangement is to issue $3,000,000,000 of currency from the printing press to do all this business we are talking about.

Then come the home owners from the cities.

What will the Government have to do then? Advance them a hundred cents on the dollar and also advance 100 percent of the cost of the property they buy. Who can stand against that demand if you pass this bill? Then what is the next thing? Issue about six or eight billion dollars more from the printing presses to take care of that. When that is done, can you stand against the merchant, manufacturer, and other business people who say, "I have had a business. It has been wrecked in these trying times. I want the money to start another business." That is what Mr. LEMKE proposes in this bill for the farmers. Can we stop there? This bill proposes to supply every dollar of the value of the farm either to pay off a mortgage or buy a new farm. That is more than other people are getting. That is more than other people will agree farmers are to have. Why drive away friends by such proceedings? The country is not willing to enter upon a program of billions of dollars of inflation, and upon this new peril to the national credit. Why propose it in the name of agriculture? That is too much to ask now in the name of the farmers of this country. I say this sort of a bill offered as a demand of agriculture upon the Government, upon all the rest of the people of the country is bad business, and is calculated to drive from the farmers of the country the support which it has taken years of constant tactful effort to get. I understand money is being advanced now to farmers at 3½ percent. That would not have been possible except for the support of the people of the cities, the business people, and the laboring people there. Farmers have not got the votes. They have got to get these people to vote with them.

This bill is being forced over the protest of labor, as expressed in the letter just read by the Speaker from the President of the American Federation of Labor, Mr. Green. Labor has been the friend of agriculture. Mr. Green says his people would suffer from this inflation. He asked that

the farmers do not press the bill. He gives his reasons. Farmers cannot afford to throw away that support and the support of other groups who have thus far gone along with the agricultural program. I will not follow Mr. LEMKE. I will not put my farmers in the attitude of demanding this bill. I will not put them in an attitude hostile to those without whose support they could not have made progress in the development of their program. I prefer to follow MARVIN JONES, chairman of the Agricultural Committee, who is opposing this bill.

Mr. LUNDEEN. Mr. Chairman, will the gentleman yield?

Mr. SUMNERS of Texas. Only to the gentleman from Minnesota.

Mr. LUNDEEN. What about big business that came and wanted hundreds of millions of dollars? They got their money. Why not the farmers?

Mr. SUMNERS of Texas. We are dealing only with this bill now. Shall we or not pass this bill is the only question now. I hold no brief to defend any group. Are my statements correct or not? Does the gentleman challenge any statement I have made? He cannot.

Mr. LUNDEEN. I challenge the gentleman there.

Mr. SUMNERS of Texas. But you cannot challenge a single statement I have made. I know you have got sense and I know you are honest. [Laughter and applause.] You will not challenge a single statement I have made. I know the gentleman. He is a good fellow. [Laughter.]

I have been making every effort since I came here to build up support for the cause of agriculture. With the slogan that we want for the farmers of this country only that which we are willing others may have and only that which is in line with the general public interest, we have finally won the support of the people of the country. It has been a long, hard fight. Twenty-two years ago in this Chamber I discussed the city man's interest in the economic problem of agriculture. With that slogan and that policy we have won for agriculture a recognition and a public interest which it never had before.

The plain practical proposition is this: Are we who come from the agricultural districts going to put up to the people of the Nation in the name of agriculture a proposition like this, not only calculated but certain to lose for the farmers of this country much of kindly interest and support. You heard the Speaker read a letter from Mr. Green, president of the American Federation of Labor, opposing as inimicable to labor the inflationary features and other features of the bill. Labor has stood with the farmers until Mr. Lemke brought this bill in here that drove them out. I say this sort of thing is not in the best interests of the agricultural people of this country. We do not have the votes. We must have support. I do not have time to discuss the other features of this bill. I emphasize in my time this one point.

Now I like the gentleman from North Dakota [Mr. LEMKE]. He is one of the most resourceful and lovable men in this House, but he has got a philosophy of Government and ideas about dealing with the problems of our farmers which come from somewhere that mine do not come from. [Laughter and applause.]

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. LEMKE. Mr. Chairman, I yield 10 minutes to the gentleman from South Carolina [Mr. FULMER].

Mr. FULMER. Mr. Chairman, I am hoping that we will all keep our coats on and not be carried away from the real merits of this bill by the many statements made by the opponents, which do not have anything to do with any phase of the bill, and that we may be able to give fair and just consideration to same.

I admire the gentleman from Texas [Mr. SUMNERS], but at least two-thirds of the statements made by him were about what will happen hereafter in connection with legislation for other groups. Is it not a fact that we have these arguments to contend with on every bill that we bring up in this House, regardless of what group we are trying to help?

What about my colleague from North Carolina, one of the best orators of the House. He says, "I cannot vote for this bill because it was introduced by a Republican." This type of statement is usual because it will sound good in the gentleman's district.

More than that, he says that for all these years we have had a system that he does not expect to depart from. I do not know what system the gentleman was referring to; but I want to say to him that if it is the system we have had for the past 50 years, whereby the money changers of this country have been able to bring about deflation and inflation at will, not by issuing currency, which has robbed the independent merchants of the country, put the farmers into bankruptcy and the unemployed into bread lines, then I am not interested in the gentleman's system.

What about the statement of our majority leader? We all admire and respect our majority leader. He said this bill would be in the interest of only 4 percent of the people and certainly would not take care of but about 15 percent of the farmers. That statement was made by the Farm Credit Administration. I want to refer to two or three of these statements.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield to me?

Mr. FULMER. In one moment. My friends, I want to say to you, it is misleading. That is the statement carried in this document sent out by the Farm Credit Administration. What about the program that we have today under the Farm Credit Administration? Is it not a fact that they have refinanced or financed only $3,000,000,000 worth of land mortgages up to this good hour, taking care of only 15 percent of the farmers? We do not hear the gentleman complaining about this. This type of statement is made by many of the opponents of the bill. But this bill—oh, no; it is different. "It discriminates", so say those opposing the bill.

Mr. BANKHEAD. Mr. Chairman, will not the gentleman yield to me, having referred to me?

Mr. FULMER. In just 1 minute. This statement sent down by the Farm Credit Administration refers to what we have done about bringing up farm prices. Let us take cotton, for instance. Prior to 1932 the farmer had to sell about 20 to 25 bales to pay interest on a $10,000 mortgage, at 6½ cents. These mortgages were held by private interests and insurance companies. This document states that now we have these prices up on cotton at this time so that it takes only six bales of cotton to pay the interest on a $10,000 land-bank mortgage. But, my friends, the same farmer under the Lemke bill could pay the interest on this same mortgage with three bales of cotton.

Another argument raised against the bill by every man from the city district is, "What are you going to do about the $21,000,000,000 that my people owe on their homes?"

We are not considering city homes in this bill. When we passed the H. O. L. C. we did not try to include the farmers. You did not take care of the $21,000,000,000 under the Home Owners' Loan Corporation. If we are ever to rehabilitate this country, it will be when you put the farmers on a fair basis. [Applause.]

There is nothing wrong with the Lemke bill, except it did not come through the proper channels; it did not come here in a strait jacket. Now, my good friend, the chairman of this committee, Mr. JONES, has a good bill proposing to issue currency. It was reported at the same time this bill was reported. It is a good bill. I should be glad to vote for it. But it did not come through the regular channels; it did not come in under a strait jacket, therefore it has never been considered on the floor of the House. I want to ask the chairman, Mr. JONES, now why he did not get a rule from the Rules Committee for the consideration of his bill. He probably would answer that the chairman of the Rules Committee would not give him a rule. In speaking about the manner in which bills come to the Congress and that are considered by the Congress, I am not referring to the President of the United States. He is one of the best Presidents

we have ever had in the White House; he is interested in the common people; but would to God we could get some men like some of our leaders, the Speaker, if you please, and a few others on the advisory council, instead of the type of people that appear to be the President's advisers. Even the leaders of this House cannot reach the President; and I am sure, along with me, they do not agree with some of the things that are being done at this time and the manner in which the program is being administered. [Applause.]

Mr. Chairman, the Frazier-Lemke bill deals only with those farmers who now have mortgages on their farms and those who have lost their farms and want to repurchase same or some other farm and to certain tenants under certain conditions.

The bill proposes to use the same machinery that has been set up—that is, the Farm Credit Administration. The bill does not set up any new machinery, new high-salaried jobs, neither will it call for additional employees, except as provided for under section 10, which is very necessary if we are to have the bill properly administered.

Now, it has been said by those opposing this bill, especially the Liberty League, that this is an inflationary bill. Let us see about this. For the past 3 years we have issued billions of bonds bearing 3- and 4-percent interest, which has proven to be a godsend to those who, during the Republican reign, made untold millions at the expense of small speculators, independent business concerns, labor, and agriculture. The great masses have been bled white during this period, farmers losing their farms, independent merchants forced into bankruptcy, labor placed in bread lines, therefore, their purchasing power gone, and, as stated, these monopolistic parasites, the rich, composed of a very few of the 125,000,000 citizens of this great Republic are placing their money in these bonds. Every time one of these bond issues have been offered they have been gobbled up and considerably oversubscribed in each instance.

When you mention this bill to those who oppose same, the first thing they will say is: "I am not going to vote for a bill that proposes to print $3,000,000,000 worth of paper money."

Now, let us see what we propose to do under this bill.

We propose to issue $3,000,000,000 worth of bonds bearing an interest rate of 1½ percent. These bonds as issued from time to time will be offered to the investing public, as we have been doing in the past. These will be 47-year bonds, backed by the best collateral in the world, that is, the earth, from whence all real wealth originates.

Farmers will pay 1½-percent amortization payment into a revolving fund. This fund will be used as it accumulates to buy in these bonds as an investment and for retirement at the end of 47 years.

You ask, "Can we sell these bonds?"

Well, out of our past experience we find that every time Government bonds are offered, they are oversubscribed, as previously stated.

On March 12 the Secretary of the Treasury offered for sale 1½-percent Treasury notes, receiving total cash subscriptions amounting to three and one-fourth billion dollars. The award in this instance in these notes amounted to six and three-fourths billion dollars.

The amount subscribed over and above the amount delivered would indicate the eagerness on the part of investors to buy these bonds. If, however, these bonds do not sell when offered, then we have the right under the bill to go to the Federal Reserve banks and have currency issued on these bonds. Why not? This privilege has been given to banks for many years.

As president of a national bank, back in the teens, I was privileged to buy 2-percent consol bonds and have currency issued in the name of my bank, dollar for dollar, without any cost to my bank except a small amount for paper and the printing of the currency. This currency was expended through my bank, and in the meantime we were drawing 2-percent interest on our bonds.

Since that time the Federal Reserve Act has been so amended that banks can put up your note, my note, as well as farmers' notes and mortgages, all of which these banks are receiving from 6- to 8-percent interest thereon, and have currency issued.

Under this bill, if we have to issue currency, the Government will get the 1½-percent interest on the bonds that will be put up as collateral with the Federal Reserve banks.

I imagine that the Liberty League has in mind, in opposing this bill, that it is all right for bankers to do this, but, farmers, why, they should make themselves comfortable and satisfied by continuing to feed and clothe the world without profit, even to the extent of losing their farms, by continuing to pay 4-, 5-, and as high as 8-percent interest on their land mortgages.

Who is getting these milions from the high interest rates on these tax-exempt bonds which are bringing poverty to agriculture and encouraging communism in this country?

Certainly it is not the Government.

We all know that those actively engaged in business and industry are not; therefore, labor employed by these business concerns and by industry are not getting any of these millions.

As stated, the rich, who refuse to put their money into active business, which would give employment to the unemployed, so as to restore the purchasing power of that great class of wage earners, are securing these benefits.

Oh, we hear much these days about the Government's going into business, thereby competing with private business. I am against the Government's going into business, any line of business, that can be handled by the citizens of the country, except for the reason that this administration had to enter many lines of business because banks were broke and could not make loans and business and industry slowed down and in a great many instances closed their places of business and closed down their industries.

You know, in their estimation, it is all right for business and industry to control their production at the expense of placing millions of wage earners in bread lines; but when it comes to farmers, we must encourage them to increase their production so that the poor and unemployed might buy cheaply, while farmers are going into bankruptcy.

It is my belief that Mr. Roosevelt wants to get out of business, and will do so if and when banks begin to make loans and when business and industry put the unemployed to work on a fair wage scale.

Now, what is the sane and sensible view in issuing currency under this bill?

It is my firm belief that if we have to issue currency we will not reach the amount of $1,000,000,000 at any time; and if so, there is a provision in the bill providing for the retirement of this currency from time to time. If this bill is passed and signed by the President during this session of Congress, I feel sure, if the bonds do not sell, although I firmly believe that when offered from time to time they will be oversubscribed, that we would not be able to use over one-half billion of currency between now and the time when Congress meets next January. If at that time, out of our experience, we find that the act should be amended, it can be done.

I am as much against uncontrolled inflation as any Member of this House. However, after having passed through the deflation beginning in 1921 and the credit inflation of 1928–29, I would not mind having a little of some other type of inflation.

What happened in 1921, when the Federal Reserve banks under Governor Harding increased interest rates and called the banks of the country to pay their indebtedness? I can tell you because I was a victim.

I was president of a small country bank making loans to farmers. We had no trouble in rediscounting our paper with our corresponding bank or the Federal Reserve bank. It was stated that farmers must increase their production in order to take care of starving people, in that we had just come out of an awful war. Why, my little bank, with twenty-five thousand capital and twelve and one-half thousand reserve, borrowed $100,000 in 1921. When Governor Harding issued his orders given to him by the money changers of the East,

cotton prices fell from 35 cents per pound to 6 cents per pound, and from that time on banks began to cave in, millions of depositors lost their life savings by the thousands, and farmers have been losing their farms from that time on.

What happened in 1928–29? Speculators and investors and stock and bond sellers were furnished all the money they wanted by the Federal Reserve banks and the large banking interests of the country, and you know what happened when the crash came in 1929.

Perhaps that is the kind of inflation that you people who oppose this bill want.

One of the things we need today is a line of credit to business and industry. But those in control of the finances of the country prefer to hoard their cash and place same in high-interest, tax-exempt bonds and soak the taxpayers of the country.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. FULMER. Mr. Chairman, let me give you a picture as to just what has been going on during the past, and even at the very present time.

I know of a farmer who in 1913 bought a large farm, paying all that he could rake and scrape on same, giving as part payment a mortgage of the farm for $18,000 at 6-percent interest per annum. For 12 long years this farmer was unable to make a payment on the $18,000 indebtedness, having a hard time raising the interest. During these 12 years he paid as interest $12,960. During the last 10 years he made payments along, paying in full for his farm last year. During the last 10 years he paid in interest $5,000. This makes a total interest payment over 22 years on the $18,000 mortgage of $17,960, or an amount in interest equal to the amount of the mortgage.

Let us take a look at this same case under the bill which we are considering at this time. Suppose, we will say, that this farmer would have paid this $18,000 in the same period of time, 22 years, although the bill gives him 47 years. He would have paid a total amount of interest of $4,800, a saving of $13,160.

Let me give you a case under the financing of farm mortgages by the Federal land bank at this time.

We have a farmer borrowing $10,000 for 30 years at 4 percent interest. During this period of 30 years he will have paid, largely to the holders of the land-bank tax-exempt bonds, a total amount of interest of $12,000.

Under the Frazier-Lemke bill this farmer would have paid $4,500, or a saving of $7,500.

Let us take the case of a small farmer dealing with the Federal land bank. We have lots of these small farmers, and they usually have large families to support.

I want you to remember that this is the type of farmer who was discriminated against under the Bankhead Cotton Control Act, in that he was not given enough cotton allotment to pay his actual farm expenses, let alone paying interest on his mortgage.

This small farmer owes $2,000, and at 4-percent interest rate he is called upon to pay in annually $80. During the 30-year period in which he is allowed to liquidate his land mortgage, he pays in interest $2,400.

Under the bill he would have to pay only $900 over a period of 30 years, or a saving of $1,500.

Would it not be better to give this little farmer this $1,500 than give it to those who are buying these 3- and 4-percent tax-exempt bonds?

My God! Do we wonder that 65 percent of the farmers in South Carolina are farm tenants? With all of this purchasing power unjustly taken away from farmers, going into the hands of the investing public as interest rates on tax-exempt bonds?

I want to say to you, my friends, who represent the large cities of this country, those of you who represent the industrial centers of the East, that if and when the urban homes of your cities will cease to be foreclosed upon, and if and when your wage earners have been put back to work, it will be if and when we give the 30,000,000 people living on the farms of the country a square deal, thereby restoring their purchasing power.

I know that it is your theory that to make farmers prosperous the unemployed must be put to work, that the various industries of the country must be protected with a tariff so as to be able to pay good wages, all of which will restore the purchasing power of the wage earners.

Calvin Coolidge stated on one occasion:

> If we (the Republican administration) can so administer the affairs of Government as to make business and industry prosperous, these groups will take care of agriculture and the wage earner, and everybody will be happy.

Past experience has taught us that this is not true. Go back, if you please, to the period during the past when farmers happened to receive fairly good prices for their products, which increased their purchasing power, and you will remember that you did not hear of any wholesale selling of the homes of the urban people of your cities, and in the meantime wage earners were employed.

I realize that if the people are employed, and at fair wages, it will mean purchasing power that can be used in purchasing farm products and manufactured goods, all of which is necessary to bring about an all-around, normal prosperity.

Several years ago the farmers asked for the McNary-Haugen equalization-fee bill. I am one of the very few men from the South who voted for it.

You gave us a Farm Board that wasted millions of the taxpayers' hard-earned money.

Go back to the CONGRESSIONAL RECORD at that time, and you will find where I stated that unless some means were provided to control production, pegging cotton prices would be just like putting millions of dollars in a rat hole. I am still sticking to this statement, but I do not want the kind of control that was given to many farmers under the Bankhead Act.

There was nothing wrong with this act, but the trouble was in the manner in which it was administered, and in a great many instances our own home people were responsible.

I realize that the Frazier-Lemke bill will not cure all of the evils that farmers have, but this bill is just and fair and will go a long way in giving heart to that great, poverty-stricken people, which will encourage thrifty tenants and young men and women, who are leaving the farms, to purchase lands and engage in farming.

Mr. JONES. Mr. Chairman, I yield 5 minutes to the gentleman from Mississippi [Mr. DOXEY].

Mr. DOXEY. Mr. Chairman, I regret exceedingly having to be in disagreement with men with whom I have served on the Committee on Agriculture for a number of years and with whom I have sat side by side and worked in behalf of the farmer day in and day out, month in and month out, and year in and year out. I say to the membership of the House, and the RECORD will bear me out in the statement, that during this administration the House Committee on Agriculture has never brought before the House for its consideration a piece of legislation that did not have the cooperation of the membership of the House. No legislation yet proposed by my Committee on Agriculture has ever been defeated in this House; and when we proposed legislation here with committee approval, the legislation was passed by the House. Why? This House has had and always shown great confidence in the Committee on Agriculture, and we members of the Committee on Agriculture endeavor to iron out our differences in committee, in executive session, and in conference, and appear before the membership of this House with a united front, you may say. In regard to this bill—H. R. 2066—the Committee on Agriculture has not been able to agree, and we do not come before you with a united front. Mr. LEMKE is not a member of the Committee on Agriculture.

On both sides of this aisle there are Members who are conscientious friends of the farmer. Democrats and Republicans are working and doing all they can to help the farmer, yet they disagree as to this legislation. I want to say to the

real friends of the farmer that the philosophy of some of us is as expressed by the distinguished gentleman from Texas [Mr. SUMNERS], chairman of the Judiciary Committee, who has preceded me on this floor. I can express it more aptly in the limited time I have by citing the Aesop fable, which tells us about the dog who had a juicy, luscious piece of steak in his mouth, and as he crossed the bridge he saw his reflection in the pool beneath. He wanted that piece of steak in the other dog's mouth that he saw reflected in the water, and in an effort to get it he opened his own mouth and lost what he had. I am afraid that is what will happen to the farmers of this country if we are not careful.

The city Members here have cooperated with us in the past and helped us pass the legislation for agriculture that we now have on the Federal statute books, and we deeply appreciate it. Today we have a separate credit structure for agriculture which is separate and apart from industry. It is sound and based on a solid foundation. That is taken care of through the Farm Credit Administration, the land banks, the cooperative banks, and various agricultural lending associations. There is an endeavor to meet the credit needs of the farmer through those agencies, and we are helping the farmer as best we can at present. It may be stated that we are charging too much interest, and I agree with the statement, but the tendency, Mr. Chairman, is to lower the interest rate. This is necessarily a slow process and must be proceeded with in a cautious and sound manner. I know this administration has done more for agriculture than any administration in the history of this country. And nobody will deny that statement. [Applause.] We today have the lowest farm interest rate in the world, and it may be reduced, but not at this session of Congress.

In the debate yesterday it developed there is a misunderstanding with some city Members. I have the highest regard for city Members; and if and when as a Member of Congress deeply at all times interested in the welfare of agriculture I promise anything, I will live up to the promise. It is evident, from what was said yesterday, there has been some trading by somebody, and I am of the opinion someone is going to be disappointed. If there is any promise here or trade, there is liable to be a dilusion, confusion, and disappointment. This bill may be passed and go to the Senate. It may come back here and instead of providing $3,000,000,000, as it now does, there may be provided $9,000,000,000. I do not know, and neither does any other Member know, what the situation may be, but we know what this Nation can stand, and we know what is sound legislation. Our committee has always tried to bring sound and constructive legislation before the House, and we have always endeavored to defend anything we brought in here as being based on soundness and on a financial structure that was genuine and worth while and one which meant real relief to the farmer. That is something for you friends of agriculture to think about. Does this Lemke bill do it?

Mr. Chairman, in my limited time I cannot analyze the bill. This credit is forced by the provisions of this bill—the security is insufficient and the proponents of the bill admit the weakness of that section by a proposed amendment which they expect to offer. They know the bill will be declared unconstitutional if the forced credit transaction is left in the bill as it is at present. Yet if the forced credit feature is taken out of this bill, it will never be enforced. It just will not work in a practical and business way. It has been said: Oh, you can sell these 1½-percent bonds, but you cannot do that with these particular bonds, because these are 47-year bonds; and the other sales of bonds as cited here which have been made by this Government involved short-term bonds only. There is a great difference on the bond market between short-term and long-term bonds.

This question of refinancing any kind of indebtedness by the Government is a most delicate and complicated matter. There is very little that any of us know about the broad question of money—when it is sound and when it is not. But we all know when the Government loans the taxpayers money it should be on a sound basis.

The Committee on Agriculture reported out another refinancing bill known as H. R. 7593—the Jones bill. I know this bill—H. R. 7593—has been given much time and study by my distinguished chairman, Mr. JONES, of Texas, and others of us privileged to be on the House Committee on Agriculture. But we cannot substitute the Jones bill for this bill under the rules of the House. That is my opinion. I do know, however, that my chairman, Mr. JONES, will offer his bill as a substitute at the proper time, but I am afraid that the point of order that will be made will be sustained by the Chair and that the Jones bill will not be substituted for the Lemke bill.

No one can deny that this Lemke bill sets up discrimination. On its face only about 15 percent of the farmers will be benefited. Eighty-five percent of the farmers will never be benefited by this bill even though it should become a law. There is no provision in this bill as to what farmers will be helped and what farmers will be left out. We all know that they cannot all be refinanced and that they all will not be refinanced.

There are nearly $9,000,000,000 of farm mortgages in this country and, my friends, please mark this prediction of mine at this time. If such a plan as this becomes a law, the big interests, the insurance companies, the big banks, and large mortgage-holding companies will get rid of the farm mortgages they now hold, procure what Government aid is available, and the actual farmers of your district and of my district will never receive any of the contemplated and much-talked-of relief promised them by this Lemke bill.

The way of this bill, if it becomes a law at this session of Congress, will be strewn with "broken promises." I fear it will be one of the greatest disappointments the farmers of our country have had. Everybody knows this Lemke bill is not an administration measure, and the administration has proved that it has always had the interest of the farmer at heart, and no one will deny it.

The leadership of this House have spoken against this bill.

To my mind, it was a mistake to consider the bill at this time, for we all know it is not going to become a law at this session of Congress. Politics is behind this bill, and it is going to leave scars, and I am afraid it is going to hurt the cause of agriculture and our future efforts to do something really worth while for agriculture.

We have gone a long way toward helping agriculture under this administration—much further than any other administration in the history of our country—but we have not yet reached our goal, and to enact this type of legislation at this particular time would, in my judgment, throw a monkey wrench into the whole agricultural program and would have a most unfavorable reaction, prejudicing Members of this House against the cause of agriculture, who have heretofore been our true and warm friends.

For instance, the agricultural program that we now have, which is a substitute for the A. A. A., cannot pay its way as the original A. A. A. did, because the Supreme Court has said that we cannot levy processing taxes for the specific benefits paid directly to the producer. Yet we all know that an agricultural program requires a great deal of money to finance it, and we have this year appropriated $500,000,000 to carry out the plans and provisions of the A. A. A. substitute that we recently passed. We could not have secured this appropriation if you city Members had not helped us. Now, if you city Members are laboring under any misapprehension that if you refinance or propose to refinance farm mortgages to the tune of $3,000,000,000, this farm bloc, who are sponsoring this Frazier-Lemke bill, will in turn help you to pass legislation here that will refinance some mortgages on homes in the cities to the amount of six or ten billion dollars, you city Members are going to be disappointed. We all know that this Nation cannot stand that kind of inflation. Yet when you start it, where are you going to stop? You can talk all you want to about "controlled expansion." That sounds good, but in all nations and in all countries wherever the camel got his nose under the tent, as this Lemke bill provides, the expansion was not controlled, but "uncontrolled inflation" resulted.

You have already heard on the floor of this House that if you refinance farm mortgages in this manner, you must and will be called on to refinance city mortgages. As I understand it, there are twenty or twenty-five billion dollars of city mortgages outstanding today. This administration is trying to help the city folks through the H. O. L. C. and other governmental agencies. But, my friends, you cannot at one fell swoop pass legislation that will help all the farmers in this manner any more than you can pass legislation that will help all the city folks who have mortgages on their homes. To do that it would require twenty-five or thirty billion dollars, and everybody—it does not matter how fantastic and wild their ideas may be with regard to inflation—knows that such a plan or policy as that would mean wrack and ruin for this country and destroy our financial structure. Big things have small beginnings.

I believe that most of you are just as I am—you want agriculture to have all the relief possible. We want the lowest possible rate of interest, but it has got to be commensurate with sound business and based on a solid foundation. We can best serve the interests of the farmer by watching our step, developing this sound agricultural program that we have, and not doing anything to drive our friends away from us who have helped us in the past by holding out false promises to them, be they living in the cities or not.

It would be a sad day for agriculture, in my judgment, if this House should lose confidence in those of us who have up to now carried the banner of agriculture under the approval of this administration, but we have a different leadership as to this bill, and I hope that we will not do anything here today that will be like Banco's ghost to rise up and plague the friends of agriculture in the future.

We must look to the future. We must plan for the future. And today with agriculture on the upward grade, we should not hamper its future progress under the guise of misinformation, propaganda, and the political claptrap of trying to help the farmer when in truth and in fact the reverse is what would likely happen should this particular bill at this time become a law; but I believe most of you feel as I do—that when the real facts concerning this legislation are known to the membership of this House this bill will be defeated—for it is not all that it is claimed to be, but it would take time, and more of it than I have at my disposal, to take this bill up and analyze it by sections.

Again, I want to say to you, my city friends, that our Committee on Agriculture craves your continued cooperation, for we have other constructive legislation that it is going to be necessary for the city vote to support in order for it to become a law.

I have introduced several bills providing benefits to the actual producer, but it is likely, as this session is drawing to a close, that it will be next session before the membership of this House is asked to consider these bills, as well as other vital and important legislation that our committee will present which we know will be of real benefit to agriculture and which will provide benefits that will go directly to the individual farmer, while here a plan is being proposed, under the guise of farm relief, to help the insurance companies, the big banks, building and loan associations, and great holding companies, who own and control a great percentage of the farm mortgages of this country, and who expect, if this bill is passed, to reap a rich harvest at the expense of the taxpayers of this Nation.

Therefore, may I again repeat and ask you to bear in mind that if you pass this bill there is no valid and good reason why similar legislation should not be enacted in an effort to help the city folks whose homes are mortgaged, which would require billions and billions of the taxpayers' money. In most instances the city home owner is in the same shape as the farmer—the one who owns the mortgage is either a bank, building and loan association, holding company, or big insurance company, and, unless I am wrong in my judgment, they are the ones who would get the cream; and if anything were left, the individuals we really want to help would hardly get the crumbs left from the table.

At all times my supreme effort here has been to do that which I thought was for the best interest of the farmer, and certainly that is my position with regard to this bill at this time.

There can be no question in the minds of anyone that the administration is against the Frazier-Lemke bill in its present form. It is my personal belief that this administration does not intend for this type of legislation to pass at this session of Congress be it supposed to benefit the farmer, the city man, or any other special class. All classes have been benefited by the efforts of this administration.

I am with and for this Democratic administration. It has meant much to this Nation, to my State, and to my district.

The laws we have enacted, the benefits we have received, the projects we have secured, and the Federal money that has been spent for our welfare has had administrative approval, and without the cooperation of the leadership of this administration very little real worth-while result can be obtained.

I do not intend now at this crucial time to desert the Democratic leadership of this House.

I thank you. [Applause.]

Mr. JONES. Mr. Chairman, I yield 4 minutes to the gentleman from California [Mr. COLDEN].

Mr. COLDEN. Mr. Chairman, I desire to ask, who has the best credit in the United States? There is but one answer, and that is Uncle Sam. He normally pays 3-percent interest for the money he obtains from the sources from which many of us obtain our loans. Why should the Government loan money to a special group for one-half the rate it must pay?

I represent a part of the city and county of Los Angeles, and the cheapest money that the city of Los Angeles has ever borrowed, of which I have any knowledge, is at about 4 percent. Most of our city obligations draw around 5 percent, and 4 or 5 percent is the usual rate for our municipalities and for our States. For the Government, which pays 3 percent, to lend money at 1½ percent to any group, whether they are shipbuilders and operators, bankers, farmers, or laborers, or whoever they may be, is unfair discrimination.

I was very much intrigued by the very clever argument of the author of this bill [Mr. LEMKE], the eminent Member from North Dakota. In defending this discrimination he said that the Federal Reserve banks can borrow money for the cost of printing, or 30 cents per $1,000. He proposes to pay 50 times that much, but the bill does not propose to wipe out the unjust discrimination to which he refers. If we did our duty, we would take over the Federal Reserve System, authorize the Treasury or some governmental agency to issue every dollar of paper money in the interest of all the people, and exclude the Federal Reserve bank from this vicious privilege of issuing money. Congress should coin money and regulate currency, and not delegate this favor to favored bankers.

This bill provides that the favored farmer may borrow up to $25,000. The farmer who has assets that would justify this sort of loan does not need help one-tenth or one-hundredth as much as the millions of people in this country who do not own a foot of land anywhere.

If we want to do something fundamental in this Congress, we should bring out the Bankhead-Jones bill and give the forgotten man and the tenants a chance in this country.

Mr. JOHNSON of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. COLDEN. I am sorry, but I have only 4 minutes and cannot yield.

I am against these discriminations. The indefensible discrimination exercised by bankers does not justify creating a new one for a small group of farmers. I hope we can sponsor some measure that will treat all classes equally.

This bill, if it passes, discriminates against the farmers who owe $6,000,000,000, and it discriminates against every home owner in the cities, and it discriminates against every business in this land. It is an unjustified discrimination in favor of a few, and I believe in that old slogan of democracy—equal rights to all and special privileges to none. [Applause.]

I signed the discharge petition to bring this bill to the floor for discussion and consideration. I believe the proponents of any measure in the interest of a material group should have consideration by the Members of the House. But in extending this right to be heard to the supporters of the Frazier-Lemke bill, I reserved the right to vote according to my convictions, my duty, and my responsibility.

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. WITHROW].

Mr. WITHROW. Mr. Chairman, inasmuch as the Speaker deemed it advisable to read a communication from Mr. William Green, president of the American Federation of Labor, who is personally opposed to this legislation on the ground that if enacted into law it would lead to unrestricted inflation, I take this opportunity of reading a letter from Mr. A. F. Whitney, who is president of the Brotherhood of Railroad Trainmen. The letter was written to Mr. J. A. Farquharson, who is national legislative representative of the Brotherhood of Railroad Trainmen, and who is located here at Washington, D. C.:

MAY 6, 1936.

DEAR SIR AND BROTHER: I am enclosing herewith copies of letters I have just addressed to Senator LYNN J. FRAZIER and Congressman CHESTER C. BOLTON.

These letters are self-explanatory, and I urge you to do whatever you can to assist in the enactment of the Frazier-Lemke farm-refinancing bill.

Fraternally yours,

A. F. WHITNEY, *President.*

I also take this opportunity of reading to you the letter sent by President Whitney to Senator FRAZIER, which reads as follows:

MAY 6, 1936.

Hon. LYNN J. FRAZIER,
United States Senator, Senate Office Building,
Washington, D. C.

MY DEAR SENATOR: I note the required 218 signatures have now been obtained on the Frazier-Lemke bill and the bill will come up for discussion in the House on May 11. This organization has consistently favored this legislation, for we realize that the farmers of this Nation are fast descending into a state of peasantry and will continue to do so unless some financial relief is obtained for them. I am communicating with our national legislative representative, Mr. J. A. Farquharson, 10 Independence Avenue SW., Washington, and asking him to give this bill his support.

I am glad to be of assistance in this worthy legislation, and I heartily agree with you that, in view of the fact that 32 State legislatures have endorsed this bill, it should be enacted without amendments, for certainly the majority of the people must favor such legislation.

With best wishes, I am,
Sincerely yours,

A. F. WHITNEY,
President, Brotherhood of Railroad Trainmen.

I want to make it perfectly clear that the brotherhood is wholeheartedly supporting this legislation. It might also be said at this time that the Speaker of the House might also have obtained a letter from Mr. Shouse, who is the head of the Liberty League, because he is also opposed to this legislation. [Applause.]

American Federation of Labor members, as well as members of the railroad brotherhoods, realize that their well-being and prosperity is entirely dependent upon the well-being of their fellow citizens who own and operate our farms. This bald attempt to play the laboring man against the farmer, and vice versa, is an old game which has been successful too often for the good of this great country. It is merely a "red herring" drawn across the path of this legislation by the servants of vested interests to confuse the real issue, which is, "Do you or do you not believe in real farm relief?"

The conditions following the debacle of 1929 remain. While farm prices of many commodities have risen in unit value, still the things the farmer must buy have risen in greater degree and he still remains in relative submergence. No man can win in an economic race while carrying such a handicap. On the basis of the present income of agriculture and of the present indebtedness of agriculture and of the present taxes and interest rates which agriculture must pay, it is impossible for agriculture to carry on successfully. When it can carry on, when it does prosper, then we will not be compelled to furnish relief to millions of nonfarmers who are now dependent upon governmental bounty and governmental doles. Farm tenancy is growing apace. Foreclosures have divested real farmers from ownership, while moratoriums against foreclosures are merely temporary and are not permanent nor remedial.

The Frazier-Lemke measure under consideration, if enacted into law, would give real relief. I am, therefore, wholeheartedly supporting the measure. [Applause.]

Mr. JONES. Mr. Chairman, I yield myself the remainder of the time.

I wish that the fine enthusiasm of my friends could be used to better advantage than in connection with this bill. In many respects they and others have favored recognition of equality for the farmers. But I have listened with interest to the statements that were made on yesterday and today by the proponents of this bill and there has not been one meed of praise for the institution that has done the finest job of refinancing of farm mortgages in the history of the whole world. It has not even been mentioned.

It would seem from these speeches that this administration is wholly subject to criticism in all its farm program, because I have not heard from the proponents of the pending measure a single statement in recognition of the only administration in 50 years that has actually done anything toward putting the farmers on an equality with industry. [Applause.]

YEARS OF STRUGGLE

I went through the period from 1920 on. Through a long period of years many of us worked in season and out urging equality for the farm and ranch and claiming that was all we wanted. We met defeat after defeat, coming back empty-handed, and then finally, after gaining victory, had our bills vetoed.

In carrying on that fight we had two obstacles: First, those who did not want to do anything, and, second, those who wanted to do too much, and by claiming too much wound up by getting nothing. Those who went through that long struggle realize how important it is to keep what we have builded and not by claiming more than can be attained, lose, as my friend from Mississippi [Mr. DOXEY] has said, the substance of what we have.

That was the story of the dog in Aesop's fable which had a good piece of meat in his mouth. Looking down into the water he saw what he thought was a better piece of meat. Turning loose what he had, he sought the other, and thus lost all his efforts. The moral of the fable was this:

Beware, lest in grasping at the shadow you lose the substance.

Aesop said that 2,600 years ago. It was built on folklore and the experience of the human race. It is just as true today as it was then.

THE RECORD

I am going to give you some facts. In the last two and a half years more farms have been refinanced by the Farm Credit Administration than in the 16 previous years of the land bank's history. [Applause.] One billion nine hundred and seventy-two million dollars have been used to make 748,000 loans on farms. These banks now have outstanding nearly 1,000,000 loans, aggregating $2,800,000,000, and we have the lowest interest rate for farm mortgages that ever existed in the history of the world. [Applause.]

Why do not my friends recognize that?

This is peculiarly a farmers' institution. It has taken years to build it. Nearly every fine institution can be easily wrecked, even when there is no intention of doing so. We should not take a hand ax and machete and wreck the train in order to get what seems to be a little more, but which in reality would prove to be less.

SEPARATE CREDIT STRUCTURE

I said in my platform years ago, when I first ran for Congress, that there ought to be an institution for agriculture apart from the commercial credit structure. I championed that on the floor for years. I talked about it so much that some almost thought I was "daffy" on the subject. But

within 3 months after this administration came into power it was my privilege to sponsor a measure which did just that.

Under this administration the loans on land-bank mortgages are 3½ percent, and the commissioners' loans are 5 percent. This is the lowest rate that prevails in any great country. Here are some of the rates which prevail elsewhere: Great Britain, 5.2 percent; Germany, 4½ percent; Canada, 5 percent; Denmark, 4 to 6½ percent; Hungary, 5 percent; Bulgaria, 8 percent; Czechoslovakia, 6 percent; France, 6 percent.

I want a lower rate as much as anyone. I want the lowest possible rate, but I want to look down the road. There are only 30 percent of the American people who are engaged directly in farming. We must show a disposition to be fair if we expect to hold what we have. I do not blame these gentlemen, but this country has been builded under party responsibility. This is a nonpartisan issue, and should be. But, if the machinery of government is not handled by one party or the other, confusion is likely to result—there is no continuing organization to be held responsible, and real issues are likely to be clouded.

I want to say that my friend—he is my good friend, and I admire him—voted against the Soil Conservation Act and the new farm program of this administration on February 21. That is his privilege. I do not criticize it. God bless him, if that is the way he felt, that is the way he should vote.

Members of the House, especially on the Democratic side, are you going to take your philosophy from a man who evidently does not believe in the philosophy of this administration? [Applause.] I do not know what the Republican side is going to do this year. If they want to go away back, they will nominate Mr. Hoover. If they want to go definitely forward along progressive lines, they will probably nominate someone like Senator BORAH. If they do not know where they are going, they will probably nominate someone like Mr. Landon. [Laughter.] He is smart. I admire him. He knows what discordant elements he must say grace over, and he is taking the only practical method. I say, "Luck to him." It probably does not make much difference whom they nominate.

But this thing transcends party lines far and away.

OUR GOVERNMENT

You would think from some of the discussion here that the American Government was a terrible thing and that it had mistreated nearly everybody. Go into any country on earth and see how glad you are to get back to these American shores. Bless your heart, this is a fine country. It has been builded on the genius and industry of American men and women. It is the finest country that was ever fashioned on this or any other continent in all the history of the world. And I want to say here and now that, whether under a Republican administration—bad as I think it sometimes is—or under a Democratic administration—fine as I think it usually is—I would not trade our country for any other country on earth.

FARMERS' INSTITUTION

Here is another interesting thing: Not only do the farmers have in the Farm Credit Administration for the first time in all the history of the world an institution of their own; not only has it handled and refinanced more farm mortgages in the last 2½ years than in the last 16 years of the land bank's history; not only has it handled them at the lowest interest rates this country has ever known, but its bonds are selling at practically an all-time high.

When this administration took over the land banks and reorganized them under the Farm Credit Administration and broadened the organization so as to include all types of farm credits, the land-bank bonds were selling at 82 and 83 and 81. Now they are selling around 100 cents on the dollar. I say that is a magnificent tribute to the way this job has been done by this administration.

It has not been perfect, but we must perfect it as we go along. In perfecting it, in making the necessary changes, or in performing any operation on the Farm Credit Administration, I want the surgeon who handles the knife to be one who wishes the patient to live; don't you? [Applause.]

Not one word of compliment has come from the lips of these gentlemen who are so anxious to perform a major operation. Oh, how unreasonable it all seems. This is the only institution we have ever had that has done a job like this. It has been a long, long struggle to the top of the hill. I wish we could get money without interest. I wish we could get it at 1 percent or one-half of 1 percent. I do not know whether I will stay here any number of years or go into the shadows soon. That is not important. But the whole essence of my life has been dedicated to this thing. Whatever faults I may have—and they are many—I am not going to try to fool the farmers. [Applause.]

When I go out I certainly want a stamp on my work. I may be wrong, but I have sat here through the years and have watched this thing. I believe I know something about what I am talking about. I have been carrying wood and water for this cause ever since I have been in Congress. Some of it has been wet; some of it has been green. I have not been very smart at times. But I do not want to try to burn down the house just to get a bigger fire for the moment. [Applause.]

CAREFUL LEGISLATION

I have great admiration for my friends, and I expect to be with them on many things that come down the line. I think they have let their enthusiasm run away with them. I really believe that. In order to try to bolster up a lost cause, in desperation they are offering a number of amendments which very vitally change their bill. Anybody who has ever studied money, who has ever studied financing, knows that it is a very delicate structure, and you cannot at a town meeting or on the floor of this House rewrite a bill that so vitally affects farm interests like the Farm Credit Administration in a haphazard fashion.

There is too much at stake to do things in a haphazard way. This is a broad, big country with many and conflicting interests. The most important interests of all are the interests of the farm and ranch. I believe I have worked as hard and as long as anyone in this House to get the lowest possible interest rates. But I am not interested in just advocating something. I want results.

I have been working for a considerable time with a number of others on a plan to form a Federal Reserve System for Agriculture. That is, a system that will give the 12 Federal land banks the same status and privileges now enjoyed by the 12 Federal Reserve banks. If this can be done, much more will be accomplished for the farmers of America than could possibly be accomplished by the pending bill, even though it had a chance of finally being enacted into law.

About 18 months ago, with the assistance of some others who are interested and with others who had given long study to the subject, I began the drafting of a measure which I hope will be finally enacted. At least I hope something like it may be finally enacted. It parallels the commercial credit structure and would furnish a very low rate of interest.

PARALLEL SYSTEM

We have a Federal Reserve System which takes care of the commercial credit structure of this country. We furnish local banks the privilege of issuing money by putting up 40 percent gold reserve or certain types of Government bonds, plus the balance in commercial paper.

We have drafted a similar measure for agriculture. It has been favorably reported by the committee. It is designed to furnish cheaper farm credit by providing means by which interest rates may be very materially reduced. This is done in two ways: First, the intermediate credit banks, being the discount banks for the Farm Credit Administration, and being owned by the United States Government, are given the privilege of selling their obligations and furnishing the money at cost to the Federal land banks. The intermediate credit banks, being Government institutions, can sell bonds at a cheaper rate than the Federal land banks.

In addition we transfer from the $2,800,000,000 profit which the Government made on the gold transaction 30 percent, or $840,000,000 in gold, to the intermediate credit banks. These being Government institutions, this would simply be a

bookkeeping transaction. On this gold as a reserve, plus agricultural paper instead of commercial paper, the note-issuing privilege is given. Such note would have the same backing and the same privileges as Federal Reserve notes. As it parallels the Federal Reserve System, no one can gainsay its justice. Again, we are merely asking for equality for agriculture.

The 40-percent gold basis, plus the farm paper, for intermediate credit notes is just as sound as the 40-percent gold basis, plus commercial paper, for Federal Reserve notes.

This bill has been gone over carefully by several who have made a great study of this subject. I expect to offer it as a substitute. Some of you may not want to go as far as I want to go along these lines, but I believe it would be a great step forward. It would accomplish far more than the pending bill and would inure to the benefit of all the farmers of the country, instead of to the benefit of comparatively a few. It is just and it is fair, and the privileges would be extended to every borrower under the land-bank system. I do not know whether we can do it now, but I believe ultimately we will get a program of this character, because I believe it is sound.

LOW INTEREST RATE

Under the measure which I propose an interest rate of not to exceed 2 percent would be provided on all loans of $5,000 or less, and upon the first $5,000 of all loans, regardless of size, made by the land banks or the land-bank commissioner. This low rate would apply to the uncollected balance of outstanding loans, as well as to future loans. On that part of the loan in excess of $5,000 the rate would be as low as the method of financing and the cost of administration would permit.

The measure which the gentleman from North Dakota is sponsoring provides for refinancing a portion of the farm mortgages of the country. His measure provides for 1½-percent interest and 1½-percent amortization payment. Then in addition each farmer or borrower is charged his pro-rata part of his expense of operation annually.

The experience of the land banks has been that this operating cost, including appraisals, papers, the making of loans, collections, and administration, generally amounts to about 1 percent. This is lower than private-mortgage companies have been able to administer, but this showing has been made by the Farm Credit Administration. This would make the rate of interest on the pending bill approximately 2½ percent, which, added to the 1½-percent payment on principal, would make a total annual payment of 4 percent, which is very low.

The measure which I propose to offer as a substitute would, in my judgment, be far more effective, more desirable, and would inure to the benefit of more farmers.

EQUAL TREATMENT

I put into my bill that the advantage of the note issue should go to all farmers in the farm-credit system. It would take care of the small farmer at a very low rate. It might be less than the sum specified, but it would not exceed that rate—probably about the present rate or perhaps a little less. At any rate it would take care of all the borrowers from the land-bank system on the same basis.

If the pending bill passes, a part of the farmers would be paying the low rate specified, and the remainder would be paying 3½ percent. It hardly seems fair that a farmer who has paid a portion of his loan and has managed in some way to keep his payments up, but who still owes a substantial balance, should be denied the privileges of the lower rate of interest.

It is necessary to use great care in drafting legislation of this kind. England had a farm problem in Ireland, as you will probably remember. They decided to buy from the absent owners a great deal of the land and sell it to tenants at a rate of interest materially below what the mortgage companies were charging. The loans ran over a long period of time—some 60 years. I think the interest rate was around 3 percent, while the commercial rates were around 6 percent. Naturally the tenants bought the homes.

Immediately speculators began offering the new purchasers $500 and $1,000 profits for their contracts, and the thing at once went into speculation. You could not blame these tenants, but many of them, lured by the easy money they had not known, parted with their purchases. Speculation grew so rife that as much as $150 and $250 per acre was being paid for tenants' rights in 1926, thus in many instances encumbering the land with second mortgages when the first mortgage still had about 45 years to run.

SAFEGUARDS

I take care of that feature in the measure which I shall offer by providing that only the actual operating farmer shall have the benefit of the reduced rate on these mortgages and that if the land is sold to other than an actual operating farmer the payments shall become immediately due and payable or the interest rates increased. Whenever interest rates are provided that are materially lower than current interest rates, some safeguard should be had to prevent the land from falling into the hands of speculators. This is just one of the safeguards which I mention and which shows how difficult it is to make numerous hurried corrections on the floor of the House and how much care should be exercised in the preparing of this type of legislation.

We have had a very difficult situation in this country. I am anxious to encourage home owning in every possible way. I have introduced a farm-home bill which would provide an opportunity for the purchase of farm homes. I have long worked on legislation which would provide for lower farm-mortgage interest rates. I want real results. I do not want to leave any loopholes that will permit speculators to reap the advantages of such legislation. I want those who till the soil and who furnish the basic wealth of this country to be the ones who will receive the benefits of legislation of this character. The farm-mortgage situation is very definitely improved, as shown by the statistics. However, there is room for still greater improvement. As a matter of fact, foreclosures are very small under the Farm Credit Administration just now. They are practically back to normal throughout the country, regardless of what may be said. The land banks last year completed foreclosures in less than 2 cases in each 100 of the mortgages which they held.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. JONES. I would rather yield a little later, if I have time.

Mr. RANKIN. The gentleman is not referring to Federal land banks, is he?

Mr. JONES. I am referring to the Federal land banks, and I have the statistics to support my statement. One and eight-tenths percent is the percentage of actual foreclosures in 1935, including voluntary deeds. That is the fact, and those are the statistics. [Applause.] The Farm Credit Administration informs me that many of those were cases where the farmer had abandoned the farm, or where they had ceased to try.

The foreclosures by private loan companies and other mortgagees has been considerably larger; in fact, several times as large. The Federal land banks now hold about 37 percent of the farm-mortgage debt of the country, and yet with more than one-third of the outstanding mortgages they have carried out only one-tenth of the foreclosures of the country. In other words, private companies, in proportion to the number of loans held, have foreclosed in four times as many cases.

I want to state the policy as given me by the Farm Credit Administration. Here is what they state:

> No foreclosure shall be instituted where any farmer, first, is doing his honest best; second, is applying the proceeds of production over and above reasonable living expenses to the payment of the primary obligation; third, is taking proper care of the property; and, fourth, has the capacity to work his way out of a reasonable burden of debt under normal conditions.

I am informed that practically all cases, or at least a great many cases, where foreclosure was had, were those where there had been abandonment or where the situation was hopeless and so recognized by the farmer himself.

Mr. WHITE. Mr. Chairman, will the gentleman yield there?

Mr. JONES. I cannot yield.

Mr. WHITE. Does the gentleman know that the Federal land bank has been charging 8 percent on delinquent payments and that that has been going on all the time?

Mr. JONES. No; I do not know that. While the law authorizes collection of 8 percent on delinquent installments, the Administration advises me that the average collection in such cases is only about 5 percent.

Mr. WHITE. I will inform the gentleman of that fact.

Mr. JONES. I do not think the gentleman is correct. The Farm Credit Administration advises me that the rate charged varies a little with the different banks. Five of the banks charge 6 percent, five of the banks charge 5 percent, and two of the banks charge the present loan rate on delinquent installments.

Mr. WHITE. I have documentary proof of what I state, and I will place it in the RECORD.

Mr. JONES. They do charge a little extra on delinquent payments; but, as a matter of fact, the delinquent interest carries only a small penalty which will run to much less than what the gentleman states. The figures have just been furnished me by the land-bank officials.

Now, let me cite the progress which has been made under this administration which our opponents charge has done just about nothing at all. Under this administration in 1932 if a farmer had a $10,000 mortgage on his farm, it would take 25 bales of cotton to pay the interest. Today it takes 5.9 bales. It took 1,826 bushels of wheat; it now takes 458 bushels. It took 2,174 bushels of corn; it now takes 425 bushels. It took 70 head of hogs; it now takes 19 head. It took 4,514 pounds of butter; it now takes 1,570. Figuring 100 percent as normal, it took an index of 175 of the all-unit basis index to pay the interest. It now takes 53. In other words, it takes less than one-third of the farm products to pay the interest on a farm mortgage than it did in 1932.

FARM HOMES

Mr. Chairman, I do not want to do anything which will interfere with the best possible deal for the farmer. I hope everyone who wants a home will have a chance to secure a home, because this Republic is anchored in the homes of America. But I do not believe we can turn the issuing of the money of this Republic over to any interested group. That is the trouble we have had heretofore. Let us get it clear away from the groups as we have tried to do in the past, and put it in the hands of the Government. I believe the Government should have its own bank of issue and should issue its own money, control the currency, and regulate the value thereof. [Applause.]

I would go that far, but I do not believe that we can afford to turn over to any interested group of borrowers that right. You know when the land banks were first organized they used to borrow the money from commercial sources. Now it has reached the point where the Government is putting up some money and, under this bill, if it should be adopted, the Government would put up practically all the money. No group should control the issuance of money. If you do this, how can you refuse to do the same thing for the home owners of cities?

I want to take the control of money out of the hands of the money changers. I want to restore complete control to the Government, whose responsibility it is, and whose faith and credit makes the money worth while. Then I want to see all of the citizens of our country put on the same basis and given the same privileges. This is the very essence of every democratic government. For this reason I have worked out the bill which I have introduced. I would be willing for similar privileges to be extended to the home owners in the cities. It could be done on a perfectly sound basis. It seems to me that this would encourage home owning, both in the country and in the city, in a far greater way than any other measures that have been proposed.

America did not just happen. It was builded. It was builded from the foundation up. Its cornerstone is equality. For this principle I have worked for years. Many fine spirits in this House and throughout the country have done likewise. We have sometimes disagreed as to methods, but I believe progress has been made. I want to see the rainbow of the farmers' hopes touch the ground. I believe that this can be done in strict accord with the principles on which this Government was founded and has grown great.

Mr. Chairman, I believe in the United States Government, its history, its institutions, and its people. [Applause.]

[Here the gavel fell.]

Mr. LEMKE. Mr. Chairman, I yield the balance of my time to the gentleman fromg Nebraska [Mr. BINDERUP].

Mr. BINDERUP. Mr. Chairman, ladies and gentlemen, fellow Members of the Committee, I have listened with profound interest and much disappointment to the last speech delivered on the floor of Congress today against the Frazier-Lemke bill, that bill in which I am so intensely interested.

GREEN DESERTS FARMERS' CAUSE

The speech reflected sadness and disappointment. I refer to the speech of our Speaker [Mr. BYRNES], when he quite unusually took the floor to oppose our righteous cause by reading a letter from William Green, president of the American Federation of Labor, who opposed our bill because it would, as he said, help the farmers and not the laboring people. And so it was read—this message of poison promoted by some peculiar short-sightedness that could not see that the interests of labor and the farmer are so completely tied together that to help the one helps the other, that one cannot succeed without the other, that labor cannot gain employment unless the farmer can buy the goods from the factories. By this faulty statement there was once more injected the poison of prejudice to divide the ranks of labor and the farmer—disappointing, disheartening, and discouraging when I realize the years we have battled, the thousands of miles I have driven, the many talks I have made, in an effort to eradicate this poisonous prejudice injected by the enemies of our righteous cause for one reason only—that is, knowing that if they could keep a strife and a division between the farmer and the laborer, predatory, plundering wealth could sit back and laugh and accomplish its purpose; decorated in honor and clothed in the power of prestige we gave him when we elected him our Speaker, the gentleman from Tennessee amplifies the erroneous statement, the prejudicial poison, by spraying it out over the Nation, into every nook and corner.

UNITED WE STAND; DIVIDED WE FALL

I realize the battles I have in my own home district because I voted for labor in every case and in every bill that came up in Congress, especially because I voted for the Guffey coal bill, which would increase the price of coal to every one of my constituents in my district; because I supported the outstanding N. R. A., that did so much to increase prices of manufactured articles out in the West—all this in an effort to favor labor and to raise the price level. I was censured for this by my constituents, and now how painful it is for me to realize that, after our years of effort to help labor in every suggestion, in every bill introduced into Congress, that the labor leader, Mr. Green, turns his back upon the great agricultural West, the consumers of the products of the factories of the East. I explained to my farmer constituents that you cannot hope to establish a market for pork unless you increase the purchasing power of labor and put meat on the laboring man's table. You can never hope to sell your wheat unless the laboring man eats bread. And I received their approval by a flattering majority in the last election, sending me as their representative to the Nation's Capital. I am pleased to believe, however, from the knowledge that I have from personal contact with labor, that when Mr. Green wrote the poisonous sentiments in his letter to be read in Congress and destroy the farmers' cause, he did not speak the true sentiments of labor, and it is my own personal belief that he abused the confidence of his office by expressing an individual opinion, assumed to be the sentiment of labor in general. I believe labor understands that labor and the farmer must work hand in hand and raise the price level of the farmer's

commodities and the laboring man's wages to where they can maintain that high American standard of living to which each is so justly entitled. And I believe labor will regret the damnable poison spread by their leader so effectively equally as much as do the farmers regret it today. I sincerely hope that our enemies have not succeeded in dividing our ranks permanently and that the poison that pervades the atmosphere of this Chamber of Congress today, dividing labor and the farmer once more, may soon evaporate and that the former good feeling of cooperation may again return. My friends, I say with much consideration and forethought that William Green, who is the head of labor, has done more damage by this letter to the righteous cause of labor than he will ever be able to make right again if he should live to be a hundred years old and devote every hour of the day to make right his wrong. [Applause.]

GREEN'S LETTER RETARDS LABOR'S CAUSE

Mr. Chairman, I recognize most painfully the fact that when we, the Members of Congress, working in a righteous cause of labor and the farmer, go home to our districts and meet our constituents once more we will have to go back many years and begin all over again to create an understanding and cement together once more the combined efforts of the farmer and the laborer.

OPPOSITION TO FRAZIER-LEMKE BILL ONLY ONE-HALF PERCENT

But I heard another speech this afternoon on the floor of this Congress that made me happy. It was the message delivered by my friend the gentleman from Texas [Mr. JONES], chairman of the Agricultural Committee, who appeared in opposition to our bill. I had expected to hear opposition from him, but I am glad to note that no such opposition developed. There is only a half a percent in interest difference between the gentleman from Texas [Mr. JONES] and myself so far as the Frazier-Lemke bill is concerned, and I believe he stated that even this little difference might be reduced somewhat. [Applause.]

UPHOLDING THE DIGNITY OF LABOR

Mr. Chairman and fellow Members of the Committee, I pause for just a moment. I can hardly realize that at last this long-anticipated moment, this coveted opportunity has come. For many years at home I have been waiting and hoping and longing for this wonderful opportunity, when I would be permitted to stand upon the floor of this Congress and uphold the dignity of labor and the farmer and plead their righteous cause. I can hardly realize that this most coveted time has at last arrived. What a wonderful realization it is, my friends. What a privilege it is.

THE TORCH OF REASON OUR ONLY GUIDE

Coming from downtown this morning, I read once more that outstanding inscription carved on the cornerstone of the Archives Building, those three most important words, "Past is prelude." Yes; truly the past is the prelude to the future. It is out of the past, my friends, that we must find the retrospect that shall shed light into a dark and unknown future. It is out of the past that we must gather the criteria that will guide us knowingly and intelligently into the future along unknown paths. These criteria, my friends, are the only guidance we have—they are the very oil in the torch of reason, that wonderful, dependable torch of reason, that infallible guide which can be extinguished by only one power, and that is by the poisonous winds of prejudice. Prejudice, my friends, unknowingly perhaps, developing in the mind without a realization, that causes a Congressman to become a rubber stamp, following, perhaps blindly, in the leadership of some other man, or following some old dogmatic theory simply because it is old and has been used for hundreds of years. Prejudice—the stumbling block in the way of human progress. It warps the brain of men and sears the conscience and destroys the great institutions of civilization. Remorseless prejudice—it wipes from the earth today nations as it has in the past and covers them with a mantle of dust, giving only a yellow page in the history of countries that were once and are no more.

Prejudice—that is to the brain as poison to the body and sin to the soul. It was prejudice that in its effort to extinguish the torch of reason cast Galileo into a dungeon to die with thousands of others because they dared to proclaim the sound philosophy that the sun did not revolve around the earth but that the earth revolved around the sun, a philosophy that had been prohibited by the church and its horrible inquisition for hundreds of years. It was prejudice, my friends, in its effort to extinguish the torch of reason, that cast Christopher Columbus into prison because he dared to say the world was round, contrary to an old philosophy that had for centuries proclaimed the world was flat, dictated by ignorance. It was prejudice in its effort to extinguish the torch of reason that gave to Socrates the cup of poison hemlock as a reward for the great knowledge and wisdom he had given to the world. Prejudice, my friends, that in the morning of that fateful day whispered into the ears of Pilate, "Crucify Him. Crucify Him because he dares to propound a new religious philosophy that recognizes the worthy weak as against the greedy strong." Prejudices, pervading the atmosphere in this Chamber, that cries out today like a Joshua of old, when he said to the sun and the moon, "Stand still; stand still while I destroy humanity and murder the children and the mothers and the fathers and devastate the land." So prejudice whispers into the ear of the Senate and the House of Representatives today, like the Joshua of old, "Stand still while I destroy the homes of the Nation, while I destroy by foreclosure 256,000 farm homes, evicting the children and the fathers and the mothers. Stand still, O Congress of the United States, while we devastate and destroy homes that are God's sacred sanctuary on earth to man." Homes that are the very units of the foundation of our Government, without which our great Government will be destroyed, distintegrate and rot away, as have other nations of the past. The homes, my friends, wherein is molded the disposition and character of your children and mine, that shall determine the welfare of our great Nation, the Nation we love.

ENEMIES OF THE FRAZIER-LEMKE BILL

The Frazier-Lemke bill, my friends—the bill we are considering today—is all-important; and the enemies of the Frazier-Lemke bill were not satisfied with the title Frazier-Lemke bill, so they took the word "inflation", and they dipped this word into the poison cup of hemlock, such as had been handed to Socrates, and when they had steeped this word in poison distributed it through the radio and the public press and so wafted it into the minds of the American people they added it to the title and called it the Frazier-Lemke inflationary bill, stressing the danger of inflation that would raise the price level of labor and the farmer—the only thing and the only plan that ever can raise the price level of the farmer's products and the laboringman's salary. If they wanted to add to the name "Frazier-Lemke", why did not they call it the Frazier-Lemke home-building and home-protection bill? That is the right name. Why did not they call it the Frazier-Lemke perfecting amendment to the Federal land bank, for that is truly what it is? And without that amendment the Federal land bank will be a hopeless failure, as at present it protects only the wealthy and the speculators and entirely ignores the holy mission for which it was created—that of home building and home protection to the tiller of the soil.

TWO FEDERAL REGIONAL BANKING SYSTEMS

(At this point Mr. BINDERUP took a pointer and, referring to a large map of the United States he had prepared and placed before Congress, continued.)

Mr. BINDERUP. I have a map here before me that I have prepared in order to give you, my fellow Congressmen, a vision of the banking system of the United States.

The blue network (blue lines) on this map is descriptive of the Federal land bank; the red network (red lines) on the map is descriptive of the Federal Reserve banks. We have 24 Federal regional banks in the United States. Twelve of these are Federal land banks; they are the farmers' banks. Twelve of them are the Federal Reserve banks; they are the bankers' banks. Now, the only thing the Frazier-Lemke bill asks is that you will give to the 12 Federal land banks—the farmers' banks—the same rights that

you give to the 12 Federal Reserve banks—the bankers' banks. [Applause.] My friends, that is all there is to the Frazier-Lemke bill. Why should I continue for 30 minutes on the floor when this is all there is—and who dares deny the righteousness of this request?

FEDERAL LAND BANKS 100 PERCENT GOVERNMENT BANKS

The Federal land bank is purely 100 percent Government controlled. The Federal Reserve banks are purely and 100 percent privately controlled by member banks whose stocks are owned by foreigners to a great extent—in England, Italy, Germany, and France, primarily—as well as owned by American citizens. Now, the only thing that the Frazier-Lemke bill asks is that you will give the farmers' banks that are Government owned and controlled the same rights and privileges that you give to the Federal Reserve banks that are foreign and domestically owned and controlled. That is all there is to the Frazier-Lemke bill, and who dares to stand up in this audience and say there is anything unjust or unfair about this?

The Federal land bank is the largest financial cooperative agricultural institution in the world, although it has been in existence for only 20 years. It has 5,034 national farm-loan associations scattered in practically every county in the Nation. It has 650,000 farmer borrowers and stockholders. It has deposited in Washington $113,000,000 of the farmers' money, and they say to Uncle Sam, "We guarantee each other's obligations to the extent of 5 percent of the mortgage value of our land. If our neighbors fail to pay you, Uncle Sam, for their interest, insurance, or taxes, you can draw on this fund of ours of $113,000,000, as we want to protect you in every way, Uncle Sam. We have mortgaged our farms, the greatest and best farms and farmers and farm homes of the Nation, in order to secure you so that you will never lose a cent. We borrowed $90,000,000 of you, Uncle Sam, in 1916; up to the time of the depression in 1933 we had paid you back every cent except $50,000, thus showing our ability and desire to treat you right, and that is more than your other borrowers are doing for you. We have left the management entirely to you, Uncle Sam." The President of the United States appoints the Governor in Washington, who is the sole dictator of the whole system, who appoints 5 directors in each one of the 12 regional banks, as well as his own personal agent, thus making 6 representatives of the Government in every regional bank; and the farmers of 48 States, all the farmers, elect only one to represent the farmers' interests in each one of the banks. All the authority is the Government's, and even though we pass this bill the Government could at any time increase or decrease the amount of the $3,000,000,000 we ask, as Congress sees fit.

There is no greater security on God's green earth than Federal land-bank mortgages, where every farmer in the Nation guarantees his neighbor's indebtedness to the extent of 5 percent of the mortgage value of his own land. Even if our entire Nation should some day be conquered by a foreign foe and the entire Government be changed, and our Government bonds be worthless, the Federal land-bank mortgages on the homes of the Nation would still be worth 100 cents on the dollar. This is the kind of security we propose to give you, Uncle Sam, if you will just treat us the same as you treat the bankers. We do not ask as much, even. You are only charging the bankers 30 cents a thousand for the use of your credit and your Federal Reserve notes. We are willing to pay you 50 times more than the bankers pay you. We want to pay you 1½ percent interest, or $15 per thousand. Is there a Congressman within the hearing of my voice who will stand up and say that this is an unfair demand on the part of the farmers of our Nation?

FEDERAL RESERVE BANKS NOT GOVERNMENT BANKS

Now, I want to show you what kind of security, as a matter of comparison in the Federal Reserve Banking System, the bankers' banks, are offering Uncle Sam as security or basis on which to issue Uncle Sam's money, the Federal Reserve notes. I wish first to state, however, that I have been actively associated with the Federal land bank since 1917 as a borrower and stockholder; that I am very familiar with the entire Federal land bank system from the time when you write out the application with individual farmers, passed by the local national farm-loan associations, passed on to the Federal land banks, loans, obligations, or mortgages as sent on to Washington, placed with the Farm Credit Administration and consolidated bonds issued thereon; the formation of the Federal Farm Mortgage Corporation in 1933 that handled $700,000,000 of these bonds, whereon the farmers pay 4½ percent. The Government is selling these bonds with as low as 1½-percent interest, thus dealing on a 300-percent margin. I want to add I am very familiar with the Federal Reserve Banking System of the United States, and in order that I might qualify to stand before you here, my fellow Congressmen, I spent a great deal of time with members of the Federal Reserve Board at the last session of Congress; I remained in Washington last year until the latter part of September, believing as I did that a Congressman, a true representative of the people, is not made by an election, but is made by devotion and sincerity to his work, and that knowledge is light and wisdom is power. Therefore I became acquainted with the different departments of our Government, and most especially with the Federal Reserve Board of the Federal Reserve bank. I knew and understood that the Federal Reserve System of the United States is more powerful than our Government. And I just wanted to know how it happened.

WHAT BACKING HAS FEDERAL RESERVE MONEY?

Mr. BARRY. Mr. Chairman, will the gentleman yield?

Mr. BINDERUP. No; I cannot yield as my time is so limited. I just explained to you that the red network on this map represents the Federal Reserve System, the bankers' banking system of the United States. Can you imagine what the money of the Federal Reserve System of the United States is based on? In your wildest imagination, in your strangest fancies, in your vaguest dreams, can you imagine what is back of this Federal Reserve bill I am holding in my hand? No; you cannot; that is impossible. There is not a single soul in the world who knows what is back of this currency. A million inspectors would not be able to trace back and find the substance back of this Federal money. I asked a member of the Federal Reserve Board of the Federal Reserve bank in Washington and they told me they did not know, as all the paper back of Federal Reserve currency was held in the 12 private Federal Reserve regional banks; and that they, the Federal Reserve Board here in Washington, never did see the security nor even the paper representing the security, but merely took the word of the chairman of the class C directors of these banks, who acts in a dual capacity, and is also the Federal Reserve agent of the Federal Reserve Board. In other words, the buck was passed to the Federal Reserve regional banks. I undertook to run this matter down last summer during vacation and managed to meet a former director of one of the Federal Reserve regional banks. I asked him what was back of this Federal Reserve money in the way of substance, and he said they—the directors of the Federal Reserve banks—really did not know, as they never saw any of the security, but took the word of the directors of the member banks of the Federal Reserve System. In other words, he passed the buck. So I managed to meet the president of one of the member banks of the Federal Reserve System, and I asked him what was back of this Federal Reserve currency they had rediscounted with their regional Federal Reserve bank, and he replied, "Well, I do not really know; I only take the word of my customers." He had really never seen the security and did not know what the security was. In many cases there was no security—only the promise of some individual to pay. And so, in reality, I would have to hunt up the individual. In other words, they passed the buck; and, as I said, a million inspectors working overtime could never find the real substance security back of this Federal Reserve currency.

FEDERAL RESERVE MONEY BASED ON STOCK GAMBLERS' PAPER OF WALL STREET

But suppose we all make a few guesses. Let me guess first. I will tell you what might be back of this Federal Reserve currency, this bankers' bank money. Oh, it might

be some more Insull bonds such as the bankers' Federal Reserve banks financed so he could pyramid his stock and sell holding-company stock, mostly 99 percent water. Oh, yes; the Federal Reserve banks financed all the gamblers of Wall Street in 1929, boosted their stock to the sky by furnishing plenty of this Federal Reserve currency such as I hold in my hand; then all at once said, no; no more; and took the money away from them, and down crashed all bonds and stocks flat, just as they left the farmers flat in 1920. I pause once more and ask you to explain, if you can, why you financed Wall Street gamblers in this manner in 1929, and you are doing the same thing this very minute, and still refuse to vote for the Frazier-Lemke bill that provides for issuing our Federal Reserve money on the farms of the Nation, the greatest security on earth, and strictly a Government function. You do not cry "inflation" when we finance the crooks of the Nation and give them the right to inflate two hundred billions; in fact, the sky is the limit. But when we ask you to finance the farmers' homes to the comparatively small amount of $3,000,000,000, you holler until you are hoarse; you stand on the floor of Congress and call us radical inflationists. Let me ask you, are we radical because we ask that the farmers, through their banking system, the Federal land bank, should have the same right as the bankers have through their Federal Reserve banks, or are you radical that demand a superior right for the bankers? You Republicans on this side of the aisle: I ask you, who are continually urging that we must stay by the Constitution of the United States—and I am with you in this—you accuse the Democrats of violating the Constitution. Then, why not be practical and insist that the function of issuing money must be returned to the Government as the Constitution provides in plain words:

Congress shall coin all money and regulate the value thereof.

That is plain English. Why do you not insist in this case that we take this privilege away from the Federal Reserve banks that have stolen this sacred right from our Government? You rejoiced when the Supreme Court found the farmers' A. A. A. unconstitutional, but when we plead to take our constitutional right to issue money away from the Federal Reserve Banking System, private banks, if you please, wherein the Government does not own one cent of stock, many of you fight against this constitutional provision and insist that the bankers must retain this superright.

FEDERAL RESERVE MONEY BASED ON LIMBURGER CHEESE OVER IN GERMANY

But let us go back to the Federal Reserve currency such as I hold in my hand, and guess again. Second, maybe it is a shipment of limburger cheese over in Germany that has not been shipped yet that some importer in the United States bought on 30, 60, 90, 120, or 180 days' time on acceptances, time drafts, notes, debentures, or other evidence of indebtedness—as all Federal Reserve currency is issued on debt—that readily finds its way into the notorious stock exchange of New York City, where it is bought at a discount by some member bank of the Federal Reserve, or perhaps by the Federal Reserve bank itself, as they buy paper direct. Thus it finds its way into the Federal Reserve Banking System of the United States, and Federal Reserve currency is issued thereon, such as this $20 bill I am holding in my hand. If I had a little more time, I would like to tell you, step by step, just how this is done. I hope sometime in the future I may have this privilege. Now, my friends, I pause again for a moment to challenge anyone to deny this statement.

FEDERAL RESERVE MONEY PRINTING-PRESS MONEY

Or it might be something else. I have a friend out in Nebraska whose business it is to churn butter. He sells this butter to buyers, foreign and domestic, and, as evidence of his customers' indebtedness to him, he accepts time drafts and sometimes notes whereto are attached certain contracts. He discounts this paper with his bank, which happens to be a member of the Federal Reserve System. The member bank sends this paper to the Federal Reserve Bank of Kansas City, and the Federal Reserve bank says something like this to the Federal Reserve Board in Washington: "We have a certain amount of paper that has been examined by the directors of our bank, O. K.'d by the chairman of our directors", who is now speaking to you in a somewhat changed personality, because he has now become the Federal Reserve agent of the Federal Reserve Banking System of the United States, so he speaks with governmental authority. He tells the Federal Reserve Board of the Federal Reserve bank to inform the Comptroller of the Currency to advise the Secretary of the Treasury to instruct the Bureau of Engraving and Printing to press an electric button and start the printing press going and to print a certain amount of Federal Reserve currency such as I hold in my hand here and send this printing-press money to the Kansas City bank to finance what? Oh, my friend's butter, which has not as yet been churned; the cows have as yet not been milked; the cows are probably not as yet fresh, and no one on God's green earth knows where the cows are. [Laughter and applause.] And on such imaginary transactions the Federal Reserve Bank of the United States issues the currency such as I hold in my hand, which reads "Federal Reserve note—Government of the United States will pay to the bearer."

A wonderful system, is it not? How would you like to have the privilege of issuing checks, stating on the check that your neighbor, John Jones, would pay to the bearer on demand? Well, that is exactly what the Federal Reserve does, issues checks on the United States Treasury, and we are supposed to believe that they have some security hidden away some place, God only knows where, and we just draw on an inexhaustible imagination, and so Uncle Sam issues his money based on such imaginary security. That is not all; I am going to take a little more time to tell you just exactly how another one of these transactions happened—one out of a million.

FEDERAL RESERVE MONEY BASED ON AL CAPONE'S WHISKY

Did you ever know that during the balmy palmy days of prohibition we financed Al Capone's bootleg whisky, that he shipped from Canada, with Federal Reserve money based on United States credit, through the Federal Reserve Banking System of the United States, money such as I hold in my hand here? I want to dwell a little on this transaction. First I want to tell you that this information was brought to me by a cashier in one of the banks of Chicago. I had also read something of the kind, but it seemed to me that this was going quite a way, to print money based on bootleg whisky. So I asked a member of the Federal Reserve Board if this could possibly be true. He replied, "There is no doubt whatever but what this paper would be eligible for rediscount in the Federal Reserve System, and undoubtedly your information is correct. We, of course, do not see the paper on which this money is issued, as it is retained in the 12 Federal regional Reserve banks; we take the word of the director of the bank, who is the Federal Reserve agent in each bank. And the Federal Reserve relies on the member bank who rediscounts the paper. They are only interested in the maker and endorser, as to their mercantile responsibility, and, of course, the paper is first class. The distiller in Canada is a millionaire and so is Al Capone. The paper is unusual, as it is collectible under two codes of law—first, against their net worth under the civil law, and, second, collectible under the criminal law. All anyone would have to do would be to whisper, 'Al, the paper is due. Come in and pay up or you and your distiller will go to jail.'" [Applause and laughter.]

I want to go into this transaction more in detail to show you step by step how the paper drifts into Washington as a basis of money issued. Those of you who are familiar with the Federal Reserve System will know that they are exercising many short cuts, but I am giving it to you step by step, such as it would be handled if they did not avail themselves of the short cuts. Al Capone orders a million dollars' worth of whisky from Von B—— & Son, distillers in Canada. He buys this probably on 60, 90, 120, or 180 days' time, always with renewal privileges if necessary. The Canadian distillery immediately sends acceptances, time drafts, notes, or

other evidence of Al Capone's indebtedness to their correspondent bank in Chicago who advises Al Capone to come in and sign this paper. The member bank buys this paper, usually at a pretty good discount because there is plenty of profit in the whisky business. A dollar does not mean a whole lot to them. When the member bank rediscounts this paper with the Federal Reserve Bank of Chicago, the Federal Reserve bank directors examine this paper under the direction of the class C director. He O. K.'s the transaction. He takes this paper in his hand and steps across the aisle into another room and lo and behold the transformation. A modern Dr. Jekyll and Mr. Hyde. Passing into the other room he now becomes the agent of the Federal Reserve Banking System of the United States; clothed in governmental power he calls up the Federal Reserve Board of the Federal Reserve bank in Washington and talks to them something like this: "I have a million dollars' worth of good paper that is eligible under the Federal Reserve Act as a basis for issuing money. Send me a million dollars at once." And the Federal Reserve Board in Washington takes his word for it and phones to the Comptroller of the Currency, Mr. O'Connor, who instructs the Secretary of the Treasury, Mr. Morgenthau, to inform the Bureau of Engraving and Printing to touch a certain electric button and the printing presses start running and grind out a million dollars' worth of Federal Reserve currency such as I hold in my hand, and send this printing-press money to the Federal Reserve Bank of Chicago, Ill., and thus Uncle Sam finances Al Capone's whisky and all the farmers ask is the same consideration Al got and will pay 50 times more for the same privilege. [Applause.]

Going over this transaction with a member of the Federal Reserve Board, he explained to me that his Board were cutting out all of these steps now and that they were printing hundreds of millions of dollars of this currency in advance, and sending millions to each one of the Federal Reserve regional banks so they could just help themselves and they would not have to ask the Federal Reserve Board for any money.

FALSE REASONS FOR DEPRESSIONS

My friends, do you hesitate to believe me? I do not blame you if you do. You did not think the Federal Reserve Banking System and the monetary system of the United States were so rotten, did you? And you wonder why we have panics, depressions, and hundreds of thousands are losing their homes. You did not understand, did you? No; the enemies in this case told you that it was God Almighty that was doing this, and that it was He who visited this curse upon humanity every few years. They called it cycles, and they said it just could not be helped. They said it was because there was too much machinery. Yet we have had many panics before, way back in 1837, one of the most severe panics, and there was not any machinery in existence at that time. Then they told you that it was the tariff, but the Republicans gave us all the high tariff they could and the Democrats are in power right now, and if they believe it, they could give us free trade any minute they wanted to. They said it was because there was too much labor. Yet in 1929—that is only 7 years ago—labor was so scarce you could hardly hire a man, especially mechanics in the various lines. Yes, the enemies through the public press and the radio will tell you all these things. And then they will say it was the war, but we had prosperity for 11 years after the war, and every thinking man knows this is not true. They told us that it was overproduction—that we raised too much—and yet 10,000,000 people are hungry and 50,000,000 people would fain have more. They say we went too fast, and that the Nation overbuilt its homes, and yet millions of people are without homes. They said we had lived too fast and bought too much, while we know the farmers and the laboring people scarcely have enough clothes and are living without the great conveniences to which they are entitled in a civilized nation with endless resources and endless credit. They say it is because we have gone into debt too much, and yet, my friends, analyze the monetary system of the United States and you will know that all of our money is based on debts. And if we should pay our debts and thereby take 90 percent of our check-book money out of circulation the price of a good farm will go down to less than a dollar an acre.

You have wondered about our monetary system, have you not? But you have also wondered why we are starving to death in the midst of plenty. Examine and you will find that the two are positively and absolutely linked together. They say the monetary system is difficult to understand. My friends, believe me when I tell you that anyone who could learn his multiplication tables can much easier understand the monetary system. There is nothing difficult about it.

USING UNITED STATES CREDIT TO FINANCE ARGENTINE WHEAT

In conclusion, just one more example of what this treacherous money can do, such as I hold in my hand, the Federal Reserve currency, issued by the Federal Reserve Banking System of the United States. Just a short time ago an exporter of wheat in Minneapolis received an order for a million dollars worth of wheat to be shipped to England. He investigated the markets and found he could buy this wheat for a small fraction of a cent, because of freight rates, cheaper in Argentina than he could buy it in the United States. He made a small deposit on the wheat, and through the same system as described in former cases, through obligation of the English importer, evidenced in time drafts, notes, or debentures that found its way into the stock exchange, or, perhaps, it was into the Federal Reserve Bank of Minneapolis. It traveled the same course as Al Capone's whisky paper, and thus we used the credit of the United States with these Federal Reserve notes to finance a shipment of wheat by an American exporter from Argentina to England, and used the credit of the United States in competition with our own farmers. [Applause.]

LIKE CHILDREN GROPING IN DARKNESS

Here in Congress, fellow Members, it seems to me we are like children groping in darkness. Why not pause for a moment and analyze the situation? I know we all believe in cause and effect. Let us find out the reason we fell from the highest plane of prosperity to the lowest level of depression, starvation, and misery; and knowing the cause we are sure to find the remedy. They have said that we should go out on an experimental stage—and God knows we have been there. Maybe, however—maybe if we keep groping along in darkness long enough, and all the blind alleys have finally been closed, we will then discover the right cause and all work together in the right alley. Believe me, my friends, it is the control of our monetary system that we lack, that measures the sweat of the brow of man by its own abundance—meaning its own abundance of money in actual circulation, not locked up in bank vaults. It might as well be in the bottom of the Atlantic Ocean. And the Frazier-Lemke refinancing of farm mortgages is the first step in the right direction. [Applause.]

The CHAIRMAN. All time has expired. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That this act shall be known by the title "The Farmers' Farm Relief Act."

Mr. JONES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES: Page 1, line 3, strike out all of lines 3 and 4 and insert in lieu thereof the following:

"That this act may be cited as the 'Agricultural Bank Note Act.'

"AGRICULTURAL BANK NOTE COMMITTEE

"SEC. 2. (a) There is hereby created a committee to be known as the 'Agricultural Bank Note Committee' (hereinafter in this act referred to as 'the Committee') which shall be composed of the Secretary of the Treasury, the Governor of the Farm Credit Administration, and the Intermediate Credit Commissioner. Each of such officers may, at any time, authorize any officer or employee of the department or agency of which he is the head to act in his place as member of the Committee for such period and under such circumstances as may be fixed by him, and while so authorized such officer or employee shall have all the powers and duties of the member of the Committee for whom he acts, including the power of acting as chairman. The Governor of the Farm Credit Administration shall be chairman of the Committee and a majority of the Committee shall constitute a quorum.

"(b) The Committee shall have power, without regard to the provisions of other laws applicable to the employment and compensation of officers and employees of the United States, to employ and fix the compensation and duties of such agents, officers, and employees as may be necessary to carry out the powers and duties now or hereafter conferred upon the Committee, to require bonds of them and fix the penalties thereof, and dismiss them at pleasure. The rates of compensation of all such agents, officers, and employees shall not exceed the rates of compensation prescribed for comparable duties by the Classification Act of 1923, as amended. No member of the Committee and no person acting as a member shall receive additional compensation for such service but may be allowed actual necessary traveling and subsistence expenses when engaged in the business of the Committee outside the District of Columbia.

"(c) The Committee shall be entitled to the free use of the United States mails in the same manner as the executive departments of the Government. In carrying out its powers and duties, the Committee may, with the consent of any board, bureau, commission, independent establishment, or executive department of the Government, avail itself of the use of information, services, facilities, officers, agents, and employees thereof.

"(d) The Committee shall have power to prescribe the manner in which the obligations of the Committee shall be allowed and paid. The expenses of the Committee shall be paid out of the proceeds of assessments levied on the Federal Intermediate Credit Banks by the Committee. The Committee shall from time to time estimate the expenses of the Committee for such period as may be determined by it, and each such bank shall pay to the Committee, within 15 days after demand therefor, the amount which the Committee fixes, on such equitable basis as the Committee may determine, as the bank's proper share of such estimated expenses.

"(e) The powers conferred on the chairman of the Committee under this act shall be exercised in accordance with the policy determined by the Committee and subject to the general supervision and control of the Committee.

"(f) The Committee shall have power to make such rules and regulations as it deems necessary in carrying out the powers and duties now or hereafter conferred upon it.

"DISCONTINUANCE OF DEBENTURE ISSUE

"SEC. 3. No Federal Intermediate Credit Bank shall have authority, after 90 days after the date of the enactment of this act, to issue debentures under the provisions of section 203 of the Federal Farm Loan Act, as amended (U. S. C., 1934 ed., title 12, secs. 1041, 1042, and 1043; Supp. I, sec. 1041), except that if the Committee unanimously finds that the issuance of debentures by any Federal Intermediate Credit Bank is necessary to supply funds to such bank to supplement funds made available under this act, or to meet emergency needs of such bank, the Committee may, by unanimous vote, and with the approval of the President, authorize such bank to issue, under the provisions of such section 203, such amount of debentures as the Committee may prescribe. Notwithstanding any such authorization, no such bank may have outstanding at any one time debentures and other obligations issued under such section 203 in excess of 10 times the amount of the paid-in capital and surplus of such bank, nor have outstanding at any one time debentures and other obligations and notes in excess of 15 times an amount equal to the unimpaired capital plus the surplus of such bank. For the purpose of enabling any such bank to comply with the requirements of such section 203 relating to the giving of security for obligations incurred by it, the Committee shall authorize the release of the lien for notes provided in section 4 (b) on so much of the assets of the bank as may be necessary, but no such release shall be authorized if the effect of the release would be to reduce the fair book value of the amount of assets of the bank subject to such lien below an amount equal to the total face amount of outstanding notes issued by such bank.

"ISSUANCE OF BANK NOTES

"SEC. 4. (a) Upon application by any Federal Intermediate Credit Bank to the chairman of the committee, in such form as may be prescribed by him, such bank may be authorized by him to issue notes under the provisions of this act for any lawful purpose for which such bank may need funds. The chairman shall determine the needs of such bank for funds, the necessity of such contemplated note issue to meet such needs, and whether the requirements of this act will be complied with in connection with, and its purposes carried out by, such note issue, and, on the basis of such determination, shall grant such application in whole or in part or reject it entirely.

"(b) Such notes, when issued, shall be lawful money, shall be legal tender at their face value for all debts, public and private, shall be obligations of the United States and the issuing bank, and shall be a first lien on all the unpledged property, except cash, real property, and tangible personal property, of the issuing bank. Each Federal Intermediate Credit Bank shall be liable on the amount of notes issued by each other Federal Intermediate Credit Bank which is not paid after the assets of such other bank have been liquidated and distributed, and, in such case, the provisions of section 207 of the Federal Farm Loan Act, as amended (U. S. C., 1934 ed., title 12, sec. 1081), relating to unpaid losses of principal on debentures of the banks, shall apply with respect to notes issued under this act. The total amount of such notes which any such bank may have outstanding at any one time shall not exceed the fair book value of the unpledged property (not including tangible personal property or real property) of such bank, nor shall such total amount of notes, together with the total face amount of any debentures and other obligations of such bank which may be outstanding, exceed 15 times an amount equal to the unimpaired capital plus the surplus of such bank. The total face amount of such notes which all the banks may have outstanding at any one time shall not exceed two and one-half times the amount of the fund set aside as a reserve for such notes under section 5 (a).

"(c) Upon approval of any such application, the Comptroller of the Currency, on order of the chairman, shall deliver such notes to the Farm Loan Registrar of the land-bank district in which the issuing bank is located. The registrar shall hold the notes subject to delivery to the bank as required by it and shall be responsible for the safekeeping of such notes during the time they are in his custody.

"(d) In order to furnish suitable notes for issue under this act, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such notes of the denominations of $5, $10, $20, $50, $100, $500, $1,000, $5,000, and $10,000 as may be required to supply the issuing banks. The notes shall be in such form and tenor as shall be prescribed by the Secretary of the Treasury. The Secretary shall provide for identifying the issuing bank on the notes by a distinctive letter and serial number.

"(e) When such notes have been prepared they shall be deposited in the Treasury or in the Subtreasury or mint of the United States nearest the place of business of the issuing bank and shall be held by the United States for such bank subject to the order of the Comptroller of the Currency for their delivery as provided by this act.

"(f) The plates and dies to be procured by the Comptroller of the Currency for the printing of such notes shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the procuring of such notes, and all other expenses incidental to their issue and retirement, shall be paid by the committee. The examination of plates, types, bed pieces, etc., and regulations relating to such examination of plates, dies, etc., of national-bank notes provided for in section 5174 of the Revised Statutes (U. S. C., 1934 ed., title 12, sec. 108), are hereby extended to include notes herein provided for.

"RESERVES FOR NOTES

"SEC. 5. (a) The Secretary of the Treasury is authorized and directed to set aside in the Treasury and hold as a reserve for the notes of all banks authorized to be issued under this act the sum of $800,000,000 in gold of the standard of weight and fineness provided in accordance with law on the date of the enactment of this act. The stabilization fund provided for in section 10 of the Gold Reserve Act of 1934 is hereby reduced by such amount.

"(b) The Committee shall require each issuing bank to maintain on deposit in lawful money (other than notes issued under this act) with the Treasurer of the United States a sum sufficient, in the judgment of the Secretary of the Treasury, to meet demands for redemption by the Treasurer of notes issued under this act by such bank, but in no event less than 5 percent of the total amount of such notes issued by such bank which are outstanding. Such deposit shall be considered property of such bank for the purposes of determining the amount of notes which such bank may have outstanding under this act.

"(c) The Committee shall require each issuing bank to keep on hand at all times in other lawful money a sum sufficient, in the judgment of the chairman of the Committee, to meet demands for redemption at the issuing bank of notes issued under this act by such bank, but in no event less than 5 percent of the total amount of such notes issued by such bank which are outstanding. Such sum shall be considered property of such bank for the purposes of determining the amount of notes which such bank may have outstanding under this act.

"REDEMPTION OF NOTES

"SEC. 6. Notes issued under this act shall be redeemed in other lawful money upon demand at the Treasury Department of the United States in the District of Columbia, by the Treasurer of the United States, or at the bank issuing the notes. Redemption shall be in such kind of lawful money as may be determined by the redeeming agency. In the case of redemption at the Treasury, the amount required for redemption shall be paid out of the deposit for such purpose maintained by the issuing bank or, if such deposit is inadequate, the amount, upon direction of the Secretary of the Treasury, may be paid, in whole or in part, out of the deposit of any other issuing bank or banks. The issuing bank shall, upon demand by the Secretary of the Treasury, restore the amount of its deposit, or the deposit of any other issuing bank, as the case may be, for the amount of any redemption at the Treasury of notes issued by such bank.

"RETURN, RETIREMENT, AND CANCELATION OF NOTES

"SEC. 7. (a) Whenever notes issued under this act by one bank are received by any other issuing bank, the receiving bank shall promptly return such notes to the issuing bank for credit or redemption, or upon direction of the issuing bank, shall forward such notes direct to the Treasurer of the United States to be redeemed. The Committee is authorized to require any Federal Reserve bank to present notes issued under this act to the bank of issue or to the Treasurer of the United States for redemption, at any time, and in such amount as the Committee deems necessary to carry out the purposes of this act.

"(b) Notes issued under this act received by the Treasurer of the United States otherwise than for redemption shall be returned to the bank of issue for the credit of the United States.

"(c) Any issuing bank may at any time reduce its liability for outstanding notes issued by it by depositing with the Secretary of the Treasury notes issued by it or other lawful money.

"(d) Notes returned to the issuing bank under this section, redeemed by the issuing bank, or deposited with the Secretary of the Treasury under subsection (c) shall not be reissued except upon compliance with the terms of an original issue.

"(e) The Secretary of the Treasury is authorized and directed to prescribe regulations governing the return of notes to the issuing bank and the cancelation and destruction of notes unfit for circulation and preventing reissue of notes except upon compliance with the terms of an original issue.

"FEDERAL RESERVE BANKS AS AGENCIES

"SEC. 8. The several Federal Reserve banks, upon the request of the committee, any bank authorized to issue notes under this act, any Farm Loan Registrar, or the Comptroller of the Currency, are authorized and directed to perform such services (including acting as depositories and fiscal agents) in connection with the execution of the powers and duties conferred on the requesting agency under this act as may be requested by such agency and shall for such services receive such compensation as may be agreed upon.

"LOANS TO LAND BANKS BY INTERMEDIATE CREDIT BANKS

"SEC. 9. Effective 90 days after the date of the enactment of this act, the Federal Farm Loan Act, as amended, is amended by inserting at the end of section 202 (a) thereof the following new paragraph:

"'(4) To make loans or advances direct to any Federal land bank on the security of direct obligations of the United States, Federal Farm Mortgage Corporation bonds, consolidated Federal land bank bonds, Federal land bank bonds, or other security approved by the Governor of the Farm Credit Administration. The limitations on maturity of loans provided in section 202 (c) of this act and the provisions of section 204 (b) of this act (relating to rates of interest charged original borrowers) shall not apply with respect to loans or advances made under this paragraph.'

"INTEREST AND DISCOUNT RATES

"SEC. 10. (a) Effective with respect to loans and discounts made by Federal intermediate credit banks after 90 days after the date of the enactment of this act, section 204 (a) of the Federal Farm Loan Act, as amended, is amended to read as follows:

"'SEC. 204. (a) The Intermediate Credit Commissioner, with the approval of the Governor of the Farm Credit Administration, shall fix the discount rates and interest rates to be charged by Federal intermediate-credit banks. Different rates may be fixed for different banks and for different classes and maturities of loans and discounts made by the same bank.'

"(b) Effective with respect to loans made after 90 days after the date of the enactment of this act by the Central Bank for Cooperatives and the banks for cooperatives, section 8 (a) of the Agricultural Marketing Act, as amended by section 54 of the Farm Credit Act of 1933, is amended to read as follows:

"'SEC. 8. (a) Loans to any cooperative association shall bear such rates of interest as may be prescribed by the Cooperative Credit Commissioner, with the approval of the Governor of the Farm Credit Administration. In fixing such rates of interest the Commissioner shall fix such rates as he deems the needs of the lending agencies require, and different rates may be fixed for different banks and for different classes and maturities of loans made by the same bank.'

"CHARTERS AND BYLAWS

"SEC. 11. Such changes as are necessary in order to make the charters and bylaws of corporations affected by this act conform to the provisions of this act are hereby expressly authorized to be made.

"FEDERAL FARM MORTGAGE CORPORATION AS DEPOSITORY

"SEC. 12. Any corporation organized under (a) the Federal Farm Loan Act, as amended, (b) the Farm Credit Act, as amended, or in which a production-credit corporation organized under such act holds stock, or (c) section 201 (e) of the Emergency Relief and Construction Act of 1932, and any receiver of any of the foregoing corporations is hereby authorized to deposit funds with the Federal Farm Mortgage Corporation, which is authorized to accept such deposits upon such terms and conditions as may be prescribed by it, except that interest rates paid on the various classes of deposits shall be subject to the approval of the Secretary of the Treasury. The Federal Farm Mortgage Corporation is authorized to invest such deposits in such manner as is authorized by law in the case of other unobligated funds of the Corporation.

"INTEREST RATES ON LAND-BANK LOANS

"SEC. 13. (a) Section 13 of the Federal Farm Loan Act, as amended (U. S. C., 1934 ed., title 12, sec. 781), is amended by adding at the end thereof the following new paragraph:

"'Seventeenth. In the case of any loan on mortgage made after the date of the enactment of the Agricultural Bank Note Act, and, in the case of loans made on or prior to such date, with respect to interest payments payable on installment dates occurring after such date, the rate of interest on so much of the unpaid balance of the loan as does not exceed $5,000 shall not exceed 2 percent per annum.'

"(b) The second sentence of section 7 of the Federal Farm Loan Act, as amended (U. S. C., 1934 ed., title 12, sec. 723), is amended by inserting before the period at the end thereof a comma and the following: 'or, in the case of any such direct loan made after the date of the enactment of the Agricultural Bank Note Act, and, in the case of direct loans made on or prior to such date, with respect to interest payments payable on installment dates occurring after such date, one-half of 1 percent in excess of the rate provided in paragraph "seventeenth" of section 13 on so much of the unpaid balance of the loan as does not exceed $5,000.'

"(c) Paragraph 'twelfth' of section 12 of the Federal Farm Loan Act, as amended (U. S. C., 1934 ed., title 12, sec. 771; Supp. I, title 12, sec. 771), is amended by inserting at the end thereof the following new paragraph:

"'The Secretary of the Treasury shall pay each Federal land bank, as soon as practicable after July 1, 1936, and after the end of each quarter thereafter, such amount as the Land Bank Commissioner finds is equal to the amount by which interest payments made to such bank, during the preceding quarter, are less, by reason of the rates of interest applicable under the provisions of paragraph "seventeenth" of section 13 and section 7 to unpaid balances, not in excess of $5,000, of mortgage loans, than interest payments would be without regard to such provisions; but in any case in which the Land Bank Commissioner finds that the amount of interest payable by such bank during any such quarter has been reduced by reason of loans and advances made to it by Federal intermediate-credit banks under section 202 (a) (3) of this act, as amended, there shall be deducted from the amount payable under this amendatory paragraph for such quarter the amount which the Commissioner finds is the difference between the amount which would have been payable for such quarter as interest on farm loan bonds of a face value equal to the amount of loans and advances on which such bank was obligated to Federal intermediate credit banks during such quarter under such section 202 (a) (3) and the amount of interest payable for such quarter on such loans and advances to such bank under section 202 (a) (3). There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to make the payments authorized by this amendatory paragraph.'

"INTEREST RATES ON COMMISSIONER LOANS

"SEC. 14. Section 32 of the Emergency Farm Mortgage Act of 1933, as amended (U. S. C., 1934 ed., title 12, sec. 1016; sup. I, title 12, sec. 1016), is amended by inserting at the end thereof the following new paragraph:

"'In the case of any first- or second-mortgage loan made under this section after the date of the enactment of the Agricultural Bank Note Act, and in the case of a loan made on or prior to such date, with respect to interest payments payable on installment dates occurring after such date, the rate of interest on so much of the unpaid balance of the loan as does not exceed $5,000 shall not exceed 2 percent per annum. Whenever a borrower obligated under a second-mortgage loan made under this section is also obligated under a first-mortgage loan made under this section, or under a first-mortgage loan made by a Federal land bank the interest rate on the unpaid balance, not in excess of $5,000, of which is determined under section 13 of the Agricultural Bank Note Act, the reduced interest rate provided in this paragraph shall apply to an amount of the unpaid balance of the second-mortgage loan equal to the amount by which the unpaid balance of such first-mortgage loan is less than $5,000, and this sentence shall apply regardless of the priority in the time of making such first- and second-mortgage loans.'"

Mr. BOILEAU (interrupting the reading of the amendment). Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOILEAU. I would ask the gentleman from Texas if this is the bill known as H. R. 7593?

Mr. JONES. Yes. I do not care to have it read.

Mr. Chairman, I ask unanimous consent that further reading of the amendment may be dispensed with, but that it be printed in the RECORD at this point.

Mr. RANKIN. Mr. Chairman, reserving the right to object, very few of us know what the amendment is. We would like to hear it read. I object. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. RANKIN. Mr. Chairman, I make the point of order that the amendment is not in order for the simple reason that it is an entirely different bill, changes the legislation entirely, has an entirely different meaning and an entirely different import.

Mr. JONES. Mr. Chairman, I desire to be heard on a point of order.

The CHAIRMAN. The Chair will state that very little of the amendment has been read.

Mr. RANKIN. I reserve the point of order, Mr. Chairman.

Mr. BOILEAU. Mr. Chairman, I make the point of order.

The CHAIRMAN. The gentleman will state the point of order.

Mr. BOILEAU. Mr. Chairman, I make the point of order that the amendment is not germane to the bill or to this section of the bill, that it provides an entirely different method of refinancing farm-mortgage indebtedness, that it has no relationship to the bill under consideration, and is not a proper amendment to the bill or the section. I desire to be heard on the point of order.

The CHAIRMAN. The gentleman from Wisconsin makes the point of order that the amendment is not germane. The Chair has now read the amendment. The Chair will be glad to hear the gentleman from Wisconsin on the point of order.

Mr. BOILEAU. Mr. Chairman, I call the attention of the Chair to a ruling of a former Speaker of the House, Mr. Rainey, when the Emergency Farm Credit Act of 1933 was under consideration in this House.

That was on April 13, 1933. Mr. Rainey was in the chair, and, as I stated before, the House was considering the Emergency Farm Mortgage Act of 1933, which was a bill that provided for a very definite method of refinancing farm-mortgage indebtedness. The bill then under consideration was finally enacted into law and is now known as the Emergency Farm Mortgage Act, or the law which amended the Federal Land Bank System to authorize the loans which have been made to the farmers during the present administration.

At that time the gentleman from Texas [Mr. JONES] was in charge of the bill, being chairman of the Committee on Agriculture, the position he now occupies. At that time I offered the identical bill that we are now considering, the Frazier-Lemke bill, as a substitute to that bill. The bill then being considered provided a very definite means of refinancing farm-mortgage indebtedness. It occurred to me at that time, Mr. Chairman, that because of the fact we were considering the question of farm-mortgage refinancing it would be germane to offer as a substitute the so-called Frazier-Lemke bill, which was another bill providing for the refinancing of farm-mortgage indebtedness. I was very firmly convinced at that time that I was right. However, Mr. Chairman, the gentleman from Texas [Mr. JONES] made such a convincing argument at that time, when the situation was just the reverse of what it is now, that the Chairman of the Committee of the Whole and later on—when a motion to recommit was offered—Speaker Rainey ruled that, although both related to the question of refinancing farm mortgages, they provided separate, distinct, and entirely different methods and means of raising money, and different administrative features, and therefore that my amendment was not germane.

Mr. Chairman, I submit that the situation today is identical with the situation that existed at that time, except that now the positions of the gentleman from Texas and myself are reversed. May I call the attention of the Chair to the language of the ruling made by Speaker Rainey at that time? He said:

> The question presented has been passed upon two or three times and presents nothing new. The bill under consideration provides a method of farm relief, essentially by the issuance of bonds, to be marketed in the ordinary way. The Frazier bill, which is the subject of the motion to recommit, provides also for farm relief, also for bond issues, and, in addition to that, provides a method of meeting the bond issues by currency, printed and issued, clearly inflation, which may amount to as much as three and a half billion dollars. The two methods are as wide apart as the poles.

In making his decision he called attention to a ruling of the Chair in 1924 when the McNary-Haugen bill was up for consideration. It appeared that Mr. Rainey, before he became Speaker, offered an amendment to the McNary-Haugen bill, and thought because both dealt with farm relief—and I took the position that both dealt with farm relief—the amendment which he offered would be germane. In his ruling of April 13, 1933, he mentions the fact that in 1924 he was firmly convinced that his position was correct, but that, as a matter of fact, the precedents of the House were against him. When he ruled, as Speaker, on this point of order in April 1933, he followed the precedent established when a point of order was sustained against the amendment he offered in 1924.

He referred also to a decision made by the gentleman from Michigan [Mr. MAPES] in 1929 when he was Chairman of the Committee of the Whole and in which the gentleman from Michigan followed the same precedent. It is interesting to note the language of the gentleman from Michigan in his decision, a part of which reads as follows:

> However, it is not possible to offer a substitute for a bill which undertakes to give the same relief and yet departs entirely from the method of the bill under consideration.

As I previously stated, that is the language of the decision of the gentleman from Michigan, Mr. MAPES. Similar language appears in the decision of the gentleman from Texas, Mr. SANDERS, in 1924, and in the decision of Mr. Rainey in 1933. The situation today, I submit, Mr. Chairman, is identical.

In the Jones bill, which is offered here as a substitute, the Chair will notice that on page 5 there is a subtitle "Issuance of bank notes." On that page the bill reads:

> Upon application by any Federal intermediate-credit bank to the chairman of the committee in such form as may be prescribed by him, such bank may be authorized by him to issue notes under the provisions of this act—

And so forth. This gives the Federal intermediate-credit banks additional powers. The bill under consideration does not deal with the Federal intermediate-credit banks at all and does not utilize such banks in providing the relief sought to be given farmers under the Frazier-Lemke bill. The intermediate-credit bank system is not referred to in the legislation under consideration at all. Therefore the amendment offered by the gentleman from Texas, which relates to the Federal intermediate-credit banks, is absolutely foreign to the legislation under consideration and is not a germane amendment.

As in 1933, both provisions relate to bonds, that is true, but both of them do not relate to the intermediate-credit bank system. The Frazier-Lemke bill relates to the Federal Reserve System and the Farm Credit Administration, and provides for the issuance of Federal Reserve notes, and therefore, an amendment is not germane to this bill that attempts to finance farm-mortgage indebtedness through the Federal intermediate-banking system.

Mr. Chairman, in conclusion, I submit that the decision made in 1933 by Speaker Rainey, ruling that an amendment to substitute the Frazier-Lemke bill for the Emergency Farm Credit bill was not germane, is on all fours with the proposition before us today, that and the arguments which were sound then are sound today and should prevail. I am satisfied, now, of the soundness of the ruling of Speaker Rainey. I confess, as Speaker Rainey did, at that time, that the passing years have taught me that I was in error. I am willing to rest my argument on that decision. The gentleman from Texas [Mr. JONES] is bound today as I was in 1933. Mr. Chairman, I again submit that the amendment is not germane because it provides an entirely different method of refinancing the farm-mortgage indebtedness of this country, and the point of order should therefore be sustained. [Applause.]

Mr. JONES. Mr. Chairman, I think the decision which Speaker Rainey made is the correct one, and I would not undertake to offer a bill like the original Farm Credit Administration Act as an amendment or as a substitute for this particular bill, but you will notice from the reading of the citation the gentleman from Wisconsin [Mr. BOILEAU] has just made that the distinguishing features that the then Speaker referred to as the reason for holding it out of order was the fact that the original Farm Credit Act did not provide for the issuance of any currency or any money, but simply for ordering a sale of bonds in the regular way, and ran the bills parallel up to the point where one did not provide for the issuance of Treasury notes while the other one did. Now, the particular bill I have follows and parallels that same point; in other words, it is just a little different method of approach to the same problem—I think a better method—but it differs in detail only, and the differences mentioned by the gentleman from Wisconsin are differences of detail.

I provide in this measure practically that 30 percent of the profit on the gold transaction should be transferred on the books of the Treasury to the credit of the 12 intermediate-credit banks. This 30 percent amounts to about $840,000,000. That this, plus the agricultural paper, shall be the basis of intermediate credit notes which shall have all the status and bearing of Treasury notes to the amount of $2,000,000,000. There is a difference in amount, but it covers the exact point of distinction made by the former Speaker.

The two bills provide for refinancing of farm mortgages, they both provide for a reduction of interest rates, and they both provide an issue of currency in connection with refinancing of farm mortgages. It extends the same privileges to the 12 land banks through the intermediate-credit system that is now had by the 12 Federal Reserve banks, with proper limitations. They also provide for the handling of the refinancing by the Farm Credit Administration. They parallel each other in the main essentials and they differ only in detail. There would not be any point in offering an amendment if it did not differ somewhat in its details.

Mr. Chairman, there is not anything in this bill that departs from the purposes of the Frazier-Lemke bill. It is true that the benefits of the refinancing provided in the measure I offer inures to the benefit of all the farmers in the land-bank system instead of a part of them, but does that make it not germane? My measure provides for the issuance of notes with the exact limitations and provides the same privileges for the Federal land bank that are now held by the Federal Reserve bank.

Mr. MOTT. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. MOTT. The gentleman states his bill is the same as the Frazier-Lemke bill?

Mr. JONES. The same purposes, refinancing at a lower rate of interest.

Mr. MOTT. It has been charged by opponents of the Frazier-Lemke bill that the bill is inflationary. The gentleman is one of the opponents of the Frazier-Lemke bill; is the gentleman admitting that his bill also is inflationary?

Mr. JONES. I do not admit that mine is inflationary, because I have avoided that by going exactly to the same methods and putting it on the same rock-bottom basis that is used for financing Treasury notes, to wit, 40 percent of gold and 60 percent of commercial paper. I take 40 percent of gold and 60 percent of farm paper, which makes it exactly the same basis of issue, with the same method of control. If one is sound, the other is sound. If the one for the Federal Reserve is noninflationary, then this is noninflationary. This is a carefully drawn measure, and I have had a great deal of help in drafting the mechanics of the bill. I think it is sound, I think it is fair; it inures to the benefit of all the farmers, and I regret exceedingly that the gentleman from Wisconsin has seen fit to make a point of order, but I insist there is a vast difference in holding the Frazier-Lemke bill out of order when offered as a substitute for the original Farm Credit Act and holding this amendment out of order as a substitute for the pending bill.

Mr. BOILEAU. Mr. Chairman, if the Chair will hear me further, I wish to call the attention of the Chair to one other distinguished authority, the opinion of a great parliamentarian. I want to refer to the CONGRESSIONAL RECORD of last Friday, in which the distinguished chairman of the Rules Committee of the House of Representatives, a man who is undoubtedly familiar with the rules of the House and the precedents and has served here a long time. In an extension of his remarks in the RECORD the gentleman from New York [Mr. O'CONNOR] states as follows, in referring to the Jones bill:

> H. R. 7593 is "a bill to facilitate the extension of agricultural credit at lower interest rates by providing for the issue of certain bank notes, and for other purposes." Again, unfortunately, however, this bill cannot be offered as an amendment to the Frazier-Lemke bill, because it is not germane and would be ruled out on a point of order, and it is well known that the proponents of the Frazier-Lemke bill will oppose any amendment offered to their measure.
>
> [Applause.]

I submit, Mr. Chairman, that the opinion of the chairman of the Rules Committee should be given great weight and consideration, especially in view of the great interest he has taken in this legislation and also because of the great interest he has shown with reference to the parliamentary procedures to be followed in the consideration of this bill.

The CHAIRMAN (Mr. WOODRUM). The Chair is ready to rule.

The bill under consideration (H. R. 2066), known as the Frazier-Lemke bill, as stated in its title, is for the purpose of refinancing agricultural indebtedness at a reduced rate of interest, and so forth, through the medium of the Farm Credit Administration and the Federal Reserve Banking System.

To that, as a substitute, the gentleman from Texas [Mr. JONES] offers an amendment containing the provisions of the bill H. R. 7593, which has for its purpose to facilitate the extension of agricultural credit at a lower rate of interest, and so forth, through the medium of a committee known as the agricultural bank note committee.

The gentleman from Texas having notified the committee that he intended to offer his bill as a substitute, for which the Chair is grateful, the Chair has had an opportunity to examine the amendment and to give it some consideration in collaboration with the Parliamentarian of the House.

Of course, the point of order is directed to the amendment because it is alleged that it is not germane. The Chair will read very briefly from Cannon's Precedents, volume 8, section 2912, which states the fundamental principle of germaneness:

> The mere fact that an amendment proposes to attain the same end sought to be attained by the bill to which it is offered does not render it germane.

Again:

> To a bill designed to raise the price of agricultural products to a ratio consistent with the price of other commodities by the creation of a corporation authorized to deal in such products, an amendment proposing to accomplish the same results through a comprehensive system of cooperative marketing was held not to be germane.

The Chair is also familiar with the quotations from the rulings of Mr. Sanders, a very distinguished former Member of the House and Parliamentarian, which are found in the same volume in section 2912, which the Chair will not repeat. The gentleman from Wisconsin has read them.

Paradoxically as it may seem, the question arose between the two distinguished gentlemen who are now contending on opposite sides of the issue when the farm mortgage bill was before the committee for consideration on April 13, 1933. The gentleman from Wisconsin offered then the Frazier-Lemke bill as a substitute for that bill, and the distinguished and able gentleman from Texas [Mr. JONES] very vigorously and successfully presented a point of order and in apparently convincing logic addressed the Chair as follows:

> Mr. Speaker, in my judgment there can be no question that this motion is not germane to the measure before the House. True they both provide for refinancing of farm mortgages, but the Chair, of course, is familiar with the rule that in order to be germane all features of an amendment must be germane.

Again the gentleman said, speaking of his effort to make the amendment germane:

> The next year, I think it was, in an effort to get my proposition voted on, I took the pending bill, spent about 3 days writing all the provisions of the pending bill into the clocklike work of my bill in such a way that I thought the Chair would not be able to distinguish between them. I used the same sort of organization, the same officials, the same procedure, the same method of application, in an effort to bring the case within the rule.
>
> The Chair again ruled, on April 25, 1929, that a similar proposal to a similar bill was not germane.

Mr. Speaker Rainey then sustained the point of order made by the gentleman from Texas.

The Chair thinks, without entering into any extended ruling on the question, that the amendment offered by the gentleman from Texas, while it may seek to attain the same result, certainly does seek to attain it through an entirely different method, to wit, the creation of an entirely different and separate agency to administer, and also, as the gentleman admitted in his discussion of the point of order, brings

in an entirely separate and new class. The Chair, after such consideration as he has been able to give the matter, is constrained to sustain the point of order, and rules that the amendment is not germane.

Mr. LESINSKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LESINSKI: Page 1, strike out lines 3 and 4 and insert in lieu thereof the following: "That this act shall be known by the short title Farmers' and Home Owners' Relief Act. When used hereinafter, unless the context otherwise requires, the term 'farmer' and the term 'farmers' shall include an urban home owner, and the term 'farm' shall include urban home. The functions of making loans on urban homes shall be exercised by the Home Owners' Loan Corporation."

Mr. BOILEAU. Mr. Chairman, I make the point of order that the amendment is not germane.

The CHAIRMAN. Does the gentleman from Michigan desire to be heard on the point of order.

Mr. LESINSKI. Mr. Chairman, I am one of the men who signed the Frazier-Lemke petition, but I also feel that the urban population of this country should have the same benefits as the farmers.

Mr. BOILEAU. Mr. Chairman——

Mr. LESINSKI. There are only 30 percent farmers in this country and we have over 70 percent of urban population and workingmen in the cities.

Mr. BOILEAU. Mr. Chairman, I dislike to do it while this parliamentary situation is involved, but I insist that the gentleman discuss the point of order.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. LESINSKI. I feel that the home owners and the urban population is entitled to the same consideration.

The Chair will say that the amendment brings in a different set of provisions not contemplated in the pending bill.

Mr. BOILEAU. Mr. Chairman, I wish to be heard on the point of order. I am sorry to disagree with my colleague from Michigan. For months we have been talking about an agreement which will take care of the home owners, and it is obvious that the bill is purely a farm bill referring to the Farm Credit Administration.

Mr. O'MALLEY rose.

The CHAIRMAN. For what purpose does the gentleman from Wisconsin rise?

Mr. O'MALLEY. I make the point of order that the gentleman is not speaking to the point of order. He is discussing the merits of his amendment. He is not discussing the germaneness of the amendment.

The CHAIRMAN. The Chair disagrees with the gentleman, and the gentleman will proceed.

Mr. O'CONNOR. Mr. Chairman, this bill is distinctly a farm-mortgage bill and does not provide for agencies to take care of the urban mortgages. While there are several amendments that would likely take care of that situation, we are satisfied that they are not germane to the bill.

The CHAIRMAN. The Chair thinks the amendment is not germane and sustains the point of order.

Mr. CONNERY. Mr. Chairman, I move to strike out the last word. Mr. Chairman, I want to say at the outset that I have the highest respect and friendship for the president of the American Federation of Labor, William Green. [Applause.]

I want to say also that at different times in the last few years, when I, as chairman of the Committee on Labor, have taken this floor and have advocated labor legislation, on each side of the aisle I have been accused, probably facetiously, of being controlled by Mr. Green, the president of the American Federation of Labor. I hope today, after voting in favor of this bill, which Mr. Green opposes in his letter to the Speaker of this House, that the membership of the House will understand thoroughly from now on, if they did not before, that no one controls me, and that I will continue to vote and speak today, as in the past, for what I believe are the best interests of the American people.

Mr. BOILEAU. Will the gentleman yield?

Mr. CONNERY. For a question.

Mr. BOILEAU. Is it not a fact that whenever Mr. Green wanted to communicate with the membership of the House with reference to some legislation he got in touch with the gentleman from Massachusetts as chairman of the Committee on Labor? But when it is in reference to farm legislation he gets in touch with somebody else?

Mr. CONNERY. Well, I prefer not to answer that question. I am going to vote for this bill because I believe and have believed for many years that we cannot have prosperity in this country until we have prosperity for the farmers. I do not believe that there can be prosperity for all of the people until we have prosperity for the farmers. Labor in my district, which is industrial, cannot get decent wages nor decent living conditions until the farmers can get a decent price for their products.

If the farmers cannot refinance their farm mortgages, they will have to leave their farms and walk into the city and each become another member of the 14,000,000 unemployed in the United States. [Applause.]

We have heard a lot of talk about inflation here, but we have heard very little talk on the floor of this House about the fact that if you have a bank in your home city the president of that bank can take $100,000 worth of Liberty bonds, bring them to the Federal Reserve System, and get $95,000 in cash, the same kind of cash with which we want to refinance the farms. He can get this cash from the Treasury of the United States for the mere cost of printing the notes, and in the meantime will draw 2½-percent interest from the Government on the bonds which he has put up and still retain the right to lend out the $95,000 in cash at 6, 7, 8, or 10 percent to borrowers. This kind of inflation is not inflation when it is for the benefit of the banks, but when we want to utilize it for the benefit of the farmers to save their farms we are all wrong. The farmers do not fit because they do not belong to the Federal Reserve ring. I am going to vote for this bill. [Applause.]

Mr. RANKIN. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. Chairman, the gentleman from Texas [Mr. JONES], for whom we all have great admiration, and the others who were supporting his amendment, must realize now that this is a fight between the friends and opponents of farm relief.

This has developed into a battle to keep us from doing something for the farmer. Gentlemen criticized certain provisions of this bill. I am not altogether satisfied with it, and I have told you from the beginning that there were changes that should be made. You have the power now, if you are sincere in your alleged desire to do something for the farmer, to offer helpful amendments.

Amendments to correct this bill will be germane. Correct the bill, if there is anything wrong with it, but do not try to hide behind the proposition that there are some provisions in it you do not like, or that you think are unwise or unconstitutional, if you have not offered amendments to correct them.

The farmers of this country are in dire distress. I disagree with the gentleman from Texas on the foreclosures that are going on. The district which I have the honor to represent is the scene of many foreclosures today. The people are driven from their farms while their crops are in the fields and they are appealing to us for relief.

I am going to offer an amendment, on page 2, to reduce the limit of these loans to 80 percent. Some Members object to lending to the extent of 100 percent of the value of the farm. Well, we are stripping that camouflage out of your way. We are going to offer an amendment limiting the amount that can be loaned to 80 percent.

Others have criticized the bill because of the interest rates. Now is the time to show whether you are in earnest and want to do something for the farmers, or whether you are going to line up with the Liberty League and this self-appointed guardian of the farmers, this man Green, who had the impudence to send a letter in here and tell the Congress of the United States how to legislate for the farmers of this country.

Mr. McFARLANE. Mr. Chairman, will the gentleman yield for a question?

Mr. RANKIN. Yes.

Mr. McFARLANE. I believe the membership of this House is entitled to know where Mr. Green and his committee gets

authority to express themselves as representing the A. F. of L. against the Frazier-Lemke bill. I think it is important that the Members of this House should know that Mr. Green and his executive committee had not taken any action on the Frazier-Lemke bill at 10:30 o'clock this morning.

Mr. RANKIN. No. I have voted for labor consistently for years, but I, for one, resent the impudence of this man Green in sending a letter to Congress to tell us how to vote on farm legislation. [Applause.]

[Here the gavel fell.]

Mr. SWEENEY. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman, Mr. William Green, president of the American Federation of Labor, is a personal friend of mine. I served with him in the Ohio State Legislature. In my campaign for reelection he gave me a personal letter, reciting my labor record as a Member of Congress, that I read to the voters of my district, which assisted in my nomination yesterday at the Ohio primary election. I made my campaign, and I won by a 2-to-1 vote over my machine-endorsed opponent yesterday in Ohio [applause] on the Frazier-Lemke bill and other forms of social legislation.

I have not got a cow in my district, I have not got a farm in my district, but I recognize that the farmer is entitled to social justice just the same as is the laborer in the city. They are interdependent upon each other. [Applause.] With full knowledge of my support of the Frazier-Lemke bill, organized labor supported me.

Great groups of voters are organizing now that have their grass roots in the people and not in Wall Street. They are determined to drive the money changers from the temple and are demonstrating their strength at the polls, and let me say to my colleagues on the majority side of the House do not give me the argument that I cannot get the support of my county Democratic organization if I vote for a liberal measure that is sponsored by a Republican. What an asinine argument that is! I would not care if it was sponsored by the most reactionary Republican, if that could be possible; but this measure is sponsored by a progressive Republican, a Roosevelt Republican, by WILLIAM LEMKE, except for whom Mr. Roosevelt could not have been elected President. It took more than Democratic votes to elect Franklin D. Roosevelt. The influence of WILLIAM LEMKE and the farmers of this Nation helped to elect Franklin D. Roosevelt.

Nor do I subscribe to the argument that this measure is highly inflationary. The red herring of inflation is drawn across the trail. By whom? Not by the laboring class, the small mechant, or the farmers, but by the investment bankers and the international bankers, the holders of large blocks of tax-exempt interest-bearing bonds issued by our Government. The people are going to decide the issue of whether or not this is a Government of, for, and by the people or whether it is a Government of the people, by the people, for the private-owned banking system. This is the most highly controversial measure before the American Congress, and one that will have a tremendous effect in the coming Presidential election. I trust the majority party will see the wisdom of passing a bill designed to assist a distressed farm population of 30,000,000 human beings, many of whom are now the victims of the cruel process of foreclosure with others to follow. An amendment will be offered, I think, to permit a percentage of the gold reserve now idle in the Treasury vaults to back this measure so the controls will not be lost; and to prevent so-called wild inflation of the currency I am saying to you now that the action this House takes today will reflect itself in the November 1936 election. The statement has been made that if the President should veto this bill if it passes, he would lose 5,000,000 votes. I do not think he would veto it. If it passes and he signs the bill, he will receive 10,000,000 or 15,000,000 votes of those who will bless his memory. The issue will be decided by the people, not by the privileged classes.

Mr. Chairman, I am going to support this bill.

Mr. CONNERY. Mr. Chairman, if the gentleman will yield, if the President signs this bill, he will gain 15,000,000 votes.

Mr. SWEENEY. Yes; that is right. The President has never stated he was opposed to this bill; on the contrary, he is reported to have said at Sioux City, Iowa, before the Chicago convention of the Democratic Party in 1932, that he was for the principle of the Frazier-Lemke bill to aid the farmers in distress to refinance their farm mortgages.

Mr. HOLLISTER. Mr. Chairman, I rise in opposition to the amendment.

With the ringing oratory of the gentleman from Massachusetts [Mr. CONNERY] still in our ears, this is perhaps as good a time as any to emphasize once more the heart of the objections to this bill, and that is the currency-issue provision. We have heard the gentleman from Massachusetts reiterate the familiar—perhaps I should not use the word "claptrap", but say instead—statement that the bankers get bonds from the Government which they buy but do not pay for; that they in turn pledge the bonds, and then currency is issued against the bonds; the conclusion being that if the bankers can do that, why not let others do it as well.

Mr. Chairman, we are again mixing the problem of who should do the banking of the country with the problem of the issuance of additional currency. Whether you believe in a private banking system or in a banking system entirely under the control of the Government is not the issue before us today. That is a separate issue on which there are arguments on both sides. Even if the Government was in control of the banking system it would still be proper for the Government to issue currency only for the needs of industry, trade, and agriculture as those needs might rise, and it would be most improper for the Government to issue fiat currency; just as improper as when the banking system of the country is conducted privately as it is today under Government supervision.

As a matter of fact, all of this talk about the use of bonds to back Federal Reserve notes is beside the point. A very, very small percentage of the Federal Reserve notes today are backed by bonds because of the fact there is more than an adequate supply of gold certificates owned by the banks and held in the Federal Reserve banks, which in turn represents a certain amount of gold earmarked in the Treasury of the United States, and which these gold certificates are held against. The great majority of the Federal notes are secured by gold certificates and not secured by bonds. There is no incentive or advantage to a banker to be able to take those bonds and get currency because a bank does not want currency except insofar as its customers may need currency from day to day in their ordinary business. The privilege of putting out currency is not one which is particularly desired by the banks. It is one which is, however, innate in any banking system, whether it be private or Government conducted. In considering this bill, and in considering the dangers of diluting the currency and forcing the issuing of additional amounts of it, please do not mix that problem with the problem of whether or not we should have a private or Government conducted banking system, because the two problems are not the same.

[Here the gavel fell.]

Mr. MARTIN of Colorado. Mr. Chairman, during consideration of the Guffey bill in the Seventy-third Congress I called attention to the growing division in the House between Representatives from the agricultural States and the industrial States and to the growing tendency of the Representatives of one group to oppose legislation in favor of the other group. I was prompted to make that statement by reason of the fact that a very brilliant Member of the House, one of the leaders on this side of the aisle, from an industrial State, rose in his place and not only declared but boasted that he had not voted for a single farm measure under this administration.

Mr. Chairman, at the same time leaders of the farm group on that side of the aisle were not only opposing the Guffey bill but they were practically as much in opposition to the National Industrial Recovery Act as the National Association of Manufacturers. I commended this situation to the consideration of Members on both sides of the House who were harboring hopes of the foundation of a Farmer-Labor

Party in this country. I could well afford to do that, Mr. Chairman, because my record is 100 percent for every measure that aids both agriculture and industry under the Roosevelt administration. [Applause.]

This morning an incident occurred which disturbs me deeply. I refer to the letter read by the Speaker of the House in the last moments of general debate. This letter was written by the president of the American Federation of Labor, and called on all friends of labor to oppose this bill. That is the first intimation as to any opposition on the part of organized labor I have heard during the 3 years the bill has been pending in the House.

Mr. Chairman, I was born in the ranks of labor. I have been a member of organized labor for 45 years, and I am proud of it. I have lost jobs in strikes for labor; I have gone to jail for labor; I was tried in the Federal courts of this country for labor, years and years before I ever heard of the president of the American Federation of Labor. [Applause.]

Now, Mr. Chairman, I am on the spot, notwithstanding an unblemished labor record that reaches back to the time when I worked on a section for $1.10 a day with a shovel. I am about to have a black mark placed against my record down in the American Federation of Labor headquarters if I vote for this bill.

Mr. McFARLANE. Will the gentleman yield? The basis for the letter which the Speaker read cannot be backed up by proceedings of the American Federation of Labor of 1934, the last time this organization has spoken on the question, at which time this organization stated that they are opposed to uncontrolled inflation. They made no reference to this act, which was then pending before Congress. The provisions of this act clearly show it is not uncontrolled inflation, so it seems Mr. Green and his associates speak only for themselves.

Mr. MARTIN of Colorado. I fear there will be repercussions from this letter far beyond the scope of this bill. I fear there will be a tendency to still further divide labor and agriculture in this country and line up the one against the other, and neither group can succeed alone.

I may say to my able young friend from Texas that I have a very high regard for the American Federation of Labor. I have read its platforms for years and have always found them progressive and constructive. I will be surprised if the reactions of the rank and file to this letter are altogether favorable.

Mr. Chairman, the handling of this bill has been unfortunate. It was assumed that it would never reach this stage, and as a consequence it did not receive the consideration in committee which would have doubtless resulted in improvement. Now, it has been petitioned out as originally introduced. No bill can receive proper consideration and amendment in the House; we all know that. It must be the work of the committee. But now it is take it or leave it as is, a bill that embodies a good principle and has perhaps the largest endorsement ever given a farm measure in Congress. Both branches of the legislature in my State unanimously memorialized Congress to pass this bill. My vote is pledged to it and will be cast for it.

Mr. Chairman, it is unfortunate that party politics has been injected into this debate and emphasis given to the fact that it is sponsored by a so-called Republican.

I apprehend the Republican Party would be glad to trade the gentleman from South Dakota [Mr. LEMKE] and his type of Republicans for Liberty League Democrats. We Democrats of the West cannot afford to countenance this line of attack. We know that time and again transfusions of progressive Republican blood have revitalized the Democratic Party in the West. It made the West Democratic for 12 years under the leadership of Bryan. It reelected Woodrow Wilson. It gave the West to Franklin D. Roosevelt. In my home State it has given us such Democratic leaders as Senator Henry M. Teller, Senator John F. Shafroth, Senator Edward P. Costigan, our beloved colleague, Edward T. Taylor, former progressive Republicans who found a home in the Democratic Party and were welcomed with open arms; also Governors and Representatives in Congress.

It is the same story in other Western States. The West is first of all progressive. It has given the country much of its progressive leadership—LA FOLLETTE, BORAH, NORRIS, JOHNSON. These are western names, so-called Republicans, but, in principle, Democrats. Their work is not yet done, nor the work of the West. The West gave us a political party to save the Nation, and it again needs saving.

Many objections are urged against the bill: That the amortization period is too long, that the interest is too low, that it would discriminate against outstanding farm mortgages with higher interest rates, that it does not include home owners, that it will lead to similar demands from other groups, that it will destroy the value of life insurance, and so forth; but all these objections rolled into one do not compare with that of inflation.

All the horrible examples of history, ancient and modern, have again been brought out and paraded before us. We have again heard of the stratospheric flight and collapse of the German mark after the war, by means of which a prostrate nation, with no gold, inflated its paper into the trillions for the express purpose of destroying its domestic debt. We have heard again of the French inflation and the devaluation of the franc, whereby France charged off most of its domestic debt. We have heard again of the greenback of the Civil War—the rag baby that won the Civil War—and which could not be depressed below 40 cents on the dollar, even though it had printed on its face repudiation by its own Government. We have heard of the John Law bubble in France 200 years ago. We have been made to hear the midnight clatter of the printing press down in the Bureau of Engraving.

Mr. Chairman, I cannot hear the clatter of the printing press in this bill. The money to be issued under this bill is backed by what ought to be the most valuable security in existence—the land. This money will be a first mortgage on the land, and it will be real land right under foot, and not the imaginary land of John Law located on another continent. Its issue and application will be in the hands of the Federal Government. It will be a slow process. If any Member thinks we are in danger of a monetary blizzard in the refinancing of farms, it indicates that he has had no experience in helping mortgaged farmers under the present system. I think we may safely leave it to the Federal Reserve System and Federal land banks to see to it that no monetary flood will deluge the land. We may also rely to some extent on a monetary and banking system under which this money will be reabsorbed in the banks nearly as fast as it issues. Instead of more money in the hands of the people we are likely to have more money in the banks. I apprehend, though, that the inflation bogey may again serve its purpose and scare the country out of an attempt to try something besides tax-exempt bonds to put new life into our economic system.

Mr. Chairman, one more thought. This bill is addressed to the solution of an ominous problem. It may be stated in two lines. One-half the farmers in this country are tenants and the number is steadily growing. The farms of this country are mortgaged for $9,000,000,000 and the debt can never be paid under present conditions and methods. We have heard a lot about the redistribution of wealth. Unless we want to have on our hands the issue of a redistribution of land, we must reverse this tenant and debt process. This bill is intended to do that.

Mr. CURLEY. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. Chairman, I have the highest regard and respect, as well as love, for our distinguished Speaker, the gentleman from Tennessee [Mr. BYRNS]. I also have 100-percent loyalty to him as a member of the Democratic majority of this House. I also have the same sort of respect and regard for the majority leader of the House and for the distinguished chairman of the Committee on Agriculture, the gentleman from Texas [Mr. JONES], who so ably presented his case here today.

With respect to the bill, I am reminded of the story told of that famous French philosopher and statesman, Voltaire, who, in his dying days, during one of his sicknesses, said to his physician:

You are trying to convey drugs about which you know little, into a body about which you know less, to cure a disease about which you know nothing at all.

[Laughter and applause.]

This bill proposes issuance of new currency up to $3,000,000,000 at 1½-percent interest for use as a revolving fund to refinance eight and a half billions of dollars in farm mortgages at a cost of 1½ percent for retirement of principal.

The move to push this bill down the throats of this body appears suspiciously to me as an attempt to not only embarrass the President but to "put him on the spot" at a time when, as the great physician whose remedies are fast bringing about the recovery of a very ill patient—a broken-down prosperity—he is about achieving the goal he set, the full recovery and happiness of the country.

Although a new Member of this distinguished House of Representatives, Mr. Chairman, and one who was elected on the Roosevelt New Deal platform, I feel honor-bound, under such circumstances, to carry out to the best of my ability the humane public policies inaugurated by President Roosevelt through his sane common-sense administration of our National Government for the benefit of all the people and not any class or group of our economic family.

Then, this bill, if it becomes a law, it has been said by many experts that it would ruin the large army of our small insurance policyholders. I wonder if the sponsors of this legislation have given this feature any serious thought. Many substantial business people in my district deem this class legislation. If that opinion is correct, then it is unsound, and if adopted will meet the fate of its half brother in the St. Paul Federal court of appeals decision. If this legislation is just and meritorious, as sponsors believe it to be, I am compelled to think of the unfortunate plight of the owners of equities in the poorer classes of tenements in the cities throughout the country, most of whom are shackled hand and foot by the mortgages to the extent of $21,000,000,000. If we are going to refinance the eight and a half billion farm mortgages, then in all fairness take in the urban cripples as well.

There is and there should be a bond of sympathy and brotherhood between the farmer and city dweller. Industry and agriculture are vitally essential to the life of the human structure affecting 130,000,000 people in this country. Our great President has had that picture within range of his vision every day of his public life and in his dreams every night as well. The plight of the forgotten man is constantly before him with his problems for solution. But let me point out to you that there is another important group of our great American Nation occupying a great deal of his attention just now that were the first to be flattened on its back and kept there ever since in a strait jacket to this very day. It represents the 4,000,000 craftsmen of the building industry and its affiliated businesses. And these 4,000,000 or more, when employed, supplied the flow of the bloodstream—the purchasing power for consumers of the farmers' commodities. Ladies and gentlemen, there is where your trouble lies. Legislate to give a financial blood transfusion to the paralyzed building-trades industry and you will have your remedy. If, as, and when you strengthen that backbone of our human structure, you will have planted the germ from which prosperity must come, not only for the farmer and the 40,000,000 members of the families of our citizens in distress but for the whole population in America. If you do that, you will not need any Frazier-Lemke bill, because it will not be necessary.

That great man, our peerless leader, President Roosevelt, is possessed of deep affection for the farmer. As a matter of fact, he has done more for the farmer than any of his predecessors have done. He is now making heroic efforts to lighten still more their existing burdens under the most trying conditions. Why should a convalescing body politic be subjected to an untried remedy when unnecessary? But if you are going to insist on the policy "everybody for himself", then every element in our economic structure should be incorporated into any scheme for relief. If you are going to subsidize the farmers, then, in the name of fair play and justice, do the same thing for our vast army of urban equity owners in the cities, thereby guaranteeing to them their constitutional rights of equal opportunity to all with special privileges to none.

Under section 7 of this proposed act, in the event the proposed bonds to be issued are not readily purchased, the Federal Reserve notes—greenbacks—shall be issued and delivered to the Land Bank Commissioner. Remember, my colleagues, the tragedy of 1929, when billions and billions of gilt-edged securities that had been sold to the innocent investing American citizens throughout the country, including these very same farmers, as well as widows and hundreds of thousands of others throughout the country, who gave up their life savings when these inflated security bubbles burst, bringing disaster and unspeakable shock to a stunned public. Do you want another dose of that kind of inflation? Our answer is, No; we do not. We must help those in need, but by reason and common sense, not magical formulas. [Applause.]

Mr. MARCANTONIO. Mr. Chairman, I move to strike out the last five words.

Mr. Chairman, I knew that quite a number of distinguished gentlemen in this House were opposed to this bill. I also learned today that the Speaker is opposed to the bill. I also learned that Mr. Green is opposed to the bill; but never did I realize that Mr. Voltaire is opposed to this bill. [Laughter.]

Mr. Voltaire's opposition is characteristic of the other reasons advanced against the bill. However, Mr. Chairman, despite the philosophers, the statesmen, and the labor leaders who have taken their position against this bill, in my own humble way I shall do my best toward its enactment. I think I have established one fact since I have been here, and that is that I have always been diligent and very zealous in the protection of the rights of labor.

I have followed Mr. Green on matters of labor legislation when I felt that his position was in the best interests of the American workers; but when Mr. Green attempts to throw the weight of the organized workers of America on the side of the Liberty League and the Economy League and other reactionaries who are opposed to this bill, then I refuse to follow Mr. Green's leadership and shall vote my conscience on this bill. [Applause.]

I have no farmers in my district. I have nothing to gain politically by supporting this bill. When I signed the petition for the discharge of the Rules Committee, I made up my mind to support this bill, because I realized that in America there is an economic unity between farmer and laborer and that today this economic unity is becoming more strongly welded than ever before.

I also realized that the workers in my district cannot live while we have an impoverished American farmer. The economic welfare of one is dependent on the economic welfare of the other.

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. MARCANTONIO. I yield.

Mr. MAY. I understood the gentleman to say that he had chosen not to follow Mr. Green and to follow his conscience, although he had been following Mr. Green. Does the gentleman mean to say that heretofore he has been following Mr. Green rather than his conscience? [Laughter.]

Mr. MARCANTONIO. The gentleman's question is obviously silly. I stated that I had been following Mr. Green on matters of labor legislation insofar as I thought he was right. That by no means implies that I have followed or will follow him when he takes a position which is inconsistent with the best interests of labor. What I should like to know from the gentleman is whether his opposition to this bill is influenced by Mr. Green's opposition to this bill or whether his opposition to this bill is influenced by the National Economy League or the American Liberty League. Since when has the gentleman decided to become a friend of labor?

Mr. MAY. Is that question put to me?

Mr. MARCANTONIO. Yes; and I will leave it up to the gentleman to answer it.

Mr. MAY. I will answer the question by saying that I have too much common sense and to much experience to vote for this kind of dangerous legislation. [Laughter.]

Mr. MARCANTONIO. Well, the gentleman has not given any reason except his common sense, and I submit that that is not enough, because, I am sorry to state, that the exercise of the gentleman's common sense should not be accepted as a good reason for voting against the bill. [Applause.]

Mr. Chairman, it is most unfortunate that Mr. Green has taken this position. He has dealt a most serious blow not only to the farmers but also to labor. He has retarded the much-needed alliance between farmer and labor. This result is most injurious to American labor. With 270,000 farms about to be foreclosed, organized labor cannot stand by and permit these farms to be sacrificed because of any artificial excuses. Nobody has yet been able to prove any inflationary danger in this bill. Nobody has established that. Nobody as yet has shown wherein this law is going to hurt labor. All that has been furnished have been generalities. This bill will in nowise hurt the American worker. It will aid the American worker. I repeat, a prosperous agriculture means a prosperous American working class. [Applause.]

[Here the gavel fell.]

Mr. O'MALLEY. Mr. Chairman, I rise in opposition to the pro-forma amendment and ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. O'MALLEY. Mr. Chairman, I saw come into this House today something that I had hoped would never come here, because if it comes here and stays here it threatens the safety of the Republic.

When labor and the farmer can be tricked into fighting each other, then the money changers can sit back and accomplish their designs without hindrance and without check, something that they have been unable to do in this country since its founding. I thought we had once and for all learned enough of the tricks of the money changers and international bankers not to let them poison us with the prejudicial and false notion that if labor helped the farmer it would cost labor something, and if the farmer helped labor it would cost the farmer something. No one can prosper in the cities of this country unless the farmers can make enough money, after they have paid the interest and principal charges on all their indebtedness, to have some purchasing power left. I come from a city district, and by the smallest application of logic I know that the workers of the factories of my city have no market for their products and their skill unless the farmers' purchasing power is restored.

I was not only astonished, but I was depressed, to hear the Speaker of this, the greatest legislative body in the world, read in the Well of this House today a letter from the president of the American Federation of Labor stating that the president of that great labor organization was asking the friends of labor in this House to defeat a measure so needed by and so beneficial to the agricultural interests of our country. I was surprised that in that letter the great American Federation of Labor should set down for public record the statement that that organization had helped pass the processing-tax acts that have since been rightfully rejected by the Supreme Court of this country.

One of the features of my own personal record in Congress of which I am most proud is the fact that I have consistently opposed and voted against that false and atheistic philosophy that believes that destruction of foodstuffs and other crops is the way to economic welfare. There is only one thing I have gathered from a scholastic study of economics, but that thing I cling to and that is the principle that only production produces wealth and that only from production can the people enjoy the benefits of decent living.

I am surprised that any organization founded, supported, and made powerful by the wages of the workers of the cities should boast of the fact that it had helped make possible the passage of a bill in which a processing-tax feature reached into the pockets and the meager pay envelopes of every wage earner who toils in America for hard-earned money to transfer that money to the toilers on the farm.

I have never believed that it was either fair, just, or honest to compel, as we have done by all previous farm legislation, the poor of the cities to help out the poor of the farm, instead of assessing the cost of recovery where it belongs, against the money changers and the rich that have today control and landlordship of most of the fertile lands that once belonged to a free and independent people. I should be ashamed to ever want it recorded by any organization to which I might belong that my organization was a party to the passage of legislation that destroyed meat, milk, and foodstuffs sorely needed by the toilers of my city, whose children today, even as we debate this bill, are hungry and insufficiently clothed because of such destruction and because of such a totally un-Christian and un-American theory of agricultural restoration.

I have always been a friend of labor, as my record shows. I come from a family and a class that has earned its way by honest toil. I am proud of that fact; too proud of it to ever vote to deny the benefits of equal government to any group in this Nation who honestly toil for their daily bread. If my recollection serves me correctly, the Wisconsin State Federation of Labor went on record in favor of this legislation. Today, however, at the last moment, in secrecy and by surprise, an expression is recorded in this House that would have you believe that the rank and file of labor is against this measure. In my State a Farmer-Labor federation has sought to politically capitalize the common needs of agriculture and labor for common gains. I wonder what they now can say in their councils to this unfortunate attempt to pit labor against the farmer and farmer against laborer. I will have no part of it myself and shall vote for this measure because it is a pure and simple measure of justice to the farmer; will not in any way cost labor one single penny in increased prices for the products of the farm, as did the processing taxes and the agricultural adjustment bill—that we learn today who it was who helped pass these penalizing acts.

If it is to be a blot against my record, which has always been on the side of labor, and which will always be on the side of labor when labor seeks justice, that a vote for justice to the American farmer is a vote against labor, then that blot will shine brighter than all the rest of my record. I know the rank and file of labor in my city and my State. I know that they have achieved an intelligence that goes far beyond the opinions of some who sneer at their understanding and alertness. I know that they see behind, beyond, below, and back of many things special privilege would have them believe. They know that their interest and the farmers' interest must be always joined to bring about success in the age-long struggle with entrenched greed and special privilege.

Without lower interest rates, without the ability to reduce his mortgage debt within a reasonable period of time, all the processing taxes that can be devised by the professors of all the universities of the country cannot put the farmer on his feet again. Without the opportunity to discharge his indebtedness upon the same terms and with the same privileges and machinery that the banker and stockbroker and grain trader is allowed under present law, you can pay the farmer of my State $2 a hundred for milk, a price he has never dreamed of, and he will still be unable to bail out of his indebtedness in a lifetime. I want the farmer a prosperous, free, and independent landlord of his own land, just as I want the laborer a prosperous and independent landlord of his own skill and toil; and I am proud today, when the vote comes, to be able for the first time in 3½ years to cast my vote on the side of the debtor instead of on the side of the creditor. The greatest credit that can be given a group of legislators is due the steering committee of this bill and to my colleague the gentleman from North Dakota for doing the most important thing that can be done in a session preceding an election, and that is to bring about a record vote

on whether or not this Congress shall legislate for the debtors of this country who have had the chains of debt fastened to them tighter with each piece of legislation we have passed to date. Perhaps the only thing wrong with this bill is that it came from the Members of Congress of the United States instead of a council of "brain trusters" gathered together in a locked room and that it was prepared through free and open debate and not under the whiplash of machine politics. This is the first farm-relief bill I have had the opportunity to vote on that has come into these Halls in the way that legislation should come before a representative body of a free people, and, were there no other reasons to commend it, that novelty alone would compel me to favor it.

Mr. GIFFORD. Mr. Chairman, I move to strike out the last word. I wish to make a very few brief observations. It is interesting to have so many from the other side of the House walk over to this side and try to make out that this is our responsibility. With a majority of three to one, you must accept the responsibility, whatever the outcome of the vote may be.

The gentleman from North Dakota may have voted for Roosevelt, but I doubt it. We are told he is a Roosevelt Republican. I should be glad if he would rise in his place and state if he is in fact a Roosevelt Republican.

Mr. LEMKE. I am not a Hoover Republican. [Laughter.]

Mr. GIFFORD. Mr. Chairman, I want to say that I think the country will know which party is to take the responsibility. Many things have been said today that ought to benefit the Republican Party. We welcome such statements, inasmuch as it is your huge Democratic majority that will decide the fate of this bill.

But what worries me—although I am against this bill, of course—is that if I am allowed to come back next year, we shall be obliged to vote for a $3,000,000,000 for urban mortgages. It would be unthinkable, if you pass this legislation, that we should not extend the same privileges to all. In the end it would mean many millions to be provided in the same manner.

The gentleman from Ohio [Mr. HOLLISTER] has answered fully the argument that the Federal Reserve banks may draw 2½-percent interest on bonds, then receive currency at a very low charge and reloan. If it is so profitable, why have not they done it? They have used this privilege only to meet currency necessities. Why hide behind that in trying to get this three billions and the other billions that must follow? Do not let the public think we are too blind not to realize fully that this is the beginning of dangerous inflation.

There is a new influence in evidence here today. Even the defenders of labor are not following Mr. Green today. There is no lack of suspicion in some of our minds that if this bill should pass, some radio priest might exclaim, "See the scalps dangling at my belt. See the results I have accomplished over the radio during the past several weeks. I have got those fellows frightened now." How we have enjoyed, and been persuaded by, that voice which we hear so many Sundays cursing Republicans and Democrats alike. We cannot help but feel there must have been influence from somewhere that even the voice of labor is unheeded by its customary followers.

Mr. SWEENEY. Mr. Chairman, will the gentleman yield?

Mr. GIFFORD. No. The gentleman can take all the time he wants to praise the man who today seems to have such a great influence over the House. No doubt he believes that both great parties will be annihilated by this new reformer, wearing the self-styled cloak of social justice and breathing forth inflammatory economic nonsense, as it was recently characterized by the president of Yale University. [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. DUNN].

Mr. DUNN of Pennsylvania. Mr. Chairman, I am one of 21 members of the Committee on Labor of the House of Representatives. I do not know of any member of the Committee on Labor who received any information from Mr. Green or any other person affiliated with organized labor who said they were opposed to the Frazier-Lemke bill. It seems to me if the American Federation of Labor was under the impression that this constructive and humanitarian piece of legislation would be injurious to the laboring people of our country, Mr. Green and other people affiliated with organized labor would have communicated with the gentleman from Massachusetts [Mr. CONNERY], chairman of the House Labor Committee, and other members of the committee. [Applause.]

Mr. Chairman, I am going to vote for this bill because I believe it is going to save many farms of the unfortunate farmers. If I were convinced that by voting for this legislation I would be defeated next November, I would vote for it a hundred times. That is how I feel about this measure.

Many Congressmen said they are opposed to this bill because it is inflationary. I have respect for every man's honest opinion. However, I desire to say if our President would have informed the Members of this House that he favored the bill, many of the Representatives who are going to vote against it would undoubtedly support it.

I am convinced beyond a doubt that if this bill is enacted into law, the laboring men who live in my district—and I represent one of the largest industrial districts in the world—would be benefited; in fact, the laboring men throughout the country would be benefited. If the farmer cannot survive, the men who work in our industries will also suffer tremendously. One depends upon the other for their livelihood.

In conclusion I wish to state the reason there is so much opposition to this bill is that if it is enacted into law it will be one step closer in giving the right to Congress to coin and regulate the value of money, and this right rightly belongs to Congress and not to the international bankers, who are responsible for a great deal of the human misery which now exists in our country. [Applause.]

[Here the gavel fell.]

The Clerk read as follows:

SEC. 2. That the Government now perform its solemn promise and duty and place American agriculture on a basis of equality with other industries by providing an adequate system of credit, through which farm indebtedness and farm mortgages now existing may be liquidated and refinanced through real-estate mortgages on the amortization plan, at 1½ percent interest and 1½ percent principal per annum, and through mortgages on livestock used for breeding or agricultural purposes at 3 percent interest per annum through the use of the machinery of the Farm Credit Administration and the Federal Reserve Banking System.

Mr. LEMKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: On page 2, line 4, beginning with the word "and", strike out all down to and including the word "annum", in line 6.

Mr. LEMKE. Mr. Chairman, the purpose of that amendment is to take out of this bill any loan on livestock. It simply limits the bill to agricultural loans, and so takes livestock loans out of the bill. I feel there can be no objection to taking that part out of the bill, and therefore there should be no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken; and on a division (demanded by Mr. BANKHEAD) there were ayes 68 and noes 84.

Mr. BOILEAU. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. LEMKE and Mr. JONES to act as tellers.

The committee again divided, and the tellers reported there were ayes 120 and noes 118.

So the amendment was agreed to.

Mr. FISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISH: Page 2, line 3, after the word "at", strike out "1½" and insert "2¾."

Mr. FISH. Mr. Chairman, judging from the vote just had on the last amendment, it is evident that my amendment will not be passed. It is quite evident to me that the amendment cannot be passed. As a Member of this House, I am sorry to see the spectacle we just witnessed a few moments ago, when many Members of the House refused to try to perfect legislation which has come before them for the first time, and refused to vote for a sound perfecting amendment offered by the sponsor of the bill, in order to defeat it, and for no other purpose. I do not expect to vote for the bill, but I am going to vote for every perfecting amendment that is offered that will improve the bill, because that is my duty as a Member of Congress.

The only function we have in the Congress is to legislate, to try to write legislation and to try to perfect it instead of being rubber stamps and having legislation jammed down our throats. We just saw a deliberate attempt by the opponents of the bill to evade perfecting this farm-mortgage refinancing bill which makes a travesty and mockery of the House of Representatives as a deliberative body.

Mr. LUNDEEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. No; I am sorry; my time is too short. I have said all I want to say on that subject.

I have not arisen, either, to uphold or defend Mr. William Green, president of the American Federation of Labor, as no defense is necessary. I am 100 percent with him on what he says against inflation in order to properly safeguard the interests and welfare of 45,000,000 American wage earners. That is the group he is speaking for, also the 125,000,000 consumers; and no one has the right to criticize him for defending and protecting the rights and interests of labor against ruinous inflation. But as long as our old friend, Voltaire, the French philosopher, has been brought into Congress and interjected into the debate, I am reminded of what he said, not about this bill but about all bills. He said:

I do not agree with a word you say, but I will defend to the death your right to say it.

[Applause.]

That is the position I take about Mr. Green, and I happen to agree with what he said.

The purpose of my amendment raising the interest rate to 2¾ percent is to obviate the inflationary machinery set up in this bill. I want to be fair to the sponsors of the bill without using words which may hurt someone's feelings. I think this whole bill, so far as inflation is concerned, is utterly deceptive and amounts to an inflationary smoke screen that approximates a fraud. Every man and woman in this House knows that you cannot float any bonds at 1½-percent interest at anytime or anywhere in the United States. I communicated with the Treasury Department this morning and found that the lowest rate of interest on any of their long-term bonds is 2¾ percent. Those were the bonds that were issued last September, and another billion or more of similar bonds were issued last month at 2¾-percent interest.

I want to see the farmers get the very lowest possible interest rate, but I do not want to see it come about through uncontrolled inflation. For that reason I have offered this amendment raising the interest rate to 2¾ percent so it can be handled by a bond issue, as we have all other appropriations, and enable us to sell those bonds to the people and get the lowest possible rate for the farmers of this country. If we refinanced the farm mortgages at 2¾ percent it would be a great help to the farmers in saving their farms instead of having this bill defeated because of the inflationary provision and the farmers get nothing at all.

[Here the gavel fell.]

Mr. McFARLANE. Mr. Chairman, I do not believe many are surprised at the gentleman from New York's [Mr. FISH] amendment. He signed the discharge petition; however, his remarks indicate he will vote against the bill even should his high-interest-rate amendment be adopted. I believe he, like many other Members, is trying to run with the hare and hunt with the hounds, so to speak. You will recall, he had the same trouble in voting on the adjusted service certificate question. He, like many other Republicans, wanted to pay the adjusted-service certificates out of what was supposed to be unexpended public-relief balances. We do, however, appreciate the fairness of the statement he just made regarding the debate and fairness to those favoring this legislation to have the right to offer perfecting amendments to the bill.

It is to be regretted that some of our leaders have taken the attitude from the beginning here that they are going to kill this bill any way they can and they are not going to permit recognized needed amendments to the bill to be placed upon same. The last teller vote on the section to strike from the bill the section permitting personal property to be used as collateral was agreed to by friends of the bill, yet the House leaders, even though they favor the amendment, voted against it, evidently having in mind that with this section left in the bill it would have less chance of passage. You will, nevertheless, go back home and look your farmers in the face and say: "Oh, I could not stand this provision or that provision", and you know that we cannot get a record vote on these different amendments. So you go and hide behind that smoke screen. [Applause.]

THIRTY CENTS PER THOUSAND TO THE BANKER—THIS AMENDMENT REQUIRES 78 TIMES THAT AMOUNT FOR THE FARMER

Now, let us be fair about this thing. The gentleman from New York has offered an amendment raising the interest rate to 2¾ percent. I am surprised we have not heard the gentleman from New York cry out in anguish and shed great tears of grief when we have passed the different amendments to the Federal Reserve Act allowing the Federal Reserve bank to print money and give it to its member banks at actual cost of printing. This has been the law of the country since the creation of the Federal Reserve System in 1913. Chapter 3 of title 12, United States Code, Annotated, paragraph 422, in part reads:

That nothing in this section contained shall be construed as exempting national banks or Federal Reserve banks from their liability to reimburse the United States for any expenses incurred in printing and issuing circulating notes.

According to a letter I have here from the Federal Reserve Board this money is costing member banks about 30 cents per thousand.

FEDERAL RESERVE BOARD,
Washington, January 26, 1931.

DEAR SIR: Referring to your letter of January 21, I beg to advise that * * * the cost of printing Federal Reserve notes is based on the number of notes printed, and accordingly the cost per $1,000 varies with the proportion of Federal Reserve notes of the different denominations printed. The average cost of printing Federal Reserve notes in December 1930 was slightly over 29 cents per $1,000. * * *

Very truly yours,

E. M. MCCLELLAND,
Assistant Secretary.

Gentlemen who have preceded me have gone into detail and have explained how the money is printed and issued to the different member banks. They get their money at actual cost of printing. This statement cannot be truthfully denied. But when it comes to the farmer—you have already indicated here this afternoon that his rights are to be measured with a different yardstick than the yardstick used in making laws for the banker.

Now, that is the issue in this bill. If the Government can furnish money to the banker, as it does under the law, for about 30 cents per $1,000, the actual cost of printing the money, why cannot it do the same for the farmer? We are dealing with the farmers land, the best security on earth. If real estate at 80 percent of its fair value is not good collateral then there is no good collateral in this country, and you know it. Whenever the homes of America fall, this country falls with them, and you know it; yet you say to the bankers they can have money on their own notes for the cost of printing, and they in turn loan industry money today at ¾-percent interest for production of the finished product,

but any other class of people such as the farmer who takes more risk than any other producer, you are saying to him that he must continue to pay from 8 percent to 15 percent interest for money for his production. Class legislation! Yes, we have been dealing with class legislation here for years, but it has been in favor of the privileged class and against the rights of the plain people. [Applause.] You know what I say is true, the record made by the Congress the past 50 years clearly proves that special privilege has largely written the laws of Congress for their special benefit.

TOO MUCH INTEREST DEBT—TOO MUCH TAX-EXEMPT BONDS

Now, a further word about the gentleman's amendment raising the interest rate to 2¾ percent. This is a money-changers' amendment to try to kill this bill. Everything we have done has been on a tax-exempt, bond-issue basis. I say we have floated far too many tax-exempt bonds already. Let us get back to fundamentals. The plain people of this country are going to have to pay the big tax-exempt bond indebtedness, and it is high time we stop such a program and cut down expenses wherever possible.

As stated by an eminent authority, suppose we list the new debts accumulated year by year since 1914. Then suppose we assume they are financed by Treasury notes and that each year 3 percent of these notes are retired by taxation. What would we owe today under such a system?

If all extraordinary expenses of Government were to be financed by currency issues, retired by taxation, at the rate of 3 percent annually, the following table shows the progress that would have been made in debt payment.

Contract year	New debt	Years elapsed for retirement	Amount retired	1936 balance
1914	$1,188,000,000	22	$792,000,000	$369,000,000
1915	3,000,000	21	1,890,000	1,110,000
1916	34,000,000	20	20,000,000	14,000,000
1917	1,750,000,000	19	1,000,000,000	750,000,000
1918	9,300,000,000	18	4,464,000,000	4,836,000,000
1919	13,200,000,000	17	6,732,000,000	6,468,000,000
1931	615,000,000	5	92,250,000	522,750,000
1932	2,615,000,000	4	327,000,000	2,288,000,000
1933	3,100,000,000	3	279,000,000	2,821,000,000
1934	4,500,000,000	2	300,000,000	4,200,000,000
1935	1,700,000,000	1	51,000,000	1,649,000,000
Total	38,000,000,000		14,250,000,000	23,750,000,000

But the period 1920–30 offered special opportunity for retiring more rapidly the terrific war debt. The following table shows the rate of actual retirement of principal, which reduction could have been applied to preceding debt balances:

	Actual reduction	
1920	$1,300,000,000	
1921	300,000,000	
1922	1,000,000,000	
1923	1,600,000,000	
1924	1,100,000,000	
1925	$700,000,000	
1926	900,000,000	
1927	1,100,000,000	
1928	900,000,000	
1929	700,000,000	
1930	700,000,000	
Reduction of principal	10,300,000,000	
Principal balance (above)		$23,750,000,000
Reduction 1920–30 (above)		10,300,000,000
Necessary net debt		13,450,000,000

But even such a debt is wholly unnecessary.

We have paid the bondholders in interest more than in principal. The interest payments on Federal debt from 1914 to 1935, inclusive, total $13,959,958,361.

Summary of Federal interest paid

	Amount		Amount
1914	$23,000,000	1920	$1,020,000,000
1915	22,000,000	1921	999,000,000
1916	22,000,000	1922	991,000,000
1917	24,000,000	1923	1,055,000,000
1918	189,000,000	1924	940,000,000
1919	619,000,000	1925	881,000,000

Summary of Federal interest paid—Continued

	Amount		Amount
1926	$833,000,000	1932	$599,000,000
1927	778,000,000	1933	689,000,000
1928	731,000,000	1934	756,000,000
1929	678,000,000	1935	820,000,000
1930	659,000,000		
1931	611,000,000	Actual total	13,959,958,361

If we assume it was necessary to borrow, between 1914 and 1935, inclusive, 38 billion dollars, we could have issued 38 billion in Treasury notes, non-interest-bearing notes, and could have retired over 24 billion with the amounts we have actually spent on principal and interest payments, between 1914 and 1935, with the result that there would not be over 14 billion of Federal debt today. This is truly the way to balance the Budget, without the present burden of taxation.

The farmer lives mainly in States denied credit. He pays his share of Federal taxes. The bondholders live in the States with large credit. The "bond racket" sucks money from agriculture into the financial centers.

USURY

The Bible is full of passages speaking out boldly against the taking of interest or usury. Exodus, chapter 22, verse 25, states:

If thou lend money to any of my people that is poor by thee, thou shalt not be to him as an usurer, neither shalt thou lay upon him usury.

Leviticus 25: 35–37 states:

And if thy brother be waxen poor, and fallen in decay with thee; then thou shalt relieve him: Yea though he be a stranger, or a sojourner; that he may live with thee. Take thou no usury of him, or increase; but fear thy God; that thy brother may live with thee. Thou shalt not give him thy money upon usury, nor lend him thy victuals for increase.

Deuteronomy 23: 19–20 states:

Thou shalt not lend upon usury to thy brother; usury of money, usury of victuals, usury of anything that is lent upon usury: Unto a stranger thou mayest lend upon usury; but unto thy brother thou shalt not lend upon usury that the Lord thy God may bless thee in all that thou settest thine hand to in the land whither thou goest to possess it.

Psalms 15: 5 states:

He that putteth not out his money to usury, nor taketh reward against the innocent. He that doeth these things shall never be moved.

Proverbs 28: 8 states:

He that by usury and unjust gain increaseth his substance, he shall gather it for him that will pity the poor.

Luke 6: 35 states:

But love ye your enemies, and do good, and lend, hoping for nothing again; and your reward shall be great, and ye shall be the children of the Highest; for He is kind unto the unthankful and to the evil.

Yet we find since about the fifteenth century as the importance of the money changers has grown and their powers extended over the different branches of business activity, the church, the school, and the politics of the Nation; they have been able to enact legislation legalizing interest or usury and have had same recognized as a highly moral undertaking.

Statements have been made recently that the total annual interest burden of the people of the Nation is about $15,000,000,000, and the total tax burden of the Nation—National, State, county, city, and schools—is about $15,000,000,000 annually, thus making the interest and tax burden for the 25,000,000 families in the United States of $1,200 for each average family of the Nation.

THE REMEDY

All of you fully realized the chaotic condition confronting us at the beginning of this administration. Due to the ever increasing special-privileged legislation being enacted in increasing amounts for more than 50 years, which class legislation has taken from the people their rights and privileges and given them to the special-privileged few, which has made them immensely wealthy at the expense of the people. All of our statisticians today frankly state that due to such causes about 4 percent of the people own more

than 90 percent of the wealth of the Nation. This concentration of wealth in a few hands has made it impossible for the wealthy to consume the commodities necessary to keep labor employed. This has forced unemployment, misery, and want among our people. We must correct the situation. No one realized existing conditions better than our great leader in the White House when he spoke thus in his inaugural address:

Practices of the unscrupulous money changers stand indicted in the court of public opinion, rejected by the hearts and minds of men. * * *

The money changers have fled from their high seats in the temple of our civilization. We may now restore that temple to the ancient truths. The measure of the restoration lies in the extent to which we apply social values more noble than mere monetary profit.

None have tried harder than our great leader, the President, to overcome the many obstacles confronting the Nation. I believe the records will show that we have made great progress in all lines of recovery. However, the simple facts still remain as to the money changers—they have not been driven from the temple since they were lashed out by our Lord while He was here on earth. We see ample evidence of their handiwork all around about us and find ourselves blocked by them on every piece of legislation we try to enact for the benefit of the masses which would in any way curb their money-making powers. It seems that their invisible hand is always at work and writes into law in every bill provisions that amply protect their ill-gotten gains. There is nothing wrong with our economic structure today that correcting our monetary system would not cure.

How long, O Lord, will our people stand idly by and allow their farms and their homes and savings and their all to be taken from them without demanding of their Congress legislation requiring the enforcement of the one provision of the Constitution written by the blood of our forefathers that really would mean and permit for them all the right to life, liberty, and pursuit of happiness? I refer to paragraph 5 of section 8 of article 1 of the Constitution, which provides:

The Congress shall have power * * * to coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

CITY HOMES VERSUS FARM HOMES

Much has been said in the debate of this bill in an effort to prejudice the city vote or those living in the industrial centers against this bill that it would be unfair and the meanest kind of class legislation to enact this kind of legislation for the farmer without enacting similar legislation to relieve city home owners.

No one sympathizes with the overburdened city home owners more than I, and none here will more strongly support such legislation than the friends of the Frazier-Lemke bill. All of you realize that under our rules of procedure that such an amendment taking care of city home owners cannot be made germane to this legislation. Introduce your legislation, and you will find us supporting same.

The Philadelphia Record in a series of editorials, May 7, 8, and 9, had a good deal to say under the heading, "Why does it have to be 6 percent?"

In the first editorial they said:

Our interest rate set-up endangers recovery. Depression lowers interest rates for production, but makes no corresponding reduction for consumption. This accelerates the making of goods, retards the making of customers.

The 6-percent-and-up rate is not applied equally to all borrowers. The high rates are applied to little merchants, to householders, to buyers. But the giant corporations, our chief producers, our sellers, are borrowing all the money they need at rates as low as three-quarters of 1 percent.

In commenting further they state:

In depression the 6-percent-and-up fetish holds only against the little fellow. The results are obvious.

We have talked about increasing consumption buying since depression. We have prided ourselves on solving the problems of production. We have realized that consumption is our difficulty. We meet that difficulty with unparalleled stupidity by charging manufacturers three-quarters of 1 percent to finance the making of things and scaring off would-be customers by demanding 6 percent up when they want to buy the same things on time.

Speaking further, in comparing the interest rate for the manufacturer as compared to the consumer, they say:

The man who makes refrigerators pays 75 cents per $100 per year for the financing he needs. The small-business man dealing in refrigerators must pay at least $6 per $100 for the funds he needs to run his store. And the man who buys a refrigerator must pay as high as $14 per $100 for the credit he needs.

The neck of the bottle isn't making refrigerators. It's getting them into the home.

But because our interest set-up is tradition bound we make it as easy as possible to produce, as hard as possible to sell, which means to consume, which means to prosper.

Our banking system reflects the emphasis on production, the disregard of consumption that sent us into our 1929 tailspin.

THE H. O. L. C. AND F. H. A. INTEREST RATES

The Government tried to break through tradition to secure for the overburdened home owners, both city and farm, lower interest rates and succeeded only in a very limited way. But as stated in the Philadelphia Record in their editorial of May 8, 1936:

But the very same interests which had helped ruin the home owners brought all their pressure to bear on the Government. Shielding their precious high-rate structure, they warned that cheap Government loans would ruin them, that home owners would refuse to pay "regular" interest rates if the Government charged only 4 percent, that the Government had to protect them. The Government, therefore, borrows money at 2½ percent for long terms and lends it to home owners at 5-percent interest, plus so heavy a schedule of amortization that the total carrying charge is brought to 9.6 percent. The high-rate fallacy remains. H. O. L. C.'s job is to enable home owners to keep their homes. Its giant weapon is cheap Government credit. But because this is an era of 6-percent-plus for the little fellow, H. O. L. C. piles up the charges—and H. O. L. C. reports begin to show mounting foreclosures.

We ran into the same stone wall in trying to provide reasonable rates under Federal Housing. As you know Federal Housing was created to enable wage earners to build homes and repair existing homes. It was supposed to do a "billion-dollar job"; it was not supposed to lend money but to insure loans through commercial banks to such home owners; there was no risk to it under such plans but as the Philadelphia Record says:

The F. H. A. requires a 5-percent interest rate, discounted in advance. This advance discount of interest on the entire loan makes no allowance for monthly payments which reduce the principal, thus bringing the true interest rate up to 9.5 percent. And here we see the interest-rate fallacy exposed in all its beauty.

The manufacturer of bathtubs borrows money at less than 1 percent to finance his production. The small contractor who wants to install bathtubs has to pay 6 percent for his financing—where he can get financing at all.

And the home owner, the consumer on whom the bathtub industry depends, has to pay 9.5 percent. The only reason he isn't paying 14 percent is the Government guaranty.

This set-up encourages the making of bathtubs; but it discourages the sale of bathtubs.

Thus we find after 2 years' business the Federal Housing Administration has done a little over $300,000,000 worth of business instead of $1,000,000,000 worth of business. High interest rates have kept low incomes of labor from making needed improvements and purchases. Thus we find we have unlimited cheap money for production and manufacture year in and year out, in good times and in bad times, but high interest rates for the consumers.

THE FARMER AND THE WAGE EARNER

The Record, in its editorial of May 9, summarized the case thus:

Our distorted interest rates are intensifying the distortion of our economic system—giving the big the advantage over the small, giving production the edge over consumption.

There is only one way out. That is to reduce interest rates to the small borrower.

In view of the bitter attack being made against this legislation by the money changers, it seems to me that a comparison of the income of the farmers and wage earners covering the past number of years would be interesting to study. The figures given below for the farmers are compiled by

Dr. A. G. Black, Chief of Bureau of Agricultural Economics of the Department of Agriculture:

Farm income per capita and agricultural wealth of the United States, 1909–34

Year	Agriculture's share of national income		Agricultural wealth		Percentage agricultural wealth is of total
	Total	Per capita [1]	Total	Per capita	
	Million dollars	*Dollars*	*Billion dollars*	*Dollars*	*Percent* [2]
1909	4,988	156	41.3	1,291	19.6
1910	5,218	163	42.9	1,336	19.0
1911	4,815	150	44.1	1,374	18.7
1912	5,294	165	46.1	1,436	18.4
1913	5,133	160	47.7	1,486	18.2
1914	5,081	158	47.9	1,492	18.8
1915	5,488	171	50.5	1,573	18.1
1916	6,631	207	55.0	1,719	17.6
1917	9,188	288	61.6	1,931	17.1
1918	11,205	352	67.0	2,107	17.1
1919	12,182	384	79.1	2,495	18.2
1920	11,057	350	71.8	2,272	15.3
1921	6,967	220	63.1	1,991	14.6
1922	7,300	230	61.4	1,931	13.3
1923	8,026	256	58.9	1,882	12.1
1924	8,325	268	57.7	1,855	11.6
1925	9,089	292	57.8	1,859	10.8
1926	8,214	267	56.7	1,841	10.3
1927	8,371	276	57.2	1,888	10.2
1928	8,109	268	58.1	1,917	9.6
1929	8,254	272	58.1	1,917	9.3
1930	6,320	209	52.7	1,745	9.5
1931	4,659	152	45.3	1,480	9.6
1932	3,582	115	30.7	984	8.2
1933	4,557	142			
1934	5,287	163			

[1] Total of agriculture's share divided by farm population, Jan. 1.
[2] Agricultural wealth divided by farm population.

The figures given below for national income for all wage earners as shown by the Conference Board Bulletin, April 10, 1935, is as follows:

National income produced, 1909–1934

Year	Total (billion dollars)	National income		
		Per capita	Per gainful worker, including unemployed	Index of wholesale prices, all commodities (1926=100)
1909	27.2	$300	$727	67.6
1910	30.1	326	785	70.4
1911	29.4	314	761	64.9
1912	31.8	334	814	69.1
1913	33.7	350	857	69.8
1914	32.0	327	806	68.1
1915	34.5	347	860	69.5
1916	44.2	439	1,093	85.5
1917	53.2	521	1,304	117.5
1918	60.2	581	1,463	131.3
1919	67.4	642	1,623	138.6
1920	74.3	697	1,770	154.4
1921	52.6	486	1,233	97.6
1922	61.7	562	1,423	96.7
1923	69.8	626	1,584	100.6
1924	69.6	615	1,555	98.1
1925	77.1	671	1,695	103.5
1926	78.5	674	1,699	100.0
1927	77.2	653	1,647	95.4
1928	80.5	671	1,691	96.7
1929	83.0	683	1,719	95.3
1930	70.3	571	1,436	86.4
1931	54.6	440	1,107	73.0
1932	39.4	315	793	64.8
1933	41.9	333	836	65.9
1934	47.6	377	946	74.9

Thus we find from studying the above tables that the farmers' income in 1934 was $163 per capita or $13.58 per month while the average per-capita income of labor generally was $377 or $31.42 per month. Thus we see that the incomes of the farmers and wage earners generally will not permit payment of high interest rates.

The Government records show to what extent foreclosures are being made under H. O. L. C. chart.

Foreclosures and acquisitions of properties by the Home Owners' Loan Corporation, 1934–36

Year	Number of outright foreclosures	Number by acquisitions by voluntary deed	Total number of properties acquired
1934	30		30
1935	4,106	334	4,440
1936	11,713	1,100	12,813

It may be of interest to see how foreclosures have increased under the Federal land bank.

Foreclosures and acquisitions of properties by the Federal land banks, 1930–35

Year	Number of outright foreclosures	Number by acquisitions by voluntary deed	Other acquisitions [1]	Total number of properties acquired
1930	[2] 4,645		71	4,716
1931	[2] 7,386		413	7,799
1932	[2] 10,039		1,369	11,408
1933	5,577	1,039	952	7,568
1934	4,024	756	1,095	5,875
1935	9,964	1,488	1,576	13,028

[1] Includes real estate acquired in trade, purchase-money mortgaged, foreclosed or canceled by deed, cancelations of real-estate sales contracts, and abandonments reacquired.
[2] Includes cancelations by voluntary deed, break-down not available.

FRAZIER-LEMKE FARM REFINANCING

An eminent authority shows the necessity of new credit facilities, new purchasing power, new debt-paying ability, is found in an analysis of the farms mortgaged. The following table shows for each of the 48 States: (1) The number and (2) percentage of farm mortgaged, (3) the totals of mortgages on farms operated by full owners, and (4) probable distribution of Frazier-Lemke refinancing.

There is a justifiable criticism of this table. It is statistically correct. But practically every little 3-acre farm in the country that is termed a farm "statistically" and is free from debt is incorporated into the table.

If the Department had used only farms of 10 acres or over in compiling its figures, then the much higher percentage of mortgaged farms would be revealed, and this table would appear far too conservative.

State	Farms mortgaged	Percent of total	Total mortgages on farms operated by full owners	Probable distribution Frazier-Lemke refinancing
Mississippi	261,000	83.7	$36,733,000	$27,000,000
Oklahoma	163,000	80.4	60,931,000	46,000,000
Alabama	202,000	78.9	37,422,000	28,000,000
Georgia	199,000	78.2	35,624,000	26,000,000
North Dakota	60,000	78.2	60,044,000	45,000,000
Louisiana	125,000	77.6	26,675,000	20,000,000
South Dakota	64,000	77.4	64,358,000	48,000,000
Iowa	165,000	77.3	452,902,000	340,000,000
Nebraska	99,000	77.2	172,342,000	129,000,000
Arkansas	186,000	77.0	35,388,000	26,000,000
South Carolina	121,000	76.7	26,447,000	20,000,000
Texas	877,000	76.1	199,238,000	150,000,000
Kansas	119,000	71.9	113,807,000	85,000,000
Colorado	40,000	67.9	48,854,000	36,000,000
Minnesota	125,000	67.8	235,114,000	175,000,000
Idaho	27,000	67.1	50,225,000	37,000,000
Illinois	141,000	66.2	199,229,000	150,000,000
Missouri	169,000	66.1	187,863,000	140,000,000
Wisconsin	119,000	65.9	355,029,000	265,000,000
Montana	30,000	64.5	36,598,000	27,000,000
North Carolina	176,000	63.2	49,670,000	37,000,000
Wyoming	10,000	62.5	12,781,000	9,000,000
Indiana	111,000	61.4	112,185,000	84,000,000
Tennessee	147,000	60.2	49,750,000	37,000,000
Oregon	32,000	59.6	64,116,000	48,000,000
Delaware	5,000	58.6	5,617,000	4,000,000
California	79,000	58.3	298,523,000	223,000,000
Washington	40,000	57.7	72,303,000	54,000,000
New Jersey	14,000	57.6	39,796,000	30,000,000
Vermont	14,000	56.4	26,376,000	20,000,000
Michigan	95,000	56.2	141,034,000	105,000,000

State	Farms mortgaged	Percent of total	Total mortgages on farms operated by full owners	Probable distribution Frazier-Lemke refinancing
Utah	15,000	55.9	$28,741,000	$21,000,000
Maryland	22,000	53.4	32,863,000	24,000,000
Massachusetts	13,000	53.1	34,060,000	25,000,000
Connecticut	9,000	52.7	23,556,000	17,000,000
Ohio	113,000	51.9	143,089,000	107,000,000
New York	82,000	51.7	170,460,000	127,000,000
Kentucky	126,000	51.4	62,777,000	47,000,000
Nevada	1,000	46.3	8,074,000	6,000,000
Florida	26,000	44.9	21,606,000	16,000,000
Virginia	75,000	44.3	53,424,000	40,000,000
Pennsylvania	75,000	43.9	122,744,000	92,000,000
Rhode Island	1,000	43.4	2,655,000	2,000,000
Arizona	5,000	41.8	11,618,000	9,000,000
New Hampshire	5,000	38.4	8,199,000	6,000,000
New Mexico	12,000	38.4	10,325,000	7,500,000
Maine	13,000	35.1	22,539,000	17,000,000
West Virginia	26,000	32.6	16,260,000	12,000,000

THE JONES BILL, H. R. 7593

At the beginning of debate on this measure the gentleman from Texas [Mr. JONES] offered his bill H. R. 7593, authorizing the issuance up to $2,000,000,000 of new currency at 2 percent interest with proper gold reserve protection, and the Chair held the bill not germane to this measure pending.

A comparison of the two bills, however, clearly shows the recognition of the justness of the lower interest rates provided in the Frazier-Lemke bill.

In conclusion, let me say that I believe it is generally recognized that we need more money in circulation. On October 31, 1920, we had $53.21 per capita in circulation; since then it has decreased about $20 per capita. In 1929, before the crash, we were using about $62,000,000,000 of bank checks which now is down to about $20,000,000,000. In other words we formerly had at least three times as much bank money as we now have.

Under existing law, title 12, chapter 3, paragraph 248 (d), United States Code, Annotated, the Federal Reserve Act provides:

To supervise and regulate through the Bureau under the charge of the Comptroller of the Currency the issue and retirement of Federal Reserve notes, and to prescribe rules and regulations under which such notes may be delivered by the Comptroller to the Federal Reserve agents applying therefor.

Thus we find the Federal Reserve System has complete authority to regulate the issue and retirement of outstanding currency. Thus we find that should prices rise as greatly feared by Mr. Green and his committee, the Federal Reserve Board has ample authority to retire sufficient outstanding currency to adequately regulate the amount of currency in circulation, and this measure because of the provisions of the bill under existing law could not truthfully be considered as inflationary.

Nothing is ever settled until it is settled right. You may defeat this measure through the tactics used here today by appealing to the prejudices of the industrial Members to vote against the farmers, but when labor understands the situation it will, as it has always done, demand a square deal for its friend and co-worker, the farmer.

We have certainly learned our lesson, one section of the country cannot prosper without the other section being allowed its fair share of prosperity. [Applause.]

Mr. DEEN. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. Chairman, as the only Member from my State who signed the petition to discharge the Rules Committee, I want to state to the Members of the House I did so hoping that we could amend the bill if and when it ever came to the floor of the House. I have studied the bill offered by the gentleman from Texas [Mr. JONES], chairman of the Committee on Agriculture, as an amendment to the bill now under consideration. I have drafted and had drafted certain amendments along the line of the provisions contained in Mr. JONES' bill, which amendments, however, are not germane to the bill under consideration, so I am informed.

Mr. Chairman, I am for the principles enunciated in the bill offered by the gentleman from Texas [Mr. JONES], which uses $300,000,000 in gold as the basis for the issuance of the money. I am for the lowering of the interest rate, and I yield to no man, the gentleman from Texas [Mr. MCFARLANE], who just preceded me, or anyone else, in my ambition to be of service to not only the farmers but to all the people of my district and the country at large. However, I cannot subscribe to the method of financing and the policy of administering this act as provided in the Lemke-Frazier bill.

I believe that all meritorious legislation should be brought to the floor of the House for consideration and should be either passed or defeated on its merits or demerits. I do not think any bill should be pigeonholed, and for this reason I signed the petition in reference to the Frazier-Lemke bill. I signed the petition, believing I could amend the bill to the point where it would be satisfactory. Since the amendments I have in mind, which were prepared along the line of Mr. JONES' bill, are not germane to the pending bill under consideration, I cannot vote for it, and I hope the Congress will not pass a bill which will jeopardize the farmers of the country and make conditions worse than they are today. This is my honest, conscientious conviction. [Applause.]

[Here the gavel fell.]

Mr. BINDERUP. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, in opposing the amendment offered by my good friend from New York, Mr. HAMILTON FISH, whom I highly respect, who speaks continuously about the inflation feature, I want to issue a challenge to the opponents of this bill and yield to anyone who dares to deny the righteousness of this provision. That is the fundamental thing in the Frazier-Lemke bill.

Mr. Chairman, I want to read a paragraph of a bill that every one of the gentleman on that side [addressing the Democratic side of the House] voted for. I quote a paragraph from the Banking Act of 1935, section 24:

Any national banking association may make real-estate loans secured by first liens upon improved real estate, including farm mortgages.

And then, at the end of the paragraph, note this:

Notes representing such loans shall be eligible for discount as commercial paper within the terms of the second paragraph of section 13 of the Federal Reserve Act.

This is what I want to bring out particularly. If you will change three words in that act, if you will amend section 24 to include just three words, you will have included the Frazier-Lemke bill. If you will add these three words, then we may eliminate everything in the Frazier-Lemke bill, because it is the fundamental part of it. Put in three words, "or Federal land bank", making it read:

Any banking association or Federal land bank may make real-estate loans secured by first liens upon improved real estate, including farm mortgages, and notes representing such loans shall be eligible for discount as commercial paper within the terms of the second paragraph of section 13 of the Federal Reserve Act.

Just include those three words; and why not? Why not give the Federal land bank, the farmers' banks, the same privilege in this Banking Act that you are giving to the Federal Reserve System, the bankers' banks? That is all there is to the matter, and I challenge anyone to reply or to answer why this should not be done. I wait for the reply. I challenge you Democrats, with whom I have associated all my life, to get up here and say why that should not be done. Let your constituents at home know that you do not think as much of the farmers as you do of your bankers. I dare you to go on record in reference to that matter. [Applause.] Is it a fact that not a soul dares to arise, and yet will vote against this bill, the Frazier-Lemke bill? [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I ask for a vote on the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. FISH].

The amendment was rejected.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 15 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. PETTENGILL. Mr. Chairman, there is no doubt that the passage of this bill would afford a temporary measure of relief to many of our citizens who have been caught between fixed mortgage obligations and a declining price level. They are among the most worthy of our people, and because their situation has been such a hard one I have been anxious to have this bill considered on its merits.

It was for this reason that I signed the discharge petition so as to give this bill its day in court and to permit parliamentary government to perform its true function, which is to debate important measures rather than smother them in committee.

The bill is now out on the floor and its merits and demerits must be weighed. We have to consider its total effect on our farmers and all our people, rather than a small minority of the farmers alone. I regret exceedingly that I have come to the clear conviction that the bill will be bad for all our people, taken together, and that it will do little good and much harm to the farmers themselves.

As many sincere people have a different view I shall state the reasons for my belief. In doing so I refer to the bill as it has come on the floor, without reference to amendments that may be offered or adopted. In fact, my constituents who favor the bill have generally asked me to vote against all amendments. I will discuss it, therefore, in the form in which it has been presented to the country.

The bill provides for refinancing of farm mortgages, and the purchase of farms by tenants. No provision is made for mortgagors or tenants or land-contract purchasers living in towns and cities. They get no benefit whatever from the bill. On the contrary the wage earner's lot is certain to be made worse by still further increase in the cost of living, as stated by the president of the American Federation of Labor.

We have to consider the bill itself, as drawn, and also the probability that if it is once passed it will irresistibly lead to still more legislation of the same character.

But for the moment let us analyze the bill itself on the assumption that if passed its provisions will be lived up to and no more similar legislation will follow.

The bill provides for refinancing mortgages or financing farm purchases by tenants or former owners. Loans are to be made on both real estate and chattels. Real-estate loans are to be made at 1½-percent interest and 1½-percent principal payment annually, which means that the loans will run for 47 years.

Loans may be made up to 100 percent of the value of the land and 75 percent of the value of insurable buildings and improvements. The same provisions apply to financing the redemption of land lost by foreclosure at any time within the past 15 years and to the purchase of land by tenants.

Right there let me ask if there is a single supporter of the bill in this House, or anywhere in the Nation, whether a farmer or not, who would loan $100 of his own money or money for which he is responsible as guardian or trustee upon any such terms? I mean loan up to 100 percent of the value of the land at 1½-percent interest, and 47 years before his loan would be paid back? I have never heard of any such person anywhere. Even if a man had money of his own to loan, who would deposit a dollar in a bank which was known to be making that kind of loans? I dare say that every farmer who favors this bill would at once withdraw his deposits from his country bank if he knew the bank was making 100 percent loans of his deposits. I want someone to tell me why the Government should make loans that no one would make if his own money were at stake.

Chattel mortgages are to be refinanced up to 65 percent of the value of the security, with 3-percent interest and maturity up to 10 years.

The total amount of money provided for these purposes is $3,000,000,000. It cannot be more and might be less.

How far will $3,000,000,000 go? How many farm mortgagors and farm tenants would be helped? How many are certain not to be helped, and on the contrary, are certain to be hurt by the passage of the bill?

A careful analysis shows how extravagant have been the claims for this bill and how disappointing it would surely prove to be.

To show how effective this misrepresentation has been, I read an advertisement printed in an Indiana newspaper the other day:

FARMERS, TAKE NOTICE!

The Frazier-Lemke bill for financing all farm indebtedness at a rate of interest of 1½ percent comes up for consideration in the House of Representatives on May 11. No measure so far proposed for farm relief has half the merit of this bill. Every farmer should write his Congressman urging him to support it.

You will note that it is claimed that the bill will finance "all" farm indebtedness.

Someone is misleading the public. The advocates of the bill know that the bill cannot and will not finance "all" farm indebtedness. Either that, or they are not sincere when they say in the bill that the fund shall not exceed $3,000,000,000.

We cannot change the science of arithmetic. However desirable, no one can make 2 and 2 equal 6 or 60. We cannot pay off the farm debt of this country and finance farm purchases by tenants with $3,000,000,000. The money simply will not go around. There is no way to make it go around, and the inevitable result of the bill is to work serious injustice among mortgagors and tenants, all equally worthy, helping a few and denying the same equal treatment to their neighbors.

I favor giving farm borrowers as cheap credit as can safely be done. But I would give all the farmers credit at 3 or 3½ or 4 percent, or whatever the lowest safe rate might be, and not give a third or fourth 1½-percent money and then require the other two-thirds or three-fourths to keep on paying 5 or 6 or 7 or 8 percent. If you make credit as cheap as it can reasonably be made to all farmers, you have done something that is real and constructive and sound and just. But this bill offers injustice, unequal treatment, and disappointment to the overwhelming majority of our farm population.

Let us look at the facts and figures. Farm real-estate mortgages as of January 1, 1935, are estimated to total nearly eight billions—$7,770,000,000. I do not have the figure for chattel mortgages, but it is probable that it is at least a billion more, making a grand total of about nine billions.

You cannot refinance nine billions with three billions. All this bill can do, at the utmost, is to refinance one-third of the farm debt and one-third of farm debtors, doing nothing whatever for the other two-thirds. The bill condemns the latter to their present situation. In fact it will probably hurt two farm debtors for every one that it would help.

It is argued that the three thousand million dollars will revolve and therefore after many years it will refinance more than one-third of the farm debtors.

This assumes that there will be no losses or operating expenses; that all payments will be made promptly as they fall due; that there will be no foreclosures or abandonments; that during the next 47 years there will be no more depressions; no more crop failures; no more wars; no more shrinkages in the price level of farm lands.

This assumption flies in the face of all experience. To begin with, all of the 1½-percent interest paid by the farmers will be required to pay the 1½-percent interest on the farm-loan bonds to be issued under the terms of the bill.

That leaves only the 1½-percent principal payment (forty-five million on three thousand million) to "revolve." How

much of that 1½ percent will be left after operating expenses and losses are charged off? With loans up to 100 percent of the value of the lands, and therefore little or no equity in the borrower, it seems obvious that abandonments will occur much more frequently than normally whenever there is even a mild depression in values, and that the expense of collections, foreclosures, and losses will absorb all of the 1½ percent which may be collected. In fact, the Farm Credit Administration estimates that expenses and losses will almost certainly be greater than all the amounts collected.

This being the case, there will be nothing to "revolve" for the purposes of making additional loans. This limits the total available fund to the original $3,000,000,000 or less.

So far we have talked only of farm mortgagors and have shown that the bill can benefit only one-third of them; and they in turn are only 18 percent of all farmers.

But this has omitted the farm tenants entirely and the men who have lost on foreclosures entirely. The bill provides for them as well as the mortgagors and when the claim of the tenants and purchasers to part of the $3,000,000,000 are considered, the amount available to refinance farm mortgagors is still further reduced.

It is necessary to consider the claims of all persons intended to be benefited by the bill. They include farm mortgagors, farm tenants, and those who have lost farms by foreclosure within 15 years, whether now living on farms or not.

The farm census for 1930—the last year for which all figures are available—shows the following:

April 1, 1930

Total number of farms	6,288,648
Farms operated by full owners:	
(a) Free of mortgage debt	1,157,848
(b) Mortgaged (for $4,080,000,000)	1,569,178
Mortgage data not reported	184,618
	2,911,644
Farms operated by part owners	656,750
Farms operated by managers	55,889
(c) Farms operated by tenants	2,664,365
Tenants farms—value of land and buildings	$16,381,557,526

Disregarding for the moment all of the above items except (b) and (c)—mortgagors and tenants—and disregarding also all chattel mortgages, we have a total of farm mortgages and value of lands available for purchase by tenants of approximately $20,461,000,000, or nearly seven times the three billions provided in the bill. In addition we have those who have lost farms by foreclosure within 15 years and who might like to rebuy them with purchase money provided by the Government up to 100 percent of the value of the land and 75 percent of the value of the improvements. No one can estimate how large a sum would be applied for by them, but it is no doubt a large amount. Whatever it might be, it is obvious that this bill cannot possibly assist more than one farm mortgagor and tenant out of seven. For the other six the bill does nothing. And, of course, it gives no benefit to the 1,157,848 farm owners who fortunately are free of mortgage debt, except as it is claimed that they would indirectly benefit by "inflation", which I shall discuss later.

If all the benefit of the bill went to the farmers living on mortgaged farms and none to tenants, it is plain that it would take care of only three-fourths of them—$3,000,000,000 under the bill, as against $4,080,000,000 of debt against these 1,569,178 farms—or 1,177,500 farms, which is only 18 percent of the total farms in the country which would stand to benefit under the bill.

If all the benefits of the bill went to finance purchasers of farms by the 2,644,365 tenants and none to mortgagors, it is again plain that it would take care of less than 1 tenant out of 5—$3,000,000,000 against $16,381,557,526—or about 479,520 tenants, and would do nothing for the remaining 2,184,845 tenants. For them the bill promises bread and gives them a stone. If the benefit of the bill went to the 479,520 farm tenants and nothing to the mortgagors, it would benefit less than 7 percent of the total farmers of the Nation, leaving nothing for 93 farmers out of 100.

The advertised claims of this bill as the solution of the farm problem and the salvation of hard-pressed farmers simply do not stand up.

If we provide for only three farm mortgagors out of four, will the fourth mortgagor and all tenants feel that they have been treated justly and equally by their Government? They will not. They will demand equal treatment. How can we defend such a discrimination against them?

If we provide for only 1 farm tenant out of 5, what will the other 4 tenants and all mortgagors say about the way we have treated them? How can you defend giving the favor of government to only a few of many equally worthy and denying it to a far greater number who have the same claims to your consideration?

The answer is that you cannot defend your work, and, having created injustice, you will be subjected to irresistible pressures to remove the injustice you have created. You will be asked to treat all alike.

If you do, and I know many proponents of the bill intend to do that very thing, instead of $3,000,000,000, you will eventually issue many times that amount to finance farm debtors and tenants, possibly up to the figure given of $20,461,557,526.

And when you have financed all farm debts and provided money for all farm tenants to buy farms at 1½-percent interest and 1½-percent principal, or 3 percent, which uncounted numbers will do, as 3 percent is far less than many now pay as rent, what will you then say to the wage earner and home owner and house buyer and tenant in the towns and cities of America? Mortgages on homes in towns and cities total about $20,000,000,000 more, to say nothing of homes that city tenants and purchasers on land contract would like to buy, as well as merchants and businessmen hard pressed with debt.

What are you going to say to them? Are you going to say, "We are sorry. We will provide the farmer with 1½-percent money, but not you people who live in town. You are not as deserving as the farmer."

The Home Owners Loan Corporation has made 1,016,142 loans, totaling $3,081,000,000, on town and city homes at 5-percent interest. Can you justify three billions to farmers at 1½ percent and three billions to wage earners at 5 percent?

Who thinks he can defend any such discrimination—1½-percent money to the farmer and leave the city mortgagor and tenant and the buyer on land contract of a city home to pay 5, 6, or 7 percent? In view of the fact that the 70 percent of our people live in town and 30 percent in the country, it is as certain as sunrise that the 70 percent will demand and get the same treatment as the 30 percent. If they do not, they will elect a Congress that will give them equal treatment.

This is a road that has no turning. "Controlled inflation" by this means is a dream. It does not exist in the field of practical politics.

Either you are going to discriminate against large groups of people—a far larger number than you help—or you will remove the discrimination by finally voting out twenty or thirty or forty billions of paper money to refinance all debts—rural and urban—and all tenants, and when you have done that no one is helped and everyone is ruined by skyrocketing prices, the farmer included, with a dictator seizing the reins of power in a chaos such as has overwhelmed three-fourths of Europe.

Believing as I do, that this bill is the beginning of the road to ruin, from which there is no turning once we embark upon it, I have no choice but to vote against it. It is either unequal and unjust discrimination toward citizens equally worthy and equally in need or it is billions of ruinous inflation. There is no escape from that conclusion that I can see.

But, again, for argument's sake let us suppose that the provision in the bill that no more than $3,000,000,000 of money shall be issued remains the law permanently, what then? Someone will say, "Well, let us help those in distress up to $3,000,000,000, anyway. Why deny that much good?"

The answer is that to do temporary good to a few you cannot avoid harming an equal—in fact, a much greater—number.

For example, here are two farms, A and B, of equal value, producing the same kind and quantity of crops for the same market, both mortgaged for $5,000, at 5-percent interest. That means that both have a fixed interest charge of $300 a year. You refinance A at 1½ percent, or $75 a year. As your funds will not go around, you do not refinance B. A pays $75 a year interest and has 47 years to pay. B continues to pay $300 interest a year. A, therefore, is given an advantage over B of $225 in annual interest charges alone, to say nothing of principal payments.

What does this do? It makes A desirable to buy and by the same token destroys the real-estate market for B. No one would buy B with a 6-percent mortgage when he can buy A with a 1½-percent mortgage. In 10 years, at an interest saving of $225 annually, a buyer could afford to pay up to $2,250 more for A than B—to say nothing of lower payments on the principal. As a result you have reduced, if not destroyed, the real-estate market for all farms not financed at 1½ percent. Am I to not consider them? This would apply also to the 1,157,848 farms now free from debt. Are they to be forgotten? It will hurt their real-estate market also, for the reason that a prospective purchaser will certainly prefer to buy the farm with 1½-percent interest and 47 years' maturity. The farmer who is fortunate enough to get 1½-percent refinancing under this bill will be able to capitalize his interest saving at the expense of all other farms in the same real-estate market.

We can enact this bill but we cannot repeal human nature or, as Abraham Lincoln once said, "escape the verdict of history." "I know but one light to guide my feet, and that is the lamp of experience." Not only in all history is there no precedent that justifies this bill, but, on the contrary, the one example of legislation most like this bill demonstrates how futile it is as a solution of the difficulties of farm debtors and farm tenants.

I refer to the experience in Ireland. The Irish Land Act of 1903, known as Wyndham's Act, and other similar legislation before and since then provided for the financing of purchases of farm land by tenants at low total interest and principal payments yearly. More than half of the land purchased by tenants took place at the rate of 3¼ percent—about the same as this bill.

What happened? The right to buy at this cheap interest and principal rates of payment became known as "tenants' rights." These "tenants' rights" became highly desirable, and in many cases the tenant right became as valuable as the land itself.

I quote from the Struggle for Land in Ireland, 1800–1923, by John E. Pomfret:

> The tenant no longer competed for the landlord's land since his interest had become a fixed and known quantity. Instead the tenants entered into competition for the tenant right. In bidding for the farm of an outgoing tenant the applicants bargained fiercely against each other, not for the appurtenances of the farm but for the right to obtain a holding at a fixed rental; and in this new struggle for land the tenant suffered as before. The tenant right was as valuable as the interest that was being purchased from the owner.

The experience in Ireland demonstrates how necessary it is to think things through, and how cruelly disappointing much well-meaning legislation for socially desirable ends turns out to be if not thought through.

What reason is there to believe that the result would be different under this bill? That the 1½ percent land would not rise in the speculative markets at the expense of all other farms and all other farmers? True, a small minority who would originally participate in the $3,000,000,000 made available by this bill would benefit for a time at least, but it seems as plain as a pikestaff that by helping a small minority you not only subject the majority to unjust credit discrimination but, more than that, their farms cannot find buyers in the same real-estate market with farms financed at 1½ percent.

I again repeat, let us support farm credit legislation that treats all farmers, equally situated, alike. This bill is a denial of that sound principle of "equal rights for all, special privileges for none." This bill throws one-third or one-fourth or one-seventh of the farm mortgagors and tenants into unfair competition with all the rest.

In voting against this bill I am voting to protect the great majority of farm borrowers and tenants against this unjust discrimination and unfair competition.

There are other dangers that lurk in this bill.

We have to consider the rights of existing borrowers under the Farm Credit Administration, as well as the investors in its bonds. This bill is certain to subject them to the danger of serious loss.

Let us see why this would be so. It arises, first, from the fact that no one will buy the 1½-percent, 47-year bonds proposed to be issued under this bill. Therefore, existing mortgages would be paid for only by the issue of $3,000,000,000 of Federal Reserve notes.

The Farm Credit Administration now has outstanding its own issues of farm loan bonds bearing interest at from 3 to 4½ percent and not callable for from 8 to 10 years and now selling at a premium. As a substantial number of its farm borrowers would no doubt refinance their present loans under this bill at 1½ percent, the Farm Credit Administration would receive cash therefor.

Could it, in turn, reinvest the cash so received in Government securities that would yield enough to continue to pay the 3- to 4½-percent interest on its noncallable bonds now held by the public? The Farm Credit Administration states that it could not. The average interest rate on Government securities is now 2.55 percent—not sufficient to meet the rate paid by the Farm Credit Administration on its outstanding bonds. That means only one thing—interest received would not equal interest paid and the Farm Credit Administration would default in the interest on its outstanding bonds, and this, in turn, would mean receivership and liquidation of the system. Receivership would cause a loss of the $113,000,000 capital-stock investment in the Farm Credit Administration now held by some 600,000 farm borrowers, to say nothing of $217,000,000 invested by the Government.

It is apparent that there is much more to be thought of in this bill than its proponents have made public. They have never thought it through.

The destruction of the present Federal land-bank system and the loss of the capital-stock investment of 600,000 farmers would in all probability give such a black eye to farm credit that private lenders of farm credit would call their loans just as fast as they could.

Where would farm borrowers go then?

Aside from the disaster which the bill threatens to the Farm Credit Administration and private farm credit, it is to be noted that the bill makes it the "duty of the Federal Reserve and national banks to invest their available surplus and net profits" in the 1½-percent, 47-year, nonsalable bonds to be issued under this bill.

That would "freeze" $3,000,000,000 of the assets of our banks in paper they could not turn into cash.

What effect would that have on bank borrowers, the merchant, and manufacturer, and so forth?

Upon careful study, the bill appears certain to—

(A) Benefit temporarily only one-third or one-fourth or one-seventh of the total farm borrowers and tenants of the Nation.

(B) Impair the real-estate market of all other farmers.

(C) Destroy or seriously harm the present Farm Credit Administration.

(D) Put to serious hazard $113,000,000 capital-stock investment of 600,000 farmers in the Federal land-bank system.

(E) Drive private lenders out of the farm-credit field.

(F) Freeze three billions of the assets of Federal Reserve and member banks, thus impairing their ability to serve their customers, and thus causing a return of business stagnation among those who live in the cities and are in turn the farmers' market.

(G) Put in motion forces that would press for an uncontrolled and uncontrollable inflation that would be ruinous to every home in America, the farm home included. After inflation had swept over Germany, the farm-mortgage debt in terms of gold marks was double what it was before. This was due in part to the fact that in a period of inflation commodities—which the farmer has to buy as well as what he has to sell—increase in value faster than real estate.

Mr. Chairman, this bill suffers from the same disease that prevented any favorable action on the soldiers' bonus until it was divorced of monetary experimentation. Farm credit is one thing. It ought to be treated on its merits. Any attempt to mix farm credit and monetary theory is bad for both.

I was raised on a farm—a run-down, hill farm—that sold, buildings and all, for $6 an acre. In saying that I say all that is necessary. There never was anything but a depression on that hillside farm.

My natural sympathy, therefore, goes to the farmers of my district and the entire Nation. They are literally the backbone of the Republic. I have voted for every farm measure that gave reasonable promise of helping them to secure equality with those who live in the towns and cities.

But ballyhoo is one thing; careful study is another. This bill will not stand examination. As it will help only a few and harm most of the farmers themselves, I am unable, as their friend and well-wisher, to vote for it.

Time does not permit a review of farm progress under recent legislation. It has been real and substantial. Farm income in 1935 was about $3,000,000,000 more than 1932. In other words, a single year's increase in income was equal to the total amount to be loaned under this bill.

While a reduction of overhead costs through reduced interest is important it is far more important to increase income. One and one-half-percent interest under this bill would help only about 18 percent of farm debtors. But increased income helps all farmers.

Commodities raised by farmers have doubled in price in the past 3 years, an increase more than any other group in the price index. I hope it will continue until farm and city goods are placed on a parity where they can be exchanged freely.

A large, perhaps the greater, part of this increase has been due to untying the American dollar from the old fixed weight of gold. I have strongly supported the administration's policy in this regard and shall continue to work for a dollar that will have a substantially uniform exchange value for all commodities, rather than one commodity, gold, which fluctuates as does a ton of coal or a pound of iron. I favor a nonpartisan, nonpolitical monetary "Supreme Court" that will make such congressional policy effective for farmers and town dwellers alike.

Another policy I strongly favor is the development of the cooperative movement, not only to reduce selling costs in marketing farm commodities but also to reduce the middleman expense for what the farmer buys. The cooperative movement is democracy at the grass roots—a sound middle ground between irresponsible individualism and compulsory paternalism.

Since the spring of 1933 over $2,000,000,000 of farm debt has been refinanced by the Farm Credit Administration, with a total of $3,361,555,498 outstanding on April 30, 1936. The long-term interest rate is from 4 to 5 percent, a saving of one dollar in three. Until 1938 it has been further reduced to 3½ percent, the lowest interest rates ever to be had in America. Interest savings total $72,000,000 annually. Through scale-downs, $200,000,000 of principal has been wiped out on the $2,000,000,000 of mortgages, about 10 percent.

Foreclosures have been cut in half—from 39 per 1,000 farms for the year ending March 15, 1933, to 19 per 1,000 in the year ending March 15, 1936. Out of 1,000 farms, at the present time 981 are not being lost to their owners. No one can deny that this is not real progress. It is shown by the increase in real-estate values. A testimonial to this advance is the fact that private credit instead of getting out of farm lending is now reentering that field—70 percent of farm loans being made by private lenders in 1935 as against 23 percent in 1934, and at lower interest rates.

Another thing that makes the future look better is the development of new farm markets. Millions of acres are now in soy beans used for paint. Then there is the growing market for tung oil; for paper from slash pine; for power alcohol from corn and Jerusalem artichokes—possibly this is the most important of all. Many chemists believe industrial alcohol will some day take the place of gasoline and put every idle acre at work. One hundred pounds of cotton go into every automobile and its tires. Cotton is being used as a binder in concrete highway construction. Plastic materials such as the steering wheel of automobiles, cellophane, and "silk" stockings are coming from the farm. The Farm Chemurgic Council looks forward to the day when houses and furniture will be "grown" on the farm. Experiments in rubber from milk weed are now going on. Industry and chemistry are apparently just at the threshold of furnishing agriculture new markets that will completely change the outlook for rural America.

I do not claim that agriculture is yet reestablished to its just position in the life of the Nation. But it is certain that it is closer to the goal than at any time in many years.

Mr. NICHOLS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the figures which the gentleman from Indiana [Mr. PETTENGILL] has prepared are probably correct, I do not know, but when the gentleman says that these figures will portray the benefits that will be reflected to the farmers by the enactment of this legislation, the gentleman is incorrect for this reason. One of the biggest benefits that not only the farmers but the great mass of all the producers of this Nation will receive from this bill is not whether or not as an individual he will get money to pay off a mortgage on a farm. The general benefit will flow from the fact of the so-called expansion of the currency, which simply means the putting into circulation of more of the price-fixing units, cheapening the purchasing power of the dollar.

Today, when a man takes a cash dollar and goes into my district in Oklahoma and buys a dollar's worth of cotton, he gets 127 cents' worth plus of my farmer's cotton for his dollar. This applies to labor. When a person buys a dollar's worth of labor at the present purchasing power of the dollar, he buys 127 cents plus worth of that man's labor, and so it applies all the way down the line.

Therefore if this bill can be held to its present rate of interest, so that if it becomes law they cannot issue bonds instead of issuing the currency, then the expansion of the currency by $3,000,000,000 will bring the purchasing power of the dollar down low enough, I hope, so that it will have a purchasing power of only 100 instead of 127 cents.

Mr. FULMER. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield.

Mr. FULMER. Is it not a fact that today, under the Federal land bank system, Farmer A is paying 2½-percent interest, while B, who is next door, is paying six?

Mr. NICHOLS. That is very true, and if you amend this bill and raise the rate of interest to 2¾ percent or some other percentage, certainly you will get it up to the point where it is profitable to issue bonds, and if you issue bonds, outside of the benefit that would flow from this set of figures, there will not be any benefit to the farmers of the Nation, because if this bill is to give them genuine benefit you have got to keep the rate of interest so low that it is not possible to issue bonds, but it is safe to issue currency or United States Treasury notes.

Mr. REILLY. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield.

Mr. REILLY. Then the gentleman admits that this is an inflationary measure?

Mr. NICHOLS. So far as I am concerned, I am for it because it is an expansion of the currency measure, and insofar as I am concerned I would be pleased if there were a provision in the bill which would stop the further issuance of tax-exempt Government securities. [Applause.]

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. NICHOLS. I yield.

Mr. RANKIN. The gentleman from Indiana [Mr. PETTENGILL], who made these figures, shows by his own figures that he does not understand the bill, for the simple reason that the farmers who profit would not be limited to the amount of $3,000,000,000.

Mr. NICHOLS. And I want to say at this point that something was said on the floor yesterday by a Member who said he controlled his own vote and was not influenced by any outside influences. I may say to you that I control my vote, too, and I am not supporting this measure because of any pressure put on me or any persuasion being used on me by the National Union for Social Justice or anybody else. [Applause.]

[Here the gavel fell.]

Mr. GRAY of Indiana. Mr. Chairman, while this bill is not a full measure of relief, it is a step in the right direction, and, if followed by other steps carrying the same low interest to home owners, it will bring relief from the slavery of debts, release the people's income from the exhaustive drain of interest and mortgages, and leave the earnings free for use as buying and consuming power.

THE GOVERNMENT FURNISHES THE MONEY

The enormity of the unjust discrimination against the people can be realized only when it is understood that the Government is printing the money, guaranteeing and standing behind it to make it good, and insuring its redemption, and then turning it over to private bankers for only three one-hundredths of 1 percent to loan to the people at 4, 5, 6 percent, or even a higher interest. When it is realized and understood that after turning this money over to the bankers, the Government is borrowing back the same identical money on bonds at 3 and 4 percent, and the people are paying millions for the use of their own money, the enormity of this injustice will appear.

PROVIDES A LOW INTEREST RATE

This bill is to require the Government, loaning this money issued to the Federal Reserve banks at three-hundredths of 1 percent to loan the money direct to the farmers at 1½ percent, or a percent 50 times more than the Government is charging the bankers for the same money. And yet, with the farmers offering to pay 50 times the interest charged the bankers, these private bankers are objecting and declaring such a low interest rate to the farmers would be "inflation." But the true and only reason appears that the bankers would not be getting the interest.

BONDS EXEMPTED FROM TAXATION

But this is not all to be considered. After the private bankers objecting gets the money for three-hundredths of 1 percent, or one-fiftieth of what the farmers are offering to pay in this bill, the Government exempts these bankers from all taxation on the money and bonds. But the farmers under the provisions of this bill are not only offering to pay 1½-percent interest, or 50 times more than the bankers are paying, they are further offering to continue paying taxes upon their mortgaged property, and are claiming no exemption as claimed and granted to the bankers.

THE GOVERNMENT WILL GET MORE AND THE FARMERS WILL PAY LESS

If this bill becomes a law today it will make this substantial difference: The Government will receive from the farmers $45,000,000 more money than from the bankers who are objecting. And the farmers will be paying $90,000,000, less interest, and the bankers will be taking no interest on the money loaned by the Government. This is the reason that this bill is being opposed by the lending bankers, the reason they are raising the cry of "inflation" and charging "unsound" and "bad" money.

The Government is issuing millions of money to the big banks and financial interests based upon whisky paper or distiller warehouse receipts. These lending bankers are taking this same money based upon distiller's warehouse receipts instead of upon improved farm land under this bill. The only difference, they collect interest upon the money, which makes them overlook so-called inflation and all the vicious evils warned of as "unsound" money.

OBJECTION OF CLASS LEGISLATION

A further objection urged against this bill is that it is class legislation, favoring the farmer over other classes of people. But this objection is more apparent than real. While it favors farmers directly, it favors all other classes no less indirectly, and to an extent substantially equal with farmers. While I am favoring an equal interest charge for all classes, home owners, and others as well as the farming and agricultural classes, yet there is no legislation pending today which will bring more certain and prompt recovery and create more employment to the laboring classes than to reduce the farm interest charge and help the farmers pay their debts.

THE PROBLEM OF CONSUMPTION

The problem today is a problem of consumption, a problem of the buying and consuming power, a problem of the power and the ability of the people to buy, take, use, and consume the products of factory, mill, and workshop. The problem of production has been solved but the problem of consumption remains for solution.

FARMERS MORE NUMEROUS AND DOUBLE CONSUMERS

The farmers are not only the more numerous consuming class but they are a class of double consumers over others. They consume not only what other men buy and consume for personal and family use in their homes, but they buy and consume an equal or greater amount over and above personal and family use for farm upkeep, equipment, and operations. These items over personal and family use and above what other men buy and consume, includes ropes, chains and pulleys, harness, wagons and farm vehicles, plows, harrows, rollers, and disks, binders, reapers, mowers, and rakes. These articles over what other men buy further includes roofing, paint, and lumber, fencing, concrete, tiling, and hardware and a thousand and one other articles and materials which other men do not buy or use and which keeps factories, mills, and workshops running.

By means of these double needs and requirements of the farm population of the country over what is consumed by other men for personal use, the 43,000,000 farm people of the country and dependents are equal to 70 percent of all other consuming classes and without which restoration of the farm buying and consuming power there can be no recovery from this panic.

FARM DEBTS AND THE CONSUMING POWER

It was farm interest, debts, and mortgages under the fall of farm values and prices which destroyed the farm buying and consuming power and brought on this panic or depression. It was under the same fall of values and prices that interest, debts, and mortgages were doubled, measured in farm products with which the farmers have to pay.

The effect of the fall of farm prices and values, which multiplied taxes, interest, and debts, was to absorb all farm earnings and income, destroy and take away the buying and consuming power of the great farm population and dependents. And only the payment and release of farm debts can bring a restoration of their power to buy and consume the products of factory, mill, and workshop.

Before the panic or depression came and during the time of higher prices and farm values, the farmers were selling not more than one-fourth or one-third of their products—corn, wheat, and hogs—with which to meet interest, debts, and mortgage payments and were left with the other three-fourths or two-thirds thereof with which to buy, take, and consume the products of factory, mill, and workshop. And with the proceeds of these two-thirds or three-fourths of their crops, with which to use as buying and consuming power, the farmers were taking all industry produced. All the mills, factories, and workshops were kept running. All laboring men were kept employed on full time, and prosperity was everywhere abroad in the land.

But when farm values and prices fell in 1920 and again in 1929, the farmers were compelled to sell and give up not only one-fourth or one-third of their crops to meet interest and make debt payments but ultimately compelled to sell four-fourths or three-thirds of their crops and produce of the farm, or the whole of their stock, produce, and crops, with

which to pay taxes, interest, and debts, and no part was left with which to buy, take, and consume the products of factory, mill, and workshop.

And it was this failure of the farm buying and consuming power, this taking of all farm earnings and income with which to pay interest, debts, and mortgages, which reached back through retail merchants, through wholesale and commission houses, and brought on a failure of orders and stopped the mills, factories, and workshops and threw 30,000,000 laboring men out of employment. It was this drain of interest and debts which took away and absorbed all the earnings and income from the farm and destroyed the farm buying and consuming power. And as long as this greater share and portion of farm earnings and income and proceeds continues going into the vortex or sink hole of farm interest and debts, there never can be a recovery from this panic.

UNTIL FARM DEBTS ARE PAID THERE CAN BE NO RESTORATION OF THE CONSUMING POWER

If there had been no farm debts to be paid when farm values and prices fell and if other values and prices had fallen in the same proportion as farm values and prices, there would have been no destruction of the farm buying and consuming power. But now, until farm debts are paid or substantially reduced and more of farm earnings and income are left free for use as farm buying and consuming power, there never can be a recovery or economic relief from the blight of this panic or depression. The release of farm earnings and incomes from farm debts will alone restore the farm buying and consuming power.

WHAT FARMERS REQUIRE TO PAY FARM DEBTS

A restoration of farm buying and consuming power requires first that the farmers be released from the drain of interest, debts, and mortgages and that all or greater share of earnings and income be left free to be used by the farmers with which to buy, use, and consume the products of factory, mill, and workshop. The payment and release of farm debts and mortgages first requires a lower interest charge, and, second, higher prices for farm products not only for a part or reduced crop but higher prices for a full, normal crop.

The farmers' debts and mortgages are largely renewal debts and mortgages and were made or contracted for under and based upon higher prices for a full, normal farm crop. A higher price for a part or reduced crop will not restore the farmer's power to pay his debts and mortgages contracted under higher prices for a full crop. Because what the farmer gains in price he will lose in reduced production.

THE VORTEX OF FARM DEBTS AND MORTGAGES

Without such lower interest rates and such higher prices for a full crop the farmer's income will continue to be absorbed in the vortex of interest, debts, and mortgages, destroying their buying and consuming power. Farm debts and mortgages will remain unpaid and will pass on as burdens upon the farmer's children. This Frazier-Lemke bill, now being considered, will give the farmers the lower interest required and a restoration of the money supply, secretly withdrawn from circulation, will restore farm prices and the power of farm products, wheat, and corn to pay taxes, interest, debts, and mortgages.

When the farm buying and consuming power is restored, when all or a greater part of farm proceeds are released and made available to farmers with which to buy, take, and consume the products of factory, mill, and workshop, the subterfuge plea of overproduction, with people starving and suffering will no more be heard in the land.

DEBTS EXCEED ACTUAL PROPERTY VALUATION

The public and private debt today upon which the people are paying interest directly or in some concealed form is estimated in equal amount and value to all the wealth and property of the country.

THE SLAVERY OF IMPOSSIBLE DEBTS

The people can never pay and be released from these crushing, monstrous debt obligations. They are under the slavery of impossible debt which will be passed on to their children and to their children's children.

Every man is paying today not only directly upon his own personal debts, not only upon his own farm or home mortgage, but he is paying upon the public debt and upon the private corporate debt covered and concealed in the increased price which he is compelled to pay for the necessaries of life. The farmers of the country are struggling under an impossible debt burden. They may be able to pay their debts, but not while using their income with which to live. Or they may be able to earn enough upon which to live, but not while paying their debts. They cannot both pay their debts and live.

AN OLD STRATEGY OF KINGS

The same old artifice or strategy has been resorted here today in an effort to defeat this farm-relief measure which the kings of old and royal rulers have used for 1,000 years to hold their people in subjection for the levy and collection of tribute from them. Whenever their people and subjects grew restless and revolted against their burdens of taxation and tribute exacted the kings would start a war, array the people against each other, and make them defeat each other and hold themselves in bondage and subjection.

BONDAGE OF THE ISRAELITES

The farmers of the country today are struggling under a yoke of debt slavery and bondage as galling as ever held upon the Israelites by Pharaoh. Substantially 80 percent of the farm acreage is under mortgage far toward the limit and the money lenders are exacting their interest tribute. Under existing farm conditions these mortgages can never be paid. The owners will struggle a lifetime in self-denial to pay interest and taxes but will pass beyond, leaving the burdens of these impossible debts still unpaid and weighing upon their children.

In order for the farmers to pay their debts they must have a lower interest rate and they must receive for their crops not only a higher price for a part crop but a higher price for a full crop upon which basis these mortgage debts were based and contracted for. This bill, if enacted into law, will give the mortgage-ridden farmers interest at 1½ percent which they can pay, and the new money going into circulation will raise farm prices substantially higher not only on a part crop or reduced crop but prices upon their full crop, both lowering their interest and increasing their ability to pay.

FARMS UNDER OR SUBJECT TO FORECLOSURE

Two million farms are now under foreclosure or are subject to foreclosure, and without which lower interest and higher prices for a full crop millions of farmers will become tenants and others will be left struggling, staggering on under crushing, impossible debt burdens.

The labor Members who signed the petition to bring the bill out of committee and to bring it out upon the floor and constituting a full majority of the House membership are now hesitating and wavering in their support. The old strategy of kings is working to divide the laboring masses and defeat this bill.

THE STRATEGY OF DIVIDING THE PEOPLE

And if this bill is defeated, it will not be defeated upon its merits, nor by the free will of the majority. It will be defeated by the strategy of dividing the labor membership here representing the toiling masses, the farmers in the field, and the workers in the shops. If this bill is defeated here today, it will be defeated by the same class of men, by the certain, special, crafty few who have always held the masses in subjection during the long, painful years of the past and by this same strategy and artifice of dividing the workers and making them defeat themselves.

And when a bill comes here for the relief of industrial labor, these same legislative manipulators will reverse their strategic maneuvers and seek to array farmers against laborers, to divide them and make them fight each other, and in this way they will continue their strangle hold upon the people.

A LESSON FROM THE EXAMPLE OF HISTORY

After long, tedious years of slavery and bondage and crushing, exacting tribute taken by the kings and royal rulers of

old, the people finally realized the folly of fighting and contending one against the other and, joining and uniting first in France, in Switzerland, and in America, they threw off the galling yoke of servitude and exacting tribute and won their freedom and independence, the right of self-government, and to determine their own affairs. And some day the people—the laboring masses—may take heed and learn a lesson from these great examples in history, from the people held under kings, from the people held in bondage and slavery, and join together in common cause and free themselves from the modern slavery—the bondage of debts.

The men who labor on their farms and the men who labor in the mills for wages under industrial taskmasters have the same common cause and interest at stake as the people under the kings and royal rulers of old and kept divided to hold them in subjection. This morning this bill was assured of passage. Enough Members had signed to bring it out. Enough Members had voted for its consideration. The Labor Committee of the House and the chairman and leaders of that committee had declared for this bill to help deliver the farmers from the slavery of debt.

A LEADER TO LEAD LABOR

But now at the psychological moment, during the heated debate upon the bill, and when the monstrous imposition of charging private bankers only three one-hundredths of 1 percent and denying the same money to farmers at 1½-percent interest, or 50 times greater than the bankers pay, a letter was secured and read to the House from a man assuming the leadership of labor, condemning the bill solely because it would raise farm prices, the object of which is to divide the farm and labor membership of the House and make them vote against each other and thereby secure the defeat of this bill.

If this old strategy of the ages can be carried out to defeat this bill and the laboring masses divided and made to defeat each other, certainly no great claim of progress under our boasted civilization and intelligence can be made for the people of the world today over the people of thousands of years ago.

BIPARTISAN LEADERS AND THE PEOPLE

But the people today are not only being divided and arrayed against each other as farmers against industrial workers, but they are being kept and held divided and arrayed against each other by arraying farmers and other workers of one political party against farmers and laborers of another political party. The farmers, regardless of party organization, have the same common interest and welfare at stake, and yet they have been and are being misled year after year to fight each other at the polls, and while thus fighting each other they have been chained down in debt slavery, impossible for them or their children to pay.

As long as the laboring masses, the men toiling on the farms and the men laboring in the mills, can be kept arrayed against each other, whether as different classes of people or as members of different political parties, they will remain in the bondage of debts to pay tribute as interest to their masters. And as long as the farmers will allow themselves kept divided and arrayed against each other by politicians and party leaders they will remain in hopeless debt slavery and bondage and their children will be left carrying the chains of interest charges and held in the bondage of staggering debts impossible to pay.

The Clerk read as follows:

SEC. 3. Farm Credit Administration is hereby authorized and directed to liquidate, refinance, and take up farm mortgages and other farm indebtedness, existing at the date of enactment of this act, by making real-estate loans, secured by first mortgages on farms, to an amount equal to the fair value of such farm and 75 percent of the value of insurable buildings and improvements thereon, through the use of the machinery of the Federal land banks and national farm-loan associations, and to make all necessary rules and regulations for the carrying out of the purposes of this act with expedition. In case such farm mortgages and other farm indebtedness to be liquidated and refinanced exceed the fair value of any farm and 75 percent of the value of insurable buildings and improvements thereon, then such farm mortgages and indebtedness shall be scaled down in accordance with the provisions of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto. Such loans shall be made at a rate of 1½ percent interest and 1½ percent principal per annum, payable in any lawful money of the United States.

Mr. LEMKE. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 2, line 13, strike out the word "farms" and insert in lieu thereof "farm lands"; page 2, line 19, beginning with the word "in", strike out all down to and including the period in line 3 on page 3.

Mr. LEMKE. Mr. Chairman, the first amendment is simply the correction of a word. In place of "farms" there has been some question on the part of some Members that that would mean the buildings as well as land and therefore make double valuation. So instead of the word "farms" we insert simply the words "farm lands."

That is the first amendment in that section.

Mr. CELLER. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. CELLER. Suppose a man owns a million acres. Can he come within the provisions of this bill with all those acres?

Mr. LEMKE. That is not germane to this amendment.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield for a question?

Mr. LEMKE. I yield.

Mr. BANKHEAD. There is no definition whatever in this bill of what constitutes a farm. In bills heretofore offered where the question of farm relief has been involved there has been a specific definition of what constitutes a farm. What is the gentleman's interpretation of what a farmer is under his bill to be entitled to the benefits of this legislation?

Mr. LEMKE. It provides for the same farmer, uses the same machinery, and will loan on the same land under the same conditions as the present Farm Credit Administration. This simply provides to refinance farmers, as already defined by law.

Mr. BANKHEAD. Regardless of the size of the farm and regardless of the nature of the products that he produces?

Mr. LEMKE. No. That is already limited by law to $25,000, I believe.

Mr. BOILEAU. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield.

Mr. BOILEAU. This is an amendment to the Farm Credit Act?

Mr. LEMKE. Yes.

Mr. BOILEAU. And those definitions already appear in the law and apply to this act as well as to existing law, so that there is no ground for complaint in that regard.

Mr. LEMKE. That is correct. Now let me finish. I want to talk about the amendment, and not answer questions that can be answered later on. Then we go to line 19 of the bill and we strike out the words which have in mind a scaling down. We take that out, because those words seem to have been misunderstood by some Members. So in order to comply with the suggestion that there be no reference in this bill to the bankruptcy proceedings, we take all that part of it out. So we take out these words:

In case such farm mortgages and other farm indebtedness to be liquidated and refinanced exceed the fair value of any farm and 75 percent of the value of insurable buildings and improvements thereon, then such farm mortgages and indebtedness shall be scaled down in accordance with the provisions of the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

Those are the words taken out. We take out any reference to bankruptcy. So when we get through with this bill, we have nothing that refers to bankruptcy.

Mr. Chairman, I ask for a vote.

Mr. CELLER. Mr. Chairman, I rise in opposition to the amendment.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CELLER. Mr. Chairman, when we are told that this is a farm-relief measure, there is indeed a misnomer. The Farm Credit Administration very clearly told us yesterday, and the facts are undisputed, that only 15 percent of the farmers of the country will be benefited by this act. We are told that 66 percent of the farms in the United States are unencumbered. Mortgages on the remaining 34 percent amounted, as of January 31, 1935, to $7,770,000,000. Therefore the $3,000,000,000 provided in this bill would take care of less than 40 percent of the mortgaged farms. That would mean just this: Only 15 percent of all the farmers in the country would obtain benefits under this act at the expense of the other 85 percent of the farmers and all the other taxpayers of the country.

I come from the city of New York. We in the city of New York and the State of New York have voted fairly consistently for relief to farmers during the last decade. I personally never voted against a farm bill, except one, in my 14 years of tenure in this House; but when we hear that this bill only benefits 15 percent of the farmers at the expense of all other farmers and all of the other citizenry of the country, and when we further consider that all but the 15 percent of all farmers must foot the bills, it is time to call a halt. We of the city are not going to support you on a proposition of that sort. It is unfair; it is class legislation with a vengeance.

It is admitted now by the distinguished and honest gentleman from Oklahoma [Mr. NICHOLS] that this is an inflationary measure. That is the first admission we have had. Shall I say the truth has come out at last, and that this is an inflationary measure, involving in the first instance but $3,000,000,000? We are told beyond peradventure of doubt that this bill, if passed, will be followed by a similar measure to help the dwellers of the cities, to help the city owners of homes, and the total cost thereof would be $25,000,000,000. Will you stop with twenty-five billion? Of course not.

The history of the issuance of our continentals during the Revolutionary War, whence comes the phrase "not worth a continental", the history of France in 1789, the history of Germany a few years ago, all indicate the danger of toying with currency inflation. You plunge the population into the most acute misery. In all places where such measure as the Frazier-Lemke bill was tried the misery lasted over a decade. The first issue is always a small one and quite limited, but is soon followed by dozens of issues, and soon business becomes stagnant, capital more timid, yet always there is the cry for more and more issues of money.

The only ones who benefit are the speculators and the very rich. The poor become poorer, and the helpless become more afflicted. Usually dictatorships follow the orgy of inflation. Witness what happened in Germany, where Hitler became supreme; witness what happened in Italy, where Mussolini became supreme; witness what happened in France in 1789, when Napoleon ascended to power. It is easy for a dictator to lead into subjection a people made unhappy by inflation.

No one knows what tomorrow will bring forth. Nobody drinks to get drunk; but just as soon as you get on the toboggan of inflation, as admitted honestly by the gentleman from Oklahoma, you go the whole way. There is no stopping. You may sip inflation today, but tomorrow you are drunk with it. You may say this is only a bogey of inflation. It is no bogey. The menace is imminent. The danger is present. Once you pass this inflationary measure, there can be no stopping of similar measures.

Let me call your attention to this: In 1928 there was a bishop by the name of Cannon who injected himself into politics and tried to defeat certain candidates for political preferment. At the present time there is another gentleman stepping out of the pulpit into the political arena, thereby soiling his clerical robes. He tries to browbeat and threaten candidates for public office in various States, including my own. He boasts that he has defeated in several States numerous nominees. We must and should vote according to our own dictates, not the dictates of any pulpiteer. This particular cleric may be guided by the highest motives, but, nevertheless, his actions are dangerous. There is a marked cleavage between religion and politics. That cleavage must be maintained; otherwise Jefferson and our great patriots lived in vain. I shall wear the collar of no man, no class, no sect. Be no puppet for any man, be he rabbi, minister, or priest. I shall be no puppet to any one of them. [Applause.]

The CHAIRMAN. The question is on the amendment of the gentleman from North Dakota.

The amendment was agreed to.

Mr. RANKIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RANKIN: Page 2, line 14, strike out the following words: "to the fair value of such farms" and insert in lieu thereof the following: "to 80 percent of the appraised value of such farm lands."

Mr. RANKIN. Mr. Chairman, I do not care to take up the time of the House. I just wish to call attention to the fact that a great many Members have expressed the view that the bill ought not to be passed in the form provided for loans up to 100 percent of the value of the property. I have, therefore, offered this amendment to limit it to 80 percent of the fair value of the property. I offer the amendment, and I trust there will be no opposition.

Mr. GILCHRIST. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. GILCHRIST. What is the last word of the gentleman's amendment? Is it "such land" or "such farm lands"?

Mr. RANKIN. It is "80 percent of the appraised value of such farm lands."

Mr. LEMKE. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. LEMKE. I wish to state, Mr. Chairman, that the steering committee having this bill in charge has considered the amendment and is not opposed to it. The steering committee accepts the amendment. [Applause.]

Mr. RANKIN. Mr. Chairman, permit me to say to the membership of the House that this is simply an amendment that reduces the amount that may be loaned on any piece of farm land under this bill. Members who are opposed to it, or who profess to be opposed to it because the bill provided for 100-percent loans, I trust you will support the amendment.

Mr. McFARLANE. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. I yield.

Mr. McFARLANE. The amendment the gentleman has offered reducing the limit to 80 percent provides for the same percentage of appraised value as now exists in the Home Loan Act.

Mr. RANKIN. Yes; that is correct.

[Here the gavel fell.]

Mr. BANKHEAD. Mr. Chairman——

The CHAIRMAN. The gentleman from Alabama is recognized. Does the Chair understand the gentleman rises in opposition to the amendment?

Mr. BANKHEAD. Mr. Chairman, I prefer to rise for the purpose of supporting the amendment, because even the adoption of the amendment would in no wise change the basic principles of our opposition to this bill.

But I am rather curious to know why the author of this bill, after so many months of deliberation and consideration and after presenting to the Committee on Agriculture the absolute necessity for providing 100-percent loans, has so abjectly surrendered his views on this point.

Mr. LEMKE. Mr. Chairman, I may say to the gentleman from Alabama that we did that because we have a steering committee and because the Congress of the United States is writing the laws. On this steering committee we have Democrats, Republicans, and Members representing other groups, selected impartially. They have asked that this be done.

But I will say to the gentleman from Alabama that a 100-percent loan under this bill is safer than a 50-percent loan under the present Farm Credit Administration set-up with its higher rates of interest and payments.

Mr. BANKHEAD. I just wanted the gentleman to confirm the fact that he himself was still standing for a 100-percent loan.

Mr. LEMKE. Yes; but I am voting for this because I am guided by my colleagues on the committee.

The CHAIRMAN. The question is on the amendment of the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. BOILEAU) there were—ayes 120, noes 14.

So the amendment was agreed to.

Mr. McFARLANE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McFARLANE: On page 2, lines 11 and 12, strike out the words "existing at the date of enactment of this act", and insert in lieu thereof "existing on the 30th day of April 1936."

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

Is there objection?

Mr. MAIN. Mr. Chairman, I object.

Mr. JONES. Mr. Chairman, I modify my request.

Mr. Chairman, I ask unanimous consent that debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. McFARLANE. Mr. Chairman, this is just a corrective amendment to place in the bill, a date certain when mortgages under the bill will become eligible. This date is fixed as of the 30th day of April 1936, rather than the date the act becomes effective.

Mr. LEMKE. Mr. Chairman, I may say the steering committee that has this bill in charge agrees to the amendment and accepts it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. McFARLANE].

The amendment was agreed to.

Mr. MAIN. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. MAIN: Page 3, line 3, after the word "be", strike out "made at the rate of 1½ per", and strike out line 4 and insert at the end of line 5: "and such payment shall be made according to an amortization plan providing for annual payments of $3 for each $100 or fraction thereof of the initial principal sum in each of such mortgage agreements. Out of such annual payments not more than 1½ percent of the principal from time to time remaining unpaid on the respective mortgage agreements shall be applied as interest, and not less than 1½ percent of the original principal sum shall be applied toward the retirement of the principal debt."

Mr. MAIN. Mr. Chairman, it is my understanding from the sponsors of this bill that it is their purpose and intent that the mortgage obligations entered into under this law shall be retired in a period of approximately 48 years. As I read the language of the bill as printed, it would seem to me it would require 66⅔ years to retire the principal.

The purpose of my amendment is to put explicit language in the bill which will clarify the thought which sponsors have in connection with the term "amortization plan", and thereby we will make specific and clear the intention and purposes of the bill so that payments to apply on interest shall be on a downward sliding scale and payments to apply on principal shall gradually increase from year to year and thus the principal may be retired in a shorter period than that suggested in the language of the bill as it now stands.

Mr. Chairman, I want to say that if a transaction involving the financing of illegal liquor can be used as a basis for issuing currency, I would hang my head in shame if I should deny to the farmers of the Nation the right to use the machinery of the Federal Government to issue currency backed up by their obligations.

Some may say that the I O U of Al Capone is entitled to a preference over and above the mortgage bonds of sober, industrious, God-fearing farmers of the Nation. May Heaven forbid that such a condition should continue to exist.

I realize that those who would justify the issuing of currency to finance bootleggers will say that the paper of Al Capone could be liquidated in a short time. But, Mr. Chairman, I consider that the obligations of the American farmer, even if deferred over a period of 48 years, are infinitely more essential to the stability of this Nation than the paper of Al Capone even if it can be liquidated in 48 hours.

[Here the gavel fell.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. MAIN].

The amendment was rejected.

The Clerk read as follows:

SEC. 4. The Farm Credit Administration is further authorized and directed to liquidate, refinance, and take up chattel mortgages and other farm indebtedness, existing at the date of enactment of this act, by making loans at the rate of 3-percent interest per annum, secured by first mortgages on livestock, to an amount equal to 65 percent of the fair market value thereof, such loans to run for a period of 1 year, with right of renewal from year to year for a term of 10 years: *Provided*, That any depreciation in the value of such livestock is replaced by additional livestock, and the amount of the loan is reduced 10 percent each year.

Mr. LEMKE. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: On page 3, strike out lines 6 to 17, both inclusive, and renumber sections 5 to 19 as sections 4 to 18.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. LEMKE. I yield to the gentleman from Texas.

Mr. JONES. Does not the amendment which the gentleman has just offered make the bill conform to the other amendment which has been adopted?

Mr. LEMKE. Yes; this makes it conform to the other amendment which has been adopted.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. LEMKE].

The amendment was agreed to.

The Clerk read as follows:

SEC. 5. There is hereby authorized to be appropriated, out of any money not otherwise appropriated, $100,000 for the use of the Farm Credit Administration to carry out the provisions of this act. The necessary and actual expenses incurred in carrying out the provisions of this act shall be apportioned and prorated and added to each individual mortgage, and such sums so added shall be paid to the Farm Credit Administration for administrative purposes.

Mr. KVALE. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I hope I shall not take the 5 minutes allotted to me, for I well know the House is anxious to proceed with dispatch. So, instead of eulogizing those who have brought this bill this far—John Simpson, of the Farmers' Union, and his coworkers; the gentleman from North Dakota, Mr. LEMKE; Senator FRAZIER; and the others who with them have fought for the principles embodied in this bill for all these years—I propose to use my little minute to another purpose.

The measure has been amply championed on this floor, both during this debate and prior to it. Members of this body should know what it means, if they do not, for they have had sufficient opportunity. If their presence on the floor has permitted them to do so, they have heard from the lips of men like GOLDSBOROUGH, LEMKE, BOILEAU, BINDERUP, and others enough about the mechanics of the bill so that any expression that I might make would be needless as well as useless.

And we who are here well understand the attitude of the administration leaders.

The only thing I frankly cannot understand is the expression of the head of the American Federation of Labor, William Green, that has been read to us. That, to me, is some-

thing that will have to be lived down by him and his organization for long years, even though I hold the Federation itself without guilt. I say it as one who has without fail supported labor measures with the fullest conscience. It might well be labeled "traitorous" as far as I am concerned. I know he does not speak the voice of our Minnesota federation.

I realize our beloved MARVIN JONES, of Texas, who heads the House Committee on Agriculture, opposes us today. That is his privilege. He leads the opposition from a feeling of sincere conviction, and no one who knows him or has observed his activities could imagine him acting otherwise. But, Mr. Chairman, with all deference, I shall say that today I would prefer to follow others of the members of his committee, notably Representatives FULMER and BOILEAU, than to take his word in this controversy.

When my father came to this body, in the Sixty-eighth Congress—and God love his memory—JONES was third from the top on the Democratic side of the committee, under the leadership of Haugen, of Iowa. FULMER sat close to him, and those two are the only members of that then committee who now serve. They, the two, will recall the strife at that time for relief in the areas from which I come. Today they are divided in their opinions of this measure. I go with FULMER today.

But while my father served in this body, until 1929, he had nothing but the warmest admiration for MARVIN JONES, because JONES was one of those who had just as much interest in the dairy, the corn and hog, the wheat and flax, the diversified farmer, as he had in his own cotton and row farmer. The tenant threat even then was creeping upon the South just as it was enveloping us with deadly certainty.

Today we stand apart. But I feel that the bill, improved by amendments offered by LEMKE and others, will hold out hope to literally thousands in my State and area that have been giving in to the despondency and despair that attends a 15-year struggle against the loss of the homes that their parents and grandparents, as well as themselves, had housed and reared. This bill will give them hope. It will help the entire Nation at the same time.

This silly talk of wild and uncontrolled inflation need not be taken seriously, as is evidenced by the fact that the man opposing the bill who stresses that argument in debate is immediately followed by another who argues that the three-billion limitation is authentic. Then, again, those who argue that the interest rate is unfair lay themselves open to the accusation that they approve no affirmative action until all interest rates in all financial transactions have been leveled, and economists and sensible men know that is a long way off.

Mr. JONES. Will the gentleman yield?

Mr. KVALE. I yield.

Mr. JONES. I just want to pay an honest tribute to the gentleman's father, with whom it was my privilege to serve a number of years. I respected him not only for his ability but for his industry. I have never known a finer or more lovable character during my service here. Agriculture has never had a better nor a more loyal friend. I am glad that my friend who has just yielded to me is following in his footsteps and has many of the fine qualities of his illustrious father.

Mr. KVALE. Mr. Chairman, despite the remarks that included the purported expression of President Green, of the Federation of Labor, and despite the vicious tactics that have been employed in opposition to this measure, I hope the House will give it approval and permit it to be considered in the other body of Congress. I hesitate to believe that, if there also approved, our President would veto the measure.

If enacted, it would restore homes and homesteads to thousands of deserving citizens, revive prosperity in thousands of community centers and small cities as well as throughout the Nation, and would recreate in the hearts of afflicted and patient farmers the conviction that the Government in Washington is finally doing something for them instead of doing something to them.

[Here the gavel fell.]

Mr. BIERMANN. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. JONES. Mr. Chairman, will the gentleman yield?

Mr. BIERMANN. Yes.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BIERMANN. Mr. Chairman, I rise to ask the proponents of this bill a few questions, if they will be kind enough to answer them. In section 5 I find this language:

> The necessary and actual expenses incurred in carrying out the provisions of this act shall be apportioned and prorated and added to each individual mortgage and such sums so added shall be paid to the Farm Credit Administration for administrative purposes.

I should like to ask the author of the bill what this includes, and, specifically, whether it includes losses that the Farm Credit Administration may incur in taking back farms?

Mr. LEMKE. No; it does not. It simply includes the administrative expenses in connection with the making of the loans—that is, getting abstracts and various collection charges, the same as at present in the Federal land bank under existing law.

Mr. BIERMANN. How does the gentleman propose to take care of losses? Say, under this act a loan of $100 an acre is made and the land shrinks in value to $50 an acre and the Farm Credit Administration takes it back, who absorbs that loss?

Mr. LEMKE. There are not going to be any losses under this bill; and who is taking care of such losses at present? Losses would be taken care of by prorating them among the borrowers, only under this bill we make it possible for the Government of the United States to make a profit for the first time in the history of the Nation by issuing its own credit.

Mr. BIERMANN. Then, the answer to my inquiry as to how the losses are going to be taken care of is that there are not going to be any losses.

Mr. LEMKE. I have said they would be prorated among the borrowers. A very small cost to each farmer.

Mr. BIERMANN. Will these necessary and actual expenses be added to the principal of the mortgage or will they be prorated as the interest goes on?

Mr. LEMKE. They will be prorated as they are incurred each year, and a pro-rata estimate is made, and when you pay the interest you pay the costs.

Mr. BIERMANN. And this amount will be determined each year and added to the interest charged the mortgagor?

Mr. LEMKE. Yes; as is done now.

Mr. BIERMANN. Has the gentleman an estimate of what this additional charge will be?

Mr. LEMKE. The additional charge will be considerably less than it is at present because of the extravagant way in which they have been sending out collectors under the existing law because the farmers cannot pay. Under this bill the farmers will be able to pay, and I would say that the cost would be between one-fourth and one-half of 1 percent per year.

Mr. DONDERO. Mr. Chairman, will the gentleman yield?

Mr. BIERMANN. I yield.

Mr. DONDERO. Does the proponent of the bill mean to tell the House that no man will know what his interest is going to be from year to year, and that it might be more or less, according to the amount of the administrative expenses?

Mr. LEMKE. No; we have nothing to do with that. The interest is fixed, but the farmer is paying the expenses of administration right now, and they figure about 1 percent when they make the loan for appraisals, abstracts, and so forth.

[Here the gavel fell.]

Mr. BUCKLER of Minnesota. Mr. Chairman, 5 minutes does not give a man any time to speak, and I do not expect that I can change any votes in this Congress. I am not attempting that, because there are some of you in here whose

minds cannot be changed. I know that God Almighty had this in mind when he created the earth and put man on it. This is one reason he set the span of life at threescore and ten years. He thought it was the only way he could change some of the people on this earth. Some of them are in this Congress at this time. [Laughter.] But, of course, you may have a chance to be born again and come back, but I believe some of you would have to be born twice before you could catch up with the times, because times have changed so rapidly that at least some of you should have been born 100 years ago to have been up with the times. [Laughter.]

I remember yesterday, when the big guns of this House put the lesser lights down here in the well. They thought, perhaps, it would be much better to sacrifice them than to sacrifice themselves; but today the big artillery had to come down here in order to beat the bill. I can tell you lesser lights that you have got to go back to the country for your votes. If you defeat this bill, the big artillery will take the credit and what you lesser lights will get is hell from your people when you go back home. [Laughter and applause.]

I was amused yesterday and also today when I saw such gentlemen as my friend, MAY, of Kentucky, and this young gentleman from South Carolina get up here and shed tears for the farmers of the Nation. Oh, my friends, it is too bad. Now, I am a farmer, and you fellows cannot fool me [laughter]; neither can you fool the farmers that are sitting in these galleries; and if you fool the farmers back home, they are bigger fools than I think they are. [Laughter and applause.]

This is not a political question. This is a fight with the money changers and their friends on one side and the farmer and his wife and children on the other. Your vote on this bill is one of the most important votes you will be called on to cast in this Congress. It is a vote that each one of your constituents are watching all over this Nation. You will be counted standing on one side with the money changers or on the other with humanity and the farmers of this Nation.

I would not like to say anything here that would hurt your feelings, but I doubt if you have any feelings to hurt. You Congressmen who are fighting this bill do not seem to have any sympathy for the farmers of this Nation.

A great many of your fathers fought to free the slaves of the South. I beg of you to free the farmer's wife, who is nothing more now than a slave.

Many of you Congressmen nursed the breast of a good farm mother. She got up at 4 o'clock, ran after you, and waited on you until 10 o'clock at night. Many of your mothers, no doubt, have gone over yonder, never to return, but if she could only speak to you she would say, "Vote for this bill to help the farm mothers that are still alive."

Many a farmer's wife has gone to her grave long before her time trying to pay the interest to these money changers.

The farmer and his family put in a whole season working to produce a crop. Through no fault of theirs there may be no harvest, and they lose all their labor, but the interest has to be paid. The money changers never knock off or lose anything. If the farmer cannot pay his interest they take the farm.

You made a great deal of ado these last 2 days about 60 percent of the farms that had no mortgage. I think those figures are not true; but if they are, so much the worse for you fellows that are fighting this legislation. The loan companies and bankers have taken 2,000,000 farms away from the farmers since 1920. Of course, they have no mortgages on them. A great many businessmen in the cities, that made their money in business, bought a farm as a hobby. This accounts for most of your farms that are without mortgages now. There is not over 10 percent of the farmers that own land and live on the farm that have their land clear. In other words, 90 percent of these farmers are saddled down with mortgages.

A year ago we had, in round figures, $5,400,000,000 in currency and today we have $5,800,000,000, an increase of $400,000,000 issued by the Federal Reserve, which costs them 27 cents per thousand dollars.

There is less than $1,000,000,000 in actual currency in all the banks in the United States. Still they say we have $28,000,000,000 to loan. Talk about inflation, that surely is inflation for the big bankers of this Nation.

When the farmers ask for the privilege of using $3,000,000,000, you set up an awful howl. There is no limit to what the Federal Reserve bank could inflate.

They have $18,000,000,000 in Government bonds, and if they saw fit, they could have $18,000,000,000 in currency printed, or they could extend the credit for that amount and many times over.

They have $6,000,000,000 in gold. They could extend credit for $15,000,000,000. Talk about $3,000,000,000 inflation.

Christ drove the money changers from the temple, but we still have them with us. The time will come when we will drive them out, and we will have an honest dollar. [Applause.]

Every few days some of you Congressmen try to defend these bloodsuckers, money changers, the old Federal Reserve Board, and Wall Street bankers. What have they done? In 1920 they deflated the currency and broke the farmers and the small bankers of this Nation. They have driven 2,000,000 farm families out of their homes, filled the poorhouses, filled the insane asylums, filled all the jails in the State and Nation, caused people to commit murder, others to commit suicide, and you sit here and deny the farmers a cheaper interest that would help to save their homes, put money in circulation, give employment to labor, and help business of all kinds.

If you are not careful, somebody else will be warming your seat and you will be standing on the outside looking for a ticket to get in.

Some of you Congressmen who are opposing this bill were born with a gold spoon in your mouth, and you are still feeding out of it. You have not had an opportunity to mix with the farmers and the common people. I do not like to condemn you for voting against this bill for the reason that you do not understand it. Some of you others, before you came here to Congress, were as poor as church mice, and perhaps would have been in the soup line by this time except you grabbed hold of the public teat and have been milking $10,000 a year out of the taxpayers. You would really be worth more to the Nation if you were cleaning up the waste behind a good herd of cows. [Laughter and applause.]

[Here the gavel fell.]

The Clerk read as follows:

SEC. 6. The funds with which to liquidate and refinance existing farm mortgages and other farm indebtedness shall be provided by the issuing of farm-loan bonds by the Farm Credit Administration, through the land bank commissioner and Federal land banks, as now provided by law, which bonds shall bear interest at the rate of 1½ percent per annum, if secured by mortgages on farms, and 3 percent per annum if secured by chattel mortgages on livestock. These bonds, after delivery to the Farm Credit Administration, may, by it, be sold at not less than par to any individual or corporation, or to any State, National, or Federal Reserve bank, or to the Treasurer of the United States. And it shall be the duty of the Federal Reserve and National banks to invest their available surplus and net profits, after the dividends are paid to their stockholders, in such farm-loan bonds.

Mr. LEMKE. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 4, line 7, strike out first comma and all that follows down to the period in line 9.

Page 4, line 13, strike out the "duty of" and insert in lieu thereof "lawful for."

Mr. LEMKE. Mr. Chairman and members of the Committee, this amendment simply provides for the striking out of these words: "if secured by mortgages on farms, and 3 percent per annum if secured by chattel mortgages on livestock", and where the bill reads "and it shall be the duty of the Federal Reserve and national banks" the amendment provides for striking out the words "the duty" and inserting the words "lawful for."

The CHAIRMAN. The question is on the amendment.

The amendment was agreed to.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection?

Mr. PALMISANO. I object.

Mr. JONES. I ask unanimous consent that all speeches on this section and all sections hereafter be limited to 3 minutes instead of 5.

Several Members objected.

Mr. PFEIFER. Mr. Chairman, I move to strike out the last word. I rise for information. Am I to understand by this bill that insurable property, buildings, and their improvements on farm lands can be taken care of to the extent of 75 percent of the valuation of the buildings? I am conscious, as you are, that buildings on farm land do not only pertain to buildings which may be called a home and a barn but on some farm lands there are such buildings as churches, homes for the disabled, homes for the aged, agricultural schools and colleges. I would like to know if these buildings will be permitted to receive 75 percent of their valuation.

Mr. LEMKE. All these things are taken care of in the Farm Credit Administration. The provisions of that act will continue with the help that they will have when we get this money to do it.

Mr. MASSINGALE. Mr. Chairman, I rise in opposition to the amendment. Mr. Chairman and Members of the Committee, I have listened with a great deal of interest to the discussion on this bill, due largely to the fact that I come from that section of the country where the people are unanimously in favor of the Frazier-Lemke refinancing measure, and to the further fact that I sincerely feel this to be the most important piece of legislation ever presented to this Congress. It seems to me such legislation is actually vital to the welfare of the Nation and will prove of tremendous political significance. By this vote we express our sentiments as to whether or not we favor the farmer retaining his home, or favor helping him to find his way to the dole, along with the 20,000,000 already there. It occurs to me that most of the argument that has been made for and against this bill has proceeded upon the wrong basis. We ought not talk about this as an investment matter of a commercial nature. If I judge the sentiment right, money loaned to farmers to save their homes is an investment in the security of the Government of the United States and in the perpetuity of the institutions under which we live. [Applause.]

Of course, I do no know anything about conditions in the big cities, but I do not think it is material. This is what happened last year when we had under consideration the H. O. L. C. bill. We appropriated an additional $1,750,000,000 to you. You did not claim in this discussion that that money was to be borrowed by the owners of the property in the cities. It was freely admitted here that that was added to the former $3,000,000,000 that had been paid by the Government of the United States to save the building-and-loan companies from failure. God knows I sympathize with you men who live in the cities. I have not been to many big cities, but I want you to have your homes secure, just as the farmers of this country must have theirs if we continue as a government.

Do you know that out in our portion of the country the farms of Oklahoma, Kansas, Colorado, and Texas are fast going into the hands of mortgage companies? They are the ones who received the benefits under the A. A. A. simply because the farmer was driven off by foreclosure. The Farm Credit Administration and the Federal land banks, of which the gentleman from Texas spoke today, while they were of some benefit to the farm people out there for a while, have of late been a complete dud. I can give you illustration after illustration of a man who has a farm worth ten or twelve thousands dollars who has a mortgage on it for $2,500, and he cannot have it refinanced because the appraisers will not let him do it. The security is too good and the mortgage company wants the farm. On the other hand, if a man has a farm that is worth $5,000 and he owes six or seven thousand dollars on it, the Federal farm-loan bank will jump in there and save the mortgage companies. [Applause.]

[Here the gavel fell.]

Mr. PALMISANO. Mr. Chairman, I move to strike out the last three words.

Mr. Chairman, I have listened attentively to the arguments in favor of this bill. To my mind, this is not a farm loan bill. It is more or less a banker and insurance company bill. The fact that the gentleman from North Dakota has recommended and offered an amendment to strike out chattel loans, which will help the poor tenants who are unable to obtain any loans at all, shows, to my mind, that it is an insurance company and banker loan, in order that they might collect from the Government mortgages which they now have on farms that have depreciated considerably.

Mr. BINDERUP. Mr. Chairman, will the gentleman yield?

Mr. PALMISANO. No. The gentleman had 22 minutes and did not yield to anyone.

Now, the question has been put to the gentleman from North Dakota why he did not include city loans. The reply was, "Well, introduce a bill."

That reminds me of when I was a member of the Legislature of Maryland. The city of Baltimore paid 65 percent of the State taxes. We had a bill before the legislature asking for $7,000,000 for loans, and of the seven million we asked two million for Baltimore City. The contention was, "No. We will give you $1,200,000 out of the $6,200,000." In other words, 20 percent. Some of the members of the legislature who came to me said, "Why, PALMISANO, we are glad to vote for a bill if you will only put it in a separate bill. We know you are entitled to it, but you ought to do it in a separate bill. We cannot vote for it jointly in this bill." That is the same argument today that the gentleman from North Dakota makes—"introduce another bill." And when that other bill comes before the House the very gentlemen who are advocating this bill will run away from the bill that would put the city man on an equality with the farmers.

I hope this bill will be defeated, and if there is to be considered another bill to put the home owners' bill in with the farm, then perhaps a point of order will not be considered. But as it is today we are unable to offer an amendment to include the home owners' loans. I hope the bill will be defeated at this time and that in the near future we can consider a farm loan bill together with a home owners' loan bill.

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 15 minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BURDICK. Mr. Chairman, I move to strike out the last five words.

Mr. Chairman, I am sure this indulgent House will give me 3 or 4 minutes to defend ourselves as two orphans in this House. Many Members on the Democratic side have objected to this bill because it has been introduced by a Republican. About the time we thought we would have some support from the Republicans, along comes the distinguished gentleman from Massachusetts [Mr. GIFFORD] and disclaims any connection for the authorship of this bill.

I think it was from New England a few years ago that one of your Senators said we were the "wild jackasses" of the Northwest. If this is true, it is true only because our ancestors came from New England. [Applause.]

I will tell you the kind of Republicans we are. We are the kind of Republicans who, when we feel the President of the United States is right, are not afraid to stand up and vote with him; and we did that last year on the power company bill when about one-third of you Democrats ran out and deserted him. That is the kind of Republicans we represent in our State.

(Here it started to rain and hail, and the speaker stopped.)

Mr. BURDICK. No damned wonder it is raining! I knew we could do something on this bill. We made it rain. [Laughter and applause.]

As a precedent for money affairs, let me quote the Republican Party on the handling of gigantic financial matters. We lent a great deal of money to foreign countries during the war. At the time of settlement it amounted to $11,000,000,000. The Republicans of this Nation settled it as follows. Let us see if there is any business precedent behind this question of relief for the farmers of this country. We lent Great Britain $4,715,000,000, and the Republican administration settled that at a discount of 30 percent, and reduced the interest from 5 percent on demand to 3.3 percent payable in 62 years, and England has been so satisfied with the settlement that we have paid out to support the English, through loans in this country, more than England has paid us since 1922, the huge sum of $1,507,000,000; and the people of America paid it!

In the case of France they owed us $4,630,000,000. We gave her a discount of over 60 percent, and reduced her interest charge from 5 percent on demand to 1.6 percent payable in 62 years.

In the case of Italy, who owed us $2,000,000,000, we gave her a discount of 80 percent, and reduced her interest from 5 percent on demand to 0.4 percent payable in 62 years; and Italy has been so satisfied with the Republican settlement that she has not paid us a nickel since. [Applause.]

[Here the gavel fell.]

Mr. BURDICK. Mr. Chairman, in addressing the House I was given permission to extend my remarks on the subject of the farm-debt question and the Frazier-Lemke farm-debt refinance bill then pending before the House. In accordance with that authority, I submit the following statement:

First, I desire to call to the attention of the House my speech on this subject found on pages 7125 to 7128 of the CONGRESSIONAL RECORD, May 12, 1936. Next, I desire to call attention to remarks made by me and found in the RECORD under date of August 6, 1935. This last statement referred to contains a full and complete analysis of the farm situation and the tables of figures contained therein are most germane to the question now discussed. As a last preliminary to what I now wish to say, I call attention to extension of remarks made by me on February 28 and found on pages 3008, 3009, and 3010 of the CONGRESSIONAL RECORD, which discusses the failure of the Farm Credit Administration to be of further service in the refinancing of the unfinanced farm debt.

On the very day that this bill first came up for consideration—May 11, 1936—the Governor of the Farm Credit Administration mailed to every Congressman a memorandum giving reasons why the Frazier-Lemke farm-debt refinance bill should be defeated. Mr. Speaker, that memorandum is an amazing statement when compared with the testimony of Governor Myers given before the subcommittee of the Committee of the House on Appropriations during this present session of Congress. It is more amazing still when compared to the actual figures on the farm-mortgage debt, the rate of foreclosure, and the number of farmers who are still unable to secure the refinance of their loans. I do not believe it possible for any fair-minded person to come to any other conclusion than that this memorandum is positively misleading; that it contains misinformation, exaggerated statements, and assumes facts not in any degree involved in the present bill; that the arguments made in it are fallacious; that it sets up figures that are absurdly untrue and in direct conflict with what this same witness said before the Appropriations Committee; that the witness either deliberately misrepresented the situation or did not know the situation of the farmers. In either event the memorandum was misleading and cunningly gotten up to defeat the measure. Now, let us look to the facts:

Page 1 of the memorandum, Governor Myers:

> If the total farm debt and the total debt of urban-home owners eventually were to be refinanced under H. R. 2066, or similar legislation, over $25,000,000,000 would be required.

The bill did not provide for the refinance of urban-home owners. What did Myers make this statement for? Merely to prejudice Members of Congress. He wanted to hold up to them in a subtle way the horrors of inflation. This was an unfair statement and Myers knew it when he made it.

> Mr. CANNON. You say that farm values declined, and the value of the dollar during that time steadily increased, and it was harder each year to raise the interest.
>
> Mr. MYERS. That is right.
>
> Mr. CANNON. The farmer produced the same amount of stock and grain but the dollars he received were fewer.
>
> Mr. MYERS. In general that is true, especially since 1929.
>
> Mr. CANNON. Would you say the situation justified an inflationary policy?
>
> Mr. MYERS. I do not think my answer would be worth much, but may I say that I think conditions justify a restoration of stability of prices. We hope the approximate level might be maintained in the future, in order to avoid wide fluctuations both up and down.
>
> Mr. CANNON. Your position is that the farmer who borrowed a sum of money in 1920 which he could have paid back with a hundred hogs of standard weight and quality, should not be required, because of fluctuations in the dollar, to pay back 150 of such hogs.
>
> Mr. MYERS. I think the welfare of agriculture requires that the purchasing power of farmers' products remain as nearly level as possible from one period to another.

Compare this dialog with the statement of Myers on page 9 of his memorandum. He says:

> Similarly, 458 bushels of wheat met the interest bill in 1935 compared with 1,826 bushels in 1932.

Myers knows that these farm mortgages were not made in 1932, but way back before that, and an honest comparison would have included the number of bushels required to pay interest when the money was borrowed compared to the number of bushels required to pay the interest now.

I submit we want to know what happened to the farmer since 1920. Others may date their depression from 1929, but the farmers date their depression in 1920 and definitely fix the date as May 18, 1920. That day the Federal Reserve Board in the city of Washington broke the entire agricultural country by the adoption of a resolution increasing the discount rate. This resulted in calling farm loans all over the country. Prices of farm products, farm lands tumbled, but the debt remained unimpaired.

VALUE OF FARM PROPERTY

As the prices increased for the farmer's overhead expenses and the goods he purchased and at the same time the national income was becoming less and less and the farmers' percentage of that decreasing, we are not surprised to learn what became of the farmers' accumulations in farm property during the same period. This table tells the whole story. Value of farm property in:

1919	$79,000,000,000
1920	66,316,000,000
1929	58,000,000,000
1930	47,880,000,000
1932	37,027,000,000
1933	30,151,000,000
1934	31,655,000,000

During the same period the amount of interest increased:

1920, interest paid by farmers	$250,000,000
1935, interest paid by farmers	600,000,000

During the same period taxes increased:

1920 taxes	$452,000,000
1935 taxes	600,000,000

Myers states that the present farm indebtedness is $7,770,000,000.

The following table shows the farm indebtedness to 1934:

Farm debt

Year	Debt on lands	Other debts
1920	$7,857,700,000	$3,100,000,000
1925	9,369,620,000	4,305,000,000
1928	9,500,000,000	4,600,000,000
1932	8,500,000,000	3,910,000,000
1933	[1]	3,500,000,000
1934 [2]	8,200,000,000	4,100,000,000

[1] About the same. [2] Acre mortgage had trebled since pre-war.

This would indicate that the farmers were paying off their mortgages and were actually in better position financially now than in 1928. This important fact should be remembered that from 1928 to 1933 foreclosures and forced transfers greatly increased, and as each foreclosure or forced sale was made, that indebtedness was washing out and to that extent reduced the amount of outstanding mortgaged debt.

The proof of this statement is found in the figures published by the Bureau of Agricultural Statistics, House Document No. 9, Seventy-third Congress. An examination of these figures indicates that since 1920, 40 percent of all farm homes in America were either foreclosed, transferred to settle debts, or lost under delinquent tax sales.

Myers knew that the recorded debt on farms does not tell the story of the farm debt. On page 8 of the memorandum Myers says:

> The total scale-downs since May 1, 1933, are estimated at approximately $200,000,000. This is what actually happened. The Federal land banks would not close a loan unless the farmer could get his creditors to agree to take less than they actually had coming. The Federal land bank and all other Government agencies could not, under the law, make a discount, so the discount fell upon the general creditors.

With this knowledge, Myers knows that the recorded debt against farms does not tell the story of the farmers' debts. On page 2 he says, "The Federal land-bank system will be ruined by this bill." Let us see if it is not about ruined as it is, so far as helping any more farmers. Page 969, hearings, Myers said:

Loans made in 1934	$1,292,392,637
Loans made in 1935	449,412,704

Since 1935 the loans have been constantly declining, until today in some land-bank areas the officers tell you they have practically suspended. On the security offered and the appraisement they can make no more loans.

Myers admits this on page 957 (hearings). What is the land bank doing then? Myers tells you on page 970 (hearings):

> With the passing of the emergency the Federal land banks are not required to place as much stress on the making of loans and are, therefore, enabled to give greater attention to collections and real-estate operation.

He means the banks have practically quit loaning and are collecting, foreclosing, and selling out the foreclosed land. On page 3 of his memorandum, Myers says, in regard to foreclosures:

> During 1926, it is estimated that there were 18.2 foreclosures per thousand farms in the United States. In 1932 the figure reached 38.8 foreclosures per thousand farms. By 1935 the number had decreased to 19 foreclosures per thousand farms.

Let us see what the actual record is—page 941, hearings. Tables submitted by Myers himself:

Foreclosures and acquisitions of properties by the Federal land banks, 1930–35

Year	Number of outright foreclosures	Number of acquisitions by voluntary deed	Other acquisitions [1]	Total number of properties acquired
1930	[2] 4,645		71	4,716
1931	[2] 7,396		413	7,799
1932	[2] 10,039		1,369	11,408
1933	5,577	1,039	952	7,568
1934	4,024	756	1,095	5,875
1935	9,964	1,488	1,576	13,028

[1] Includes real estate acquired in trade, purchase-money mortgaged, foreclosed or canceled by deed, cancelations of real-estate sales contracts, and abandonments reacquired.
[2] Includes cancelations by voluntary deed, break-down not available.

When was Myers telling the truth? Was it when he presented figures showing conclusively that 1935 was the banner year of all years in foreclosures in the Federal land bank system, or did he tell the truth when he said in his memorandum that foreclosures declined in 1935?

Let us leave Myers and his fictitious figures and put in some that approximate the real situation in reference to foreclosures. I give them by States. The figures represent the number of farms per thousand that were foreclosed in the area having 39 percent of farm mortgages.

	1933, per 1,000	1934, per 1,000	1935, per 1,000
Illinois	44.6	33.8	21.7
Minnesota	59.1	37.5	24.3
Iowa	78.3	54.3	37.3
Missouri	51.2	36.1	29.0
North Dakota	63.3	31.3	18.9
South Dakota	78.0	64.2	62.4
Nebraska	58.2	45.8	41.0
Kansas	52.7	48.0	40.7
Mississippi	47.6	41.5	27.6
Oklahoma	44.7	23.7	16.4

To really show to what length Governor Myers went in misrepresenting the Federal land bank, look at page 1 of his memorandum:

	Percent
Total charges in Lemke bill	5
Total charges (Federal land bank) [1]	4

In the very next paragraph on the same page he says:

> Low interest rates (under the Lemke bill) granted to a part of the farmers would place the remaining farmers * * * under a tremendous handicap.

First he artificially raised the interest cost in the Lemke bill and lists as charges the entire cost. After getting the charges up beyond the present Federal land bank rate—to drive votes away from it—he then proceeds to throw a scare into the farmers because of this cheap rate. Finally he caps the climax and asserts, page 1, paragraph 2—memorandum:

BENEFITS ACCRUE TO LESS THAN 15 PERCENT OF FARMERS

Let us examine the facts:

Number of farm people (living on farms) 1935	32,779,000
Number of farms in United States (last available report)	6,812,350
Full owners and managers	3,258,328
Renters and contract holders	3,554,022
Total	6,812,350

Forty-nine percent of the farms in the United States are owned by the tillers and their managers.

Fifty-one percent of the farms in the United States are not owned by the tillers.

If we can help 51 percent of the tillers to own a farm—and this bill makes it possible—why did Myers say we could help less than 15 percent of the farmers? We are rapidly developing into a land of farm renters. Whenever a farmer loses his farm on foreclosure he usually, for a year or two, becomes a renter, and then is finally ousted and goes to the cities and villages and lives on relief or friends or displaces some other worker.

If we were to finance the farm debt existing in 1920 and which was never paid, but 40 percent of which has been foreclosed, the farm debt today would be $20,440,000,000, even assuming that the taxes and interest had been paid. When Myers says the farm debt is now only $7,700,000, two obvious facts come to mind: First, the statement is not true. I have submitted a table of the farm indebtedness in 1934, showing it to be over $12,000,000,000. That includes other debts beside the recorded debt on farms, but Myers should include this, since he takes credit for debt adjustments on all debt of $200,000,000.

All will agree that the number of farm mortgages paid during 1935 was a very small percentage. If the farm debt has decreased since 1934, it is due entirely to the foreclosures that have taken place during that year. Every time a foreclosure is made the recorded debt is wiped out, or at least charged off. The creditors, including the Government, still pursue the unfortunate debt wretches with deficiency judgments. Therefore the more foreclosures there are, the smaller the recorded farm debt will be. I am now thoroughly convinced that if Governor Myers can pursue his policy of foreclosures, which demonstrates an increase of 120 percent in 1935 over the year 1934, that the farm debt will soon be wiped out.

The recorded farm-mortgage debt today is approximately $8,400,000,000. We can reduce it by deducting the number of sheriffs' certificates held by insurance companies and the Federal land banks, but those certificates are still subject to redemption, and neither Meyers or anyone else has a right to deduct them from the debt.

In all the years the Federal land bank has been operating the outstanding amount loaned as of December 1, 1935 was $2,866,651,139, and remember this includes commissioners loans which tie up the farmers' personal property as well as his land. If we considered strictly land loans, the account would stand, commissioners loans deducted, $794,726,418; total, $2,071,925,721—and that is only a little over 24 percent of the mortgage debt.

The balance of the farm-mortgage debt is carried by insurance companies, banks, and private individuals, and fully 67 percent of that is due or carried on short-time extensions.

Mortgage debt held by the Federal land bank (round numbers)	$2,000,000,000
By banks, insurance companies, and individuals	6,400,000,000
Total	8,400,000,000
Of this $6,400,000,000 held by others, 67 percent is due or carried on short-time extensions	4,288,000,000

In other words, 50 percent of the farm-mortgage indebtedness is either due and ready to be called, for which no financial help in refinance has been offered. The Federal land bank having taken the cream of the loans, we can well imagine that there appears to be no help to be given to the farmers in America who sustain 50 percent of the farm-mortgage debt. Two million farm homes are affected and 10,000,000 farm people.

Myers says 66 percent of the farms are not mortgaged. That includes largely land that is rented. The Federal land bank foreclosed in 1935 over 13,000 farms. Of course, they are not now mortgaged; they are clear. Everyone who forecloses land owns land that is clear. Forty percent of all farms in 1920 have been foreclosed since that date. They are clear. All farms will be clear just as soon as Myers and his allies can clean up the rest of the farmers. There will then be no farm-mortgage debt to bother anyone. If farmers then ask—the real tillers of the soil—to get help to finance the farm debt, Myers will tell them there is no farm debt; the money is not needed.

Getting right down to business and cutting out all of these fanciful and juggled figures indulged in by the Governor of the Farm Credit Administration, we know that there are at least 10,000,000 farm people whose homes are in jeopardy and whose homes will be taken away from them in the next 3 years unless we get a Congress that will listen to the farmers and the facts.

Will unemployment end? Never, as long as we force these millions of farm people into the cities. William Green committed an enormous crime against the workers of this Nation when he condemned a plan that will keep the unemployment ranks from being augmented by millions. The administration committed the blunder of the ages in refusing to help the farmer save his home. Relief expenditures will and must increase. The Republicans—72 percent of them—in Congress helped the administration—the very ones that complain the most against the extravagant expenditures of the Democratic administration—the very ones who shout, long and loud, "My God, the Budget isn't balanced." Who is going to care about the Budget as long as we have hungry people?

In my limited way I have tried and tried to point out in this Congress the necessity of saving farm homes, but my appeals mean nothing. Other Members have made appeals, but to no avail.

What the future holds in store I know not, but I will gamble my life that no republic can long endure when good, honest tillers of the soil must be dispossessed and driven into the soup lines. It may be possible to continue to abuse the aged farmers whose possession of farm homes dates back 150 years—but neither this nor any other government can thus subdue the youth on those farms—the very cream of all our inhabitants of the United States. We are playing with fire when we try it.

What I say here is not said in any partisan spirit. I give to the Democrats what is due them. They have done much for the relief of farmers, but not enough. They have relieved the pain in a degree, but have not touched the cause. The Republicans when in power did neither. Neither party, as such, is fully aware of what is wrong, or willing to cure the trouble if it knew. Party squabbles will not settle the matter in the slightest degree. When the Democrats are in power you can prove by every Republican that the Democrats are incompetent, and when the Republicans are in power, no proof is necessary. What I have to say here will not influence a single Member, but I cannot resist the impulse to say it.

Mr. KNUTE HILL. Mr. Chairman, the merits of this bill have been discussed pro and con and the time allotted to me is not sufficient to go into it. I shall deal only with two or three issues.

One of the arguments advanced against the bill has been on the ground that it is inflationary. We who are backing this bill contend that it is controlled inflation, not anything that is dangerous. Most of you Members who have been in this Chamber for several years remember our former colleague, Lewis W. Douglas, a Representative from Arizona, who later was Director of the Budget. I believe you will agree with me that he is at least considered a proponent of sound money. Listen to what he was quoted as saying with reference to the proposition when we wanted to issue Treasury notes for the payment of the bonus. I read from the Kansas City Star:

BELIEVE IT OR NOT—GREENBACKS VERSUS BONDS

There is no fundamental difference, says Lewis W. Douglas, former Director of the Budget, between the issuance of new currency, virtually greenback money, and the issuance of Government bonds which represent more public debt. The lack of essential distinction, he shows, arises from the fact that the Nation's currency, Government bonds, and Government checks are alike "pieces of paper." In short, the country is not legally on a specie basis, its currency being no more redeemable in gold or silver than are its bonds. Therefore the former Director of the Budget sees no more reason to become alarmed about paying the bonus with "new money" than about paying it with baby bonds. Yet the difference, if not fundamentally different, is different in its "psychology." The issuance of greenback or printing-press money would immediately be seen as outright inflation and fears would be aroused accordingly. The other process, the issuance of bonds, is more subtle, less obvious.

In other words, we issue bonds in this country, but the people do not consider it inflation because they are fooled; but when we come out openly and ask for controlled inflation then they say it is dangerous inflation.

Another criticism is on a partisan basis, objection being made that the bill was introduced by a Republican Member of this Congress; yet it is well known here that he and many of those with him on the Republican side supported Franklin D. Roosevelt in 1932 [applause], and without that support he never would have been nominated and elected. But aside from its authorship let us see if this is not really a Democratic measure. The Democratic Party has always been the friend of the farmer. Its 1932 platform promised reduced rates of interest and relief for the farmer. This bill has been endorsed by 32 State legislatures, a majority of which are Democratic. It was passed by a vote of 18 to 5 by the House Agriculture Committee, with a Democratic majority. It was passed unanimously by the Senate Agriculture Committee, with a Democratic majority. The petition to discharge the Rules Committee was signed by 150 Democrats, and would have been signed by many more Democrats but for the interference of party leaders. This would be a majority of the House Democrats.

A letter from William Green, president of the American Federation of Labor, has been injected into the debate. Unfortunately too often leaders of national organizations do not represent the rank and file. On labor legislation I would rather follow CONNERY, of Massachusetts, and CROSSER of Ohio, than Mr. Green. On veterans' legislation I would

rather follow PATMAN, of Texas, and RANKIN, of Mississippi, than Commander Belgrano. We could go on, but this illustrates my point of view.

The two large groups whose purchasing power has been destroyed during the past decade, the farmers and laborers, are the forgotten men. Their interests are common. They have been kept apart by exploiting interests. Until they unite and drive from power their common enemy they can never succeed in getting real relief. Aesop has been quoted today in the "dog and his shadow" fable. Let me call your attention to another of his fables, the one where while two dogs were fighting over a bone a third stole away with it. It is a sad commentary to note that the nominal head of the A. F. of L. should see fit to inject dissension between labor and agriculture and thus permit the big industrialists and the bankers to continue to "steal away with the bone." But in spite of the Greens, I, for one, will continue to support labor legislation and strive for united efforts. [Applause.]

Mr. JOHNSON of Oklahoma. Mr. Chairman, I have no apology for giving my enthusiastic support to the pending Frazier-Lemke measure proposing to refinance farm mortgages. Let me say at the outset that I do not propose to be stampeded now because certain House leaders are opposing this measure. [Applause.]

I have a profound respect and deep affection for the leadership of this House, but I have my own responsibility, just as the leadership has its responsibility. I am voting today as my conscience dictates. I have been as regular, I will say to the gentlemen on the Democratic side, as most of the Democrats of this House. I have been glad to follow the leadership of this House when I believed it to be right, but have not hesitated to differ with any of my Democratic brethren when in my judgment they were wrong. I have been glad to follow our great leader in the White House, and although many insinuations have been made it is significant that no one has stood on the floor of this House today and said the President is against this measure.

Nearly every speaker who has opposed this legislation so far has insisted that this is class legislation. That has been their theme song. But we all know that when the farmers prosper all business prospers. It is also just as true that when the farmers are hard pressed and broke that their calamities are reflected in all business enterprises everywhere.

It is a matter of common knowledge that farm tenantry has been on a decided increase during the past decade. Hundreds of thousands of our industrious, honest, and capable home owners, through no fault of their own, have been thrown into bankruptcy. They have seen their life savings swept from under them during the past several years because of the unreasonably low prices of farm commodities, high taxes, and high interest rates. All of these have made it impossible for thousands of farmers to clothe and feed their families.

In the State of Oklahoma more than 62 percent of all the farms are now being tilled by tenant farmers. We have in our State over 133,000 tenant farmers. Much of this land on which these tenants eke out a bare existence is owned by the big mortgage and insurance companies. It is significant that for the most part it is our most fertile lands that are encumbered with heavy farm mortgages. In several of the surrounding States the percentage of farmers who have been driven from their homes is even larger than in Oklahoma. More than 80 percent of the farmers of Oklahoma have their farms mortgaged. In fact, there are only about 23,000 farm owners left in Oklahoma. Oklahoma farmers owe a total of $60,931,000. The situation is similar in many other States, especially in the South.

Many opponents of this measure have held up the Bankhead-Jones bill as a solution to our problem. For several months some of us have been advocating the passage of the Bankhead-Jones farm-tenant bill. If passed, it would bring a measure of relief to a large group of farmers. It is a progressive bill that the farm tenants of the country have been anxiously looking to this Congress to pass. But we know that the Bankhead-Jones bill has been sleeping peacefully in the Committee on Agriculture several months, and in spite of the efforts of many of us to get action on it that it is not on the calendar and not in the legislative picture so far as this Congress is concerned. Of course, that bill, if passed, would not reach thousands of distressed farm owners who are facing bankruptcy and who would be helped by the pending bill. But it would have shown at least a disposition on the part of this Congress to assist a large group of needy homeless and helpless farmers who are about to give up in despair.

If we are to have a happy, contented, and reasonably prosperous citizenry, we must have a people of home owners. In the breast of every farmer of America who does not live under his own roof is that yearning for a comfortable home for himself, his wife, and children. If farm tenantry is ever to be eradicated and if the deplorable unemployment situation is to be solved in America, this Congress now or at some future date must enact legislation that will make it possible for the millions who yearn for an opportunity to do so to actually own and farm their own farms. We cannot side-step the issue. We cannot, ostrichlike, stick our heads in the sand and ignore this perplexing and all-important problem much longer. This Congress has the opportunity today to really do something worth while for our farmers. Your vote on this measure today will speak much louder and will be appreciated infinitely more than honey-coated speeches and beautiful eulogies to the distressed farmers of your district. [Applause.]

Several of the opponents of this legislation have criticized what they call defects in this bill. The pending measure may not be perfect. Within the past few days certain amendments have been agreed upon to strengthen and clarify the measure. Possibly other amendments will be added before it is voted on today. One thing we do know, it is a sincere effort on the part of a large farm group, irrespective of partisan politics, in and out of Congress to give the farmer a square deal. [Applause.]

The pending bill provides, among other things, that farm mortgages shall be refinanced by existing governmental machinery at an interest rate of 1½ percent and also 1½ percent on the principal each year. It would take 47 years to amortize his loan at this rate. In 47 years the farmer could pay off his mortgage if the Frazier-Lemke bill becomes a law. For example, on every $1,000 borrowed the farmer would pay $30 a year for a period of 47 years.

It cannot be denied that under this bill the Government would have a safe loan. It is conceded that a first mortgage on land is the best security possible. This Government would get back not only every dime loaned to the farmer but also a small rate of interest totaling over $1,000,000,000. So the farmer is not asking for a dole. He is not asking for charity. He is simply asking his Government, that has been so magnanimous to the big banks, insurance companies, railroads, and other big corporations, to give the broke and distressed farmers real farm relief.

Some of the self-admitted statesmen of this House have been rather bitter in their criticism of this farm refinancing bill. It has been held up as wild inflation, as being impractical and unsound. Yet the record shows that some of the same gentlemen have evidently considered it statesmanship and economically sound to give governmental aid and straight-out subsidies to big business far beyond the limits of anything suggested or dreamed of by the sponsors of this bill to assist the unfortunate farmers of America. I have noticed that some of the gentlemen who are so bitter in their criticism of the Frazier-Lemke farm bill have voted consistently for unreasonable Federal subsidies to the big shipping interests.

Some of them have condoned a $90,000,000 loan to one bank in Chicago—a loan that has never been paid. That, according to some of the critical gentlemen here, is statesmanship, but those of us who would raise our voices in behalf of the farmers are criticized and scolded as being impractical and visionary. Some of these same self-admitted statesmen who are so critical today have by their votes repeatedly condoned and endorsed the attitude of this Government several years

ago, while some of them were in Congress, in canceling billions of dollars in debts due this Government by foreign governments. In voting for such an outrageous thing they saddled such debts on the backs of the American farmers and their children and their children's children.

In a desperate effort to try to frighten some Democrats who have been pledged to support of the Frazier-Lemke bill for years from doing what we conceive to be our solemn duty to the farmers of this country, it has been suggested that in giving our support to this measure that we are straying away from the fundamental principles of democracy. Well, let us see about that.

May I say that so far as party regularity is concerned, in Oklahoma that our Democrats have wholeheartedly endorsed the Frazier-Lemke bill. The recent State Democratic convention in Oklahoma enthusiastically and unanimously endorsed the pending bill. [Applause.] Not only that, but might I remind Democrats who seem to have the jitters about party regularity that the last Democratic National Convention went on record in no uncertain terms in favor of legislation to assist the farmers. In fact, one plank in the Democratic platform almost described the Frazier-Lemke bill. It pledged the Democratic Party in no uncertain terms to assist the farmers of America in refinancing their farm loans over a long period of years at a low rate of interest. That is what the Frazier-Lemke bill, if passed, proposes to do.

Mr. McFARLANE. Will the gentleman yield?

Mr. JOHNSON of Oklahoma. I yield to the gentleman from Texas.

Mr. McFARLANE. I think there are thirty-odd States of the Union that by their legislatures have endorsed this bill.

Mr. JOHNSON of Oklahoma. The gentleman is correct, and there will be other State legislatures and other State Democratic conventions do likewise before this fight is finished. [Applause.]

Much has been said this afternoon by opponents of this bill about the good work done by the farm-credit banks. It is true that the farm-credit legislation has been of great assistance to a comparatively small group of our farmers, but it is generally conceded that in the main the job has not been done, and will not and cannot be done, without additional remedial legislation.

In giving my support to this bill I am perfectly willing to accept the criticism of the self-admitted statesmen who oppose it so bitterly. That is their privilege, and it is the privilege of others to offer their criticism. Well do I remember that in my last campaign for Congress I was bitterly criticized by my opposition for my stand for the Frazier-Lemke bill. But I did not weaken then, and I shall not do so now. Some of those who were critical or silent concerning the pending measure in the past are supporting it today, and I predict that many who will cast their votes against it today will support it in the future if the farmers are charitable enough to give them another opportunity to do so.

Mr. Chairman, I expect to vote on this measure as I have on every other bill that has come before this body for consideration. I am going to vote as my conscience dictates, and in so doing I accord every other Member the same privilege. [Applause.]

[Here the gavel fell.]

The Clerk read as follows:

SEC. 7. In case all of said farm-loan bonds are not readily purchased, then the land bank commissioner shall present the remainder to the Federal Reserve Board, and the Board shall forthwith cause to be issued and delivered to the land bank commissioner Federal Reserve notes to an amount equal to the par value of such bonds as are presented to it. Such farm-loan bonds to be held by the Federal Reserve Board as security in lieu of any other security or reserve. The outstanding Federal Reserve notes issued under this act shall at no time exceed $3,000,000,000.

Mr. LEMKE. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 4, line 19, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

On page 4, lines 23 and 24, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. LEMKE].

The amendment was agreed to.

Mr. LEMKE. Mr. Chairman, I offer another amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 5, line 1, after the word "reserve" and before the period insert a colon and the following: "*Provided, however,* That as additional security and reserve the President, in his discretion, by Executive order, may set aside a gold fund in the Treasury as a reserve for such notes out of free gold in the Treasury or out of the exchange stabilization fund created by section 10 of the Gold Reserve Act of 1934, and maintain such reserve fund in an amount equivalent in dollars to not less than 40 percent of such notes outstanding."

Mr. BANKHEAD. Mr. Chairman, I make a point of order against the amendment—that it is not germane to the section of the bill just read, or, as a matter of fact, to the bill itself.

The CHAIRMAN. Does the gentleman from North Dakota desire to be heard?

Mr. BOILEAU. Mr. Chairman, I desire to be heard.

Mr. Chairman, in view of the fact this amendment or one similar to it appeared in the RECORD of yesterday the Chair has had some opportunity to examine the precedents and to determine whether or not in his opinion the pending amendment is germane. The section as written in the bill amends the Federal Reserve Act. In view of the fact that it refers to the reserve back of Federal Reserve notes, I feel that an amendment is germane which affects the reserve back of Federal Reserve notes.

Under the existing law, Federal Reserve notes are backed by 40 percent gold. That is the existing law. The section in the bill which this amendment would change now provides for the issuance of Federal Reserve notes. I am of the opinion that under existing law, even if this amendment were not approved, there would be 40-percent gold back of the Federal Reserve notes issued pursuant to the provisions of this bill. This amendment is offered merely to make it more specific, and I believe it is germane because it relates to the subject matter actually dealt with in this very section; in other words, the reserve back of Federal Reserve notes. For this reason I submit, Mr. Chairman, that the pending amendment merely is a perfecting amendment. The subject matter dealt with in this amendment is the same as that dealt with in this section of the bill, and it is, therefore, germane in every respect.

The CHAIRMAN. Does the gentleman from Alabama desire to be heard?

Mr. BANKHEAD. Mr. Chairman, I do not care to offer any argument on the point of order. It is apparent to me that under the rulings of the House and the precedents of the House the amendment is out of order, and I submit it to the Chair.

The CHAIRMAN. The Chair has had some opportunity to consider the present amendment in connection with an amendment that was offered by the gentleman from Texas this morning. The Chair directs the attention of the proponents of the amendment to the fact that section 5 (a) of the substitute amendment offered by the gentleman from Texas this morning also contained a gold provision. The Chair considered this provision and was to some extent influenced by it in the ruling he made at that time.

Much that was said in ruling this morning on the germaneness of the amendment offered at that time, of course, applies to the present amendment. The new section 6 provides for the issuance of certain Federal Reserve notes. The present amendment changes the form of that section and provides for a gold security and in addition to that provides certain discretionary duties for the President.

The Chair believes that under the rules and precedents of the House the amendment is not germane and, therefore, sustains the point of order.

Mr. SABATH. Mr. Chairman, I move to strike out the last word.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

Mr. BOILEAU. Mr. Chairman, we have another amendment to offer to this section, and I object.

Mr. SABATH. Mr. Chairman, some of the Republican Members, and the gentleman from Oklahoma [Mr. JOHNSON] who preceded me, called attention to the pledges and promises given the farmers of the United States in the Democratic platform of 1932. If these gentlemen will recall all that has been done for the farmers and agriculture—the beneficial legislation in their interest and the relief provided, their honesty will compel the admission that not only has every pledge been kept, but that under President Franklin D. Roosevelt and the Seventy-third and Seventy-fourth Congresses more has been done for the American farmer than has ever been done during the entire life of the Nation.

Had it not been for the opposition of the vested interests, even more could have and would have been done for them. It is to be regretted that the stand-pat Republicans, for purely political purposes, are charging and will claim during the coming campaign that the administration has failed to accomplish all that it promised. I am satisfied, however, that the great mass of farmers and the people realize that the President has done everything possible to improve their conditions and to bring about better times, better prices, and greater consumption.

While it may not be generally known, the fact is that the value of farm lands in the United States has increased as much as 50 percent and even higher throughout the country during the last year. The farmer today receives from 100 to 300 percent higher prices for his products than he did from 1931 to 1933.

Mr. KELLER. Where did the gentleman get such information?

Mr. SABATH. I have and will give you that information.

Mr. KELLER. Where does the information come from?

Mr. SABATH. Investigations and reports indicate that fact. It is really amusing to hear the threats from the other side to the effect that unless this bill passes, dire results will be the lot of the Democratic Party. The people generally, including the farmers, have seen their confidence in President Roosevelt and the Democratic Party justified. For one, I have supported every farm bill and all legislation in the interest of farmers. At this time, however, I cannot support this bill.

I am obliged to vote against this bill because it is class legislation. It provides no aid to the city dweller, but rather discriminates against him. Had the proponents of the bill broadened it originally, as I strongly urged, to make its benefits available to home owners, it would have had my support. This was not done. They were blinded to the needs of everyone but a small percent of farmers. Today amendments and changes have been offered to the bill. Had the gentleman from North Dakota [Mr. LEMKE] and his steering committee for the bill given serious consideration to the need for such changes to broaden the bill before, there would not have been the opposition to it that there is now.

I, too, can see where the farmer should be assisted, but I cannot lose sight of the crying needs of the city dweller. Consider the fact that in 1931, 1932, 1933, and even 1934, a million Americans lost their homes, and that had it not been for the Home Owners' Loan Act another million would have lost their homes. It is claimed that the Home Owners' Loan Act aided the home owner. You know as well as I do that this Home Owners' Loan Act indiscriminately offered relief to all home owners, and that the farmer, particularly the small one, had equal resource to its benefits. The proposed bill, on the other hand, gives the farmer a 1½-percent interest rate, against that enjoyed by city dwellers under the Home Owners' Loan Act of 4½ and 6 percent on private loans and mortgages.

My colleague [Mr. KELLER] asked where I get the information as to the increase in value of farm lands. For his edification and that of the other Members, I refer to the Sunday, April 26, 1936, issue of the most critical partisan newspaper in the Midwest, the Republican, anti-Roosevelt Chicago Tribune. It would be educational to reprint here in the RECORD the full-page statistical report, and map, which considers the subject, but rules of the House will not permit of that. As pertinent to the matter under discussion, however, I refer to what it has to say. Of the Joilet territory it states:

Seventy-percent increase in farm sales in Joilet territory in last 15 months over year of 1934. Values up 40 to 45 percent, with real-estate men predicting a further rise. Prominent among farm buyers are city businessmen seeking safe investments.

Of Iowa it reads:

Sales of Iowa farm lands in 1935 increased 50 to 100 percent over preceding year, and trend is even more abruptly upward for 1936. Three-fourths of buyers city persons acquiring land for investment.

As to Wisconsin, it states:

Wisconsin enjoyed a substantial increase in farm sales in 1935. An even more gratifying increase on the books for 1936. Majority of sales to city buyers, who consider rural lands among safest of present investments.

Of central Illinois, it reports:

Steady advance reported in farm sales in Galesburg area. City dwellers conspicuous among buyers. Property moving better than at any time in 4 years. Public again "land minded" because of safety of investment. Values increased 50 percent since fall of 1932.

Of Michigan, it reports:

Notable upturn of farm-property market in Michigan. Leading broker reports sales 300 percent greater in 1935 than in 1934 or 1933. Approximately third of all sales to city factory workers, a third to businessmen, two-ninths to those already engaged in farming, one-ninth to professional men.

As to Indiana:

Central and southern Indiana report increased farm sales everywhere that erosion has not reduced soil fertility. Values highest since before depression. Suburban farms near larger cities in great demand.

There are many other favorable reports, and what applies to the Midwest applies to the entire country. There is not space to print the full-page newspaper articles, but those portions I have quoted are representative.

I am reliably informed that a great deal of consideration is now being given by the President to legislation that will bring about a reduction of interest, providing even greater benefits to farmers, city dwellers, and home owners. I know that the President is very friendly to progressive legislation. He is doing everything possible to aid all classes and to bring about reemployment of all those now unemployed.

Some of my colleagues oppose the present bill because they fear inflation. Such is not the case with me. That is a term recklessly applied by the big bankers to any measure which threatens to curb their control of money. My stand in favor of expanding our currency has not changed, but I have been and still am against uncontrolled inflation. I hope that in the next session of Congress, legislation will be enacted to do away with 6-percent loans, and that we will be able to limit interest on all loans to 3 percent. That is a fair charge. I might mention that it is my intention in the next Congress to do everything within my power to remedy the evil whereby a small man pays 6 percent and even 7 percent on a loan, where the speculator and gambler has access to the money at one-half of that figure. Why should not the farmer, the merchant, and the home owner enjoy the same low rates? As I have stated, I will support a bill looking toward currency expansion to the fullest limit of my power; I cannot support one which will result in uncontrolled inflation.

Those of you who have advocated this legislation and fought for it have my admiration. You have fought hard for something you believe in. Still, you must not condemn those whose views on one subject are different than your own.

Criticism has been directed against Mr. Green because of his letter to the Speaker against this bill by many Members who have been and are in accord with him on most matters. I think that criticism is unjust and uncalled for. He has the

interests of the wage earners at heart, and you and I are all aware of that. As president of the American Federation of Labor he has always been known as the champion of the common people. While I do not want to quarrel with my colleagues, I think that perhaps Mr. Green has more soberly considered certain phases of this bill and is aware of the results that would come about if it were to pass. I agree with him in believing that the benefits of legislation proposed by this bill would accrue but to a small percentage of the population, and that it would work to the disadvantage of laboring wage earners of the country. Mr. Green has, in my opinion, taken a courageous stand on this question.

I am sorry that the proponents of the bill could not have seen their way clear to make its benefits available to all the people. Had they done so there could have been no charge of discrimination, and many others besides myself would have been in a position to support it.

Mr. LEMKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 4, line 23, strike out the sentence beginning with the word "such" and ending with the word "reserve", on page 5, line 1.

Mr. LEMKE. Mr. Chairman, this amendment strikes out the following language:

Such farm-loan bonds to be held by the Federal Reserve Board as security in lieu of any other security or reserve.

In other words, this puts the same security back of these Federal Reserve notes in addition to these farm mortgages as is back of other Federal Reserve notes.

My own position in the matter is that makes very little difference, but since some feel there ought to be something in addition to the farm mortgages, we just strike that out and make these Federal Reserve notes the same as all the other Federal Reserve notes, and I can see no reason why any person should object to this amendment which the steering committee has considered and is willing to accept.

The amendment was agreed to.

Mr. BOILEAU. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BOILEAU. A short time ago the gentleman from North Dakota offered an amendment which struck out the words "Federal Reserve Board" in lines 23 and 24 and substituted "Board of Governors of Federal Reserve System." This amendment strikes out the entire sentence, and I am asking whether or not the language in the bill is now clear.

The CHAIRMAN. The Chair thinks so.

The Clerk read as follows:

SEC. 8. The Farm Credit Administration and the Federal land banks shall turn over all payments of interest and principal on such farm-loan bonds, for which the Federal Reserve Board issues Federal Reserve notes, to the Treasurer of the United States, and shall be by him kept for the purpose of redeeming said Federal Reserve notes and shall be reinvested by him as a sinking fund in farm-loan bonds issued under the provisions of this act.

Mr. LEMKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 5, lines 5 and 6, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

The amendment was agreed to.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. SISSON. Mr. Chairman, I asked for recognition, although I hate to take the time of the committee at the end of a wearisome day. There have been some charges passed back and forth as to why certain Members were for or against this particular piece of legislation, with insinuations that certain Members were dominated by the fact that somebody is for it or somebody is against it. I do not think it is very material who is for it or who is against it as individuals, and I do not believe that has influenced very many Members one way or the other.

I have that confidence in this House. I want to make my own position plain. I was one of those who signed the petition for the discharge of the Committee on Rules. Why did I do it? Because at that time or some time before, the Committee on Agriculture had reported out this bill. Why they did it is water over the dam, but so far as it appears from the record, and so far as we could find out, it was reported unanimously.

I was opposed to this legislation from the start, and I stated to the two gentlemen who came to see me for the proponents of the bill, and who asked me to sign the petition for the discharge of the committee, that if I did sign the petition, I would vote against the bill. I want to make that plain for all time.

The leading proponents of this bill in the House, I am sure, have long known what my position on the bill was, and that I would not support it.

I did not take my name off the petition, and I want to say, for the benefit of the country, that no one in the leadership asked me to take my name off, and I do not believe anyone else was asked to take his name off.

Now, a word or two about the bill. So far as I can find, this experiment—which started out as an experiment to loan money on a basis of 100 percent of the value of the mortgaged property; it may have been changed by amendments of the gentleman from North Dakota [Mr. LEMKE], who has practically rewritten the whole bill on the floor so that now no one knows what it is—has never been made in this country, and, so far as I can find out, has never been made in any other country. And it was to be loaned at a rate of interest of 1½ percent.

I am as much for the farmer as any man here; and I am standing now for the interests of the farmer, because loaning money at 1½ percent will destroy the private mortgage market and put the United States into the mortgage business for all time.

This experiment of lending money on the basis of 100 percent of the value of the property mortgaged to secure the loan has never before been tried in this country or in any other country, so far as I can find. There is no experience as to the losses on such a basis.

In itself, if we were sure we could put on the brakes at will, this bill, if enacted into law, might not be dangerously inflationary. I do not presume to be qualified to say whether it is or not.

But it would be the beginning of a downgrade which I do not dare to see this country take. No man can say how far it would take us. But judging from the experience of every one of the countries of the Old World which has ever tried such an experiment, it is certain to end in communism, state socialism, or a fascist dictatorship.

I am for the American farmer. I hope certain things will be done for the farmers of my district, my State, and the entire country; things which have not yet been done by this Government. I believe that when the American farmers are informed of the certain consequences of this legislation they will not demand or wish to get their mortgages refinanced by the Government at 100 percent of the value of their farms, at 1½-percent interest, and by any inflationary measure such as this would be.

If we were to enact this proposal into law, it would lead to an irresistible demand that our village and city home owners get their mortgages—on which they are now charged at least 5-percent interest—also refinanced at 1½ percent by the Federal Government.

It would entirely destroy the mortgage market and would put the Government into the mortgage business for all time to come.

Mr. Chairman, if I knew that by voting for this bill I could insure my reelection, and that my vote against it would assure my defeat, I could not, on my oath, vote for this bill. [Applause.]

The Clerk read as follows:

SEC. 8. Whenever the amount of money issued under this act shall exceed $25 per capita, then the Treasurer of the United States, by and with the approval of the Federal Reserve Board and the President of the United States, may retire Federal Reserve notes in an amount equal to the principal paid on farm-loan bonds, for which Federal Reserve notes were issued, not to exceed 2 percent in any one year, of the amount of Federal Reserve notes so issued.

Mr. LEMKE. Mr. Chairman, I offer an amendment, which is at the Clerk's desk.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 5, line 11, beginning with the word "whenever", strike out all down to and including the word "the" in line 12, and insert in lieu thereof "The."

Page 5, lines 13 and 14, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

Page 5, line 17, strike out the figure "2" and insert in lieu thereof the figure "3."

Mr. LEMKE. Mr. Chairman, I might make just a short explanation. The first part of the amendment strikes out of section 9 the language "whenever the amount of money issued under this act shall exceed $25 per capita, then." That is all taken care of by the absolute limitation of $3,000,000,000.

The balance of the amendments are simply perfecting amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from North Dakota.

The amendments were agreed to.

The Clerk read as follows:

SEC. 9. There is hereby created a board of agriculture consisting of one member from each State, elected by the farmers of such State, who shall be elected by delegates selected by a mass convention of farmers in each county or parish within the United States, who are indebted and declare it to be their intention to take advantage of this act, such county or parish convention to be its own judge as to who are bona-fide farmers and otherwise eligible to participate in its proceedings.

SEC. 10. The Farm Credit Administration is hereby authorized and directed to give public notice, through the Federal land banks, to the farmers of each county or parish of the time and place of holding the first county or parish convention, which shall be held at the seat of government of each county or parish; and it shall at the same time give notice of the first convention of the State delegates, to be held at the State capital of each State, notice of such convention to be given within 60 days after the enactment of this act.

Mr. BOILEAU. Mr. Chairman, I move to strike out the last word. I would like to call the attention of the membership of the House to the situation that developed a short time ago when an effort was made by the gentleman from North Dakota [Mr. LEMKE] to amend section 7 to provide for a gold reserve to back up these Federal Reserve notes that we propose to issue. A point of order was made by the distinguished majority leader and was sustained by the Chair, so that we were unable to present that amendment to a vote of the membership.

However, shortly after that you will recall that next to the last sentence of section 7 was stricken out by another amendment. In other words, this language was stricken out:

Such farm-loan bonds to be held by the Board of Governors of Federal Reserve System as security in lieu of any other security or reserve.

By striking out that sentence we have pure and simple Federal Reserve notes, Federal Reserve notes that are just as good as the Federal Reserve notes that you have in your pocket today, backed by just as good security as any security you own today; backed by just as much gold as any Federal Reserve notes in the country today.

Those of us who are supporting this measure are satisfied that we are providing for the issuance of Federal Reserve notes which are just as good as any Federal Reserve notes being issued.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. RANKIN. And under the Gold Standard Act of 1900 it is interchangeable with every other American dollar.

Mr. BOILEAU. I thank the gentleman.

Mr. HOLLISTER. Mr. Chairman, will the gentleman yield?

Mr. BOILEAU. I yield.

Mr. HOLLISTER. Will the gentleman point out wherein there is any backing for these Federal Reserve notes?

Mr. BOILEAU. I say that the Federal Reserve System is directed by this section of the law to issue Federal Reserve notes and send them over to the land bank commissioner. I submit to the gentleman that that type of security is just as good as any other Federal Reserve note that is now issued.

Mr. HOLLISTER. Why?

Mr. BOILEAU. For the first reason, the Federal Reserve will, under this law, be required to put as much gold back of these notes as any notes which it now issues.

Mr. HOLLISTER. Where is that in the act?

Mr. BOILEAU. It is not in this act. It is an essential part of the Federal Reserve Act. It is already part of the law. The Federal Reserve notes are to be issued with certain gold backing.

Mr. HOLLISTER. Why? Where does that appear in the act?

Mr. BOILEAU. In the Federal Reserve Act. We are not repealing the Federal Reserve Act. We are not changing the Federal Reserve Act in any respect.

Mr. HOLLISTER. But the Federal Reserve Act says that notes shall be issued through the Federal Reserve banks, and the Federal Reserve banks, in turn, shall put up certain gold coverage. Where is there any provision for any gold coverage for these notes?

Mr. BOILEAU. I submit that in the Federal Treasury today there are billions of dollars of gold that is now claimed by the Federal Reserve System.

Mr. HOLLISTER. But the gentleman is mixing the Treasury and the Federal Reserve banks and putting them together.

Mr. BOILEAU. No; I am not. The gentleman is not giving me time to complete my statement.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. HOLLISTER. Mr. Chairman, I rise in opposition to the pro-forma amendment.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. HOLLISTER. Mr. Chairman, I am very glad the gentleman from Wisconsin raised the question he did, because it gives me an opportunity to point out one of the troubles with the kind of currency for which this bill provides.

Mr. BOILEAU. Mr. Chairman, the gentleman used up part of my time interrupting me and did not permit me to finish my statement. I wonder if he would yield now?

Mr. HOLLISTER. Yes; I will yield.

Mr. BOILEAU. I would like to say to the gentleman that the language is clear as to the intent. We attempted to clarify the matter by putting in an amendment that would directly provide for the gold. If there is any change needed in the law to bring this about, we are helpless to present such an amendment because of a point of order having been raised, but that matter can be properly taken care of, because the clear intent of Congress is expressed.

Mr. HOLLISTER. The gentleman points out clearly the difficulty with this bill.

Here is a bill which these gentlemen have had under consideration for months and months, which they thought over very carefully, yet they find today they have not covered many things which everybody knows should have been covered. If Federal Reserve notes are to be issued, they certainly should be the same kind of Federal Reserve notes that are now issued under the Federal Reserve Act, yet absolutely nothing was put in this bill to explain how these notes could be placed in the same position as Federal Reserve notes

issued under the present Federal Reserve Act. If the gentleman will read section 16 of the Federal Reserve Act, he will see how there is a gold coverage placed behind all Federal Reserve notes, the issuance of which is provided under the Federal Reserve Act.

It is true that under recent legislation all gold coverage is, let me say, in a state of quiescence. It is a gold coverage which is theoretical, in that it cannot now be realized on; but it is none the less true that all Federal Reserve notes issued under the Federal Reserve Act have a certain percentage of coverage by gold certificates held by the Federal Reserve banks, which certificates, in turn, earmark a certain amount of gold held in the Treasury. The mere statement in this bill that these notes are Federal Reserve notes, without any provision securing them in the same way, does not make them identical with the other Federal Reserve notes. These gentlemen preparing this bill simply omitted to consider the fact that they were not providing protection behind these notes and were not making them the same as those now in circulation. This illustrates the fact that what the people backing this bill are interested in is to get out a lot of trick money which will dilute and inflate the currency of this country. If they were so anxious to have these Federal Reserve notes exactly like other Federal Reserve notes, it would have been a perfectly simple matter to insert such a provision in the bill.

Mr. WHITE. Mr. Chairman, will the gentleman yield?

Mr. HOLLISTER. I yield.

Mr. WHITE. As a matter of fact, as the law now stands, have not the Federal Reserve banks power to issue 10 times the amount of currency now outstanding?

Mr. HOLLISTER. I should say not.

Mr. WHITE. They can issue at least an amount far in excess of what is in circulation.

Mr. HOLLISTER. They can issue a large amount in addition; yes.

[Here the gavel fell.]

The CHAIRMAN. Without objection, the pro-forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

SEC. 11. The farmers attending such county or parish convention and the State delegates attending such State convention shall organize and make such rules and regulations for their procedure as they deem necessary or convenient, and shall elect a president and a secretary and make arrangements for such other future conventions as they may deem necessary to carry out the purposes of this act, and they shall at all times cooperate and assist the board of agriculture, the Farm Credit Administration, the Federal land banks, and national farm-loan associations to liquidate and refinance farm mortgages and farm indebtedness.

SEC. 12. The State delegates so elected shall meet at the State capitals of their respective States and elect a member of the board of agriculture, who shall hold his office from the date of such election and for a period of 2 years from January 20 following, and who shall receive $15 per diem and necessary traveling expenses while on official business, to be paid by the Farm Credit Administration out of any funds set apart by section 5 of this act.

SEC. 13. Immediately after their election the members of the board of agriculture, upon call of the Farm Credit Administration, shall meet at Washington, in the District of Columbia, and organize by electing a chairman and a secretary, and they shall make such rules and regulations as they deem necessary and expedient to carry out the purposes of this act. They shall elect an executive committee of three, none of whom shall be members of the board of agriculture, who shall hold their office at the will of said Board and who shall receive a salary of $7,500 per annum and 5 cents per mile for necessary traveling expenses while on official business, to be paid by the Farm Credit Administration out of any funds set apart by section 5 of this act.

Mr. GILCHRIST. Mr. Chairman, I move to strike out the last word.

Mr. JONES. Mr. Chairman, will the gentleman yield for the submission of a unanimous-consent request?

Mr. GILCHRIST. I yield.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 11 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GILCHRIST. Mr. Chairman, I wrote the report for the committee on the pending bill. I ask unanimous consent to revise and extend my remarks and to insert by way of extension such part of that report as I think pertinent to the bill as now amended and proposed.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GILCHRIST. Mr. Chairman, that report was made on May 3, 1935, more than a year ago. Some statements in it refer to conditions then existing, but these conditions still prevail. Seldom, if ever, does any bill suit everybody. Seldom, if ever, do the supporters of a given measure agree personally to every item or proposition in it. All legislation is accomplished because of a wholesome compromise between and among those who are in general support of the measure. The present bill is no exception, and its friends have agreed upon certain amendments that they will propose at the proper time. I myself, although I am for the bill, believe that it should be amended before the final vote comes, but these amendments should be those proposed by the friends of the bill itself. Mr. LEMKE and the steering committee have agreed upon several modifications. The provisions of section 3 concerning the scaling down of mortgages is not necessary and will be stricken. Section 4, relating to chattel-mortgage loans, is unwise and will be eliminated. No bank should be required against its own desire to invest in these bonds or in any other kind of bonds, and the bill will so be amended. Mortgages should be limited to 80 percent of the value of the lands and no more. It would be well to broaden the security behind these notes and to make such security similar in some degree to that behind Federal Reserve notes and not limit it to the bonds alone. The board provided for in the act should be an advisory board only and not a supervisory one, and the provisions of the act should not be extended to any farmer who has lost his farm through foreclosure more than 10 years ago. Such report is as follows:

It must be understood at the outset that the bill is not intended to increase farm indebtedness. If a farmer is out of debt, he should not be encouraged to go into debt. The bill is designed to refinance existing farm mortgages at low rates of interest and extend them over a long amortization period so that the farmer can keep a home for himself and his wife and children and not suffer them and him to be cast out by the sheriff. The bill will not increase farm debts. It will, however, come to the relief of worthy farm people who, in the aggregate, number about one-fourth of our entire population.

Facilities for getting the farmer into debt are already quite adequate, but facilities for getting him out of debt are inadequate. It is our duty to provide farm credit at such rates and on such terms as will get farmers out of debt. Then, and not until then, will they acquire buying power and be enabled to enter the markets and take part in business activity and in the restoration of prosperity to the whole country and to all classes of people.

The farmer needs lower rates and better terms. The last issue of the Yearbook of Agriculture (1934) points out that while ordinarily a reduction of indebtedness is a favorable sign, nevertheless the small decline in farm indebtedness, which has taken place since 1928, was not the result of normal liquidation but of foreclosures, bankruptcies, and forced sales and of the inability of credit agencies to give that support which is absolutely requisite to recovery. In 1932 one-seventh of the mortgaged farms were encumbered for 75 percent of their value; the mortgage debt represented 40 percent of the value of all mortgaged farms and 25 percent of the value of all farm land and buildings. Because of the drop in farm-commodity prices, payment became impossible for great numbers of farmers. About six and one-fourth million of our people are actively engaged in agricultural pursuits, and 30,000,000 people depend upon agricultural solvency in order that human souls may stay in human bodies. The system of the Federal land banks may have done some good, but it has not been adequate to the situation. State legislatures have been compelled to resort to moratoriums, else the sheriff would now be selling more farm homes than he ever did and more of our farm people would be seeking shelter in charitable institutions and more of them would be dependent upon bread lines for bare sustenance.

The present desperate condition of agriculture has been reflected in serious outbreaks in some sections of our land. Men who have lived upon their homesteads and who work in the hardest kind of toil from 12 to 14 hours a day during 8 months of summertime and almost 10 hours a day for 7 days in every week during wintertime; men who are skilled and who work intelligently and who have no sense of wrongdoing and who are without blame but are

overwhelmed by conditions for which they are not responsible, and who have exhausted their resources, are loath to permit their homes to be taken away and their loved ones sacrificed to a ruthless juggernaut or insolvency and foreclosures. The American farmer is a manly man. He believes that he must always perform his contracts and keep his promises and be loyal to his country and keep and preserve its laws and fulfill his duty to society in general. But is not his duty to his wife and his children the most sacred of all of these?

Is not his promise to his loved ones as consecrated as all others? If he is thrown out of house and home without fault of his own, he is likely to feel that sense of resentment which might even impel him to resist force with force. Despair may, at times, drive the best of our citizens to desperation. These men are feeding America, and no American citizen has a right to eat the bread that they produce unless he is willing to share with them all of the things that bring about beautiful home living and establish them in society on a basis of decent, bountiful, intelligent, and religious twentieth-century citizenship.

The conditions following the debacle of 1929 remain. While farm prices of many commodities have risen in unit value, still the things the farmer must buy have risen in greater degree and he still remains in relative submergence. No man can win in an economic race while carrying such a handicap. On the basis of the present income of agriculture, and of the present indebtedness of agriculture, and of the present taxes and interest rates which agriculture must pay, it is impossible for agriculture to carry on successfully. When it can carry on—when it does prosper, then we will not be compelled to furnish relief to millions of nonfarmers who are now dependent upon governmental bounty and governmental doles. Farm tenancy is growing apace. Foreclosures have divested real farmers from ownership, while moratoriums against foreclosures are mere temporary palliatives and are not permanent nor remedial.

The bill provides that farm indebtedness shall be refinanced through the use of existing governmental machinery at an interest rate of 1½ percent and a further payment of 1½ percent annually to amortize the loan. It will take 47 years to liquidate such an indebtedness, during which time the mortgagor will make a yearly payment of $30 on each $1,000 of the loan. Provision is made to issue bonds which will be secured by first mortgages upon the farm lands of the country. These bonds will draw interest at 1½ percent and will be amortized at 1½ percent annually. In the event that there is not a ready market for them the Farm Credit Administration will deliver them to the Federal Reserve Board which in turn will cause currency (notes) to be issued and given to the Farm Credit Administration dollar for dollar. These Federal Reserve notes are not to exceed $3,000,000,000, this being the amount of the revolving fund fixed in the bill. The Federal Reserve Board will issue these notes just the same as it does today, except that the Federal Reserve banks are getting them today and do not pay anything for them. They pay no interest upon them. They pay nothing for the use of the credit of the Government. Surely there ought to be some way for the Government when in need, to get money without borrowing it from a bank.

This bill has met with unprecedented public approval. It agrees with the party promises and the party platforms of all political parties. No other bill before this Congress compares with it in the backing and endorsement which has been given to it. The National Farmers' Union and many State grange and farm bureau organizations are for it. It has been endorsed by leaders in the Veterans of Foreign Wars and in the labor brotherhoods and by the National Union for Social Justice. Twenty-nine State legislatures have memorialized Congress for its passage, including those of Montana, Nevada, Wisconsin, Illinois, Minnesota, North Dakota, California, Nebraska, Oregon, Indiana, Arizona, Idaho, Colorado, Oklahoma, South Dakota, Tennessee, Iowa, South Carolina, Kansas, Michigan, Ohio, Texas, Kentucky, Wyoming, North Carolina, Arkansas, New Mexico, New Jersey, and Washington. In addition the lower house in each of the following States have endorsed the bill: New York, Delaware, Pennsylvania, Alabama, and Missouri. Our people want to have it enacted into law during this session. The realization of their hopes should not be postponed. The bill is a simple acknowledgment of the solemn promises and duties of the Government to place American agriculture on an equality with other industries.

Section 3 authorizes the liquidation of farm mortgages and other farm debts existing at this time by the making of real-estate loans to the extent of 80 percent (as amended) of the fair value of the farm land and of 75 percent of the value of the insurable buildings. This section authorizes the Farm Credit Administration to make all necessary rules and regulations to carry out the purposes of the act.

It is believed that such a loan will be a safe one and that the farmer can meet its conditions. The low rate of interest stipulated and the favorable terms given the borrower enhance his ability and makes the loan easier of payment. Furthermore, when a loan of this character is placed upon a farm home, then the value of the property will be increased because the advantageous conditions for payment surrounding the mortgage will make the property more desirable.

There should be no question about the safety of this security, provided that the bill is honestly administered and that loans are made on 80 percent of real values (as the bill will be amended) and not on fictitious or puffed-up values. The very fact that a piece of land carries a governmental loan at 1½-percent interest will in itself establish its value on a higher basis and therefore make the loan increasingly secure.

Section 5 authorizes a small appropriation to carry out the provisions of the act, but all necessary and actual expenses so incurred must be apportioned and prorated and added to each individual mortgage. Through this means the expenses of the administration of the act will be paid by those who get its benefit and not by the Federal Government. By this bill farmers are not asking for charity or for a dole or for any subsidy. They will repay these loans. In this respect they are asking for much the same treatment that the Government has already afforded to other industries such as railroads and banks and insurance companies through the Reconstruction Finance Corporation and through other instrumentalities.

Section 6 provides that the funds to refinance existing indebtedness shall be provided through the issuing of farm-loan bonds by the Farm Credit Administration through the land-bank commissioner and Federal land banks, as now provided by law. These bonds shall bear interest at the rates provided in the mortgages extending to farmers and must be sold at par.

Section 7 supplements section 6 and relates to the sale of bonds in case they are not readily purchased. Federal Reserve notes are to be issued up to the extent of these bonds and secured by them. The amount outstanding of these notes at any one time shall not exceed $3,000,000,000. Is this sufficient? This legislation will be administered under the regulations of the Federal land-bank system. This system has been in operation for more than 20 years, and to date it has now outstanding in farm loans less than $2,000,000,000. The fund named is a revolving fund and will surely be sufficient to cover loans that can safely be made for some period of time and until repayments are made and recovered under the revolving features of the plan. It is sufficient to take immediate care of those farmers who are in imminent danger and in sore distress, and who are about to be dispossessed. As time goes on and as amortization payments in excess of what is required for redemption of bonds are returned into the fund, new and increasing numbers of mortgagors will get advantage from the act.

There is a prospect also that private money to some extent will be invested in the bonds, and when this happens the revolving fund will be augmented and increased. The amount of farm loans outstanding in the whole country approximates $8,500,000,000. About 29 percent of them are held by individuals where there is more or less of a personal relationship existing between debtors and creditors. The holders of many of these private loans will not desire to have them rewritten right away, but will carry them indefinitely into the future; and many of these private mortgages will be refinanced upon terms which will not be wholly out of line with the present proposal. In this respect also debtors will gain substantial benefits.

Section 8 has to do with the payment of the interest and principal which will accrue on the farm-loan bonds, and provides that payments upon the bonds shall be turned over to the Treasurer of the United States for the purpose of redeeming the notes that have been issued and for the further purpose of reinvestment as a sinking fund in new issues of farm-loan bonds. If we compare this plan for the issuance of currency with those which have heretofore been used whereby the Government has loaned its credit to the banks, and has also given them as a free and gracious gift the right to issue currency, and moreover has actually paid interest to them besides, we will be compelled to agree that the Frazier-Lemke bill will prove to be of great value to the Government itself. Instead of paying 3-percent interest to these banks the conditions will be reversed and the Government will be receiving interest at 1½ percent. And at the end of the amortization period (47 years) as computed on the amount of the revolving fund, the Government will have made a profit of $6,345,000,000 above what it is now costing us under plans now practiced and schemes now fashionable. Instead of paying out money it will be receiving money. This is one of the few times in the history of this Republic that anybody has seriously proposed to pay the Government a profit for the use of its own credit. Heretofore, the money changers have demanded and derived that income and that profit. Heretofore certain banks have issued currency at a cost to them of only about 30 cents per thousand dollars, being the amount that is paid for preparing and printing the bills or notes.

This profit would keep our schools open; it would build a network of broad highways throughout the land; it would establish and maintain hospitals and colleges and libraries. It would reduce taxes. It would help to restore buying power to common people and prosperity to the country.

It is not necessary at this time to examine into the propriety of the privilege of issue extended to Federal Reserve banks. Many people who are in full support of the Frazier-Lemke bill believe that such privilege is proper and necessary. It must be remembered, however, that the 12 Federal Reserve banks are private corporations, that they and their stock are privately owned, and that none of their profits go to the Government. Why should the credit of the Nation be given away absolutely free? Why should a bonus (interest) be paid to those who receive such largess? Those who believe in this privilege as well as those who do not ought to be able to unite in refusing to monopolize it. Those who get it are not in a position to claim exclusive rights in it. Nobody owns a charter right to it. Safety and security being conceded then it must follow that the right involved in the issuance of currency based on Government bonds ought not to be a special one to be exercised alone by those who are affluent. Security regarding such issuance must be guaranteed always; but when this is done and when safety is assured, why cannot some of the benefits of this privilege be extended to farmers and home owners?

On February 28, 1935, there were outstanding from the Treasury $5,466,702,738, being about $43.07 per capita. On October 31, 1920, we had $53.21 per-capita circulation. Since then it has decreased $10.14 per capita. Furthermore, in 1929, before the crash, we were using at least $62,000,000,000 of bank money or bank checks. Some authorities make this figure much larger. This is now down to about $20,000,000,000. In other words, we formerly had at least three times the amount of bank money (checks, drafts, etc.) than we have now. These facts call for explanation and remedy.

A goodly part of the money that has gone from the Treasury is really not in circulation at all. Some of it is in foreign countries. Some of it is in Cuba, where it is used as money almost exclusively, and some of it is in other countries which use it in one way or another. A lot of our money has been lost or destroyed in fires, still more of it is hiding in safety deposit boxes and in old socks and mattresses. We can take the $8,580,000,000 of gold that is now idling in the Treasury and redeem every dollar of our outstanding currency and then have a balance of more than $3,000,000,000 of gold left untouched in the Treasury and not obligated in any way. We have also a billion of dollars of unused silver. We could issue an enormous sum of currency based upon those $4,000,000,000 worth of extra gold and silver.

Let it be remembered that this bill does not propose to create any new or additional interest-bearing tax-exempt securities. It provides for an intelligent and regulated expansion. There are specific limits provided and safe boundaries set against uncontrolled issues of currency. The contemplated issues do not so far exceed our previous experience as to cause any honest apprehension among those who desire in real good faith to restore prosperity to agricultural as well as to commercial interests.

Sections 10, 11, 12, 13, 14, 15, and 16 describe machinery and procedure. The gist of this is that a board of agriculture is created consisting of one member from each State, which will elect an executive committee of three to act as an advisory body, but does not control the Farm Credit Administration. They receive complaints, report delinquencies to the executive division of the Government or to the President, and act as a go-between. They are really an advisory body. The real truth is that Congressmen now act as chore boys for the people in performing the very work that this board and this executive committee will do after the bill is enacted into law. It is believed that actual experience will prove that little new machinery will be required to operate the act because the bill uses the present set-up of the Farm Credit Administration.

Section 17 extends the benefits of the act to those who have lost their farms since 1925 (as amended) to those who desire to repurchase their land or another like farm. Like benefits are also extended to tenants and members of their families.

The bill should be enacted.

Mr. Chairman, we all know that farmers still remain in submergence. The farms of the United States were valued at nearly $48,000,000,000 in 1930, and this value has fallen precipitously since then to the extent of probably 36 percent of former values, although I do not have the figures for 1935.

In my State—Iowa—as of April 1, 1930, farm lands were valued at practically $4,225,000,000, but by January 1, 1935, this was reduced to about $2,462,000,000, being a loss of 41.71 percent. In my own home county—Pocahontas—their value fell off from nearly $56,000,000 in 1930 to $36,000,000 in January 1935, being a loss of 35.38 percent. The cash income from the farms of this country has fallen from about $10,500,000,000 in 1929 to approximately $6,000,000,000 in 1934, and this was after the revaluation of the dollar. Farm debts remain practically as before except for that portion of them which has been canceled because of foreclosures and because they have been liquidated by bankruptcies, and by the sheriff, and by voluntary surrender to creditors.

Some improvement in prices for farm products is noticeable, but much of this is due to the drought. Some of it may be due to agricultural legislation, and some of it may be due to other causes, but nevertheless the prices for the things that the farmer buys have raised in a higher degree than prices for the things he sells. The last report—April 15, 1936—issued by the Agricultural Department itself shows that the ratio of prices received by the farmer to prices paid by him stands at 87 percent only. And this figure does not take into consideration the enormous increase in the taxes which are imposed upon him. He is not at parity. He is competing in an economic race while carrying a handicap. He is running with a 13-pound leaden ball chained to his feet.

The same thing is true as to farm labor. The farmer works 12 hours a day for 7 days in the week, including Sundays as well as groundhog days and other holidays. When one talks about 30 hours a week, as does Mr. Green, president of the American Federation of Labor, he can have no real conception of the hours during which farmers are compelled to toil. I wonder if these leaders who talk about prevailing wages are ignorant of the fact that farm wages for the hired man are now only about $20 to $25 per month? The farmer can pay him no more. Yet the farm group has always supported labor legislation; and when the day shall come that labor will not support agriculture, it will just be too bad for somebody.

Now, with these facts before us, nobody can deny that farmers must remain in submergence and that they can never get into a position of equality with other men until they are relieved from excessively high taxes, from burdensome interest, and from other unjust discriminations which are forced upon and against them.

In America we have three great agencies for culture and for improvement and for stabilization. We have the school. We have the church. But above and beyond these we have the home. We should save homes. The Republic cannot endure unless we build a high type of social life in and around our homes. I have heretofore and will continue hereafter to support all home legislation. The strategy of those who are opposing this bill is to separate the labor vote from the farm vote and the urban home-owner's vote from the farm home owner's vote. It is an old strategy, and its accomplishment forebodes evil and nothing else. When farmers can have prosperity, we know that all of us will have a higher and better civilization. When we save farm homes, then we will know that agricultural buying power will be increased and that this will stimulate heavy industries, actuate building, spread employment, and in every other way help and support business. Every man or woman who is engaged in labor or in commerce or in carriage or in finance or in any other kind of industry or business will be aided.

We can add much to rural life. A small percentage only of farm homes have electric appliances or plumbing facilities. A small percentage only of farm mothers can afford to go to the hospital when the baby comes. In many places schools for farm children are not what they ought to be, but happily this is not true of my own State, which continues to stand at the head of the whole country in respect to literacy. The farm wife ought to be able to buy the pretty things that add to a great culture and make a happy home.

We had better save the homes already owned than to make new ones. There are before Congress resettlement bills for rural people. Do you know that figures recently released show that the cost of rural resettlement is $5,345 per family? Keep in mind the number of mortgages against the farmers who stand a chance of being ousted from their farms, and then figure what your resettlement is going to cost. It will run into many multiples of billions beyond what this bill will cost. It will be cheaper and wiser and more humane to save the homes we already have.

I have in my hand a telegram from the clerk of courts in my own county which shows that about one-seventh of the farms there are now under mortgage foreclosure or have been during the past 5 years. In addition to these actual foreclosures many farmers have lost their farms because of voluntary settlements concerning mortgages which never reached the foreclosure courts. If one-seventh have lost homes and farms, what, let me ask, have the other five or six farmers been doing? What has happened to them? Many of them are now only about two jumps ahead of the sheriff with little in prospect for the future.

In my State we have a moratorium in favor of farms and against foreclosures. But this farm moratorium is based upon emergency, and it is bound to end sometime. It cannot go on forever and forever. The present law terminates on March 1, 1937, and when this moratorium ends, then the floodgates will be raised and a deluge will sweep over many of our farm communities. Gentlemen are claiming that the present bill will take care of only 15 percent of the mortgages of the country. Even if this is admitted, nevertheless the fund is a revolving one; and whenever payments are returned into the Treasury, new and additional mortgagors can take advantage of it. It is significant also that the number of farms which are in imminent and acute distress

seem to amount to about 15 percent, and the bill, in any event, will take care of those who are about to be evicted.

I have heard said here something about paper money and about printing-press money. Mr. Chairman, with the exception of a few silver certificates, there is not now a dollar of currency in this country that is redeemable in anything except another piece of paper. There is not a bond of the Federal Government now outstanding that is redeemable in anything else than another piece of paper or another bond likewise printed on a printing press. Gold payments have been legislated out of existence. The so-called Federal Reserve gold certificates given to the Reserve banks for the gold deposited by them in the Treasury state upon their face that they are payable to bearer on demand as authorized by law; but the law makes redemption entirely discretionary with the Secretary of the Treasury, and it has been made a punishable crime for anyone to have or to hold gold. Mr. Lewis W. Douglas, recently Budget Director for the present administration, who everybody admits is an authority on the question, recently wrote an article which I hold in my hand in which he says that substantially the same language is found in all of our currency, and I quote:

> It is a promise to pay, but in what? Not gold, no; for gold certificates have been legislated out of existence. Moreover, it would make little difference if the currency were redeemable in gold, because it has been made unlawful and a punishable crime for anyone to hold gold. Even gold previously acquired has been confiscated by the Government.

In this article Mr. Douglas sums up by saying:

> On the whole, however, our currency now being a mere piece of paper, our bonds now being mere pieces of paper, and a Government check now being a mere piece of paper, there is no fundamental difference between the direct emission by the Government of pieces of paper to a bank against which the Government draws another kind, but equally unsupported, piece of paper in payment of its bills.

I am for a stable currency just as much as anyone else is. I am against what is derisively called "fiat" money. I think that a foot should remain 12 inches, that a pound avoirdupois should always consist of 16 ounces, and that 231 cubic inches ought always to make a gallon. I do not believe that these measures should be allowed to change as much as 375 percent in a short while. By the same token there ought to be some means of controlling the dollar so that it will remain comparatively constant in value and so that a farmer who borrows a dollar today for the purpose of buying 1 bushel of corn shall not be compelled to part with 10 bushels of corn when he goes to pay the debt a short time afterward.

I do not see that anyone need to worry about any fiat money as being contained in this bill. There is none proposed by or in the bill. We have over $10,000,000,000 in gold in this country, and several billions of this is free gold. Federal Reserve notes are supposed to be secured by 40 percent of gold and 60 percent of commercial paper, but you cannot get this gold if you want to. Furthermore, I should like to put some of this free gold behind the issue of the notes involved in this pending bill; but none of those who are against the bill will vote for such a preposterous thing as to allow a farmers' bank to have the privilege that is now extended to a central reserve bank. And yet these same men talk about discrimination. I have heard them here today. They beat their breasts and say, "We are for equal rights for all and special privilege for none", and they talk about class legislation. Class legislation is connected in some way or another with 50 percent of the bills that come before us. We legislate about postal rates and give county newspapers the right to send their paper free within the county of their publication. That is all right. I am glad of it. But is it class legislation? The only offense that there may be in class legislation of the character that I am talking about is when the legislation does not embrace all of the class or when it selects some individual from a class and imposes some special burden upon him from which other persons are exempt. It is of two kinds, namely, that in which the classification is natural and reasonable and that in which the classification is arbitrary and capricious. The one is legal, the other is not. The one is wise, the other is reprehensible.

The legislation before us deals with a class in an honest and fundamental way. It is a natural and reasonable classification. Class legislation. Will gentlemen answer this question? Is the power of issue of currency now given to the Federal Reserve banks class legislation? I have heard them exclaim on the floor here today: "Oh, I have got to protect the great American principle of fairness to all." Will these gentlemen get up here and say that they are against the right of issue now exercised by Federal Reserve banks? No; they will not. Well, then, let them explain why that is not class legislation equally with what is proposed in this bill. Now, I am not opposing the present practice of the Federal Reserve System concerning the issue of money. I have not said anything against it; but I do say that men who are for it ought not to talk about class legislation when a farmer's bank wants to participate in it and have some of the rights that are involved in it, especially when the farmer's bank is willing to give better security than anybody else has ever offered.

Now, in this bill we are proposing the very best security that it is possible to offer. We are pledging the farm lands and the farm homes of our people. We are willing to write into the bill also the same regulations concerning the issue of money, including gold reserves, that attach to other issues, and such an amendment will be offered tomorrow. We have dug a hole somewhere out in Kentucky where we have buried our gold; and so far as actual use for redemption of currency is concerned, we might as well have 10 tons of pig iron avoirdupois out there, as to have 10 tons of gold, troy weight. We do not use the metal for redemption purposes anyway; so why do some of us become hysterical when we propose that relief should be given to farmers?

In order further to divide those who ought to remain together, Congressmen are here today stirring up home owners in the towns and cities against this bill. It has been pending for 5 years and not one of these gentlemen has ever proposed an amendment to it. So long as it slept in the Committee on Rules, and so long as it was believed that that committee had provided a sepulcher for it, these gentlemen were perfectly satisfied. But now, after 5 years of struggle and after Mr. LEMKE has been able to drag the bill out of the Rules Committee and to bring it to a fair and open hearing on the floor of the House, these same gentlemen are horrified in suddenly learning that there is no amendment on it for the Home Owners' Corporation. I have heretofore voted for and will hereafter vote for every proper thing that will save the homes of the cities and of the towns. But this bill does not discriminate against them, as claimed. Home owners, it is true, under present laws pay more interest, but home owners are not compelled to put 5 percent of the amount of their loan into an association that guarantees the payment of every other man who has such a loan. Farmers do this.

Is this discrimination? Is this class legislation? Are these gentlemen in good faith? Do they really think that after 5 years, during which time they have fought the bill, they should be allowed now to put an amendment onto it which would murder it? Why have they waited so long to make their suggestions? The reason is manifest. These gentlemen are against the bill, anyway, and always have been, and have heretofore hidden behind the skirts of the Rules Committee.

We must dignify agriculture. We must save farm homes. We must open the door of hope for those who raise our bread. We have no right to eat unless we are willing to pay the cost of producing our food and, in addition, allow a profit to the producer which will put him on an economic parity with men in other industry. The men and women on the farms have struggled heroically. They have risked all of their property and all of their lives that we may have abundance. They have helped to build a mighty Nation. They have seen a vision of brotherhood and justice in a world of reality and of selfishness. They have their ears to the wind. Their eyes are fixed on a far horizon, and they are marching toward it with firm feet. They demand justice, a thing which the wicked fear and which the righteous hope for. They

deserve social and economic parity with industry. Let us give it to them.

Mr. WHITE. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD and to include therein a table from the Federal land bank which shows the charges on delinquent interest.

The CHAIRMAN. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. WHITE. Mr. Chairman and Members of the Committee, this bill to provide a plan to refinance farm mortgages is a sound and constructive piece of legislation, far more important and necessary than any of the relief legislation that has heretofore been passed by the Congress during this administration. The very integrity of the agricultural industry and the people engaged in farming is at stake.

Mr. Chairman, the object of this legislation is to relieve the farmers of this country of an interest load which, under existing conditions, they cannot carry; and at the same time safeguard the ownership and the possession of the farms by those engaged in the industry, so that they may be secure in the possession of their property and the enjoyment of the fruits of their thrift and industry.

Mr. Chairman, anyone conversant with the financial conditions of the farm owners in this country, the history of foreclosures, and the precarious situation of the thousands of farmers who are vainly struggling to carry an unbearable interest load under impossible conditions knows that the relief to be given under the provisions of this bill must be had, and had quickly, if their farms are to be saved—farms that have been acquired and improved by a lifetime of work and saving.

Mr. Chairman, I speak from the experience of a lifetime in reclaiming and working a farm. No class of people and no industry in this country has been so handicapped and placed under such great disadvantage as have the farmers. The Government has permitted the manufacturing and business interests of this country to organize and stifle competition and fix and maintain exorbitant and unreasonable prices for most of the things the farmer has to buy. At the same time the prices of farm products have been below the cost of production. This disparity in prices can lead to but one end—disaster.

Mr. Chairman, the result of the failure of our Government to correct this short-sighted and ruinous policy of big business has brought ruin and distress to our people everywhere. Is it any wonder that under such hopeless conditions many farmers gave up the struggle and flocked to the industrial centers to compete with the city workers for jobs in other industries or that the young people refused to accept the hardships of farm life and went to the cities to swell the ranks of those who must find jobs?

Mr. Chairman, who can calculate the cost of the failure of the Government to protect the people of this country from the predatory practices of big business in profiteering at the expense of the people engaged in our basic industry—farming?

When the crash that resulted from this folly brought disaster to the people of this country, we know that to save business from complete collapse Congress has made three appropriations for relief totaling the staggering amount of $9,400,000,000 which has increased the interest load being carried by all of us by $282,000,000 annually; and a new appropriation of $1,425,000,000 is now being made for more relief, while the end is not yet.

Mr. Chairman, industry in this country must be reorganized. A plan must be devised so that the citizens of this country can become self-supporting, the population must be redistributed, and industry readjusted on a balanced plan to eliminate unemployment. We must begin at the foundation and restore agriculture by refinancing farm owners.

Let me remind the gentlemen who contend that this bill will discriminate against many farmers because sufficient funds are not provided to refinance all farm mortgages at this time that the same argument could have been used against the R. F. C. when it was created, as only $500,000,000 was appropriated at the time, with the authority to sell an additional billion in bonds. It is impracticable and absurd to demand that an initial appropriation be made to finance all existing farm mortgages by the passage of this bill. Let me also remind these gentlemen that no objection was made to the creation of the Federal land banks, which provided a means to reduce interest on farm mortgages to those who were free to borrow when it was established. Let me further remind the gentleman that it very effectively reduced farm-mortgage interest rates, as I was able to refinance a farm mortgage paying 8 percent quarterly to a Holland bank to 6 percent, with 1 percent of that to apply on the principal in amortization payment, although many other borrowers were unable to take advantage of the new plan at that time.

Mr. Chairman, if we are to save thousands of mortgaged farms throughout the country, this bill must be passed and the farm-loan law amended. In support of the statement I made in the debate with the chairman of the Agricultural Committee [Mr. JONES] when he had the floor earlier in the afternoon, as to the interest charges on delinquent farm-loan payments, I submit as part of these remarks a statement from the Federal Land Bank of Spokane to Mr. A. Klockman, a borrower who has invested a fortune and spent a lifetime in developing a farm in northern Idaho, and now in the evening of life, when the prices of farm products have fallen below the cost of production, with taxes and insurance piling up, he is charged 8-percent interest on delinquent farm payments.

Mr. Chairman, let the opponents of this bill study the statement presented here and tell me if this deserving man, who has put his all into this farm, can ever pay out unless this bill is enacted into law.

THE FEDERAL LAND BANK OF SPOKANE.

STATEMENT OF AMOUNT REQUIRED TO PAY OFF LOAN AS OF FEB. 1, 1936

Borrower: Martha N. Klockmann, National Farm Loan Administration, Boundary County—12, loan no. 33093.

Date of note: Nov. 7, 1924. Original loan, $25,000.

Installment due Nov. 7, 1932. Part payment $116.21, Oct. 22, 1934	balance	$696.29
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		186.13
Installment due May 7, 1933	balance	812.50
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		163.45
Installment due Nov. 7, 1933	balance	700.82
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		112.95
Installment due May 7, 1934	balance	701.81
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		85.04
Installment due Nov. 1, 1934	balance	686.45
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		56.63
Installment due May 1, 1935	balance	488.82
Overtime interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		20.78
Installment due Nov. 1, 1935	balance	380.19
Overtime interest at 5 percent to Feb. 1, 1936		4.75
Installment due May 1, 1936	balance	380.19
Less advance discount on $22,104.49 at 3 percent for 3 months		162.94
Unmatured balance of principal as of May 1, 1936		21,725.30
Interest at — percent from ——— to miscellaneous advance, Nov. 30, 1935		391.00
Extension and interest to ———; interest at 5 percent to Feb. 1, 1936		3.31
1931–34, general taxes advanced, June 18, 1935		3,687.02
Interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		118.18
Filing fee advance, Jan. 20, 1933, $1; May 3, 1934, $1; Mar. 6, 1935, $1		3.00
Insurance premium advanced, Feb. 28, 1935		20.25
Interest at 8 percent to July 1, 1935, and 5 percent to Feb. 1, 1936		1.14
Notes receivable, Oct. 1, 1935	balance	7,500.00
Interest at 4 percent to Feb. 1, 1936		100.00
Notes receivable, Oct. 1, 1935		20,525.70
Interest at 4 percent to Feb. 1, 1936		273.68
Trust accounts credit, Dec. 4, 1935		22.66
Prepayment fee of — percent on unmatured balance of principal for — years to complete 5-year period		
Total		59,639.78

Release of mortgage will be mailed upon receipt of payment of the above amount.

O. H. JUNOD, *Treasurer.*

Prepared by M. H. Checked by R. G. D. Date, January 21, 1936.

Original to borrower. Duplicate to secretary-treasurer. Triplicate to file.

That is not the only injustice that is being done to borrowers by the system being followed by the Federal land banks. When I borrowed $3,000 on my farm they required 5 percent, or $150, as my subscription to the farm-loan association, who, in turn, invested this money in the farm land bank stock. That the Members of the House may know how these subscriptions are handled, I present a letter received from President Ehrhardt, of the Federal Land Bank of Spokane, stating my liability in the matter:

THE FEDERAL LAND BANK OF SPOKANE,
Spokane, Wash., April 25, 1936.

Hon. COMPTON I. WHITE,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN WHITE: Replying to your letter of April 18, our records indicate that the capital stock of the Bonner County National Farm Loan Association is impaired approximately 112 percent as of April 30, 1936.

As you know, the Federal Farm Loan Act provides that shareholders of national farm-loan associations shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such association to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

This section of the law was amended June 16, 1933, by the addition of section 744 (a), which provides that shareholders shall not be held individually responsible for any contract, debt, or engagement of the association entered into after June 16, 1933, but this section shall not be construed to relieve any other liability with respect to stock held by such shareholders.

In other words, there is a 100-percent superadded liability on association stock for debts contracted prior to June 16, 1933, but in this connection I think you should take into account the fact that it has not been the policy of the Federal Land Bank of Spokane at any time to impose this liability on association members.

Trusting this supplies you with the information desired, I am,
Very truly yours,

E. M. EHRHARDT, *President.*

And a letter from the officers of the Consolidation of Farm Loan Associations of Southern Idaho with a statement of their liability and also a letter from the Idaho commissioner of agriculture, which explains the workings of the plan in that district:

NATIONAL FARM LOAN ASSOCIATIONS OF
ADA COUNTY, BOISE COUNTY, KUNA, AND EMMETT,
Boise, Idaho, April 27, 1936.

Hon. COMPTON I. WHITE,
House of Representatives, Washington, D. C.

DEAR CONGRESSMAN: We wish to call your attention to the following facts in regard to the impairment of capital of the National Farm Loan Associations and enclose statement of financial condition of this association as submitted by the Federal Land Bank of Spokane showing stock impairment of 72.3 percent.

You will note by this statement that there have been certain losses which have been charged to this association and that 5-percent interest has been charged on such losses; also that interest has been charged on estimated losses. As we understand it, these losses are determined every 6 months and the interest is compounded; therefore we have an annual interest charge which continues to grow, and each 6 months our impairment is larger; but we have no income to pay these losses or interest. Therefore it is only a question of a very short time when our 5-percent stock will be wiped out.

Our borrowers were and are compelled to buy 5 percent of their loan in stock, and then this association in turn is compelled to buy equal amount of stock of the Federal Land Bank of Spokane, which stock pays no interest or dividend. Our fees are as large as the applicant should pay, yet barely enough to pay our expenses, so we have no opportunity to create a reserve for losses or interest. Being now associated with the Boise County, Kuna, and Emmett associations in a group office, the Federal land bank now sends us monthly reserve equal to 30 cents per thousand dollars of loans, which amounts to about $47.37 per month, but our interest impairment is about $240 monthly, leaving a monthly deficit of $192.63 without taking into account new losses which are bound to occur.

Under the above arrangement every association, we believe, whether their stock is now impaired or not, is doomed to bankruptcy, because losses will occur sooner or later, and when association stock becomes impaired it continues to increase because of this interest charge.

If we are to be charged interest at 5 percent on our impairment, we believe that we should have 5-percent interest on our capital stock which is invested in stock of the Federal land bank, or we should have some of the interest on the loans made through this association, so that we would have income to offset losses.

We have called this to the attention of the officials of the Federal Land Bank of Spokane, but they inform us that this interest is charged according to regulations issued by the Farm Credit Administration at Washington. They admit that sooner or later our stock of 5 percent will become worthless, but they have no remedy for us.

We ask your assistance in remedying this situation by new legislation or a change in the regulations of the Farm Credit Administration, or both, as we would like to be able to take care of ourselves; but under the present set-up we are doomed to failure.

Yours very truly,
ADA COUNTY NATIONAL FARM LOAN ASSOCIATION,
WM. J. HOLMAN, *President.*
R. H. DAVIDSON, *Director.*
C. A. OLIASON, *Director.*
B. F. HAYNES, *Director.*

Statement of condition of Ada County N. F. L. A. as of Nov. 1, 1935

Agreement signed Mar. 1, 1936

Accountability for:		
Indemnity account—debit		$28,654.83
Interest on indemnity account		9,603.45

Net impairment, 72.3 percent. Class 20.

STATE OF IDAHO,
DEPARTMENT OF AGRICULTURE,
Boise, February 27, 1936.

Hon. COMPTON I. WHITE,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: It has come to my attention on several occasions that in spite of the fact that prices of farm products are materially better than they have been during the past several years, that in many cases throughout Idaho, in fact, almost all cases, our farmers are not making any headway in the way of paying the delinquencies on their Federal land-bank mortgages—barely able to keep up the interest rates. There are several reasons for this.

Many of these farmers have delinquencies which were set up to be paid within a 5-year period. In many cases 3 of these 5 years have already expired, and the contract between the farmer and the Government states that the delinquencies must all be cleaned up in 5 years. One-half of this time has already gone by, and in very few cases have the farmers been able to pay one-half of their delinquencies. If the Government insists that all delinquencies must be paid up in this 5-year period, the farmers are practically right now back where they started.

I am sure we all agree that we are definitely on the upgrade, and that time will be the main factor that will allow our farmers to work from under their burden. If possible, I am sure it would be a saving factor in many instances if this whole program could be set up so that these delinquences could be placed at the end of the loan period and allow the farmer to pay his interest and taxes, and if he had any other money he could put it into general improvements around the farm. There is not one farm in a hundred but what needs equipment of almost every kind and also needs improvements in the way of painting and remodeling buildings. If the farmers have any money at all besides their interest and taxes and the normal payment they are faced with, I am sure it would be put to mighty good advantage right on the farm; and if these delinquent payments that are supposed to be taken care of in this first 5-year period, of which one-half has practically gone, could be placed at the end of the present mortgage or loan, it would make it possible for many to save their homes, which at this time looks as though they will be unable to do.

Naturally, our farmers have only one place to look for assistance like this, and that is to those who represent them in Washington, and I am sure you will consider one of the most serious problems to the Idaho farmer, as well as other farmers, when you take this vital matter under advisement.

With best personal wishes, I am,
Very respectfully yours,

F. LEE JOHNSON,
Commissioner of Agriculture.

Mr. Chairman, there can be no permanent business recovery or real prosperity in this country until the farm owners are relieved of the impossible interest load under which they are laboring. Farm loans must be refinanced, and this bill provides the means to do that without increasing the interest burden of the Government, which cannot be safely increased. I urge every Member to vote for this bill, which will do for our basic industry—farming—what has already been done for other industries by the R. F. C.

Mr. BUCKLER of Minnesota. Mr. Chairman, as the debate on the pending bill is about to close, I want to repeat a

statement I made a few minutes ago for the benefit of the lesser lights in this House. If this bill is defeated, the big perch will get the credit, and all you fellows from the country will get is "hell." There will be someone else here next session warming your seats, and you will be on the outside looking in and asking for a ticket to come in.

Mr. LEMKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 7, line 8, after the word "section", strike out "5" and insert in lieu thereof "4."

Page 7, line 21, after the word "section", strike out "5" and insert "4."

Mr. JONES. Why not wait until we get through with the bill and then ask that all section numbers be corrected?

Mr. LEMKE. This amendment involves the body of the bill and simply corrects the section numbers because we took out a previous section.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. LEMKE].

The amendment was agreed to.

The Clerk read as follows:

SEC. 14. The members of the board of agriculture shall keep in touch with and report to the executive committee the progress of liquidating and refinancing farm mortgages and farm indebtedness in their respective States. They shall cooperate with county or parish and State governments, and with all farm and cooperative organizations within their respective States, to speedily bring about the liquidation and refinancing of farm mortgages and farm indebtedness.

Mr. AYERS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the Frazier-Lemke bill to refinance farm mortgages, which we are now considering, has been under consideration by the people of this Nation since 1928. Ever since that time it has been introduced in each successive Congress. During these past 8 years the people of the Nation have studied it and have come to understand it. It has been the subject of discussion and debate in every State legislature of this Nation. As a matter of fact, 32 State legislatures have memorialized Congress to enact this bill into law, and every farm organization of the Nation is on record for it, yet it has taken 8 years to get it up for consideration on the floor of the House. The powerful invisible government which we have had to battle in order to pass any progressive legislation since I came to Congress has been the obstacle that prohibited consideration of this bill. The fact that this bill is a farmers' farm-credit bill and not a bankers' farm-credit bill is the reason that it has been delayed so long. If it is defeated now, that same fact is what will defeat it.

The opposition to the Frazier-Lemke bill comes from the same source and from the same interests which have opposed all the recovery legislation which we have passed during this administration.

Mr. Chairman, the opposition to this bill comes from Wall Street, from the international bankers, from those in control of the Federal Reserve System, and from those who have had special privileges for so long that they have come to believe that they and they alone own and control this Government for their own benefit. They are now organized under the title of the Liberty League and are fighting this bill for the simple reason that it is a farmers' farm credit act instead of a bankers' farm credit act. I hope this Congress will wake up to the fact that for that reason we must pass this bill.

This special-privileged class is now using every effort to scare the people and to scare this Congress into the belief that the Frazier-Lemke bill is an inflationary measure and therefore dangerous to the safety of our money system. Mr. Chairman and ladies and gentlemen of the House, let me call your attention to the fact that these special-privileged few have been and are branding as inflationary every piece of legislation or proposed legislation which helps the farmers or toilers of this country; but, according to their ideas, nothing is inflationary that helps the bankers, the Wall Streeters, the industrial institutions of the country, or anything that is connected with big business.

The same tax dodgers who held sway and robbed the Treasury of the United States under the Mellon and Mills regime by evading just taxes and by securing refunds equaling an amount as great as the Frazier-Lemke bill calls for to refiance farmers are the same persons who are now branding this bill as inflationary and dangerous and who are crying about the issuance of $3,000,000,000 worth of money backed by idle bullion in the Treasury and also secured by first mortgages upon productive farm lands. They are also the same persons—Liberty Leaguers—who so strenuously opposed all tax bills which have been enacted by this administration and who are now fighting the bill which the House recently passed levying a tax upon exorbitant reserves. These taxes upon exorbitant reserves were enacted by the House primarily to force the companies having these exorbitant reserves to pay them out as dividends to stockholders who in most instances would be glad to pay the income tax and the surtax in order to secure their just dividends. And then they would put the money into circulation, which in turn would help relieve the depression.

It might be worth taking the time to name just a few of these big corporations holding exorbitant reserves. The United States Steel Corporation has a reserve of over $520,000,000; the Standard Oil Co. of New Jersey, $449,000,000; the American Telephone & Telegraph Co., $401,000,000; General Motors, $270,000,000; the American Tobacco Co., $105,000,000; the Atlantic & Pacific chain-store corporation, $100,000,000; none of which reserves could have been built up had it not been for agriculture, the primary industry of this Nation. Yet when it comes to legitimately helping the agricultural industry all of these concerns call the measure inflationary and insist that it is dangerous to our governmental structure.

Just a little different situation, but what I consider a worse situation, exists with the Ford Motor Co. This is a family corporation with $580,000,000 in reserve deposited in a Ford family bank which purchases tax-exempt Government bonds upon which the Government pays a rate of interest greatly in excess of what is provided that the farmer should pay under the Frazier-Lemke bill. Of course, the Fords do not want to distribute their reserve because, first, if they did the members of the family would have to pay an income tax and a surtax on the dividend distributed to them; and, second, they would lose the interest the Government is paying them for it on their investment in Government bonds.

Of course, I could go on with a recitation of the same state of affairs with the Morgans, the Mitchells, the Chases, the Kuhns, the Loebs, the Mellons, the Mills, the Du Ponts, and many other of the enemies of this bill who are fighting it because it is a farmers' bill and not a bankers' bill.

The inflation argument on the floor of the House since we commenced the consideration of this bill has really become emotional. Almost hysterically we have been reminded of the great inflation of the German mark after the World War, and have been warned that this bill is a first step toward the same disaster that came to the German mark. Now, let me remind you, Mr. Chairman and Members of the House, that in all the history of the world, inflation has never occurred anywhere at any time in a stable government. Let us remember that when the armistice was signed, Germany was the most unstable of all governments on the globe, and the German leaders were wise enough to deliberately and intentionally take advantage of that fact and issue untold quantities of paper money and ruin the value of their currency, thereby wiping out their debt. But you will remember that these German marks were not backed by any gold that Germany had, nor were they backed by any gold that she was to get in the future; hence she wiped out her debt and vastly increased her own wealth.

The German situation is absolutely no argument in this case, for this bill proposes to put the idle gold of the Treasury and the lands of this Nation back of the money that is to be issued for the refinancing of agricultural loans.

This inflation argument is only a straw man being put up with the hope that the Congress will put on its boxing gloves against it and lose sight of the real issue, namely, refinancing the farmer with the best security in the world.

The same people and the same interests who are putting up this inflation straw man are the persons and the interests

who during the last 10 years have manipulated by amendments the Federal Reserve law so that today the Government is printing and delivering to the Federal Reserve System all of the currency of the Nation, except the $1 bills which are issued against the silver in the Treasury, for just the cost of printing. That is a fact, Mr. Chairman and Members of the House; the Government is not receiving one item of interest on the currency issued to the Federal Reserve System. The Government's credit is back of that currency, yet all of the profits are made by individual bankers. All that the Government gets is the cost of the paper, the ink, and the printing, which averages about 30 cents per thousand dollars.

Now that the farmers of the Nation are asking that currency be issued to the extent of $3,000,000,000, which is only about half of what has been issued to the Federal Reserve, and to be secured by the best security in the Nation, upon which they, the farmers, will pay 1½-percent interest and amortize the principal at 1½ percent per annum, the supporters of the Federal Reserve brand it as inflation.

Now, let us compare the money that is issued to the Federal Reserve with that which is proposed to be issued by this bill. The Federal Reserve gets its money absolutely free except for the cost of printing, which is 30 cents per thousand dollars, while under this bill the money to be issued will draw interest at the rate of $15 per annum on each thousand dollars. In other words, the money to be issued under this bill will bring into the Government 50 times as much as that which is issued to the Federal Reserve, and under this bill it will all be profit to the Government, whereas under the Federal Reserve issue the Government receives no profit at all—just the cost of printing.

To refinance the agricultural indebtedness and to make the loans under the Frazier-Lemke bill will not require any new machinery nor any new bureaus, boards, or commissions, and no profit-making enterprise or enterprises will be set up as are set up through the Federal Reserve System, for all of its member banks are private profit-making organizations. Under this bill the loans are to be made through the present Farm Credit Administration, which is already in operation and working. The program under this bill is not new at all. It is simply a program to have the money issued to the Farm Credit Administration and it to make the loans with its present organization, each applicant paying the initial expense incidental to his loan.

Mr. Chairman, before passing this inflation straw man, which has been set up by the enemies of this bill, permit me to say that I have recognized some real "inflation" in the arguments presented against the bill. But it is not money inflation. It is lobby and propaganda inflation. I have heard ideas and facts inflated to the greatest extent I have ever recognized since coming to Congress. For instance, just before the opening of the argument on this bill a 20-page mimeographed summary and analysis of the bill was delivered to the offices of the Members of the House. It is real propaganda against the bill. Some of the statements in it are so inflated that they are really amusing. One statement in particular advises us that 66 percent of the farms of the United States are not mortgaged. That statement is real lobby inflation. Then this propaganda program went on to say that this bill would hurt 85 percent of the farmers rather than help them. What do you think about that for lobby inflation? Then it went on to say that the Federal Land Bank System would be ruined. What do you think about that statement for real lobby inflation?

According to the best information I can get from reliable sources, 80 percent or more of the farm acreage of the Nation is mortgaged; and certainly it takes acreage to produce the agricultural products which feed and clothe a nation of more than 125,000,000 people, so the inflation we are confronted with today is the inflation of lobbying and propaganda against this bill.

I look upon this bill as necessary to bring agriculture back to a reasonable level of prosperity. We can legislate on all other subjects until we are black in the face, but we can never return a substantial and permanent prosperity to this country until we have restored the buying power of the farmer, and we cannot expect the farmer to regain his buying power so long as all of his profits go into interest and taxes. We must reduce his interest rate and we must reduce his taxes—he will do the rest and prosperity will be restored.

Can any Member of this House give any reason why the farmer should not get money at the same rate of interest that the Government is paying on its bonds, at the same rate that the big corporations are paying for their loans? That is one of the first steps in restoring his buying power, and as soon as we restore his buying power farm mortgages become one of the best classes of security in the Nation.

During the World War and during the reconstruction days thereafter our Government loaned billions of dollars to the Allies at 1½ and 2 percent and, by the way, this money was raised by the sale of Liberty bonds to the people of the Nation. From June 1917 to May 1919 over $21,000,000,000 was raised in that way. These bonds carried a rate of interest of 3½ percent and upward, and were sold to millions of people who could not afford to buy them. As a matter of fact, they were sold to people who had to borrow the money to buy them. Farmers and workingmen were really coerced into buying them for fear they would be charged with being German sympathizers. Some of the purchasers never saw the bonds. They were left with the banks as security. In this way the farmer was being actually forced into debt. Then after the war was over, and along in 1920, Wall Street manufactured a little depression for no other reason than to knock the bottom out of the farm prices, including lands and all farm products. This took the bond market down with it. Then all farmers and laborers of the country actually had to have money. They had no credit and were forced to sell their bonds far below par. When the bonds got into the hands of the same people who are now fighting, and always have fought the Frazier-Lemke bill, the bond market went up to par and better and has stayed there ever since. These fellows were profiteers at the expense of the producers and toilers of this Nation.

That is not all, Mr. Chairman, on this subject with which these same people should be charged. See what you think of this: The Government loans made to foreign countries were in most instances conditioned that the money loaned be used for American purchases, and the big manufacturers of this country received the benefits of excellent profits by reason of these loans to the foreign countries.

Now, let us analyze the condition that has put the farmer in the position where it has become necessary for him to have the benefit of the Frazier-Lemke bill. First, he was forced in debt by war conditions. Second, he was forced to sell his bonds at a loss. Third, he could not abandon his farm and he had no place else to go, so he went on and produced the raw materials to the manufacturer at a loss whereby the manufacturer made his profits on the moneys we loaned to the foreign countries. Fourth, the foreign countries repudiated their debts, which necessitated the making up of that sum to carry this country along, and it thereby increased the farmer's taxes in order that his own country be maintained. Fifth, when he could not pay his taxes and interest, the machinery of the law was put into effect to take his farm, either by mortgage foreclosure or by tax title. And now when he needs the benefit of the country he has protected and the interests he has helped we find those interests foremost in the arena fighting him.

These same interests that are opposing the Frazier-Lemke bill, first, on the pretext that it is inflation and, second, on the pretext that the Government cannot afford to issue $3,000,000,000 worth of money to refinance the farmer, were the same people who urged the loans to foreign countries. On these loans there is now over thirteen and one-half billion dollars repudiated; nevertheless, these same enemies of the Frazier-Lemke bill, these profiteers on war loans, these profiteers under the Federal Reserve System, hold this $3,000,000,000 money issue, with the best security in the world back of it, up to the people of the Nation and up to

Congress as absolutely ruinous. Their argument is just not consistent.

Mr. Chairman, under the Frazier-Lemke bill the farmers are not asking for charity. Far be it from that. They are simply asking the Government to treat them the same as it treats other industries and to give them an opportunity to pay their debts by loans at a rate of interest which they can bear. They ask the same opportunity to borrow money from the Government that is given to the industrial interests of the country.

I have called to the attention of this House several times during this and the last Congress that private industry cannot continue to prosper unless agriculture prospers. I reiterate that agriculture is the basic industry of this Nation, and it can only prosper by reducing its interest rate and its taxes; and the passage of the Frazier-Lemke bill is a full step to reduce the interest rate; and when that is done the States and the Government will go together to reduce the taxes and the purchasing power of the farmer will be restored; and then, and not until then, will prosperity return.

I implore you, Mr. Chairman and Members of the Committee, to give us an even break; that is all we ask, and that is all this bill provides for. An even break is just to treat us as industry is treated and to permit us to borrow money at the same rate of interest that industry pays. We are offering the Government better security than industry, for we are offering them the basis of all wealth of this Nation—a first mortgage on our agricultural lands.

The Clerk read as follows:

SEC. 15. The executive committee of the board of agriculture shall advise with and supervise the work of liquidating and refinancing farm mortgages and farm indebtedness by the Farm Credit Administration and the Federal Reserve Board, and they shall cooperate with said boards and with country or parish and State governments and with various farm organizations, and with the agricultral colleges of the Nation, in order to bring about a just and speedy liquidation and refinancing of farm mortgages and farm indebtedness. They shall report any member of the Farm Credit Administration or the Federal Reserve Board who neglects, hinders, or delays the carrying out of the provisions of this act, to the President of the United States, and it shall be the duty of the President, upon cause shown, to remove any such officer and to appoint some other suitable person in his place with the advice and consent of the Senate.

Mr. LEMKE. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment by Mr. LEMKE: Page 8, line 8, beginning with the word "and", strike out down to and including the word "by" in line 10.

Page 8, lines 10 and 11, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

Page 8, line 17, strike out "Federal Reserve Board" and insert in lieu thereof "Board of Governors of the Federal Reserve System."

Mr. LEMKE. Mr. Chairman, I want to say that we strike out the following language:

And supervise the work of liquidating and refinancing farm mortgages and farm indebtedness.

In other words, we take away the supervision of the board of agriculture and make it merely advisory to the Farm Credit Administration. There has been some criticism made of taking powers away from the Administration.

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MICHENER. Mr. Chairman, this bill is supported primarily by two groups: First, those farmers who because of a lack of parity between agriculture and industry since 1920 find themselves burdened with a mortgage indebtedness bearing a rate of interest that makes it practically impossible for them to ever pay out. That is, considering the prices which they receive for their product and their labor, the taxes which they must pay, and the costs of living and operation which they must meet, this group of our citizens see their farms going on the auction block. They face dispossession. Work as hard as they will, economize as they may, they fully realize that they must be refinanced or liquidated.

It is this group in which I am vitally interested. The urgency of the situation is such that I am willing to go a long way. Since I have been in Congress I have voted for practically every measure looking toward the relief of agriculture. I had little faith in the efficacy of some of these measures, but, feeling so keenly that something must be done for the farmer, I have been willing to chance anything. I signed the Frazier-Lemke petition in this frame of mind. I have tried as hard as I could to bring myself to the belief that the Frazier-Lemke bill, if enacted into law, would in the end be for the good of agriculture. I promised my constituents that I would do everything I could to bring the bill up for consideration. I have cooperated in every way with Mr. LEMKE in bringing this about. Mr. LEMKE and my constituents understand that I have never promised to vote for the Frazier-Lemke bill with all of its provisions.

Second, that group which believes that much of our economic trouble of the present day is due to the monetary system prevailing in our country. These people believe that there is a lack of money or currency afloat in the land. They believe in more currency. In short, they are generally known as currency inflationists. They are apparently interested in refinancing farm mortgages because they find here a vehicle to put more money in circulation. They will espouse any cause if it gives an opportunity to print more money. They supported the Patman bill providing for the payment of the bonus for that reason. We all know, however, that it was impossible for the soldiers to get their money as long as they insisted on printing new money. When this policy was abandoned, some of the most enthusiastic advocates of the payment of the bonus were no longer interested. However, the real friends of paying the bonus were still interested, and as a result the bonus will be paid in June. It is my thought that the farmer must not join up his troubles with any experimental money-issuing project; it matters not who proposes it or how alluring it may seem.

I do not belong to what has come to be known as the inflation group. And my interest in this bill is not motivated by the same hopes or desires that bring this last group to the support of this measure.

I am not going to take any time in reciting the number of farms subject to foreclosure, or in telling of the dreadful condition of agriculture as an industry. These facts are all well known to every Member of Congress. That type of speech has been made time and time again. There is no comfort for the farmer in depicting to him his distress and continuously reminding him of his hopeless condition. The farmer has been fed up on this kind of thing. And to me it approaches demagoguery on the part of those who would continuously preach to the farmer these things. We want a more cheerful aspect.

No one knows better than the farmer himself what his condition is. No one knows better than this same farmer and his family how he has striven ever since the World War to keep his head above water financially. The farmer who is about to lose his farm gets little solace out of the fact that he has plenty of company.

A few years ago one group of our farmers felt that the equalization fee, as embodied in the McNary-Haugen bill, was the solution. Another group was just as sure that the so-called debenture plan would bring the farmer into his own. Still another group was satisfied that the right approach to the problem was through cooperative marketing.

At no time have the several farm organizations and the farmers of the country presented a united front in behalf of any particular type of legislation looking toward relief. So that today we find one group and some sections of the country urging a continuation of the principles of the recent A. A. A., while other sections are violently opposed to this policy of scarcity. Then there is another group who would permit unlimited production, provide adequate tariff protection against foreign imports, and pay a bounty, if necessary, on all exportable surpluses.

The farmer who needs help is not interested in the authorship of legislation; whether the bill originates with the Farm Union, the Grange, the Farm Bureau, or any other organization should be immaterial. The measure should have the support of all agriculture if it is sound. Jealousies between farm organizations do much damage to the cause of agriculture. This is not true among farmers themselves, but human nature is human nature, and the leaders of various groups are bent upon supremacy for the particular organization. If an organization hits upon a good thing, the other organizations should be for it. Cooperation and not extermination is essential.

It is difficult for any student of the problem to arrive at a definite and restricted conclusion. The problem is not solved; and the enactment of this bill will in no way solve the problem in its entirety. It is regrettable that so much misinformation on both sides has gone out to the country concerning this measure.

The bill itself is loosely and poorly drawn. It expresses a hope and pictures an objective, with little attention having been given to the fundamental details and method of accomplishment. I feel sure that in drafting the bill much consideration was given to placing language in the bill that would sell the bill to the farmer. Now, the Congress finds itself in a position where, on the floor of the House, it is to be asked to rewrite the proposed law. Indeed, some of the proponents of the bill here in Washington have asked the farmers, who are to be the beneficiaries, to write and to wire the Congressman objecting to any amendments to the bill. In other words, these honest people have been asked to insist on the bill's passing without any amendments. Now, every Member here knows that this bill should not be passed without amendments. Mr. LEMKE, the author of the bill, would not want the bill passed without amendments; and Mr. LEMKE will offer clarifying and perfecting amendments which he feels are essential if the bill is to be seriously considered. I speak of this because present-day, high-pressure methods are ofttimes making it impossible to write constructive laws. If the honest legislator who is on the ground and knows the facts does not accede to these demands from back home, he is condemned as being opposed to what the law seeks to do.

The Frazier-Lemke bill has been before the House for several years. Those who fervently believe in the measure have only asked for a chance to be heard. When a bill is introduced into Congress it is referred to a committee, and it is the function of that committee to hold hearings—that is, to listen to the proponents of the bill as well as to the opponents of the bill. In these circumstances, the bill is considered carefully, line by line and sentence by sentence, and changes and alterations are always made. This is the sensible and correct procedure. When a bill of the importance and of the far-reaching effect of the Frazier-Lemke bill comes before Congress year after year, then there is but one way to handle the matter, and that is free, open, and fair consideration before the qualified committee and the Congress.

This bill has not had that consideration. The bill was never reported out by the committee with any thought that it would become a law in its present form. That is, the real friends of the bill on the Agricultural Committee, realizing the futility of any efforts in the committee, succeeded in inducing other members of the committee to report the bill to the House without any changes. Unquestionably there were those who felt that that killed the bill.

Efforts were then made to secure the permission of the Rules Committee to have the bill considered by the Congress. The signatures of 218 Members made this discussion and this consideration of the Frazier-Lemke bill possible. We are all agreed that the floor of the House is no place to write a technical bill. And I, for one, would be pleased to return this bill to the committee, where all sides might be heard, and a carefully prepared statute brought back for our vote and consideration. I know, however, that to recommit this bill would be to kill it. In short, no consideration would be given to it, and such a procedure is unthinkable under all of the circumstances.

One thing I like about the gentleman from North Dakota [Mr. LEMKE] is that he realizes that a measure of this kind is most difficult to draw, and that he is not only willing but anxious for constructive amendments.

On yesterday each Member of Congress was presented with an elaborate analysis of the Frazier-Lemke bill, H. R. 2066. This analysis was prepared by the Farm Credit Administration, the agency of the Government which is to administer the Frazier-Lemke Act if it ever becomes a law. The Farm Credit Administration, through its several divisions, is presumed to know more about the administration of agencies loaning to the farmer than any other set-up in the Government. In these circumstances, prudence requires that the Congress give every consideration to the details of this analysis. Again, it is impossible to do this on the floor of the House. The gentleman from North Dakota [Mr. LEMKE] has rightfully criticized the Farm Credit Administration for presenting this analysis at this late hour when the bill is being considered on the floor of the House.

It has been insisted in this debate that the Frazier-Lemke bill is discriminating in favor of agriculture, and that it is also discriminating as between various groups of farmers. There is some merit in both contentions. Yet it is very difficult to enact any law providing for reorganization or refinancing of industry or business of any type that is not in some way discriminatory. All bankruptcy laws are discriminatory. All reorganizations and moratoriums under existing law are discriminatory. That is, the creditor who acted in good faith, and as a matter of accommodation loaned the debtor money or supplied him with goods, has done the work and lived up to his end of the contract, has a right under the law to feel that the debtor will do the same thing. The debtor, however, through no fault of his own, or even through his own reckless habits, is brought to a condition where he cannot do that which he has agreed to do. In these cases, the present law discriminates in his favor, and the creditor must suffer. So, after all, there is discrimination. And I know of no way whereby we are going to enact legislation that will take care of the unfortunate farm debtor without giving to that debtor certain benefits which will not inure to the benefit of the more prosperous farmer.

By the terms of the Frazier-Lemke bill, the law is to be administered by the Farm Credit Administration under the advice and counsel of the executive committee of a new board, to be known as the Agricultural Board. This board is created not by the farmers of the country, but only those farmers who are debtors, and who are to receive the benefits of the Frazier-Lemke bill are to be permitted to participate. These debtor farmers are first to meet in convention in counties, send delegates to a State convention, and the State convention in turn sends a delegate to Washington. There is to be one of these delegates from each State in the Union. These delegates are to receive $15 per diem and necessary traveling expenses while on official business.

These delegates are to select three members of an executive committee, and these members are each to receive $7,500 a year and 5 cents per mile for necessary traveling expenses. Now, remember these expenses are all to come out of the farmer who is refinanced, and are in addition to the 1½-percent interest and 1½-percent principal paid annually. In addition to the board and the committee, clerical help must also be provided for.

There are many who are opposed to the setting up of another bureau of this type for the sole purpose of advising and counseling with the Farm Credit Administration.

This law could not be a success unless the administrator of the law made it a success. As I have just said, the Farm Credit Administration is the administrator. And the Farm Credit Administration is violently opposed to the law. Congress has been advised by the administration that the law is impracticable, discriminatory, unworkable, and will do more injury than good. Is it reasonable that we should pass this bill and place the administration of this law in this

hostile agency? We could not expect the law to be a success, and it would be just another failure, where the farmer would be the goat. The Congress did not know the attitude of the Farm Credit Administration until this bill reached the floor for consideration, and in this connection I cannot condemn too strongly the position of the Farm Credit Administration in withholding this information until the bill was being debated on the floor.

The Farm Credit Administration has thoroughly digested the bill and advises the Congress how the bill will be interpreted and accepted, if it becomes a law. We are told that the administration will cost at least 1 percent per annum on all loans, and at least 1 percent per annum will be necessary to cover losses; and that, inasmuch as the farmer's interest is to be 1½ percent, this would make the actual interest cost to the farmer of 3½ percent per annum instead of 1½ percent set up in the bill. This agency, therefore, concludes that, plus the 1½-percent principal payment, the total payment of the farmer each year would be 5 percent on his loan. Now, this is not some propagandist, some speaker, or some enthusiast talking; it is official and comes from the very people who are to administer the law, if it ever becomes a law. Give serious thought to that.

Attention is called to the fact that approximately 66 percent of the farms of the United States are not mortgaged, and that the mortgage debt on the remaining 34 percent of all farms is estimated $7,770,000,000. It is insisted that the $3,000,000,000 provided under the Frazier-Lemke bill would take care of less than 40 percent of the farmers whose farms are mortgaged at the present time and would, therefore, provide benefits for less than 15 percent of the farmers of the country at the expense of the remaining 85 percent. This agency of the Government further calls attention to the fact that if homes, other than farms, are given the same terms of refinancing, then over $25,000,000,000 of new money will be required. It is argued that this is not a general farm-relief measure, but that it will give the 15 percent of the farmers tremendous odds over the remaining 85 percent in the matter of production cost. And that this would not apply only to those present in distress but to future generations of farmers also. Attention is called to the fact that the 34 percent of mortgaged farms would be given advantage over the 66 percent of unmortgaged farms, because those farms could be sold at a much higher rate for the reason that the mortgagor really would have no equity in the farm; that he could remain as long as things went well, but could move off at any time he saw fit, and would not even have paid adequate rent for the time he occupied the farm.

Under this bill farm-loan bonds would be issued by the Farm Credit Administration just the same as farm-loan bonds are issued under the present law. But the rate of interest would be but 1½ percent per annum on real-estate security and 3 percent per annum on chattel-mortgage security. Now, the money to take up these bonds must come from somewhere, and the bill provides, that first, the bonds must be offered to the public for sale. If they are not taken by the public, then "it shall be the duty of the Federal Reserve and national banks to invest their available surpluses and net profits, after the dividends are paid to their stockholders, in such farm-loan bonds."

Many advocates of the bill have been led to believe that there is now in the vaults of these banks hundreds of millions of dollars that could be immediately invested in these bonds, with the only loss, if any, falling on the stockholders of the banks. All I know about Wall Street is what I read. I live in and represent a typical Main Street district, and of course, this law would apply to the banks in my district. Practically all of our banks closed during the bank holiday, and practically all of them had much difficulty in getting opened. And none of them at this time have much reserves. Whether or not some of them are permitted to remain open depends upon their ability to create sufficient reserves. This bill would absolutely prevent a bank from laying aside reserves to take care of slow assets and to better safeguard the depositors. In the district from which I come, most of the banks pay from 2 to 3 percent interest to the depositors on deposits. How can the small bank in the country pay this interest to depositors and at the same time be compelled by law to invest its available surpluses and profits in 1½-percent bonds? I am sure that I know of many thinking farmers in my district who would not want this bill enacted with such a provision.

The Farm Credit Administration again points out that if it were possible to refinance farm mortgages, as provided in the Frazier-Lemke bill, that this would upset the whole farm-loan machinery. Billions of dollars have been loaned by the Government under the present Farm Loan Act by the Farm Credit Administration. These bonds are outstanding and are held throughout the country. They bear interest at from 3 to 4½ percent and are not callable for from 8 to 10 years. Now, these institutions would have this money, and it would be impossible for them to safely invest the money to earn the interest which the institutions must pay to the holders of these outstanding bonds. The result could be but one thing, and that is default in the payment of the interest on these outstanding bonds, which would mean receivership and eventual liquidation of the system. This would entail the loss of $113,000,000 capital-stock investment, and some 600,000 farmer borrowers through the system, as well as some $217,000,000 which the Government has invested. Understand this is what the Government agency itself tells us today.

No other loaning agency could compete with the Government under this bill. Therefore this bill would throw the burden of financing the total farm-mortgage debt on the Government, which would mean that instead of $3,000,000,000, between $7,000,000,000 and $8,000,000,000 would be required to finance existing debts alone; and that does not include the farms that could be purchased by farm tenants and members of farmers' families. Let us not forget that just so sure as this benefit is given to agriculture, it will be given by Congress to the rest of the home owners of the country. The Government estimates the additional amount at $17,740,000,000.

We can get some idea of the enormity of this proposition when we recall that nearly 750,000 loans for approximately $2,000,000,000 have been made by the Federal land banks and the Land Bank Commissioners within the last 3 years. That the estimated scale-downs in connection with these operations approximate $200,000,000. This has brought about annual interest reductions as a result of such refinancing amounting to $38,000,000.

Now, I assume that the above statements are correct, considering the source. If they are correct, then this bill should not be railroaded through without adequate consideration. Some of us have protested vociferously about the present administration's asking us to vote for legislation that had not been properly considered. And, to be consistent, we should apply the same rule to this legislation, the purposes of which we are in favor.

I want to again impress upon you the fact that it will be absolutely necessary to issue $3,000,000,000 in new money. I am not going to discuss the security back of that money, because under this bill there would be $3,000,000,000 worth, and no more, of farm mortgages and chattel mortgages back of it. That is, on the theory that the loans were just equal to 100 percent of the security.

The question of inflation or expansion is one about which many people differ. There are those who can see no inflation or expansion of the currency in the issue of $3,000,000,000 of new greenbacks. Personally, I feel this is inflation, but I would not fear $3,000,000,000 at all, if the matter ended there. The debate on this floor within the last 2 days has convinced me thoroughly that this measure is but the beginning; and if there is not a tacit agreement, there is at least a friendly feeling between those who believe in inflation that this bill will be followed by a similar bill refinancing urban mortgages. The farmers of my country who are interested in lower interest rates and more considerate terms of payment are as a rule opposed to currency inflation. And one of their leaders from my own State was in my office yesterday and gave me this information and agreed with me

that while $3,000,000,000 as provided is controlled expansion, yet if we include all indebtedness this would be ruinous inflation. Under my responsibility to the farmers of my district, I cannot bring myself to the point where I am willing to step into a boat in a swift current and without oars.

I am sure that my friends who have written me and telegraphed me asking me to vote for this bill without amendment do not mean what they say. This bill provides for a loan on farms up to 100 percent of their fair value plus 75 percent of the value of insurable buildings and improvements. Mr. LEMKE, the author of the bill, recognizes that this provision is not sound or advisable and has offered an amendment to loan only 80 percent on the fair value of the farm. Most of the opponents of the bill voted against this amendment because they wanted to make the bill ridiculous.

The bill also provides that if the farmer's "mortgage and other indebtedness" exceeds more than the actual value of his assets, then such "mortgage and indebtedness shall be scaled down." In other words, the small bank in your home town which has loaned the depositors' money to a farmer on his mortgage, the groceryman who has sold groceries to the farmer, the drygoodsman, the fuel man, and all others, add up the amount owed, and then they are compelled to take whatever the Government wants to pay in settlement, and the debtor gets the entire benefit.

In view of the Supreme Court decision on the Frazier-Lemke moratorium law this provision is clearly unconstitutional. It is so recognized by Mr. LEMKE, and he has offered an amendment striking it from the bill. Yet the farmers back home are insisting on making no changes. They do not mean that, and I am pleased to vote for these perfecting amendments.

The bill, however, as it comes to a vote, is radically different than the bill as the farmers know it. I appreciate that there are those who will say that no material changes were made, and so forth. When we recall that the farmers are for this bill, first, because they believe it reduces their rate of interest to 1½ percent, when, as a matter of fact, as stated by the Farm Credit Administration, the interest rate with overhead will amount to 3½ percent. They are for the bill because it permits them to borrow the fair value of the real estate plus 75 percent of the reasonable value of the improvements. I know many farmers who cannot come under the present law because the Farm Loan Board insists upon too much equity in the property. Now the amendments have changed the bill so that as it will be voted upon the amount to be borrowed is the same as under the existing law. Other farmers are for the bill because it permits them to borrow on their livestock at 3-percent interest. The bill has been amended by striking out all reference to livestock.

The American Federation of Labor, speaking for 50,000,000 people, has today gone on record vigorously opposing the Frazier-Lemke bill because of its inflationary provision. William Green, president, says that the bill is inflationary, that it will upset the whole economic system and bring untold distress and suffering to the wage earner and consumer. Now, we all realize that no one group of our people can long prosper without the prosperity of the other groups. The farmer must have higher prices for his products. Therefore he must sell these products in the American market, and the wage earner is the big consumer in the American market. The American Federation of Labor undoubtedly wants prosperity, and nothing but a sincere belief that this bill is inflationary and will do damage could justify such a pronounced stand taken by the Federation.

The last 2 days, during consideration of this bill, have been exciting days for Members of Congress. Many farmers, as well as many inflationists who favor the legislation, have been in the galleries. As we all know, these groups have visited our offices, urging us to vote for this bill. On the other hand, speaking for myself, no one has approached me or even written to me opposing the legislation, so that my action today will not be guided by the usual story about lobbyists and influences of that kind.

During all my service in Congress I have never had a more trying decision to reach. My district is largely agricultural. Many of my personal friends and acquaintances have been thoroughly sold on this bill. They have mortgages that are due or to become due. They can see no future without relief on the part of the Government. I want to give them that relief. They have a right to expect it from me, and there is no reason why I should not want to do this. However, this responsibility is mine; and while political expediency undoubtedly suggests that I should vote for this bill, yet my conscientious judgment tells me that the bill is not wholesome as it now stands, that it could not and would not accomplish beneficial results if administered by the Farm Credit Administration, for the reasons above stated. The farmer must have a lower rate of interest on existing indebtedness. He must have more liberal terms of payment if he is to remain on the farm, but he must not have, in connection with this, monetary inflation that will destroy his market.

I have urged throughout this session that the Agriculture Committee give attention to some form of legislation which will be of benefit to all farmers and that will assist in making it possible that every farmer who produces on the soil shall have the cost of production for his product, plus a reasonable profit. As between industry and agriculture, if there is to be any discrimination, it must be in favor of agriculture, and the sooner the country recognizes this fact the better.

I am sure that many of my farmer friends will be disappointed in the vote that I am compelled to cast here today, but I have faith enough in those friends to believe that if they knew all of the conditions and understood the situation as I do at this hour and under all the circumstances, they would approve of my vote, rather than condemn it. This bill is not going to pass the House, therefore a vote for it is but a gesture. If it did pass the House, we all know it could not pass the Senate. But if it did pass the Senate, it would be vetoed by the President. Let us remember that it takes two-thirds of each House in any Congress to pass a bill over a President's veto.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota [Mr. LEMKE].

The amendment was agreed to.

The Clerk read as follows:

SEC. 16. The benefits of this act shall also extend to any farmer, or member of his family, who lost his or her farm through indebtedness or mortgage foreclosure since 1921 and who desires to purchase part or all of the farm lost or another like farm. It shall also extend to any tenant, or member of his or her family, who desires to purchase an encumbered farm, provided he or she has lived on and operated a farm as a tenant for at least 2 years prior to the enactment of this act.

Mr. LEMKE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LEMKE: Page 9, line 1, strike out "1921" and insert "1928".

Page 9, line 5, strike out the word "two" and insert the words "three consecutive."

Mr. LEMKE. Mr. Chairman, this amendment simply permits the farmers who have lost their farms since 1928 to take advantage of the act instead of those who lost them in 1921.

The amendment was agreed to.

Mr. DIES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DIES: Page 9, line 4, strike out "an encumbered farm" and insert "a farm not exceeding $5,000 in value."

Mr. DIES. Mr. Chairman, this amendment is acceptable to the author of the bill and to his steering committee. I invite your attention to the wording of the bill at present, which limits the character of farm which a tenant can purchase to an encumbered farm. If this is left in the bill, it will preclude tenants in many sections of the country from purchasing farms. Also, it will enable mortgage companies to unload farms upon which they have liens and mortgages. It, therefore, is not fair to limit this provision to only those farms that have encumbrances or liens upon them.

Mr. BOILEAU. Mr. Chairman, will the gentleman yield?

Mr. DIES. Yes; I yield.

Mr. BOILEAU. Will the gentleman state whether or not this $5,000 limitation applies to tenants or to all farmers?

Mr. DIES. It applies to tenant farmers.

Mr. BOILEAU. And only to tenant farmers?

Mr. DIES. Yes.

Mr. BOILEAU. In other words, it applies to a tenant who wants to buy a farm, but a man who owns a farm now will not be affected or limited by the amendment.

Mr. DIES. Under the bill as written there is no limitation on the value of the farm to be purchased by the tenant. More than 60 percent of the farmers of the country are tenants today, and tenancy is increasing with alarming rapidity.

In a recent report made by the Secretary of Agriculture he pointed out the seriousness of tenancy in the United States.

Mr. KVALE. Mr. Chairman, will the gentleman yield for one question?

Mr. DIES. Yes.

Mr. KVALE. Does this amendment embody some of the principles of the tenancy bill held up on the other side?

Mr. DIES. Yes; the tenancy bill which was referred to the House Committee on Agriculture and which has never been reported by that committee and evidently will not become law during this session of Congress.

As I said a moment ago, the Secretary of Agriculture in his report pointed out the seriousness of tenancy and directed the attention of the country to the necessity of taking adequate steps to put a stop, as much as possible, to the increase of tenancy in the United States.

In many counties in the South more than 75 percent of the farmers are tenants. A few landlords own the vast acreages that are cultivated by tenant farmers. I hope that my amendment will be adopted. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. DIES].

The amendment was agreed to.

Mr. BINDERUP. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, once more reverting to the proposition that has been stated here several times this afternoon about the Federal land banks; once more reverting, if you please, to the great advantage that the Frazier-Lemke bill will be under this wonderful system, I want especially to talk to those to whom I have listened for the past year and a half talking about the idle textile mills in the New England States. I want to show what an advantage this will be.

The Frazier-Lemke bill is nothing more nor less than just a proposition made to Uncle Sam that says, "We want to go into partnership with you, Uncle Sam. You give us $3,000,000,000 of credit and we will mortgage to you all of our homes, involving three times the amount of money we ask, and we are going to do much better by you than has ever been done before, because, under our proposition, if you give us $3,000,000,000 of credit we will give you $45,000,000 a year in interest, which is 50 times more than you are used to getting from the Federal Reserve banks, and besides this we will make $90,000,000 for ourselves."

I want this thought to go back to the East, because in the West we are buying your products. The farmers in the West have not had a new suit of clothes for 10 years. We are going to buy with this money—and I am taking now the figures from New York State, which shows the velocity of money. This shows that in 1935 money changed hands 72 times in 1 year, and taking 90,000,000 times 72, you have the enormous buying power of $6,480,000,000. This represents the increase in purchasing power. [Applause.]

Mr. JONES. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BIERMANN. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 9, after line 6, add a new section to read as follows:

"The mortgages for the loan provided in this act shall be so drawn as to provide that when the mortgaged property passes out of the hands of the original mortgagor the loan shall be due and payable immediately.

"This provision shall not apply to inheritances from husband to wife, or wife to husband, parent to child, or child to parent."

Mr. BOILEAU. Mr. Chairman, I make the point of order that the amendment is not germane. It refers to inheritances, and it seems to me also that it is not germane to this part of the bill.

The CHAIRMAN. The Chair thinks that it is germane, and therefore overrules the point of order.

Mr. BIERMANN. Mr. Chairman, I would like the particular attention of the Members in charge of the bill, because I think when they understand this amendment they will accept it. The purpose of the amendment is to eliminate speculation. My amendment provides that if the mortgaged property passes from father to son or wife to husband the mortgage goes with it. But if the property is sold the mortgage forthwith becomes due.

We must assume that a farm carrying a mortgage drawing 1½-percent interest will have a higher value than a farm mortgaged at 5 percent. So there is the element of value added to the farm by the fact that the mortgage carries an uncommonly low interest rate.

My amendment proposes to eliminate the element of speculation in these farms mortgaged at 1½-percent interest. It proposes to confine the benefits to the distressed farmers and to prevent speculation in their farms.

Mr. BOILEAU. Will the gentleman yield?

Mr. BIERMANN. I yield.

Mr. BOILEAU. It seems to me that the gentleman's amendment has a good deal of merit.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

SEC. 17. The executive committee of the board of agriculture shall have power in case of crop failures, and in other meritorious cases, to extend the time payments due on loans made under this act from time to time for a period not exceeding 3 years, provided the mortgagor keeps up the payment of all taxes on the mortgaged property.

Mr. KING. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KING: Page 9, line 12, after the word "property", insert a new section, as follows:

"For the purposes of this act the term 'State' or 'States' shall include the Territories of Alaska and Hawaii, and the Territory of Alaska shall be held and considered a single county or parish."

Mr. KING. Mr. Chairman, Hawaii is almost entirely an agricultural community, dependent for the livelihood of its people principally on agriculture. Its interest in this legislation now before the House is shown by a joint resolution adopted by the Legislature of the Territory of Hawaii requesting the Congress of the United States to enact this bill into law, which resolution I presented to the House last session.

We have been working steadily toward diversifying our industries and are doing everything within our power to encourage small farming and the raising of food crops. This is a matter of military importance as well as of economic value to the Territory. Any legislation that will make the farmer's burden less is as greatly needed in Hawaii as on the mainland.

The United States census for 1930 shows that we have 5,955 farms, totaling 2,815,026 acres of land, of which 440,579 are improved. The value of this farm property, lands and buildings, is $125,938,756. The proportion of all farms operated by tenants is 72.5 percent, and 30.8 percent of the farms are mortgaged. The total amount of mortgaged debt is $1,123,570, and the ratio of debt to value is 52.3 percent. The average value of the mortgaged farms is $6,321, and the average of the mortgages is $3,305.

While this indicates a healthy condition of our agricultural industries, it also shows that there is a substantial field

for the refinancing of farm mortgages. We have no Territorial agency to serve this purpose and the Farm Credit Administration has but recently been extended to include Hawaii.

When it is realized that we produce for sale approximately $100,000,000 worth of agricultural products annually in addition to a considerable amount of foodstuffs consumed locally, and that we buy American merchandise and foodstuffs to the value of approximately $90,000,000 annually, our deep interest in this legislation, which may have a tremendous effect on agriculture as a whole, can be readily understood.

Hawaii since the date of its annexation to the United States has shared with all the States in bearing every national burden, pays a substantial amount of taxes into the Federal Treasury, has asked for no exemptions not equally applicable to the States of the Union, and asks in return only that any legislation designed to benefit the people of the States be extended to include Hawaii as an integral part of this great Nation.

I sincerely hope that the House will accept the amendment I have offered as a matter of common justice to the Territories of Alaska and Hawaii.

Mr. LEMKE. Mr. Chairman, we accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Hawaii.

The amendment was agreed to.

The Clerk read as follows:

SEC. 18. This act shall be liberally construed, and no technicalities or limitations shall be imposed or permitted to interfere with the speedy carrying out of its purposes; and the provisions of the Farm Credit Administration and the Federal Reserve Banking System shall apply as far as applicable in the carrying out of the provisions of this act; and all laws or parts of laws in conflict herewith are for the purpose of this act repealed. The persons charged with the duty of carrying out the provisions of this act are authorized and directed to do all things necessary or convenient to accomplish its purposes with expedition.

The CHAIRMAN. Under the rule the Committee will rise.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. WOODRUM, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee had had under consideration the bill (H. R. 2066) to liquidate and refinance agricultural indebtedness at a reduced rate of interest by establishing an efficient credit system, through the use of the Farm Credit Administration, the Federal Reserve Banking System, and creating a board of agriculture to supervise the same, and, pursuant to House Resolution 123, he reported the same back with sundry amendments adopted in Committee of the Whole.

The SPEAKER. Under the rule the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. BOILEAU and Mr. KVALE demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 142, nays 235, not voting 51, as follows:

[Roll No. 95]

YEAS—142

DeRouen	Jenckes, Ind.	Polk	

The SPEAKER. The Clerk will call my name.

The Clerk called Mr. Speaker BYRNS' name, and he answered "nay."

So the bill was rejected.

The Clerk announced the following pairs:

On this vote:

Mrs. Jenckes of Indiana (for) with Mr. Bell (against).
Mr. Green (for) with Mr. Bacharach (against).
Mr. Ferguson (for) with Mr. Cavicchia (against).
Mr. Dietrich (for) with Mr. Dear (against).
Mr. Hope (for) with Mr. Kerr (against).
Mr. Marshall (for) with Mr. Steagall (against).
Mr. Taylor of Colorado (for) with Mr. Andrew of Massachusetts (against).
Mr. Larrabee (for) with Mr. Lehlbach (against).
Mr. Zioncheck (for) with Mr. Harlan (against).
Mr. Doutrich (for) with Mr. Sullivan (against).

General pairs:

Mr. Sears with Mr. Jenkins of Ohio.
Mr. Mansfield with Mr. Perkins.
Mr. Lamneck with Mr. Bolton.
Mr. Bulwinkle with Mr. Hartley.
Mr. Maloney with Mr. Reece.
Mr. Eagle with Mr. Thomas.
Mr. Fernandez with Mr. Welch.
Mr. Claiborne with Mr. Harter.
Mr. Caldwell with Mr. Kee.
Mr. Polk with Mr. Sanders of Louisiana.
Mr. Montet with Mr. West.
Mr. Dempsey with Mr. Utterback.
Mr. Edmiston with Mr. DeRouen.
Mr. Brennan with Mr. Cary.

Mr. PETTENGILL. Mr. Speaker, my colleague the gentleman from Indiana, Mr. LARRABEE, is unavoidably detained on account of illness in the family. If present, he would have voted "aye."

Mr. JOHNSON of West Virginia. Mr. Speaker, my colleague, Mr. SMITH of West Virginia, is absent. Had he been present, he would have voted "no."

The result of the vote was announced as above recorded.

Mr. BANKHEAD. Mr. Speaker, I move to reconsider the vote by which the bill was rejected, and lay that motion on the table.

The motion was agreed to.

EXTENSION OF REMARKS—THE FRAZIER-LEMKE BILL

Mr. O'CONNOR. Mr. Speaker, as we are about to finish the debate on the Frazier-Lemke bill and vote upon its passage, I desire to take the opportunity to reiterate what I have previously said about this measure.

As has been very clearly demonstrated in the debate here during the past 2 days, and as was well known for years by all who took the trouble to investigate, this bill is the greatest monstrosity which was ever presented to any legislature.

If it ever was properly reported out of the Agriculture Committee, it should never have been so reported. The final vote to be taken today, in my opinion, not only justifies the attitude of a Rules Committee of the House of Representatives, irrespective of which party is in power, but should completely justify the decision the Rules Committee has taken in reference to this measure.

From the beginning the Rules Committee has always been willing to grant a hearing on an application for a rule for the consideration of this bill, provided that the request was presented by a majority of the members of the Agriculture Committee, irrespective of party. Such a request has never been presented.

No legislature can conduct its business in town meeting. This bill typically justifies the futility of such a procedure. About 13,000 bills have been introduced into this Congress. Only about 400 will ever become public laws. If the theory of the advocates of this measure was carried to its logical conclusion, every one of the 13,000 bills would be brought on the floor for a town-meeting discussion.

It is the function of the Rules Committee to determine just whether or not a bill is likely to pass the House. The result today will justify the attitude of the Rules Committee as to this particular measure.

To bring on the floor of the House a bill just because it has behind it a demagogic appeal, or an outside influence, is contrary to the proper functioning of a legislative body and its committees.

If anybody did not know before that this was purely an inflationary measure, they certainly know it now. A cruel, dastardly deception has been practiced on the farmer and even on some of the city dwellers in reference to this bill. That deception should now be apparent to all, after we have wasted 3 days in considering this monstrosity, instead of proceeding to the consideration of the 260 bills already on the Union Calendar and about 50 bills on the House Calendar, all duly reported from the standing committees.

The method of legislation by petition will again be demonstrated as inefficient and contrary to good legislative practice. No bill has yet ever become a law which was brought before the House by the petition method.

The letter read to the Committee of the Whole House on the state of the Union today by the distinguished Speaker of the House, addressed to him by Mr. William Green, president of the American Federation of Labor, is a succinct reiteration of the attitude of the wage earner of this country toward such an inflationary measure as this, the Frazier-Lemke bill. In my speech on the floor of the House on February 18 of this year, and again in my remarks in the RECORD of last Friday, May 8, I stated the position of Mr. Green and the wage earner toward this bill.

If this measure ever became a law it would be ruinous to every wage earner in my district, where there are no farms, and to every wage earner throughout the country, and, furthermore, to most of the farmers of the Nation.

During seven terms in Congress I have gladly supported every piece of legislation which would really help the farmer. Irrespective of the fact that there are only 6,000,000 farmers, including tenant farmers, in the whole country out of a population of over 127,000,000, and in addition to the fact that of the 50,000,000 wage earners in this country, only about 10,500,000, or about 20 percent, are employed on the farm, this bill would not help 4 percent of the farmers. It could not possibly help, by reason of its provisions, any farmer having a mortgage on his farm which exceeds the value of his farm, which is the situation in most instances where the farmer is now in stressful circumstances. There is no provision in the bill for the people in the cities who owe $21,000,000,000 in mortgages on their homes, as compared with about eight and one-half billion owed by all the farmers. Wherever the city home owner has been able to borrow funds from the Government, he has been compelled to pay 5-percent interest. This bill would take over the mortgages on the farms at 1-percent interest.

The city home owner can only refinance his mortgage at a valuation of from 60 to 80 percent. Under this bill farm mortgages would be taken over at 100 percent and the insurance companies would receive the billions of dollars to be expended by the Government.

There are only about 33 percent of the farms in the country which have any mortgages on them. Therefore, this bill would not help the other 66 percent of the farmers, who would have to pay the cost of the inflationary feature of the bill.

Nobody believes that the bonds mentioned in this bill could ever be sold at 1½ percent interest on collateral such as cattle and hogs. Therefore, the inflationary provisions of the bill would go into effect at once and we would have $3,000,000,000 of printing-press money, which would increase the living expenses of the wage earner and consequently decrease the value of his wages.

The Federal land-bank system, which has been so beneficial to the farmer, would be absolutely ruined, with a loss of about $113,000,000 invested by 600,000 farmers in the institution and a further loss of $217,000,000 invested by the Government.

Already about $2,000,000,000, comprising about 750,000 loans, has been made to the farmers.

Foreclosures have progressively decreased. There are now only about 19 foreclosures per 1,000 farms, which is substantially the same as in 1926, the normal year before the depression.

With the increase in commodity prices, statistics show that the farmers have been able to pay the interest on their farm mortgages so that there is a gross exaggeration in the statements as to the present-day condition of the farm population.

The unemployment existing today, which we are trying to remedy, is not in the farming sections, but in such districts as mine, where the building trade mechanics, for instance, are still out of employment after years of unemployment. It is they who know what suffering in the depression is as compared to the farmer, who would be the last person on earth who would ever starve.

Most of the activity in support of this bill comes from the so-called farmer who owns thousands of acres of farm land and owes from forty to one hundred thousand dollars in mortgages on their farms. That is not our conception of a farmer. We usually think of a farmer with a comparatively few acres principally devoted to the maintenance of his family. Many of the chief agitators for this bill are, in our opinion, big businessmen with big investments in farms, who never in their life handled a plowshare. We have seen them around Washington with their canes and spats. It is such people as they who have deceived the real farmer and the city dweller as to this bill.

It may have been healthier to expose all this deception on the floor of the House, but I still feel that the attitude of the organization of the House toward this bill was justified and that the vote today will further justify it.

Mr. AYERS. Mr. Speaker, the Frazier-Lemke bill to refinance farm mortgages, now under consideration for the first time by Congress, has been under consideration by the people of this Nation since 1928. During these 8 years the people of the Nation have studied it and have come to understand it. It has been the subject of discussions and debates in every State legislature of this Nation. As a matter of fact, 32 State legislatures have memorialized Congress to enact this bill into law, and every farm organization of the Nation is on record for it.

INVISIBLE GOVERNMENT PREVENTS PROGRESS

The powerful invisible government which we have always had to battle in order to pass any progressive legislation has been the obstacle that prohibited consideration of this bill by Congress for all this time.

Now, Mr. Speaker, this is not a relief bill. It is a farm-credit bill. We are only asking for farm credit in the same terms that industrial credit has been established for the industries of the Nation. This, in reality, is a farmers' farm-credit bill and not a bankers' farm-credit bill, and that is the reason the invisible government has delayed it so long and hopes to kill it in the end.

Lack of understanding by Congress of a real farm-credit system and suppression of such understanding by the privileged interests of this Nation—the invisible government, if you please—is what has hindered farm-credit development, and in reality hindered recovery.

FARMERS NOT ASKING CHARITY—JUST FAIR PLAY

The farmer is not asking for charity in this bill, nor is he asking for relief, except that he be given credit on the same basis as industry.

To set up a program under the Farm Credit Administration through the enactment of this bill would be just exactly the same thing as has been set up for other industries through the Reconstruction Finance Corporation. In the R. F. C. industries secure credit on a business basis and back their loans with property and securities. Under this bill the farmer is to secure credit through the Farm Credit Administration in exactly the same manner. It is just an ordinary business deal where the farmer hires money just the same as industry hires money now through the R. F. C.

In both instances the system is based on local representations, associations, cooperatives, and so forth. In one it is industrially owned and controlled and in the other it is farmer owned and farmer controlled. Take it all in all, it is a permanent system which is democratic in its nature and based upon cooperative principles which have been applied to credit for a long period in this and other countries.

The stigma of aid or charity or relief is not attached to this system, which is meant for the solvent operator with a sound farm or ranch unit upon which, if given a fair chance, he can make a decent living and educate his children. It will stabilize farm credit, it will lower costs of production, and it will lower prices to the consumer, and in the end will make more profits and add security and stability all along the line; it will revive agriculture, the primary industry of the nation, and oil the wheels of all other industry, thereby relieving unemployment and aiding labor in general. It will eliminate the distress cases which are now the problem of the Resettlement Administration, the Seed Loan Administration, and the Farm Credit Administration. The summary is that it will put agriculture back on its feet.

Mr. Speaker, let me say again that this is a farm-credit bill and not a farm-relief bill; but it is a farm-credit bill for the farmers and not a bankers' farm-credit bill. That is the very reason why it has not been brought up for a vote long ago. If it were a bankers' farm-credit bill, we would have no trouble in getting it up for consideration; and if it is defeated today, I am sure it will be because of the fact that it is not a bankers' farm credit bill. O Mr. Speaker, I hope that Congress has waked up to its duty of representing the people and not the privileged few. [Applause.]

REACTIONARIES OF BOTH PARTIES TOGETHER

Mr. Speaker, the opposition to the Frazier-Lemke bill comes from the same source and from the same interests which have opposed all the recovery legislation which we have passed during this administration. What "gets my goat" is that some of the administration leaders right here on the floor of this House are, in the consideration of this bill, throwing in with their avowed enemies. I just cannot understand it. It is too deep for me. That is not the way we do things out in my country.

The opposition to this bill comes from Wall Street, from the international bankers, from those in control of the Federal Reserve System, and from those who have had special privileges for so long that they have come to believe that they and they alone own and control this Government for their own benefit. They have organized under many deceptive heads, the latest of which is the Liberty League, which league in their name is now fighting this bill for the simple reason that it is a farmers' farm credit bill instead of a bankers' farm credit bill.

I have heard supporters of the Liberty League, the Economy League, Wall Street, and the Tammany organization stand up on the floor of this House yesterday and today, crying to the high heavens and shedding crocodile tears for the farmers and relating how they have always voted for and helped the farmers of this Nation, and that they are doing it now on this bill by voting against it. They infer that the farmer is misguided, they insist and state that they are coming to his rescue. They are self-appointed guardians of the farmer.

Well, Mr. Speaker, let us call a spade a spade; that is what we do out in Montana, and that is what I have always done here. The farmer of this Nation does not need a guardian. He knows what he wants and he knows why. So if these so-called friends desire to help him, let them go with him on this bill. [Applause.]

WALL STREET FARMERS FARM THE FARMER

The special-privilege classes have always voted for agricultural measures in which they see 10 times the benefit to themselves as that which goes to the farmer. They usually wrote such measures and branded them as farmers' legislation. True, they supported the Farm Credit Administration and the legislation creating it, also the old Farm Board. They did that because they saw 4½- to 6-percent interest coming to them on tax-exempt bonds which they would purchase to finance it, and, remember, the farmer in the end paid that interest, both on his loan and on the bonds, and then took up the slack on the tax exemption of the bonds.

Now that this bill proposes that the Government refinance the farmer at 1½-percent interest, they are for him being against it. That is what we call out home "hitting below the belt when the referee isn't looking." But what I am trying to do, Mr. Speaker, is to put this into "slow motion" so the picture will show the real facts.

A CAMPAIGN OF FEAR ON INFLATION

The special privileged class is now using every effort to scare the people and to scare Congress into the belief that the Frazier-Lemke bill is an inflationary measure and therefore dangerous to the safety of our money system and of our Government. True, it is inflationary to the extent that it expands our currency to the extent of $3,000,000,000, but please remember that this expansion is protected by more than twice that amount of idle gold bullion in the Treasury, and this expansion, not inflation, is further protected by first mortgages on the agricultural lands of this country—the best security in the world.

ANSWER TO INFLATION CHARGE

Let me remind you, Mr. Speaker, that inflation never occurred in any stable government in this world, and let me challenge our adversaries on that subject.

The most peculiar thing that I have noticed since coming to Congress is that the special privileged few of this Nation have always branded as inflationary every piece of legislation which helps the farmer and the toiler of the country; but according to their ideas nothing is inflationary that helps the bankers, the Wall Streeters, the industrial institutions, or big business. This inflation idea in a stable country like ours is just a bugaboo. It never has and cannot come about in a stable country. I shall answer that in detail later when I take up and answer the arguments that have been put up about the German marks. That has been a scarehead and a bugaboo on the floor yesterday and today.

TAX DODGERS AND TAX REFUNDERS OPPOSE BILL

The same tax dodgers and tax refunders who held sway and robbed the Treasury of the United States under the Mellon and Mills regimes, by evading just taxes and by securing refunds equaling an amount greater than the Frazier-Lemke bill costs for refinancing farmers, are the same persons who are now branding this bill as inflationary and dangerous, and who are crying about the issuance of $3,000,000,000 worth of money backed by idle bullion and secured by first mortgages on farm lands. They are the same persons, now organized as Liberty Leaguers, and who strenuously opposed all tax bills which have been enacted by this administration, and who are fighting the present tax bill which proposes to levy a tax upon exorbitant corporation reserves. These taxes upon exorbitant reserves are proposed primarily to force the companies having such reserves to pay them out as dividends to stockholders who in turn will be glad to pay income taxes and surtaxes on the same in order to secure their just dividends. They would put this money into circulation, which, in turn, would help relieve the depression. [Applause.]

It might be worth while in this connection to take the time of the House to name just a few of these big corporations now holding exorbitant reserves for the benefit of the big stockholders and to the detriment of the average stockholder. The United States Steel Corporation has a reserve of over $520,000,000. Just think of it. More than one-sixth the amount that it will take under the Frazier-Lemke bill to refinance farm mortgages. Then, the Standard Oil Co. of New Jersey has in its reserve over $449,000,000; the American Telephone & Telegraph, $401,000,000; General Motors, $270,000,000; the American Tobacco Co., one hundred and five million; the Atlantic & Pacific chain-store corporation, $100,000,000.

The average stockholder of these companies would be mighty glad if these tremendous reserves were reduced to a reasonable amount, and they, as stockholders, had distributed to them their just dividends. It is they who are entitled to it, but the big stockholders of these companies who are likewise stockholders in banks where these fabulous reserves are deposited, are the stumbling blocks in every instance. They keep these enormous reserves to make profits for themselves in their banking enterprises in which the average stockholder has no interest, and this is the way they do it: They buy tax-exempt bonds, through their banks, upon which they secure all the profits as stockholders of the bank which holds the reserves on deposit. It is a case of using the other fellow's money for their own gain and in beating him and beating the Government also to their own individual profit.

Then there is another class of these exorbitant reserve corporations in which there is just a little difference, but which I consider worse than those I have just named. They are the "family corporations", such as the Ford Motor Co. It has $580,000,000 in reserve, which is deposited in a Ford family bank, which purchases tax-exempt Government bonds upon which the rate of interest greatly exceeds that which is provided the farmer shall pay under the Frazier-Lemke bill. Just think of it! One family corporation with a reserve of more than one-sixth the amount that is provided to refinance the farmers under this bill, and this family is not paying a penny of taxes on this income which they hold in reserve; but, on the contrary, through their family banking connections, they are actually investing the money in tax-exempt and interest-earning Government securities. Of course, these families do not want to distribute these reserves because, first of all, if they did, the members of the family would have to pay an income tax and a surtax on the dividends distributed to them; and, second, they would lose the interest the Government is paying them on this money which they should primarily pay to the Government.

I could go on with a recitation of the same state of affairs with the Morgans, the Mitchells, the Chases, the Kuhns, the Loebs, the Mellons, the Du Ponts, the Mills, and many other family Liberty League enemies of this bill. All of these people are against the farmer being refinanced directly through the Government as is proposed by this bill because it would tend to break down their bond racket. In short, they are fighting this bill because it is a farmer's bill and not a banker's bill.

INFLATION CANNOT EXIST IN A STABLE GOVERNMENT—GERMAN ARGUMENT REFUTED

The inflation argument on the floor of the House since we commenced the consideration of this bill has really become emotional. Almost hysterically we have been reminded of the great inflation of the German mark after the World War, and have been warned that this bill is a first step toward the same disaster that came to the German mark. Now, let me remind you, Mr. Speaker and Members of the House, that in all the history of the world, inflation has never occurred anywhere at any time in a stable government. Let us remember that when the armistice was signed Germany was the most unstable of all governments on the globe, and the German leaders were wise enough to deliberately and intentionally take advantage of that fact and issue untold quantities of paper money and ruin the value of their currency, thereby wiping out their debt. But you will remember that these German marks were not backed by any gold that Germany had, nor were they backed by any gold that she was to get in the future; hence she wiped out her debt and vastly increased her own wealth; first, by wiping out her debt; and second, by preserving and keeping her gold; and third, by not obligating any gold she might acquire in the future.

The German situation is absolutely no argument in this case, for this bill proposes to put the idle gold of the Treasury and the lands of this Nation back of the money that is to be issued for the refinancing of agricultural loans.

This inflation argument is only a straw man being put up with the hope that the Congress will put on its boxing gloves against it and lose sight of the real issue, namely, refinancing the farmer with the best security in the world. I beg of you, Mr. Speaker and Members of the House, do not let them fool you with this straw man.

FEDERAL RESERVE GETS ITS MONEY AT COST OF PRINTING—WHY CANNOT THE FARMER GET HIS AT A REASONABLE RATE OF INTEREST?

The same people and the same interests who are putting up this inflation straw man are the persons and the interests who during the last 10 years have manipulated by amendments the Federal Reserve law so that today the Government is printing and delivering to the Federal Reserve System all of the currency of the Nation, except the $1 bills which are issued against the silver in the Treasury, for just

the cost of printing. That is a fact, Mr. Speaker and Members of the House; the Government is not receiving one item of interest on the currency issued to the Federal Reserve System. The Government's credit is back of that currency, yet all of the profits are made by individual bankers. All that the Government gets is the cost of the paper, the ink, and the printing, which averages about 30 cents per thousand dollars.

Now that the farmers of the Nation are asking that currency be issued to the extent of $3,000,000,000, which is only about half of what has been issued to the Federal Reserve, and to be secured by the best security in the Nation, upon which they, the farmers, will pay 1½-percent interest and amortize the principal at 1½ percent per annum, the supporters of the Federal Reserve brand it as inflation.

Now, let us compare the money that is issued to the Federal Reserve with that which is proposed to be issued by this bill. The Federal Reserve gets its money absolutely free except for the cost of printing, which is 30 cents per thousand dollars, while under this bill the money to be issued will draw interest at the rate of $15 per annum on each thousand dollars. In other words, the money to be issued under this bill will bring into the Government 50 times as much as that which is issued to the Federal Reserve, and under this bill it will all be profit to the Government, whereas under the Federal Reserve issue the Government receives no profit at all—just the cost of printing.

NO NEW BUREAUS REQUIRED

To refinance the agricultural indebtedness and to make the loans under the Frazier-Lemke bill will not require any new machinery nor any new bureaus, boards, or commissions, and no profit-making enterprise or enterprises will be set up as are set up through the Federal Reserve System, for all of its member banks are private profit-making organizations. Under this bill the loans are to be made through the present Farm Credit Administration, which is already in operation and working. The program under this bill is not new at all. It is simply a program to have the money issued to the Farm Credit Administration and it to make the loans with its present organization, each applicant paying the initial expense incidental to his loan.

INFLATION IS IN ARGUMENT AND NOT IN BILL

Mr. Speaker, before passing this inflation straw man, which has been set up by the enemies of this bill, permit me to say that I have recognized some real "inflation" in the arguments presented against the bill. But it is not money inflation. It is lobby and propaganda inflation. I have heard ideas and facts inflated to the greatest extent I have ever recognized since coming to Congress. For instance, just before the opening of the argument on this bill a 20-page mimeographed summary and analysis of the bill was delivered to the offices of the Members of the House. It is real propaganda against the bill. Some of the statements in it are so inflated that they are really amusing. One statement in particular advises us that 66 percent of the farms of the United States are not mortgaged. That statement is real lobby inflation. Then this propaganda program went on to say that this bill would hurt 85 percent of the farmers rather than help them. What do you think about that for lobby inflation? Then it went on to say that the Federal land bank system would be ruined. What do you think about that statement for real lobby inflation? [Laughter and applause.]

According to the best information I can get from reliable sources, 80 percent or more of the farm acreage of the Nation is mortgaged; and certainly it takes acreage to produce the agricultural products which feed and clothe a Nation of more than 125,000,000 people, so the inflation we are confronted with today is the inflation of lobbying and propaganda against this bill.

INTEREST AND TAXES OF FARMERS MUST BE REDUCED

I look upon this bill as necessary to bring agriculture back to a reasonable level of prosperity. We can legislate on all other subjects until we are black in the fact, but we can never return a substantial and permanent prosperity to this country until we have restored the buying power of the farmer, and we cannot expect the farmer to regain his buying power so long as all of his profits go into interest and taxes. We must reduce his interest rate and we must reduce his taxes—he will do the rest and prosperity will be restored.

Can any Member of this House give any reason why the farmer should not get money at the same rate of interest that the big corporations are paying on their loans? That is one of the first steps in restoring his buying power, and, as soon as we restore his buying power, farm mortgages become one of the best classes of security in the Nation.

FARMERS AND TOILERS FORCED INTO DEBT AND THEN THEIR SECURITIES DEFLATED

During the World War and during the reconstruction days thereafter our Government loaned billions of dollars to the Allies at 1½ and 2 percent and, by the way, this money was raised by the sale of Liberty bonds to the people of the Nation. From June 1917 to May 1919 over $21,000,000,000 was raised in that way. These bonds carried a rate of interest of 3¼ percent and upward, and were sold to millions of people who could not afford to buy them. As a matter of fact, they were sold to people who had to borrow the money to buy them. Farmers and workingmen were really coerced into buying them for fear they would be charged with being German sympathizers. Some of the purchasers never saw the bonds. They were left with the banks as security. In this way the farmer was being actually forced into debt. Then after the war was over, and along in 1920, Wall Street manufactured a little depression for no other reason than to knock the bottom out of the farm prices, including lands and all farm products. This took the bond market down with it. Then all farmers and laborers of the country actually had to have money. They had no credit and were forced to sell their bonds far below par. When the bonds got into the hands of the same people who are now fighting, and always have fought the Frazier-Lemke bill, the bond market went up to par and better and has stayed there ever since. These fellows were profiteers at the expense of the producers and toilers of this Nation. [Applause.]

FOREIGN LOANS HELPED INDUSTRY BUT INJURED FARMERS

This is not all, Mr. Speaker, on the subject with which these same people should be charged. See what you think of this: The Government loans made to foreign countries were in most instances conditioned that the money loaned be used for American purchases, and the big manuacturers of this country received the benefits of excellent profits by reason of these loans to the foreign countries.

Now, let us analyze the condition that has put the farmer in the position where it has become necessary for him to have the benefit of the Frazier-Lemke bill. First, he was forced in debt by war conditions. Second, he was forced to sell his bonds at a loss. Third, he could not abandon his farm and he had no place else to go, so he went on and produced the raw materials to the manufacturer at a loss whereby the manufacturer made his profits on the moneys we loaned to the foreign countires. Fourth, the foreign countries repudiated their debts, which necessitated the making up of that sum to carry this country along, and it thereby increased the farmer's taxes in order that his own country be maintained. Fifth, when he could not pay his taxes and interest, the machinery of the law was put into effect to take his farm, either by mortgage foreclosure or by tax title. And now when he needs the benefit of the country he has protected and the interests he has helped we find those interests foremost in the arena fighting him.

These same interests that are opposing the Frazier-Lemke bill, first, on the pretext that it is inflation and, second, on the pretext that the Government cannot afford to issue $3,000,000,000 worth of money to refinance the farmer, were the same people who urged the loans to foreign countries. On these loans there is now over thirteen and one-half billion dollars repudiated; nevertheless, these same enemies of the Frazier-Lemke bill, these profiteers on war loans, these profiteers under the Federal Reserve System, hold this $3,000,000,000 money issue, with the best security in the

world back of it, up to the people of the Nation and up to Congress as absolutely ruinous. Their argument is just not consistent. [Applause.]

FARMERS ASK ONLY FOR AN EVEN BREAK

Mr. Speaker, under the Frazier-Lemke bill the farmers are not asking for charity. Far be it from that. They are simply asking the Government to treat them the same as it treats other industries and to give them an opportunity to pay their debts by loans at a rate of interest which they can bear. They ask the same opportunity to borrow money from the Government that is given to the industrial interests of the country.

I have called to the attention of this House several times during this and the last Congress that private industry cannot continue to prosper unless agriculture prospers. I reiterate that agriculture is the basic industry of this Nation, and it can only prosper by reducing its interest rate and its taxes; and the passage of the Frazier-Lemke bill is a full step to reduce the interest rate; and when that is done the States and the Government will go together to reduce the taxes and the purchasing power of the farmer will be restored; and then, and not until then, will prosperity return.

I implore you, Mr. Speaker and Members of the House, to give us an even break; that is all we ask, and that is all this bill provides for. An even break is just to treat us as industry is treated and to permit us to borrow money at the same rate of interest that industry pays. We are offering the Government better security than industry, for we are offering them the basis of all wealth of this Nation—a first mortgage on our agricultural lands. [Applause.]

Mr. BURDICK. Mr. Speaker, under leave given to all Members on May 14 to extend their remarks, I desire to present what I believe were the reasons why the Frazier-Lemke farm debt refinance act was defeated.

During the coming campaign, many reasons will be given. Some will say that William Green's letter, read by Speaker BYRNS, was the decisive stroke. In my opinion, Green's letter had no effect whatever.

Do you suppose that the 22 Republicans who deserted the cause on the final vote were influenced by Green? Do you think the old reactionary Republicans, the real hardshells, were influenced by Green? If they were, it is the first time in history this was ever done. Do you think Green influenced the old-line reactionary Democrats? The reading of the letter by the Speaker of the House no doubt did influence some wavering Democrats, and even then it was not the letter so much as it was the words of admonition of the Speaker, who is personally the best-liked man in Congress. The administration could not have picked a better man to admonish the House, and, of course, the administration knew it. Besides that, Mr. BYRNS was honestly against the bill and always has been.

There were two principal reasons why the bill was defeated; one reason applying to all Democrats and one reason applying to almost everyone who voted against it. The first reason was: That if the measure passed, it would have to be passed by Democrats, they having 322 members out of a total of 435. The President was against the measure, as he claimed it was against his financial policy, and the appeal was made to Democrats to support the President. That sentiment was uttered time and time again on the floor of the House during the debate. Speakers did not overlook telling the Democratic membership that this was a Republican measure, being introduced by WILLIAM LEMKE, of North Dakota, a nonpartisan Republican, and really the one man who was responsible for Roosevelt's vote in North Dakota in 1932. But that was all forgotten. It was forgotten in the fall of 1934 when the Democrats in North Dakota tried to defeat him; it will be forgotten this time when the Democrats will try to do the same thing.

This appeal to party regularity and to follow the President was one of the big factors in defeating the measure.

A second reason was that there were a great number of the Members who believed this measure was nothing but an attempt to inflate the currency. If that term "inflation" did not influence a great many, it at least gave a great many the "excuse" they were looking for. The Republicans bellowed loud and long on this term "inflation", and many of the Republicans who would have liked to help the farmers were scared pink by this bugaboo, "inflation."

Every week in the year, yes, every day in the year, we are issuing currency in the same way. Of the $5,000,000,000 in circulation, the Federal Reserve Board has issued 80 percent of it. Issued it on what? Issued it upon securities deposited with the Secretary of the Treasury. This security may be Government bonds—it may be commercial paper. There is no limit to what can be issued in this way. The Reserve Board pays no interest on this money. The Treasury Department hands over the new currency on this security and the Reserve Board collects the interest on the security deposited and collects the interest on the money every day it stays in circulation. In this way the private interests of the country collect double interest. More than that, the currency issued to the Reserve Board can be and is loaned out in credit 10 times, 20 times, as much as 50 times, and thus interest is collected on untold millions of "book" money.

All the Frazier-Lemke bill attempted to do was to cut out this "private grab" in interest and furnish the money to refinance farm debts. By cutting out this "private interest grab" the rate to farmers could be reduced and at the same time the Government would receive an income from its money which would wipe out the United States Government debt in 47 years. Of course, if this were done, the "private money fraternity" would lose their interest grab and, therefore, the "money interests", including the Bankers Association of America, the Chamber of Commerce of the United States, Wall Street, and their puppets began the chorus of "inflation, inflation."

This was the real thing that defeated the bill, just as the words "death sentence" defeated the power bill twice in the last session. It was a play on words that worked. I think many of the Republicans knew better, but they were not looking for reasons, they were looking for excuses. The reactionary or conservative Republicans represent the "money oligarchy of the North" and the reactionary or conservative Democrats represent the same interest in the South. When the call goes out to support the "money changers", Massachusetts and Virginia, regardless of party, rush to the rescue. A few examples may be in order. The Senator from Virginia is so conservative and heeds the call of the money changers so willingly that the Republicans in Virginia endorse him on their ticket. The Congressman from New York, a Republican, rails day after day about the terrific expenses of the Democratic Government, but when a bill comes up which will give millions to the "special interests", he rushes across the Chamber and embraces the doctrine of the Democratic leadership. Birds of one feather always flock together, and I will defy anyone, anywhere, to find any difference in the attitude of the Congressman from New York and the Senator from Virginia on subjects such as banking and currency, ship subsidy, loans to railroads, banks, insurance companies, outlandish appropriations for the Army and Navy, and all other kindred subjects. This attitude is not the Congressman's fault—he represents people who have these views—and in this he is a true representative.

While the bill had to run the gantlet of all these reasons and excuses and false philosophy, the two constant, unerring, and all-weather friends of the bill were the National Farmers' Union of America and the Reverend Father Charles E. Coughlin, of Detroit. From President Edward H. Everson and Secretary E. E. Kennedy, of the National Farmers' Union, down to every State office and every local in America came support to this bill. The Farmers' Union is composed of the real tillers of the soil, and not the swivel-chair farmers who have received big checks from the enforced scarcity program of the New Deal. Without the untiring efforts of these two national officers of the Farmers' Union, the measure would never have come to a vote in the House. The men who plow and sow and reap—the men and women who are

fighting for a mere chance to stay in the "old family home"—can point with just pride to the work done by their trusted officers.

Rev. Father Charles E. Coughlin has endeared himself to millions of suffering farm people. It is the first time in American history that the prejudice of religious differences has been entirely eliminated among the many millions of farm people, and I am sure that those farmers will pray for his continued health and strength to carry on in a righteous cause. Without his help, this measure would never have come to a vote.

The farmers owe a debt of gratitude to the hundreds of labor councils of America who urged the passage of this bill, and a greater debt of gratitude to those labor leaders in Congress who stood up for the farmers in defiance of the orders issued by labor's national leader. In spite of this unsuspected thrust in their back, the farmers of America, through their Representatives in Congress, will still support the just cause of labor.

The farmers know now who their enemies are. They know who their friends are. They are now prepared to go into a real battle, having definitely drawn the enemies' fire. The farm people may be left by this Congress unprotected, but their spirits cannot be subdued. Important history will be made in the next few months, and the farmers of America will be vital factors in writing that history.

Mr. SCHNEIDER of Wisconsin. Mr. Speaker, this House will vote today on the so-called Frazier-Lemke bill which provides for refinancing farm mortgages at lower interest rates and with opportunity to pay off the debts. From the standpoint of the debt-burdened farmer this is the most important and most-needed legislation which has come before this Congress. The bill has been before Congress since 1930 and was reported favorably by the House Committee on Agriculture on May 3 a year ago. The Rules Committee refused to grant a rule by which it could be brought before the House and it was necessary for those of us who favor this legislation to resort to the use of a petition to discharge the committee and bring the bill up for consideration.

The necessity for genuine farm-credit relief is a result of many years of oppression of our American farmers. Farmers buy their necessities in the sellers' market at the sellers' prices and sell their products in the buyers' market at the buyers' prices. They pay the freight on everything that they buy and pay the freight on everything that they sell. A very large proportion of the dollar paid by the consumer is retained by the large distributing corporations which pay enormous salaries and dividends on watered stock.

Agricultural producers have operated under even worse conditions since 1921, when they were forced into a depression, and they have been down ever since. It has now been conclusively proven that the Federal Reserve officials acted deliberately at that time to deflate the farmer by destroying his credit. This was done by demanding payment on his notes, denying him further credit, and forcing him to sell his products upon a glutted market. This procedure destroyed his market and forced prices below cost of production. The losses ran into billions of dollars. His farm-land values also shrank, and he has been required to sell his products since 1921 at prices out of all proportion with reference to parity with prices he is required to pay. A system that will not provide cost of production to the farmer is indefensible.

In view of the action of the Federal Reserve officials in 1921 it is only fair that the Government now use the power of the Federal Reserve System to extend credit aid to the farmer similar to that which it extends to business. The plan proposed in this bill will accomplish this result. Under the present Federal Reserve law, the procedure when new Federal Reserve note paper money is issued is as follows: The business interests borrow money from the banks which are members of the Federal Reserve System. The banks take the promissory notes or other securities to the Federal Reserve Board's agent, who issues Federal Reserve notes to them without interest. These Federal Reserve notes pass freely as money and are accepted the same as any other paper money.

This legislation merely proposes to aid the farmer in the same manner. Under its provisions when the farmer borrows money from the Farm Credit Administration giving his land mortgage as security, the Farm Credit Administration, acting as the farmer's bank, is allowed to go to the Federal Reserve Board's agent and receive from him Federal Reserve notes. The only substantial difference is that under this legislation the Government will realize a profit from the transaction, when the farmers pay the Farm Credit Administration 1½-percent interest for the use of the money. Under the present Federal Reserve System nothing is paid the Government for the use of the new money except the very slight cost of the printing and handling.

The opponents of this bill have made emotional appeals for its defeat because they say it will result in inflation. Those who are alarmed over inflation, however, say nothing about the deflation through which the farmer has passed. They ignore the fact that many of the farmers are today struggling to pay mortgage debts incurred during the high war-time prices, of a 50-cent dollar, and that the dollars which farmers are called upon to pay back now are of much higher value.

When Federal Reserve notes or paper money is issued to finance business activities that is regarded as sound policy and instead of being called inflation it is termed "a flexible and elastic currency system." In order to meet the objections of those who fear inflation, however, the steering committee, of which I am a member, has approved and sponsored several amendments. One of these amendments authorized the President to use the stabilization fund and the free gold in the Treasury to back any Federal Reserve notes issued under this proposed law. Another amendment which has already been adopted provides that only real estate can be mortgaged to the Government, removing the provision which allow loans on farm personal property. Another amendment which has received approval limits the amount of the loan to 80 percent of the fair value of the property.

Mr. Speaker, hundreds of thousands of American farmers have already lost their homes, their business assets, and their means of making a livelihood. Insurance companies, banks, and other creditors have foreclosed on them, and they have been evicted. The situation in our agricultural sections is still very serious. It is estimated that today farmers are losing their homes and property, which in many cases represents the entire savings of the life-long toil of several generations, at the rate of about 2,000 per week. About one-fourth of these foreclosures are being made by the Federal land banks, the governmental agency which we have been told here is taking care of the farm-credit situation. This record shows that the Federal land banks are not saving and cannot save the farmers. May I not say that I am not against the Federal land banks, which are the agents of the Farm Credit Administration, but I believe that they should have the same authority and advantages to function in the interest of the farmer that the Federal Reserve System banks have to function in the interests of business.

Years of economic oppression have driven the farmer to such a low financial level that unless we act at once millions of them will not survive. Through the Federal Reserve System and the Reconstruction Finance Corporation urban business has been saved from foreclosure and bankruptcy. Did those who now cry inflation criticize the issuance of billions of dollars in currency and credit to insurance companies and business interests generally to save them? The Frazier-Lemke bill is the only legislation which has been introduced in this Congress which will do the same thing for the great American agricultural business.

For years American farmers have been the victims of those who control their credit and the operations of an outmoded private banking system which exploits them and takes the fruits of their long hours of labor. The Nation's money monopolists have used our private banking and credit system to enrich themselves and to deflate and exploit the farmers and the producers of the Nation until they have almost become the serfs of the money changers.

Mr. Speaker, the banking, monetary, and credit system now in private hands and manipulated by them in the interests of their small group, should belong to the people and be controlled by them through their representatives. The Frazier-Lemke bill will help to break the grip of these exploiters. It is a step in the direction of the ultimate goal. It should be passed today to give the farmers genuine relief from the staggering burden, high interest rates, and an opportunity to pay off the principal of their debts.

Mr. COCHRAN. Mr. Speaker, "Equal rights to all, special privileges to none." That phrase has been uttered millions of times by public speakers since the immortal Thomas Jefferson first expressed it.

Who is the man or woman, after reading this bill, that can say it extends equal rights to all and special privileges to none?

Although I come from a district entirely within the limits of one of the large cities of the country, I have honestly and faithfully been doing everything I can to assist the farmers, because, as I have often said, I fully realize that the unemployment situation in the cities will never be eliminated until there is prosperity among the farmers of the country. Of course, we cannot sell what we manufacture in the cities unless there is a market, and that market can only be created when all the citizens of our country have money to spend. With that thought in view, I repeat, I have supported legislation that would be beneficial to the farming interests, and it is my purpose to continue to support proper legislation when I feel that it will be helpful to the farmers, which means it will be beneficial to the people I represent who manufacture that which the farmer buys.

The author of the measure as well as others who are supporting the bill have stated that they are not doing anything in the bill that the Federal Reserve bank has not been doing. Not only in connection with this legislation, but many times on this floor, you have heard the argument in regard to Federal Reserve banks being permitted to issue Federal Reserve notes. If that system is wrong, then the law that permits the Federal Reserve banks to issue Federal Reserve notes should be repealed, but surely we are not going to correct that situation by passing this legislation, because two wrongs will not make a right.

I honestly feel this bill, if it is ever enacted into law, will be the start of a period of inflation that cannot be stopped. I am firmly convinced that inflation means destruction.

If we are to provide ways and means for the farmers to secure loans through a Government agency on the basis as provided in this bill, then we must do the same for the home owners, for the hospitals, the churches, the hotels, the apartment-house owners, as well as for the owners of the stores and factories. If you are to extend equal rights to all and special privileges to none, no one who votes for this bill can deny the same right to the others that I have mentioned.

Under the provisions of the pending measure, although it provides for $3,000,000,000, it will take at least $9,000,000,000 to finance all of the farm mortgages in the country on this basis, and if the Government is to take over the city mortgages, the amount needed will be anywhere between thirty and fifty billion dollars. If that will not ultimately lead to inflation, expansion of the currency, or whatever you want to call it, then what does it mean?

I do not question the honesty and sincerity of any Member of the House but I do question their logic. Are proponents of the measure in agreement on the outstanding question involved—that of inflation or expansion of the currency? If you have listened to the debate, of course, you must answer this question in the negative. The author denies it will lead to inflation, as do many who have consistently advocated passage of the bill, while others evade that question. However, it remained for one outstanding Member of this House, the gentleman from Oklahoma [Mr. NICHOLS], whose ability cannot be questioned and whose frankness we all have admired, to declare without reservation that beyond question the bill will bring expansion of the currency, and he further stated that this is the outstanding reason that compelled him to support it. He further forcibly declared that everyone knew that the bonds could not be sold with the rate of interest provided, and the only way the money could be secured would be to issue currency.

The danger sign, "Stop, look, and listen," should be in evidence here today. Who will buy bonds paying such a rate of interest? It is inconceivable that the public will invest. If this be so, as Mr. Nichols says, then the bonds will remain with a Government agency and the currency comes forward. The three billion will be followed by other billions, and if equal rights are advanced to all, those billions, when you have taken care of the home owner and other property owners, I repeat, will mount to anywhere from thirty to fifty billion.

You have heard the views of the American Federation of Labor as expressed by Mr. William Green, president, speaking for the executive council. Let me quote in part from that letter:

> Labor knows and understands that the proposal to print and circulate billions of currency as proposed in the Frazier-Lemke bill will very likely affect the economic well-being and status of labor. We know quite well that when inflation of this kind and character embodied in the Frazier-Lemke bill is adopted commodity prices rise but wages stand still. We cannot subscribe to this sort of economic philosophy. Labor would suffer in living standards, reduced buying power, and the problem of unemployment would become more acute. There are other features of the bill which are highly objectionable.
>
> For this reason we call upon our friends in Congress to vote against the enactment of this legislation. We are confident that the best interests of the wage earners of the Nation would suffer very greatly if by any chance the Frazier-Lemke bill would be enacted into law.

The American Legion that fought for years for the payment of the adjusted-compensation certificates refused at all times to endorse a bill that provided for the payment of the certificates through the medium of printing currency. The Legion saw the dangers of inflation. These patriotic men, much as they wanted the certificates paid, stood solidly against inflationary measures.

We need not go back a hundred years for examples as to what has happened when a country has provided for expansion of the currency. Just look at what happened in Russia, Italy, Austria, Germany, France, and other countries that tried this in recent years.

Only last night I was talking to a special correspondent of a newspaper who made several visits to Russia. He happened to be there during the inflation period of 1923, and he related an experience that is an example of what occurs when the printing presses start running, printing currency. The Russian ruble was at one time worth around 50 cents in our money. The printing presses were going in 1923 when he was in Russia. He told me he was required to pay 75,000,000 rubles for a duck that he later had roasted for dinner. The farmer who sold him the duck for 75,000,000 rubles was required to pay 150,000,000 rubles, or the price of two ducks, to secure 5 pounds of sugar. This shows the farmer received plenty of paper for his duck, but he was required to pay plenty of paper to secure 5 pounds of sugar.

In Germany it took a market basket full of currency to buy sufficient food to last over the week end. Ninety-five percent of the savings accounts in that country were wiped out during the inflation period, and all insurance policies became worthless. One could go on at length giving examples of the destruction that follows a period of inflation.

The good people I represent depend upon me to protect them against destructive legislation. I would not be true to the trust imposed in me if I did not oppose this bill.

Mr. POCHT. Mr. Speaker, that's the question, What is inflation, or how many kinds of inflation are there?

And would currency issued on farm-loan bonds of 80 percent of the reasonably estimated or appraised value, with 40 percent gold reserves behind the bonds, be inflation, or issuing printing-press or wall-paper currency?

Recently there was an open, running debate in Congress of 6 hours, and throughout that prolonged talkfest no Member got anywhere near explaining the definition of inflation, and none ventured to say that currency issued as was proposed in the Frazier-Lemke bill could by the widest and wildest stretch of the imagination be called inflation of the

German kind, where there was not a scintilla of value back of the mark.

There were those who voted for the Frazier-Lemke bill who are for sound money and against cheap or depreciated currency, and supported the bill to give the hard-pressed farmers a break and a chance to pay farm hands a good wage and make several crops and get on their feet.

I did that very thing, after careful investigation and voting for a number of perfecting amendments, and all the while keeping in mind how willing America was to help European countries to over twenty billions without any security, while our farmers are willing to put up their land as security for the refinancing they desire, which is the most valuable thing in the world—land—from which comes the sustenance of human life.

Thus with so many interests in disagreement in regard to "inflation" it is clear that not too many understand what it is all about. From Wall Street to the labor leaders, the President, Speaker of the House, Democratic and Republican Members, farmers, and the head of the Committee on Labor, Mr. CONNERY, we have a confusion of voices on the subject.

Prof. Lewis Haney, of the New York University, makes the inquiry, Who started the present inflationary moves?

He thus goes on to say that the Hoover administration began to let down the bars with its R. F. C., Federal Farm Board, and nibbling at the standard for our money. The Roosevelt administration ran away with the idea.

It both devalued the dollar and abandoned the gold standard, thus making its Federal Reserve notes no better than greenbacks. It has made all of us, through our Government, debtors by borrowing at the banks and issuing billions in checks which are no better than greenbacks.

It has put its notes, which are almost noninterest bearing, into the banks, thus creating deposits which are the basis for checks—deposit currency—that are no better than greenbacks.

How much better than greenbacks are its silver certificates?

Why not go ahead and kill all the wasteful spending and distribution of our funds by the bureaucrats?

Who started the move to "lighten the burden of debt"? The Roosevelt administration did. It was under this slogan that they went ahead with inflation, borrowing, farm bonuses, organization of unproductive "work relief" armies, artificial lowering of interest rates, and other devices for destroying our savings.

One idea in the Frazier-Lemke bill was to make farm owners out of farmers who could not pay for their farms—to give farms away. Well, is that any worse than the attempt to make laborers out of men by giving them work to do that does not pay—giving wages for boondoggling? Is it any worse than giving people cheap housing that they cannot pay for? Is it any worse than sinking our savings in unproductive public works?

Much of organized labor was for the Frazier-Lemke bill, but one branch helped to defeat it. Why, then, should organized labor defend schemes for giving labor incomes that are not earned, and if not earned cannot be paid? Why can they not see that inflation of any kind endangers their real incomes?

The whole show has come down to an effort by selfish "pressure groups" to get something for nothing. And it all has the same outcome, namely, the destruction of our savings by taxation and by inflation, both of which kill thrift.

Now that the different kinds of inflationists are at odds, and the New Dealers, Coughlinites, and Townsendites are clashing—to say nothing of internal struggles between Ickes and Hopkins—is it not a good time to call a halt to the whole process of dividing up the carcass?

I do not believe that the average American likes it or can see any sense in it. He says to himself, "I might as well get mine", but he adds, "as long as others are doing it." Thus I believe if we quit the whole mess at once and restore an economy of common sense, we will find that most of us will be glad to get back to sound money and productive employment. We want to earn our incomes and to be able to keep what we earn.

If we can only stop the waste and have reasonable certainty as to our savings and investments, we will gladly pay the taxes and give the relief necessary to tide over the readjustment and to balance the Budget. Only thus can we attain real prosperity.

The head of the American Federation of Labor, Mr. Green, took the President Roosevelt or administration side of the issue, or against the farmer, while there was a hard counter from A. F. Whitney, president of the Brotherhood of Railway Trainmen, located in Washington. He wrote to Congressman WITHROW, as follows:

MAY 6, 1936.

DEAR SIR AND BROTHER: I am enclosing herewith copies of letters I have just addressed to Senator LYNN J. FRAZIER and Congressman CHESTER C. BOLTON.

These letters are self-explanatory, and I urge you to do whatever you can to assist in the enactment of the Frazier-Lemke farm refinancing bill.

Fraternally yours,

A. F. WHITNEY, *President.*

Congressman WITHROW also read into the CONGRESSIONAL RECORD the following letter from President Whitney to Senator FRAZIER:

MAY 6, 1936.

Hon. LYNN J. FRAZIER,
United States Senator, Senate Office Building,
Washington, D. C.

MY DEAR SENATOR: I note the required 218 signatures have now been obtained on the Frazier-Lemke bill, and the bill will come up for discussion in the House on May 11. This organization has consistently favored this legislation, for we realize that the farmers of this Nation are fast descending into a state of peasantry and will continue to do so unless some financial relief is obtained for them. I am communicating with our national legislative representative, Mr. J. A. Farquharson, 10 Independence Avenue SW., Washington, and asking him to give this bill his support.

I am glad to be of assistance in this worthy legislation, and I heartily agree with you that, in view of the fact that 32 State legislatures have endorsed this bill, it should be enacted without amendments, for certainly the majority of the people must favor such legislation.

With best wishes, I am,

Sincerely yours,

A. G. WHITNEY,
President, Brotherhood of Railroad Trainmen.

Mr. MASSINGALE. Mr. Chairman, I rise in opposition to the amendment.

Mr. Speaker and Members of the House, I have listened with a great deal of interest to the discussion of this bill, due largely to the fact that I come from that section of the country where the people are unanimously in favor of the Frazier-Lemke refinancing measure, and to the further fact that I sincerely feel this to be the most important piece of legislation ever presented to this Congress.

It seems to me such legislation is actually vital to the welfare of the Nation and will prove of tremendous political significance. By this vote we express our sentiments as to whether or not we favor the farmer's retaining his home, or favor helping him to find his way to the dole, along with the 20,000,000 already there. It occurs to me that most of the argument that has been made for and against this bill has proceeded upon the wrong basis. We ought not talk about this as an investment matter of commercial nature. If I judge the sentiment right, money loaned to farmers to save their homes is an investment in the security of the Government of the United States and in the perpetuity of the institutions under which we live. [Applause.]

Of course, I do not know anything about conditions in the big cities, but I do not think it is material. This is what happened last year when we had under consideration the H. O. L. C. bill. We appropriated an additional $1,750,000,000 to you. You did not claim in this discussion that that money was to be borrowed by the owners of the property in the cities. It was freely admitted here that that was added to the former $3,000,000,000 that had been paid by the Government of the United States to save the building and loan companies from failure. God knows I sympathize with you men who live in the cities. I have not been to many big cities, but I want you to have your homes secure, just as the farmers of this country must have theirs if we continue as a government.

Do you know that out in our portion of the country the farms of Oklahoma, Kansas, Colorado, and Texas are fast going into the hands of mortgage companies? They are the ones who received the benefits under the A. A. A. simply because the farmer was driven off by foreclosure. The Farm Credit Administration and the Federal land banks, of which the gentleman from Texas spoke today, while they were of some benefit to the farm people out there for a while, have of late been a complete dud. I can give you illustration after illustration. If a man has a farm worth ten or twelve thousand dollars and has a mortgage on it for $2,500, he often cannot have it refinanced because the appraisers are too conservative. The security is too good and the mortgage company wants the farm. [Applause.]

I know of one farm adjoining a paved highway not over 4 miles from good market towns. This farm is generally reputed to be worth from $10,000 to $12,000 in these times of depression. The owner made an application to borrow $2,800 under the Federal Farm Act to save it from foreclosure. This amount has been denied him, and not on account of any title defects and not on account of the moral responsibility of the risk.

The rate of interest offered under the Farm Act is not an inducement to the farmer because he is unable to borrow sufficient money to save his property.

The opponents of this bill contend that by reason of the 5-percent interest rate provided for in the Home Owners' Loan Corporation Act, and the 1½-percent interest rate provided for in the Frazier-Lemke bill, there is a discrimination that ought not to exist against the city property owner. They do not complain that the interest rate is too low, for I am sure they are well aware of the fact that the Government of the United States has repeatedly loaned large sums of money to corporations organized to purchase ships that were built during the war. These corporations got all the money they wanted at from one-eighth of 1 percent interest up.

If the opponents from the cities want money for their constituents at 1½-percent interest instead of 5-percent interest, I am sure that every man who signed the Frazier-Lemke petition will sign another petition to force the Rules Committee to report out such bill in event the Rules Committee should be opposed to the bill, and in the further event the chairman should be unable to control his own committee. To me it seems more like child talk than statesmanship for the city man to oppose this bill on the ground that the Home Owners' Loan Corporation fixes an interest charge of 5 percent on city loans while this bill permits the farmer to have money at 1½ percent. It is much the same argument as the youngster that has eaten a piece of cake objecting to another having any cake at all because his piece was smaller than the piece the other is about ready to eat.

It is generally known that there is quite as much distress in the cities as in the farm areas, but that fact furnishes no ground or excuse for any conflict over extension of assistance to either group. Indeed, knowledge of such conditions furnishes what should be a common bulwark behind which the forces of city dwellers and farmers should make a determined and concerted stand against the power that is constantly laying siege to every home, urban or rural, in America.

Instead of fussing about favoritism to one group, it is better to pass this bill and then immediately amend the Home Owners' Loan Corporation Act so that the city home owner shall have every advantage of cheap interest rates that the terms of this bill takes to the farmer.

In addition to the effort made by certain Members to prejudice Members from the cities against this bill the Speaker took the floor and read a letter from Mr. William Green, in which he as president of the American Federation of Labor called upon all of labor's friends in Congress to vote against the bill because commodity prices would rise and because it is inflationary. This letter was written in Washington on May 13 by Mr. Green, and on the same day was read by the Speaker. Mr. Green's hostility had not been heard of until the letter was read.

Indeed, it was the prevailing opinion that labor was in full sympathy and accord with the farmer and his program, and the letter was exploded with the effect of a grenade attack from friends within the camp. This letter, while provoking indignation against Mr. Green, evidently will cost the bill enough votes to defeat it. I am suspecting that the letter was pursuant to a legislative trade made possible by House leaders who had become jittery over fear of meeting defeat at the hands of Members favoring this bill, and I anticipate that we may look forward to favorable committee action on one or more bills in which Mr. Green has vital interests, but which have not yet received favorable action.

Wedges dividing the city Member and the country Member, and dividing the laborer and the farmer, have thus been driven in the desperate but, perhaps, successful effort to defeat this bill. These wedges were driven in reality because of fear that the liberals in Congress were making a threatening assault against the right of a few men to own and control the balance of our population. It is history repeating itself—kings heretofore have been shrewd enough to drive the entering wedge between factions opposing their usurpation of power and have for a while made themselves more secure. Finally the deceived become disillusioned, the throne topples, and the people themselves assume control of government.

There is no need for laborer and farmer to fly at each other's throats. Neither is receiving a fair part of the distribution of the national income, and, of all groups, they should stand shoulder to shoulder to obtain this. It is a great blow that Mr. Green has dealt the farmer; it has staggered him and his friends; but the farmer has borne the brunt of so many battles he is still undaunted and unafraid and is ready to carry on in order to live. Evidently Mr. Green forgot that while the farmer's yearly income is $273, the yearly income of the people he represents is $908. If he had given this consideration, he surely would not have called on the friends of labor in Congress to stab the farmer in the back. I have voted for labor legislation with consistency, and shall continue to do so, but leadership such as he displayed in this case is loaded with dynamite for the fellow that has to work for a living. The farmer cannot live on $273 a year. In this bill he presented a plan to Congress whereby he could keep his farm, live on it, raise and care for his family on it, and the Government of the United States, instead of being out any money, would, for the first time in its history, make money out of the transaction. Two million farmers have been foreclosed in the last few years, and several hundred thousand more are in position to be foreclosed. If these foreclosures take place, another million of our people will be added to the dole and about 250,000 homes lost to America.

We must not forget that the farming industry is older than the Government and that it must not be destroyed. The picture seems rather dark, and it appears that the farmer must resolve hereafter, if no better solution can be provided for him, to live the life of the inferior, to assume the mental attitude and the place of a lower caste, to eat the coarser foods, to wear rougher clothes, to have simple furnishings in his home, to walk instead of ride, to meagerly feed his children on his farm produce with the aid of the dole, and yet be required to be about his labor before dawn, to pursue it 10 to 18 hours per day in order that the balance of our population may be fed and clothed and housed and entertained in a manner befitting their higher station in American life, the farmer being our line of defensive peons and agriculture debased to the point of reproach. The field, heretofore a happy place for labor, will become a place where only the hungry and the swine shall keep company and from which boys and girls of ambition shall walk away. Up to now the glory of American life has been farm life. Not so from here on. Almost every person has known the thrill of seeing splendid modern farm houses, large barns, sleek stock, clean and well-kept premises, a nearby commodious school building with busses hurrying the youngsters into the schoolhouse, the community center for 4–H Clubs and other activities, and upon seeing, one realizes that here

is the real America. Destroy this, and you blot out 300 years of American progress.

If we fail to enact a law similar to this, it means that we propose to classify the farmer on a level lower than that of the average American citizen. He has done nothing to warrant any discrimination against him. There ought not to be any discrimination against any class in this country. Men in all walks of life are found who render great and distinguished service to our Government. But what greater or more distinguished service can any man or class of men render than the farmer? By his incessant toil we are supplied with all the needs and comforts of life. We turn to the farmer for bread, meat, clothing, and all else necessary to sustain human life. He utilizes the maximum of daylight hours in the field. Returning, with lantern in hand, he robs the dark night of its aversion to work, as he dimly feels his way among the sheds and stables ministering to his stock. Rain and snow have no terrors for him. The weather he takes as a matter of course, for his is a work that cannot be delayed. From an hour before dawn until late bedtime, year in and year out, he labors to produce those things without which we cannot live. I call that service of the highest type that can be rendered by any American.

We must not forget that there are untold numbers of tenant farmers and sharecroppers in direful distress by reason of the present conditions. Among these are many of the most desirable people in America. They own no land from which they can receive benefits of the Soil Conservation Act. In a large measure they must depend upon the magnanimity of the landlord. That is not the kind of security to offer a free man. Home ownership will bring the same kind of protection to tenant and sharecropper as to landlord. This is as it should be, for the benefit of the law should be to the producer and not to the land. If the landlord produces the crop he is entitled to all the benefit. If the tenant or sharecropper produces it, then he is entitled to all the benefit, less the rental or share he agrees to pay the landlord for use of the land. This is the law of landlord and tenant as we have always known it.

All the metropolitan newspapers and the magazines and periodicals of the country claim this bill is inflationary, and their theme song is "Financial Sanity Is Needed." Their idea of financial sanity is not to interfere in the least with what we have. Let the Morgan group continue in its present financial trend, with power to fix or change the prices of crops or labor at will. They want to continue to have the right to have currency issued on their demand only, in such amounts as they prescribe, based upon nothing but thin air, and when the Frazier-Lemke bill proposed that the Federal land bank be given the right to issue currency secured by the solid earth—the home land of our farmers—a wail was set up that wild inflation was about to take place.

The inflation talk was due to the fact that the big interests could not hope for any profit from the issuance of money in this proposed way. The Federal Reserve bank is privately owned and wants to continue in its exclusive right to issue and control money. The Frazier-Lemke bill asks for authority of the Federal land banks to issue currency for refinancing farm loans secured by first mortgages. The Federal land banks are farmers' banks. The Federal Reserve banks are bankers' banks. The scare of inflation raised by opponents of this bill will have the effect to have more and more tax-exempt bonds issued, thus increasing the strength and power of the very rich over our Government. If this bill is defeated, responsibility will be due alike to the leaders of both Democrat and Republican Parties in the House.

The $9,000,000,000 debt on farms cannot be paid as long as the present financial methods are employed. What the future has in store for the farmer is the greatest of all social and economic problems. In European politics and wars a crushing defeat has just been administered to helpless Ethiopia. Mussolini boastfully said, "Ethiopia is Italy's." Just now the financial conquest of the farmer is complete. I am wondering who may arise to proclaim, "The farmer mine."

Mr. DINGELL. Mr. Speaker, proponents of the Frazier-Lemke farm bill further argue that the farmer must have still lower interest rates on his mortgages and loans than he now enjoys; instead of money at 3½ percent now available they demand money at 1½ percent. This, it is claimed, must be brought about in order to restore the farm prosperity. This argument is as specious as any that has ever been advanced by demagogues who would mislead the Nation in order to gain political favor and advantage.

I submit proof in refutation of their fallacious reasoning. Allow, for example, that the farmer pays on an average of 6 percent on his mortgages, although he does not; in fact, he can now borrow at 3½ percent, which would mean a total amount of $180,000,000 interest per annum on $3,000,000,000—$3,000,000,000 provided in the Frazier-Lemke bill as a revolving fund.

Should the Frazier-Lemke bill become a law the same farmer element would pay at the rate of 1½-percent interest per annum on the same amount of $3,000,000,000, or $45,000,000 per annum. Divided among the 6,000,000 farms the average per farmer saving in interest would amount to $22.50 per annum.

Perhaps the Frazier-Lemkeites will argue that the $3,000,000,000 would serve as a revolving fund to refinance approximately $9,000,000,000 in farm mortgages, and that my first example is unfair, even though I tried to be more than fair to the opposition by using 6 percent as the basis charged the farmer when a 3½-percent rate is applicable under the Gillette law, so let us cite two definite, concrete examples extending the plan and the savings to the farmer under the plan to the maximum possible degree.

Take for example:

Six billion dollars at 3½ percent equals $195,000,000 per annum.

Six billion dollars at 1½ percent equals $90,000,000 per annum.

Net savings to the 6,000,000 farmers, $105,000,000 per annum.

Divide $105,000,000 savings among 6,000,000 farmers and the average saved will be $17.50 per capita, or $5 less per farmer than my first illustration.

Take the same example and use as a basis for calculation the amount of $9,000,000,000, which stretches the plan to the maximum extent of its revolving possibilities, i. e., using the $3,000,000,000 three times, and here is how it appears in cold figures.

Example:

Nine billion dollars at 3½ percent equals $315,000,000 per annum.

Nine billion dollars at 1½ percent equals $135,000,000 per annum.

Net savings to 6,000,000 farmers, $180,000,000 per annum.

Divide $180,000,000 savings in interest among 6,000,000 farmers and the average saved will be $30 per capita, or about $7.50 more than shown in my first example.

I have always argued that the farmer can and will pay his interest and other obligations if he receives a fair price for the crops he produces. Reasonable interest does not stand between prosperity and the farmer, so reduction of interest rates as in this instance shown will not fulfill the glittering promises of the misguided proponents of this measure.

Paying the farmer a just price for what he produces is the surest way to prosperous farming. If that is not true, then let us lower the interest rates and forget about fair prices.

Speaking of farm prices, this administration went a long way toward restoring farm price levels. The 2 cents per pounds hogs, 10 cents per bushel corn, 26 cents per bushel wheat, and 3 cents per pound cotton of February 1933 under Hoover rose to 13½ cents for hogs, nearly 90 cents for corn, above a dollar for wheat, and at least 12½ cents for cotton. I am proud of the farm record of this administration and so is every fair-minded farmer. I am anxious to give the man in the city a chance to catch his breath as he tries to

keep up with the rising prices before I attempt to further aid the farmer at the expense of the man in the city.

Recent figures show that the average of what the farmer produces was being sold at or about 58 percent above the Hooverian era, while at the same time what the farmer has to buy, such as implements, machinery, and other necessities, increased about 17 percent—a net difference in the farmers' favor of about three and a half times, and we are all glad of this favorable trade balance.

In the United States we, the American people, organized great mutual associations for the protection of our loved ones and we refer to them as insurance companies or fraternal insurance societies. There are, of course, some stock companies, but the great bulk of the companies operating are what are known as mutuals. Under the laws of our country these mutual and benevolent associations are compelled to incorporate and the earnings of these associations are equitably distributed among the policyholders or among their beneficiaries. State laws prescribe rigid regulations as to investments, business practices, and even as regards insurability in order to protect the millions of policyholders and their dependents.

Let us do everything we can to aid the farmer and the man in the city, but let us take heed lest we destroy 90 equities of policyholders in order to aid 6 farmers, whether they need help or not. Let me remind you people laboring in the cities and you people tilling the soil of the farms that I am speaking of you when I speak of the mutual associations known in America as insurance companies and as fraternal insurance societies. There are far more policies issued than there are people in this country. If you undermine the investments of these associations, you are destroying your own equities and the future security of your loved ones.

While the banking institutions are not as a rule mutuals, and therefore not organized for the benefit of the depositors but for the benefit of the stockholder, still we are all deeply interested in the stability of our banks and the banking system. We in Detroit remember only too well the historic bank crash. Fortunately, however, this administration, because of the aid it rendered and the painstaking care which was given to the problem, made possible the pay-off of all small depositors 100 cents on the dollar.

To prevent recurrence we provided insurance for all bank deposits up to $5,000, which covers something like 98 percent of all depositors. Here is a significant thought for you to ponder over. While 14,000 or more banks failed under the three preceding Republican Presidents and billions of dollars were lost to the millions of depositors, under Roosevelt less than 70 banks were closed, with only about $14,000,000 involved, without the loss of a single dollar to the depositors, all because the deposits were insured under a far-sighted and workable plan.

Who are the people holding insurance policies and having bank deposits to their credit in this country? Rich people? Or any particular class? Not at all. For every rich man holding a policy or a bank-deposit book, you can count a hundred average citizens, working men and women in the cities and on the farms. Let us not destroy ourselves in our zeal to aid someone else, frequently less needy than ourselves. Let us analyze the claims of the demagogues and opportunists. The bill would not have been slaughtered by Congress if it had any claim to a statutory existence.

Since I have voted for every farm bill in the last two sessions, I cannot be charged with either bias, sectionalism, or provincial narrowness. Having aided the measure toward consideration, I would have voted for it on final passage if it had any redeeming features or merit.

RURAL ELECTRIFICATION

Mr. RAYBURN submitted a conference report on the bill (S. 3483) to provide for rural electrification, and for other purposes.

EXTENSION OF REMARKS

Mr. COCHRAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. SNELL. Mr. Speaker, I object.

Mr. SADOWSKI. Mr. Speaker, I make the same request.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. SNELL. Mr. Speaker, I object.

Mr. HOBBS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and to include therein a speech I delivered before the American Judicature Society at the Mayflower Hotel on the evening of May 6, 1936.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. SNELL. Mr. Speaker, I object.

Mr. MARTIN of Colorado. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MARTIN of Colorado. On yesterday was not unanimous consent granted for all Members who spoke on the bill to revise and extend their remarks?

The SPEAKER. The Chair is so advised. On yesterday all Members of the House were granted 5 legislative days within which to extend their own remarks on the Frazier-Lemke bill.

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent that on tomorrow, following the gentleman from North Carolina [Mr. HANCOCK], I may be permitted to address the House for 20 minutes.

Mr. MAVERICK and Mr. BURDICK objected.

NAVAL AIR STATION, MIAMI, FLA.

Mr. VINSON of Georgia submitted a conference report on the bill (H. R. 8372) to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station, and to authorize the construction and installation of a naval air station thereon.

COMPENSATION OF CERTAIN EMPLOYEES OF RAILWAY MAIL SERVICE

Mr. BURCH submitted the following conference report on the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same.

T. G. BURCH,
FRED H. HILDEBRANDT,
A. WILLIS ROBERTSON,
I. H. DOUTRICH,
PHILIP A. GOODWIN,
Managers on the part of the House.
KENNETH MCKELLAR,
CARL HAYDEN,
LYNN J. FRAZIER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (H. R. 10267) to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections of offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The bill (H. R. 10267) authorizes and directs the Postmaster General to adjust the compensation of officials in the Railway Mail Service to correspond, so far as may be practicable, to the rates

established by the Classification Act of 1923, as amended, for positions in the departmental service in the District of Columbia. At hearings on the bill the House committee was advised concerning the suggestion of the Director of the Bureau of the Budget that the phrase "with the concurrence of the Civil Service Commission" be added after "Postmaster General", on page 1, and this amendment was accordingly included in the bill and passed by the House. The Senate amendment struck out this phrase, and the House conferees have agreed to the change made by the Senate.

T. G. BURCH,
FRED H. HILDEBRANDT,
A. WILLIS ROBERTSON,
I. H. DOUTRICH,
PHILIP A. GOODWIN,
Managers on the part of the House.

CHARLESTON ARMY BASE TERMINAL, CHARLESTON, S. C.

Mr. BLAND. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 3789) authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, S. C., insist on the House amendment, and agree to the conference asked for by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Virginia? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. BLAND, SIROVICH, and WELCH.

PERMISSION TO ADDRESS THE HOUSE

Mr. ELLENBOGEN. Mr. Speaker, I ask unanimous consent to proceed for 15 seconds.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to proceed for 15 seconds. Is there objection?

There was no objection.

Mr. ELLENBOGEN. Mr. Speaker, I ask unanimous consent to extend and revise the remarks I am going to make.

Mr. SNELL. Mr. Speaker, to that I object.

The SPEAKER. Objection is heard. The time of the gentleman has expired.

ELECTION TO COMMITTEES

Mr. DOUGHTON. Mr. Speaker, I offer the following privileged resolution.

The Clerk read as follows:

House Resolution 512

Resolved, That the following-named Members be, and they are hereby, elected members of the standing committees of the House of Representatives, as follows:

Patents, WILLIAM P. CONNERY, Jr., Massachusetts. Immigration and Naturalization, R. A. GREEN, Florida.

The resolution was agreed to.

Mr. CARTWRIGHT. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 11687) to amend the Federal Aid Highway Act approved July 11, 1916, as amended and supplemented, and for other purposes, with a Senate amendment, disagree to the Senate amendment, and ask for a conference.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. CARTWRIGHT, WARREN, WHITTINGTON, TURPIN, and WOLCOTT.

CAPTURE OF SAM COKER

Mr. DOBBINS. Mr. Speaker, by direction of the chairman of the Committee on the Post Office and Post Roads, and concurred in by the chairman of the Committee on the Judiciary, I ask unanimous consent that the Committee on the Post Office and Post Roads be discharged from the further consideration of House Resolution 508 and that the same be referred to the Committee on the Judiciary.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. TREADWAY. Mr. Speaker, I now renew my request that I be allowed to address the House for 20 minutes after the disposition of business on the Speaker's table tomorrow morning and after the address of the gentleman from North Carolina [Mr. HANCOCK].

The SPEAKER. The gentleman from Massachusetts asks unanimous consent that on tomorrow immediately after the reading of the Journal and disposition of business on the Speaker's table, following the special order now pending, he may be permitted to address the House for 20 minutes. Is there objection?

Mr. GRISWOLD. Mr. Speaker, I object.

PAYMENT OF BENEFITS BY THE VETERANS' ADMINISTRATION

Mr. MEAD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration, with Senate amendments, disagree to the Senate amendments, and ask for a conference.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. RICH. Mr. Speaker, reserving the right to object, and I am not going to object, but I think the House is in no mood to transact business orderly.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection; and the Chair appointed as conferees Mr. MEAD, Mr. DOBBINS, Mr. HAINES, Mr. GOODWIN, and Mr. DOUTRICH.

PERMISSION TO ADDRESS THE HOUSE

Mr. DIMOND. Mr. Speaker, I ask unanimous consent that on Friday of this week after the reading of the Journal and disposition of matters on the Speaker's table I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Alaska?

Mr. TREADWAY. Mr. Speaker, reserving the right to object, I think I made a proper request, and I do not know why one Member should be allowed to speak and another Member should be denied the privilege. I asked twice this afternoon to be allowed to speak on tomorrow after the disposition of business on the Speaker's table, and objection has been made. Of course, I have no particular objection to the gentleman from Alaska speaking, but I should like to have fair treatment, and I shall be forced to object.

The SPEAKER. Objection is heard.

Mr. TREADWAY. Mr. Speaker, I did not object.

Mr. RICH. Mr. Speaker, I make the point of no quorum.

The SPEAKER. Will the gentleman withhold that a moment?

Mr. RICH. I withhold it, Mr. Speaker.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. MORITZ, for 5 days, on account of official business.

To Mr. PERKINS (at the request of Mr. POWERS) on account of illness.

To Mr. MANSFIELD, for 3 days, on account of illness.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1975. An act to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered.

The SPEAKER. The gentleman from Pennsylvania [Mr. RICH] makes the point of order there is no quorum present.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 46 minutes p. m.) the House adjourned until tomorrow, Thursday, May 14, 1936, at 12 o'clock noon.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. KING: Committee on Military Affairs. H. R. 10712. A bill to authorize the transfer of land from the War Department to the Territory of Hawaii; with amendment (Rept. No. 2623). Referred to the Committee of the Whole House on the state of the Union.

Mr. ROGERS of Oklahoma: Committee on Indian Affairs. H. R. 11643. A bill to amend certain provisions of the act of March 7, 1928 (45 Stat. L. 210–212); without amendment (Rept. No. 2624). Referred to the Committee of the Whole House on the state of the Union.

Mr. TURNER: Committee on Military Affairs. H. R. 9875. A bill to provide $50,000 for the care, maintenance, and improvement of the ancestral home of James K. Polk, and for other purposes; without amendment (Rept. No. 2625). Referred to the Committee of the Whole House on the state of the Union.

Mr. WEAVER: Committee on the Judiciary. House Joint Resolution 377. Joint resolution to enable the States of Maine, New Hampshire, New York, Vermont, Massachusetts, Rhode Island, and Connecticut to conserve and regulate the flow of and purify the waters of rivers and streams whose drainage basins lie within two or more of the said States; without amendment (Rept. No. 2626). Referred to the Committee of the Whole House on the state of the Union.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 12657. A bill to amend section 2 of the act entitled "An act granting the consent of Congress to the Alabama State Bridge Corporation to construct, maintain, and operate bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama", approved May 26, 1928; without amendment (Rept. No. 2627). Referred to the House Calendar.

Mr. MALONEY: Committee on Interstate and Foreign Commerce. H. R. 11792. A bill declaring Bayou St. John, in the city of New Orleans, La., a nonnavigable stream; without amendment (Rept. No. 2629). Referred to the House Calendar.

Mr. MONAGHAN: Committee on Interstate and Foreign Commerce. S. 3885. An act to further extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Garrison, N. Dak.; without amendment (Rept. No. 2630). Referred to the House Calendar.

Mr. MONAGHAN: Committee on Interstate and Foreign Commerce. S. 3945. An act to extend the times for commencing and completing the construction of certain free highway bridges across the Red River, from Moorhead, Minn., to Fargo, N. Dak.; without amendment (Rept. No. 2631). Referred to the House Calendar.

Mr. CHAPMAN: Committee on Interstate and Foreign Commerce. H. R. 11820. A bill to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Miami, Mo.; without amendment (Rept. No. 2632). Referred to the House Calendar.

Mr. CHAPMAN: Committee on Interstate and Foreign Commerce. H. R. 11819. A bill to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Arrow Rock, Mo.; without amendment (Rept. No. 2633). Referred to the House Calendar.

Mr. MARTIN of Colorado: Committee on Interstate and Foreign Commerce. H. R. 11960. A bill to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Rulo, Nebr.; with amendment (Rept. No. 2634). Referred to the House Calendar.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 12461. A bill to extend the times for commencing and completing the construction of a bridge across the Savannah River at or near Burtons Ferry, near Sylvania, Ga.; with amendment (Rept. No. 2635). Referred to the House Calendar.

Mr. MARTIN of Colorado: Committee on Interstate and Foreign Commerce. H. R. 12056. A bill authorizing the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, to construct, maintain, and operate a free or toll bridge across the Missouri River at or near Dodge Street in the city of Omaha, Nebr.; without amendment (Rept. No. 2636). Referred to the House Calendar.

Mr. KOCIALKOWSKI: Committee on Insular Affairs. S. 4524. An act to provide a civil government for the Virgin Islands of the United States; without amendment (Rept. No. 2637). Referred to the Committee of the Whole House on the state of the Union.

Mr. MEAD: Committee on the Post Office and Post Roads. H. R. 12608. A bill to fix the ratio of substitutes to regular employees in post offices and in the Railway Mail Service; with amendment (Rept. No. 2638). Referred to the Committee of the Whole House on the state of the Union.

Mr. COLE of Maryland: Committee on Interstate and Foreign Commerce. H. R. 12514. A bill authorizing the Chesapeake Bay Authority to construct, maintain, and operate a toll bridge across the Chesapeake Bay, from a point in Baltimore County, Md., over Hart Island and Miller's Island to a point near Tolchester, Kent County, Md.; with amendment (Rept. No. 2639). Referred to the House Calendar.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 12473. A bill authorizing the State Highway Board of the State of Georgia to construct, maintain, and operate a free highway bridge across the Savannah River at or near Augusta, Ga.; with amendment (Rept. No. 2640). Referred to the House Calendar.

Mr. HOLMES: Committee on Interstate and Foreign Commerce. S. 4326. An act granting the consent of Congress to the Department of Public Works of Massachusetts to construct, maintain, and operate a free highway bridge across the Connecticut River at or near Northampton, Mass.; without amendment (Rept. No. 2641). Referred to the House Calendar.

Mr. BULWINKLE: Committee on Interstate and Foreign Commerce. H. R. 12685. A bill granting the consent of Congress to the county of Horry, S. C., to construct, maintain, and operate a free highway bridge across the Waccamaw River, at or near Red Bluff, S. C.; without amendment (Rept. No. 2642). Referred to the House Calendar.

Mr. CHAPMAN: Committee on Interstate and Foreign Commerce. S. 3107. An act to exempt publicly owned interstate highway bridges from State, municipal, and local taxation; without amendment (Rept. No. 2643). Referred to the Committee of the Whole House on the state of the Union.

Mr. LEA of California: Committee on Interstate and Foreign Commerce. H. R. 12680. A bill to regulate the transportation and sale of natural gas in interstate commerce, and for other purposes; with amendment (Rept. No. 2651). Referred to the Committee of the Whole House on the state of the Union.

Mr. DUFFY of New York: Committee on the Judiciary. S. 2303. An act to amend the act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, as amended and supplemented; without amendment (Rept. No. 2652). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. TURNER: Committee on Military Affairs. S. 4391. An act authorizing certain officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered; with amendment (Rept. No. 2628). Referred to the Committee of the Whole House.

Mr. LESINSKI: Committee on Invalid Pensions. H. R. 12700. A bill granting pensions to certain soldiers of the

Civil War; without amendment (Rept. No. 2647). Referred to the Committee of the Whole House.

Mr. LESINSKI: Committee on Invalid Pensions. H. R. 12701. A bill granting pensions and increase of pensions to certain helpless and dependent children of soldiers of the Civil War; without amendment (Rept. No. 2648). Referred to the Committee of the Whole House.

Mr. LESINSKI: Committee on Invalid Pensions. H. R. 12702. A bill granting increase of pensions to certain widows and former widows of soldiers and sailors of the Civil War; without amendment (Rept. No. 2649). Referred to the Committee of the Whole House.

Mr. LESINSKI: Committee on Invalid Pensions. H. R. 12703. A bill granting pensions to certain widows and former widows of soldiers, sailors, and marines of the Civil War; without amendment (Rept. No. 2650). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DOXEY: A bill (H. R. 12693) authorizing the Secretary of Agriculture to provide for the classification of cotton, to furnish information on market supply, demand, location, condition, and market prices for cotton, and for other purposes; to the Committee on Agriculture.

By Mr. AYERS: A bill (H. R. 12694) to authorize the Secretary of Agriculture to extend and renew for the term of 10 years a lease to the Chicago, Milwaukee, & St. Paul Railway Co. of a tract of land in the United States Department of Agriculture Range Livestock Experiment Station, in the State of Montana, and for a right-of-way to said tract, for the removal of gravel and ballast material, executed under the authority of the act of Congress approved June 9, 1926; to the Committee on Agriculture.

By Mr. CHANDLER: A bill (H. R. 12695) relating to sales and contracts to sell in interstate and foreign commerce; to the Committee on Interstate and Foreign Commerce.

By Mr. DINGELL: A bill (H. R. 12696) authorizing the Postmaster General of the United States to issue a series of special postage stamps in commemoration of the services of Commodore John Barry in the Revolutionary Navy; to the Committee on the Post Office and Post Roads.

By Mr. PATMAN: A bill (H. R. 12697) to establish the monetary policy of the United States, and for other purposes; to the Committee on Banking and Currency.

By Mr. SCRUGHAM: A bill (H. R. 12698) relating to the establishment and operation of grazing districts in the State of Nevada; to the Committee on the Public Lands.

By Mr. McLEOD: A bill (H. R. 12699) to amend section 4900 of the Revised Statutes (U. S. C., title 35, sec. 49); to the Committee on Patents.

By Mr. BARRY: Joint resolution (H. J. Res. 587) to extend the time within which applications may be filed under the Home Owners' Loan Act of 1933, as amended; to the Committee on Banking and Currency.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LESINSKI: A bill (H. R. 12700) granting pensions to certain soldiers of the Civil War; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12701) granting pensions and increase of pensions to certain helpless and dependent children of soldiers of the Civil War; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12702) granting increase of pensions to certain widows and former widows of soldiers and sailors of the Civil War; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12703) granting pensions to certain widows and former widows of soldiers, sailors, and marines of the Civil War; to the Committee on Invalid Pensions.

By Mr. CROWE: A bill (H. R. 12704) granting a pension to Isaac A. Chandler; to the Committee on Pensions.

By Mr. CULKIN: A bill (H. R. 12705) for the relief of James Wood; to the Committee on Claims.

By Mr. PETERSON of Georgia: A bill (H. R. 12706) granting a pension to Millard Mitchell Sapp; to the Committee on Pensions.

By Mr. SNYDER of Pennsylvania: A bill (H. R. 12707) for the relief of W. A. Merrill Sons & Co., Inc.; to the Committee on Claims.

By Mr. THOMAS: A bill (H. R. 12708) granting an increase of pension to Mary C. Hoyt; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12709) granting an increase of pension to Euphemia Trumbull; to the Committee on Invalid Pensions.

By Mr. UTTERBACK: A bill (H. R. 12710) to provide for the advancement on the retired list of the Navy of Frederick D. Powers; to the Committee on Naval Affairs.

Also, a bill (H. R. 12711) granting a pension to Glennie Edwinson; to the Committee on Invalid Pensions.

By Mr. WHELCHEL: A bill (H. R. 12712) for the relief of Hoyt G. Barnett; to the Committee on Claims.

Also, a bill (H. R. 12713) for the relief of Mr. and Mrs. Jerry Martin Tow; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10880. By Mr. CRAWFORD: Petition of Henry Cowall and 90 residents of Shiawassee County, Mich., relative to issuance of currency; to the Committee on Banking and Currency.

10881. By the SPEAKER: Petition of Vicente Perrin and others; to the Committee on Ways and Means.

10882. Also, petition of the Federation of Citizens' Associations of the District of Columbia; to the Committee on Rules.

10883. Also, petition of the Southern Cotton Shippers' Association; to the Committee on Agriculture.

10884. By Mr. RISK: Resolution of the General Assembly of the State of Rhode Island, petitioning the President of the United States and Congress to maintain the Civilian Conservation Corps at its present quota of 500,000 men for another year; to the Committee on Appropriations.

HOUSE OF REPRESENTATIVES

THURSDAY, MAY 14, 1936

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Most merciful God, in this stillness while we bow, forgive us our sins. O bless the Lord all ye people and make the voice of his praise to be heard. He ruleth by his power; His eyes behold the nations; let not the unrighteous exalt themselves. Let us learn to trust Thee, our Heavenly Father, and to fill our places and enjoy goodly things in the spirit of unquestioning faith and gratitude. O lead us in upon the certitude of the soul and help us to a more restful and calming prospect. Inspire us, blessed Lord, with the redeeming love that saves, with the strengthening grace that sustains, and with the providential guidance that keeps us in the way. The mercy of the Lord is from everlasting to everlasting and his righteousness unto children's children. In the name of Jesus. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 12162. An act to create an additional division of the United States District Court for the Southern District of Mississippi to be known as the Hattiesburg division.

The message also announced that the Senate had passed, with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 8940. An act to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

The message also announced that the Senate had passed a bill and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 2665. An act to change the name of the Department of the Interior to be known as the Department of Conservation; and

S. J. Res. 242. Joint resolution authorizing and directing the Commodity Credit Corporation to facilitate the liquidation of loans to cotton producers.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 2953) entitled "An act to provide for the inspection, control, and regulation of steam boilers and unfired pressure vessels in the District of Columbia", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KING, Mr. REYNOLDS, and Mr. CAPPER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8599) entitled "An act to provide for a change in the designation of the Bureau of Navigation and Steamboat Inspection, to create a marine casualty investigation board, and increase efficiency in administration of the steamboat-inspection laws, and for other purposes."

PERMISSION TO ADDRESS THE HOUSE

Mr. TREADWAY. Mr. Speaker, following the remarks of the gentleman from North Carolina [Mr. HANCOCK], I ask unanimous consent to address the House for 20 minutes.

Mr. GRISWOLD. Mr. Speaker, I object.

Mr. TREADWAY. Mr. Speaker, I make the point of order there is not a quorum present.

The SPEAKER. Will the gentleman from Massachusetts withhold that a moment?

Mr. TREADWAY. I withhold it for the moment, Mr. Speaker.

H. NEWLIN MEGILL

The SPEAKER laid before the House the following communication from the Clerk of the House:

MAY 14, 1936.

The SPEAKER,
House of Representatives, Washington, D. C.

SIR: Desiring to be temporarily absent from my office, I hereby designate Mr. H. Newlin Megill, an official in my office, to sign any and all papers for me which he would be authorized to sign by virtue of this designation and of clause 4, rule III, of the House.

Yours respectfully,

SOUTH TRIMBLE,
Clerk of the House of Representatives.

Mr. TREADWAY. Mr. Speaker, I now renew the point that there is not a quorum present.

Mr. BANKHEAD. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, when the following Members failed to answer to their names:

[Roll No. 96]

Andrew, Mass.	Cross, Tex.	Fitzpatrick	Lehlbach
Arends	Culkin	Gassaway	McGroarty
Bell	Daly	Gifford	Maloney
Berlin	Dear	Goldsborough	Marshall
Bolton	Dempsey	Gray, Pa.	Maverick
Brennan	DeRouen	Green	Merritt, Conn.
Brewster	Dingell	Greenway	Montet
Brooks	Dorsey	Harlan	Moritz
Buckler, Minn.	Doutrich	Harter	Nichols
Buckley, N. Y.	Duffey, Ohio	Hartley	Oliver
Bulwinkle	Duffy, N. Y.	Hess	Palmisano
Caldwell	Eagle	Hoeppel	Parks
Cary	Eaton	Hope	Patton
Casey	Edmiston	Jenckes, Ind.	Perkins
Cavicchia	Ekwall	Jenkins, Ohio	Risk
Chapman	Englebright	Kee	Sabath
Claiborne	Fenerty	Keller	Sanders, La.
Collins	Ferguson	Kennedy, Md.	Sandlin
Connery	Fernandez	Kerr	Sears
Crosby	Fish	Larrabee	Secrest
Smith, Conn.	Sweeney	Thomas	Wilson, La.
Smith, W. Va.	Taylor, Colo.	Utterback	Withrow
Steagall	Taylor, S. C.	Wigglesworth	Zioncheck

The SPEAKER. Three hundred and thirty-five Members are present, a quorum.

On motion of Mr. RAYBURN, further proceedings under the call were dispensed with.

The SPEAKER. Under the special order of the House the Chair recognizes the gentleman from North Carolina [Mr. HANCOCK] for 10 minutes.

HOUSING CONDITIONS IN THE UNITED STATES

Mr. HANCOCK of North Carolina. Mr. Speaker, I have asked for this time in order to direct your attention to and elicit your interest in House Resolution 466, which I introduced on March 26 and which is now pending before the Rules Committee.

Briefly, this resolution authorizes the Speaker of the House to appoint a select committee consisting of seven members to investigate housing problems in the United States and Great Britain. This study and investigation will include problems of home ownership, home building, home financing, and public housing, and will involve a careful survey of the activities of the present agencies of the Government having to do with housing in all its phases. The resolution in question requires that after this investigation and survey has been completed the committee shall report its findings and recommendations to the House during the first session of the Seventy-fifth Congress. Fifty thousand dollars is authorized and will be requested from the Committee on Accounts to cover the actual expenses incurred by members of the committee and to employ such technical and clerical assistance as the committee deems desirable to complete a comprehensive study and inquiry and prepare a report and legislative program for the consideration of the Seventy-fifth Congress.

I think all of us will agree that it is high time the legislative branch of our Government really knew something about the housing problem. In my opinion, in its proper and effective solution will be found the key to the present staggering unemployment situation. Unemployment is admitted by all to be the crucial problem of America, and there must be a way to solve it. For several years now, under the impact of the depression and the desire for recovery, we have started in a dozen different directions to build apartments, to insure mortgages, to conduct resettlement operations, to refinance mortgages, to lower interest rates, to support community home-financing institutions, and the like. All have been initiated in good faith under a general desire to do something for better living conditions and for home ownership.

It is becoming increasingly apparent that a thoughtful investigating group should survey the whole problem, take testimony, and develop a coordinated plan which can be followed by our Federal Government, even though that plan may mean the withdrawal from some of the activities upon which we have hastily embarked. The Congress should do its own broad studies on these questions and not depend solely on the guidance of experts and proponents from the departments of the Government, who are always legislative competitors for the expansion and development of their particular activities and spheres of influence.

The great changes and forward steps in the development of national operation with regard to the national-banking system, the Federal Reserve System, and the farm land bank system were made only after extended inquiry and study by Members of the House of Representatives, which was done either through special committees or through regular established committees of the House. In contrast, we are embarking upon an extended program of public housing—and when I say "public housing" I mean the building of thousands of apartments and homes, to be rented by the Government to our citizens—and we are, to use another illustration, placing the credit of the United States behind millions of dollars of private mortgage obligations, held by financial institutions, particularly banks—all without that

extended study and discussion and observation and the hearing of all interests involved which so vast and comprehensive a program deserves to have. The public policies in regard to housing in a country so vast as ours cannot be developed in the necessarily hurried hearings of a legislative session. It is my judgment that such a responsibility should have months of undivided attention from a group of this House, supported and advised by competent experts and impartial advisers.

The British experience in public and private house building is frequently cited as a major factor in their recent business recovery. On several occasions, in the development of their governmental housing policy, they have had the benefit of the study and judgment of commissions composed of representative citizens and experts. It seems to me that, with our dozen-plus Government operations dealing, in one way or another with the housing problem, some with moderate success and others without particular effectiveness, we should, as a legislative body, seek information and develop a program.

It is customary to say that reports of such bodies are not read. Of course, they are not read by tens of thousands of citizens, but such reports, if well done, are read by the men who have the responsibility of determining the housing policies which affect or touch the tens of thousands.

Construction can be our most important industry in business recovery and stability, and home ownership is basic to governmental loyalty and stability. We should, therefore, take extraordinary measures to so inform ourselves that we can legislate wisely on these subjects. There would be less occasion for such a suggestion if the housing problem had been one with which the National Government had been concerned for decades and upon which we had committees of the House who had spent years in studying and dealing with the question. The Federal housing problem is an innovation to the Congress, and should be treated by special attention in order that we may do the greatest good for the renting and home-owning citizens of the country. [Applause.]

RURAL ELECTRIFICATION

Mr. RAYBURN. Mr. Speaker, I call up the conference report on the bill (S. 3483) to provide for rural electrification, and for other purposes, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RAYBURN. Mr. Speaker, I ask unanimous consent to dispense with the reading of the statement for this reason: There were three vital differences between the House and Senate on this bill, which I can explain, I think, in 3 minutes, and therefore I do not believe it is necessary to read the statement.

Mr. RICH. Reserving the right to object, will the gentleman yield?

Mr. RAYBURN. Yes.

Mr. RICH. This report was not on the desk when the House convened this morning and the Members do not know a thing about it.

Mr. RAYBURN. I can explain all the differences between the conference report and the House bill in about a minute and a half.

Mr. RANKIN. This will save time.

Mr. RICH. It may save time, but while we are saving time we are wrecking the Nation, and we ought to know more about this legislation than we do now.

Mr. RAYBURN. As I have just stated to the gentleman, there are three main differences between the House bill and the conference report, and I can explain them in a minute and a half.

Mr. RICH. I wish the gentleman would explain the differences before he asks unanimous consent to dispense with the reading of the statement.

Mr. RAYBURN. I have got to have unanimous consent in order to dispense with the reading of the statement.

Mr. RICH. Cannot that be withheld? I do not want to object if the gentleman will explain the bill, but in some of these bills and conference reports there are "niggers in the woodpile", and we are going to try to get these niggers out, if possible.

The SPEAKER. The Chair will state to the gentleman from Pennsylvania that unanimous consent has already been given for the reading of the statement in lieu of the report. Of course, it will be necessary to read the statement if someone objects to the request of the gentleman from Texas.

Mr. RICH. I do not want to object to anything that is reasonable, but I have just this very second obtained a copy of the report, and I do not know a thing in the world about it, and the majority of the Members are in the same boat.

Mr. RAYBURN. If the gentleman will allow me, I can tell him something about it.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. RICH. I am going to object until I hear the statement read.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

[To accompany S. 3483]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3483) to provide for rural electrification, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following: "That there is hereby created and established an agency of the United States to be known as the 'Rural Electrification Administration', all of the powers of which shall be exercised by an Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate, for a term of ten years, and who shall receive a salary of $10,000 per year. This Act may be cited as the 'Rural Electrification Act of 1936'.

"SEC. 2. The Administrator is authorized and empowered to make loans in the several States and Territories of the United States for rural electrification and the furnishing of electric energy to persons in rural areas who are not receiving central station service, as hereinafter provided; to make, or cause to be made, studies, investigations, and reports concerning the condition and progress of the electrification of rural areas in the several States and Territories; and to publish and disseminate information with respect thereto.

"SEC. 3. (a) The Reconstruction Finance Corporation is hereby authorized and directed to make loans to the Administrator, upon his request approved by the President, not exceeding in aggregate amount $50,000,000 for the fiscal year ending June 30, 1937, with interest at 3 per centum per annum upon the security of the obligations of borrowers from the Administrator appointed pursuant to the provisions of this Act or from the Administrator of the Rural Electrification Administration established by Executive Order Numbered 7037: *Provided*, That no such loan shall be in an amount exceeding 85 per centum of the principal amount outstanding of the obligations constituting the security therefor: *And provided further*, That such obligations incurred for the purpose of financing the construction and operation of generating plants, electric transmission and distribution lines, or systems shall be fully amortized over a period not to exceed twenty-five years, and that the maturity of such obligations incurred for the purpose of financing the wiring of premises and the acquisition and installation of electrical and plumbing appliances and equipment shall not exceed two-thirds of the assured life thereof and not more than five years. The Administrator is hereby authorized to make all such endorsements, to execute all such instruments, and to do all such acts and things as shall be necessary to effect the valid transfer and assignment to the Reconstruction Finance Corporation of all such obligations.

"(b) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1938, and for each of the eight years thereafter, the sum of $40,000,000 for the purposes of this Act as hereinafter provided.

"(c) Fifty per centum of the annual sums herein made available or appropriated for the purposes of this Act shall be allotted yearly by the Administrator for loans in the several States in the proportion which the number of their farms not then receiving central station electric service bears to the total number of farms of the United States not then receiving such service. The Administrator shall, within ninety days after the beginning of each fiscal year,

determine for each State and for the United States the number of farms not then receiving such service.

"(d) The remaining 50 per centum of such annual sums shall be available for loans in the several States and in the Territories, without allotments as hereinabove provided, in such amounts for each State and Territory as, in the opinion of the Administrator, may be effectively employed for the purposes of this Act, and to carry out the provisions of section 7: *Provided, however,* That not more than 10 per centum of said unallotted annual sums may be employed in any one State, or in all of the Territories.

"(e) If any part of the annual sums made available for the purposes of this Act shall not be loaned or obligated during the fiscal year for which such sums are made available, such unexpended or unobligated sums shall be available for loans by the Administrator in the following year or years without allotment: *Provided, however,* That not more than 10 per centum of said sums may be employed in any one State or in all of the Territories: *And provided further,* That no loans shall be made by the Reconstruction Finance Corporation to the Administrator after June 30, 1937.

"(f) All moneys representing payments of principal and interest on loans made by the Administrator under this Act shall be covered into the Treasury as miscellaneous receipts, except that any such moneys representing payments of principal and interest on obligations constituting the security for loans made by the Reconstruction Finance Corporation to the Administrator shall be paid to the Reconstruction Finance Corporation in payment of such loans.

"SEC. 4. The Administrator is authorized and empowered, from the sums hereinbefore authorized, to make loans to persons, corporations, States, Territories, and subdivisions and agencies thereof, municipalities, peoples utility districts and cooperative, nonprofit, or limited-dividend associations organized under the laws of any State or Territory of the United States, for the purpose of financing the construction and operation of generating plants, electric transmission and distribution lines or systems for the furnishing of electric energy to persons in rural areas who are not receiving central station service: *Provided, however,* That the Administrator, in making such loans, shall give preference to States, Territories, and subdivisions and agencies thereof, municipalities, peoples utility districts, and cooperative, nonprofit, or limited dividend associations, the projects of which comply with the requirements of this Act. Such loans shall be on such terms and conditions relating to the expenditure of the moneys loaned and the security therefor as the Administrator shall determine and may be made payable in whole or in part out of income: *Provided, however,* That all such loans shall be self-liquidating within a period of not to exceed twenty-five years, and shall bear interest at a rate equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of ten or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued: *Provided further,* That no loan for the construction, operation, or enlargement of any generating plant shall be made unless the consent of the State authority having jurisdiction in the premises is first obtained. Loans under this section and section 5 shall not be made unless the Administrator finds and certifies that in his judgment the security therefor is reasonably adequate and such loan will be repaid within the time agreed.

"SEC. 5. The Administrator is authorized and empowered, from the sums hereinbefore authorized, to make loans for the purpose of financing the wiring of the premises of persons in rural areas and the acquisition and installation of electrical and plumbing appliances and equipment. Such loans may be made to any of the borrowers of funds loaned under the provisions of section 4, or to any person, firm, or corporation supplying or installing the said wiring, appliances, or equipment. Such loans shall be for such terms, subject to such conditions, and so secured as reasonably to assure repayment thereof, and shall be at a rate of interest equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of ten or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued.

"SEC. 6. For the purpose of administering this Act and for the purpose of making the studies, investigations, publications, and reports herein provided for, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as shall be necessary.

"SEC. 7. The Administrator is authorized and empowered to bid for and purchase at any foreclosure or other sale, or otherwise to acquire, property pledged or mortgaged to secure any loan made pursuant to this Act; to pay the purchase price and any costs and expenses incurred in connection therewith from the sums authorized in section 3 of this Act; to accept title to any property so purchased or acquired in the name of the United States of America; to operate or lease such property for such period as may be deemed necessary or advisable to protect the investment therein, but not to exceed five years after the acquisition thereof; and to sell such property so purchased or acquired, upon such terms and for such consideration as the Administrator shall determine to be reasonable.

"No borrower of funds under section 4 shall, without the approval of the Administrator, sell or dispose of its property, rights, or franchises, acquired under the provisions of this Act, until any loan obtained from the Rural Electrification Administration, including all interest and charges, shall have been repaid.

"SEC. 8. The administration of loans and contracts entered into by the Rural Electrification Administration established by Executive Order Numbered 7037, dated May 11, 1935, may be vested by the President in the Administrator authorized to be appointed by this Act; and in such event the provisions of this Act shall apply to said loans and contracts to the extent that said provisions are not inconsistent therewith. The President may transfer to the Rural Electrification Administration created by this Act the jurisdiction and control of the records, property (including office equipment), and personnel used or employed in the exercise and performance of the functions of the Rural Electrification Administration established by such Executive order.

"SEC. 9. This Act shall be administered entirely on a nonpartisan basis, and in the appointment of officials, the selection of employees, and in the promotion of any such officials or employees, no political test or qualification shall be permitted or given consideration, but all such appointments and promotions shall be given and made on the basis of merit and efficiency. If the Administrator herein provided for is found by the President of the United States to be guilty of a violation of this section, he shall be removed from office by the President, and any appointee or selection of officials or employees made by the Administrator who is found guilty of a violation of this Act shall be removed by the Administrator.

"SEC. 10. The Administrator shall present annually to the Congress not later than the 20th day of January in each year a full report of his activities under this Act.

"SEC. 11. In order to carry out the provisions of this Act the Administrator may accept and utilize such voluntary and uncompensated services of Federal, State, and local officers and employees as are available, and he may without regard to the provisions of civil-service laws applicable to officers and employees of the United States appoint and fix the compensation of attorneys, engineers, and experts, and he may, subject to the civil-service laws, appoint such other officers and employees as he may find necessary and prescribe their duties. The Administrator is authorized, from sums appropriated pursuant to section 6, to make such expenditures (including expenditures for personal services; supplies and equipment; lawbooks and books of reference; directories and periodicals; travel expenses; rental at the seat of government and elsewhere; the purchase, operation, or maintenance of passenger-carrying vehicles; and printing and binding) as are appropriate and necessary to carry out the provisions of this Act.

"SEC. 12. The Administrator is authorized and empowered to extend the time of payment of interest or principal of any loans made by the Administrator pursuant to this Act: *Provided, however,* That with respect to any loan made under section 4, the payment of interest or principal shall not be extended more than five years after such payment shall have become due, and with respect to any loan made under section 5, the payment of principal or interest shall not be extended more than two years after such payment shall have become due: *And provided further,* That the provisions of this section shall not apply to any obligations or the security therefor which may be held by the Reconstruction Finance Corporation under the provisions of section 3.

"SEC. 13. As used in this Act the term "rural area" shall be deemed to mean any area of the United States not included within the boundaries of any city, village, or borough having a population in excess of fifteen hundred inhabitants, and such term shall be deemed to include both the farm and nonfarm population thereof; the term "farm" shall be deemed to mean a farm as defined in the publications of the Bureau of the Census; the term "person" shall be deemed to mean any natural person, firm, corporation, or association; the term "Territory" shall be deemed to include any insular possession of the United States.

"SEC. 14. If any provision of this Act, or the application thereof to any person or circumstances, is held invalid, the remainder of the Act and the application of such provision to other persons or circumstances shall not be affected thereby."

And the House agree to the same.

SAM RAYBURN,
GEORGE HUDDLESTON,
CARL E. MAPES,
Managers on the part of the House.

E. D. SMITH,
BURTON K. WHEELER,
G. W. NORRIS,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill (S. 3483) to provide for rural electrification, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause. The Senate recedes from its disagreement to the amendment of the House, with an amendment which is a substitute for both the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed upon by the conferees are noted in the following discussion, except for clerical amendments and incidental changes made necessary to harmonize various provisions affected by the agreements reached.

Sections 1, 3 (c), 3 (d), 6, 12 (sec. 11 of the House amendment), and 14 (sec. 13 of the House amendment of the Senate bill are included in the text of the conference agreement without change in the wording (secs. 1, 3 (c), 3 (d), 6, 12, and 14).

Section 2 of the Senate bill authorized the Administrator of the Rural Electrification Administration to promote rural electrification by making loans, and to make studies and reports as to rural electrification and to publish information pertaining thereto. The House amendment authorized the Administrator to make loans for rural electrification, and retained the provisions as to studies, reports, and publications. The conference agreement adopts the provisions of the House amendment.

Section 3 (a) of the Senate bill authorized the Reconstruction Finance Corporation to make loans to the Administrator, not exceeding $50,000,000 in the aggregate for each of the fiscal years 1937 and 1938. The House amendment authorized such loans in the amount of $50,000,000, but only for the fiscal year 1937. The conference agreement adopts the provisions of the House amendment.

Section 3 (a) of the Senate bill also limited wiring, appliance, and equipment loans to maturities "generally not more than 5 years." The House amendment struck out the word "generally." The conference agreement omits the word "generally."

Section 3 (b) of the Senate bill authorized appropriations of $40,000,000 annually for 8 years, beginning with the fiscal year 1939. The House amendment authorized an appropriation in like amount annually for 9 years, beginning with the fiscal year 1938, to correspond with the change in section 3 (a). The conference agreement adopts the provisions of the House amendment.

Section 3 (e) of the Senate bill by a proviso prohibited the making of Reconstruction Finance Corporation loans to the Administrator after June 30, 1938. The House amendment made the prohibition effective June 30, 1937, to correspond with the change in sections 3 (a) and 3 (b). The conference agreement adopts the provisions of the House amendment.

The House amendment added a new subsection 3 (f) to section 3 of the Senate bill to provide that repayments on loans made by the Administrator should be covered into the Treasury as miscellaneous receipts, except that repayments on loans put up as security for advances by the Reconstruction Finance Corporation to the Administrator should be paid to the Reconstruction Finance Corporation to be applied in payment of such advances. The Senate bill contained no corresponding provision. The conference agreement adopts the House provisions.

Section 4 of the Senate bill authorized construction and operation loans to States, Territories, municipalities, utility districts, and cooperative corporations and associations. The House amendment added persons and corporations to the list of such eligibles. The conference agreement adopts the House provision on this point but adds a provision directing the Administrator, in making such loans, to give preference to States, Territories, and subdivisions and agencies thereof, municipalities, people's utility districts, and cooperative, nonprofit, or limited-dividend associations, the projects of which comply with the requirements of this act.

Section 4 provided that such loans by the Administrator bear interest at a rate not exceeding 3 percent per annum. The House amendment required that such interest be at a rate not less than 3 percent per annum. The conference agreement provides that the interest rate shall be equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of 10 or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued.

The House amendment added at the end of section 4 of the Senate bill a proviso prohibiting the making of any loan for the construction, operation, or enlargement of a generating plant unless consent of the State authority having jurisdiction in the premises was first obtained, and also prohibited the making of loans under the act unless the Administrator certifies that the security therefor is reasonably adequate and that the loan will be repaid within the time agreed. The Senate bill contained no similar provision except that loans under section 5 be so secured as reasonably to assure repayment (sec. 5 of Senate bill). The conference agreement adopts the provisions of the House amendment.

Section 5 of the Senate bill authorized the making of wiring, appliances, and equipment loans to individual consumers as well as to borrowers under section 4 and to the persons installing the wiring, appliances, or equipment. The House amendment eliminates loans to individual consumers unless the consumer is a person making a loan under section 4 or is the person installing the materials. The conference agreement adopts the House provision on this point.

Section 5 of the Senate bill also provided that the loans under such section should bear interest at a rate not exceeding 3 percent per annum. The House amendment required such rate of interest to be not less than 3 percent per annum. The conference agreement provides that the interest rate shall be equal to the average rate of interest payable by the United States of America on its obligations, having a maturity of 10 or more years after the dates thereof, issued during the last preceding fiscal year in which any such obligations were issued.

The second paragraph of section 7 of the Senate bill prohibited a borrower under section 4 of the Senate bill from selling property acquired under the act to any private corporation or person until the loan was repaid, and thereafter only with the approval of the Administrator. The House amendment extended the prohibition against sale to forbid sale in any case until repayment of the loan, without the approval of the Administrator, but required no approval in respect of a sale after repayment of the loan. The conference agreement adopts the provisions of the House amendment.

Section 8 of the Senate bill (last sentence) made section 3709 of the Revised Statutes (requiring advertising in purchases of supplies, etc.) applicable to purchases made in expending funds loaned under the act if the aggregate amount involved was more than $500. The House amendment struck out this provision. The conference agreement eliminates the provision.

Section 9 of the Senate bill provided for a nonpartisan administration of the act and for appointments and promotions of officials and employees on the basis of merit, and for removals by the President and by the Administrator in case of violations of this section. The House amendment struck out this section. The conference agreement retains the Senate provisions.

Section 10 of the Senate bill required a report to Congress from the Administrator as soon as practicable after the 1st day of January in each year. The House amendment (sec. 9) required the report to be made not later than the 20th day of January in each year. The conference agreement (sec. 10) adopts the provisions of the House amendment.

Section 11 of the Senate bill (relating to the power of the Administrator to hire personnel and to make expenditures) was modified by the House amendment (sec. 10) to provide that expenditures for the enumerated purposes were not to be made except out of appropriations made pursuant to section 6. The conference agreement (sec. 11) adopts the provisions of the House amendment.

Section 13 of the Senate bill (containing definitions) was amended by the House amendment to include a definition of "Territory" in order to extend the application of the act to insular possessions of the United States. The conference agreement (sec. 13) adopts the change made by the House amendment.

SAM RAYBURN,
GEORGE HUDDLESTON,
CARL E. MAPES,
Managers on the part of the House.

Mr. RICH (interrupting the reading of the statement). Mr. Speaker, I have been informed that if we dispense with the reading of the statement that the gentleman from Texas will give us the information and therefore save time. So I withdraw my objection.

Mr. RAYBURN. Mr. Speaker, in the bill as it passed the Senate and as it passed the House, I think there are but three differences that amount to a great deal. As the Senate passed the bill there was no provision for lending money to private companies, but only to public bodies and quasi-public bodies.

The House passed the bill allowing loans to private corporations.

We compromised on this sort of a provision, that the provision for loans to private companies was retained in the bill and that municipalities and nonprofit organizations should receive preferences at the hands of the Administrator in lending money. That is the difference.

Mr. RANKIN. Will the gentleman yield?

Mr. RAYBURN. I will.

Mr. RANKIN. That is the same provision that is contained in the T. V. A.

Mr. RAYBURN. The same.

Mr. RANKIN. It gives preference to municipalities and cooperative associations.

Mr. RAYBURN. That is right.

Another difference was that the Senate bill provided that the loans should be made at not more than 3 percent. The House bill provided that loans should be made for not less than 3 percent. We compromised by striking out both of these sentences and inserting a provision that the money should be loaned by the Administrator of the Rural Electrification at the price that it cost the Government to get it.

Mr. RANKIN. And what would that amount be at the present time?

Mr. RAYBURN. At the present time it would be less than 3 percent, but it is to go up and down as it will cost the Government.

Mr. RANKIN. So it would be now, and for the last 10 years, substantially 3 percent or less?

Mr. RAYBURN. Yes.

Now, the House struck out a provision in the Senate bill which I did not know was in the T. V. A., and that was that the administration should be nonpartisan. So the House yielded on that and it was restored.

Mr. RICH. It is to be nonpartisan? How can that happen?

Mr. RAYBURN. I do not know, but the bill provides that it shall be. I am not the Administrator. But let me say that 97 percent will be under civil service.

Mr. RICH. In figuring out the rates of interest which they charge for this money do they figure any cost, as far as the Government is concerned, for the people they have in their employ for insurance, taxes, office rent, and all overhead figured by private business?

Mr. RAYBURN. This is conducted like any other Government institution, just like the Interstate Commerce Commission or any other commission of the Government. The administration is paid for out of the Treasury.

Mr. RICH. They do not figure any overhead costs in trying to determine what the rates of interest are going to be? They simply use the rate we borrow money for, and the average rate of interest charged is the amount we charge, without any overhead expenses being figured. That is the way the Government fools the people of this country. That is the political way of doing things.

Mr. RAYBURN. It will cost the borrower what it costs the Government.

Mr. RICH. In other words, you will have to lay taxes on some part of the Government in order to get enough money to carry on the organization that is seeking the low rates of interest. All that expense will have to be borne by some other branch of the Government?

Mr. RAYBURN. If there is any other expense, it will; yes.

I now yield to the gentleman from Michigan [Mr. MAPES].

Mr. MAPES. In view of the fact that the statement was not read, it might be well to call attention to another amendment in addition to the three which the gentleman has mentioned.

Mr. RAYBURN. I said three main points.

Mr. MAPES. Some of the Members were interested in a fourth amendment, known as the Walsh amendment, put on in the Senate, requiring the recipients of these loans to advertise for bids on all contracts over $500. The Senate receded on that amendment?

Mr. RAYBURN. The House struck that out, and the Senate receded on it.

Mr. WADSWORTH. Will the gentleman yield for a question?

Mr. RAYBURN. I yield.

Mr. WADSWORTH. Is that provision which was in the House bill which fixed the term of office of the Administrator at 10 years still in the bill?

Mr. RAYBURN. I do not think that was disturbed; no, sir. It is still in the bill.

Mr. WADSWORTH. Will the gentleman yield for a further question or two upon a matter which I confess I discussed when the bill was before the House?

Mr. RAYBURN. I yield.

Mr. WADSWORTH. As I read the report, there has been no change in this particular provision, but I want to ask the gentleman from Texas a question or two about it. I think the gentleman will not deny that in all its loaning activities the Government in no case has proceeded to loan 100 percent on the value or cost of the property which is put up as security for the loan. Even on yesterday, when the Frazier-Lemke bill was before us, and surely that was a most generous bill, the sponsors of that bill offered an amendment to the effect that the farmer might receive a loan only up to 80 percent of the appraised value of the farm. The Home Owners' Loan Corporation, the Agricultural Credit Administration, the Federal land bank, and the Reconstruction Finance Corporation in all their loans—in fact, all loans by Government agencies—always maintain some cushion for the Government. I ask the gentleman from Texas if it is not a fact that this is the only measure of all the measures proposing to loan money which authorizes a 100-percent loan?

Mr. RAYBURN. I think that is correct.

Mr. WADSWORTH. I thought so.

Mr. RAYBURN. And I think it is absolutely necessary if we are going to make a success out of this.

Mr. ROGERS of New Hampshire. Mr. Speaker, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. ROGERS of New Hampshire. Is it not a fact that the conference agreement does adopt the House amendment authorizing the administration to make loans for rural electrification, as shown in the House amendment?

Mr. RAYBURN. That is correct.

Mr. COLDEN. Mr. Speaker, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. COLDEN. What are the conditions of repayment? Are they made on a monthly basis?

Mr. RAYBURN. That has not been determined yet. They can pay them, and they will be handled under whatever law is in operation in the States, or rules and regulations.

Mr. COLDEN. In case they are based upon monthly payments, the whole amount will only be loaned for the first month, and the principal will be reduced every month after that, will it not?

Mr. RAYBURN. It could be.

Mr. BIERMANN. Mr. Speaker, will the gentleman yield?

Mr. RAYBURN. I yield.

Mr. BIERMANN. I did not understand what the gentleman said regarding the so-called Norris amendment, regarding the loaning of money to private corporations. What was done with that?

Mr. RAYBURN. It was retained in the bill—the provision to loan to private corporations, utility companies. But we have a provision that preference should be given to municipalities and others, such as cooperatives, and so forth.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

A motion to reconsider the vote by which the conference report was agreed to was laid on the table.

NAVY DEPARTMENT APPROPRIATION BILL, 1937

Mr. UMSTEAD. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 12527) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1937, and for other purposes, with Senate amendments, disagree to the amendments of the Senate, and ask for a conference with the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. RICH. Mr. Speaker, reserving the right to object, I should like to ask the gentleman a question. This is the Navy Department appropriation bill. What is the status of that bill as to an increase this year over last year?

Mr. UMSTEAD. I will answer the gentleman's question by making this statement: There is no conference report before the House at this time. I am simply now asking unanimous consent that the bill be taken from the Speaker's table, disagree with all of the amendments placed on the bill by the Senate, and ask for a conference.

Mr. RICH. You are going to disagree to all those amendments?

Mr. UMSTEAD. I so stated very clearly.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina [Mr. UMSTEAD]? [After a pause.] The Chair hears none, and appoints the following conferees: Mr. UMSTEAD, Mr. THOM, Mr. JOHNSON of West Virginia, Mr. SCRUGHAM, Mr. MCLEOD, and Mr. DITTER.

NAVAL AIR STATION SITE, MIAMI, FLA.—CONFERENCE REPORT

Mr. VINSON of Georgia. Mr. Speaker, I call up the conference report on the bill (H. R. 8372) to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon, and ask unanimous consent that the statement may be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

[To accompany H. R. 8372]

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8372) to authorize the acquisition of lands in the vicinity of Miami, Florida, as a site for a naval air station and to authorize the construction and installation of a naval air station thereon, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment.

CARL VINSON,
P. H. DREWRY,
GEORGE P. DARROW,
Managers on the part of the House.

DAVID I. WALSH,
MILLARD E. TYDINGS,
FREDERICK HALE,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 8372) to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report; namely:

The House text prevails. The House bill provides for the acceptance of a donation of lands on North Biscayne Bay, in the vicinity of Miami, Fla., and the establishment thereon of a naval air station. The Senate struck out the whole of the House text and made provisions for acceptance of donated lands merely in the vicinity of Miami, Fla., and for the development of the property for such naval necessities as the Secretary of the Navy may consider to be warranted, the property to be returned to the grantors if not used by the United States as contemplated by the amendment within 10 years.

CARL VINSON,
P. H. DREWRY,
GEORGE P. DARROW,
Managers on the part of the House.

Mr. VINSON of Georgia. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was adopted.

A motion to reconsider was laid on the table.

TREASURY-POST OFFICE DEPARTMENTS APPROPRIATION BILL, 1937—CONFERENCE REPORT

Mr. LUDLOW. Mr. Speaker, I call up the conference report on the bill (H. R. 10919) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes.

The Clerk read the conference report.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10919) "making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, 7, 8, 9, 16, 19, 21, 23, 35, 37, 46, 55, 56, 57, and 58.

That the House recede from its disagreement to the amendments of the Senate numbered 6, 10, 12, 15, 18, 20, 24, 31, 33, 39, 40, 41, 47, 50, 51, 53, 54, 62, and 64, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$1,050,000", and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$155,000", and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$1,373,210", and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$475,000", and the Senate agree to the same.

Amendment numbered 13: That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$17,566,458", and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: Restore the matter stricken out by said amendment amended to read as follows: "or for the permanent enlargement of the capacity of any existing aviation shore station", and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$22,690,788", and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$1,320,000", and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "not exceeding $1,000 for expenses of educational exhibits, specifically approved by the Secretary of the Treasury,"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$365,135"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$569,810"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$769,150"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$447,500"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$206,240", and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$104,930", and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

"Salaries of inspectors: For salaries of fifteen inspectors in charge of divisions and five hundred and seventy-five inspectors, $2,219,500."

And the Senate agree to the same.

Amendment numbered 38: That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$586,500", and the Senate agree to the same.

Amendment numbered 42: That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$6,775,000", and the Senate agree to the same.

Amendment numbered 43: That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$186,900,000", and the Senate agree to the same.

Amendment numbered 44: That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$134,900,000", and the Senate agree to the same.

Amendment numbered 45: That the House recede from its disagreement to the amendment of the Senate numbered 45, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$7,125,000", and the Senate agree to the same.

Amendment numbered 59: That the House recede from its disagreement to the amendment of the Senate numbered 59, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$12,875,000", and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$14,900,000", and the Senate agree to the same.

Amendment numbered 61: That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$4,675,000", and the Senate agree to the same.

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63, and agree to the same with an amendment, as follows: In lieu of the sum proposed insert: "$625,000", and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 26, 48, 49, and 52.

LOUIS LUDLOW,
JOHN J. BOYLAN,
EMMET O'NEAL,
JOHN TABER,
CLARENCE J. MCLEOD,
Managers on the part of the House.

CARTER GLASS,
KENNETH MCKELLAR,
CARL HAYDEN,
FREDERICK STEIWER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10919) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TREASURY DEPARTMENT

On no. 1: Appropriates $1,050,000, instead of $1,000,000, as proposed by the House, and $1,099,140, as proposed by the Senate, for the Bureau of the Mint and the mints and assay offices on account of additional work incident to the Gold Reserve and Silver Purchase Acts.

On no. 2: Appropriates $520,000, as proposed by the House, instead of $529,720, as proposed by the Senate, for salaries, office of Chief Clerk and Superintendent.

On no. 3: Appropriates $155,000, instead of $150,300, as proposed by the House, and $160,000, as proposed by the Senate, for contingent expenses, Treasury Department.

On no. 4: Appropriates $279,520, as proposed by the House, instead of $285,920, as proposed by the Senate, for salaries, office of Commissioner of Accounts and Deposits.

On nos. 5 and 6, relating to the Division of Disbursement: Appropriates $1,373,210, instead of $1,473,210, as proposed by the Senate, and $1,273,210, as proposed by the House, for salaries and expenses, and makes provision, as proposed by the Senate, for the transfer of funds from the Railroad Retirement Board and the Social Security Board for the performance of work by such Division of such agencies.

On nos. 7 and 8, relating to the Public Debt Service: Appropriates $2,000,000, as proposed by the House, instead of $2,073,000, as proposed by the Senate, and fixes the limit on the amount that may be expended for personal services at $1,975,000, as proposed by the House, instead of $2,048,000, as proposed by the Senate.

On no. 9: Appropriates $48,512,980, as proposed by the House, instead of $49,768,830, as proposed by the Senate, for salaries and expenses of the Bureau of Internal Revenue.

On nos. 10 and 11, relating to the Federal Alcohol Administration: Appropriates $475,000, instead of $400,000, as proposed by the House, and $550,000, as proposed by the Senate; strikes out, as proposed by the Senate, the House limitation upon personal services in the District of Columbia; and makes a technical correction in phraseology.

On nos. 12 to 17, inclusive, relating to the Coast Guard: Provides, as proposed by the Senate, that the number of enlisted men on duty at Coast Guard Headquarters in connection with the Commandant's office shall not exceed 10, instead of limiting such details to 10 "in the District of Columbia" as proposed by the House bill; appropriates $17,566,458, instead of $17,512,000, as proposed by the House, and $17,580,933, as proposed by the Senate, for pay and allowances—the addition to the House amount of $54,458 being on account of rations; the Senate struck out of the House limitation on the use of certain funds for aviation shore stations that part prohibiting construction of any "permanent extension" at any such station—the conference agreement restores that part of the House limitation modified so as to make it applicable "to the permanent enlargement of the capacity of any existing aviation shore station"; appropriates $180,000, as proposed by the Senate, instead of $175,000, as proposed by the House, for contingent expenses; appropriates $1,800,000, as proposed by the House, instead of $1,900,000, as proposed by the Senate for repairs to vessels; and adjusts the total to correspond to the conference agreements.

On nos. 18 and 19: Appropriates $53,160, as proposed by the Senate, instead of $50,000, as proposed by the House, for salaries, Secret Service Division, and appropriates $850,000, as proposed by the House, instead of $906,575, as proposed by the Senate, for suppressing counterfeiting and other crimes.

On nos. 20, 21, and 22, relating to the Public Health Service: Increases, as proposed by the Senate, from $24,500 to $27,740 the limitation on personal services in the District of Columbia in the Division of Mental Hygiene and appropriates for such Division $663,220, as proposed by the House, instead of $666,460, as proposed by the Senate; and appropriates $1,320,000 instead of $1,155,160, as proposed by the House, and $1,500,000, as proposed by the Senate, for diseases and sanitation investigations.

On no. 23: Strikes out the appropriation of $22,000, inserted by the Senate, for reestablishment of the assay office at Helena, Mont.

On nos. 24 and 25: Makes the appropriations for the Procurement Division, Public Building Branch, available, as proposed by the Senate, for expenses of educational exhibits modified so as to limit such expenses to not to exceed $1,000.

POST OFFICE DEPARTMENT

On nos. 27 to 34, inclusive, relating to salaries in bureaus and offices in the District of Columbia: The following tabulation shows the amounts, respectively, in the House bill, the Senate amendments, and the amounts agreed upon as the result of the conference:

Office	House amount	Senate amount	Conference amount
Office of First Assistant	$360,000	$372,270	$366,135
Office of Second Assistant	566,040	573,580	569,810
Office of Third Assistant	766,440	771,860	769,150
Office of Fourth Assistant	442,800	452,200	447,500
Office of Solicitor	81,000	81,280	81,280
Office of chief inspector	201,380	216,000	206,240
Office of purchasing agent	40,880	42,000	42,000
Bureau of Accounts	103,000	106,860	104,930

On no. 35: Appropriates $81,000, as proposed by the House, instead of $85,000, as proposed by the Senate, for contingent expenses of the Post Office Department.

On nos. 36, 37, 38, 39, and 40, relating to the office of chief inspector: The following tabulation shows the amounts and personnel, respectively, in the House bill, the Senate amendments, and the conference agreement:

	House bill	Senate amendments	Conference agreement
15 inspectors in charge and 560 inspectors	$2,176,000		
15 inspectors in charge, 15 assistant inspectors in charge, and 625 inspectors		$2,425,000	
15 inspectors in charge and 575 inspectors			$2,219,500
Traveling and miscellaneous expenses	573,000	650,000	586,500
Clerks, division headquarters	446,100	465,000	465,000

The increase of 15 inspectors above the number provided in the House bill are allowed at rates as follows: 5 at $3,200 each, 5 at $2,900 each, and 5 at $2,600 each.

On nos. 41 to 45, inclusive, office, First Assistant Postmaster General: The following tabulation shows the amounts of the House bill, the Senate amendments, and the conference agreement:

	House bill	Senate amendments	Conference agreement
Compensation to postmasters	$47,500,000	$48,000,000	$48,000,000
Assistant postmasters	6,750,000	6,800,000	6,775,000
Clerks, first- and second-class post offices	186,500,000	187,500,000	186,900,000
City delivery carriers	134,500,000	135,300,000	134,900,000
Special-delivery fees	7,000,000	7,250,000	7,125,000

On no. 46: Appropriates $207,245, as proposed by the House, instead of $450,000, as proposed by the Senate, eliminating the increase proposed of $242,755 for expansion of air-mail service in Alaska.

On no. 47: Increase from $31,550 to $33,050, as proposed by the Senate, the amount which may be used for cost ascertainment of postal activities.

On nos. 50 and 51: Increase the limitation on the amount to be used for carrying foreign air mail from $7,962,500 to $8,230,000, as proposed by the Senate, the additional sum of $267,500 being for an additional weekly schedule on the east coast of South America.

On nos. 53, 54, and 55, relating to domestic air mail under contract: Appropriates $12,000,000, as proposed by the House, instead of $12,250,000, as proposed by the Senate, and increases, as proposed by the Senate, the limitations on the amounts thereof which may be used for administrative expenses in the District of Columbia and in the field.

On nos. 56, 57, and 58, relating to the salvaging and reconditioning of post-office lock-box equipment: Strikes out the increase of $35,000 and the authority inserted by the Senate to provide for such work.

On no. 59: Appropriates $12,875,000, instead of $12,750,000, as proposed by the House, and $13,000,000, as proposed by the Senate, for rent, light, etc., for first-, second-, and third-class offices.

On no. 60: Appropriates $14,900,000, instead of $14,500,000, as proposed by the House, and $15,300,000, as proposed by the Senate, for operating force for public buildings.

On no. 61: Appropriates $4,675,000, instead of $4,650,000, as proposed by the House, and $4,700,000, as proposed by the Senate, for operating supplies for public buildings.

On nos. 62 and 63: Appropriates $625,000, instead of $600,000, as proposed by the House, and $650,000, as proposed by the Senate, for furniture, etc., for public buildings, and makes the appropriation available, as proposed by the Senate, for "safe and vault protective devices."

On no. 64: Inserts section 4, proposed by the Senate, prohibiting the use of any money appropriated under the bill for payment to any person for the filling of any position for which such person has been nominated after the Senate upon vote has failed to confirm the nomination of such person.

AMENDMENTS REPORTED IN DISAGREEMENT

The committee of conference report in disagreement the following amendments of the Senate:

On no. 26: Providing for the transfer of funds to the office of Treasurer of the United States and to certain other Treasury appropriations from various agencies to cover expenses performed by the Treasury in clearing of checks, servicing of bonds, handling of collections, and rendering of accounts for such agencies.

On nos. 48, 49, and 52, relating to appropriations for transportation of foreign mails under contracts authorized by the Merchant Marine Act of 1928.

LOUIS LUDLOW,
JOHN J. BOYLAN,
EMMET O'NEAL,
JOHN TABER,
CLARENCE J. MCLEOD,
Managers on the part of the House.

Mr. LUDLOW. Mr. Speaker, I yield to the gentleman from Pennsylvania [Mr. RICH].

Mr. RICH. Mr. Speaker, I should like to ask the gentleman, with the exception of Senate amendments 26, 48, 49, and 52, how much the bill has been increased over what it was when it left the House?

Mr. LUDLOW. I may say to the gentleman from Pennsylvania that the total increase is $2,851,063. The Senate increased the House bill in the sum of $7,438,723. The House conferees were able to induce the Senate conferees to recede to the extent of $4,587,660, which leaves a net increase of $2,851,063.

Mr. TABER. Mr. Speaker, will the gentleman from Indiana yield for a question?

Mr. LUDLOW. I yield.

Mr. TABER. It is a fact that the House conferees fought over every dollar of difference between the two Houses.

Mr. LUDLOW. That is absolutely correct; and I must say that we have brought to this House a report that is unanimous. So far as the House conferees are concerned, we are agreed as to every item, and the orderly parliamentary procedure is to adopt the report and then proceed to the amendments in disagreement between the House and the Senate.

Mr. RICH. I want to congratulate the gentleman from Indiana [Mr. LUDLOW] and the gentleman from New York [Mr. TABER] on trying to keep these amounts down, but hard as you gentlemen worked you need some help, for the items have not yet been cut down to the bone. As I read the conference report, the House conferees recede on 13 amendments and the Senate conferees recede on 13 amendments, yet 21 of the amendments carry increases as they now stand.

Mr. LUDLOW. I may say to the gentleman that, of course, a conference implies a yielding on both sides to a certain extent, and they did three-quarters of the yielding. We won, I think, a great victory in the conference between the two Houses.

Mr. RICH. I am behind the gentleman. He is doing good work; so is the gentleman from New York [Mr. TABER]. I see, however, four amendments in disagreement, nos. 26, 48, 49, and 52. These amendments will require more money. Is it proposed to ask us to disagree to these amendments?

Mr. LUDLOW. The gentleman from Pennsylvania is mistaken. If we yield to the Senate on these four amendments, it will make the amount less instead of more. These involve the controverted item of ocean-mail contracts.

I think the orderly procedure would be for the gentleman to permit the conference report to be adopted. Then we can consider at length each amendment in disagreement.

Mr. RICH. Maybe I do not quite understand the situation, but the last sentence of the conference report reads:

The committee of conference report in disagreement amendments nos. 26, 48, 49, and 52.

These amendments, when finally disposed of, will represent another increase.

Mr. LUDLOW. I may say to the gentleman that if we adopt all of them the amount carried by the bill will not be increased.

Mr. RICH. The conferees did not agree to these amendments?

Mr. LUDLOW. No, we did not; and we do not intend to.

Mr. RICH. Then, the conferees did a good job.

Mr. LUDLOW. Let me say to the gentleman that I believe he and I think alike on a great many lines; and I am sure it will be comforting to his economic soul to know that this bill, as it now stands, is $16,743,068 below the actual appropriation for these two departments for the fiscal year 1936, which is a very substantial reduction.

Mr. RICH. I agree on that point, but do not forget that Congress has asked the Committee on Appropriations to do a lot more for the Post Office Department which has increased the bill very materially. The fact of the matter is that the Post Office appropriation bill this year is some $29,000,000 or $30,000,000 more than it was a year ago.

Mr. LUDLOW. I thank the gentleman for his contribution, but, as a matter of fact, we have been able, by the most assiduous attention to effect this reduction, notwithstanding statutory requirements like the 40-hour week, which we could have no control over but which had to be provided for in the bill. So that we have really accomplished quite a material reduction.

Mr. RICH. I agree with the gentleman, and I think it should be driven home to the membership of the House that we ought to be careful in connection with the legislation we pass so that we do not increase all of these appropriations year after year.

Mr. O'MALLEY. Will the gentleman yield?

Mr. LUDLOW. I yield to the gentleman from Wisconsin.

Mr. O'MALLEY. Is it not true, if we adopt Senate amendments 48, 49, and 52, it will result in an additional saving of $20,000,000?

Mr. LUDLOW. It will result in a reduction of $22,000,000, but there is a question whether we ought to do that or not. There is involved a question of moral standards and obligation of contracts.

Mr. O'MALLEY. I want to make it clear, for the benefit of the gentleman from Pennsylvania, that the adoption of Senate amendments 48, 49, and 52 will bring about a saving of $22,000,000.

Mr. LUDLOW. Mr. Speaker, I move the adoption of the conference report.

The SPEAKER pro tempore (Mr. MCREYNOLDS). The question is on the adoption of the conference report.

The conference report was agreed to.

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Page 48, line 16, amendment no. 26:

"With the approval of the Director of the Bureau of the Budget, there may be transferred to the appropriations, 'Salaries, office of Treasurer of United States, 1937', 'Contingent expenses, Treasury Department, 1937', 'Printing and binding, Treasury Department, 1937', and 'Stationery, Treasury Department, 1937', from funds available for the Agricultural Adjustment Administration, Home Owners' Loan Corporation, Farm Credit Administration, Tennessee Valley Authority, Federal Farm Mortgage Corporation, and Reconstruction Finance Corporation, such sums as may be necessary to cover the expenses incurred in clearing of checks, servicing of bonds, handling of collections, and rendering of accounts therefor: *Provided*, That a statement of any transfers of appropriations made hereunder shall be included in the annual Budget.

Mr. LUDLOW. Mr. Speaker, I move that the House recede from its disagreement to Senate amendment no. 26 and concur in the same with an amendment.

The Clerk read as follows:

Mr. LUDLOW moves that the House recede from its disagreement to the amendment of the Senate no. 26, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following: "With the approval of the Director of the Bureau of the Budget, there may be transferred sums (not exceeding a total of $450,000) to the appropriations, 'Salaries,

Office of Treasurer of United States, 1937', 'Contingent expenses, Treasury Department, 1937', 'Printing and binding, Treasury Department, 1937', and 'Stationery, Treasury Department, 1937', from funds available for the Agricultural Adjustment Administration, Home Owners' Loan Corporation, Farm Credit Administration, Tennessee Valley Authority, Federal Farm Mortgage Corporation, Reconstruction Finance Corporation, Federal Emergency Relief Administration, farmers' crop production and harvesting loans, Federal land banks, and other banks and corporations under the supervision of the Farm Credit Administration, Railroad Retirement Board, Soil Conservation Service, including soil conservation and domestic allotment, Social Security Board, Federal Housing Administration, and Emergency Conservation Work, to cover the expenses incurred on account of such respective activities in clearing of checks, servicing of bonds, handling of collections, and rendering of accounts therefor: *Provided*, That funds transferred hereunder from the appropriation for Emergency Conservation Work shall remain available until June 30, 1937, any provision in the First Deficiency Appropriation Act, fiscal year 1936, to the contrary notwithstanding: *Provided further*, That a statement of any transfers of appropriations made hereunder shall be included in the annual Budget."

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Mr. LUDLOW. Mr. Speaker, we have now reached the point where all amendments are disposed of except amendments 48, 49, and 52. Amendment no. 49 is partially dependent on amendment no. 52, and amendment no. 48 is wholly dependent on amendment 52; therefore, in the interest of expedition and clarity of action, I ask unanimous consent that amendment no. 49 may be passed over for the time being, and that amendments 48 and 52 may be considered together at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. LUDLOW. Mr. Speaker, I ask unanimous consent that the 1 hour usually allowed under the rule be extended to 2 hours for the reason that this is a controversial matter and numerous gentlemen have applied to me for time. I should like very much to be able to oblige all of those who desire to speak on this matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, and I shall not object to the request of the gentleman, but does he not think it may be possible to conclude the debate in less than 2 hours? We have some matters we are anxious to dispose of today.

Mr. LUDLOW. I may say to the gentleman that, of course, I have no desire to prolong the debate. I have quite a list of Members who desire to speak, and they very earnestly wish to be heard. I should like to accommodate them.

Mr. BANKHEAD. I shall not object.

Mr. RICH. Mr. Speaker, reserving the right to object, I should like to ask the majority leader what is coming up after we finish this matter?

Mr. BANKHEAD. Mr. Speaker, we had a resolution that we wanted to present this afternoon. I think we have reached an agreement with reference to the correction of the RECORD in connection with the remarks which the gentleman from Colorado made some days ago. We also have an omnibus private pension bill that we had hoped to pass today. We are hopeful we may get through with the program this afternoon and adjourn over until Monday.

Mr. RICH. Those are all the matters coming up this afternoon?

Mr. BANKHEAD. Yes; that is all we expected to call up.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the two amendments in disagreement.

The Clerk read as follows:

Page 60, line 6, amendment no. 48: Strike out, beginning in line 6, "(exclusive of mail carried under contracts awarded under the provisions of the Merchant Marine Act of 1928)."

Page 61, line 4, amendment no. 52: Strike out, beginning on line 4, down to and including line 11, which reads as follows:

"Foreign Mail Service, Merchant Marine Act: For transportation of foreign mails under contracts authorized by the Merchant Marine Act of 1928 (U. S. C., title 46, secs. 861–889; title 46, secs. 886–891x), including the cost of advertising in connection with the award of contracts authorized by said act, $26,500,000: *Provided*, That no part of the money herein appropriated shall be paid on contract no. 56 to the Seatrain Co."

Mr. LUDLOW. Mr. Speaker, I move that the House insist on its disagreement to Senate amendments nos. 48 and 52.

Mr. WEARIN. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. WEARIN moves to recede and concur in Senate amendment no. 52.

Mr. MARCANTONIO. Mr. Speaker, I should like to submit a unanimous-consent request. The motion just made by the gentleman from Iowa [Mr. WEARIN] covers only one amendment. I understand unanimous consent was granted that amendments 48 and 52 may be considered together. I therefore ask unanimous consent that the gentleman's motion be corrected to read that the House recede and concur in Senate amendments nos. 48 and 52.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LUDLOW. Mr. Speaker, I yield 10 minutes to the gentleman from New York [Mr. MARCANTONIO].

Mr. MARCANTONIO. Mr. Speaker, if this motion is agreed to, we will effect a saving of $22,000,000. However, the issue involved is not necessarily a saving of $22,000,000. The issue raised by the motion offered by the gentleman from Iowa [Mr. WEARIN] goes deeper. It goes into the question of ship subsidies. It goes into the question of subsidizing a merchant marine which today, Mr. Speaker, needs overhauling and drastic reformation.

The present American merchant marine is a disgrace to the flag it carries. The American merchant marine today cannot, in any manner, pretend to grant safety at sea to any of its passengers. Any such pretension is a fraud. The facts speak for themselves. The treatment of the crews, the equipment, the general condition of these ships, and especially the construction, proves one thing conclusively, and that is that they have given us a ginger-bread top and down below these ships are not fit for either habitation or sailing.

About 3 weeks ago I submitted to the Secretary of Commerce 110 statements, each statement made by a seaman—110 written statements by seamen who had won medals for bravery at sea. These men had first-hand knowledge of safety-at-sea conditions, and these 110 statements were submitted by 110 seamen, I repeat, who had won medals for bravery at sea, and these statements revealed horrible conditions on these ships, not only as to working conditions but actually as to safety-at-sea conditions.

The Secretary of Commerce promised to investigate this situation. Up to now absolutely nothing has been done and no action has been taken on this memorandum containing 110 charges, charges giving the names of the ships and charges giving the names of the companies involved.

Mr. Speaker, I charge right here and now that these shipping companies outdo Al Capone by millions of dollars. They are racketeers of the lowest order. They are not giving the American passengers safety at sea, and what is more, they are mistreating the crews, submitting them to the worst form of living and working conditions. I wish you gentlemen had an opportunity to examine these ships. Do not look at the upper deck, do not look at the decorative portions of the ship, but go down and see where the men are living, and you will realize that these ships are a disgrace to our country. They are a disgrace to the merchant marine of a great country such as ours.

Today, in New York City 4,000 American seamen are out on strike. They are conducting a heroic strike. These men are American seamen, seamen who have dedicated their lives to safety at sea, and ships today are going out to sea being manned by W. P. A. workers. Get that! Ships going out to sea carrying passengers are being manned by W. P. A. workers. Take your steamship *California*, for instance.

When it went out the other day and had to come back, a recheck of the shipping crew showed that the ship crew was composed mainly of W. P. A. workers and that it did not have the number of able-bodied seamen required by law.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. MARCANTONIO. I yield.

Mr. KNUTSON. The gentleman does not contend that a person who is on W. P. A. should be barred from honest work?

Mr. MARCANTONIO. I contend that a person who is on W. P. A., if he is not an able-bodied seaman, should not be allowed to do the work of an able-bodied seaman, because unless you have able-bodied seamen on a ship you are imperiling the lives of the passengers on that ship. Remember the *Morrow Castle*.

Mr. KNUTSON. The gentleman knows that a boat that is not fully manned by able-bodied seamen would not receive clearance papers.

Mr. MARCANTONIO. That is just it. They are receiving clearance papers every day, and I make that charge, and we have submitted proof of that to Secretary Roper.

Mr. KNUTSON. That would be murder.

Mr. MARCANTONIO. Well, I am not going that far. I am not entering into that at all. I am pointing out the facts. I am interested in the facts, and I am not interested in arriving at any political conclusions. The facts are that ships are today being manned by W. P. A. workers from the city of New York, none of whom are qualified as able-bodied seamen.

Mr. MORAN. Mr. Speaker, will the gentleman yield?

Mr. MARCANTONIO. I yield.

Mr. MORAN. Of course, there are plenty of qualified, able-bodied seamen in this country to man the merchant marine.

Mr. MARCANTONIO. Of course, there are plenty of them.

Mr. MORAN. Will the gentleman state to the House the reason they are not manning them?

Mr. MARCANTONIO. I will tell you why they are not manning them. It is because these men have been insisting on two things. They insist on decent wages, decent living and working conditions, and, second, real safety at sea. The companies do not want to comply in either respect. All they are interested in is money. They are racketeers, racketeering on the Government, on the seamen, and on the passengers. Hence, in order to break the strike, they are using W. P. A. workers, who are not able-bodied seamen, as scabs to work the ships, thus exploiting labor, cheating the Government, and imperiling the lives of passengers. Withhold this appropriation and you will force these companies to come to terms. We owe them nothing. They have broken repeatedly their contractual obligations. That releases the Government from any obligation to them.

Yesterday we had a letter read by the Speaker of the House from the president of the American Federation of Labor. We are the Congress which is supposed to protect labor. Yet we are asked to turn over $22,000,000 to a gang of labor exploiters who refuse to give decent wages or decent living quarters to the seamen, but employ W. P. A. workers as scabs.

If we agree to concur in the Senate amendment and refuse to give the $22,000,000 to the shipping companies, we may force out of Congress a real bill, with provisions protecting both labor and the passengers. How can any friend of labor consent to give this money without any provision to protect labor and passengers?

I am in favor of a merchant marine. I want a merchant marine, as all of us do. But before we turn over $22,000,000 to anybody let us, at least, turn it over by means of a bill that will protect American seamen and American passengers.

Mr. KNUTSON. Will the gentleman yield?

Mr. MARCANTONIO. Yes.

Mr. KNUTSON. The strike in New York is being fomented by Communists, and it ought to be stopped.

Mr. MARCANTONIO. The gentleman from Minnesota is making the same mistake that tories make when a strike exists. They send up a camouflage of red in order to conceal the real issues.

Mr. KNUTSON. It is an outlaw strike.

Mr. MARCANTONIO. It is no more an outlaw strike than the gentleman is an outlaw Congressman. [Laughter.] I brought these men down to Washington. I brought them here and took them before the Secretary of Commerce. Who were these men? Every single man had won a medal for bravery. They gave the Secretary facts straight from the shoulder.

The Secretary of Commerce said, "Make memorandum of that" and "make a memorandum of this", and we gave him the memorandum. Three weeks have gone by, and we have received no communication from him. He promised he would investigate. To date no sign of any investigation. Whenever workers ask for a decent wage or decent living conditions they are called "reds." These men are good Americans, and the man who questions the Americanism of these men is not a good American himself.

Mr. MORAN. Will the gentleman yield?

Mr. MARCANTONIO. I yield to the gentleman from Maine.

Mr. MORAN. The gentleman realizes that the subsidy was allowed because of the increased cost of operating American ships, and that since that time they have cut wages.

Mr. MARCANTONIO. Exactly; they received the money and then they cut wages.

The SPEAKER pro tempore (Mr. McREYNOLDS). The time of the gentleman from New York has expired.

Mr. LUDLOW. Mr. Speaker, I yield 5 minutes to the gentleman from Wisconsin [Mr. O'MALLEY].

Mr. O'MALLEY. Mr. Speaker, the motion of the gentleman from Iowa is to recede and concur in the Senate amendment. The effect of that motion would be to cut $22,500,000 off the ocean-mail subsidy contracts from the Treasury-Post Office Department appropriation bill as it passed the House. I hope the motion of the gentleman from Iowa will be adopted. First, it is about time we stopped, once and for all, this system of subsidy to a few privileged ship operators who happen to stand in the political and financial good graces of certain bureaucrats. We have had it a long time. The Democrats least of all can stand in favor of such a system of subsidies. Last year we tried for 3 days to get a roll call on the ship-subsidy bill. Nobody seemed to want to go on record as to whether or not we should continue that system of graft, which usually has the American flag wrapped around it so it can be disguised as patriotism.

At that time I called the attention of the Democratic Members of the House to the expressions in their own party platform on this question of ship subsidies and ocean-mail contract subsidies. Of course, it may be a unique thing in these days to remind anybody of a campaign platform, but another campaign platform is probably in the making, and I believe I can safely predict that both parties will have the same opposition to subsidies in their platforms that the Democratic Party has had for a long time. I will read what the Democratic platform said about these ship subsidies:

> We oppose as illogical and unsound all efforts to overcome by subsidies the handicaps to American shipping and commerce imposed by Republican policies.

Of course, I would not be at all surprised that the Republican side of the House voted to keep this $22,000,000 subsidy in effect. It started under their policies and was most viciously consummated under Hoover, but I think the people would be surprised if the Democrats should vote to keep up a racket which was a national scandal under Republican rule.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. O'MALLEY. I do not have the time. If the gentleman will get me more time, I will yield.

That twenty-two and a half million is not a very great saving, but it is an indication of the attitude of this House toward ocean-mail contracts. Those contracts have been as great a scandal as the Teapot Dome scandal ever was. The American people know that only a few privileged ship operators make anything out of it. One ship operator got a

million dollars for carrying 1 pound of mail. The record will sustain that. If we adopt the preferential motion offered by the gentleman from Iowa to recede and concur in the Senate amendment, we take twenty-two and one-half million dollars away from these racketeers. We do not have to pass the buck to either the President or Postmaster General. We should do our duty and cancel these contracts by refusing this appropriation.

I now yield to the gentleman from Alabama, the majority leader.

Mr. BANKHEAD. Of course, in years past I have opposed subsidies very bitterly. I was on a select committee in 1922 to investigate those subsidies.

Mr. O'MALLEY. There was an investigation made of the ship subsidies; yes.

Mr. BANKHEAD. But here is the proposition as it appears to me in the pending measure, and I am inclined to support the recommendation of the subcommittee upon it: Here is a commitment by the Government to the ship operators, under existing law, entered into in good faith, that the evidence tends to show is most essential, at least at present, for the continued operation of these merchant lines. Now, when we have a contract, ought we not carry it into effect, whether it is a good one or a bad one?

Mr. O'MALLEY. Those contracts were entered into under the Merchant Marine Act in 1928, and the very reason why this amount is in this bill is because this House last year passed the merchant marine subsidy bill by only eight votes, so small a margin that the Senate has not seen fit to consider it yet. The advocates of subsidies for profiteers and millionaires are attempting to carry through here a continuance of what this House has termed fraudulent contracts and were entered into without competition as far back as 1928.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. LUDLOW. Mr. Speaker, I yield 10 minutes to the gentleman from Maine [Mr. MORAN].

Mr. MORAN. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include therein a very few short quotations from public documents.

The SPEAKER pro tempore (Mr. MCREYNOLDS). Is there objection to the request of the gentleman from Maine?

There was no objection.

Mr. MORAN. Mr. Speaker, the question before the House is whether the House will concur in the Senate amendment to strike from the Treasury and Post Office appropriation bill the appropriation for the foreign ocean-mail contracts or whether the House shall adhere to its original position of including that appropriation in the bill. There are several pertinent points which merit consideration.

First let us consider the cost of ocean-mail contracts. I quote as follows from pages 8 and 9 of House of Representatives Document 118, Seventy-fourth Congress, first session:

MAIL PAY

Mail pay has constantly increased since the enactment of the 1928 act. The mail contracts for the fiscal year 1929 amounted to approximately $9,000,000; in 1930 they were $13,000,000; in 1931 they were $18,000,000; in 1932 they amounted to $22,000,000; in 1933, $26,000,000; and in 1934 they were $29,000,000. For 1935 they are estimated at $28,850,000. For 1936 the amount would have been $32,851,954 if the contractors were to receive the amounts due by reason of reclassification of ships, new ships, and full performance of the service, but the Budget Director disapproved of the increased allowance and recommended that the appropriation be continued as for the fiscal year 1935.

If the present contracts continue, there will have been paid thereunder the approximate total of $308,095,160.30. There has already been paid by the Post Office Department under these contracts the sum of $119,257,756.63 up to June 30, 1934, leaving the estimated amount for the balance of the terms of the present contracts at $188,837,403.67.

If the mail had been carried on a foreign poundage basis up to June 30, 1934, the cost would have been $6,802,434.90, and if carried at the American poundage rate the cost would have been $15,534,509.10. The difference between the American poundage rate and the amount actually paid could be called nothing except a direct subsidy paid with the expectation that it would be properly used in the building of a merchant marine. This has already amounted to more than $100,000,000, and during the life of the contracts the excess cost, or subsidy, will amount to around $268,000,000.

From the above quotation it will be readily seen that the decision on this question is a very important one and means millions of dollars to the taxpayers of the United States.

The second point to consider is the result of these foreign ocean-mail contracts. A careful reading of House of Representatives Report 1277, Seventy-fourth Congress, first session, will convince anyone that our present policy is not producing an adequate merchant marine. All informed persons on this subject, regardless of what views they may have as to the proper remedy, agree in the position that our present system is most unsatisfactory. This fact should be borne in mind when we realize that the question before the House is to continue to pour millions of dollars into a system which admittedly is not producing desired results.

Third. We should not forget that in the President's message to Congress, dated March 4, 1935, that he specifically stated that "the Congress should provide for the termination of existing ocean-mail contracts as rapidly as possible." The President, of course, asked for a new system but agrees that the existing contracts should be canceled.

Fourth. It should be borne in mind there actually was no competitive bidding for these contracts as required by law. Following is a quotation from pages 11 and 12 of Senate Report 898, Seventy-fourth Congress, first session, clearly demonstrating that there really was no competitive bidding for these contracts.

NULLIFICATION OF COMPETITIVE BIDDING

It was contemplated by the Merchant Marine Act of 1928 that the Postmaster General should first determine what ocean-mail routes should be established and certify them to the United States Shipping Board. The Shipping Board was then to determine and certify to the Postmaster General the type, size, speed, and other characteristics of the vessel which should be employed, the frequency and regularity of sailings, and all other facts bearing upon the capacity of the vessels to meet the requirements of the service stated by the Postmaster General. Upon receipt of this certificate, the Postmaster General was to advertise and secure competitive bids for furnishing the service in question. What actually happened was this:

The agents, lobbyists, and representatives of steamship lines descended upon the Post Office Department, which, acting in startling harmony with these alert and affable spokesmen of privilege, speedily reached decisions as to the "mail route" to be established, the character of service to be demanded (always a service then being operated by the prospective contractor, or which it was fully prepared to operate and which, in many instances as will be pointed out, it was then bound by guaranteed contract with the Government to operate for a term of years without additional aid in the form of mail pay), and the amount of compensation it was to receive. This procedure is in striking contrast to the expectation of Congress that this compensation was to be fixed by free competition between prospective contractors.

Having accomplished this preliminary spade work, the result of these cooperative labors was transmitted to the Shipping Board in the form of a "certification of the Postmaster General." This certification was accompanied by the representatives of the prospective contractors, who were equally at home in both places. Instantly and pliantly the Shipping Board "determined and certified" to the Postmaster General those things which the interdepartmental subcommittee and the prospective contractor had agreed upon in advance that the Shipping Board should certify. The route was then advertised and the contract let to the company, which had arranged in advance the service it was to render and the compensation it should receive. The Postmaster General has advised the President that 42 out of 43 active contracts are subject to cancelation, 40 of them because let in open defiance of the legal requirement for competitive bidding. This advice by the Postmaster General is based upon the transcript of evidence adduced before him, which is replete with proof that these contracts were regarded as the personal perquisites of favored shipping interests, considered as "pie" and parceled out as such.

This was "competitive bidding" as practiced under the Merchant Marine Act of 1928. In fact there was no competitive bidding. Officials and contractors combined to and did prevent it.

Fifth. I addressed a letter to the Comptroller General of the United States—which appears on page 1806 of the February 10, 1935, issue of the CONGRESSIONAL RECORD—making it clear that these contracts are voidable ab initio because of the fact that they were let without competitive bidding. I quote his reply, as follows:

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, March 5, 1936.

Hon. EDWARD C. MORAN, JR.,
House of Representatives.

MY DEAR MR. MORAN: I have considered your letter of February 10, 1936, with further reference to payments under foreign ocean-mail contracts suggested as voidable ab initio under the Merchant

Marine Act of 1928 (45 Stat. 694) because not awarded to the lowest bidder on the basis of competitive bidding.

Your letter quotes provisions of sections 406 and 407 of the cited Merchant Marine Act, setting forth the basis upon which ocean-mail contracts should be advertised for and entered into. Also, your letter refers to and quotes from the report of the Postmaster General to the President under date of January 11, 1935, the quoted excerpts indicating that the Postmaster General suggested to the President that practically all ocean-mail contracts entered into under the Merchant Marine Act of 1928 might be canceled for the reason that they were negotiated instead of being awarded to the lowest bidder after competitive bidding.

Section 406 of the Merchant Marine Act provided that before making any contract for carrying ocean mails the Postmaster General should give public notice by advertisement as therein directed and that—

"* * * Such notice shall describe the proposed route, the time when such contract will be made, the number of trips a year, the schedule required, the time when the service shall commence, the character of the vessels required, *and all other information deemed by the Postmaster General to be necessary to inform prospective bidders as to the character of the service to be required.*" (Italics supplied.)

It is provided in section 407 of the act that each contract for the carrying of ocean mail under the act "shall be awarded to the lowest bidder who, *in the judgment of the Postmaster General*, possesses such qualifications as to insure proper performance of the mail service under the contract." (Italics supplied.)

It will be noted that section 406 vested in the Postmaster General discretion with respect to "the character of the vessels required" and "the character of the service to be required." Consequently, it may be possible the specifications for such service were restrictive and confined the bidding to one or two steamship concerns operating on the proposed ocean-mail route. The provisions of section 407 place within the discretion of the Postmaster General the matter of determining whether the lowest bidder "possesses such qualifications as to insure proper performance of the mail service under the contract."

In view of those provisions of the law there is no basis for this office to question the action of the Postmaster General in selecting the bidder to whom any particular contract would be awarded in the absence of a showing of fraud or collusion in the advertising for bids and the awarding of the contracts.

The report of the Postmaster General to the President under date of January 11, 1935, was made pursuant to Executive Order No. 6792, of July 11, 1934. This Executive order was issued by the President under the provisions of section 5 of the act of June 16, 1933 (48 Stat. 305), in which it was provided:

"Whenever it shall appear to the President, in respect of any contract entered into by the United States prior to the date of enactment of this act for the transportation of persons and/or things, that the full performance of such contract is not required in the public interest, and that modification or cancelation of such contract will result in substantial savings to the United States, the President is hereby, upon giving 60 days' notice and opportunity for public hearing to the parties to such contract, authorized, in his discretion, on or before April 30, 1935, to modify or cancel such contract. Whenever the President shall modify or cancel any such contract, he shall determine just compensation therefor; and if the amount thereof, so determined by the President, is unsatisfactory to the individual, firm, or corporation entitled to receive the same, such individual, firm, or corporation shall be entitled to receive such portion thereof as the President shall determine and shall be entitled to sue the United States to recover such further sum as, added to said portion so received, will make up such amount as will be just compensation therefor, in the manner provided for by paragraph 20 of section 41 and section 250 of title 28 of the United States Code: *Provided*, That where any such contract makes provision for settlement in the event of modification or cancelation, the amount of just compensation as determined hereunder shall not exceed such amount as is authorized by said contract. Any appropriation out of which payments upon the said contract were authorized to be made is hereby made available for the payment of such just compensation."

The time for action under that provision of law was extended to March 31, 1936, by joint resolution of August 29, 1935 (49 Stat. 991).
